Puerto Exterior	ENPETROL	Dolphin 1,489 m. long with 3 moorings for ships of 11,000, 35,000 and 100,000 d.w.t. 2 pipes for crude oil of 30 in. diameter and 56 in. diameter. Capacity 3,500/12,500 t.p.h. 6 pipes for fuel-oil, petrol, diesel and unballasting of 20 in. diameter. Capacity 100/1,800 t.p.h. 3 pipes for naphtha, propylene and kerosene of 14 in. diameter. Capacity 400 t.p.h. Monobuoy for loading and unloading of ships up to 250,000 d.w.t. in normal conditions and exceptionally up to 325,000 d.w.t. and 40 m. draft. 2 floating hoses of 300 m. radius of 24 in. whose connection with the ships is 16 in. ASA or 150 lb. and a capacity of 12,500 t.p.h.

CARGO HANDLING EQUIPMENT: (Private).
Fork Lift Trucks: 50×2.5–40 tons.
Fork Lifts with Spreaders for Containers: 4×40 tonnes and 3×25/32 tonnes.
Shovel Loaders: 43×0.5 tonnes – 13.5 tonnes.
Grabs: 9×3 tons; 13×5 tons; 47×6 tons; 44×12 tons and 9×16 tons.
Hoppers for Trucks: 17×8 tonnes – 50 tonnes.
Conveyor Belts: 11×250-800 t.p.h. for bulk cargoes.

TANKERS:
A.S.E.S.A.:

Berth	*Length* (m.)	*Depth* (m.)	*Use*
Platform 50	280	14.0	Petroleum
Platform 20	180	11.0	Petroleum
Platform 6	130	9.0	Petroleum (also see "LPG")

ENPETROL:

There are 4 berths with the following identification and characteristics:

Berth	*Max. Draft*	*d.w.t.*	*LOA*
80 S	14.47 m. (47.59 ft.)	100,000	149 m. – 269 m.
35 S	11.40 m. (37.50 ft.)	40,000	85 m. – 210 m.
35 T	11.40 m. (37.50 ft.)	40,000	85 m. – 210 m.
11 S	8.05 m. (26.48 ft.)	11,000	25 m. – 140 m.

Mooring and unmooring manoeuvres are performed with the assistance of tugs.

No engine repair is allowed that could prevent the immediate departure of the tanker. The International Safety Regulations are to be observed.

Monobuoy:

SBM type, with a diameter of 11 m. Anchored with 6 chains, 42 m. depth. Connected to the Monobuoy are 2 floating hoses of 24 in. diameter, 287 m. length. Vessels sailing in the proximity should give a wide berth.

The Monobuoy geographic location:
Lat. 41° 04.1′ N., Long. 1° 13.3′ E.

Day marking of Monobuoy: Yellow "X" shaped figure. Night marking by yellow light visible all round, with 4 flashes every 20 secs., range 5 miles.

Dirty Ballast:

At the installations of EMP there is a plant for the disposal and treatment of ballast with a maximum capacity of 30,000 cu.m. at a maximum flow of 2,000 cum.p.h. The plant is available to all tankers due to take cargo in the Pantalan.

Also see "Specialised Cargo Handling Facilities".

NOTE: The EMP Jetty and Terminal Port Captain requires: (1) Vessels due to load/discharge liquid products must guarantee at all times their tanks are free of oxygen; and (2) vessels fitted with IGS must provide for and prove their system is in good working order before approaching any of the EMP jetty berths.

Gas Free Certificates: Gas Free Certificates will be required for all tankers, no matter what the previous cargo carried was.

Inward Cargo Manifest: The Customs House will no longer accept general cargo denominations like "chemicals", "productos quimicos", "acids", etc.

All commodities must be manifested with their denominations, viz. "Ethylglycol", "Styrene Monomer", "Sulphuric Acid", etc.

LPG:
Asesa Berth No. C-06:

Ship's Length	Minimum 75 m., maximum 125 m.
Draft	Maximum 25 ft.
Deadweight	Pier owners (Asesa) receive vessels up to 5,000 d.w.t. at this berth.
Allowed weather conditions for berthing	Max. wave height 70 cm. – 80 cm. Max. wind force 35 km./hr. – 40 km./hr.
Mooring Details:	See "Plan".

Products:
Ethylene:

Storage capacity	9,000 tonnes (2 tanks)
Operating pressure storage tanks	10 gm. – 65 gm.
Design pressure storage tanks	70 gm.
Compressor capacity	4.6 tonnes per hour
Pipe-lines to berth	Liquid nominal diameter 10 in. Liquid nominal diameter 2 in. (for pre-cooling purposes only)
Lengths of pipe-lines	1,100 m.
Unloading facilities on dock	Chicksan type DCMA, nominal diameter 8 in., length 46 ft.
Unloading rate max.	400 tonnes per hour at −103°C (at higher temperatures unloading rate decreases fast).

Propylene Oxide:

Storage capacity	1,600 tonnes (1 tank)
Operating pressure	0.3 – 0.45 kg./sq.m.
Design pressure	0.50 kg./sq.m.
Pipe-lines to berth	Liquid nominal diameter 8 in. Vapour nominal diameter 4 in.
Lengths of pipe-lines	1,100 m.
Unloading Facilities on dock	SS hoses nominal diameter 4 in. (for vapour)

FRESH WATER: Supply of fresh water by means of an underground pipe in all the commercial quays of the port. Rate 5 t.p.h. – 15 t.p.h. per connection. Max. rate per berth, 45 t.p.h. at Muelle Aragon.

Ship's Master advises that water is very saline and it is not advisable to take any on board.

FUEL: Fuel oil, diesel oil and gas oil available. Request of this supply should be done with 24 hours' notice through the Commercial Agent of Campsa.

CONSULS:
Brazil
Colombia
Costa Rica
Cuba
Finland
France
Guatemala
Italy
Sweden
United Kingdom

CUSTOMS ALLOWANCES: It is permitted to have a packet of cigarettes per person per day. Unlimited allowance of national drinks.
IDENTIFICATION CARDS: Not required.
REPAIRS: Small repairs available.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Not compulsory, if Master requires them he is provided with specialised staff for this purpose.
OPENING/CLOSING HATCHES: Although this work is normally carried out by crew it can be done as well by the stevedores if required at extra charge.
REPATRIATION: Facilities exist.
AIRPORT: The town of Reus 12 km. distance has a military airport that is also used for charter flights and regular flights to Madrid.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: January 1st and 6th; May 1st; June 24th; August 15th and 19th; September 11th and 23rd; October 12th; November 1st; December 6th, 8th, 25th and 26th. Also: Good Friday and Easter Monday.
POLICE/AMBULANCE/FIRE: Police 21 01 15; Ambulance at local hospital 21 15 54; Fire 54 70 80.
SHORE LEAVE: Allowed.
DEVELOPMENTS: Cataluna Quay, when completed, will accept vessels of 175,000 d.w.t.

SHIPMASTER'S REPORT: February 1987.
Vessel: 95,000 d.w.t.
Documents:
6 copies Crew List.
2 copies Crew Declaration.
3 copies Stores List.
1 copy Health Declaration.

Two Health Officers boarded. Ship's stamp required on all documents.

Anchorages: Vessel anchored one mile off East Breakwater. Bottom is mud and holding good.

Tugs: One tug secured forward and aft. 2 ship's lines used through the centre fairleads.

Berthing: Vessel berthed at the Southern outermost berth. Vessel steams in and lets go starboard anchor. Two headlines and one forward backspring are sent ashore after which vessel swings to port with assistance from the tugs. The backspring is to be kept tight. First line ashore aft is a spring. The lines to the tugs are sent ashore by a boat.

On completion of mooring the vessel has forward: 4 headlines, 2 breastlines and 2 springs. Aft: 4 sternlines, 2 breastlines and 2 springs and an additional line to the starboard quarter buoy.

Gangway: Normally a shore gangway is provided but on our visit it was being repaired.

Shore Leave: Passes are required for shore leave. Transport is required.

SHIPMASTER'S REPORT: June 1987.

Vessel arrived at 1700 hrs. and Pilot boarded at 1800 hrs. Vessel all fast at 1900 hrs.

On entering the Pilot boards about one mile from the breakwater and on departure he leaves just inside the breakwater.

Vessels of Panamax size use 3 tugs. Tugs' performance was reasonable.

Our arrival draft was 12.83 m. and the present maximum draft at the bulk terminal is 14.0 m.

There is a new berth nearing completion (Cataluna Quay) which will have a depth alongside of 20.0 m.

A new SBM is being positioned off the port to take maximum size vessels.

No Spanish arrival forms provided. I.M.O. forms used. Arms and Ammunition List, Passenger List and Drugs List required. These may be typed on ship's paper. Agent requires Load Line Certificate, Safety Certificate, Radio Certificate, Safety Construction Certificate and I.O.P.P.

Cargo operations commenced at 0900 hrs. the following day and cargo (11,000 tonnes) was completed at 0115 hrs. the next day. Documents completed at 0200 hrs. and Pilot boarded at 0300 hrs. The vessel was clear of the berth at 0340 hrs. and Pilot departed at 0410 hrs.

SHIPMASTER'S REPORT: September 1987.
Chart: BA. Chart No. 1193.
Documents:
6 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.
2 copies Cargo Manifest.

Terminal shore passes are issued to all crew members. Customs are likely to board the vessel at any time.

Anchorage: Anchorage is outside the breakwater in the area indicated on BA. Chart No. 1193. Depth is about 15 fathoms. This is not a good anchorage in Winter due to the heavy ground swell.

Pilotage: The Pilot boards at the anchorage or off the breakwater entrance near the green buoy marking the breakwater extension. Berthing is only carried out during daytime. However, unberthing is possible throughout 24 hours. Unberthing for small vessels may be allowed without the use of a Pilot if no Pilot available.

Movements inside the harbour only take place during daylight hours.

Pilot may be contacted on VHF Channels No. 12 and 9.

Berthing: Ethylene is handled at 2 piers operated by EMP (Berth No. 11) and ASESA. Vinyl Chloride Monomer (VCM) is handled at one pier by ASESA.

Vessel berthed port side to head out at Berth No. 11 (EMP). The berth is very open to southerly winds and swells. Moorings consisted of 3 head/stern lines and 2 springs at each end. The starboard anchor was also used and a line was run from aft to the off shore buoy.

Personnel are not allowed to walk down the pier. A mini bus is provided by the terminal. No stores are allowed on pier. The ASESA Pier is the nearest to the city and the depth on Berth "C" is 30 ft.

VCM is handled on Berths "B" and "C" and ethylene is handled at Berth "B". Vessel berthed starboard side to head out. Moorings consisted of 3 head/stern lines and 2 springs forward and aft. Port anchor used.

In Winter time a line is run to the offshore buoy aft and a heavy shore spring is provided forward. The berth is effected by wind and swells from the South but to a lesser extent that the EMP berth. Vehicles with stores are allowed to within 100 m. of the vessel. There is a mini bus every hour on the half hour from 0730 hrs. to 0230 hrs. from the pier to the city centre and on the hour from 0800 hrs. to 0300 hrs. from the city to the pier.

Cargo:
EMP: Ethylene is handled through an 8 in. Chicksan at the EMP Berth. The arm is the nearest arm to the shore. The ship's maximum pumping rate is allowed up to a back pressure of 2 Bar. Samples can take up to 3 hours.

ASESA: Ethylene is handled through an 8 in. Chicksan. Ship's maximum pumping rate allowed up to a back pressure of 3 Bar. Samples take about 3 hours.

DOW: Ethylene pipelines are interconnected between both berths so berthing can take place on either pier, depending upon availability.

VCM loading is also carried out at ASESA through stainless steel/rubber hoses of 4 in. (liquid and vapour). Ambient storage. (In August our intake temperature was +28° C). Vapour can only be pumped ashore. The terminal has 2 loading pumps which give loading rates of 90 t.p.h. or 150 t.p.h. Samples take 1.5 hours per ship's tank.

VCM storage capacity is 6,000 tonnes in 2 × 3,000 tonne tanks. One tank is for finished product and one for production. Maximum production 450 tonnes per day. However this is greatly reduced in the Summer months due to the high temperature.

Ethylene is purchased from local supplier to produce VCM.

General: There are many ship chandlers in the area.

Fresh water available by barge at both piers. Water is not of good quality and should be only taken in emergency.

Nearest main airport is at Barcelona which is 2 hours drive.

The construction of the breakwater extension has ceased for the present time. The Pilot reported that work is not expected to resume in the near future.

A new quay for bulk cargoes has been completed. Depth alongside 21 m. The channel and turning basin leading to the berth is also dredged to 21 m. Maximum draft permitted at the new berth is 20 m.

AUTHORITY: Junta del Puerto de Tarragona, Arranque Rompeolas s/n, 43004 Tarragona, Spain. *Tel:* 977-226611 and 226709. *Telex:* 56520 JOPT-E. *FAX:* (977) 225499. *Contact:* Antoni Pujol Niubo, President. Luis Grau Sbert, Port Director.

TORREVIEJA: 37.58 N. 00.40 W.

PORT LIMITS: The port limits are considered to be at 1 mile distance from the lighthouse at the end of the Eastern Dock or breakwater.

DOCUMENTS:
4 Crew Lists.
4 Lists of Passengers.
10 Cargo Manifests, including Cargo in Transit, together with cargo for Alicante. Tobacco and Cargo Manifests visaed by the Spanish Consul in the port of origin. All the vessel's certificates, and where necessary in respect of the cargo which international regulations require.

PILOTAGE: The corporation does not have a radio station, however, it does have a walkie-talkie with a range of about 12 miles on VHF equipped with the following Channels: 6, 9, 11, 14, 16. The pilot craft is 10 m. overall length and is painted white, with the letter "P" painted in black on the sides. The pilot craft normally operates within a 1 mile radius of the white light of the breakwater lighthouse.

ANCHORAGE: The anchorage which is most recommended for vessels is 1 mile from the breakwater, with a sandy bottom and good holding ground.
MAX. SIZE: The port's maximum sizes are: Overall length 150 m. Max. draft on entry of 21 ft., if the vessel has to remain anchored awaiting a berth, and max. departure draft of 29 ft. 6 in.
HEALTH: Regulations as laid down by the International Foreign Health Requirements are enforced.
RADIO: Coastal station at Alicante; on MF with average range of 220 miles, and on VHF with a range of 40 miles.
TUGS: None available.
BERTHING: There is a berth in the Western Dock, with a length of 360 m., and a max. depth of 10 m. The loading operations are effected by shore equipment, provided that bulk salt is being loaded, or with the vessel's gear when bagged salt is being loaded.
CRANES: The port has no cranes, however, a mobile crane can be used for any weight which has to be loaded, the max. capacity of this crane is 7 tons.
STEVEDORES: There are no stevedoring gangs as the work force is employed by the Salt Plant. The only commodity loaded is salt and work is between 0600 hrs. and 2200 hrs.
MEDICAL: If a doctor is required by the Master, medical services can be furnished locally, it being necessary to transfer the patient to clinic in Alicante, if the case is serious.
TANKERS: No facilities available.
DENSITY: Average port density is 1030.
FRESH WATER: Available. Rate 5 t.p.h.
CUSTOMS ALLOWANCES: Each crew member is permitted to have 200 cigarettes and 1 bottle of spirits out of ship's bond.
REPATRIATION: Possible.
HOLIDAYS: Normally no work is done in the port on the following holidays: New Year (January 1st), Epiphany (January 6th), San Vicente (April 23rd), Maundy Thursday, Good Friday; Labour Day (May 1st); Festival of San Pedro (June 29th), Corpus Christi; Santiago Apostol (July 25th); Assumption Day, Festival of the Spanish speaking world (October 12th); All Saints (November 1st); Immaculate Conception (December 8th) and Christmas Day (December 25th).
AUTHORITY: Ayudante Militar de Marina.

VALENCIA: 39.27 N. 00.18 W. (See Plan)

DOCUMENTS:
3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined for the port.
Another manifest covering transit cargo.
2 Stores Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Radio Certificate and Safety Equipment Certificate.

If vessel carries over 6 kilos tobacco per man, the excess to be declared in a separate manifest, which must be visaed by Spanish Consul at the last port, otherwise vessel is exposed to heavy fine.

Shipmaster's Report: November 1988.
Customs: 2 Stores Lists.
2 Crew Declarations.
2 Crew Lists.
2 (nil) Passenger Lists in Spanish.
2 copies Manifests of Cargo in Transit.
Quarantine: 1 Maritime Declaration of Health.
1 Crew List.
1 (nil) Passenger List in Spanish.
Agent: 1 Crew List.
1 Crew Declaration.
1 (nil) Passenger List in Spanish.
1 Stores List.

PILOTAGE: Pilotage is compulsory for this port. Day and night service. The pilot launch is painted black with a letter "P" painted in white on the sides.
ANCHORAGES: There is a good anchorage outside the port, vessels are required to keep the entrance channel clear.
RESTRICTIONS: Entrance to the port faces S.E. and is 260 m. wide, with a low water depth of 15.0 m.
MAX. SIZE: The following size vessels have entered the port.

GRT	*LOA*	*Draft**
85,982 tons	294 m.	10.67 m.
44,688 tons	257 m.	13.30 m.

*Real draft on entry/departure.

HEALTH: If the vessels proceed directly to berth, Pratique can be obtained immediately after berthing. Otherwise, at anchorage at vessel's arrival.

If vessel has sickness on board of a contagious nature Master should advise Health Authorities by radio, and they will examine patients immediately upon arrival, to enable vessel to be granted Free Pratique.
RADIO: Coastal radio station with international frequencies 1580 kHz.

ETA to be sent to Agent in advance.
TUGS: 10 tugs available up to 2,300 h.p. Two tugs normally used for berthing and unberthing.

BERTHING: Quays operated by Port Authority:

Name	*Length* (m.)	*Depth* (m.)	*Use*
North Basin New Quay	600.00	16.00	Solid Bulks
North Pier	176.00	9.00	Containers
Extension, Levante	600.00	14.00	Containers
Levante 1	150.00	9.00	Containers

Ship Breaking Quay	200.00	7.50	Ship Breaking (Private)
Pantalan	210.00	12.00	Petroleum Products (Private).

CARGO HANDLING FACILITIES:
Special Loading/Unloading Facilities:

Location	*Owner*	*Remarks*
Turia Pier Extension South	C.A.M.P.S.A.	3 petroleum products points connected to pipe-lines, pumping installation.
Turia Pier and Turia Pier Head	C.A.M.P.S.A.	Petroleum products point connected to pipe-lines, pumping installation.
Sur Breakwater	C.A.M.P.S.A.	Unloading or petroleum products. Pier with pipe-lines up to the factory.
Turia Pier Head	Cia. Valenciana de Cementos Portland, S.A.	Loading of cement in bulk conducted by a rolling bridge, crane fed, with a conveyor belt from silos.
Turia Pier Extension North	Demagrisa	Vegetable oils point. Point for wine. Both connected to a pipe system with pumping installation.
Turia Pier	Esdecasa	Pneumatic unloading of grains and seeds by a suction machine, connected to a conveyor belt placed in the gallery.
Turia Pier	Industrias Quimicas del Carbono	Chemical products point, connected by a pipe, pumping installation.
Turia Pier Extension South	Proas	Asphalt products point, connected by a pipe, pumping installation.
Turia Pier Extension South	Demagrisa	Point for wines, connected to a pipe-line, pumping installation.
Turia Pier	Terminales Portuarias, S.A.	Chemical products point, connected by a pipe-line, pumping installation.

Facilities for Specific Traffic:
Discharge of Petroleum Products: Pier capable of accepting vessels up to 210 m. long with 12 m. draft, having a discharging capacity of 1,000 t.p.h.
Loading of Cement: Special facility using two simultaneous systems by means of conveyor belts from silos and by pneumatic hose from truck, reaching an output of 800 t.p.h. This is carried out at a pier with depths up to 14 m.
Container Terminal: The main berthing line is 600 m. long and has a depth of 14 m., with 3 Portainer cranes of 32.5 tons capacity being available. The other berthing line is 176 m. long and has a depth of 9 m., with one Portainer crane of 30 tons capacity. It has surface area of 160,000 sq.m., with a storage capacity of some 6,500 containers (equivalent to 20 ft.) The equipment is comprised of 8 transtainers of 32.5 tons on wheels and 2 fork-lifts of 40 tons.
Roll-on/Roll-off Traffic: There are 12 specialised berths for this traffic. Between Muelle Levante and Transversal de Levante Exterior, there are 2 corner berths with depths of 12 m. and 7 m. In the Darsena Interior there are 7 berths with depths between 7 m. and 7.5 m.

Between Transversal de Poniente Exterior and Poniente there are 2 corner berths with water depth of 7 m. and 9 m. respectively. Finally, at Espigon del Turia Sur there is a berth with a 11 m. water depth.
Passengers Traffic: Modern marine station with fingers to embark/disembark at the Station Quay.

CRANES: The Port Authority operate 68 gantry cranes with capacity of 3 tons to 30 tons and 4 mobile cranes. 16 privately owned shore cranes and 3 privately owned mobile cranes also available.

TANKERS: *C.A.M.P.S.A.:* One berth, length 210 m., depth 10 m.
Pipe-lines: The port areas equipped for oil traffic are connected to the C.A.M.P.S.A. plant by means of a network of 5 pipe-lines, starting at the Turia Pier and Quay, and ending at the plant itself. These pipe-lines are 1×10 in. diameter with a capacity of 300 cu.m./hr., and another of 8 in. and 250 cu.m./hr. for movement of fuel-oil.

2×8 in. diameter and 250 cu.m./hr.; one for gas-oil and one for gasoline. There are also means of delivery of aviation paraffin by means of 1 pipe-line 6 in. diameter at the rate of 120 cu.m./hr. Also see "Berthing".

MEDICAL: All medical services available in the port and in the city.
REPAIRS: All types of hull and machinery repairs can be effected.
FLOATING DOCK: 1 floating dock available, owned by Union Naval de Levante. Interior length 143 m., interior width 24.60 m. Lifting capacity 8,000 tonnes.
CUSTOMS ALLOWANCES: Normally Customs permit 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. One bottle of spirit per man.
FRESH WATER: Available at all main berths at the rate of 30 t.p.h.
FUEL: C.A.M.P.S.A. can supply by pipelines at the Turia berths, at the rate of 100 t.p.h. – 280 t.p.h.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
AIRPORT: Valencia Airport, 15 km. from the port.

CONSULS: The following countries are represented in Valencia:

Argentina
Austria
Belgium
Benin
Bolivia
Brazil
Colombia
Costa Rica
Chile
Denmark
Dominican Republic
Ecuador
El Salvador
Finland
France
Germany (F.R.)

POLICE/AMBULANCE/FIRE: Police 091; Fire 3730080; Ambulance 3606211, 3526750.
HOLIDAYS: Work can be arranged on following holidays. New Year's Day (January 1st, full day); Epiphany (January 6th, full day); Saint Joseph (March 19th, full day); Easter (two days); Saint Joseph Artisan (May 1st, full day); Labour Day (July 16th, full day); Patron Saint of Spain (July 25th, full day); Assumption Day (August 15th, full day); Community Day (October 9th, full day); Holiday of Hispanicism (October 12th, full day); Holiday of the Virgin Mary (December 8th); Christmas Day (December 25th, full day).

The Public Container Terminal working time is 24 hours a day, every day, except Saint Joseph Artisan (May 1st, full day); New Year's Day (January 1st, full day) and Christmas Day (December 25th, full day).

DEVELOPMENTS:
Approaches to the Port: Improvements: In 1987 work on the approaches to the port continued, by finishing those already in progress and constructing a new stretch which will complete the whole communication with the port area.

The above mentioned work includes the construction of a two way bridge over the old river bed, and the widening of the latter in order to allow a better water flow.
East Breakwater: Work has begun on building a new area claimed from the sea, where chemical products terminal of TEPSA will be situated. It will allow its separation from the urban zone of Nazaret.
Levante and Cabanal Quay: Initial works have been finished on the expansion of the pier edge permitting the increase of the water depth from 9.0 m. to 12.0 m. in a section of 440 m. of the Levante Quay.

A jetty, 69 m. long and 3 m. wide, has been constructed at the Cabanal Quay to improve the fishing basin.
South Quay: Work has begun on building a new shed that increases the covered surface area available.

3,375 sq.m. of covered surface area will be gained, having a free space between pillars of 45 m. and a minimum free height of 8.50 m. anywhere.

Crew's Personal Effects List.
Ship's Particulars Declaration.

Note: Tobacco. In case the vessel carries more than 6 kilos of tobacco per man, the excess must be declared in a separate manifest, which must be visaed by a Spanish Consul. In the absence of the Consul, said document will have to be visaed by an authority of the former port of clearance. Otherwise the vessel would be severely fined.

PILOTAGE: Pilotage at Vigo is compulsory and the service permanent day and night. Pilots board in auxiliary motor-boats with a letter "P" in white at both sides of the hull and a blue flag with the letter "P" in white, near the entrance of the harbour, in the zone included inside Punta Lameda-Cabo Vicos on the channel of the South Entrance and inside Punta Caballo-Subrido, on the channel of the North, both situated to the West of the harbour. At night the pilot boats have a white light visible around the horizon and under this light another red one, also visible around the horizon. International Code signals used to call Pilot, or 4 long blasts on the whistle. Pilot station situated at Transatlanticos Pier 3. Pilot boats normally on station on a line connecting Borneira and Transatlanticos Pier.

ANCHORAGE: Several suitable anchorages in the Vigo Estuary, naturally sheltered, in depths of more than 35 m. The main anchorage opposite the port on the South side of the "Ria" has depths of 15 m. – 25 m.

MAX. SIZE: No limitation for length and beam, unlimited deep water approaches.

HEALTH: If vessels proceed directly to the berth, Pratique can be obtained immediately after berthing. Otherwise, at the anchorage on vessel's arrival. In case of suspected disease or fever on board, the Master must send a radio message to the Agent in order that they advise the Health Office.

RADIO: The nearest Radio Station is Vigo Radio, situated in the limits of Vigo Port.

TUGS: No tug-boats are required for entering the port. Only used for berthing ships from 120 m. length upwards according to Pilot's advice. At Vigo there are 5 modern tugs of 750 h.p., 950 h.p., 1,375 h.p., 1,600 h.p. and another of 5,000 h.p.. Tugs join vessel off the berth. Tug's line used at no extra charge.

BERTHING: The commercial piers to load or unload have a depth of up to 36 ft. and the Transatlantic Pier, depth of about 40 ft. at LW. The tide difference between HW and LW is about 3.5 m.

At Rande, in the Lower Harbour, there are very modern special loading installations for mineral ore, at an average rate of 2,000 t.p.h. The depth alongside this installation is 36 ft. LW.

Containers: Unloaded at the Arenal Quay with 15 tonne and 28 tonne cranes. Depth 10 m. at Spring low tides, and at the Transversal Quay with a 30 tonne crane.

Ro-Ro traffic: In addition to Bouzas Terminal mentioned below, there is one fixed ramp at the Commercial Quay, berthing length 250 m., depth 9.0 m. and 1 adjustable ramp at the Transatlantic Quay, berthing length, 200 m., depth 6.0 m.

Terminal de Transbordadores de Bouzas: 3 berths with Ro/Ro ramps, lengths 100 m., 150 m. and 200 m. Depths at LWS 8.0 m., 8.0 m. and 10.0 m. respectively. Storage area 60,000 sq.m.

Guixar Quay: 240 m. length with depth 12.0 m. and 550 m. with depth 17 m. Land area 22.0 Ha. The quay will be used for containers, bulk cargo and oil, when completed.

Repair Quay: Length 344 m. Depth alongside 5.0 m.–12.5 m. The quay is used for repairs to vessels whilst afloat.

CRANES: 43 cranes with capacity up to 40 tonnes. 2 floating cranes with capacity up to 150 tonnes.

TANKERS: Tankers berth at a pier depth alongside 11 m. at LW. Tankers up to 300 m. length acceptable. Inner berth suitable for vessels of less than 100 m. length with a draft of 6 m. Discharge lines 12 in., 10 in. and 2×8 in. diameter.

STEVEDORES: It is very important that Masters send advance notice regarding the vessel's ETA. With this notice, Agents can inform Shipper's or Receivers' stevedores accordingly, so that they arrange operations properly. The official working hours of the port for general cargo are Monday-Friday 0830 – 1230 hrs., 1400 – 1800 hrs. With intensive shifts 0830 – 1430, 1430 – 2030 and 2030 – 0230. Saturdays at holiday rates, 0830 – 1430 and 1430 – 2030 with possibility of 1 hour extension to complete only. Sunday and holidays: 0830 – 1430, with additional overtime payments till 0230.

MEDICAL: Doctors and hospital facilities available. Advance notice preferred in urgent cases.

DENSITY: Average 1026.

FRESH WATER: Available from the quays at the rate of 50 – 80 t.p.h. Can also be supplied by tugs at 500 t.p.h.

FUEL: Available from the Oil Pier or delivered by barge. 24 hours' notice of requirements recommended.

GANGWAY/DECK WATCHMEN: Available from shore if required.

OPENING/CLOSING HATCHES: Opening may be done by crew to avoid delays. Closing hatches usually performed by crew.

CUSTOMS ALLOWANCES: 200 – 250 cigarettes or 6 kilos of tobacco and 2 bottles spirits may be held out of bond for each person. Wine not restricted.

IDENTIFICATION CARDS: Shore passes are provided by the Agent.

CONSULS: Most countries have consulates at Vigo.

REPAIRS: All types of deck and engine repairs are possible.

SURVEYORS: Lloyd's Register.

FLOATING DOCKS: One floating dock available: Length 128 m., breadth 22.40 m.

REPATRIATION: Crew changes and repatriation can be arranged without difficulty.

AIRPORT: Local airport, situated 8 km. from the port, has at least 1 daily flight to Madrid. International Airport of Santiago de Compostela is 100 km. away.

TIME: GMT plus 1 hour in Winter. Summertime from March to September.

HOLIDAYS: 1st January; 6th January; 19th March (St. Joseph); Good Thursday; Good Friday; 28th March (local holiday, Reconquest Day); 1st May (Labour Day); Corpus Christi; 25th July (St. James' Day); 15th August; 16th August (Local); 12th October; 8th December (Immaculate Conception); 25th December.

POLICE/FIRE/AMBULANCE: Police Tel: 091 and 092. Fire Tel: 433333. Ambulance Tel: 410158.

TELEPHONES: No arrangement for connecting on board.

SHORE LEAVE: Allowed without restriction.

VILANOVA I LA GELTRU: 41.13 N. 01.44 E. (See Plan)

DOCUMENTS:

3 Crew Lists.
1 Passenger List or negative.
Manifest of Goods destined for Vilanova I la Geltru and in-transit.

Stores List, in duplicate, including tobacco, spirits, radios, etc. belonging to vessel.

Detailed list, in duplicate, of all personal effects of crew and passengers (tobacco, spirits, cameras, radios, etc.).

Tobacco – any excess over 6 kg. per person must be stated on a separate manifest duly visaed by Spanish Consul.

If on inspection differences are found (more or less), articles are removed and a heavy fine imposed.

PILOTAGE: Pilotage is compulsory and service permanent. Pilot informed by Agent of vessels ETA, given 24 hours in advance. When vessels approach the breakwater, Pilot will board. The pilot boat is white with a black "P" painted on the side. Contact pilot station on VHF Channel 16.

RESTRICTIONS: None but for draft. Vessels carrying dangerous cargo should get permission for berthing prior to arrival.

HEALTH: Pratique is obtained immediately after berthing. In case of suspected disease or fever on board, the Master must radio Agent in order to inform Health Officer in time.

RADIO: Radio Costera of Barcelona on 2182 kHz.

VHF: See "Pilotage".

TUGS: None. Barcelona's tugs could be hired should the vessel's size make it necessary.

BERTHING: Depth of water in centre of harbour 16 ft. – 20 ft. South Commercial Wharf length: 836 ft., depth 18 ft.; East: 721 ft., depth 12 ft. – 15 ft.

CRANES: Two railway portico cranes of 16 tons capacity, 1 mobile crane of 3 tons capacity and 1 mobile crane of 20 tons capacity.

STEVEDORES: 24 hours notice required in order to arrange gangs. Unloading rates depend on type of cargo.

MEDICAL: Any kind of medical service can be arranged if information received in time.
FRESH WATER: Plentiful supply of water by means of hoses from the pier to vessel.
FUEL: Can be supplied if required, but 24 hours notice required.
GANGWAY/DECK WATCHMEN: Not compulsory but advisable at night.
OPENING/CLOSING HATCHES: Normally opened/closed by the crew, otherwise according to "Charter Party". Lashing must be carried out by crew.
CERTIFICATES: Usual documents on board. Safety Radio, Safety Equipment, Derat and Registered Tonnage Certificates are the only ones required by Authorities.
CUSTOMS ALLOWANCES: Crew: 6 kg. tobacco per person. Passengers: 2 kg. per person. Any excess on this amount must be declared on a separate manifest as in-transit. Wine and/or Spirits: Only 1 bottle per person. Any excess must be declared on a separate manifest, as "cargo in-transit" and stowed apart from the tobacco and spirits carried under the Provisions List. This Manifest must be visaed by the Spanish Consul at the last port of call. Any infringement of this regulation will subject the vessel to the immediate imposition of a heavy fine and confiscation of excess tobacco.
CONSULS: See "Barcelona".
IDENTIFICATION CARDS: Not required.
SURVEYORS: Comisariado Espanol Maritimo "Comisar".
REPAIRS: Only small repairs possible.
REPATRIATION: Good facilities available.
AIRPORT: Barcelona Airport situated 40 km. distant and 30 minutes by car from Vilanova I la Geltru.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer (early April-late September).
HOLIDAYS: September 11th.
POLICE/AMBULANCE/FIRE: Police: 893.00.00; Ambulance: 893.10.80; Fire: 815.11.11.
AUTHORITY: Ayudante Militar de Marina, Vilanova I la Geltru (Barcelona-Espana). *Tel:* 815.42.19. *Cables:* Ayudante Marina, Vilanova I la Geltru.

Comissio de Ports de Catalunya, c/Dr. Roux No. 63, 08017 Barcelona. *Contact:* Zona Portuaria II-III, Ronda General Mitre 117, sobreatico – 08022 Barcelona. Tel: 211.31.16. Vilanova I la Geltru. Tel: (93) 815.52.19.

VILLAGARCIA DE AROSA: 42.36 N. 08.46 W.

(See Plan)

DOCUMENTS:
- Declaration of Health.
- 3 Crew Lists.
- Passenger List.
- 3 Cargo Manifests.
- Manifest for Cargo in Transit.
- Crew Declaration.
- Ship's Stores List.

PILOTAGE: Compulsory for entering, leaving, berthing, unberthing or shifting. Ships bound for any port in Arosa Bay, must report ETA through ship's local Agent 24 hours in advance of their arrival, specifying if GMT or local time.

Pilot Boarding Station: Ships bound for Villagarcia are normally boarded 2 miles off harbour breakwater (Lat. 42° 35.4′ N., Long. 08° 50.0′ W.). Under previous request Pilot may be obtained at Lat. 42° 31′ N., Long. 08° 57′ W. (2 miles off Rua Island). Pilots may be contacted by VHF Channel 12.

Pilot for Shifting or Departure: Notify at least 1 hour in advance.

Berths are requested through Ship's Agent and arranged by Harbour Authorities in advance.

Linesmen and Boatmen are arranged through Ship's Agent.

APPROACHES: Access through Arosa Bay main channel entrance in position Lat. 42° 28′ N., Long. 08° 59′ W.
ANCHORAGES: There is sufficient anchorage for any size of vessel in Arosa Bay. Vessels awaiting Pilot at Rua Island may anchor 1 mile Southward of Rua Island, in depths of 35 m. to 40 m, bottom is mud. For anchorage in the harbour area (Eastward of El Seijo light), a Pilot must be arranged.
MAX. SIZE: No restrictions, except max. draft 7.0 m. (23 ft.) at LWS.
RADIO: Nearest stations are: Santa Eugenia Radio, VHF Channel 16; Finisterre Radio, MF 2,182 kHz.
TUGS: Compulsory for ships of 90 m. LOA or more.

One small tug available. Additional tugs may be called from Vigo when required. Ship's lines normally used.

BERTHING:

Berth Name	*Wharf Length* (m.)	*Depth Chart Datum* (m.)	*Remarks*
Comercial W.	243	7.0	Bulk cargoes through pipe-lines and general cargo.
Comercial N.	80	7.0	General cargo.
Comercial E.	300	3.0-7.0	General cargo.
Pasajeros	310	3.0-4.0	Passengers.
Ramal	270	3.0-7.0	Bulk and general cargo. Depth restrictions in access channel.

CRANES: 5×6 ton and 3×3 ton electric cranes at Comercial Mole. 2×3 ton electric cranes at Ramal Mole.

Mobile diesel cranes also available as required.

SPECIALISED CARGO-HANDLING FACILITIES: Discharge of cement in bulk through pipe-line at Comercial Mole-West. Discharge/loading of liquid chemical products and asphalt through pipe-lines at Comercial Mole-West.
STEVEDORES: Normal working hours for general cargo: 0830-1800 (break 1230-1400). Normal working hours for frozen cargoes (2 shifts): 0830-1430 and 1430-2030. Advise ETA before 1700 hrs. in order to commence 0830 hrs. next day.
TANKERS: Discharge lines: 4 in. for methanol, 6 in. for urea formaldehyde, 8 in. for asphalt, at Comercial Mole-West. No slop facilities. No facilities to combat oil spills. No shore steam.
DENSITY: Normal density 1025. In severe rainy seasons may drop to 1020/1018.
FRESH WATER: Available at all berths. Order through Agent. Approx. rate 10 t.p.h.
FUEL: Gas-oil available by pipe-line at Comercial Mole.
SURVEYORS: Comisariado Espanol Maritimo available. Order through Agent.
HATCHES: Opening/closing of hatches to be carried out by ship's crew only.
REPAIRS: Small deck and engine repairs can be done. No dry-dock available.
REPATRIATION: Crew changes and repatriation possible.
AIRPORT: Nearest airport at Santiago de Compostela, some 50 km. away.
TIME: Western European time kept. (GMT plus 1 hour in Winter; GMT plus 2 hours in Summer).
HOLIDAYS: Set yearly by the Government. For details contact Agent.
POLICE/AMBULANCE/FIRE: Police 501864/500257; Ambulance 500987; Fire 501008/851633.
EMERGENCY CO-ORDINATION CENTRE: Harbour Master's Office, tel. 500209.
BANKS: Branches of main Spanish banks.
SHORE LEAVE: No restrictions. No shore passes. Seaman's Book is sufficient.
AUTHORITY: Junta del Puerto de Villagarcia de Arosa, Muelle de Pasajeros 7, 36600 Villagarcia de Arosa, Galicia, Spain. *Tel:* (986) 500238/501340. *Contact:* Port Director.

NOTES

Please also advise Shipping Guides Ltd.

Sri Lanka

GENERAL:

MINES: *Danger from Mines:* Reports have been received (1986) indicating that waters near Sri Lanka ports may be mined.

NAVIGATION: *Control of Navigation in Sri Lanka Waters:* The Sri Lanka Government has issued regulations controlling navigation in the territorial waters of Sri Lanka.

(1) No vessel shall enter or remain within Sri Lanka's territorial waters other than:

Vessels entering or leaving the ports of Colombo, Galle, Trincomalee and Kankesanturai.

Vessels navigating through the Traffic Seperation Scheme off Dondra Head.

Vessels laid up inside Trincomalee Harbour.

Vessels engaged in Sri Lanka's coastal trade.

Vessels waiting in the roads off the Port of Colombo with the approval of the Harbour Master.

Vessels navigating through Sri Lanka's territorial sea and internal waters in Palk Strait with the permission of the Commander of the Sri Lanka Navy.

(2) Any vessel which enters Sri Lanka's territorial waters in contravention of these regulations shall do so at their own risk, and the Sri Lanka Government shall not be liable for any loss or damage such vessel may suffer.

(3) The Master of any vessel which enters Sri Lanka's territorial waters shall identify itself if challenged by:

Any vessel responsible for performing coastguard duties.

Any aircraft.

Any Sri Lanka authority from land by radio.

(4) Any vessel which has to enter Sri Lanka's territorial waters for purposes other than those given in (1) shall do so only with the approval of the Harbour Master.

COLOMBO: 06.56 N. 79.50 E. (See Plan)

DOCUMENTS:

5 each of Crew and Passenger Lists.

8 Manifests.

1 Arrival Report for Pilot, including Dangerous Cargo Declaration.

1 Master's Declaration for Immigration, and same for Police.

2 Private Property Lists of Officers and Crew for Customs.

2 copies of Preliminary Report by Master for Customs.

1 Maritime Declaration of Health for Port Health Officer.

1 Master's Declaration of Cargo for Quarantine Department.

PILOTAGE: Vessels approaching port apply for Pilot by flying the "G" flag by day or 2 red lights at night. They can, in addition, flash the pilot station or use VHF Channel 16. The telegraphic address of pilot station is "Pilot Station Sri Lanka Ports Authority Colombo" and a provisional ETA 24 hours ahead is advisable with corrections thereafter. However, these are best channelled through the vessel's Agent. Pilot boat is a wooden motor launch with the word "Pilot" on its side. It flies the "H" flag by day or red and white lights by night according to the international code. Pilot boarding position is with the Southwest breakwater North end light in transit with North West Breakwater South end light at a distance of 1.0 miles off. Advice of where to anchor can be obtained from the Pilot by VHF or signal light.

ANCHORAGES: The anchorage off port is within 3 miles of the harbour mouth where up to 14 fathoms of water is available. 18 fathoms of water is available within 6 miles. This anchorage is to be used on instructions from pilot station.

All vessels arriving have to anchor South of Panadura (Lat. 6° 43′ N.) or off Negombo until instructed to proceed to the anchorage off harbour.

RESTRICTIONS: Entry may take place at all hours of the day and night.

MAX. SIZE: For entering harbour, max. draft 38 ft. and a length of 800 ft. is permissible. Beam is not critical. There is no appreciable rise and fall of tide.

Tankers' maximum dimensions for berthing alongside: Length 750 ft., draft 34 ft.

HEALTH: Vessel entering port must fly the "Q" flag until boarded by the Port Health Officer to grant Pratique. Pratique may be granted by radio if there is a doctor on board provided the ship is not calling from a port in India. A radio message should be sent within 24 hours of the vessel's ETA in the following terms "Last port — no quarantinable disease on board – Doctor on board" and the Port Health Officer will reply to the Agent confirming Pratique being granted by radio. Pratique is automatic if the vessel enters after calling at another port in Sri Lanka. If any quarantinable disease on board double "Q" flags must be hoisted prior to entering harbour.

RADIO: "Colombo Radio" with a call sign 4PB is the usual channel for communicating with Colombo.

VHF: The pilot station is presently available on VHF Channel 16 and the Authorities' Cargo Operations Control Room on VHF Channel 11.

TUGS: Tugs normally join the vessel at the harbour mouth and use ship's lines. Tugs are 2,000 h.p. – 3,000 h.p. Two tugs are available at any one time, 3rd tug on advance request.

BERTHING: There are no specific requirements relating to berthing space but early advice of draft and length is most advisable. See "Developments".

CONTAINER HANDLING FACILITIES: Total length of quays for container operations 1045 m. Depth 11.0 m. – 13.0 m. 6×35 ton gantry cranes and 1×30 ton crane. Reefer points 186. 74 forklift trucks, 2 tons – 40 tons capacity.

STEVEDORES: The stevedores at Colombo are the Sri Lanka Ports Authority, having the monopoly of stevedoring and lighterage. ETA at least 24 hours in advance if possible.

Working hours: (2 shifts) 0730 to 1630 and 1630 to 0400, depending on requirements, extendable until 0600.

Booking gangs: For discharge on 1st day, 24 hours advance notice required by Agent and thereafter at Agent's request at the end of shift.

MEDICAL: Although advance notice of medical assistance required is helpful, particularly when port stay is limited, it is not essential. Comprehensive hospital facilities are available either in private nursing homes or the Government hospitals. The following inoculations are required: cholera; yellow fever if calling from ports in East Africa and Mozambique.

TANKERS: There are 3 tanker berths, 1 for importing crude oil suitable for tankers of 750 ft. length, max. draft 34 ft. One berth for white oil tankers with max. draft 33 ft. One berth for fuel oil imports for vessels with a max. draft of 31 ft., and this same berth is used for exports when permissible draft is 33 ft.

The diameter of discharge lines;

Crude oil, 24 in., capacity 1,000 t.p.h.

White oil, 10 in., capacity 250 t.p.h.

Gasoline, 10 in., capacity 170 t.p.h.

Furnace oil, 14 in., capacity 500 t.p.h.

Naphtha, 12.75 in., capacity 450 t.p.h.

Pumping will not be commenced after nightfall. No residue discharge facilities are available.

There is an SPM 6 miles outside the harbour for discharge of crude oil. Max. size 180,000 tonnes deadweight. Pipeline 36 in.×9.2 km.

DENSITY: 1025.

FRESH WATER: Fresh water is readily available by barge and from hydrants at the Jaye Container Terminal. The rate of delivery is approx. 40 t.p.h. The water is of good quality.

FUEL: Furnace, diesel and gas oil available. Advance notice of at least 24 hours is advisable as the bunker requirements of the port often exceed the ability of the oil companies to supply immediately.

4 barges available, 450 tons, 650 tons and 1,000 tons. Fuel also available by pipe-line if berth (max. draft 34 ft.) available.

GANGWAY/DECK WATCHMEN: Watchmen are available and are to be recommended unless members of the crew are available to provide this service.

Piracy: Acts of piracy have taken place in the approaches to the port.

OPENING/CLOSING HATCHES: This work is normally carried out by the stevedores except in the case of McGregor or similar hatch covers which they will not handle.

CERTIFICATES: Register showing vessel's name, port of registry, gross and net tonnages and owner. Safety Equipment Certificates, quadrennial and annual, Ship's Articles (British) and Clearance from previous port and Derat Certificate.

CUSTOMS ALLOWANCES: Cigarettes 25 per man per day. Tobacco 1 oz. per man per day. Snuff 1 oz. per man per day. Spirits 0.25 bottle per man per day. Wine 1 bottle per man per day. Beer 2 bottles per man per day.

IDENTIFICATION CARDS: These are not essential but the crew is expected to carry some form of identification with a photograph on it when they leave the vessel.

CONSULS:

STORING: See "Prelims".

1. Yes, able store both by barge and truck.
2. Yes, vessel could store from barges during both loading and discharging.
3. Trucks could proceed alongside vessel.
4. Yes, fork lift trucks could be used.
5. Any operation could be carried out with prior approval of Customs, under Customs supervision.
6. No. Port Stevedoring labour has to be made use of. However, local riggers can be employed by obtaining special permission from the Chief Operations Manager of the Sri Lanka Ports Authority.

GENERAL: Ships should not discharge oil within territorial waters, dispose of any waste into harbour or on to quays, immobilise main engines without prior permission, use radio for transmission in harbour. Ships should hoist national flag during daylight hours.

SHORE LEAVE: There is no restriction on crew members being allowed ashore but advised to carry passport or other identification.

DELAYS: Delays for vessels working cargo are seldom over 24 hours. However, it is very unusual for vessels calling for bunkers, fresh water, stores, etc., to be delayed for more than a few hours.

DEVELOPMENTS: An additional tug of 3,000 h.p. (twin screw, Z-pellor) will be available in 1989.

A third container berth to be constructed at Jaye Container Terminal, Length 332 m. depth 13 m.

AUTHORITY: Sri Lanka Ports Authority, No. 19 Church Street, P.O.Box 595, Colombo 1. *Telex:* 21805 Ports Ce. *Contact:* Mr. W. Ameresekera – Chairman, Sri Lanka Ports Authority – *Tel:* 25559.

Mr. K. L. P. de Silva – Chief Operations Manager, *Tel:* 25049.
Capt. G. O. Henricus – Harbour Master. *Tel:* 21079.
Capt. S. Chinniah – Deputy Harbour Master. *Tel:* 22674.

GALLE: 06.01 N. 80.14 E. (See Plan)

PORT LIMITS: To the Eastward Unawatuna Point, to the Westward Gindurah Point, to the Southward the usual sea league from the line between these points.

DOCUMENTS: Pilot brings on board:

Arrival Report and Maritime Declaration of Health.

Port Health Officer boards vessel after berthing and collects Crew List, Passenger List, Maritime Declaration of Health. Examines crew, passengers and International Certificates of Vaccination.

Customs. Manifests, Bonded List, Passenger List, Cargo List, List of Currency, Port Declaration.

Immigration. 3 Crew Lists.

PILOTAGE: Apply for Pilots via local Agents. Send ETA not more than 24 hours prior arrival via Colombo Radio. Vessels telegraph direct to Harbour Master, Galle, via Colombo Radio. Vessels advised listen-in on Channel 16, VHF.

Pilot launch about 60 ft. long with white hull carrying word "Pilot". Pilot launch proceeds to vessels from Harbour Master's Office and Pilot will board about 0.25 mile to South of bell buoy. Vessels should anchor until pilot launch arrives and heave-up on approach of pilot launch; due to heavy swell prevalent *essential* vessels provide good lee for Pilot. Proper pilot ladder and two man ropes should be ready. Vessels anchoring should do so to the South or East of bell buoy. See "Anchorages".

ANCHORAGES: Best anchorage lies to Eastward of bell buoy where depth is 9 fathoms. To Southward of bell buoy depth increases to 15 fathoms. Vessels should anchor about 0.5 mile from bell buoy.

RESTRICTIONS: Vessels should not proceed North of bell buoy. Entry prohibited after 1800 hrs. and may be delayed by bad weather. Generally a wind force of over 25 knots and a swell of over 4 ft. delays entry.

MAX. SIZE: At present only 1 stream berth available for vessels of length 475 ft., max. draft 23 ft. in N.E. monsoon and length 450 ft., max. draft 21 ft. in S.W. monsoon.

Two alongside berths available for vessels up to 540 ft. length and 26 ft. draft. 750 ft. of quay space available.

HEALTH: The International Declaration of Health, handed to Master by Pilot, must be completed and returned to Port Health Officer, who boards after berthing. Port Health Officer also requires 2 Crew Lists, synopsis of Vaccination Certificates, Derat Certificate and examines Certificate of Vaccination.

RADIO: Colombo Radio.

VHF: Harbour Master's Office on VHF Channel 16, regular watch not maintained.

TUGS: At present only 1 tug of 250 h.p. available throughout year. If sufficient notice given (over 24 hours) an additional tug could be sent from Colombo (only available during N.E. monsoon). Tug meets vessel at berth, tug's lines used. Charges for tugs included in port (pilotage) charges irrespective of ownership of towing lines.

BERTHING: Vessel berthing in stream lies to both anchors and picks up 4 to 6 mooring lines from buoys aft. To pick up mooring lines, vessel should have ready at stern 2 messenger wires of 2.5 in. diameter and 60 fathoms length.

STEVEDORES: All stevedoring carried out by Sri Lanka Ports Authority. Gangs, lighters etc. are all arranged by Sri Lanka Ports Authority. 16 lighters of approx. 15 d.w.t. capacity available for working vessels in stream berth.

MEDICAL: All facilities available. Vessels arriving in Galle and requiring medical attention should cable Agent and "Port Health – Galle" at least 12 hours in advance.

DENSITY: 1025.

FRESH WATER: In cases of emergency up to 20 tons fresh water could be supplied daily in stream in 400 gallon tanks conveyed by lighters. Alongside main quay up to 50 tons per night could be supplied by Bowser.

FUEL: Bunkering Division of Ceylon Petroleum Corporation, Kolonnawa (off Colombo) can service vessels with small quantities of fuel. 5 days' prior notice required.

GANGWAY/DECK WATCHMEN: Ceylon Police Station. Two policemen aboard every vessel in harbour. For vessels berthed alongside policemen stationed aboard through day. For stream vessels policemen stationed only during hours when cargo worked.

OPENING/CLOSING HATCHES: Shore labour, but there is no objection to hatches being opened prior to labour boarding.

CUSTOMS ALLOWANCES: Present allowance 200 cigarettes per week, 2 bottles beer per day. Others proportionately.

CONSULS: All Consular Officers in Colombo, 72 miles away, 2 hours by train, 2.5 hours by road.

REPAIRS: No repairs possible as Galle open to S.W., essential that vessels have engines ready at all times. No shutdown permitted.

REPATRIATION: Sub-collector of Customs acts as Shipping Master and will sign on/off properly authorised crew changes.

AIRPORT: Colombo, approximately 130 km.

TIME: Standard Time is GMT plus 5.5 hours.

HOLIDAYS: Non-working days in the port (dates variable yearly): Sinhala and Tamil New Year in April; Wesak Full Moon in May.

POLICE/FIRE/AMBULANCE: Harbour Police 3222; Ambulance 2261. No fire brigade available.

TELEPHONES: No telephones available aboard.

SHORE LEAVE: Crew allowed ashore.

AUTHORITY: Sri Lanka Ports Authority, Closenberg Jetty, Magalla, Galle, Sri Lanka. *Tel:* 09-22963 (Resident Manager); 09-22824 (Assistant Harbour Master).

KANKESANTURAI: 09.49 N. 80.03 E.

SHIPMASTER'S REPORT: May 1979.

LOCATION: Kankesanturai (KKS) is situated on the North coast of Sri Lanka in position Lat. 9° 48′ 57.5″ N., Long. 80° 02′ 41.5″ E.

DOCUMENTS: See "Colombo".

APPROACHES: Kankesanturai cannot be approached directly from sea but is approached via the Pedro Channel. The area seaward of Pedro Channel is very shallow and abounding in reefs.

Approaches to Pedro Channel: The East coast is low lying and sandy with only palm trees. The landmarks for making Pedro Channel are (a) Mullaittivll Light and (b) an obelisk situated in position Lat. 9° 35′ N., Long. 80° 27.5′ E. Mullaittivll Light was not working and the obelisk which is 100 ft. high can hardly be distinguished because it is surrounded by vegetation. The best approach is to steam on a course of 280° (T) heading straight for the obelisk. (Note: Radar distances etc., could not be observed as the vessel's radar was out of order). This area is covered by BA Chart Nos. 2197, 2031 and 68A. These charts are not to be fully relied upon as the charts last large correction etc., was in 1947. This vessel did not have a working radar, hence it was decided to lower the boat and sound the intended track ahead. The track sounded was followed until the obelisk was ahead of the track and visible, which was in this case at about 5 miles. Once the vessel enters Pedro Channel it has to proceed on a course parallel to the coast. After altering course in a Northwesterly direction the obelisk which is the only mark in the area is soon covered by vegetation and not visible. The next landmark being the Point Pedro Lighthouse which is 25 miles away to the North. The objects marked on the chart like churches, buildings etc., cannot be relied upon at all as they are numerous.

Depths in Pedro Channel: As marked on the chart the depth in Pedro Channel varies from 6.5 to 9 fathoms. During this vessel's transit, it was suspected to be less and at certain points, the boat was again lowered and soundings of 28 ft. were obtained.

Approaches to KKS: After passing Point Pedro Light course was altered to West keeping about 3 miles off the land and dangers. "KKS" can be observed from quite a distance because of chimneys of a cement factory. The "KKS" lighthouse could also be visually observed at a distance of about 8 miles. When "KKS" lighthouse bore South, distance 2.5 miles, the vessel was stopped and again the boat was lowered to sound the anchorage area and approaches. Depths of 30 ft. to 36 ft. were found just 0.5 miles distance from the land. The anchorage was approached and this vessel anchored with "KKS" light distance 0.5 miles. Four shackles were used and throughout the stay the vessel held fast.

After anchoring soundings were taken all round the vessel and the least depth obtained was 31 ft. at low water. There is hardly any tide, the maximum difference being about 2 ft. The vessel usually lies in an East-West direction and when swinging around usually does so via North. Only on one occasion throughout the stay did she swing via the South.

RADIO: Communication with "KKS" even from Colombo (telephone) was very difficult, sometimes delays over 4 to 5 hours were experienced. "KKS" has no telex communication. The best method is to keep the vessel's radio station open and communicate via Madras Radio.

CARGO OPERATIONS: *Port of "KKS" and Discharging:* This is a anchorage only port which is open from March to October. Cargo is bagged on board and discharged into lighters. The lighters are then landed on the beaches and labour carries bags ashore to the warehouse which is about 30 yards away. On this vessel cargo was bagged during the night and discharged by day. There are at one time about 200 – 300 labourers on board. The labour for bagging and discharging are different. The average discharge rate worked out to about 800 tons. This is the first time the bagging had to be done as normally vessels calling are loaded with bagged cargo. The crane operators are very careful and follow the instructions given by the vessel with regard to the cranes. About 12 vessels call at this port per year during the season.

DENSITY: Density was found to be constant at 1025.

FRESH WATER: None available. Ample fresh water needed as water also has to be supplied to the labour.

PROVISIONS: Almost all types of provisions available at reasonable costs. Rice which is also available is of very poor quality. The Agents also handle the ship chandling.

LAUNDRY: Laundry facilities are available, but costs are slightly on the high side. This is also handled by the Agents.

REPAIRS: There is a small workshop available for mechanical/electrical repairs.

GENERAL: "KKS" is a very small town. The largest town being Jaffna which is 14 miles away. Buses and taxis are available.

CURRENCY: All currencies have to be declared and all currencies except Indian, Pakistani and Bangladesh can be changed in banks. The above three currencies are supposed to be banned in Sri Lanka.

AUTHORITY: Port soon to be controlled by Sri Lanka Ports Authority.

TRINCOMALEE (including Pulmoddai):

08.36 N. 81.15 E. **(See Plan)**

DOCUMENTS:

International Maritime Declaration of Health.
6 copies Crew List.
6 copies Passenger List.
Cholera or Yellow Fever Certificates required if vessel is arriving from an infected port.

PILOTAGE: Call Pilot on VHF Channel 16, also send ETA via Colombo Radio to pilot station. Vessels should indicate ETA through Colombo Radio, either to Agent or direct to Deputy Harbour Master, Trincomalee, at least 24 hours before arrival. No night pilotage. Pilot boards incoming vessels between hours of 0600 and 1800 hrs. about 2 cables Northward of Round Island (Lat. 8° 30′ 48″ N., Long. 81° 13′ 24″ E.). Vessels embarking Pilot should whenever possible lower an accommodation ladder. Vessels awaiting a Pilot should anchor 0.5 miles N.W. of Round Island light tower in depths from 11 to 13 fathoms.

Vessels arriving between 1800 hrs. – 2100 hrs. may be brought in at Deputy Harbour Master's discretion if they come to anchorage 5 cables N.W. of Round Island.

ANCHORAGES: Trincomalee Harbour is the only entirely sheltered natural harbour in Sri Lanka. Good anchorage may be found in almost any part of harbour in good weather.

RESTRICTIONS: Vessels may enter during hours of daylight only. Range of tide is very small and does not restrict entry.

MAX. SIZE: Almost unlimited length and draft can be accommodated in anchorage. Only 1 berth which can accommodate up to 650 ft. length, and 34 ft. draft. This jetty used for discharging tankers and bunkering.

HEALTH: The Port Health Officer boards vessels after arrival at anchorage to grant Pratique. Pratique automatic for vessels arriving from another port in Sri Lanka.

RADIO: All cables to Deputy Harbour Master, Agents, Receivers, etc., should be routed through Colombo Radio; call sign 4PB.

Pilot carries a portable VHF set, Channel 16, with about 2 miles range.

TUGS: One tug attends when required. Tow-lines generally not used; but if required tug or ship's lines used.

BERTHING: A bulk-grain berth to accommodate vessels of 800 ft. in length, and draft forward 41 ft. and aft 46 ft. is available at Malay Cove, in the vicinity of Round Point.

Also see "Developments".

Pulmoddai: Pulmoddai is a roadstead, on the Eastern coast of Sri Lanka and approximately 38 miles from Trincomalee. The loading season is usually from April to September.

The Mineral Sands Corporation has housing for their staff and a medical practitioner is employed by them who also acts as a Port Health Officer for granting Pratique to vessels.

The Corporation has two godowns with a capacity of 14,000 tons of rutile and 25,000 tons of ilmenite. Presently ore is transported by conveyor belts from the godowns for lighterage along a pier stretching up to 250 ft. into the sea. The Corporation has a fleet of 8 steel lighters, of which 6 are of 100 tons capacity and 2 of 200 tons capacity. The loading rate is around 2,000-2,600 tons per day working 5 hooks in good and fair weather.

The stevedore labour is private and is recruited from Trincomalee whenever a ship operates at Pulmoddai. As the stevedores stay on board until completion of loading, it will be necessary for the vessel to carry sufficient water to meet the stevedore requirements.

It is customary for the ship to provide food and accommodation for two Customs Officers and a representative of the Shippers during cargo operations.

Prior information is also essential by the Agents of vessel's ETA, etc., which should be passed to the Plant Manager of the Corporation at Pulmoddai by cable or telex to enable him to obtain labourers from Trincomalee.

There is no launch service, but the Corporation provides a launch on a schedule drawn by the Corporation, and the Agents could make use of this facility.

STEVEDORES: Stevedoring operations have been nationalised and are carried out by the Sri Lanka Ports Authority, Trincomalee.

TANKERS: One tanker berth at which vessels of 650 ft. length and 34 ft. draft are discharged.

DENSITY: Salt water.

FRESH WATER: Available, supplied by water barges.

FUEL: Marine heavy diesel and furnace oil can be supplied at 24 hours' notice.

GANGWAY/DECK WATCHMEN: Watchmen are provided by the Sri Lanka Ports Authority.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: Tobacco issued as required. Wine and/or Spirit issued as required.

IDENTIFICATION CARDS: Identity Cards or Passports are required to be carried by crew members ashore.

CONSULS: All Consular Officers are in Colombo.

REPAIRS: Only minor repairs can be carried out.

REPATRIATION: Crew changes and repatriation can be effected.

AIRPORT: No International flights through Trincomalee.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Dates of holidays are not fixed. Cargo work can generally be arranged on any holiday.

TELEPHONES: Police 2308; Ambulance 448; Fire 335. There are no telephone connections for ships.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Tokyo Cement Company Jetty is now in operation to discharge cement clinker by grabs. Length of berth 460 ft. Depth alongside 28.5 ft.

AUTHORITY: Sri Lanka Ports Authority, Inner Harbour Road, Trincomalee. *Tel:* 541395. *Contact:* Resident Manager/Deputy Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Sudan

PORT SUDAN: 19.37 N. 37.14 E. (See Plan)

DOCUMENTS:

Port Sudan Harbour Master's Declaration.
Sudan Customs Declaration.
Quarantine Form.
(All above forms to be filled by Master on arrival).
3 Crew Lists.
3 Passengers Lists.
1 Crew Declaration.
1 Dutiable Stores.
4 copies Manifest.
1 copy B/Lading.
1 Provisions List.

PILOTAGE: 24 hours' notice ETA. VHF Channel 14. Pilot boards South of South Wingate Beacon. Pilotage compulsory.

ANCHORAGES: Towartit Anchorage, approx. 8 km. S.E. of harbour.

RESTRICTIONS: No restrictions providing berth available.

Age Restrictions: The Sea Ports Corporation, Port Sudan, issued the following circular:

"(1) Ships of over fifteen years of age will not be allowed to work in the harbour unless able to produce a Sea Worthy Certificate stating that all deck appliances and propellers are fit for work and capable of lifting and handling all kinds of goods carried on board the ship. The Owner or the Charterers of the ship will be held responsible for the correctness of the Certificate and for any delay incurred due to defect or non-efficiency of ship appliances.

(2) Ships working within the Red Sea Basin will be allowed to enter the harbour despite their age limit or nationality provided that they produce the Certificate referred to in Para (1) above.

(3) Ships carrying goods to Port Sudan Harbour must not carry any packages which cannot be lifted by the ship's own gear or are away from the reach of their gear.

(4) Breaches of any of the above will be subject to a fine of two thousand Sudanese pounds."

MAX. SIZE: Length 850 ft. Max. draft at Oil Terminal 39 ft., other berths between 28 ft. and 34 ft. 6 in.

HEALTH: Radio Pratique obtainable if message sent not more than 24 and not less than 8 hours before arrival to "Quarantine, Port Sudan", with following information: Name of ship and ETA; Name of Agent; Whether surgeon carried or not; Whether illness on board, if so, what illness; Port of departure and last port of call. On receipt the Quarantine Medical Officer will inform ship by wireless whether Pratique is granted or not.

RADIO: Port Sudan Radio (call sign STP). Operates daily on High Frequency as follows: 8676 kHz from 0400 hrs. to 2200 hrs. GMT; 500 kHz – continuous listening watch for first 10 minutes of every hour. Radiograms may be handed in at Port Sudan Post Office at all times and at Port Sudan Quays Post Office during office hours.

VHF: Port Sudan Radio on Channel 16 and 19 from 0400-2200 hrs. GMT.

TUGS: About 1 mile from harbour entrance. Either ship's or tug's lines at Pilot's discretion.

BERTHING:

Berth	Length	Depth Winter	Depth Summer
Nos. 1 to 5 main berths	458 ft.	30 ft.	28/33 ft.
No. 5A	426 ft.	35 ft.	33 ft.
Nos. 6 & 7	606 ft.	35 ft.	33 ft.
Nos. 8 & 9	600 ft.	37 ft.	35 ft.
No. 15	642 ft.	37 ft.	35 ft.
No. 16	230 ft.	37 ft.	35 ft.
Nos. 17 & 18	908 ft.	41 ft.	39.5 ft.

CARGO HANDLING: Grain silo of 50,000 tons capacity situated at Berth No. 15.

Container traffic handled at Berth Nos. 17 and 18. Ro-Ro vessels handled at Berth No. 16.

20 mobile cranes, capacity 7 tonnes – 54 tonnes.
60 forklift trucks.

TANKERS: At Berth No. 16, vessels up to 600 ft. length can berth with overhang. Max. draft 34 ft. 6 in.

Berths 17 and 18 accommodate tankers up to 39 ft. draft. Berths connected by pipe-line to refinery 8 km. South of Port Sudan.

Used for discharging crude oil and loading refined products.

STEVEDORES: Require 24/48 hours advance notice of ETA and stowage of cargo. Rate of Discharge and Loading: General cargo, 5 – 10 tons per hook per hour. Bagged cargo, 15 – 20 tons per hook per hour.

Exports: Main exports, cotton, cottonseed, gum Arabic, oilcakes, MOP shells, trocas shells, senna, beans, domnuts, oilseed, hides, skins, salt, beeswax, durra, wheat bran, chick peas, karkadeh, ground nuts, livestock, castor seed, edible oil and molasses in bulk.

Tea: Following exports should not be stowed with tea: castor-seed, hides, linseed, edible oil, oilcake. Cottonseed may be stowed with tea with separation of 3 ft. but it is preferable to stow in separate compartment from tea.

Cotton: Gum should never be stowed with cotton.

Transhipment cargo: Is normally not accepted at Port Sudan without prior permission, except in very small quantities.

Weight: Deadweight of cargo is expressed per ton of 1,000 kilos.

MEDICAL: Advance notice advisable. Hospital facilities available. Crew and passengers must have valid International Health books.

DENSITY: 1025.

FRESH WATER: Available ex-quay and ex-barge, capacity 200 tons.

FUEL: Marine Fuel oil (normally 1000 secs.); marine diesel oil (42/45 secs.); gas oil (35 secs.). 24/48 hours' advance notice advisable. Name of suppliers is required. Bunkers at times in short supply.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per person. Alcohol not allowed. Only personal requirements may be taken ashore.

IDENTIFICATION CARDS: Identification required in lieu of passports.

CONSULS: A.R.E. (Egypt) and Nigeria.

REPAIRS: Minor deck and engine repairs.

DRY DOCKS: Slipways for 2 vessels up to 500 tons capacity.

REPATRIATION: Not recommended. Formalities take 2/3 days.

AIRPORT: 3 miles away. Flights every day Port Sudan to Khartoum. 2 flights per week Port Sudan to Cairo.

TIME: GMT plus 2 hours.

HOLIDAYS: The following government holidays will be considered as port holidays (1986).

Day	*Date*	*No. Days*
Independence Day	1.1.86	1
Christian Coptic Holiday	7.1.86	1
Rajab Revolution	26.3.86	1
Religious Holiday	7.4.86	1
Sham el Nassem	5.5.86	1
Ramadan Bairam	7.5.86	4
Kurban Bairam	14.8.86	5
Mohammedan New Year	13.11.86	1
Christmas Day	25.12.86	1

The port will not work on the following days: January 1st (Independence Day), November 10th–14th (First Day Kurban Bairam), December 1st (Mohammedan New Year), February 19th (Mulid El Nabi), May 25th (Revolution Day), September 3rd (First Day of Ramadan Bairam), December 25th (Christmas Day). Overtime will be worked on all other days.

POLICE/AMBULANCE/FIRE: Police 4888; Ambulance 2400; Fire 5922.

TELEPHONES: No arrangements exist for placing telephones on board.

GENERAL: Foreign currency allowed ashore, but must be changed in banks only. Crew are permitted to go ashore with any amount Sudanese Currency.

DEVELOPMENTS: The first development stage includes modification of 2 existing berths to accept ships of up to 50,000 d.w.t. and container vessels, relaying railway track in the port area and asphalting.

Second phase of development includes extension of 2 container berths, additional works at the Ro-Ro berth, a new oil berth and upgrading of the grain silo complex.

AUTHORITY: Sea Ports Corporation, P.O.Box 531 Port Sudan Quays, Port Sudan, Sudan. *Tel:* 2910, 2644. *Telex:* 70012 Rasmina SD. *Cables:* RASMINA. *Contact:* Mr. Ali Ahmed Abdel Rahim, General Manager. Captain Bakit Hassan Bashir, Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Suriname

MOENGO: 05.38 N. 54.25 W.

A bauxite mining town about 70 miles up the Cottica River, a tributary of the Commewijne River, which latter joins the Suriname River at Fort New Amsterdam. Moengo is 94 miles from the Suriname River Light Buoy.

DOCUMENTS/PILOTAGE/GENERAL: Refer to "Paramaribo".

PILOTAGE: Vessel arriving after 2000 hrs. at the light buoy for Moengo can proceed on a suitable tide and anchor at Fort New Amsterdam without having to call at Paramaribo to be entered. In this case vessel will be entered on arrival at Moengo.

Also see "Paramaribo".

TUGS: Two tugs are available, the larger is 1,750 h.p.

Towage is compulsory in the Cottica River from 40 miles below Moengo for vessels over 200 ft. long.

MAX. SIZE: Ships of 525 ft. can be accommodated. Ore vessels call daily. The Commewijne Bar is 18 ft., so that the ruling draft is that of the Suriname River. Maximum admissable draft being 22 ft. 6 in., subject to the Suriname River.

BERTHING: Moengo has two piers at which ore is loaded by a transporter at the rate of 800/1,000 t.p.h. One pier is 430 ft. long and has a depth of 24 ft. alongside. Both will accommodate ships of 525 ft. length. Tracks are laid on the 430 ft. pier and a 25 ton crane is available.

PROVISIONS: Not available.

FUEL: Small quantities can be supplied.

FRESH WATER: Small quantities can be supplied.

AIRPORT: About 5 km. from docks.

AUTHORITY: District Commissioner acts as Harbour Master.

See "Paramaribo".

NEW NICKERIE: 05.57 N. 56.59 W.

DOCUMENTS:

6 copies Crew List.
6 copies Passenger List.
Customs Documents; Crew Declaration Lists; for instance, souvenirs, electric apparatus, etc.
2 copies Ship's Store Lists.
3 copies Manifests of Import.
4 copies Manifests of Export.
1 copy Transit Manifest.
2 copies Manifests of Coastal Cargo.
Ship's Papers to be shown on request.

PILOTAGE: Pilotage is compulsory for the Nickerie River for ships bigger than 50 gross tons. There is always a Pilot available; ETA to be sent 48 hours before arrival and, 12 hours before arrival give necessary correction message to the Agent.

Ships can only enter the river at or about the time of high water.

The Pilot boards near the Sea Buoy (Buoy No. 1). The pilot boat is a small wooden, grey and white painted vessel. The pilot boat does not use the international red-white pilot lights at night. It is possible to make radio telephone contact with the boat (Pilot carries a walkie-talkie VHF equipped with Channel 12). There is a signal lamp on board.

Send ETA message to Agent who will order the Pilot. Awaiting high water the vessel can anchor about 3 miles N.N.E. of the Sea Buoy.

ANCHORAGES: With a draft of 15 ft. the ship can safely anchor 3 miles N.N.E. of the Sea Buoy. It is not advisable to anchor in the Nickerie River for a long time, the river is too narrow.

MAX. SIZE: Minimum depth on the bar is 2.10 m. with maximum draft at HW varying from 14 ft. to 17 ft., maximum length is 130 m., governed by the width of the river (170 m. and upriver 70 m.). The vessel has to use the high-inlet for cooling water, etc., while passing the bar.

At low water ships are seated in the mud without consequence to hull, rudder or propeller alongside the wharf. There are berths for oil-carriers.

HEALTH: There is no Pratique procedure. Only in the event of any suspected disease on board must a doctor must be called.

RADIO: Send ETA cables to Paramaribo Radio. The pilot office at Nickerie has a radio telephone transmitter. Frequency 8,233.9 kHz; listening hours 0700, 1200, 1800 hrs. local time. SSB and VHF equipment also used.

TUGS: No tugs available.

BERTHING: The port of New Nickerie is 3 miles up river.

Wageningen: Lies 27 miles up river and can be reached with the same draft as New Nickerie, but the width of the river is only 70 m., which restricts length to 120 m.

STEVEDORES: The Agent orders the gangs (maximum 3 gangs available).

MEDICAL: No advance notice required for medical treatment. There is 1 hospital in Nickerie with a surgeon.

TANKERS: There are 3 piers in Nickerie: Esso, Shell and Texaco pier. Maximum permitted draft 14 ft. 9 in. at Spring tide.

DENSITY: In the dry season the density on the river near New Nickerie is 1015. In the rainy season the density is 1005 near HW, and 1000 near LW. These all depend upon Spring tide or Neap tide.

FRESH WATER: Fresh water is available alongside the wharf of New Nickerie. It is loaded from shore by hose.

FUEL: Small quantities of fuel available from Esso or Shell, also grease and petrol.

GANGWAY/DECK WATCHMEN: It is recommended to have a watchman during the night.

OPENING/CLOSING HATCHES: Patent hatches must be opened by the crew, other hatches by the stevedores.

CUSTOMS ALLOWANCES: Master included: for every 72 hours staying in port: 15 cigars or 60 cigarettes or 30 cigarillos or 150 gm. tobacco plus 0.25 bottle spirits or 5 bottles beer or 1 bottle wine.

IDENTIFICATION CARDS: Not needed.

CONSULS: No consuls in Nickerie.

REPAIRS: Small engine repairs and shaft repairs and some welding repairs can be done.

REPATRIATION: Possible via Paramaribo.

AIRPORT: The airport is 10 km. from the port of Nickerie. Once per day there is a flight to Paramaribo arranged by Suriname Airways.

Daily bus service between New Nickerie and Paramaribo.

TIME: Local time is GMT minus 3 hours. No alteration during year.

HOLIDAYS: See "Paramaribo".

POLICE/AMBULANCE/FIRE: Police 356; Ambulance 241; Fire 333.

TELEPHONES: No arrangements can be made for a telephone connection on board.

SHORE LEAVE: No restrictions.

DELAYS: Delays in berthing: There are only 2 wharves with a total length of 700 ft. Banana ships have priority. Delays in loading and discharging: there are only 3 gangs of stevedores. These can be enlarged to 5 "small gangs".

DEVELOPMENTS: In the future a bigger and deeper port will be built in the Corentyne River, about 20 miles up the river.

AUTHORITY: District Commissioner acts as Harbour Master.

See "Paramaribo".

PARAMARIBO: 05.59 N. 55.09 W.

PORT LIMITS: The seaward boundaries of the port, within which a vessel is considered to be "arrived" is the entrance of the Suriname, Matowijne, Coppename, Corantijn and Nickerie Rivers. Laytime commences to count after vessel has anchored or berthed.

LOCATION: On the left bank of the Suriname River about 8 miles above New Amsterdam and 21 miles from light-buoy at river entrance.

DOCUMENTS:

5 Incoming Cargo Manifests (if any cargo), otherwise 3 copies.
1 Cargo Transit Manifest.
4 Outward-going Manifests.

These above-mentioned must be sent ahead to the Agent so that they can be translated into Dutch.

6 Crew Lists.
2 Store Lists.
2 Crew Declaration Lists.
6 Passenger Lists.

PILOTAGE: Compulsory. All ships are requested to amend their estimated time of arrival in local time, at least 12 hours in advance by special message through the wireless station to their Agents or to the Harbour Master. Arrival message should include draft of vessel and other requirements. 6 hours prior to arrival the ETA has to be confirmed and if necessary corrected. The Pilot will be dispatched after receiving the confirmed ETA. As shipping only uses the Suriname River, the Commenwijned River, the Cottica River and the Nickerie River, all Pilots except one for Nickerie are stationed at Paramaribo. Paramaribo Pilots board the vessels 1 mile North of the light buoy and between the light and Braamspunt (Lat. 5° 58′ N., Long. 55° 10′ W.). Pilot station on VHF Channel 12. Pilot station and harbour office to be advised of deepest draft. All vessels have to stop off the light buoy.

ANCHORAGES: Anchorage off town in 18 ft. – 35 ft. of water at LWS. Government Officials board vessels immediately on arrival for inward clearance. Vessels which are required to anchor off the port to wait for berths may be boarded at the anchorage.

CHANNEL: The channel is marked by numbered buoys with radar reflectors, odd numbers on the West with white lights, and even numbers to the East with red lights and painted respectively black and white or red and white chequers.

RESTRICTIONS: The bar at the entrance of the Suriname River controls the ports of Paramaribo, Moengo, Paranam and Smalkalden, and has a depth of 15 ft., with a rise at Neaps of 6 ft. 7 in. or Springs 8 ft. 10 in., but it is soft mud. Due to the fact that the bar consists of mud, vessels regularly leave the port with drafts between 22 ft. and 23 ft.

HEALTH: Port doctor will visit an arriving ship only if there is a case of contagious disease aboard, or if one of the preceding ports of call has been declared to harbour contagious disease. No bill of health is required. A ship with an infection on board must advise the Harbour Master by special message through the wireless station before arrival. Yellow Fever Certificates required. Pratique granted by Customs Officer.

RADIO: There is a 24 hour radio telephone watch at the Harbour Master's Office on VHF Channel 12. The coast station, PZN, also maintains a 24 hour radio telegraph (500 kHz) and telephone service in the 2,182 kHz band.

VHF: Harbour Office on Channel 12, 24 hours a day. Radio Station "PZN" on Channel 16, 24 hours a day.

RADAR: None.

TUGS: Available from Paranam.

BERTHING:

B.E.M. Wharf: 110 ft. long, least depth 18 ft. Private cement and gravel discharge wharf, Moorings 450 ft. apart.

Banana Export Pier: 297 ft. long, least depth 18 ft. Fresh water can be supplied.

New Oil Terminal: Moorings 570 ft. apart. Least depth 18 ft. Platform length 70 ft. Used for oil and gas.

Flour Pier: 36 ft. long. Moorings 160 ft. apart. Least depth 16 ft. Only possible to discharge flour with a grain elevator, rate 30 t.p.h.

Vensur Cement Wharf: 180 ft. long, depth alongside 14 ft. Moorings 600 ft. apart.

New Haven Dock: 1,815 ft. long. Least depth 19 ft. at LWS. Max. depth 21 ft. Fresh water can be supplied.

Shell Oil Terminal: Moorings 540 ft. apart. Least depth at LWS 21 ft. Exclusively for oil, gas and bunkering.

CRANES: One crawler crane 25 tons capacity.

MEDICAL: Excellent medical and dental attention is available to crew members of all vessels. Four hospitals available.

FRESH WATER: The water is of excellent quality. Available at most berths as mentioned above.

FUEL: Ship's bunkers are available in most ports of Suriname in limited quantities. Advice regarding quantities and specifications of oil should be given to Agent's representative immediately after docking. Suppliers are Shell, Esso and Texaco.

CUSTOMS ALLOWANCES: 60 cigarettes or 15 cigars or 0.5 lb. of tobacco. One-fifth litre of spirits, one-third litre of wine, 2 litres of beer, for each crew member.

All remaining stores must be declared and placed under seal. If vessel remains in port over 72 hours Customs will allow an issue of stores.

REPAIRS: No facilities for major ship repairs. Local workshops can do repairs of minor nature. There are 2 floating dry docks and 1 floating derrick owned and operated by the Suriname Drydock Co. Lifting capacities dry docks: 400 – 650 tons.

SURVEYORS: Lloyd's Register, A.B.S. and N.V.

GANGWAY/DECK WATCHMEN: The Customs board the vessel while riding at anchor or alongside one of the docks. All vessels are required to make a proper gangway available to the Customs Boarding Officer.

The local authorities assign one or more Customs Guards to each vessel during its stay in port. The charges for guarding are for the account of the vessel. These Officials must be provided with meals on board at regular meal hours, and cabins if necessary.

CARGO GEAR: Load/discharge by ship's gear.

REPATRIATION: Under special circumstances vessels may sail without all crew members on board (sickness, etc.). The Master furnishes a letter to his Agent authorising him to accept responsibility for the missing seaman or seamen.

AIRPORT: Zaneerij Airport, 46 km. from Paramaribo. Served by SLM, KLM, ALM and Guyana Airways.

CONSULS:

Austria
Barbados
Belgium
Brazil
Canada
Chile
China
Colombia
Denmark
Dominican Republic
Ecuador
Finland
France
Germany F.R.
Guyana
Haiti
Indonesia
Italy
Japan
Korea
Lebanon
Mexico
Netherlands
Norway
Peru
Portugal
Spain
Sweden
U.K.
U.S.A.
U.S.S.R.
Venezuela

TIME: Local time is GMT minus 3.5 hours. Vessels are required to use local time in ETA messages and when dealing with Agents.

HOLIDAYS: New Year's Day, Revolution Day (February 25th), Holi Phagwa* (March 10th), Good Friday, Easter Monday, Labour Day (May 1st), Freedom Day (July 1st), Id-Ul-Fitr*, Republic Day (November 25th), Christmas Day, Boxing Day. These holidays depend on the moon.

SHORE LEAVE: Under normal circumstances no restrictions are imposed by the Government Immigration Authorities on shore leave.

GENERAL: While alongside vessels must maintain engines and propulsion machinery in readiness to leave the pier under full power on short notice. No repairs are permitted which should interfere with this requirement. While alongside, oil tankers should have their offshore anchor out about 50 ft.

All vessels except naval vessels, must furnish a statement, of the amount and character of explosives carried, also a certificate to show how they are stored and manner of packing.

Special anchorage areas are provided in the harbour for vessels with dangerous cargo.

All firearms and ammunition must be manifested on store lists and must remain in bond on board during vessel's entire stay in territorial waters of Suriname. Any violation of this regulation renders the vessel subject to fines and confiscation of firearms and ammunition.

BALLAST: Vessels must arrive with sufficient ballast to permit safe handling. All vessels should enter port with clean ballast water that may be pumped overboard while in the harbour, as it is prohibited to pump dirty ballast water or oil residue or sweepings into the harbour.

BANK: Algemene Bank Nederland N.V., Kerkplen 1, Paramaribo. Tel: 71555. Telex: 122 Bancol Sn.

EMERGENCY CO-ORDINATION: Harbour Office. Tel: 72845. Telex: 163 Havkan Sn.

STORING: Can be arranged by Barge or Trucks, whilst loading or discharging, depending on berth, with Customs in attendance. Local labour available.

AUTHORITY: The Ministry of Transport and Industry, P.O.Box 888, Paramaribo. *Tel:* 72845, 76769. *Telex:* 163 Havkan Sn. *Contact:* Mr. E. Fitz-Jim, Director of Maritime Affairs.

AGENT: Alcoa Steamship Company, Inc., P.O.Box 1842. Paramaribo, Suriname. Tel: 77600, 73613. Telex: 113. Cables: Alcoaship Parbo. Steamship Agents/Stevedoring Operators.

PARANAM: 05.38 N. 55.05 W.

LOCATION: On left bank of the Suriname River about 42 miles from the light buoy (Fairway Buoy), consisting of bauxite mining, alumina refining and an aluminium smelter with facilities for shipping these commodities.

DOCUMENTS/PILOTAGE: and all General Information refer to "Paramaribo".

RESTRICTIONS: See "Berthing".

MAX. SIZE: Vessels up to 45,000 d.w.t. load to outer bar draft (approximately half load) and usually top off at Trinidad. Max. LOA 700 ft.

HEALTH: Health Officer does not board unless there are quarantinable diseases aboard.

TUGS: Available.

BERTHING: *General Dock:* Concrete pier of about 350 ft., moorings 660 ft. apart. Least depth 30 ft., max. air draft 42 ft., max. beam 80 ft. This dock used for loading bauxite or aluminium ingot and for discharging general cargo, oils, caustic and other raw materials,

Alumina Pier: Depth 25 ft., moorings 680 ft. apart. Used for loading alumina or discharging oils and caustic. Max. air draft 50 ft., max. clearing height 72 ft. Also see "Shipmaster's Report".

Loading Capacity: Bauxite General Dock: 900 t.p.h.
Alumina at Alumina Dock: 850 t.p.h. Loading by conveyor, spout trimmed (Telescopic chute).

CRANES: One gantry crane 55 tons capacity.

FUEL: Small quantities of light diesel No. 2 only in emergency.

FRESH WATER: Can be supplied.

REPAIRS: None can be effected.

AIRPORT: At Zanderij, 30 km. from dock.

GENERAL: The Outer Bar is the limiting factor for the port. Harbour Office Paramaribo give Bar drafts for each tide.

The river silt is extremely soft and in consequence the river water is very dirty and although fresh (995 at the berths) the evaporators cannot be kept on line. There is also a great danger of blocking the cooling water system, especially when crossing the bars. Blackouts on both motor and steam ships are a common occurence. Care should be taken to ensure that cooling systems are as clear as possible before entering the river. High suctions must be used when passing over all bars in Suriname.

SHIPMASTER'S REPORT: October 1986 (Updated 1988).

Alumina Terminal: Lat. 05° 36.9′ N., Long. 55° 05.2′ W.

Local Time: GMT minus 3 hours.

Approaches: Low lying coastline. Vessels anchor about 5 miles North of light buoy (Fairway Buoy) in position Lat. 06° 05′ N., Long. 55° 12.7′ W. to await HW. Lighthouse at Lat. 05° 54′ N., Long. 55° 12′ W.

Pilotage: Compulsory. River Pilot boards 1 mile North, of light buoy (Fairway Buoy). Pilot boarding and HW to be confirmed by Paramaribo Port Control on VHF Channel 12 and Harbour Office on Channels 12 and 16.

Very shallow waters from No. 1 Buoy to No. 6 Buoy on either side, with variable currents. Buoyed channel up to No. D11 Buoy (30 miles from light buoy – Fairway Buoy). Draft restricted to 22 ft. with safe draft of 21 ft. in HW. Safe turning basin and anchorage 2 miles up river from Paranam. For down river transit, waiting anchorage for HW is off Paramaribo at Leonsburg in position Lat. 05° 52.5′ N., Long. 55° 05.5′ W.

Berthing: By River Pilot. No tug for berthing. Alumina Pier length 207 m., alongside depth is 30 ft. Other berths at Paranam for discharge of general cargo and loading bauxite.

Loading: By conveyor-fed telescopic chute. Capacity 850 – 1,000 t.p.h. Can reach all holds. Cargo work 24 hours.

Density: About 995 – 996 alongside berth.

Fresh Water: Available at berth.

Bunkers: Not available.

Provisions: Limited quantity of some fresh vegetables and meats available at local Chinese 'supermarket'.

Shore Leave: No restrictions. Paranam Town is 1 mile from berth. Paramaribo City about 1 hour by car. Nearest airport at Zanderij International, 30 km. from Paranam.

Radio: PZN (Paramaribo Radio) provides reliable services.

AUTHORITY: District Commissioner officially acts as Harbour Master but vessel movements, pilotage, etc. handled by Paramaribo Harbour Master's Office.

SMALKALDEN: 05.37 N. 55.05 W.

LOCATION: A bauxite mining town on the left bank of the Suriname River 1 mile below Paranam and 41 miles from the light buoy.

DOCUMENTS/PILOTAGE: and all General information; refer to "Paramaribo".

TUGS: None available.

BERTHING: Wharf with length of 218 ft. Moorings 535 ft. apart, least depth 30 ft. Ships can load to outer bar draft. Bauxite loaded by 1 conveyor with an average of 800 t.p.h. at each berth. Max. LOA 700 ft. Vessels berth port side alongside.

FUEL: None available.

FRESH WATER: Small quantities can be delivered by trucks.

REPAIRS: None.

AIRPORT: At Zanderij, 30 km. from dock.

GENERAL: The tide is 3 hours after Paramaribo and the water becomes fresh before reaching Smalkalden.

SHIPMASTER'S REPORT: 1978 (Updated 1988).
Documents: 2 Crew Lists, 2 Stores Lists and 2 Crew Declaration Lists.
Customs: Customs board at Smalkalden on arrival and clear vessel. They do not remain on board.
Pilotage: Available and compulsory. Pilot station at Paramaribo.
Anchorage: Safe anchorage available 4 miles North of the Sea Buoy, depth of water about 30 ft., nature of bottom, mud.
Approaches: Inwards: There is a direction finding station at Paramaribo. Racon beacon in position: 05° 53′ 31.6″ N., 55° 13′ 00″ W.

On entering the river, it was noticed that the propeller stirred up dense mud. The main engine cooling filters became choked even though the high suctions were being used. Top side ballast tanks were then used to discharge ballast and cool the main engine at the same time.

Vessel anchored at Suzannasdaal on passage up river to await tide, and clearance of another vessel which was on the berth. The anchorage was good, vessel used five shackles. Vessel then proceeded up river to Smalkalden but on passing Domburg, heard that the other vessel could not complete on time, so we had to pass the berth and anchor off Chatillon. The river is very narrow at this point and engines were kept on standby to be used when turning in case vessel became too close to the shore. Vessel docked at Smalkalden just before HW.

Outwards: On completion of loading, vessel sailed 2.5 hours before HW Paramaribo and proceeded down river. The vessel's draft was 23 ft. 2 in. and in places the river became very shallow and the vessel slid over mud at various points. The worst place noticed being between Beacon "D4" and Buoy No. 12 at Sunoza. The vessel again anchored off Suzannasdaal to await the rising tide, 6 shackles in the water as the current was very strong. The vessel later sailed for the sea 3.5 hours before HW at Paramaribo and again touched bottom at various places whilst proceeding towards the sea. The main engine was cooled using ballast discharge for suction which is higher than normal high suction.
Restrictions: Vessels can enter and leave port day and night.
Max. Size: Agent advised that max. draft was equal to: (4.60 m. + height of tide) – FWA of 4 in.

Pilot also advises that the FWA from Sea Buoy to Suzannasdaal is practically nil – so do not take FWA into account.
VHF: Pilots and Harbour Office maintain a continuous watch on Channel 12.
Tugs: Not available and not normally required. Should vessel experience difficulties tugs can be called from Curacao.
Berthing: Suriname Billiton Bauxite Berth: Maximum permissible draft varies with the tide. Tidal range 1.16 m. to 2.39 m.

Maximum permissible length and breadth of vessel not known.
Loading/Discharge Gear: There are 2 chutes approximately 150 ft. apart which are semi-movable. Loading rate varies between 200 and 600 long tons per hour. Cargo operations continue throughout 24 hours. A gang consists of one foreman and four men.

In addition to the facility at which we berthed, there are general cargo berths alongside the modern quay and a bulk aluminium loading berth with one chute which is semi-movable. See "Paranam".
Density: For the berth, the density is 998. Also see "Max. Size".
Fuel: Not available.
Fresh Water: Delivered by truck with capacity of 7 tons. Delivery is slow and extremely expensive. Arrangements are to be made with the foreman.
Medical: Hospital facilities available.
Shore Leave: Possible, however, crew required on board most of the time as vessel has to be shifted up and down the jetties for loaders.
Gangway: Accommodation ladder not used. Shore ladder is provided.
Provisions: Fresh fruit and vegetables available but of poor quality and very expensive.
Transportation: The town of Smalkalden is about 30 minutes by car from Paramaribo and about 1 hour by bus (taxi fare, 25 Guilders, bus fare 1 Guilder).
Publications: BA 517 and BA 99 also South American Pilot Volume 4 (No. 7A) used. BA Chart 99 does not extend far enough to sea as the sea buoy is not shown on it and the outer anchorage is about 3 to 4 miles outside this buoy. The Pilot informed me that the local Dutch Chart is available from the Harbour Master at Paramaribo and is much more satisfactory.

AUTHORITY: District Commissioner acts as Harbour Master.
See "Paramaribo".

NOTES

Please also advise Shipping Guides Ltd.

Sweden

GENERAL:

ICE-BREAKING SERVICE:
Location: Ice-breaking Directorate, Norrkoping.
Telephone: (011) 19 10 00 (0800 hrs. – 1640 hrs. local time).
(011) 12 29 60 (outside above hours).
Telex: 64416 Ice Serv S.
Cables: Civilmarin.
Procedure: Requests for ice-breaker assistance should be made well before vessel's arrival at the ice to the Directorate, locally (to most Swedish Harbour or Pilot Offices) or to an ice-breaker.

Vessels approaching ice-bound areas may be instructed, in daily Ice Reports issued by Coastal Radio Station (see ALRS Vol. 5), to report to the Directorate. Reports, which should be made well before arrival at the ice are to include the following details of the vessel:

1. Name.
2. Nationality.
3. Call sign.
4. Size.
5. Draft.
6. Engine power.
7. Year built.
8. Ice class.
9. Amount of cargo.
10. Destination.
11. ETA at ice-covered waters.

Vessels which have made a request or report and subsequently cancel or delay their voyage must inform the Directorate, a local office or an ice-breaker immediately.

Information Service: For details of Coastal Radio Stations which broadcast Ice Reports, including positions of ice-breakers, see ALRS Volume 5.

Ice-Breakers:
Call: Swedish ice-breakers with their call signs are:

Ymer	SPIA	Tor	SCYN
Frej	SBPT	Oden	SBXQ
Atle	SBPR	Thule	SCKD
Njord	SBPO	Ale	SBPQ

Frequency: 500 kHz	WT
2182, 2140 kHz	RT
Channels 16, 6	VHF

Procedure: Calls to ice-breakers may be booked through the nearest Coastal Radio Station. Vessels receiving assistance must maintain continuous listening watch on the channel specified by the ice-breaker.

AHUS: 55.56 N. 14.19 E. (See Plan)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilots meet vessels at Pallagrund. Telegraphic address: "Pilotstation, Ahus". Tel: 044 – 240027. VHF Channel 16 call sign: "Pilot Station, Ahus." Awaiting Pilot, anchor outside Pallagrund. Depth 15 m. – 20 m. (Also see "Stockholm").
ANCHORAGES: Anchorage forbidden in dredged entrance channel.
RESTRICTIONS: No special regulations.
MAX. SIZE: Max. length 160 m., max. draft 7.7 m.
HEALTH: No special regulations.
RADIO: Stockholm Radio (SDI) also VHF, Channel 16 and working Channel.

Ahus Port Radio keeps watch, Monday to Friday 0800 to 1600 hrs. on VHF Channel 16. Working Channel 11, 12 and 13. At other times Ahus Pilot Station.

RADAR/VHF: Radar on pilot station. VHF call sign: Pilot Station, Ahus. Channel 16. Also see "Radio".
TUGS: 1 tug available with advance notice.
BERTHING: Depth alongside (at MW) as follows:

Berth	*Length* (m.)	*Depth* (m.)
Wine Quay	100	4.2
No. 1 – 4	270	5.8
No. 5 – 17	740	7.2
No. 18 – 26A	470	8.2
26B	15	4.2

Depth allowance 0.5 m.
STEVEDORES: Ahus Stuveri AB. Tel: 044-242035. Working hours: Monday to Friday 0700 – 1600 hrs. Meal breaks 0845 – 0900 hrs. and 1200 – 1245 hrs.
FRESH WATER: Delivered from pipe-line.
FUEL: Available day and night.
FIRE PRECAUTIONS: No special regulations.
GANGWAY/DECK WATCHMEN: If wanted, watchmen available.
OPENING/CLOSING HATCHES: Normally by the crew.
CUSTOMS ALLOWANCES: See "Stockholm".
CARGO GEAR: 7 shore cranes, capacity 5 – 25 tons. No cranes at Berth Nos. 1 – 4 or Wine Quay.
IDENTIFICATION CARDS: Crew List needed. No cards.
CONSULS: Danish Vice-Consul: Vasagatan 17B, 29153 Kristianstad. Tel: 044-114841. Norwegian Vice-Consul: Mast. Bonggatan 2, 29154 Kristianstad. Tel: 044-115605.
REPAIRS: Minor repairs only.
DRY DOCKS: No dry dock.
AIRPORT: Nearest airport about 10 miles away. 6 flights per day.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Stockholm".
POLICE/AMBULANCE/FIRE: Police Tel: 242030; Ambulance Tel: 90000; Fire Tel: 90000.
TELEPHONES: 1 public telephone on quay.
AUTHORITY: Ahus Hamn, Hamnkontoret, Krangatan 2, S–29600 Ahus, Sweden. *Tel:* 044-243315. *Contact:* Ingvar Ericsson, Harbour Master.

BROFJORDEN: 58.21 N. 11.25 E. (See Plan)

PORT LIMITS: Between "Stretudden" (crude oil berth) and the island "Rixo" in Brofjorden.
DOCUMENTS: Documents required for entry and clearance:

Certificate of Registry, Certificate of Tonnage, Derat Exemption Certificate, 3 Crew Lists, 1 Crew Manifest, 1 Declaration of Bonded Stores. Free Pratique will be received via Customs on arrival berth. Oil Pollution Certificate.

PILOTAGE: Pilot station VHF Channel 16 around the clock. Channel 16 for calling only, thereafter changing to an agreed Channel. Call: Lysekils Pilots.

According to harbour regulations VLCCs are requested to give 72 hours' ETA, and if any changes 48 and 24 hours' ETA.

Product tankers are requested to give 48 and if any changes 24 hours' ETA.

Position where Pilot will Board:

VLCCs	Lat. 58° 13′ 05″ N., Long. 11° 09′ 05″ E.
Product tankers	Lat. 58° 15′ 01″ N., Long. 11° 13′ 03″ E.

ANCHORAGES:

VLCCs	East Scaw, Lat. 57° 42′ N., Long. 10° 49′ E.
	Water depth: 26 m.
	Holding ground: sand, good.

Product Tanker Only (up to 60,000 d.w.t.):

Lat. 58° 20′ 03″ N.	Water depth: 28 m.
Long. 11° 21′ 00″ E.	Holding ground: clay, good
Lat. 58° 19′ 07″ N.	Water depth: 26 m.
Long. 11° 23′ 05″ E.	Holding ground: clay, good

RESTRICTIONS: *When Berthing VLCC:*

Visibility minimum 4 miles, wind force max. 12 m./sec. and current max. 1 knot at the outer buoys (Nos. 1 and 2).

MAX. SIZE:

Crude Oil Jetty:	
Deadweight:	50,000 – 500,000 tons.
Length overall:	No limit.
Beam restriction:	No limit.
Draft restriction:	25 m. (82 ft.)
Depth of water:	28.0 m. (92 ft.).
Product Jetty (Berths No. 2 and 3):	
Deadweight:	50,000 tons.
Length overall:	230 m. (754 ft.).
Beam restriction:	No limit.
Draft restriction:	14.4 m. (47 ft.).
Depth of water:	16.0 m. (53 ft.).
Product Jetty (Berth No. 1):	
Deadweight:	7,000 tons.
Length overall:	120 m. (394 ft.).
Beam restriction:	No limit.
Draft restriction:	8 m. (26 ft.).
Depth of water:	8.8 m. (28 ft.).

HEALTH: No special papers required. Master informs by radio or on arrival.
RADIO: For ETA cables to Agent and Receivers call Gothenburg Radio.
VHF: VHF stations are installed at the pilot station, the pilot boat, the tug boats and at the Scanraff Harbour Office. Scanraff and Lysekil Pilot listen on Channel 16 day and night.

When mooring: the Pilot, Harbour Master, mooring boats and the mooring gangs carry portable VHF sets. Channel 69 is usually used.

RADAR: At the pilot station two radar sets are installed for watching the entrance.
TUGS: *For VLCCs:* Tugs made fast after passage of Dynabrott and Brandskars Flak Lighthouses.
For Product Tankers: Tugs made fast when passing Bubacka Buoy (opposite crude oil berth).
BERTHING:

Instruments:	SAMI-doppler and current meter at crude jetty.
Salinity:	18 – 34%
Current Velocity:	0.2 – 0.9 knots at entrance.
Nature of Bottom:	Clay.

The crude and product jetties are equipped with quick release hooks. The coaster berth has usual type of bollards.

One Safety Tug-boat is always standing-by within the harbour area in case of emergency. When a Crude Carrier is alongside an additional Safety Tug-boat is standing by.

MEDICAL: Hospital available in Lysekil. No particular inoculations required.
TANKERS:
Crude Jetty:

Concrete jetty for tankers of 50,000 to 500,000 d.w.t.
Length of jetty-deck: 135 m.
Height of jetty-deck above MLW: 6 m.
Minimum distance between fenders: 96 m.
Height of gangway tower: 27 m.
3×16 in. marine arms for cargo handling.
1×12 in. marine arm for bunker supply (Only Bunker "C" available).
All 4 arms are equipped with hydraulic operated speed seal couplings, designed for 150 lb-ASA flanges, minimum size 10 in.

Reach capability of arms: Max. 30 m., min. 4 m. above sea level. Max. 11 m., minimum 3 m. from berthing line. Drift: 4.5 m. each side of manifold centre line.

Fresh water can be supplied at a rate of 60 t.p.h.

1×4 in. sewer-line connection is located between manifolds on jetty-deck.

Vessel arriving shall have 1 derrick rigged amidships to lift on board garbage-container.

Shore-connected telephone will be placed on board. Telephone number 605 88. Area number 0523.

Telephone number to Scanraff switchbord 604 60. Area number 0523.

Mooring: Vessel is normally moored port side to jetty.

Approach velocity is continously measured by doppler radar and provided to ship's Master/Pilot during berthing operation.

Max. allowed approach speed is shown in "Plan Section".

Communication between jetty-pilot-tugboats and mooring-boats by VHF.

Under normal weather conditions 6 tugboats representing approx. 23,000 h.p. will be used for berthing of VLCCs. Under abnormal weather conditions additional tugboats can be ordered.

2 mooring-boats are provided to assist in line handling.

18 mooring lines are required for safe mooring. All lines to be provided by the ship.

Mooring lines to be arranged in accordance with "Plan" (See "Plan Section"), or as close to as possible.

Combination of synthetic, ropes and wires in the same direction shall be avoided.

Self tensioning winches are not allowed.

All mooring lines will be put on quick release hooks of 150 tons SWL each.

4×10 in. mooring lines are available on jetty-deck for emergency use.

Safety Precautions: Vessel must be safely moored before gangway is placed on board and marine arms connected.

Correct setting of winch brakes to be checked regularly by ship's personnel.

Safety wires to be properly rigged fore and aft.

Cargo handling and/or bunkering will be stopped if wind velocity reaches 17 m./sec. (33 knots) for wind between N.W.-S.W. and during thunderstorms. If reaching the above limit: Stop discharging/bunkering, drain and disconnect all arms. Close all tank lids and ullage plugs. Tugs to be ordered to ship's side.

2 safety tugboats are always available in Brofjorden Harbour while a crude carrier is alongside the crude jetty.

The Harbour Office together with the ship's Master will decide on approach actions to be taken.

Product Jetty: (Berths No. 2 and 3)

Berth No. 2: 1×12 in. (F.O. No. 4 and F.O. No. 5).
1×12 in. (F.O. No. 4, F.O. No. 5 and ballast).
2×10 in. (F.O. No. 1 and diesel oil).
1×10 in. (Premium gas).
1×10 in. (Naphtha and regular gas).

Berth No. 3: 1×12 in. (F.O. No. 4 and F.O. No. 5).
1×12 in. (F.O. No. 4, F.O. No. 5 and ballast).
2×10 in. (Diesel and fuel oil No. 1).
1×10 in. (Premium gas).
1×10 in. (Regular gas).
1× 4 in. (TML).

Potable water and bunker oil are available at all berths.

A 4 in. sanitary sewer line is available at all berths and dry garbage can be left ashore (free of charge) in containers placed between Berth No. 2 and 3.

Product Jetty: (Berth No. 1)

Size	*Flange rating*	*Service*
6 in.	150 lb ASA	Prem. gas, reg. gas.
6 in.	"	Diesel, F.O. 1.
8 in.	"	F.O. 4, F.O. 5 Ballast.
8 in.	"	Sulphur.

Max. discharge rate at Crude Oil Jetty 18,000 cu.m. per hour. Max. pressure allowed 10 kilos. Max. loading rate at Product Jetty 1,500 cu.m. per hour. Max. pressure allowed 10 kilos.

Both Crude and Product Jetty have 4 in. 150 lbs sanitary sewer and 4 in. 150 lbs potable water connections available which may be used by running hose from ship.

All arms are hydraulically operated except those at the Coaster Jetty. No flexible hoses are allowed for oil handling.

Ballast water can be discharged at Product and Coaster Jetties.

FUEL: Bunker "C" only is available at Crude Oil Jetty. Bunker "C" and diesel oil are available at Product Jetties and the Coaster Jetty.

FIRE PRECAUTIONS: A special Fire Instruction will be given on board on arrival.

POLLUTION: Oil pollution prevention. A special instruction will be given on board on arrival.

CONSULS: Denmark, Finland, Netherlands, Norway and Germany (F.R.) have consuls in Uddevalla, 40 km. from Scanraff.

REPAIRS: Uddevallavarvet and Skandiaverken. For hull and engine repairs, harbour and voyage service.

Pemco: For construction work, mechanical erection and repairs.

Andersson & Callenberg: For electrical installations.

Engine repairs must be reported to Port Captain for permission.

DRY DOCK: Gothenburg, capacity 250,000 tons.

SURVEYORS: Saybolt, Caleb Brett and other cargo inspectors are available.

Lloyd's Register, Det Norske Veritas and others surveyors are available.

GANGWAY/DECK WATCHMEN: The crude oil jetty has gangway tower, but accommodation ladder is necessary at the product jetty.

Watchman is compulsory at the Crude Oil Jetty. At the Product Jetty watchman is available on request.

CUSTOMS ALLOWANCES: 1 bottle spirit and 200 cigarettes or 200 grams tobacco.

REPATRIATION: Changing of crew and any necessary repatriation is possible.

AIRPORT: Nearest airport is Gothenburg, 100 km. South of Lysekil.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE: Dial 90 000 and ask for necessary service.

EMERGENCY CO-ORDINATION CENTRE: Skandinaviska Raffinaderi AB Scanraff. Tel: 0523-60460, Fire and Safety Department.

TELEPHONES: A telephone can be connected on board if ordered through Agent or jetty operator. Telephone numbers: Alarm Centre 90 000 (Ask for ambulance, police etc. Can be in action within 10 minutes); Safety tug-boat 608 33; Lysekil Pilot 608 00; Scanraff switchboard 604 60; Product berth No. 1: 608 76; Product berth No. 2: 602 41; Product berth No. 3: 602 34. A slot telephone is also available in the gate house.

SERVICES: Compass adjusting is available. Local ship chandler available.

BANK: Skandinaviska Enskilda Banken, Postbox 22. 453 00 Lysekil. Tel: 0523-14020. Telex: 21020 (Gothenburg Office).

STORING: See "Prelims".

1. Vessel can be stored by barge.

2. Vessel can be stored by barge during loading/discharging operation if ship's crane abaft the funnel can be used. Storing amidships can be permitted but not during loading/discharging operation.

3. No trucks are allowed to handle stores. Minor storing can be done by means of wagon from the gate to the jetty and via the ship's gangway.

4. Fork lift trucks are not allowed to be used on the jetty to handle stores.

6. Local riggers are employed by the local ship's chandler to assist with storing.

SHORE LEAVE: Crew members are allowed ashore. No identification card or passes are needed.

REGULATIONS: The Harbour Regulations will be placed on board on arrival.

GENERAL: At the Crude Oil Jetty there is a refuse container to be lifted on board by means of the ship's gear. At the Product Jetty are 2 containers, which will remain ashore. These containers are free of charge to the ships.

AUTHORITY: Skandinaviska Raffinaderi AB, Scanraff, Box 10004, S-453 00 Lysekil. *Tel:* 0523-60460. *Telex:* 42135 Scanraff S. *Contact:* Harbour Master.

GAVLE: 60.41 N. 17.11 E. (See Plan)

PORT LIMITS: A line from Utvalnas (approx. 60° 45.2′ N. 17° 21.4′ E.) over Bakharen to Langharen (approx. 60° 41.0′ N. 17° 17.5′ E.).

DOCUMENTS:

4 Crew Lists (for European vessels).
2 Crew Lists (for other vessels).
2 Manifests.
2 Bills of Lading.
1 Tobacco List.
1 Stores List.

Following documents supplied by Agent and signed by Master:

On arrival from foreign port:
1 Maritime Declaration of Health.
4 Reports of Arrival (Customs).
1 Declaration of Master (of persons on board).
1 Declaration of living animals (if any).

On arrival from any port:
1 Report of Arrival (Harbour Office).
1 Report of Receivers (Harbour Office).
1 Cargo List (or Manifest).
1 Transfer.

On departure to foreign port:
4 Reports of Departure.
1 Declaration of Master (of persons on board).

On departure to any port:
1 Report of Shippers (Harbour Office).
1 Declaration by foreign Master.

PILOTAGE: *(a)* Sea Pilots: Pilot station: Bonan, Telephone Nos. 991 10 and 992 20. Telegraphic address: Pilotstation, Gavle. 5 hours advance notice of ETA pilot station. Notice of ETA can be given over any Swedish coastal radio station or free of charge on VHF over any Swedish pilot station or Grundkallen Lighthouse.

VHF: Channels 16: Calling and Safety   Pilot station and
13: Pilotage traffic   Pilot boats.

All pilot boats are orange. International signals for calling Pilot. Pilot boards: S.E. of Grasjalsbadan 60° 43′ N., 17° 27′ E., and on request South of Eggegrund Lighthouse, 60° 43′ N., 17° 34′ E. In case of bad weather closer to pilot station. Anchorages: Graberget roadstead N.E. of Bonan Lighthouse (approx. 60° 44.8′ N. 17° 20.5′ E.), about 350 m. from shore and 18 – 21 m. (10 – 13 fathoms) depth. Open to Easterly winds. *(b)* Harbour Pilots: Available for moving within harbour area on application to Port Administration, Telephone Nos. 17 88 61 or 17 88 62 or by VHF to Gavle Port Radio, Channels 16, 14 and 13.

ANCHORAGES: See "Pilotage". Outer roadstead situated inside of Northern entrance and in red sector of Fredriksskans Light. Outer roadstead well protected, depth of 15 – 11 metres (8 – 6 fathoms). Anchoring forbidden:

(a) In dredged channel between lights in Northern Channel and to a point 800 m. W.S.W. of Light No. 4.

(b) In white sector of Fredriksskans Light E.N.E. within a distance of 2,000 m. from same.

(c) In navigable channel from Fredriksskans Light to Gavle Dolphin Light.

(d) In Fredriksskans Harbour Basins and between the Oil Berth No. 21 and the Terminal Granudden.

(e) In Gavle River from Berth No. 18 to Berth No. 10.

RESTRICTIONS: One fairway leads to harbour. Northern Fairway is 10.9 m. deep and has bottom width of 60 m. Day-time: Max. LOA 220 m. Max. breadth 28.0 m. Max. draft 10.4 m. or max. breadth 30 m. Max. draft 9.0 m. Night-time: max. draft 7.35 m.; max. length 172 m. All depths are referred to mean water level. Ships on way from outer roadstead or passing from Fredriksskans Harbour to Inner Harbour shall give way to vessels proceeding in opposite direction. This shall not apply to vessels with tow unless vessel approaching also has tow.

MAX. SIZE: Max. permissible draft (at mean water) as follows:

	Max. Draft (m.)	*Max. Draft* (ft. in.)	*Real depth* (m.)	*Allowance* (m.)
Fredriksskans Harbour				
Oil Berth No. 21	10.4	34 01	10.8	0.4
Max. length 220 m. (722 ft.)				
Oil Berth No. 1	7.35	24 01	7.7	0.35
Max. length 200 m. (656 ft.)				
Oil Berth No. 2 – 3	5.2	17 01	5.4	0.2
Berth No. 4 – 8	7.35	24 01	7.7	0.35
Berth No. 9 – 14	8.9	29 02	9.3	0.4
Ferry Terminal (Ro/Ro)	6.3	20 08	6.5	0.2
Inner Harbour (River Gavle and Nyhamn)				
Berth No. 25 – 38	4.6	15 01	4.9	0.3
Berth No. 8 – 23			4.75	0.15
Karskar				
Berth No. 105 – 106	6.5	21 04	6.8	0.3
Length 195 m. (640 ft.)				
Berth No. 107 – 108	7.8	25 07	8.1	0.3
Length 196 m. (640 ft.)				
Berth No. 109	4.6	15 01	4.8	0.2
Length 90 m. (295 ft.)				
Berth No. 110, South end.	4.6	15 01	4.8	0.2
Length 35 m. (115 ft.)				
Berth No. 110, North end.	6.0	19 08	6.3	0.3
Length 75 m. (246 ft.)				

Terminal Granudden: See "Cargo Handling".

HEALTH: Pratique always automatic. If any suspected disease or fever on board, notify ship's Agent.

RADIO: Harnosand Radio (SAH).

RADAR/VHF: No port radar service, but Bonan Pilot Station, Eggegrund Lighthouse, and three pilot cutters equipped with both radar and VHF and assist any ship approaching pilot station on request. After calling pilot station on VHF Channel 16, ships will be given assistance on Channel 13, 12, or 6.

Also see "Pilotage."

TUGS: Join vessel outside Fredriksskans Lighthouse or outside Korsnas Works for berthing, and outside Northern entrance channel for passage through same. Ship's lines always used.

CARGO HANDLING: Container berth, max. draft 9 m. Three cranes with 30 ton capacity, two of which have automatic container spreaders for 20 ft. and 40 ft. containers.

Roll-on/Roll-off berth, max. draft see "Ferry Terminal" and "Terminal Granudden".

Terminal Granudden: A port terminal at Granudden which is situated opposite Fredriksskans Harbour. The terminal comprises 350 m. of quay with a Roll-on/Roll-off berth, having max. draft for vessels: 9.0 m. for length of 150 m. adjacent to Roll-on/Roll-off ramp and 10.5 m. for length of 200 m., 2 warehouses each having an area of 22,000 sq.m., as well as extensive storage space. The total terminal area is 150,000 sq.m. and it will have an annual maximum capacity of 1.2 million tons forest products. The terminal has very good connections with both main roads and the railway system.

TANKERS: *Tanker Berth No. 21:*

Max. length 220 m. (722 ft.). Max. draft (M.W.) 10.5 m. (34 ft. 5 in.).

Manifold connection size (all grades) 200 mm. (8 in.).

Berth to Depot pipe-line size:

	mm.	in.
Heavy Fuel Oils	450	18
Gas Oil	400	16
Gasoline	350	14
Kerosene	250	10

Tanker Berth No. 1:

Max. length 200 m. (656 ft.). Max. draft (M.W.) 7.45 m. (24 ft. 5 in.).

Manifold connection size:

	mm.	in.
Fuel Oils	250	10
Gasoline	200	8
Kerosene	200	8

Berth to Depot pipe-line sizes:

	mm.	in.
Fuel Oils	350	14
Gasoline	300	12
Kerosene	250	10

Tanker Berth No. 2 and 3:

Max. length 125 m. (407 ft.). Max. draft (M.W.) 5.3 m. (17 ft. 5 in.).

Manifold connection size (all grades) 150 mm. (6 in.).

Berth to Depot pipe-line sizes (all grades) 150 mm. (6 in.).

Tanker Berth No. K105-106:

Max. length 195 m. (640 ft.). Max. draft (M.W.) 6.6 m. (21 ft. 8 in.).

Manifold connection size (all grades) 200 mm. (8 in.).

Berth to Depot pipe-line (all grades) 250 mm. (10 in.).

Tanker Berth K107-108:

Max. length 195 m. (640 ft.). Max. draft (M.W.) 7.9 m. (25 ft. 11 in.).

Manifold connection size (all grades) 200 mm. (8 in.).

Berth to depot pipe-line (all grades) 250 mm. (10 in.).

Tanker Quay K201:

Max. length 220 m. (722 ft.). Max. draft 10.5 m. (34 ft. 5 in.).

Owned by Krangede A.B.

STEVEDORES: 24 hours' notice (if possible) order arrange gangs.

MEDICAL: Notice of medical attention to Agent as early as possible. All kinds of medical and hospital facilities available. Vaccinations necessary on arrival from diseased area. (Common for all Swedish ports.) Quarantine Station established at Gavle with Quarantine Anchorage on outer roadstead.

DENSITY: Fresh water.

FRESH WATER: Delivered from water posts at all quays in Fredriksskans Harbour. Inner Harbour, at Korsnas Works and on roads fresh water delivered by water boat.

FUEL: All kinds of fuel oils available either from pipe-lines at oil berths or by lorries at all other quays. Following viscosities (Redwood I) normally in stock: 35, 225, 650, 1500, and 3500 secs. Other viscosities can also be delivered. Notice of delivery is required day before.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

OPENING/CLOSING HATCHES: Can be done by either crew or stevedores. Only patent hatches have to be opened by crew.

CERTIFICATES:

Tonnage Certificate.

Derat Certificate (Not older than 6 months).

Certificate of Nationality (for Swedish ships only).

CUSTOMS ALLOWANCES: Tobacco: each crew member 200 cigarettes or 100 grammes of tobacco out of Bond.

Wine and spirit: Each crew member 1 bottle (75 centilitres) of spirit and moderate quantities of wine and beer out of bond. After a week in Sweden the same quantity may be taken out on request to Customs Office.

IDENTIFICATION CARDS: Not needed.

CONSULS:

Denmark	Tel: 115050	Netherlands	Tel: 105200
Finland	Tel: 121204	Norway	Tel: 188180

REPAIRS: Repairs can be carried out in all parts of harbour by Granges Metalock AB.

DRY DOCKS: None.

REPATRIATION: Crew changes and repatriation arranged by Agent.

AIRPORT: Stockholm Airport (Arlanda) 145 km. (90 miles) served by regular airlines. Rorberg airport 16 km. (10 miles). Regular traffic to Swedish airports.

TIME: GMT plus 1 hour in Winter. Summertime GMT plus 2 hours.

HOLIDAYS: New Year's Day (Jan. 1st); Twelfth Day (Jan. 6th); Good Friday; Easter Day; Easter Monday; First May (May 1st); Whit Sunday; Whit Monday; Midsummer Day (Saturday nearest to June 24th); All Saints' Day (first Saturday in Nov.); Christmas Day (Dec. 25th); Boxing Day (Dec. 26th).

POLICE/AMBULANCE/FIRE: Police Tel: 11 53 00; Ambulance Tel: 12 90 90; Fire Tel: 12 90 90. Emergency Tel: 90 000.

TELEPHONES: Fredriksskans: Telephones can be placed on board at all berths in Fredriksskans Harbour and at Terminal Granudden. At Korsnas Works: Telephones can be placed on board at two berths in Karskar and one at Kastet Pier.

SERVICES: Minor quantities of oil and other liquid residues can be discharged into tank lorries with special suction equipment.

DELAYS: Normally no delays in berthing, loading, discharging or bunkering.

DEVELOPMENTS: New shipping terminal for coal and coke where discharging capacity will be very high.

AUTHORITY: Gavle Hamn, Fredriksskans, S 803 87 Gavle, Sweden. *Tel:* (026) 178840/178861. *Telex:* 47349 Gavport S. *Contact:* B. Walfridson, Port Director. (A.O.H. Tel: 193369). M. Berglund, Port Captain (A.O.H. Tel: 128482).

GOTHENBURG: 57.42 N. 11.57 E. (See Plan)

DOCUMENTS:

2 Cargo Declarations (IMO Model).

3 Crew Lists.

2 Passenger Lists.

2 Crew Declarations (must be signed by each crew member).

2 Stores Lists.

1 Health Document.

Nationality Certificate.

Tonnage Certificate.

Derat Certificate.

Certificate of Insurance or other financial security in respect of civil liability for oil pollution damage (if more than 2,000 tons of oil on board).

Manifests, Bills of Lading.

TRAFFIC CONTROL SYSTEM: The Port of Gothenburg has in co-operation with the National Swedish Administration of Shipping and Navigation a traffic control system. It is a vessel movement-control and information system managed from the Gothenburg Traffic Control Centre (TCC), call sign "Gothenburg Traffic". The system is based on radar control and VHF communication. Vessels over 300 g.r.t. or exceeding 50 m. length should report to the TCC on VHF Channel 13, incoming when 6 miles off Vinga Island, out-going when leaving the berth. There are also certain way-points in the area (marked on the charts) where vessels should report to the TCC. Vessels should keep continuous watch on VHF Channel 13 within the whole traffic-control area. A special "Master's Guide to Gothenburg Port Entry" issued by the Port of Gothenburg can be obtained from the Port Authority or from ship's Agent.

ANCHORAGES: Anchorages "A", "B" and "C" marked on the charts in the area round Trubaduren light, at Rivo Fjord and Dana Fjord. VLCCs should anchor in Area "A", 2 miles S.W. of Trubaduren light.

PILOTAGE: Incoming vessels have to notify the Traffic Control Centre (TCC) call sign "Gothenburg Traffic" on VHF Channel 13 or by telephone 031-12 54 33 that they require a Pilot. Notification to be done 5 hours before ETA at the pilot grounds at Vinga Island, where the pilot boat will be at hand. The pilot grounds are marked on the charts. Approved pilot ladder (if rail is high, accommodation ladder), heaving line and a man standing by to receive Pilot (Also see "Stockholm").

RESTRICTIONS: No restrictions at any time of day and night. VLCCs berth and unberth in daylight only.

MAX. SIZE: Torshamnen, water depth 19.6 m. Fully loaded tankers of 225,000 d.w.t. on draft of 19.05 m. received. Partly loaded tankers of max. 380,000 d.w.t. have been received. Skarvik Harbour, water depth 13 m. Tankers up to 50,000 d.w.t. Skandia Harbour, general cargo, container vessels, water depth up to 12 m. General cargo harbours: for other cargo and passenger vessels 10 m. Water depth at MLW. Tide of no importance.

HEALTH: The Master of every ship, whose voyage has touched lands outside Europe (excepting U.S.A., Canada, Azores, Canaries, Madeira and Morocco), and who, within 28 days, arrives at Gothenburg from a port in any such land, shall submit to Customs on demand a Declaration of Health for the ship in the prescribed form. If ship arrives within 14 days of calling at any such port she must not touch land until inspected by the Quarantine Medical Officer and permission to land granted. Compulsory medical examination not required where a ship liable to inspection has undergone an approved Quarantine Inspection in either a Danish, a Norwegian or a Finnish port, and all questions in the Declaration of Health have been answered negatively. Exemption may also be granted to any other ship which would otherwise be liable for examination, if Master, pursuant to Article 21 of Quarantine Regulations for Sweden, has previously radioed a!! information regarding state of health on board to Health Authorities (Radio Pratique). Telegraphic address: "Portsan, Gothenburg". Messages must be made not less than 4 hours prior to ETA. (Preferably, messages should not be made during night). Free Pratique messages should include: Name of the ship; estimated time and day of arrival; number of crew; number of passengers; names of the last two ports called at outside Europe, and dates of departure therefrom; replies to the 6 questions contained in Declaration of Health.

RADIO: Goteborg Radio, call sign SAG.

VHF: Pilot vessel on Channels 13 and 69.

TUGS: Tugs normally join vessel between the islands of Nya Alvsborg and Rya Nabbe. Tugs join at Dana Fiord for tankers bound for Torshamnen. According to Master's desire ship's or tug's lines can be used.

Saturday	Saturday
0700 – 0500	0700 – 0500
Sunday/Holiday	Sunday/Holiday
0700 – 2200	0700 – 2200

2. *Normally no work will be performed on the following days:* New Year's Day, May 1st, Midsummer Eve (24th June 1988), Midsummer Day (25th June 1988), Christmas Day, New Year's Eve.

3. *Guaranteed Hours:* All "temporary" labour is guaranteed a minimum of 4 hours pay.

Overtime: (All personnel)

Monday-Friday	3 hours
Saturday	5 hours
Sunday/Public Holiday	6 hours

All hours ordered are to be paid for. Permanent employees are entitled to special compensation for work later than 2100 hrs. Monday – Friday.

4. *Deadlines for requesting labour and/or overtime:*

Inner Harbour, Skandia Harbour and Alvsborg Harbour:	Weekdays latest 1000 hrs. on the day before operation is to commence. Cancellation latest 12 noon on the day before operation is to commence.
Overtime:	Weekdays – latest 1000 hrs. on the same day. Cancellation latest 1200 hrs. on the same day. Saturday/Sunday – latest 1000 hrs. on preceding Thursday. Cancellation latest 0900 hrs. on preceding Friday. Public Holidays – latest 1000 hrs. on the last but one normal working day before the Public Holiday. Cancellation latest 0900 hrs. on the last working day before the Public Holiday.

5. The above regulations are not valid in case of "force majeure" such as strikes, lock-outs, natural catastrophies, or any other unforeseeable incidents of which the Port of Gothenburg A.B. has no control.

6. These regulations are valid until further notice. They can, however, be changed with immediate effect when/if some other agreement is made with labour unions.

CONTAINERS: The Skandia and Alvsborg Harbours for container handling with 20 berths and 12 ferry ramps. Also see "Berthing" and "Cranes".

TANKERS:

Torshamnen:

		Berth No. 801	*Berth No. 800*
Operator		Port of Gothenburg A.B.

acceptable (also see	beam	no restr.	no restr.
below)	draft	19.05 m.	19.05 m.
	d.w.t. (summer)	abt. 250,000	abt. 115,000
Water density		1013	1013
Nature of bottom		clay	clay
Boom arrangement		4×16 in.	4×12 in.
Manifold heights	maximum	22.00 m.	17.00 m.
	minimum	3.00 m.	1.50 m.
Public telephone number		031632446	031632445

Draft: That the above figure, 19.05 m., is given on the basis of mean water level and brackish water (density 1.013). There is very little tide at Gothenburg, only about 20 cm. (8 in.). The draft is more affected by wind. Easterly winds blowing the water away from the coast, Westerly winds blowing the water towards the coast. In winter and early spring (January-May) there can be long periods of Easterly wind, when it would be prudent not to arrive on a deeper draft than 18.60 m./brackish water. *Lightering:* In case of need lightering can be arranged 3 nautical miles S.W. of the Trubadur Lighthouse. This is in open sea and restricted to wind force less than 6 – 7 m./s.

For crude oil distribution to other refineries lightering can take place across the finger jetty from Berth No. 801 to Berth No. 800.

Gas lightering is being done via 8 in. acid proof steel pipe-line across jetty. Flanges drilled to ASA 150 and 300. No hoses available, vessels have to provide same.

Moorings: Berth 801 – VLCCs: Owing to the somewhat exposed nature of berth Masters are advised, that when strong off-shore winds are forecast, to ballast the vessel, stop discharge if necessary and, maintain steam on the winches to supplement the brakes. It is strongly recommended that vessels over 210,000 s.d.w.t. make use of the extra mooring as described below.

Instructions for the use of extra mooring (E.M.):

1. Pass ashore a wire and a shackle and make fast to the eye of the E.M. on the caisson. Free the E.M. from its hook by means of the capstan on the caisson. Bring home the E.M. and belay it.
2. At departure. Before letting go the E.M. make fast a strong rope or a wire in the eye of the E.M. and take the other end to the caisson for hanging off the E.M. Let go the E.M. and, by means of the capstan, back to the caisson and place it on its hook, heave it.

Remarks:

520-521: Only used for loading from or discharging to BP.

519: Mainly used by Shell and for discharge of asphalt crude. Being deepest product berth can in case of need also be used by other importers/exporters after approval by Shell. However, products will then have to be pumped over long distances, causing slow loading/discharge.

510-511: "Common users".

506-507, 508-509: Used by Shell. Depths 7.0 m. and 8.0 m. respectively.

Note: Maximum draft:

On lesser draft sizes up to 210 m. – 215 m. may be accepted but special approval from the Harbour Authorities needed on each occasion.

Report: *Restriction:* Entry to Gothenburg by large ships is not undertaken if visibility is less than 3 miles, or if the wind speed exceeds 15 m./sec. (about 30 knots.) Ships over 17.4 m. (57 ft.) draft do not enter during hours of darkness.

Ballast: Cannot be received ashore.

Dimensions: The harbour is prepared to accept vessels exceeding 335 m. length provided distance from bow to manifold is max. 180 m. and vessels' draft does not exceed 18.29 m. (60 ft.), brackish water. Special approval needed in each case.

Bunkers: Supplied by barge only.

Pilotage: Pilotage is compulsory and necessary. Pilots are stationed at TCC and are taken out by fast pilot boats to meet incoming ships based on ETA and VHF contacts. On Vinga Island there is a lookout manned by personnel from Gothenburg Station. The lookout listens continuously on VHF Channels 13-16 and maintains VHF watch on Channel 69 and 11A. Pilots are government controlled. Two Pilots are assigned to ships over 60,000 d.w.t..

Sea pilots go with the ship all the way to berth as there are no harbour pilots.

South of Vinga Island there are 3 anchorage areas named A, B, and C, marked on the Swedish Chart No. 931.

In addition to those mentioned above there are anchorages in the Danafjorden and the Rivofjorden.

Torshamnen Berth: Approaches – Cautionary Advice: Care must be taken when turning from the channel to Torshamnen berth, particularly when the wind is from the West, not to turn too late as the ship can drift laterally and be carried on to Dynan Shoal (rock), or on to the end dolphin of the berth.

Berthing Procedure: All ships are berthed heading N.E., therefore, on the West berth (801) ships are starboard side to, and on the East berth (800), portside to.

Berthing should be as parallel as possible as the forward mooring dolphins are only 10 m. inside the breasting face line and the limits of the 19.6 m. (64.3 ft.) depth run close to the breasting faceline.

The first ropes ashore (by boat) are usually the forward spring and a head line. It is important the ship does not run too far ahead of position as the limit of the 19.6 m. depth is only 200 m. from the centre of the berth. There is no approach velocity measuring device at these berths, and no published maximum allowable impact velocity, but ships should endeavour to control their approach speed to less than 10 cm./sec.

See "Plan" for recommended mooring diagram for the Torshamnen berth.

Shore Moorings: Two swamped shore wires each with a capacity of 100 tons are available at the West berth, one forward, one aft. These are rarely used as the prevailing strong winds are on berth. The more difficult East berth with prevailing strong winds off berth has no shore moorings.

Svenska Statoil AB Terminal Ryahamnen: Berthing: Ocean going ships always berth heading upriver portside to. Moorings are taken ashore and to the buoys by power boat. Spring lines go to the jetty head, head/breast lines to a buoy forward, stern/breast lines to a buoy aft with 1 or 2 breast lines to a mooring post on shore. It is important to give good lines for the after breast lines as N.W. winds can cause a problem. As the jetty between the end concrete dolphins is constructed entirely of wood, it is important that the large ships contact only the end dolphins during berthing operations.

The fendering of the end dolphins has low energy absorption qualities and, therefore, landing should be as light as possible.

The upriver dolphin is fendered with a solid wood facing, the downriver dolphin with truck tyres.

No shore moorings or shore gangways are provided at this terminal

DENSITY: Average density 1012. Tide of no importance.

FRESH WATER: Available from quay or water boats.

FUEL: All grades available at short notice.

GANGWAY/DECK WATCHMEN: Watchmen accepted by Harbour and Fire Authorities on tankers and vessels loaded with explosives. On other vessels not necessary.

OPENING/CLOSING HATCHES: By crew or stevedores.

CUSTOMS ALLOWANCES: Tobacco, per 10 days 200 cigarettes or 250 gram other tobaccos. Wine and/or Spirits, per 10 days 1 bottle of spirits and 1 litre of wine, alternatively 2 litres of wine.

Require report latest 24 hours prior to arrival via Port of Gothenburg Co.

CARGO GEAR: Certificates that equipment is approved.

IDENTIFICATION CARDS: Not necessary. Crew List to be furnished in the oil harbours.

CONSULS:

The following countries are represented in Gothenburg:

Argentina
Austria
Bangladesh
Belgium

HALMSTAD: 56.40 N. 12.52 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
3 Stores Lists (Tobacco and Stores).
5 Manifests.
2 Bills of Lading and Ship's Papers.
PILOTAGE: Advance notice of ETA 5 hours before arrival. Pilot station and pilot boat equipped with VHF Channels 16, 13, 6. Pilot boards at lightbuoy in Halmstad Road (L.Fl. 10 sec. 56° 37′ N., 12° 47.5′ E.) (Also see "Stockholm".)
ANCHORAGES: Good holding ground in 30 ft. – 40 ft. on road 1 mile to 2 miles S.E. of breakwater.
MAX. SIZE: See "Berthing".
RADIO: Gothenburg Radio.
RADAR: Pilot station equipped with radar.
VHF: Port Authority on Channels 16, 13 and 9.
TUGS: Meet at Halmstad Road. Ship's lines used.
BERTHING:

Berth	*Length* (m.)	*Max. draft* (ft.)
Ostrakajen	300	30 ft.
Ostrakajen	230	27 ft.
Jarnverkskajen	220	27 ft. 6 in.
Importkajen	470	23 ft. 6 in.
Importkajen	270	22 ft.
Tullkammarkajen	400	18 ft.
Kattegattshamnen	285	27 ft. 6 in.
	Max. LOA (m.)	*Max. draft* (ft.)
Oceanhamnen – Inner Berth	200	32
Outer Berth	235	33 ?

SPECIAL CARGO HANDLING FACILITIES:
Roll-on/Roll-off: Kattegattshamnen: 2 fixed ramps. 43 m. and 23 m. wide. Max. draft 27 ft. 6 in.
Ostrakajen: 1 fixed ramp. 25 m. wide. Max. draft 27 ft.
Containers: Handled at Ostrakajen and Kattegattshamnen.
BULK HANDLING FACILITIES: A new harbour basin (Oceanhamnen) was opened in 1981. Alongside the berth ships with max. LOA 235 m. and max. draft 11.3 m. can be handled. A rail mounted bulk-unloader, screw type, can discharge bulk-cargoes at a capacity of 500 t.p.h. On the quay is a bulk-terminal operated by Nordic Bulk AB, Halmstad.
Bulk cargo can also be handled alongside the Importkajen and Jarnverkskajen with grab-equipped cranes. 1×200 t.p.h. unloader for limestone and dolomite. 1×100 t.p.h. pneumatic unloader for soda imports.
CRANES: 10 rail mounted cranes and 4 mobile cranes, capacity up to 30 tons.
MEDICAL: Hospital facilities available.
TANKERS: Max. draft at oil berth 30 ft. Max. LOA – 700 ft. Diameter of discharge lines 8 in. and 10 in.
DENSITY: Average 1005 (depending on wind).
STEVEDORES: *Working Hours:* Monday – Friday 0700 – 1630 plus 3 hours' overtime. Saturday – Overtime 6 hours. Sundays – By special agreement.
FRESH WATER: Fresh water available from berth 35 t.p.h.
FUEL: Viscosities available: 1.2 englergrades/20°C. By arrangement with ship's Agent.
GANGWAY/DECK WATCHMEN: Not necessary. Available if required.
OPENING/CLOSING HATCHES: Normally carried out by crew, but if carried out by stevedores cost charged to vessel.
SHIP CERTIFICATES: Bill of Measure, Nationality Certificate and Derat Certificate.
CUSTOMS ALLOWANCES: Tobacco/spirits, 1 bottle spirits, 1 bottle wine and 200 cigarettes free on board. Quantity over will be closed under Customs seal. No other restrictions.
IDENTIFICATION CARDS: Only needed in oil harbour.
CONSULS: Danish, Dutch, Finnish, Germany (F.R.) and Norwegian.
REPAIRS: Shipyard carries out ship repairs.
DRY DOCKS: 2 slips.
REPATRIATION: Facilities exist for changing crew and repatriation.
AIRPORT: Halmstad Airport, 1 mile from town centre. 2 flights per day for Stockholm.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day; Twelfth Day; Good Friday; Easter Day; Easter Monday; Ascension Day; Whit Sunday; Whit Monday; Mid-Summer Day; All Saints' Day; Christmas Day; Christmas Monday; Labour Day.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
TELEPHONE: For placing a telephone on board cost is 130 SEK, and 59 SEK, a day for hire.
SHORE LEAVE: Crew members allowed ashore.
GENERAL: *Charts:* BA 3671. Swedish Charts Nos. 92 and 923.
AUTHORITY: Halmstad Hamnforvaltning, P.O.Box 235, 30104 Halmstad, Sweden. *Tel:* 46-35-11 80 30. *FAX:* 12442. *Contact:* J. Benninger, Port Captain.

HARGSHAMN: 60.10 N. 18.29 E.

LOCATION: The port is situated in the archipelago of Oregrund, about 130 km. North of Stockholm and about 110 km. South of Gefle. It is a natural and well sheltered harbour, suitable for vessels up to about 30,000 d.w.t.

DOCUMENTS: The Customs Officers require the following documents on arrival:

Tonnage Certificate (Certificate of Registry).
Certificate of Nationality.
Swedish Light Dues Receipt for current year.
Crew List, 2 copies.
Crew's Effects Declaration (spirits and tobacco only), 2 copies.
Ship's Stores Declaration (spirits and tobacco only), 2 copies.

If the international IMO Forms are not available, similar forms are accepted.

PILOTAGE: Pilot is compulsory for tankers over 1,200 g.r.t. and dry cargo vessels over 1,600 g.r.t.

Pilot is available from 0300 hrs. – 2400 hrs. and is embarked off Svartklubben Lighthouse (Lat. 60° 09′ N., Long. 18° 52′ E.). Order for Pilot has to be given 5 hours before needed and can be given via the Agent or direct to the Svartklubben Pilot Station, VHF Channel 16, Tel: Hallstavik 0175-10006, Cables: "Pilotstation Hallstavik".

Distance from sea off Svartklubben to Hargshamn is about 17 nautical miles. For vessels arriving from North, Pilot will board on request at Oregrund or North thereof.

RESTRICTIONS: Vessels with draft over 7.15 m. are navigated in daylight only.

MAX. SIZE:

Max. allowed draft 10.4 m. at MLW (density of water 1005).
Max. allowed length of vessel about 185 m.
Max. allowed breadth of vessel about 28 m.
Max. distance water level to hatch coamings 10 m. (loading ore).
Max. allowed draft at new quay for general cargo 7.3 m.

RADIO: ETA is to be given 48 hours and 24 hours in advance to the Agent. Tel: Osthammar 0173-20080 or cable: "Oreship Hargshamn".

TUGS: A tug of 1,200 h.p. is available from Hallstavik, and is normally used to assist vessels over 9,000 d.w.t. on departure only. A small tug of 230 h.p. is available at the port.

BERTHING: *Ore Quay:* Managed by shippers Dannemora Gruvor AB.

Length 90 m.
Minimum depth alongside 11 m.
Berth equipped with a loading conveyor, capacity 800 t.p.h.

New Quay: Managed by Hargshamn Terminal AB.

Length 40 m.
Minimum depth alongside 8 m.
Equipped with mobile cranes 50 tons and 160 tons.

STEVEDORES: Ordinary Working Hours: Monday-Friday 0600 – 2200 and Saturdays 0600 – 1200.

Work can be arranged on overtime except on following holidays: New Year's Day, Epiphany, Easter Holidays, Labour Day, Ascension Day, Whitsun Holidays, Midsummer Holidays, All Saint's Day, Christmas Holidays and New Year's Eve.

Overtime charges as per separate tariff.

No trimming charges.

New Quay: Ordinary Working Hours: Monday-Friday 0700 – 1600.

Stevedores: Hargshamn Terminal AB, S-740 73 Hargshamn. Tel: Osthammar 0173-20020. Telex: 76042.

FRESH WATER: Available.

CUSTOMS ALLOWANCES: 200 cigarettes per man and 1 bottle of spirits per Officer.

EMERGENCY CO-ORDINATION CENTRE: Stockholm Radio.

STORING: Can be effected with some minor difficulties.

SURVEYORS: From Stockholm (130 km. away).

GENERAL: *Ice:* The port can be kept open all Winter by an ice-breaking tug. Normally there is ice from last week of December until the last week of March/first week of April. In port and entrance there is fast ice up to 40 cm. – 50 cm. thick.

Navigation is maintained in broken ice-channel.

Off the pilot station or in Aland Sea there is very seldom packed ice or other difficulties during a normal Winter.

Charts: Swedish No. 536 (1:50000).
B.A. No. 2335 (1:100000).

AUTHORITY: (Iron Ore) Dannemora Gruvor AB, S-74073 Hargshamn, Sweden. *Tel:* Dannemora 0295-20720; Osthammar 0173-20192 (port); Osthammar 0173-20123 (Foreman – private).

AGENT: Bjorsbo Shipping AB, S-740 73 Hargshamn. Tel: Osthammar 0173-20080. Telex: 76042. Fax: Osthammar 0173-20132. Cables: "Oreship Hargshamn".

HARNOSAND (Hernosand): 62.38 N. 17.57 E.

DOCUMENTS:

2 Crew Lists and/or 2 Passenger Lists (stating what tobacco, cigarettes or spirits each man has in their possession).
Derat Certificate.
Manifest and/or Bills of Lading.
Register, and if vessels have previously been in Sweden same year, bills for light dues paid.

PILOTAGE: Applications for licensed Pilots should be made at least 5 hours before arrival. When making application, specify name of vessel, tonnage, draft and destination. Also give estimated time for taking Pilot on board and route. If this procedure not followed, the Maritime Service cannot guarantee to supply a Pilot without considerable delay to vessel.

Preferable to make application by telephone or by radio via a coastal station or by some other method direct to pilot station. Also possible to request Pilot by VHF.

Pilot station at Spikarna/Sundsvall for Northbound vessels and Skagsudde/Ornskoldsvik for Southbound vessels.

ANCHORAGES: In port approaches in depth of 15 m. to 40 m.

RESTRICTIONS: During Winter assistance given by State Ice-breakers.

MAX. SIZE: Up to 32 ft. 5 in. draft. Also see "Tankers".

RADIO: Cable Agents to give ETA, draft and cash required via either Hernosand Radio SAH or Stockholm Radio SDJ.

HEALTH: Vessels arriving from ports outside Europe must, for inward clearance, provide Customs Officer with written declaration of freedom from infection. Further instructions will be issued by Customs Office when such a declaration cannot be given.

TUGS: Tug assistance is available.

BERTHING: Depth alongside main quays from 7 m. to 8 m.

TANKERS: *Municipal Oil Pier:* Max. LOA 200 m. Max. draft 10.0 m. Depth alongside 10.5 m. Max. d.w.t. 30,000. Vessels berth starboard side alongside. Tugs available but not required. Offshore anchor used.

DENSITY: Nearly fresh water.

FRESH WATER: Available from the quays or by barge.

FUEL: Can be supplied.

GANGWAY/DECK WATCHMEN: Gangway watchmen available.

OPENING/CLOSING HATCHES: Normally done by crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 75 centilitres spirits per man/week. Extra granted on request.

CERTIFICATES: See "Stockholm".

IDENTIFICATION CARDS: Not necessary.

REPAIRS: Most repairs possible.

DRY DOCK: At Gustavsvik.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day; Epiphany; Good Friday; Easter Monday; Labour Day; Ascension Day; Whit Monday; Midsummer Day; All Saints' Day; Christmas Day; Second Christmas Day.

Work ceases at 1130 hrs. on the following eves of holidays and is voluntary and paid with 100 per cent overtime: Easter Eve; Whitsun Eve; Midsummer's Eve; Christmas Eve and New Year's Eve.

POLICE/AMBULANCE/FIRE: Telephone numbers: Accidents, Police, 90000; Fire: ask for alarm 90000.

AUTHORITY: Harnosands Hamn, P.O.Box 1005, 87129 Harnosand, Sweden. *Tel:* (0611) 12119, 12010. *Telex:* 71020. *Cables:* Ramstrom. *Contact:* Lars Wikstroem, Harbour Master.

HELSINGBORG: 56.03 N. 12.41 E. (See Plan)

DOCUMENTS: See "Stockholm".

PILOTAGE: Call Pilot on VHF Channel 16 (Tel: 042-110035). Pilots board about 3 nautical miles North or South of Helsingborg North Harbour. On request Pilot will meet at Svinbadan Lighthouse or at Oresund North Lightbuoy, outside Hoganas. Helsingborg Pilots are also Seapilot for the Sound, Kattegatt, Baltic and North Sea.

Anchorages: It is not recommended to anchor outside Helsingborg due to the heavy ferry traffic.

Good anchorage is found at Raa Roads, about 0.5 nautical miles S.W. from Raa Lighthouse (3 nautical miles South from Helsingborg).

Pilots: 24-hour service. Channel 16, 14 and 13 (VHF relay station on Kullen Lighthouse).

APPROACHES: The harbour basins are very easy to approach. The deep water outside breakwaters – varying from 10 m. to 30 m. (33 ft. – 98.5 ft.) – adjacent to the sailing route in the Sound facilitates port calls. Normally comparatively large ships can proceed directly to the quays without tug assistance.

ANCHORAGES: See "Pilotage".

MAX. SIZE: Permissible length about 220 m.; breadth unlimited; draft 7.0 m.–11.7 m. on MW, depending on which berth the vessel is bound for. No tides but certain variations following prevailing current and winds. *Tankers:* Max. draft 10.5 m.

HEALTH: Pratique automatic for all vessels arriving from non-infected ports. In cases where Pratique should be obtained, notice to be given through ship's Agent. Further directions given by Pilot.

RADIO: For communication – Goteborg Radio.

VHF: 24 hour watch on Channel 16. Call sign "Helsingborg Harbour", working Channels 11 and 12. Ships to contact the harbour 1 hour before arrival and 1 to 0.5 hours before departure.

Pilots: Channel 16, working Channels 13, 14 and 69.

Tugboats: Working Channels 11, 12 and 69.

TUGS: 3 tugs available, up to 2,686 KW.

Join vessel outside entrances.

CRANES: 22 cranes, including 2 container cranes (42 tons and 45 tons) and 2 multi-purpose cranes (30 tons each). 2 × 30 ton transtainers available.

BULK CARGO FACILITIES: 2 berths of 215 m. length for grain and fertilisers, max. draft 9.9 m. Loading capacity 700 tonnes per hour. Storage 250,000 tonnes.

SPECIALISED CARGO HANDLING FACILITIES: Complete container terminal West Harbour with 670 m. berths and 3 Ro/Ro berths, max. draft 11.7 m. There are a total of 10 Ro/Ro berths in the port. All types of handling equipment. Liquid chemicals handled at the tanker terminal.

STEVEDORES: Cargo handling performed by Helsingborgs Hamn AB offering all kinds of harbour work including loading, discharging, warehousing, etc.

MEDICAL: For attention, application to be made through ship's Agent. Hospital facilities available.

TANKERS: Dimensions of pipe-lines – for oils, 14 in., 12 in., 8 in., petrol, 12 in., 10 in., 6 in., slops, 6 in. Discharge facilities for slops through pipe-lines from Berth Nos. 504 and 505. Tankers berth at Quay Nos. 503 and 504 with depth of water alongside 11.0 m. MW, and Quay No. 505 depth of water alongside 8.0 m. MW.

DENSITY: 1007. No tides, but slight variations in accordance with prevailing currents and winds.
FRESH WATER: Available from quay connections (Tel: 042-122049).
FUEL: Bunker fuel delivered from pipe-lines or by tank lorry. Advance notice required. Any grade available.
FIRE PRECAUTIONS: Standard procedures apply.
GANGWAY/DECK WATCHMEN: Watchmen generally at Master's option.
OPENING/CLOSING HATCHES: By crew or stevedores.
CERTIFICATES:

Certificate of Nationality.
Bill of Measurements.
Crew Declaration.
Bond Declaration (Spirits, cigarettes, tobacco, etc.)
Derat Certificate.
Crew List.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes or equivalent quantities for each person on board. Wine and/or Spirit, one bottle each member to be held out of bond.
CARGO GEAR: Usual Board of Trade Regulations valid.
IDENTIFICATION CARDS: Not needed.
CONSULS:

Denmark	Tel. 17 27 00	Iceland	Tel. 12 62 20

REPAIRS: All kinds of deck and engine repairs can be carried out.
DRY DOCKS: Length of largest dry dock 112 m. Depth on sill about 16 ft.
SURVEYORS: Lloyd's local agent: Damco Survey AB. Tel: 29 22 90. Telex: 72985. Fax: 29 00 65.
REPATRIATION: Repatriation possible, by air and by train.
AIRPORT: Kastrup 60 km., Sturup 70 km., Angelholm 30 km. Heliport within the port.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Official holidays 1st and 6th January, 1st May, 1st Saturday November, 25th and 26th December, plus 2 holidays for Easter, 1 holiday for Whitsun and 1 holiday for Midsummer on appropriate dates.
POLICE/AMBULANCE/FIRE: Police 14 40 40 or in an emergency situation all services via tel. 9 00 00.
TELEPHONES: Quay-connected telephones are placed on board on request.
SERVICES: Tank cleaning, discharge of tank washings, compass adjustments, etc., can be carried out after application through local Agents.
Environment Protection: For oil protection, cleaning, sludge-suction, refuse collection etc., call VTS Centre Tel. 106300. Night service Tel. 10 63 22.
Dustbins for Ships: Dustbins are available. Galley refuse is to be delivered in plastic bags.
Receiving Station for Waste Oil: By law, water pollution from ships is prohibited. Sludge is accepted (free of charge) through Helsingborgs Hamn AB or through vessel's local Agent.
Provisions: Provisions are supplied by ship-chandlers 24 hours daily.
Repair/Maintenance: Repair and maintenance of containers, flats, trailers, trucks and other cargo handling equipment is carried out. Consult local Agent.

Testing according to CSC provisions (Convention for Safe Containers).

For ship repair call Ciserv Helsingborg AB. Tel: 042-12 02 95. Fax: 042-18 09 16.
SHORE LEAVE: No restrictions.
REGULATIONS: Normal regulations apply.
DELAYS: No other delays than berths being occupied by working vessels can be expected.
AUTHORITY: Helsingborgs Hamn AB, P.O.Box 1434, 251 14 Helsingborg, Sweden. *Tel:* 042-10 63 00. *Telex:* 72215. *FAX:* 042-13 54 83. *Contact:* Marketing Manager or Traffic Manager.

HOGANAS: 56.12 N. 12.33 E. (See Plan)

Privately-owned port serving owning company only – Hoganas AB. Customs and pilotage arranged through Authorities in Helsingborg (12 nautical miles S.E. of Hoganas).
DOCUMENTS: See "Stockholm".
PILOTAGE: Compulsory. Pilot obtainable at Hoganas or at Helsingborg. Pilot service day and night, available after request to pilot office at Helsingborg.
RESTRICTIONS: Entrance Channel, Length 750 m.; width 65 m.; depth 8.20 m.

The harbour is seldom closed by ice.
MAX. SIZE: LOA 130 m., max. draft 7.40 m. The Pilots have berthed vessels with a draft in excess of 7.40 m.
TUGS: There are no tugs stationed at Hoganas, but tugs are available after request to the Harbour Office at Helsingborg.
BERTHING: *The Pier (Extending South-Westerly).*

Length of quayage:	380.00 m.
Depth alongside:	
For 120 m. (from outer end)	6.60 m.
For the next 160 m.	8.20 m.
For remaining 100 m. varies down to	4.00 m.
The Cross Quay:	
Depth alongside at 75 m. from Northern end	3.50 m.
the remainder is unnavigable	
Quay in the Middle of the Harbour:	
Length of quay:	180.00 m.
Depth alongside N.W. side:	
For 120 m. (from outer end)	6.60 m.
For the next 35 m. the depth varies from to being unnavigable.	4.2 m.
Depth alongside S.E. side:	
For 30 m. (from outer end)	2.50 m.
remainder	unnavigable

The depth of water at this port is somewhat affected by winds.
CRANES: 1×25 ton rail mounted electric crane (21 tons-grab duty), 1×25 ton mobile crane.
REPAIRS: Machine shop repairs only.
STEVEDORES: Working hours; a normal working day, Monday to Friday from 0700 to 1600 hrs. Normally no working on Saturdays.
FRESH WATER: Available.
FUEL: Can be supplied.
AUTHORITY: Hoganas Hamnbyggnads AB., Box 501, S-263 01 Hoganas, Sweden. *Tel:* (Harbour) (46) 042-38224. *Telex:* 72368 Hbmet S. *Cables:* Clayworks Hoganas. *Contact:* Bo Norberg, General Manager. Leif Andersson, Harbour Master.

HORNEFORS: 63.37 N. 19.54 E. (See Plan)

PULP AND PAPER MILL IS CLOSED AND PARTLY DISMANTLED. NO OPERATION TAKING PLACE AT PRESENT. IT IS ONLY POSSIBLE TO CALL AT THE PORT DURING DAYLIGHT.
DOCUMENTS:

1 List of Bonded Stores.
2 Tobacco Lists.
3 Crew Lists.
3 Passenger Lists.

Health documents, none – if all on board healthy. In case of illness on board, this must be reported to Customs on arrival.

Copy B/L and copy Manifest.
PILOTAGE: Pilot station, Bredskar Tel: 090-45021; Pilot must be ordered 5 hours before arrival. If change in position, this must be advised at least 2 hours before arrival. Pilot can also be taken at Skagsudde Pilot Station Tel: 0660/66003. (Also see "Stockholm").
ANCHORAGES: Will be advised by Pilots.
RESTRICTIONS: Daylight entry only possible.
MAX. SIZE: Max. length 105 m. Max. draft 20 ft. 8 in. (6.3 m.).
RADIO: Harnosand Radio, Tel: 0611-12733.
TUGS: Available.
BERTHING: No particular arrival times necessary.
CRANES: 1 stationary crane, capacity 3 tons.
STEVEDORES: Labour must be ordered latest 1430 hrs. day before commencement loading, and if such day is Monday labour to be ordered before 1100 hrs. Saturday.
MEDICAL: No special regulations. Hospital and doctors available day and night.
TANKERS: 8 in. connections.
FRESH WATER: By pipe, 2 t.p.h.
FUEL: No fuel available in port. Must be ordered from Holmsund.
GANGWAY/DECK WATCHMEN: Not compulsory, but can be arranged.
OPENING/CLOSING HATCHES: Normally done by ship's crew.
CERTIFICATES:

Lighthouse dues (receipts).
Oil Record Book.
Derat Exemption Certificate.
Nationality Certificate.
Ship's Register (International form).
For open/closed ships – Freeboard Certificate.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes man/week or 250 grams of tobacco man/week. Wines/Spirits, 1 bottle of wine and 1 bottle of spirits man/week. Note: Must be 21 years of age before crew member is allowed to have spirits or wines.
IDENTIFICATION CARDS: Not necessary.
CONSULS: None.
REPAIRS: No facilities available.
REPATRIATION: No facilities for crew changes.
AIRPORT: 25 km. from port. Served by Linjeflyg, domestic services flights to Stockholm 6 times a day.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Christmas Eve; Christmas Day; Second day after Christmas; New Year's Eve; New Year's Day; Easter Friday; Saturday and Sunday; Midsummer Eve and Midsummer Day; Whitsunday; Epiphany (1st May); Ascension Day; The Day of All Saints (1st weekend November).
POLICE/AMBULANCE/FIRE: Tel. 90 000.
TELEPHONES: None available for placing on board.
AUTHORITY: Hornefors Bruk AB, 91020 Hornefors, Sweden. *Tel:* 0930-20900. *Telex:* 54040.

HUDIKSVALL (including Iggesund): 61.44 N. 17.07 E. (See Plan)

PORT LIMITS: Vessel is considered to be an "arrived vessel" when berthed alongside quays in port or, if berths not available, at anchor in Inner Roads, outside berths; but not when vessels, owing to darkness etc., are anchored outside pilot stations or in Outer Fairways.

DOCUMENTS: If arriving direct from foreign port, following documents presented to Customs Officer who embarks during office hours (0800 – 1700 hrs.).

3 Crew Lists.
2 Tobacco Lists.
Derat Certificate (not over 6 months old).
Certificate of Nationality.
Certificate of Tonnage.
2 Manifests covering incoming cargo.
Receipts of Light Dues, paid to Swedish Authorities during year.

PILOTAGE: Gavleborg Pilots will undertake pilotage. Call "Gavleborg Pilots" on VHF Channels 16/13 to arrange rendezous.

ANCHORAGES: Anchorage places for vessels awaiting Pilot or anchoring owing to weather conditions: 61° 37.5′ N., 17° 25.0′ E.; 61° 37.0′ N., 17° 22.0′ E.; 61° 37.7′ N., 17° 21.3′ E. depending upon prevailing winds, etc. Bottom mud and/or sand. Depth 10 m. – 30 m.

RESTRICTIONS: No tidal water at Hudiksvall. Tankers of more than 100 m. in length between perpendiculars not allowed entry during darkness because of narrow channel with some bends. Dry cargo vessels up to 150 m. length allowed entry after dark.

MAX. SIZE: *Tankers:* Daylight 45,000 d.w.t., length 210 m., draft 10 m. After dark 6,000 d.w.t. length 100 m., draft 7.5 m.
Other Vessels: 16,000 d.w.t., length 160 m., draft 8.7 m.

LW between 0.2 m. – 0.5 m. sometimes as much as 0.7 m. below MWL, may occur often. LW periods may occur when N.W. winds blowing over Northern Sweden.

HEALTH: Pratique automatic. No doctor visits incoming vessels if not specially ordered for treatment on board, etc.

RADIO: Vessels coming from South and having not yet passed the Stockholm area are recommended to call Stockholm Radio – VHF Channels 25 or 28 for vessels between Gotland/Sweden, 24 outside Stockholm South, 28 Stockholm East and North, 23 North of Aalands Sea, and in Gavle Bay. Hernosand Radio SAH: Channels 25 Hudiksvall area, 24 Sundsvall area, 23 Hernosand area, 28 Ornskoldsvik area. Hudiksvall harbour office: Channel 16. Working Channel 9.

TUGS: Tug compulsory for tankers over 6,000 d.w.t. and for other vessels over 8,000 d.w.t. in fairway. Vessels met near isle of "Enbarsskar" at Lat. 61° 39.5′ N., Long. 17° 17.0′ E. For mooring purposes tug compulsory for tankers over 6,000 d.w.t. and for other vessels exceeding 5,000 d.w.t. Ship's lines used. Ice-breaking tug "Mercur", call sign SIJL, 3,000 h.p. available in Hudiksvall during the whole year.

BERTHING: Main berth Hudiksvall draft allowed at MW 8.6 m. alongside 165 m., thereafter 5.4 m. alongside 30 m. and thereafter 4.8 m. alongside 160 m. One Ro–Ro ramp draft allowed 8.6 m. at MW.

Pier at Iggesund 7.3 m. draft allowed MW 150 m. length of pier. Ro-Ro berth 17.4 m. draft if more than 12 m. from Ro-Ro berth, if less, draft allowed 6.2 m. Ro-Ro berth II 7.3 m. draft allowed if more than 12 m. from berth, if less, 6.6 m.

STEVEDORES: Ordered 1600 hrs. on day preceding vessel's arrival. For loading starting Monday morning, gangs to be ordered before 1100 hrs. local time Saturday. 3 – 5 gangs available at Hudiksvall and Iggesund; Stocka 3 gangs. Working hours: Monday-Friday, 0700 – 1600 hrs.; Meal hours: 0900 – 0930, 1230 – 1300. 2 hours' overtime at extra cost of 50% Monday, Tuesday, Thursday, Friday (1600 – 1800 hrs.). For completing vessel, further 3 hours Monday, Tuesday, Thursday, Friday (1800 – 2100 hrs.). Extra cost of 100%. For completing vessel 5 hours' overtime can be obtained on Wednesday (1600 – 2100 hrs.), 2 hours at 50% and 3 hours at 100% extra.

On Saturdays no normal work, but stevedores available for maximum 8 hours' work, 100 per cent overtime has to be paid, and minimum 5 hours has to be paid even if vessel working less than 5 hours on Saturdays.

TANKERS: One berth only. Depth alongside 11 m. Draft allowed 10 m. at MW. Pipe diameter for fuel: 10 in., light oils: 8 in. Connecting hoses between pipes and vessel: 8 in. diameter, both types. Shore tanks lie about 100 m. – 200 m. from berth, 5 m. – 8 m. above sea. Surface of jetty about 2 m. above sea level.

DENSITY: Average 1002 – 1001.

FRESH WATER: Fresh water available all berths. Delivery capacity about 15 t.p.h. – 20 t.p.h. During Winter it is difficult to arrange hoses, vessels assist with own hoses.

FUEL: Available all berths. Delivered by tank-lorries from Sundsvall 50 miles North of Hudiksvall. 24 hours' notice required.

FIRE PRECAUTIONS: No special precautions. Within bounded area oil jetty smoking prohibited. Also on new quay outside sawmill.

GANGWAY/DECK WATCHMEN: Available in all ports, not necessary if not required by vessel.

OPENING/CLOSING HATCHES: By crew.

IDENTIFICATION CARDS: Not needed. If crew going to doctor or to hospital preferable he carries passport.

CONSULS:

Country	*Address*	*Tel. Office*	*Tel. Home*
Denmark	Marknadsgatan 1 Hudiksvall	0650/11 712	0650/10 983

Fire Iggesund	Tel: 0650/20 329 or 0650/20 812
Doctor Hudiksvall	Tel: 0650/17 370 or 90 000
Doctor Iggesund	Tel: 0650/70 026 or 90 000
Hospital Hudiksvall	Tel: 0650/92 000
Hospital Iggesund	Tel: 0650/92 000

TELEPHONES: No telephones available for connecting onboard at Iggesund. At Hudiksvall telephones available. Skr 25 per day plus cost of calls.

GENERAL: Hudiksvall port is very near town. Railway station, bus station, etc., very near port. Oil port about 700 m. from town.

The port of Stocka is closed to commercial vessels.

SERVICES: No tank cleaning or discharge of tank washings. Compass adjusting: Tel: 0650/10 339 (Pilot Office). Ordered through Agent.

PORT REGULATIONS: Speed limit: maximum 5 knots within the harbour basin. Plastic pipe is laid out on the bottom around the oil berth, anchoring during berthing is prohibited. Pipe filled with compressed air after vessel's mooring, comes up to the surface forming ring around vessel and oil jetty as protection against oil leakage.

DELAYS: During Winter (December-April) delays on berthing/sailing owing to ice in fairways and alongside quays. Mooring delays will occur owing to ice between vessel and quay.

AUTHORITY: Hudiksvalls Hamnstyrelse, Tullhuset, 82400 Hudiksvall, Sweden. *Tel:* 0650/19166, 17140. *Contact:* Arne Strandell, Harbour Master.

HUSUM: 63.20 N. 19.09 E. (See Plan)

PILOTAGE: Contact local Agent: Grundberg Shipping AB, Tel: 0660-10235. Clearing Tel: 0660-82805, 82806.

MAX. SIZE: Max. draft 10.6 m.

TUGS: Available.

BERTHING: No special requirements other than authority from local Agent.

In the South part of the harbour basin there is a new concrete berth; namely the raw material berth.

(i) The South part of the wharf is 180 m. long with 11.4 m. depth.

Loading: Pulp and paper by mobile cranes. Turpentine and resin-oil via 6 in. – 8 in. pipe-connections. Capacity 200 t.p.h.

Discharging: Raw oil via 12 in. and sodium hydrate via 6 in. – 8 in. pipe-connections. Unloading of limestone, china clay, sodium sulphate, sulphur, aluminium sulphate, softwood and hardwood by mobile cranes.

(ii) The North part of raw material berth is 65 m. long, 10 m. depth. with a solid Ro-Ro berth 16 m. wide. There are connections available for loading/unloading fluid products.

To the North of the raw material berth there is the loading berth, 300 m. long and approximately 10 m. depth for loading pulp and paper using mobile cranes. Connected to the loading berth is a solid Ro-Ro berth with a ramp, length 30 m.

There are warehouses with a total storage capacity of 15,000 sq.m.

STEVEDORES: Stevedores can be ordered from representative of local Agent. Labour must be ordered prior to 1400 hours to start following day or for a second shift. Labour for the same day at 1000 hours must be ordered at 0800 hours, labour for 1200 hours ordered at 0930 hours and labour to start at 1400 hours ordered prior to 1100 hours.

FRESH WATER: Available through hose pipes.

FUEL: All grades and viscosities available through bunker suppliers.

AIRPORT: Approximately 15 minutes by car, served by regular airlines.

TIME: GMT plus 1 hour. Summertime kept April to October.

POLICE/AMBULANCE/FIRE: All services available.

TELEPHONES: Available on wharf.

SERVICES: Post, telefax and telex facilities. Various other services available or can be provided.

GENERAL:
Tides: Water level in metres above (+) and below (–) average water level.

High water level	+1.0 m.
Normal high water level	+0.7 m.
Normal low water level	–0.6 m.
Low water level	–1.1 m.

Local Travel: Buses from Husum to Ornskoldsvik (25 km.). Railway station at Ornskoldsvik.

AUTHORITY: Mo och Domsjo AB, S890 35, Husum, Sweden. *Tel:* 0663-18000, 18384. *Telex:* 6058 Massa/Pulp or 6070 Papper/Paper. *FAX* 0663-18310. *Cables:* Modo AB, Husum Mill. *Contact:* Frank Pettersson, Harbour Master.

KALMAR: 56.40 N. 16.20 E. (See Plan)

DOCUMENTS: See "Stockholm".
PILOTAGE: Compulsory for vessels carrying dangerous cargo and vessels exceeding 800 g.r.t. Pilot may be ordered on VHF, Channel 16 or by telephoning 0480/10719. Approaching from North, Pilot boards at Skaggenas or Krongrundet, from the South at Tradgardsgrundet. Round-the-clock service provided. (Also see "Stockholm").
ANCHORAGES: Good anchorage available outside port.
MAX. SIZE: Largest vessel 25,000 tons deadweight, draft 24 ft. Channel and harbour depth 26 ft. Ferry berth 22 ft.
TUGS: Available, order by tel. 15775.
RADIO: Stockholm Radio.
VHF: Harbour Master on VHF Channel 16.
BERTHING:

Quay	*Berth* No.	*Length* (m.)	*Depth* (m.)
Elevator Kajen	2 – 3	200	7.7
Finngrundet-Barlastholmen	22 – 31	990	5 – 7.7
Tjarhov	38 – 47	910	6 – 7.7

Permanent Ro-Ro berth available at Berth No. 28/29.
CARGO HANDLING FACILITIES: 3 portable electric cranes of 5 tons each, 4 mobile cranes of 23 – 36 tons and 1 mobile crane of 18 tons.
STEVEDORES: Available weekdays 0700 – 1630 hrs. Overtime is worked Saturdays and eves of public holidays.
TANKERS: Oil Dock (Berth No. 48) has depth of 8 m. alongside and has dealt with partly loaded ships of 25,000 tons. Discharge capacity about 28,000 cu.ft./hr.
MEDICAL: Hospital available.
FRESH WATER: Available from wharves.
FUEL: Bunkers available by barge or at Oil Dock. Tel: (480) 11730.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Crew or stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes plus 1 bottle spirits.
CONSULS:

Danish Vice-Consulate	tel. 14719
Finnish Consulate	tel. 15580
German (F.R.) Consulate	tel. 26100
Netherlands Vice-Consulate	tel. 14444
Norwegian Vice-Consulate	tel. 22050

REPAIRS: Available. Divers for underwater repairs. Major repairs undertaken.
DRY DOCKS: 2 floating docks. 1 for vessels up to 3,000 d.w.t. and 1 for vessels up to 10,000 d.w.t., also slip for vessels up to 850 tons. (AB Kalmar Varv Tel. 0480/15390, Telex 43100).
AIRPORT: 10 km. from the port.
DEVELOPMENTS: Store houses for general cargo and sawn timber of about 7,000 sq.m. have been erected.
AUTHORITY: Kalmar Hamn, Box 810, S–39128 Kalmar, Sweden. *Tel:* 0480-56200. *Contact:* Sture Nachtweij, Port Captain/Director.

KARLSBORGSVERKEN (Kalix District): 65.48 N. 23.17 E.

PILOTAGE: Pilot station "Erikren", Karlsborgsverken. Pilots embark or disembark at Maloren 18 nautical miles South of Karlsborgsverken.
MAX. SIZE: Max. draft entrance to Karlsborgsverken 6 m., to Axelsvik 8.8 m. Size no limit.
TUGS: Available.
BERTHING:

	Max. draft. (m.)	*Length of quay* (m.)
Cellulose Quay	6.0	145
Timber Quay	6.0	250
Axelsvik Oil Harbour	8.8	60
Tore (17 nautical miles) N.W. Karlsborgsverken	6.0	170

CRANES: No land cranes. Mobile cranes to hire for loading/discharging.
STEVEDORES: Available, No particular ETA advice required except as normally sent by Master to the Agent.
MEDICAL: Hospital and dental services available.
TANKERS: Axelsvik (Oil Harbour) 4 miles East. See "Berthing".
FRESH WATER: Available at all berths except at Axelsvik Oil Harbour.
OPENING/CLOSING HATCHES: Usually carried out by the vessel's crew.
CONSULS: None.
REPAIRS: Workshop available for repairs.
AIRPORT: Lulea 85 km. from Karlsborgsverken.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Telephone 90000 in emergency and ask for service required.
TELEPHONES: Available at quays.
SHORE LEAVE: Allowed.
AGENT: Grundberg Shipping AB, P.O.Box 716, S–941 28 Pitea, Sweden. Tel: 0911–46070. Telex: 68307 Shipexp S. FAX: 0911-46175. Cables: Grundbergs Pitea.

At Karlsborgsvrken: Grundberg Shipping AB, G: a Faktorskontoret, S–950 53 Karlsborgsverken. Tel: 0923-20156. All communications to be via Pitea.

KARLSHAMN: 56.10 N. 14.52 E. (See Plan)

DOCUMENTS:
3 Crew Lists (IMO Forms).
3 Passenger Lists.
2 Tobacco Lists.
2 Stores Lists.
1 Manifest.
1 Bill of Lading.
PILOTAGE: Vessels approaching port call Karlshamn Pilot Station 5 hours in advance on VHF Channel 16. Pilot boat orange coloured. Lights and sound signals as international regulations. Pilot boat always located 2 nautical miles South from Ortholmen Pilot Station, this point marked on charts. Location of anchorage in same area where Pilot taken. (Also see "Stockholm").
ANCHORAGES: Depths of water in anchorage area approximately 20 m. – 25 m.
RESTRICTIONS: Tankers not allowed to enter during darkness. Max. draft for tankers 32 ft. 6 in.
MAX. SIZE: Max. length 180 m., max. draft 32 ft. 6 in.

Oil Pier at Kolo Harbour, outside main harbour, length 270 m., max. draft 41 ft. 06 in. No tide.
HEALTH: If infectious disease on board Master must immediately send information to Agent.
RADIO: Karlskrona Radio.
RADAR/VHF: The pilot station is fitted with radar and VHF.
TUGS: 2 tugs available, 3,000 h.p. and 2,000 h.p. Join vessels about 1 nautical mile outside harbour boundary. Ship's lines always used.

BERTHING:
Inner Harbour: West Harbour Area.

Berth	*Length* (m.)	*Depth* (m.)
Ocean Quay	150	10.0
Soja Quay	250	8.5
West Quay	400	7.5 – 6.0

These quays are served by 4 rail-bound bulk goods cranes of 5 – 10 tons and have 2 grain elevators.

Via the West Harbour area oil seed plants, copra and vegetable oils for the Karlshamn Oil Factory (AKO) are shipped as well as other bulk goods.

East Harbour Area.

Berth	*Length* (m.)	*Depth* (m.)
East Pier	160	8.0
East Quay	500	6.0

The East Pier is equipped with 2×6.7 tons rail-bound unit goods cranes and served by 2 railway tracks. Adjacent to the East Pier are 2 cold stores with a total floor area of 7,000 sq.m.

Loading and discharging is carried out with mobile cranes at the East Quay. The Harbour has 5 mobile cranes with lifting capacities ranging from 4 tons to 23 tons.

Goods shipped via the East Harbour area include timber products, timber, bulk goods and general cargo.

Sterno Harbour:
A special harbour for stone products, wood and timber. Depth is 6 m.

Stone blocks are loaded at a special quay and crushed stone products, chiefly diabase which is used for producing mineral wool, are discharged from quay by a newly-erected stone-crushing plant. The crushing plant is owned by Armerad Betong-Vagforbattringar.

Stilleryd Harbour:
Karlshamn's new outer harbour; it was inaugurated in 1975 and consists of a 400 m. long quay with water depths of 8 m. and 11 m. on the West side, and one 150 m. long quay on the East side with 8 m. water depth. 2×35 ton and 1×20 ton luffing cranes are used for loading and discharging vessels and they are backed up by mobile cranes. Double railway tracks serve the quay.

The harbour also has Ro-Ro facilities with a water depth of 8 m. Stilleryd Harbour accommodates vessels of up to 35,000 d.w.t. The harbour area features 4 warehouses with a total storage area of 26,000 sq.m. Adjacent to the quay area is a stockyard of approximately 200,000 sq.m., of which 40,000 sq.m. is asphalted.

Sodra Skogsagarna ship products like paper pulp, paper, wood chips, pulpwood, etc. via the Stilleryd Harbour. Fernstroms Granitindustrier ship stone blocks while Vikingtra AB ship wood and timber via this harbour.

MEDICAL: Hospital facilities available.
TANKERS: Different lines used. From 12 in. to 6 in. depending on cargo to load/discharge. 3 different loading/discharging berths available. 1 at Inner Harbour, 1 at Kolo Harbour and 1 at Oxhaga.

Kolo Oil Harbour:
Position Lat. 56° 09′ N., Long. 14° 43′ E. Pilot boards by Laknallarna, position Lat. 56° 07′ 8″ N., Long. 14° 53′ E. Berthing during daylight only. Max. ~~size~~ 270 m., max. draft 41 ft. 06 in. 75,000 d.w.t. or 100,000 d.w.t. with part load. Depth at berth and approaches 46 ft. 2 tugs are generally used.

LOA

The pipe-line is 20 in., length 400 m. and hose connection 12 in. Max. rate, 1,500 cu.m./hour (HFO). There are no ballast facilities and no clean ballast can be discharged into harbour. Vessels are allowed to clean tanks and gas free in the roads only.

Fresh water available at 20 t.p.h. by pipe-line.

Old Oil Harbour:
Situated at Sutudden where a large number of major oil corporations and manufacturing companies have their depots. Heavy and light fuel oils, diesel oil, petrol and paraffin are imported and stored here. Storage capacity amounts to approximately 180,000 cu.m. of which half consists of underground storage facilities.

The oil quay has a depth of 36 ft. 01 in. and can accommodate fully-laden tankers of up to 30,000 d.w.t. with draft 32 ft. 06 in.

Oxhaga Oil Harbour: Karlshamn's new oil harbour, situated at Munkahusviken where the water depth at the quay is 13 m. Underground storage facilities with a total capacity of 400,000 cu.m. – 200,000 cu.m. for heavy oil and 200,000 cu.m. for light oil – have been constructed. Storage has been leased to manufacturing companies, municipalities and oil companies.

Oxhaga Nabb's oil harbour is used by fully laden tankers of 50 – 55,000 d.w.t. Depth of water 42 ft. 06 in., max. draft 39 ft.

An above ground storage area for petroleum, oil and chemicals is planned for the oil harbour areas. Surveys have shown that it is possible to build additional underground storage facilities for petroleum products in the Oxhaga area.

DENSITY: 1006.
FRESH WATER: Fresh water available and delivered by hoses.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: Watchmen only necessary when tankers discharge petroleum products.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: Certificates of Tonnage, Derat Certificate.
CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per man/week. Wine and/or Spirits, 1 bottle per man/week.
IDENTIFICATION CARDS: Not needed.
CONSULS:

Denmark, Tel: 16000.	Netherlands, Tel: 19760
Finland, Tel: (0454) 15420.	Norway, Tel: (0454) 15385

REPAIRS: Small deck and engine repairs can be effected.
DRY DOCKS: None.
REPATRIATION: Facilities for repatriation of crew possible.
AIRPORT: Distance from airport 30 km. 10 flights per day.
HOLIDAYS: January 1st and 6th; Easter; May 1st, 15th, 26th; June 21st; December 25th, 26th. Work can be arranged during holidays.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
TELEPHONES: Telephones on board arranged at cost of 165 Sw. Kr.
AUTHORITY: Karlshamns Hamnar, P.O.Box 8, 37421 Karlshamn, Sweden. *Tel:* 0454-81500/81502. *Telex:* 4501 Hamnen S. *Contact:* Nils-Gunnar Sjoberg, Harbour Master.

KARLSKRONA: 56.10 N. 15.36 E.

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot is taken at Aspo. Tel. 0455/39016. (Also see "Stockholm"). Ordering Pilot between 2100 – 0500 hrs. contact Karlshamn Pilot Station tel. 0454/14102. Stations operating on VHF Channel 16. Pilot should be ordered 5 hours in advance. Pilot boats usually orange.
ANCHORAGES: On roadstead. Refer to Nautical Chart No. 821 (Swedish).
MAX. SIZE: Max. draft 9.0 m.
HEALTH: See "Stockholm".
RADIO: Stockholm Radio. Karlskrona Radio.
VHF: Karlskrona Port Office equipped with VHF Channels 16, 14.
RADAR: Radar service available when entering port. Tel. 0455/25075 or 0455/50780.
TUGS: Tug assistance available.
BERTHING: Total quay length 4,700 ft., oil terminal 400 ft., Depth alongside quay 13 ft. – 33 ft., oil terminal 29.5 ft. Ro-Ro quay 23 ft.
STEVEDORES: Available. Ordered through Agents or directly by tel. 0455/10518.
MEDICAL: Advance notice to Agents desirable.
TANKERS: No specific requirements applicable to oil carriers. Two tanker berths available. Draft 7.0 m. and 8.5 m.
FRESH WATER: Available, customary delivery from quay-berth.
FUEL: All grades available. No advance notice required.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CONSULS:
Danish Vice-Consul, tel. 15006.
Netherlands Vice-Consul, tel. 10926 and 12495.
REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: Largest dry dock: length 185 m., breadth 20.76 m., depth 8.80 m. Six smaller docks.
REPATRIATION: Not allowed.
AIRPORT: 30 km. from port.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Tel. 90000.
TELEPHONES: None available.
SERVICES: Compass adjusting.
AUTHORITY: Karlskrona Stadsbyggnadskontor, Amiralitesgatan 25, 37101 Karlskrona. *Tel:* 0455-83000.

Ao2

KARLSTAD: 59.23 N. 13.31 E. (See Plan)

PORT LIMITS: Vessel considered to be an "arrived ship" when berthed, or anchored South of the Gerholmsrevet Buoy in case of congestion.
DOCUMENTS: As usually required in Swedish ports.
PILOTAGE: Not compulsory. However Pilots available.
ANCHORAGES: There is a safe anchorage South of the Gerholmsrevet Buoy, sand and clay.
RESTRICTIONS: There are no restrictions imposed upon entry.
MAX. SIZE: Vessel's length, breadth and draft maximised by the locks of the Trollhatte Canal (87 m. × 13 m. × 5.3 m.).
HEALTH: Documents' etc. as usually required in Swedish ports.
RADIO: Gothenburg Radio.
VHF: ETA to be given to Karlstad Port Radio (0800 – 1600 hrs. local time).
RADAR: No port radar available.
TUGS: Two icebreaking tugs available. Ship's lines usually used.
BERTHING:

Vanerterminalen	Length	175 m.
(The Venerterminal)	Ship draft	5.3 m.
Mobile cranes		
Styckegodskajen	Length	270 m.
(The general cargo quay)	Ship draft	5.3 m.
Three general cargo cranes	6 tons	
Trakajen	Length	120 m.
(The wood quay)	Ship draft	5.3 m.
Mobile cranes		
Kolkajen	Length	350 m.
(The coal quay)	Ship draft	5.3 m.
One bulk cargo crane	5 tons	
One heavy-lift crane	28 tons	
Wermlands Kajen	Length	200 m.
(Wermlands Quay)	Ship draft	5.3 m.
One container crane		
Lambergshamnen	Length	230 m.
(The Lamberg Harbour)	Ship draft	5.0 m.
Mobile cranes		
One heavy-lift crane	160 tons	
Inrehamnen	Not used by merchant vessels.	
(Inner harbour)		
Oljehamnen	Each pier	70 m.
(Oil harbour)	Mooring space both sides	
Three jetties for handling oil, etc.	Ship draft	5.3 m.

STEVEDORES: Modern and extensive machinery equipment. Loading discharging can be arranged in two or three shifts.
MEDICAL: Hospital facilities available.
DENSITY: Fresh water in the port.
FRESH WATER: Delivered by hose from piping on the quay.
FUEL: All kinds of bunker oil available.
CONSULS: Denmark, Germany F.R. and Norway.
REPAIRS: All kinds of deck and engine repairs possible. Slipway 2,300 tons
SURVEYORS: All major Classification Societies represented in nearby port of Gothenburg. Government ship surveyor situated at Karlstad.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Usually carried out by crew
CUSTOMS ALLOWANCES: As usually allowed in Swedish ports.
CARGO GEAR: Shore gear usually used.
REPATRIATION: Crew changes and repatriation can be effected.
AIRPORT: Regular domestic airlines. Several flights per day to and from Stockholm and Gothenburg.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Telephone number 90 000.
SERVICES: Tank-cleaning equipment and facilities for discharge of tank washings available.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not necessary for shore leave.
REGULATIONS: Ship's propulsion machinery may not be used when ship is berthed.
DELAYS: Normally not to be expected.
AUTHORITY: Karlstads Hamn, Box 5030, S-65005 Karlstad, Sweden. *Tel:* 054-195000. *Contact:* Captain P. Thomas Ahsberger, Port Director. Ake Sallnas, Harbour Master.

KLINTEHAMN: 57.23 N. 18.11 E. (See Plan)

The Harbour Quay is 340 m. long and depth 5 m. Depth on entrance 5.5 m. The most unfavourable winds are South — West. The harbour is however to be considered as good and safe.

Most products are loaded/discharged with mobile cranes.

Documents needed are Nationality Certificate, Bill of Measurement, Passenger List, Crew List, Derat Certificate, Ship's and Crew Declaration.

Pilot Station at Visby. Pilots have VHF on Channel 16.

Bunkers and water can be obtained.

AUTHORITY: Klintehamn Hamn, Skeppsbron 18, S-62157 Visby, Sweden. *Tel:* 0498-69475. *Contact:* Bengt Widegren, Harbour Master. Island of Gotland.

KOPING: 59.31 N. 16.00 E. (See Plan)

DOCUMENTS: See "Stockholm".

PILOTAGE: Via Sodertalje: Pilots obtainable for inward bound vessels from Landsort to Sodertalje and from Sodertalje to Koping; for outward bound vessels from Koping and Sodertalje. Via Stockholm: Pilots obtainable for inward bound vessels from Simpnas, Furusund, Sandhamn, Dalaro and Landsort to Stockholm and from Stockholm to Koping; for outward bound vessels from Koping and Stockholm. (Also see "Stockholm"). Harbour pilotage obtainable but not compulsory in harbour area. Assistance of a boatman is compulsory for arriving vessels.

Distances: Landsort – Sodertalje (nautical miles), 34; Sodertalje – Koping, (nautical miles), 69; Landsort – Dalaro, (nautical miles), 32; Dalaro – Stockholm, (nautical miles), 46; Sandhamn – Stockholm, (nautical miles), 36; Stockholm – Koping, (nautical miles), 78; Vasteras – Koping, (nautical miles), 27; Harbour Pilotage, (nautical miles), 2.

ANCHORAGES: At the "Broken" light buoy, clay bottom.

RESTRICTIONS: Ice is prevalent in Lake Malaren and the inlet from the Baltic from January to March, but the entrance channel is kept open during Winter season.

MAX. SIZE: The pilot station on Lake Malaren, Tel: 0755/30467, will give information on the max. admissible sizes of vessels. In general the following applies:

Max. Admissible	*Via Sodertalje*	*Via Stockholm*
Length	124 m.	110 m.
Breadth	17 m.–18 m.	15 m.
Draft	6.5 m–6.8 m.	5.65 m.
Height of masts above water level	35 m.	26 m.

The figures stated for the draft are subject to variation according to the water level. The entrance fairway to the port has been dredged to a depth 7.6 m., the width of the bottom being 60 m.

VHF: Work frequency Channel 14. Call Koping Port Radio, Channel 16.

TUGS: Available day/night.

BERTHING: *Deep-Water Harbour:* (built 1932, large extension 1936-64) has 152 m. of quayage with a depth of 6.2 m. and 377 m. with a depth of 7.3 m. alongside, and is equipped with 4×7 ton level-luffing jib cranes, 2 of them having a maximum lifting capacity of 10 tons each at 18 m. radius; 1×33 ton and 1×36 ton "multi-purpose" cranes.

There is also an 80 m. quay, depth 6.2 m. – without cranes – where loading/unloading by vessel's own winches can be undertaken.

Mobile cranes also available.

The quays are rail-connected and equipped with connections for supplying electricity, telephones and fresh water.

There are about 10,000 sq.m. of concrete stockyards within reach of the cranes, and outside this area and at a short distance from the cranes, a space of about 40,000 sq.m. is available for storage of goods. There are also about 22,000 sq.m. of sheds of different types in connection to the quays.

The cranes are well equipped with lifting devices such as grabs of different types etc. Conveyor belts of varying length, fork trucks, trimming and other cargo handling equipment are also available.

Oil Harbour: A modern oil harbour is situated at the mouth of River Kopingsan (North side), the jetty having one outside and one inside berth with depth of 7.6 m. and 5.7 m. respectively.

On the North side is an 80 m. concrete quay for grain loading vessels. Depth alongside 7.3 m.

Private Wharves: There is (on the North side) a private 120 m. concrete quay, depth 6.2 m., belonging to Messrs. Tibnor Ltd., (Iron and Steel Merchants). One 10 ton travelling portal crane available.

A private harbour, belonging to Cementa Co., is situated in the immediate vicinity of the "Deep-Water Harbour". There is a 110 m. concrete quay, with 7.3 m. alongside, and 1×6 ton travelling portal crane and 1 belt conveyor available. There is also a 50 m. pier, same depth, for self-unloading (cement) vessels.

STEVEDORES: Working hours: 0700 – 0900 hrs., 0930 – 1300 hrs. and 1330 – 1600 hrs. (Monday to Friday). Special conditions on Christmas Eve, New Year's Eve, Easter Eve, Whitsun Eve and Midsummer Eve.

Overtime work: can usually be executed on Mondays, Tuesdays, Wednesdays, Thursdays and Fridays and for 6 hours on Saturday.

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Minor mechanical, electrical and other repairs can be carried out by different local firms. Diver available.

AUTHORITY: Malarterminalen Koping AB, Box 142, S-731 23 Koping, Sweden. *Tel:* 46-221-18110. *Telex:* 40738 Mterm S. *Contact:* Arne Risfors, Harbour Master.

KRISTINEHAMN: 59.19 N. 14.07 E. (See Plan)

PORT LIMITS: A line drawn Westward from Strandudden to Valon (see Swedish Chart No. 132) defines the seaward limits of the port.

PILOTAGE: Pilotage compulsory for vessels exceeding 1,200 d.w.t. regardless of cargo being carried and for all ships carrying dangerous cargo.

Certificate may be granted to sail without Pilot after service-examination.

Pilots available at Vanersborg, the entrance to the Lake of Vanern after leaving Trollhatte Canal, and at Kristinehamn.

No local pilotage.

DOCUMENTS:

Certificate of Nationality.
Identification and Measurement Papers.
Oil Log.
Certificate regarding insurance for oil damage.
Derat Certificate.
Last Port Clearance.
1 set of General Declaration (Form 611.10).
2 copies Ship's Stores Declaration (Form 611.13).
2 copies Crew's Effects Declaration (Form 616.8).
2 copies Cargo Declaration (Form 611.7).
1 set Crew List (Form 612.13).
1 copy Declaration on account of Import Prohibition as to Livestock (Form 730.5).
1 copy Maritime Declaration of Health (Form 612.7).

ANCHORAGES: In the Varnumsviken, N.W. of Kristinehamn. The roads have a depth of 5 m. – 9 m., bottom clay.

RESTRICTIONS: In Winter, the fairways to the harbour will be kept open by the local icebreaker from 0600 hrs. until 1600 hrs. Any icebreaking services beyond these hours have to be ordered and will be charged accordingly.

MAX. SIZE: All vessels capable of passing through the Trollhatte Canal can enter Kristinehamn. Max. dimensions: length 87 m., beam 13 m., draft 5.3 m.

HEALTH: First entry will be cleared alongside, otherwise automatic.

VHF: The port can be reached by VHF Channels 9, 11, 12, 14 and 16. In Winter, the icebreaking tug may communicate on all channels.

Instructions/Regulations regarding traffic communications will be available when passing the Trollhatte Canal.

RADAR: No port radar service.

TUGS: The tug "Dan", 600 b.h.p. and 5 tonnes bollard pull, will assist on request.

BERTHING: The outer harbour (Berth Nos. 20 – 25), has a quay of 360 m. length; in the river there is a quay (Berth Nos. 16 – 19) approx. 170 m. length. Depth 5.7 m at chart datum.

On the S.W. side of the river there is a berth, 88 m. length, for loading grain. Loading equipment on berth. Depth 5.7 m.

On the West side of Varnumsviken, Kroksvik, there is a 80 m. concrete pier for discharging refined oil products. Depth 5.7 m.

Also see "Tankers".

CRANES: 3 × 7 tonne slewing cranes with luffing jibs and 1 × 24 tonne with luffing jib, on rails, in the outer harbour (Berth Nos. 20 – 25). Three railway tracks underneath the portals along the quay. One fixed crane, 40 tonnes, at Berth No. 16.

BULK CARGO FACILITIES: On the S.W. side of the river there is a loading elevator for agricultural produce. Loading capacity 200 tonnes per hour.

On Berth Nos. 20 – 25, bulk commodities like coal, ore, grain and scrap iron can be handled by cranes Nos. 8 and 9 equipped with grabs.

SPECIALISED CARGO HANDLING FACILITIES: No special equipment for handling containers. No Roll-on/Roll-off berth.

BRIDGES: None.

STEVEDORES: Working hours 0700 – 1600 hrs., Monday to Friday.

General cargo: 40 – 60 tonnes per gang per hour.

Forest industries produce: Approx. 100 tonnes per gang per hour.

MEDICAL: Full hospital facilities available without prior notice.

TANKERS: There is a concrete pier, length 80 m., on the West side of Varnumsviken, with a berth on each side. Max. draft 5.3 m. The pier is equipped with a crane for lifting lines. Diameters of discharging lines are 6 in. and 8 in. Average discharging rate 500 – 700 cu.m.p.h.

DENSITY: 1000 (Fresh water).

FRESH WATER: Available at Berth Nos. 20 – 25, rate 5 – 10 tonnes per hour.

FUEL: Available at all berths, delivered by truck.

FIRE PRECAUTIONS: As per international standards.

CONSULS: France, Germany F. R. and Norway are represented at Karlstad, 45 km. distant.

REPAIRS: All types of deck and engine repairs can be carried out.

DRY DOCKS: None.

SURVEYORS: Lloyd's and Norske Veritas.

GANGWAY/DECK WATCHMEN: Not required.

CARGO GEAR: Shore cranes normally used.

REPATRIATION: Can be arranged.

AIRPORT: At Karlstad, 45 km. distant.

TIME: GMT plus 1 hour. Summertime GMT plus 2 hours.

CUSTOMS ALLOWANCES: 1 litre spirits, 1 litre wine, 5 litres beer and 200 cigarettes per person. Additional allowances for the Master.

HOLIDAYS: January 1st and 6th, May 1st and 20th, December 24th, 25th, 26th and 31st. Cargo work can be arranged on these days.

POLICE/AMBULANCE/FIRE: Dial 90000.

TELEPHONES: Can be arranged on request.

SERVICES: No facilities for disposal of tank cleanings.

SHORE LEAVE: Permitted, no restrictions.

DELAYS: Normally no delays.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

BANKS: Handelsbanken and Wermlandsbanken represent a number of foreign banks.

EMERGENCY CO-ORDINATION CENTRE: Dial 90000 and the Centre will notify the necessary services.

STORING: See "Prelims".

1. Vessels can be stored by trucks only.
3. Trucks can proceed alongside the berth.
4. Fork lift trucks can be used when handling stores.
5. Ship's chandler will take care of Customs Regulations.
6. Local riggers can be employed to assist with storing.

DEVELOPMENTS: None.

AUTHORITY: Kristinehamns Hamn, Bajortgatan 9, S–68100 Kristinehamn, Sweden. *Tel:* 0550-15340. *Contact:* Jim N. Hjelmtvedt, Harbour Master/General Manager.

LANDSKRONA: 55.52 N. 12.48 E. (See Plan)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot available on request from Helsingborg Pilot Station in daytime. 5 hours' notice required. Pilot stations and boats equipped with VHF. (Also see "Stockholm").
ANCHORAGES: Vessels of up to 10 m. draft can safely anchor North of Staffans Bank.
MAX. SIZE: Depth in channel and harbour 11 m. (36 ft.) Max. draft 10 m. Max. LOA 190.0 m.
HEALTH: See "Stockholm".
RADIO: Gothenburg Radio, call sign SAG. Harbour office, pilot station, pilot boats and tug boats equipped with VHF.
TUGS: Tugs usually meet off Pilhaken Lightbuoy. Ship's lines.
BERTHING: Terminal for handling bulk cargoes. Rock phosphate can be discharged with a capacity of 8,000 tons per 24 hours.
MEDICAL: Medical attention and hospital facilities available.
TANKERS: No oil berth in Landskrona.
DENSITY: Density of water changes with currents.
FRESH WATER: Available from quay.
FUEL: Small quantities of fuel oil can be obtained from quay.
GANGWAY/DECK WATCHMEN: Not available.
OPENING/CLOSING HATCHES: Usually carried out by ship's crew.
CERTIFICATES: See "Stockholm".
CUSTOMS ALLOWANCES: See "Stockholm".
IDENTIFICATION CARDS: Not needed.
CONSULS:

Danish Vice-Consulate	Tel: 0418/16150
Finnish Vice-Consulate	Tel: 0418/78000
Netherlands Vice-Consulate	Tel: 0418/35020

REPAIRS: All types of deck and engine repairs.
DRY DOCKS: Dry dock for ships up to about 25,000 d.w.t. (189 m. length). Floating dock for up to about 5,000 d.w.t.
AIRPORT: Sturup, 60 km.
TIME: GMT plus 1 hour in Winter. Summertime GMT plus 2 hours.
HOLIDAYS: See "Stockholm".
POLICE/AMBULANCE/FIRE: Tel: 90000.
TELEPHONES: Not available.
STORING: See "Prelims".

1. Yes.
3. Yes.
4. Yes.
6. Yes.

REGULATIONS: Anchoring prohibited between and up to 50 m. from harbour lights.
AUTHORITY: Landskrona Hamn, Box 275, 261 23 Landskrona, Sweden. *Tel:* 0418-17911, 0418-10311. *Contact:* Arne Wennberg, Port Director.

LIDKOPING: 58.30 N. 13.10 E.

DOCUMENTS:
3 Crew Lists (IMO Fal Form 5).
2 Crew Effects List (IMO Fal Form 4).
2 Ship's Store Declarations (IMO Fal Form 3).
PILOTAGE: Compulsory for vessels over 1,200 d.w.t.
MAX. SIZE: Length 87 m., beam 13 m., draft 5.3 m. and air draft 27 m. are maximum dimensions for passing through the Trollhatte Canal.
VHF: Lidkoping Harbour operates on Channel 16.
TUGS: One tug available, 920 h.p.
CRANES: 3 shore cranes of 5 tonnes each.
STEVEDORES: Working hours 0700 – 1630 hrs., Monday to Friday.
MEDICAL: Hospital facilities available.
FRESH WATER: Available.
FUEL: Gas oil available.
REPAIRS: Workshops can undertake repairs.
HATCHES: Opening/closing carried out by crew.
REPATRIATION: Facilities exist for carrying out crew changes.
AIRPORT: Nearest International Airport is Gothenburg, 130 km. distant. Local domestic airport has 6 flights daily to and from Stockholm.
TIME: GMT plus 1 hour, Summertime GMT plus 2 hours.
POLICE/AMBULANCE/FIRE: Dial 90000
AUTHORITY: Lidkopings Hamnterminal AB, P.O.Box 900, S-531 19, Lidkoping, Sweden. *Tel:* (0) 510-222 50. *Telex:* 67336. *FAX:* (0) 510-62189. *Contact:* Jan Kallsson, Harbour Master.

AGENT: Lindahl & Collin AB, P.O.Box 7091, S-402 32, Gothenburg Tel: 427180. Telex: 2329 Cargo S. Cables: "Lloydsagent".

LULEA: 65.35 N. 22.09 E. (See Plan)

DOCUMENTS: See "Stockholm".
PILOTAGE: Telegraphic address, "Pilotstation Lulea". Tel: 170 97 or 120 63. Advance notice 5 hours. VHF Channel 16. Pilot boat, orange with international signals. Pilot boards about 2 nautical miles West of Rodkallen for entering Germandoleden and 1 nautical mile N.E. of Farstugrundens Lighthouse for entering Sandoleden. Location of anchorage when awaiting Pilot: West of Rodkallen and South of Farstugrunden Lighthouse.
APPROACHES: *Fairways:* Two fairways lead into Lulea. The South Fairway, Germandoleden, is about 17 nautical miles long and the North Fairway, Sandoleden, is about 27 nautical miles long.

Special rules and traffic regulations apply to these fairways.

Ice Conditions: The port area is generally ice-infested during the period December-April. During this period, ships at sea are assisted by the State-owned icebreaker and within the harbour area by the Lulea Bogserbats AB port icebreaker. Year-round navigation has been possible since Spring 1970.
ANCHORAGES: Germandofjarden, 1.5 nautical miles S.E. of Larsgrundet Lighthouse and Inner Roads.
MAX. SIZE: Max. draft at MW 11.4 m. in Sandoleden and 7.5 m. in Germandoleden.
HEALTH: No special regulations.
RADIO: Harnosand Radio, call signal SAH.
VHF: Port Authority on Channels 16, 14, 12, 11 and 10.

Traffic Control on Channels 16, 14, 13, 12, 11 and 10 throughout 24 hours. Tel: 932 93 or 122 91.

Tugs on Channel 16.

TUGS: Meet ships at the Inner Road for the ore dock, and in Sandoleden 1 nautical mile South of the coal quay and the oil terminal. Ship's lines to be used.

Two tugs of 4,200 h.p. each are available for towing and ice breaking.

Towing: Lulea Bogserbats AB is responsible for towing and ice breaking in the Port of Lulea. Special tug regulations apply at Uddebo Oil Port, Victoria Harbour and the Ore Quay. Tugboat assistance can be ordered through Lulea Traffic, Tel: 932 92 or 122 91, or through VHF call Channel 16.

Boatmen: The port boatmen are on duty if needed at all quays. They can be ordered through Lulea Traffic – Tel: 122 91 – or VHF call Channel 16. At the Ore Quay and Victoria Harbour, however, the respective companies provide their own boatmen.

BERTHING: *Deep Quay:* Length 345 m., depth 6.5 m. – 9 m. General cargo and wood. One 7.5 ton crane. Railway.
Cement Quay: Length 60 m., depth 9 m. Cement.
LKAB Ore Quay: Length 415 m., depth 13.2 m. Iron ore. Two shiploaders of 4,000 t.p.h. each.
SSAB Quay: Length 498 m., depth 8.0 m.
Coal Quay: Length 700 m., depth 9.0 – 12.2 m. Coal, coke, iron, steel, limestone. Three 18 ton grab cranes, 35 tons with hook and 1×25 ton gantry crane (rate 800 t.p.h.).
STEVEDORES: Bottenvikens Stuveri AB.
TANKERS: Diameter of lines from 150 mm. up to 350 mm. 2 oil jetties depth 7.8 m. and 12.2 m. Length 20 m. and 60 m. respectively. Facilities for receiving dirty ballast. Capacity 300 cu.m./hr.
New Oil Berth: Max. LOA 250 m., max. beam 32.3 m., max. draft 11.3 m., max. d.w.t. 45,000. Distance bow to manifold 120 m. Vessels berth starboard side to.
DENSITY: Fresh water, 1000.
FRESH WATER: Fresh water available at all berths.
FUEL: All grades of oil available.
GANGWAY/DECK WATCHMEN: Safety watchmen are to be on board all tankers when loading or discharging.
OPENING/CLOSING HATCHES: Stevedores.
SHIP'S CERTIFICATES: See "Stockholm".
CUSTOMS ALLOWANCES: 200 cigarettes or 250 grams of tobacco for each Crew member every 10 days. (Wine/Spirits) 1 litre for each Crew member over 20 years old, every 10 days.
IDENTIFICATION CARDS: Not necessary.
CONSULS: Telephone Numbers:

Danish 15602	French 16329	Norwegian 20600
Finnish 10445	Germany (F.R.) 53852	Netherlands 12003

REPAIRS: Only small engine repairs.
SURVEYORS: Ship and Cargo Control, Authorised Inspectors, Sodra hamnplan. Tel: 110 50.
AIRPORT: 10 km. from port. Served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Stockholm".
POLICE/FIRE/AMBULANCE: Tel: 90 000.
TELEPHONES: Connections available at oil terminal, coal terminal, ore terminal and deep quay.
GENERAL: All ships mooring at oil terminal over 3,000 d.w.t., and ore dock have to use tugs.
Lulea Soldiers' and Sailors' Institute: Seamen and national servicemen who come to Lulea have their own premises at Stationsgatan 72, where various facilities are available, including a canteen with reasonably priced food, billiard table, TV, telephone and a music room. These premises are open Monday-Friday 1700 – 2200 hrs. and Sunday 1800 – 2230 hrs.

Seamen also have access to the services of a Seafarers' Assistant. He can, for example, take seamen to various leisure facilities, arrange sightseeing trips and exchange films and books on ships.

Lulea Soldiers' and Sailors' Institute – Tel: 676 20 or 288 75.
The Seafarers' Assistant – Tel: 259 96.

The Institute is run by the Merchant Navy Culture and Leisure Board which also employs the Seafarers' Assistant.

AUTHORITY: Lulea Hamn, Varvsgatan 41, S-951 34 Lulea, Sweden. *Tel:* 0920-930 00. *After Hours Tel:* 932 93 or 122 91. *Telex:* Lulots 80241. *FAX:* (0920) 24372. *Contact:* Bo Westman, Port Director.

LYSEKIL: 58.17 N. 11.26 E. (See Plan)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot boards 2 miles West of Gaven Lighthouse. 5 hours advance notice required. Pilot ordered by VHF Channel 16 or telephone No. 60800.
ANCHORAGES: Safe anchorages both for small and large vessels just outside harbour in Gullmarsfiord.
RESTRICTIONS: No restrictions night entry, except max. draft possible 30 ft. No tide.
MAX. SIZE: Maximum permissible length for berthing about 600 ft. Draft 30 ft.
HEALTH: Declaration of Health only when required from Customs or for vessel coming from outside Scandinavia.
RADIO: Cable Agents giving ETA, draft, cargo and cash required via Gothenburg Radio.
RADAR/VHF: No port radar service, VHF for calling Pilot, Channel 16.
TUGS: Must be requested through Agent at least 12 hours before arrival.
BERTHING: 3 berths available. Gullmarskajen length 600 ft. max. draft 30 ft., Grotokajen 500 ft. max. draft 22 ft. Anderssons Kav 400 ft. max. draft 18 ft. Railway on all berths.
CRANES: Five mobile harbour cranes working all berths. Maximum capacity 40 tons. No restrictions against using ship's own gear.
STEVEDORES: Ordered by Agents.
MEDICAL: Hospital in town.
TANKERS: See the port of "Brofjorden".
DENSITY: About 1027.
FRESH WATER: Available from shore installation.
FUEL: Gas oil and diesel available.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Normally opened by crew.
CERTIFICATES: Registered Tonnage Certificate.
CUSTOMS ALLOWANCES: See "Stockholm".
IDENTIFICATION CARDS: Not required.
CONSULS: Denmark, Finland, Iceland, Norway.
REPAIRS: Small repairs possible.
HOLIDAYS: See "Stockholm".
REPATRIATION: Change of crew and repatriation possible.
AIRPORT: None.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
TELEPHONE: Police, Ambulance, Fire Brigade, Tel: 90000.
DEVELOPMENTS: New berths under construction.
AUTHORITY: Lysekils Hamn, Hamnkontoret, S-45300 Lysekil, Sweden. *Tel:* 0523-14090. *Contact:* Olle Samuelson, Harbour Master.

MALMO (including Limhamn): 55.37 N. 13.00 E. (See Plan)

DOCUMENTS:
- 2 Crew Lists.
- 1 Passenger List.
- 2 Lists of Personal Effects (Tobacco List).
- 1 Declaration of Health.
- 2 Stores Lists.
- 3 Cargo Manifests.
- 1 Bill of Measurement.
- 1 Certificate of Nationality.
- 1 Derat Certificate.

PILOTAGE: Vessel applies for Pilot by telegram, by telephone or VHF (Telegraphic Address, Pilotstation, Malmo; Tel. (040) 115269; Telex 32435; VHF Channel 16). Advance notice required 5 hours before pilotage to commence. Pilot boat orange-coloured cutter equipped VHF and radar. Pilot boards at Malmo roadstead. In case of bad weather vessel awaits Pilot at roadstead. (Also see "Stockholm").
ANCHORAGES: Vessels anchor about 5 cables North of fairway buoy "Roder Prick" and East of leading lights Centralhamnsrannan Nedre and Ovre, and S.W. of leading lights Malmo Oljehamn Nedre and Malmo Oljehamn Ovre. Depth 12 m. to 14 m. and bottom hard clay. Larger vessels will be anchored at the Pilots directions.
REGULATIONS: All ships over 50 tons gross and ships under towage with a total length over 50 m. are obliged to report to the Malmo Port Radio, VHF Channel 16, working Channel 14, at least 2 nautical miles before approaching respective channels to Malmo and Limhamn (excluding the South Port of Limhamn). The same announcement is valid for the above ship before departure including movements inside port.
RESTRICTIONS: Speed must be reduced inside breakwaters. When red flag hoisted (red lantern at night) at the N.E Dry dock pier head, indicating dock gates open, vessels may pass breakwater at minimum speed. Bridge opening signal for passing from South Wharf Basin; 2 long blasts, followed by 1 short.
MAX. SIZE: *Bulk/Oil Harbour (under construction):* Max. length 260 m. on draft not exceeding 12.5 m. for bulk harbour and 11.4 m. for oil wharf. *Free Port:* Max. length 225 m. on draft not exceeding 8.6 m. Max. length recommended in New Harbour is 150 m. on max. draft 6.6 m. and in Industrial Harbour 180 m. on max. draft 8.4 m. No tides.
HEALTH: Free Pratique automatically granted arriving from non-infested areas. If arriving from infested areas Health Declaration must be presented immediately on arrival. If diseases on board suspected, vessel allowed to enter after approval of City Medical Adviser, but nobody allowed on board until vessel's crew examined by doctor and after approval of Medical Adviser.
RADIO: Vessel can route ETA cables through Gothenburg Radio (call sign SAG or Channel 26 on VHF), open all hours. Radio stations can also be called by radio-telephone on 2182 kHz.
VHF: Port Control Office equipped with VHF (Channels 16, 9, 10, 11, 12, 13 and 14), open 24 hours a day. Masters can receive information about berthing, present traffic and existing hazards to navigation in harbour area. Telex: 33275.
TUGS: Tugs usually meet vessels at roadstead. Ship's lines used.

Tugs can be arranged through a shipbroker or the Port Control office and are available round the clock from the Red Tug Fleet Co. Ltd. in Malmo. 2×3,000 h.p. tugs available. Others are available if necessary.

BERTHING:

3 of these cranes can be equipped with grabs

Port of Limhamn: Incorporated with Malmo Port Authority 1978. This port consists of an oil and cement jetty, a centreport and a ferry port.

The Port of Limhamn lies to the South of Malmo and is accessible via two fairways; the Southern one has a depth of 5.0 m. and leads to the Ferry Harbour, and the Northern fairway has two branches, one to the Oil Harbour with a depth of 10.5 m. and one to the Central Harbour with a depth of 8.6 m.

Berth	Length (m.)	Depth (m.)	No.	Cranes (tons)
Centreport:				
107 – 111	500	8.4	1	5 (private berth)
104 – 106	200	8.0 – 8.4	–	
112 – 113	180	8.0	–	
117 – 118	200	8.0	Tanker Berth	
Ferry port:				
217, 220		5.0	Car ferry berth	
Oil berth (jetty):				
125	90	10.0	Loading plant for cement and tanker berth	

BRIDGES: Will be opened with certain exceptions 0700 – 1700 hrs. weekdays. May be opened other hours on request to Port Control Office.
STEVEDORES: Normal working hours are from 0700 – 1600 hrs., Monday to Friday. Standard overtime shifts of up to 3 hours can be arranged. Additional overtime work can be obtained by special arrangement with the Terminal Company. Overtime work can also be arranged on Saturdays, Sundays and holidays.
Stevedore Company: Malmo Sjoterminal AB, Hjalmaregatan 1, 211 20 Malmo. Tel: 040-34 40 00. Telex: 32713 Seaterm S. Director: Bertil Cederholm.
CONTAINER HANDLING FACILITIES: 6 Roll-on/Roll-off ramps, 2 container berths with 40 tons capacity container cranes, 3 forklift trucks with 25 – 40 tons capacity.
MEDICAL: No advance notice required for medical attention. Good hospital facilities available. See also "Health".
TANKERS/BULK CARRIERS: The Bulk/Oil Harbour in the Northernmost section of the port of Malmo can be reached by a special approach fairway, the Oil Harbour channel, which has a depth of nearly 43.5 ft. The harbour is equipped with 7 berths, 2 of these being for ocean-going tankers with modern equipment for the unloading of oils and chemicals. Water depth varies between 19.5 ft and 39 ft.

The harbour can accept fully-loaded tankers of up to 60,000 d.w.t. as well as partly-loaded ships of up to 100,000 tons.

The berths for ocean-going tankers are each equipped with 3 hydraulically manoeuvrable transfer plants for faster and more reliable unloading. A piping system leads from the berths, unloading capacity of up to 2,000 tons per transfer plant per berth per hour. Tanks and pipes can be heated from a central steam-production station used by all firms. The Oil Harbour area also contains storage tanks for liquid chemicals and solvents. There are also good possibilities for development within the area, e.g. petrochemical industries.

Berth	*Quay Length*	*Depth*	*Crane capacity*
1001 – 1002	656 ft.	44 ft.	3×20 tons (500 t.p.h.) and 1 mobile crane 13.2 tons.
1003	770 ft.	39 ft.	
1004	770 ft.	39 ft.	
1006 – 1007	295 ft.	19.5 ft.	
1008 – 1009	295 ft.	19.5 ft.	
1010	328 ft.	19.5 ft.	

Also see "Berthing" – Port of Limhamn.

Report: *Cautionary Advice – In Port:* The port is approached from the N.W. via a relatively narrow dredged channel, marked with buoys and keeping 2 red leading lights in line. A current with a velocity of up to 2 knots may set across the channel, usually in a Northeasterly direction. It is, therefore, important that tugs are made fast with good lines before the channel is entered. Strong Southerly and Southeasterly winds, particularly in the Spring, may lower the water level in the harbour considerably below mean water level. The average density of the harbour water is 1010 at MLW.

Berthing Procedure: The procedure is similar for both berths used by Esso. Vessels berth port side alongside, and are normally swung in the manoeuvring basin North of the berth, assisted by tugs. If underkeel clearance permits, the starboard anchor is used and vessels are then pushed alongside the breasting face which is protected by truck tyres on wood.

DENSITY: Average density 1010. No tide experienced.

FRESH WATER: Fresh water can be ordered from the Port Control office (Tel: 040-128864) and is available at all quays at a rate of about 20-30 t.p.h.

FUEL: All types of bunker oil are available from tank trucks at various quays in Malmo and Limhamn.

FIRE PRECAUTIONS: Apart from usual non-smoking precautions, vessel discharging or loading dangerous goods of Class 1 in IMO code required to have a fire guard on board at all times.

In Oil Harbour the shore-valve watchman also serves as fire guard.

GANGWAY/DECK WATCHMEN: Not considered necessary other than in Malmo Oil Harbour. Decision to be made by Master.

OPENING/CLOSING HATCHES: Normally carried out by stevedores on ocean-going vessels.

CERTIFICATES:

- International Bill of Measurement.
- Certificate of Nationality.
- Derat Certificate.
- Load-line Certificate.
- Radio Certificate.
- Safety Equipment Certificate.
- Gear Certificate.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes or 40 cigars or 150 grams of smoking tobacco per week out of bond. Spirits, 0.75 litre spirits per week out of bond.

CARGO GEAR: No additional requirements.

IDENTIFICATION CARDS: Not needed.

NORRKOPING: 58.36 N. 16.12 E. (See Plan)

DOCUMENTS: 3 Customs Documents. 3 Health Documents. 3 Crew Lists. 3 Passenger Lists. 3 Manifests.

Master of ship arriving at first Swedish port from abroad has to give Maritime Declaration of Health on special form.

PILOTAGE: See "Stockholm". Ships will be received 2 nautical miles North of the lighthouse Gustav Dahlen. The Pilot must be ordered on radio, telephone or in some other way at least 5 hours before piloting to start.

ANCHORAGES: Lat. 58° 38.7′ N., Long. 16° 22.5′ E. Depth 70 ft.

RESTRICTIONS: Tankers loaded with more than 10,000 tons gasoline must not move in port at night-time. Tankers over 15,000 d.w.t. will not be shifted at night-time. Pampushamnen Oil Jetty: Tankers loaded with more than 10,000 tons must not enter at night-time. Inner Harbour: Tankers loaded with more than 15,000 tons must not enter at night-time.

TUGS: 2 tugs available, 1,680 b.h.p. and 3,400 b.h.p. The 2 tugs are icebreaking. Join vessel off St. Juten Lat. 58° 38.1′ N., Long. 16° 19.6′ E. Ship's lines to be used. All towing is carried out subject to "Scandinavian Tugowners Standard Conditions of the year 1959 revised 1974".

MAX. SIZE: Pampushamnen Oil Jetty can berth vessel of about 45,000 d.w.t. with max. draft of 11.4 m. MLW. Gastgivarehagen Oil Jetty can berth vessel with a max. draft 8.4 m. MLW and length 195 m. Ramshall and Tallbacken Oil Jetty can berth vessel with max. draft 7.9 m. MLW, length 177 m., breadth 24.4 m., daytime only. General cargo and bulk cargo quay at Pampushamnen with max. draft 11.4 m. MLW. General cargo quay (Ohmanskajen via the Lindo Kanal) can berth vessel max. draft 8.4 m. MLW and max. LOA 195 m. Dry cargo vessels of 15,000 d.w.t. or more for Ohmanskajen daylight entry only. Dry cargo vessels of max. LOA 195 m. and max. breadth of 23 m. and vessels of max. LOA 180 m. and max. breadth of 26 m. permitted. Vessels exceeding this size shall obtain prior permission from Pilots to enter the Ohmanskajen through the Lindo Kanal. Vessels must be able to make headway through the Kanal with a speed not exceeding 5 knots. Dry cargo vessels of 25,000 d.w.t. or more should have bridge controlled main engines. Inner Harbour can berth vessel max. draft 6.4 m.

Largest tanker at Pampushamnen, 66,875 d.w.t. LOA 236.46 m., Beam 33.3 m. Also see "Tankers".

Largest dry cargo vessel at Pampuskajen: 43,793 d.w.t., LOA 183 m., Beam 31.1 m. A vessel of LOA 199.7 m. and Beam 33.3 m. has also berthed.

Largest dry cargo vessel at Ohmanskajen: 34,976 d.w.t., LOA 181 m., Beam 26.4 m.

RADIO: Stockholm Radio, Tingstade Radio.

RADAR/VHF: VHF Channel 9, 14 and 16. No radar.

BERTHING: No specific requirements except at Oil Jetty Tallbacken and Ramshall, which require daylight docking and undocking.

Berths specially equipped for grain, berths equipped for containers, berth for Ro/Ro traffic, berths handling liquid chemicals. 5,300 m. of quayage with depths of 5 m. – 12 m. and 6 oil jetties.

Norra kajen: Norra kajen is used primarily for the handling of coal, steel, bulk commodities and raw wood material. The quay is equipped with bulk handling cranes, and the water depth is between 6.0 m. and 7.0 m.

Sodra kajen: Used primarily for timber, forest products and general cargo shipped in small tonnage. Water depth 6.0 m. – 7.0 m. Grain, fodder, fertilisers and clay are handled on a section of the quay between Ohmanskajen and Sodra kajen. Depths here are between 7.0 m. and 9.0 m.

Ohmanskajen: With a water depth of 9.0 m., Ohmanskajen is mainly used for general cargo, containers and forest products. Adjacent to Ohmanskajen there are 2 Ro/Ro berths with storing areas and warehouses for goods storage.

Pampusterminalen: Pampusterminalen, water depth 12.5 m. has the capacity for serving 2 vessels simultaneously and 30,000 to 40,000 tonners can utilise their carrying capacities at full draft. Via Pampusterminalen, general cargo, forest products and bulk commodities are handled. Cargoes are moved by the ship's own equipment, which is complemented if necessary by mobile shore cranes. The quay is also used by Ro/Ro vessels with stern quarter ramps.

Adjacent to Pampusterminalen, there are large areas for storing goods within fenced grounds. Warehouses are available for weather-sensitive goods. Pampusterminalen has a railway connection as well as high standard roads connecting with European highways and major district roads.

Pampushamnen Pier No. 3 Ro/Ro berth for coal discharge: A Ro/Ro berth has been added to Pier No. 3 for discharging of coal from barges.

SPECIALISED CARGO HANDLING FACILITIES: *Ro/Ro Berths:*

One Ro/Ro berth with a fixed concrete ramp and a water depth of 9 m. Loading and discharging by shore cranes (25 tons) may take place simultaneously with Ro/Ro operations. Stern loading vessels port side alongside.

One Ro/Ro berth with a fixed concrete ramp and a water depth of 8 m. for Ro/Ro operations only. Stern loading vessels starboard side alongside.

One Ro/Ro berth with a fixed concrete ramp adjacent to the heavy lift crane (320 tons) specially designed for heavy loads. Water depth 9 m.

Djuron

Grain Terminal, position Lat. 58° 38′ N., Long. 16° 20.1′ E. 160 m. long concrete pier with a water depth of 12.2 m. MLW. Travelling grain loader with maximum loading capacity 500 tonnes/hour. Max. elevation above MLW 18 m.

Braviken

Paper Mill, Holmens Bruk AB. Lat. 58° 38.3′ N., Long. 16° 16.1′ E. 126 m. long concrete pier with a water depth of 8.8 m. MLW. Mobile cranes for loading on request. Otherwise ship's gear. Ro/Ro fixed concrete ramp 20 m. wide with a water depth of 6.8 m. MLW. Stern loading vessels starboard side alongside.

CRANES: All cranes are owned and operated by the Port Authority. These include 15 electrical transportable quay cranes with a capacity of 4 – 10 tonnes, two 30 tonnes cranes adapted for 20 ft. and 40 ft. container handling which together can lift 50 tonnes, two 23 tonnes mobile cranes, one fixed heavy lift crane with a maximum lifting capacity of 320 tonnes (water depth alongside crane is 9.0 m.) and one 4 tonnes floating crane.

STEVEDORES: Gangs must be ordered before 1500 hrs. day before arriving.

MEDICAL: Arranged by Agent. All services available.

TANKERS: *Pampushamnen:* Pier I: Depth alongside 12 m. The berth is equipped with a crane for the handling of hoses and has pipe connections for all petroleum and bitumen products. Permanent gangway for the use of tankers.

Pier II: Depth alongside 12 m. The berth is equipped with a crane for the handling of hoses, and 3 mechanical couplings and has pipe connections for all petroleum products. Permanent gangway for the use of tankers.

Pier III (coastal tonnage): Depth alongside 7.5 m. The berth is equipped with a crane for the handling of hoses and has pipe connections for all petroleum products.

Fuel oil: one 18 in. and one 16 in. pipe-lines for discharging. 2 connections with 8 in. hoses. Gas oil: 14 in. pipes with 2 connections to 8 in. hoses. Asphalt: 10 in. pipes. Gasoline: 12 in. pipes with 1 connection to 8 in. hose. Connection to bigger or smaller hoses possible through existing flange-connections.

Pipe connections for discharging ballast water are installed at all piers at Pampushamnen. Receiving of ballast water is covered by ballastage. Ballast water containing any chemical agents not accepted. Receiving capacity during the first hour is 650 cu.m. Thereafter, 150 cu.m.p.h.

Tallbacken (Pol Transport): Depth alongside 8.5 m. Beam of vessels restricted to 24 m. (78 ft. 9 in.) due to passage through the Handelo drawbridge. Vessels require own gear for the handling of hoses.

3 connections for variable kinds of oil, 8 in. hose connections.

Gastgivarehagen (Gulf): Depth alongside 9 m. The berth is equipped with a crane for the handling of hoses.

4 connections for variable kinds of oil, 8 in. hose connections.

FRESH WATER: Delivered by 1 water boat of 90 cu.m.

FUEL: All grades available, delivered by boat.

DENSITY: 1000.

GANGWAY/DECK WATCHMEN: Watchmen are not necessary. Hose-watcher required during loading and discharging of tankers.

OPENING/CLOSING HATCHES: Decided from case to case.

CERTIFICATES: International Tonnage Certificate, Derat Certificate, Trade Certificate, and Radio Safety Certificate.

IDENTIFICATION CARDS: Not needed. Crew List to be used on Oil Jetties.

AUTHORITY: Otterbackens Hamn AB., Fack 65, S-547 02 Otterbacken, Sweden. *Tel:* 46-551-22250. *Telex:* 66088 Otbsped S. *FAX:* 46–551–22757. *Cables:* Otterbackssped.

OXELOSUND: 58.40 N. 17.08 E. (See Plan)

PORT LIMITS: The seaward boundaries of the port is a line between the Eastern point of Ljungholmen and the oil quay. For ore-loading ships, a vessel is considered to be an "arrived vessel" when at anchor at the roads West of Vinterklasen.
DOCUMENTS:
4 Crew Lists (3 for Customs and 1 for Ship's Agent).
4 Passenger Lists, if passengers are not inserted in Crew List.
2 Customs Documents, showing all alcoholic liquors and tobacco, belonging to Officers, crew and passengers.
2 Customs Documents, showing ship's store of alcoholic liquors and tobacco.
Health Documents, not necessary.
Manifests, at least 4 copies, normally only for general cargoes.
Bills of Lading, at least 1 copy if not otherwise stipulated.
Ship's Paper, Ship's Register and Derat Certificate, not older than 6 months.
PILOTAGE: (See "Stockholm"). Pilot station located at Oxelosund, tel. 0155 30200. ETA required 5 hours in advance in order to avoid charge for waiting. When ships in open sea recommended inform pilot station by telephone via Stockholm Radio, call sign SDJ or Gothenburg Radio, call sign SAG. VHF Channel 16 can be used for contacting Pilot station or Pilot boat. Approaching vessel applies for Pilot when daylight with flag signal "G" and when dark with pilot-light or Morse Code "PT". Pilot boats orange. Ships advised to proceed through Northern inlet, where Pilot will board at Norra Krankan Lighthouse, Lat. 58° 37′ N., Long. 17° 27′ E. International requirements with respect to boarding and safety measures. Vessels awaiting for Pilot are prohibited to ride at anchor North of "Gustaf Dalen" Lighthouse.
ANCHORAGES: Suitable anchorages West of Vinterklasen; clay-holding ground, depth 30 m. – 40 m. Ships are not allowed to berth until they receive orders and in the meantime must anchor and await such orders.
RESTRICTIONS: No tides. Draft not over 42 ft. at MLW. No other restrictions with exception of berthing ships of 190 m. length and over.
MAX. SIZE: Ore loading berth: Vessels between 3,000 and 80,000 d.w.t. can be loaded. Depth at quay 45 ft. Berth for unloading coal, iron ore: Ships of up to 80,000 d.w.t. can be discharged. Depth at quay 39 ft. 4 in. Berth for general cargo: Depth at quay 32 ft. 10 in. Oil pier: Oil carrier up to 95,000 d.w.t. can be berthed. Depth at quay 45 ft.
HEALTH: No special regulations.
RADIO: Stockholm Radio, call sign SDJ, or Gothenburg Radio, call sign SAG.
VHF: Harbour Authorities and Clearance Department for ore loading ships has VHF Channel 16.
TUGS: 2 combined tugs and ice-breakers of 1,680 and 3,200 i.h.p. Ship's lines to be used. Tugs normally join vessel near Beten Lighthouse, near harbour.
BERTHING: Harbour Pilot compulsory and normally ordered by ship's Agent. No tides. Depths in harbour can vary occasionally from minus 1 ft. 6 in. to plus 1 ft. according to temporary alterations of MWL. Ships of 40,000 d.w.t. and over cannot be berthed when dark.
CARGO HANDLING FACILITIES: The port has, among other things, one ore quay equipped with a travelling ore-loader with an average capacity of 2,000 t.p.h. One quay for unloading coal, iron ore and similar equipped with two travelling cranes with a capacity of 600 t.p.h. At No. 7 Quay there is a 25 m. traverse ferry ramp equipped to accommodate Roll-on/Roll-off traffic.
Two Cavalletto cranes (rate 200 t.p.h. each) for the unloading of dry bulk materials at quay and for transhipment from large vessels to small vessels or barges.
STEVEDORES: Master of ship with general cargo has to inform Agent in advance number of gangs required.
MEDICAL: Necessary for Agents to receive advance notice of required medical attention, informing Agent if doctor should meet upon ship's arrival, if ambulance is required for transport to hospital and promptness required. No special vaccination/fever certificates necessary. Hospital at Nykoping, about 8 miles from Oxelosund.
TANKERS: One tanker berth, depth at quay 45 ft. Connection to load/discharge lines, diameter of 8 in. – 16 in. Almost all types of heavy fuel oils.
DENSITY: 1006 – 1016, 75% fresh water. No tides.
FRESH WATER: Available. Delivery through lines from quays at a rate of 10 t.p.h. Fresh water can also be delivered by tugs which have fresh-water tanks.
FUEL: Not available.
FIRE PRECAUTIONS: Watchman necessary when loading/discharging gasoline.
GANGWAY/DECK WATCHMEN: When ship berthed, reliable gangway must be arranged to quay. Tankers discharging/loading gasoline must have watchmen, arranged through ship's Agent.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: Usual international certificates. In order not to delay despatch, important that following certificates are available and valid: Measurement, Life-boat, Radio and Derat (not older than 6 months).
CUSTOMS ALLOWANCES: (Tobacco), each crew member permitted out of bond about 200 grams tobacco and 5 packets of cigarette-paper. (Wine and/or Spirits), each crew member is permitted to have out of bond 1 bottle spirits or 2 bottles of wine, if he is over 20.

CARGO GEAR: International certificates necessary. No additional requirements.
IDENTIFICATION CARDS: Not needed.
CONSULS: None.
REPAIRS: Not possible.
DRY DOCKS: None.
SURVEYORS: Surveyors and cargo inspectors in Stockholm.
REPATRIATION: Crew changes can be effected and necessary repatriation arranged by Agent.
AIRPORT: Arlanda 40.4 miles outside Stockholm. Distance Oxelosund – Stockholm 92.8 miles. Total distance 133.2 miles. Served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: General holidays on which no cargo work can be arranged: New Year's Day; Epiphany; Good Friday; Easter Monday; Labour Day; Ascension Day; Whit Monday; Midsummer Day; All Saints' Day; Christmas Day; Second Christmas Day; New Year's Eve; Whitsun Eve; Midsummer Eve; Christmas Eve.
POLICE/AMBULANCE/FIRE: Dial tel. 90 000 and ask for "Police-alarm", "Ambulance" or "Brandalarm" (Fire alarm).
EMERGENCY CO-ORDINATION CENTRE: Dial 90 000 (Alarm No.).
TELEPHONES: Arrangements for placing telephones on board exist at Berth Nos. 9.5, 10 and 11. Cost for connection is charged per day.
SERVICES: No tank-cleaning equipment. Facilities for discharge of tank-washings.
BANKS: Skandinaviska Enskilda Banken, Box 6, S-613 01 Oxelosund. Telex: Stockholm 19154 Essebs.
STORING: See "Prelims".

1. By truck alongside dock only.
3. Trucks must remain 3 m. away from vessel.
4. Yes.
5. Regulations for bonded stores only.
6. No.

SHORE LEAVE: No restrictions.
DELAYS: Normally no delays.
AUTHORITY: Port of Oxelosund, Box 1200, S-613 01 Oxelosund, Sweden. *Tel:* 0155-31940. *Telex:* 64025 Portox S. *Cables:* Portox. *Telefax:* 0155-34321. *Contact:* Harbour Master or Port Director.

PITEA (Haraholmen): 65.14 N. 21.38 E. (See Plan)

Pitea town closed to navigation.
DOCUMENTS:
2 Crew Lists.
2 Lists Spirits and cigarettes.
Manifests and Bills of Lading of incoming cargoes to be presented to Customs.
1 Derat Certificate.
PILOTAGE: Pilot to be taken at Gaasoeren-Skelleftea district. Must be ordered at least 5 hours prior arrival. All VHF Channels used – also onboard pilot-boats. (Also see "Stockholm").

Outward-bound vessels must order Pilot from Harbour Office during office hours.
ANCHORAGES: Accordance Pilot's advice.
MAX. SIZE: Entry through Pitsundet. Max. draft 22 ft. Traffic now directed to Haraholmen which is the port for Pitea. For information regarding passage and bridge opening apply to Harbour Office.

No tides. Also see "Berthing" and "Tankers".
HEALTH: No special restrictions. Diseases must be reported to Customs before entering port.
RADIO: Stockholm Radio, Harnosand Radio.
VHF/RADAR: Radar and VHF on all stations. Harbour Office, Channels 16, 9 and 13.
TUGS: Tugs available if ordered beforehand. Tugs compulsory for larger vessels.
BERTHING: Haraholmen: Length 600 m. plus Ro/Ro ramp, depth 12.5 m., max. draft 11.5 m. Quay is equipped with electricity, telephones, water and oil. Quay is very strong, capable of taking loads up to 250 tons.

Harbour is specially built for all year round traffic. 10 propeller engines are installed under the quay to keep water running and quay ice-free. Special lights are installed to assist in bad visibility.

Quay is equipped with 2 *"Asea"* cranes of 12.5 tons and 19.5 m. outreach.
BRIDGES: See "Max. Size".
STEVEDORES: Bottenvikens Stuveri AB – Pitea. Labour must be ordered latest at 1400 hrs. for morning start following day. Tariff available from Agents.
MEDICAL: All treatments available without notice.
TANKERS: Only one berth at Haraholmen. Max. size 70,000 d.w.t. Max. LOA 240 m. (approx.). Max. draft 37 ft. 10 in. FW. No further restrictions. 2 tugs compulsory for vessels over 15,000 d.w.t.
FRESH WATER: Available by pipe and lorries.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: Not necessary but available if ordered.
OPENING/CLOSING HATCHES: Normally done by ship's crew.
CUSTOMS ALLOWANCES: (Tobacco), 200 cigarettes/man per week. (Wine and Spirit), 1 bottle man/week. Only crew members over 18.
IDENTIFICATION CARDS: Not needed.
CONSULS: None.
REPAIRS: All types of repairs can be effected.
DRY DOCKS: None.
AIRPORT: Regular flights 9 times per day. Kallax Airport at Lulea. Distance 50 km. from port. 60 minute flight to Stockholm.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Tel. 90000.
TELEPHONES: Facilities for placing on board available.
GENERAL: Masters to note the signals to be given before passing bridge at Pitsundet. Master must remember that Pilot must be taken at Gaasoeren-Skelleftea district. If Pilot on bridge all way from Skelleftea to Pitea, a distance fee is charged. Piloting from Nygraan Lighthouse (entrance Pitea) only normal fee.
DEVELOPMENTS: A chemical terminal has recently been completed, capacity 10,000 tons. Also see "Max. Size".
AUTHORITY: Hamnkontoret Pitea, Sjofartshuset, P.O.Box 716, S-94128 Pitea, Sweden. *Tel:* 0911-46013. *Telex:* 68307 Shipexp S. *Contact:* Anders Koster, Harbour Master.

RONNEBY: 56.10 N. 15.17 E. (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
4 Customs Documents.
1 Health Document.
2 Manifests.
1 Bill of Lading.
PILOTAGE: Pilot is taken at Karlshamn or Aspo (Karlskrona) pilot stations. Tel: Karlshamn 0454/14102, Aspo 0455/29016. Ordered over Karlskrona Radio on 3289 kHz or by VHF on Channel 16. Pilot should be ordered 5 hours in advance. (Also see "Stockholm").
ANCHORAGE: Open roads.
MAX. SIZE: Limited by depth in fairway: 20 ft. 9 in.
RADIO: Karlskrona Radio, 2182 kHz.
VHF: VHF call sign Ronnebyhamn, Channel 16, 12, 13.
TUGS: None, when necessary such ordered from Karlshamn.

6. Yes.
SHORE LEAVE: Permitted.
AUTHORITY: Cementa AB, Storgat 116, 62030 Slite, Sweden. *Tel:* (0498) 20500. *Telex:* 4136. *Cables:* Cementa Slite. *Contact:* Walter Laakso, Harbour Master.

AGENT: Atktiebolaget Rob. Myrsten, 620 30 Slite, Telex 4137 – A/S Myrsten. Cables: "Myrsten – Slite". Tel. (0498) 22070. After hours (0498) 20102/20021/25565.

SODERHAMN: (includes Stugsund, Langror oilberth, Sandarne factory berth and Orrskar woodchip berth.) 61.18 N. 17.05 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Bills of Lading.
3 Manifests.
2 Tobacco Lists.
2 Stores Lists.
Tonnage Certificate.
Certificate of Nationality.
Ship's Register.
PILOTAGE: Pilot must have 5 hours' notice. Telegraphic address "Soderhamn Pilot Station", Ljusne. VHF Channel 16 for calling pilot boat and pilot station and 13. Pilot boat is orange. International signals to be used. Vessels can normally receive Pilot between Hallgrund and Storjungfrun. In case of bad weather or ice, Master consults Pilot for advice (also see "Stockholm").
ANCHORAGES: Lilljungfru Anchorage S.W. Lilljungfrun, where depths are 15 m. – 20 m., is W. or S.W. of Norrutharet. Branthalls Anchorage W. Branthall Island, depths 10 m. – 15 m.
HEALTH: No special action except for suspected disease. In case of disease contact Agent for information.
RADIO: Stockholm Radio when vessels come from South and Harnosand Radio from North. Within reach Master may call Soderhamn Port Radio. Tug station is Stugsund. Tug fitted VHF, Channels 16, 13, 12.

There is a radar station at Soderhamn. Pilot station, Ljusne, and some of the pilot boats are fitted with radar.

MAX. SIZE: Langror Oil Berth. Breadth of entrance fairway 55 m. – 60 m. and depth 8.3 m. at mean level (M.L.). Depth according to M.L. of 1987. Max. ship length about 170 m. at the quay.
Orrskar: Woodchip Terminal, breadth of entrance fairway 110 m., depth 12.8 m. M.L. New quay for general cargo, depth 10.45 m. M.L.
Sandarne: Breadth 30 m., depth 7.0 m. M.L. BREADTH 55 m. – 60 m. in unlit fairway.
Stugsund: Breadth 30 m., depth 6.0 m. M.L.
Soderhamn: Breadth 10 m. – 15 m., depth 3.5 m. M.L.

Depth varies about 1 ft. below and 1 ft. above M.L. Breadth given at narrowest point in fairway.

TUGS: Normally meet large vessels at Otterhallans Lighthouse and others off quays on request. Ship's lines to be used.
BERTHING: Boatmen can be ordered by Pilots or Agents. Large ships berth oil berth only in daylight because channel not lit.
STEVEDORES: Gangs to be ordered by Agent usually at 1500 hrs. for starting next morning at 0700 hrs.
CRANES: One electric crane to lift 10 tons in Stugsund. In other berths mobile cranes can be hired.
MEDICAL: Medical attendant available day and night.
TANKERS: 6 in. or 8 in. connections. Only 1 berth and max. depth at quay 8.3 m.
DENSITY: Practically fresh water.
FRESH WATER: Available in all ports. Delivered through pipe-lines on wharf. Rate: 10 t.p.h.
FUEL: Any normally used grade on request to oil company with few hours' notice.
GANGWAY/DECK WATCHMEN: Watchmen available.
OPENING/CLOSING HATCHES: Normally carried out by crew.
SHIP'S CERTIFICATES: Traffic permission (not necessary for ports within the Custom District boundaries), Nationality and Reg. Certificate (or interim Nationality Certificate), Bill of Measurement, Swedish Sailor's Roll (only Swedish ships), Foreign Nationals Crew Passports, Derat Certificate (6 month), Certificate of Health.
CUSTOMS ALLOWANCES: (Tobacco), out of bond, 200 cigarettes or 250 gm. tobacco. (Wine/Spirits), out of bond, 1 bottle of spirits and wine, maximum 1 litre or 2 bottles of wine.
CARGO GEAR: Valid cargo gear certificates.
IDENTIFICATION CARDS: Not needed.
CONSULS: Danish, French and Dutch.
REPAIRS: Minor plate-work and welding can be carried out.
SURVEYORS: A Commonwealth Surveyor is appointed at the Port.
REPATRIATION: Facilities exist for effecting crew changes.
AIRPORT: Nearest international airport Stockholm.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: No work on official holidays, but may be possible on special request. New Year's Day (1st January); Twelfth Day (6th January); Good Friday; Easter Sunday and Easter Monday; 1st May; Whit Sunday and Whit Monday; Midsummer Day; All Saints' Day; 25th December and 26th December; New Year's Eve; Easter Eve; Whitsun Eve; Midsummer Eve; Christmas Eve.
POLICE/AMBULANCE/FIRE: Police 90000 or 0270/10020; Ambulance 90000; and Fire 90000 or 0270/75455.
TELEPHONES: In Sandarne, quay telephones can be placed on board. 2 telephones. Telephone can be placed on board at Orrskar Quay.
EMERGENCY CO-ORDINATION CENTRE: Harnosand Radio, Tel: 0611/20520.
SERVICES: Facilities for discharge of tank-washings max. 20 tons. Tank-cleaning and facilities for discharge of tank-washings of great extent are Stockholm and Sundsvall. Compass adjusting in Stugsund Berth.
BANKS: Skandinaviska Enskilda Banken, Box 4, Kopmangatan 1, 826 00 Soderhamn.
STORING: See "Prelims".

1. Yes.
2. Yes.
3. Yes.
4. Yes.
5. Only bonded stores.
6. Stevedores, on request.

REGULATIONS: Port regulations available from Agent or Port Office.
DELAYS: Fog, ice and bad weather may delay berthing. Rain and snow can delay loading and discharging of dry cargo.
GENERAL: There is a VHF port radio at the Port Office, Soderhamn. Working time 0730 – 1630 hrs. Channel 16 for call and Channel 12 for working. During the ice-breaking season the tug may be out even at night. Tug has same channels. Soderhamn Customs District includes all berths mentioned above.
AUTHORITY: Soderhamns Hamn, S:a. Hamngatan, S-82600 Soderhamn, Sweden. *Tel:* 0270-14828, 70080, 70180. *Contact:* Ragnolf Eriksson, General Manager.

SODERTALJE: 59.12 N. 17.38 E. (See Plan)

PORT LIMITS: Approximately 2 nautical miles from entrance.
DOCUMENTS:

Crew List.
Cargo Manifest.
List of Ports of Call.

PILOTAGE: Pilot to be ordered at least 5 hours before arrival at Landsort Pilot Station on VHF Channel 13. Distance from Landsort to Sodertalje is 34 nautical miles.

Pilotage compulsory for all vessels carrying petroleum, gas and chemicals.

ANCHORAGES: Pilots direct vessels to suitable anchorages.
RESTRICTIONS: Cables over fairway with vertical clearance of 42 m. at MLW.
MAX. SIZE:

	Length	*Beam*	*Draft*
Uthamnen (Outer Harbour)	200 m.	32 m.	8 m.
Sydhamnen (South Harbour)	200 m.	32 m.	9 m.
Igelstahamnen (Igelsta Harbour)	200 m.	32 m.	9 m.
Oljehamnen (Oil Harbour)	200 m.	32 m.	9 m.

HEALTH: Derat Certificate required.
RADIO: Stockholm Radio.
VHF: Channel 13 calling "Pilot Sodertalje" or "Malarbron" for ordering of boatmen 1 hour before arrival.
RADAR: No port radar service.
TUGS: Available through local Agents for vessels over 10,000 d.w.t.
BERTHING: *Sydhamnen:*

Ro/Ro Berth No. 9, length 70 m., depth 6.4 m. MW.
Ro/Ro Berth No. 10, length 130 m., depth 7.9 m. MW.
Ro/Ro Berth No. 11, length 130 m., depth 7.9 m. MW.
Ro/Ro Berth No. 12, length 160 m., depth 9.8 m. MW.

Oljehamnen: Jetty No. 6, depth 10.1 m. Jetty No. 7/8, depth 6.9 m.
Uthamnen: Lo/Lo berth (general cargo), length 300 m., depth 5.9 m.–8 m. Silo Quay, length 155 m., depth 8.4 m.
Igelstahamnen: Coal and oil discharge berth, length 150 m., depth 10.5 m. Coal discharged using shore equipment.
CRANES: *Uthamnen:* 4 cranes up to 10 tons each, 1 crane for heavy lifts up to 25 tons.
Sydhamnen: Mobile cranes up to 36 tons, forklifts up to 42 tons.
Igelstahamnen: Shore equipment for coal discharge.
BULK HANDLING FACILITIES:
Uthamnen: Salt in bulk, fertiliser and coal.
Siloquay: Grain loading.
Igelstahamnen: Coal discharge, oil discharge.
Oljehamnen: Oil petroleum products and liquid chemicals.
SPECIALISED CARGO HANDLING FACILITIES: 24,000 sq.m. for cold and warm storage available.
STEVEDORES: Working hours: 0700 – 1230 hrs., 1300 – 1600 hrs. on weekdays. Maximum 3 hours' overtime can be worked. Stevedores can be ordered by telephoning 0755-61040/62210 or by telex No. 10273 Sodstuv.
TANKERS: See "Berthing".
FRESH WATER: Available at all berths.
FUEL: Available at all berths.
REPAIRS: Can be undertaken at all berths.
DRY DOCKS: Nearest at Stockholm.
GANGWAY/DECK WATCHMEN: Available.
HATCHES: Opening/closing carried out by stevedores.
AIRPORT: Nearest at Stockholm, 60 km. distant.
TIME: GMT plus 1 hour. Summertime GMT plus 2 hours.
HOLIDAYS: Cargo work can be carried out by special agreement on holidays.
POLICE/AMBULANCE/FIRE: Dial 90000 and request necessary service.
TELEPHONES: Can be placed on board vessels.
SHORE LEAVE: Permitted.
BANKS: Only Swedish banks are represented.
STORING: See "Prelims".

1. By truck.
2. Vessels can store while loading/discharging.
4. Forklifts available.
6. Yes.

SURVEYORS: Cargo surveyors are available from Stockholm.
AUTHORITY: Port of Sodertalje, Box 2016, S – 15102 Sodertalje. *Tel:* 0755/21430, 61040. *Telex:* 10273 Sodstuv. *Contact:* Michael Samsioe, General Manager.

SOLVESBORG: 56.03 N. 14.35 E. (See Plan)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot station at Ahus, Tel: 044/240027, needs 5 hours notice. Pilot Station (Karlshamn): Tel: 0454-14102. Pilot station and pilot boat can be ordered by VHF Channel 16, working on Channel 13. Harbour office in Solvesborg can be called on same frequency. (Also see "Stockholm".)
ANCHORAGES: Roadstead to South of harbour 25 ft. deep with good holding ground.
MAX. SIZE: Depth in outer harbour 8.2 m. (27 ft.) and in inner harbour 7.5 m. (25 ft.) Recommended for ships to have 1 ft. 6 in. of water under keel. Max. length 170 m. (558 ft.). Breadth 30 m. (98 ft.). Draft 7.7 m. (25 ft.) for vessel entering harbour. Largest ships to enter harbour were 26,000 tons oil tanker with load of 16,000 tons and 30,000 ton dry cargo ship loading 5,000 tons of pulp.
HEALTH: See "Stockholm".
Animals: Private dogs and cats etc., not allowed ashore without quarantine.
RADIO: Stockholm Radio and Gothenburg Radio.
VHF: Harbour Office can be reached by VHF, Channel 16. Working frequency Channel 14.

Tug "Hafnia" – Channels 6, 13, 14 and 16.
Workboat "Portia" – Channels 6, 13 and 16.

TUGS: 1 tug available, 1 × 665 h.p. (ice-breaking).

BERTHING:

Location	Length (m.)	Depth (m.)	No. of cranes (max. load) tons
Inner Harbour:			
Western Quay, Southern Section	225	7.5	1 (5)
Western Quay, Northern Section	129	6.5	1 (6)
Northern Quay	85	5.0	Mobile (20)
Blekinge Quay	53	4.0	—
Other Quays	190	3.0	Mobile (18)
Outer Harbour:			
Ro-Ro ramp	20	6.0	—
Side-deck at the Ro-Ro ramp	45	6.0	Mobile (35)
Outer Harbour Quay	200	8.2	1 (26)
Oil Jetty	25 + Dolphins	8.2	—
(The Ro-Ro berth, quay and oil landing-stage are situated on a 500 m. line).			
Private Harbours:			
Quay	165	6.0	1 (15)
New Quay	115	6.0	1 (15)

Within the port area a total of 25 straddle, fork and clamptrucks, as well as 2 front loaders, the biggest fork truck having a lifting capacity of 25 tons.

A storage space of 17,000 sq.m. inside warehouses, and an open air space of 140,000 sq.m.

STEVEDORES: Require notice before 1500 hrs. if loading/discharging shall start at 0730 hrs. following morning, or notice before 1000 hrs. if loading/discharging shall start 1300 hrs. the same day.

Stevedoring Company: Solvesborg Stuveri AB. Tel: 10119,12295.

TANKERS: 3 Shore-lines for oil products from oil jetty to depots.

1. 250 mm. for Bunker C (2nd fuel).
2. 200 mm. for paraffin oil.
3. 200 mm. for petrol. For discharge coasters use ship's equipment.

Larger ships discharging Bunker C oil use harbour's 8 in. rubber hose.

FRESH WATER: Available.

FUEL: Ordered from oil companies by ship's Agents.

GANGWAY/DECK WATCHMEN: Watchmen normally not needed. Can be ordered by ship's Agents.

OPENING/CLOSING HATCHES: Normally opened/closed by crew.

SHIP CERTIFICATES: See "Stockholm".

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes/week per head. Wine/spirit: normally 1 litre/week.

Customs House, Tel: 12000.

IDENTIFICATION CARDS: Not needed.

CONSULS: Royal Danish Vice-Consulate. Railway Station Building. Tel: 0456/10115.

Royal Norwegian Vice-Consulate, Stortorget 10, Box 115, S-29401 Solvesborg. Tel: 0456-150 20.

REPAIRS: Carried out by local workshops.

DRY DOCKS: None.

REPATRIATION: Possible.

AIRPORT: 50 km. to Kristianstad Airport and 60 km. to Ronneby Airport. Served by regular inland airlines.

TIME: Local time is GMT plus 1 hour. Summertime GMT plus 2 hours.

HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Dial 90 000 and ask for Police, Ambulance or Fire Department.

TELEPHONES: Telephones available in Agent's offices at quay and telephone boxes.

DELAYS: Normally no delays.

AUTHORITY: Solvesborgs Hamn, Box 49, S-294 01 Solvesborg, Sweden. *Tel:* 0456-13600 or 10072. *Contact:* Sven Holmer, Harbour Master.

STENUNGSUND: 58.04 N. 11.49 E. (See Plan)

LOCATION: Stenungsund is located on the East side of Askero Fjorden about 23 miles North of Gothenburg. There are 2 terminals.

1. The Powerboard Terminal.
2. The Statoil Havden Terminal.

Both are located about 20 miles from the Hatteberget Light Tower (Lat. 57° 52′ N., Long. 11° 28′ E.) and are reached via Marstrands Fjorden and Hake Fjorden.

DOCUMENTS:

3 Crew Lists.
2 Passenger Lists.
1 Tobacco and/or Stores List.
1 Manifest.
1 List of Animals on Board (if any).
Access to the usual ship's papers (measurement, register, certificate, etc.).
If away from Sweden more than 15 days: Bill of Health.

PILOTAGE: The pilot boat is steel hulled, painted orange, and it will meet ships based on ETA and VHF contact. The Pilot boards at Hatteberget Light Tower. Pilots will not handle large vessels during darkness. Those ships must anchor and await daylight. ETA advice to Pilot to be sent to "Lotsarna Marstrand" via Goteborg Radio at least 5 hours before arrival giving ship's name, flag, draft, ETA pilot station and destination.

APPROACHES: When approaching from the West, ships must keep North of the area dangerous due to mines extending to Lat. 57° 47′ N., Long. 11° 03′ E.

Currents in this area are unpredictable and are much influenced by the wind. Ships have reported experiencing a change in direction of current on approaching the Hatteberget Light Tower, for example, South-going outside Hatteberget, North-going inside Hatteberget. Currents of 1 to 3 knots have been experienced.

Seabuoy-Berth: For larger ships bound for Stenungsund the recommended track is Algo Fjorden shown on charts as passing between N. Meholm and S. Meholm is not always followed by Pilots, some preferring to pass South of the Hunden Shoal and S. Meholm. Great caution is needed in taking this Southerly route as there are unmarked dangers. During darkness or in poor visibility the Pilot's intentions should be fully discussed before entering Algo Fjorden.

The channel between Bratton, Kallon and Almon Islands at the North end of Hake Fjord and under the Tjornbron (bridge) between Kallon and Almon is in the form of an "S" bend and vision is obstructed. Traffic may be suddenly met with little warning, particularly as some ships do not carry Pilots, and there is no speed limit. Engines should be on standby, anchors ready and manned in this area.

ANCHORAGES: While awaiting berth vessels anchor outside harbour N.W. of Powerboard Jetty. Safe anchorages everywhere, but fairway South of Galteron Lighthouse has to be avoided.

RESTRICTIONS: Navigation of ships drawing more than 9.2 m. (30 ft.). is not practised inwards of Algo Fjorden during darkness.

MAX. SIZE: *Powerboard Jetty:* Max. draft North side 12.30 m., South side 10.50 m.

Statoil Havden: Max. d.w.t. 36,000. Max. LOA 210 m. Max. draft 10.4 m. (34 ft.). Distance bow to manifold 99.0 m.

HEALTH: No special Pratique necessary. If any disease or fever suspected on board, doctor must be called on arrival. Pratique automatically granted when entering from another port in Sweden.

RADIO: Gothenburg radio.

VHF: Pilot on Channel 16. Working on Channel 6.

TUGS: At present no tugs are stationed in Stenungsund but have to be ordered from Gothenburg at least 2 hours' steaming away.

Tugs are diesel driven, single screw, single rudder. Tugs are made fast after passing Vinterholmen at the North end of Hake Fjord and before passing through the narrows under the bridge. Tugs tow on the hook using ship's ropes. The larger tugs use two ship's ropes out of the same lead and care must be taken to equalise the load on the two lines before full load is taken.

The Pilot carries his own VHF set (having Channels 16, 13 and 12) and uses this to communicate with the tugs.

50,000 d.w.t. tankers use 3 tugs, 1 large tug forward, 1 large and 1 smaller tug aft.

MEDICAL: Doctors and dentists available at short notice. Hospitals situated at Uddevalla and Kungalv, ambulances at Stenungsund.

TANKERS: The Powerboard Terminal:

General: The Powerboard Jetty is a finger pier aligned East/West located on the East side of the Askero Fjord about 1 nautical mile North of the town of Stenungsund (Lat. 58° 05.3′ N., Long. 11° 49.2′ E.). It is shown on B.A. Chart 890. It is used for the import of fuel oil for the power station located 0.5 miles away and for the import of products, solvents and LPG for oil companies.

Cautionary Advice: Currents in Askero Fjorden are unpredictable both in speed and direction but generally run across the direction of the finger pier. The fendering of the outer corners of the pier is of low energy absorption characteristics and heavy landings must be avoided. Anchors should be manned and ready for letting go.

Berthing Procedures: On proceeding up Askero Fjorden past Havden the ship is swung to starboard with the assistance of tugs and lined up for the pier. Anchors are sometimes used to help steady the bow on the correct heading, and as assistance in bringing the ship up.

Ocean-going ships berth on the North side of the pier and are, therefore, starboard side to berth. When in position, most ships' sterns protrude beyond the end of the pier by as much as one-third of their length, therefore, maximum attention must be paid to the stern moorings. Because moorings placed on the buoy on the starboard quarter or on the bollards on the South shore prevent ships from using the South side of the pier the terminal will not, as a rule, put moorings to these points. However, in periods of unsettled weather, particularly if winds are from the S.W., Masters of the larger ships should insist on stern moorings being sent to the buoy and South shore. It should be borne in mind that tugs are not readily available at Stenungsund. Moorings are taken ashore initially by boat and then by heaving line. The forward spring line is usually first line ashore. No shore moorings are provided.

Gangway: Ship's gangway is used, there is ample room on the jetty to land the gangway abaft the manifold. Note that when ship is light the normal ship's gangway will become very steep (over 50°) and special safety precautions to prevent accidents to personnel will be necessary.

Fendering: The concrete strong points of the pier are protected by tubular rubber 600 mm. diameter erected horizontally. The concrete outer corners are well protected with low friction fenders.

Cargo Connections and Handling: HFO, Heating Oil, Naphtha and Mogas are handled. Ullages and temperatures are taken jointly with shore representative upon arrival alongside.

Starboard manifold should be prepared for 10 in. hoses, 2 or 3 flexible hoses with 10 in. ASA bolted flanges are usually connected. Starboard derrick and a 4 ton shore crane are used for hose connection.

Concurrent loading and discharging are not allowed. Maximum back pressure is 10 kg./sq.cm.

Naphtha receiving capacity is maximum 3,000 cu.m.p.h. Normal discharge rate is about 1,800 cu.m.p.h.

Deballasting Facilities: The terminal has limited high flash ballast reception facilities, about 2,400 cu.m. Discharge rate is about 500 cu.m.p.h.

Clean oil-free ballast may be discharged overboard but it is the ship's responsibility to ensure that the ballast water is oil-free and very heavy penalties are imposed for oil pollution.

Passing Traffic, Weather, Tide, etc.: There are no unusual problems except for strong S.W. winds when it is important that breast moorings are run to the starboard quarter buoy and to the South shore.

Special Regulations: No small craft are allowed alongside ship while at jetty.

Oil Pollution Safeguards: Floating oil booms – partly fixed and partly portable are available to surround the ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: Remote-controlled foam-guns and water monitors are available at the berth.

Fresh Water: Good quality fresh water is available ex-jetty by hose, rate 25 t.p.h.

Additional Information: The berth on the South side of the Powerboard finger pier also handles HFO, heating oil, naphtha and mogas but is mainly used for loading/discharging LPG.

Statoil Terminal, Havden: *General:* Statoil's Havden terminal berth is located on the North side of the Havden peninsula on the East side of Askero Fjorden (Lat. 58° 05′ N., Long. 11° 48.5′ E.). It is a marginal type berth with a breasting face about 60 m. long. It is used for the discharge of naphtha and LPG.

Cautionary Advice: See "Powerboard Terminal".

Telegraph cables (shown on the chart) run out from the shore close Northwards of the berth and anchors should not be used. In addition, the dredged area tapers quite sharply towards the East end of the berth and use of an anchor could result in the ship "sitting" on the anchor or its cable.

Berthing Procedures: On arriving off Havden the ship is swung to starboard with the assistance of tugs and steamed slowly to the berth. Ships always berth starboard side to berth. Moorings are taken ashore by motor boat, the forward spring is usually the first line ashore. The stern of the ship is not well sheltered from the prevailing S.W. winds and special attention must be paid to putting out good stern moorings. It must be remembered that tugs are not readily available in Stenungsund. No shore moorings are provided.

Gangway: Ship's gangway used, ample room on the jetty to land the gangway aft of the cargo manifold. Note that, when ship is light, the normal ship's gangway will become very steep (over 50°) and special precautions to prevent accidents to personnel will be necessary.

Fendering: Each of the 3 concrete strong points is fendered by truck tyres around a rubber core slung horizontally. Care should be taken not to land initially between the strong points.

Cargo Connection and Handling: Only naphtha and LPG are handled at this berth. No bunkers can be provided. 2×10 in. fully counterbalanced hard arms of Chiksan manufacture are provided. Each has 10 in. ASA bolted flanges.

Ullages and temperatures are taken together with shore representative upon arrival alongside.

Starboard manifold should be prepared to accept 2×10 in. hard arms. If ship's manifold has large overhang outside the support, this should be jacked up before connection of arms. Stays, derricks, etc., in vicinity of starboard manifold should be removed. There are no facilities for receipt of dirty ballast at the terminal.

Oil Pollution Safeguards: Floating oil booms, partly fixed, partly portable are available to surround ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: The jetty is equipped with a fire water and a foam line and portable monitors.

Fresh Water: Good quality fresh water is available ex-jetty by hose, rate 25 t.p.h.

FUEL: Only available by barge from other places (i.e. Gothenburg). Bunkering only during daylight. Can be ordered at short notice.

FIRE PRECAUTIONS: Normal precautions.

GANGWAY/DECK WATCHMEN: Watchmen from ashore necessary when telephone connected.

CUSTOMS ALLOWANCES: 200 cigarettes. 1 bottle of spirits.

IDENTIFICATION CARDS: The gate at the Powerboard Terminal is TV-guarded. Each crew member must carry a Passing Permission allowing passage through the gate. Required number of permissions will be handed over to the Master by the Agent on ship's arrival. Passing Permission at Statoil Terminal, Havden, is not required.

CONSULS: At Gothenburg.

REPAIRS: Minor repairs can be made locally, large repairs by labour from Gothenburg shipyards. Gas-freeing alongside with Port Captain's approval only. Repairs alongside with Port Captain's approval only.

SURVEYORS: D & D Marine Consult, Upplandsgatan 25, 11360 Stockholm. Tel: 08-34 1590.

REPATRIATION: All facilities exist.

AIRPORT: Gothenburg 50 km. away. Regular airlines.

TIME: GMT plus 1 hour.

HOLIDAYS: Tankers load and discharge all year round.

TELEPHONES: Connected on board if required. Watchmen attend calls. Fireman and alarm on jetty during whole operation.

SHORE LEAVE: Permitted. Distance to Stenungsund 1 km., Uddevalla 40 km. or Gothenburg 50 km. by bus, train or taxi. Shore passes issued at the gate.

AUTHORITY: Vattenfall, Box 79, S-44401, S–44421 Stenungsund, Sweden. *Tel:* 46-303-70670. *Telex:* 2408 Svvstd S. *FAX:* 46–303–70841. *Cables:* Kraftverket. *Contact:* Bengt Jonsson, Harbour Master.

STOCKHOLM: 59.19 N. 18.03 E. (See Plan)

DOCUMENTS:

(a) Crew List: Normally 2 copies; for oil harbour at Loudden and Free Port, 3 copies.

(b) Passenger List: Regular passenger services 2 copies; cruise ships (lists for cruise ships must be sent in advance to Agent for forwarding to Immigration Authorities), 2 copies.

(c) Customs Documents: Arrival report (form can be obtained on arrival), 4 copies. Crew Effects Declaration, 2 copies. Ship's Stores Declaration, 2 copies.

(d) Quarantine Certificate or Bill of Health: Derat Certificate not more than 6 months old to be shown. *Note:* Additional quarantine regulations may be imposed in special circumstances.

(e) Manifest: 3 copies.

(f) Bills of Lading: 1 copy of each. Liners may be subject to other regulations with regard to *(e)* and *(f)* above.

(g) Ship's Documents: Tonnage Certificate. Certificate of Nationality.

PILOTAGE: *(Sweden General).* Applications for licensed Pilots should be made at least 5 hours before pilotage is due to commence. When making application specify name of vessel, tonnage, draft and destination. Also give estimated time for taking Pilot on board and route. If this procedure not followed, the Maritime Service cannot guarantee to supply a Pilot without considerable delay to vessel.

Preferable make application by telephone, or by radio via a coastal station or by some other method direct to pilot station nearest point where pilotage is to begin. Also possible request Pilot by VHF telephone to any Maritime Service Pilot Station, Pilot waiting point or lighthouse which is equipped with VHF.

The Maritime Service's network of permanent VHF telephone stations has been extended to give almost complete coverage of all pilot stations and waiting points and is also operative for a number of lighthouses. The radio stations can operate on different Channels and are equipped for frequency modulation. During hours when pilot stations are open, a constant watch is kept on frequency 156.80 MHz (Channel 16). This frequency should be used for all signals and replies – and for distress traffic. Outside these hours, normal traffic transmissions, i.e. applications for Pilots, etc. should be made on frequency of 156.65 MHz (Channel 13) or on reserve operating frequency of 156.60 MHz (Channel 12).

When making VHF telephone call, the type of call signal that should be sent is "Lotsarna (or pilot station) plus the name of the pilot station or the pilotage attendance".

	Arholma	*Sandhamn*	*Landsort*

During daylight	Flag G	Flag G	Flag G
At night	International PT with morse lamp	International PT with morse lamp	International PT with morse lamp
Audible signal in reduced visibility	International PT with siren	International PT with siren	International PT with siren
	Pilot may be called by radio or VHF.		
Boarding point	At Bjorko outside outer Skerries, 2 – 3 n.m. N.W. or E. of Simpnasklubb	2 n.m. S.E. of Revengegrund Light	2.5 n.m. S. of Oja
Anchorage for vessels awaiting Pilot	Near position stated above	Near position stated above	Near position stated above

ANCHORAGES:

	Arholma	*Sandhamn*	*Landsort*
(a) Prohibited anchorage	59° 30′ N. 19° 05′ E. 59° 45′ N. 19° 14′ E.	59° 17′ N. 18° 54′ E.	
(b) Suitable anchorages	2 – 4 n.m. N.N.W. of Simpnasklubb	2 – 4 n.m. E. and S. of Revengegrund	6 – 8 n.m. S.S.E. of Landsort
(c) Depth	33 – 38 fathoms	11 – 22 fathoms	11 – 16 fathoms

RESTRICTIONS: Very large passenger vessels and fully-loaded tankers of approx. 15,000 d.w.t. or over not allowed pass through Skerries during darkness.

Ships with gross tonnage exceeding 400 tons must proceed only on an Easterly course in Lindalssundet. Ships with gross tonnage exceeding 400 tons must not proceed through Kodjupet and Sandhamnssundet (between Sandon and Korso).

Tankers with gross tonnage exceeding 22,000 tons must be accompanied by a tug through the Archipelago to Stockholm and nearby ports.

Ships with a gross tonnage exceeding 400 tons, not using a Pilot, must be equipped with VHF telephone which must be continuously watched on Channel 16 and 9.

A vessel reporting system has been established covering the entrances to the Port of Stockholm. Vessels over 300 g.r.t. report to Stockholm Pilot Station ("Lotsarna Stockholm") when passing way points. Reports to be given by VHF Channel 9.

Tankships with gross tonnage exceeding 800 tons carrying crude oil products, mineral oil and certain chemicals must have licensed Pilot in the passages Arholma-Stockholm; Soderarm-Stockholm; Sandhamn-Stockholm; Landsort-Stockholm; Landsort-Nynashamn; Landsort-Sodertalje and in the Lake of Malaren.

MAX. SIZE:

Max. Dimensions Passenger – or Dry Cargo Ships

DAYLIGHT

	LOA (m.)	*Beam (m.)*	*g.r.t.*	*Draft (m.)*
Sandhamn	245.0	35.0	43,000	11.0
Dalaro/Langgarn	185.0	26.0	18,000	10.0
Furusund/Soderarm	185.0	26.0	18,000	7.0
Gustavsberg	60.0	9.5	—	4.2

Ships larger than 30,000 g.r.t. or longer than 215 m. to be assisted by 2 Pilots and to have assistance of tugs through the Archipelago.

DARKNESS

	LOA (m.)	*Beam (m.)*	*g.r.t.*	*Draft (m.)*

---

* Different heights of the water refer to the Swedish State Measure Datum.

** Besides the quay cranes there is a pontoon crane of 260 tons lifting capacity, with own propelling machinery. The number of cranes is thus 21. In addition to these there are some cranes in private ownership. The port also owns a floating link-span.

HEALTH: Vessels arriving from ports outside Europe must for Inward Clearance provide Customs Office with written Declaration of Freedom from Infection. Further instructions will be issued by Customs Office when such a Declaration cannot be given.
RADIO: Stockholm Radio, call sign SDJ.
RADAR/VHF: All 3 pilot stations have radar for internal use. No harbour radar service. VHF Channels 16 and 12. Also see "Restrictions".
TUGS: Very large vessels may be met by tugs by special arrangement at pilot boarding point. Tugs available to special order to assist with berthing; they rendezvous usually near berth.
Rates: According to fixed tariff.
BRIDGES:

HOURS FOR OPENING FOR MOVABLE ROAD BRIDGES OVER HAMMARBY SEALANE

Movable parts of road bridges over sealane of Hammarby opened on request for vessel unable freely to pass under the bridges, all through the year at regular hours.
STEVEDORES: Stevedores available from Stockholms Hamngods AB. Tel: 08/6635500. Working hours 0700 – 0900, 0930 – 1100, 1115 – 1330 and 1400 – 1600. Stevedores required for 0700 hrs. must be booked previous day.
MEDICAL: Duty Medical Officer available all hours day or night. Tel: Stockholm 21 55 49, 11 83 31 or 20 30 91. Seamen admitted to hospital with note from Medical Officer for Seamen, but not necessary for emergency admissions. Valid certificates of vaccination must be produced. Any necessary vaccinations carried out by Medical Officer for Seamen.
TANKERS:

Quay	*No. of Berths*	*Max. d.w.t.*	*Depth alongside* (ft. in.)	*Diameter of Discharge Pipe-lines* (in.)
Bergs (Esso)	1	65,000	43 00	12 – 20
Flaxenvik (Powerboard)	1	30,000	35 08	12
Gashaga	2	50,000	34 01 – 35 08	6 – 12
Kvarnholmen	2	30 – 65,000	33 00 – 39 04	8 – 14
Loudden (Municipal)	5	25 – 60,000	33 02 – 39 00	6 – 12
Rasta (Shell)	1	38,000	37 08	8 – 10
Vartan (Esso/Shell)	3	20 – 60,000	24 08 – 36 00	8 – 10

DENSITY: Salt content of 0.5%. No variations.
FRESH WATER: Fresh water may be obtained from quayside. 1,000 cu.ft./hr. can be delivered from quayside. At Loudden max. 3,500 cu.ft./hr. can be delivered.
FUEL: All grades bunker oil, lubricating oil, etc. can be supplied.
GANGWAY/DECK WATCHMEN: Not essential, but recommended for large tankers.
OPENING/CLOSING HATCHES: If opened and closed by stevedores, subject to extra fee.
CERTIFICATES:

Tonnage Certificate.
Certificate of Nationality.
Derat Certificate not more than 6 months old.
Ship's articles, Crew List or similar document listing all persons signed on aboard.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per person per week or 200 g. (7 oz.) of tobacco per person per week. Wine and/or spirit: One bottle of spirits per person per week, one bottle of wine per person per week.
CARGO GEAR: Cargo vessels carrying goods which constitute a fire or explosion hazard or other flammable or otherwise dangerous goods must notify Port Authorities in advance the nature and quantity of goods concerned. In certain cases a red flag or red light must be carried at mast head.
IDENTIFICATION CARDS: Passport or Seaman's Discharge Book with photograph.

REPAIRS: All types of deck and machinery repairs can be carried out.
DRY DOCKS: Finnboda Varf, Tel: 08-440820. 5 floating docks, capacity 250; 1,000; 1,500; 8,000 and 28,500 tonnes.
REPATRIATION: Crewmen may be signed-on and paid-off. Whether paid-off crewmen will be allowed to remain in the country and seek new employment, depends on existing bi-lateral agreements between countries. Generally, only a citizen of a Scandinavian country may seek work in Sweden without a special labour permit.
AIRPORT: Arlanda, approx. 22 miles from central Stockholm. Served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day (January 1st); Epiphany (January 6th); Good Friday (variable Friday in March/April); Easter Monday (variable Monday in March/April); May 1st; Ascension Day (variable Thursday in May/June); Whit Monday (variable Monday in May/June); Midsummer Day (variable Saturday in June); All Saints' Day (first Saturday in November); Christmas Day (December 25th); Boxing Day (December 26th). No work is normally done on these days.
POLICE/AMBULANCE/FIRE: Tel: 90 000.
TELEPHONES: Ship-to-shore telephone connections can be provided at most quays.
SERVICES: Electric current can be laid on at some quays. Port is responsible for collection of oil residues. Licensed compass adjusters available.
SHORE LEAVE: No restrictions.
DELAYS: Occasionally shortage of stevedores. Some delay may be caused by ice, but port kept permanently open by ice-breakers.
AUTHORITY: Stockholms Hamn, P.O.Box 27314, S-10254 Stockholm. *Tel:* 08/635500. *Telex:* 10612. *Cables:* Capitalport. *Contact:* Thomas Krokstedt, Harbour Master.

STORUGNS, Gotland Is.: 57.50 N. 18.48 E. **(See Plan)**

Situated on Eastside of Bay of Kappelshamn on the North coast of Gotland.
DOCUMENTS: Vessels arriving from foreign ports shall have the following documents:

1 Crew Manifest.
1 Stores List.
3 Crew Lists.
Tonnage Certificate.
Certificate of Nationality.
Declaration of Health (Derat Certificate), not older than 6 months. Not applicable to vessels from Scandinavian ports.

NOTICE OF ARRIVAL: On which the loading turn number is based, should be given when the vessel has passed Lat. 57° 52′ N. The notice can be given by VHF (Storugns Harbour Radio).
Vessels may not berth without permission of the Company.
PILOTAGE: Pilot boards in the outer approaches and should be ordered at least 5 hours in advance by Tel: 0498/27010 (Storugns) or 10138 (Visby). Pilots keep watch on VHF Channel 16.
ANCHORAGES: With good holding ground. Vessels waiting in the roads should keep watch on VHF Channel 16 during ordinary harbour working hours.

Ships lying in the roads shall anchor so that in-going and out-going vessels can pass without hindrance or risk. Anchoring in Kappelshamnsviken in the area between Lat. 57° 51′ N. and an E.W. line 200 m. South of the quay's Southernmost point is prohibited unless permission is obtained from the Company.
Prohibited Anchorage: See "Plan".

RESTRICTIONS: The harbour can be entered at all times regardless of wind direction except during strong Northerly winds.

The bay is normally ice-free. During exceptionally cold spells with Northerly winds traffic may be temporarily stopped or hindered by ice-floes.

MAX. SIZE: Depth at entrance and at quay 10 m. Vessels up to 20,000 tons have loaded to full draft. Max. draft 9.2 m.

HEALTH: No restrictions provided no disease or fever on board and vessel not arriving from port where disease or fever in existence.

RADIO: 96 and 24 hours before vessel's ETA preliminary notice must be given to the Company. Changes of ETA exceeding 10% of the remaining time must be reported. It is, however, not necessary to report changes of less than 1 hour. The Company may under special circumstances waive the obligation to give 96 hour notice.

On the arrival of a vessel in the harbour area notice of arrival must be given either in writing, or by telephone 0498/27160 or by VHF radio. In respect of notice of arrival the harbour area is Kappelshamnsviken South of Lat. 57° 52′ N. If a vessel, owing to bad weather or for any other reason cannot safely lie within the harbour area, the Company may accept notice of arrival from vessel North of above mentioned latitude.

Between 0500 and 2230 hrs. vessels waiting in the roads shall keep watch on VHF radio or, if the vessel is not equipped with such, on the ordinary radio.

Coastal Radio Stations: Stockholm Radio and Tingstade Radio (Tingstade Radio, radio telegrams only).

VHF: Storugns Harbour Radio VHF Channels 16 and 9.

TUGS: Rederi AB Gute. Tel: 0498-23000. On the island of Gotland.

BERTHING: The harbour which is situated on the Eastern side of Kappelhamsviken is intended solely for the loading of limestone which is obtained from the nearby quarry. The Gotland limestone, which is of high purity and has a very low percentage of impurities, is used in cellulose, sugar, metallurgic and chemical industries, and in iron production.

The limestone is delivered in 11 different grades. The density is 2.5/2.6 tons/cu.m.

The stowage factor varies between 17 and 26 (17 – 18 for grades 0 – 3 mm., 23 – 26 for grades between 3 and 120 mm., and 20 – 24 for grades above 120 mm.).

Quay	*Length*		*Depth*
Quay 1 outside	140 m.	outside	9.5 m.
inside	120 m.	inside	7.0 m.
Quay 2	48 m. (no loading)		5.0 m.
Quay 3	110 m.	outer	7.0 m.
		inner	6.0 m.

Boatmen: Vessels with Pilots on board need not order boatmen. Other vessels can obtain boatmen service through their Agents or by calling the boatmen service firm "Trossvakt" on Tel: 0498/254 33 or over VHF Channel 16. Booking should be done at least 2 hours before ETA. Shipper/NordKalk AB cannot offer boatmen service.

BULK HANDLING FACILITIES: The loading elevators are movable along their respective quays. The capacity on Quay 1 is about 500 – 1,000 t.p.h and on Quay 3 about 300 – 600 t.p.h.

Shipmaster's Report: 1979. Loading rate 967.5 t.p.h.

Cleaning of holds, discharging of ballast and opening of hatches shall be carried out in sufficient time to avoid delays in loading. The loading should be so planned that shifting of the vessel and loading elevators can be avoided as far as possible.

STEVEDORES: Normal working hours are Monday-Thursday 0530 – 2230 hrs. and Friday 0530 – 1830 hrs. Overtime working to complete loading is available to a limited degree, as is loading on Saturdays and Sundays. Vessels requiring overtime loading Saturday/Sunday must give notice not later than Friday 1100 hrs.

During ordinary working hours vessels are loaded by turn. The turn is based upon the time of notice of arrival.

MEDICAL: Central hospital at Visby.

FRESH WATER: Not available.

FUEL: Most grades available from Visby subject prior notice.

GANGWAY/DECK WATCHMEN: Not compulsory but available.

OPENING/CLOSING HATCHES: Ship's crew open and close.

CUSTOMS ALLOWANCES: Presently 200 cigarettes per head/week. Practically no spirits allowed out of bond.

IDENTIFICATION CARDS: Seaman's Book or passport if travelling outside port area.

CONSULS: Nearest consuls at Visby for Denmark, Finland, Norway and Germany F.R.

REPAIRS: Only minor repairs possible.

DRY DOCKS: None.

REPATRIATION: Good possibilities for changing crew.

AIRPORT: Visby.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

SHORE LEAVE: Permitted.

POLICE/AMBULANCE/FIRE: Tel: 90 000.

AUTHORITY: NordKalk AB, Storugns, S-620 34 Laerbro, Sweden. *Tel:* 0498-27100. *Telex:* 4150 Nkalk S. *Contact:* Bjoern Mathiasson.

STROMSTAD: 58.56 N. 11.10 E.

DOCUMENTS/PILOTAGE: See "Stockholm".

ANCHORAGES: Available within port for vessels up to and including 3,000 d.w.t.

MAX. SIZE: Cargo ships (not tankers), max. 3,000 d.w.t.

BERTHING: No particular restrictions for berthing within the port.

FRESH WATER: Available.

FUEL: No~~ne~~ available. T

GANGWAY/DECK WATCHMEN: Necessary.

OPENING/CLOSING HATCHES: Carried out by crew.

IDENTIFICATION CARDS: Needed.

CONSULS: Norway: Bertil Alen, Hjartagatan 13.

REPAIRS: Repairs possible.

REPATRIATION: Facilities exist for effecting crew changes.

AIRPORT: Landvetter (Gothenburg). Distance: 200 km. There is also a local taxiplane.

HOLIDAYS: Cargo work cannot be arranged on holidays.

POLICE/AMBULANCE/FIRE: Police 12530; Ambulance 90000 (ask for ambulance); Fire 90000.

TELEPHONES: No arrangements exist for placing telephones on board.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

DELAYS: No delays in load or discharge.

AUTHORITY: Hamnforvaltningen Stromstad.

SUNDSVALL: 62.25 N. 17.20 E. (See Plan)

DOCUMENTS:

3 copies Crew Lists.
3 copies Passenger Lists (if passengers onboard only).
2 copies Crew Declaration on tobacco, liqueur, cigarettes and spirit, etc.
2 copies Ship's Stores List.
1 copy Cargo Declaration.
Derat Certificate.
Tonnage Certificate.
Register.
Swedish Light Dues.
Manifest and/or Bill of Lading.

PILOTAGE: Pilot station (Tel: 060-58 60 00/7) at Spikarna Southern Point of Alno Island VHF Channel 16. For communication and instructions Channel 13.

Pilot boarding from pilot cutter 2.5 miles East of Gubben Lighthouse in position Lat. 62° 21′ N., Long. 17° 40′ E.

Entrance passage Gubben Light – Spikarna – Draghallan Light all 14 m. deep.

ANCHORAGES: Between islands of Tjufholmen and Alno and also in Svartvik Bay.

MAX. SIZE: See "Berthing".

RADIO: Cable Agents giving ETA, draft and cash requirements either via Hernosand Radio SAH or Stockholm Radio SDJ. At least 24 hours' notice required. Change in ETA to be given at least 5 hours before ETA Pilot.

TUGS: Available, ordered by Agent. Compulsory at Sundsvall Oil Terminal for tankers of more than 10,000 d.w.t.

BERTHING: Around the clock berthing. No restrictions except draft. Following drafts (fresh water) accepted in Sundsvall and adjacent ports.

Kubikenborg: Lat. 62° 22.7′ N., Long. 17° 22′ E.

Length of quay 150 m. Max. length 192 m. Max. draft 10.5 m. 1 shorecrane, capacity 5 tons. 1 suction-installation, capacity 150 t.p.h. Pilot distance 12 nautical miles. Distance from Sundsvall Town 4 km.

Ortviken: Lat. 62° 23.8′ N., Long. 17° 21.8′ E.

Oil Berth: Quay length 140 m. Max. draft at max. 200 m. length is 10.8 m. Pilot distance 12 nautical miles. Distance from Sundsvall Town 4 km.

Ostrand: Lat. 62° 29′ N., Long. 17° 21′ E.

Oil Berth: Tankers berthed outside a steel barge, max. LOA 200 m., max. draft 7 m. Pilot distance 17 nautical miles. Distance from Sundsvall Town 15 km.

Soraker: Lat. 62° 30.5′ N., Long. 17° 30′ E.

Length of quay 150 m. Max. LOA 90 m. Max. draft 5.8 m. 1 shore crane, capacity 10 tons. Pilot distance 11 nautical miles (East of the Alno Island). Pilot distance 20 nautical miles (West of the Alno Island). Distance from Sundsvall Town 34 km.

Stockvik: Lat. 62° 20′ N., Long. 17° 22′ E.

Length of quay 190 m. Max. draft 7 m. 3 shore cranes, capacity 6 tons each. Pilot distance 10 nautical miles. Distance from Sundsvall Town 9 km.

Sundsvall Town Quay: Lat. 62° 23.5′ N., Long. 17° 19.5′ E.

1 Berth:	Length 90 m. Max. draft 7.8 m.
1 Berth:	Length 175 m. Max. draft 5 m. – 7 m.
1 Ferry/Ro-Ro Berth:	Max. beam 15 m. Max. draft 7.5 m.

No cargo is handled on Sundsvall Town Quay. Pilot distance 12 nautical miles.

Sundsvall Oil Berth: (Vindskarsudde) Lat. 62° 23.2′ N., Long. 17° 21.8′ E.

Length of quay 100 m. Max. LOA 250 m. Max. draft 11.3 m. Max. d.w.t. 70,000. 3 swinging arms, each of 10 in. dimension. Pilot distance 12 nautical miles. Distance from Sundsvall Town 3 km. Vessels berth port side to.

Svartvik: Lat. 62° 19′ N., Long. 17° 22′ E.

Length of quay 140 m. Max. draft at 100 m. length is 6.5 m. Distance from Sundsvall Town 11 km.

Port of Sundsvall (Tunadalshamnen): Lat. 62° 25′ N., Long. 17° 23′ E. Length of quay 450 m. Max. draft 9.2 m. 3 shore cranes, capacity 10 tons – 20 tons. Additional berth: Length of quay 200 m. Max. draft 12.6 m. Pilot distance 13 nautical miles. Distance from Sundsvall Town 7 km.

Ro/Ro Berth: Max. beam 30 m. Max draft 9.2 m.

Tunadal Sawmill: Lat. 62° 25′ N., Long. 17° 23′ E. Length of quay 195 m. Max. draft at 80 m. length is 7 m. Pilot distance 13 nautical miles. Distance from Sundsvall Town 7 km.

Vivstavarv: Lat. 62° 29′ N., Long. 17° 28′ E. Length of quay 160 m. Max. draft 7.3 m. Pilot distance 17 nautical miles. Distance from Sundsvall Town 18 km.

MEDICAL: First class medical attention and dental care available.

TANKERS: See "Berthing".

STEVEDORES:
Ordinary working hours Monday – Friday 0700 – 1600 hrs.
Overtime on Saturdays 0700 – 1330 hrs. at 100% additional cost.

CRANES: 3 cranes available 10 – 20 ton. At Tunadalshamnen cargo is also handled by mobile cranes. Also see "Berthing".

CUSTOMS ALLOWANCES: See "Stockholm".

DENSITY: Nearly fresh, 1005.

FRESH WATER: Supplied at Sundsvall, Kubikenborg, Stockvik and Tunadal.

FUEL: All grades delivered. Notice must be given in good time, since these installations normally close down at weekends.

SHIP WATCHMEN AND SHIP'S TELEPHONE: Available. Compulsory at oil terminals only.

CONSULS: Finland, Germany F.R., Iceland, Netherlands, Norway.

REPAIRS: Most repairs possible through local repair shops.

DRY DOCKS: Lunde Varv outside Kramfors.

SURVEYORS: Cargo inspectors available through Sundsvall Control Service or Lloyd's Agency for cargo or vessel.
Surveyors available from Stockholm in most cases. Call Agents for details at time.

AIRPORT: International airport 22 km. outside town. Good facilities to effect repatriation.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Tel: 90 000.

EMERGENCY CO-ORDINATION CENTRE: Tel: 90 000 giving full details of situation or call Harnosand Coast Radio Station VHF or MF.

STORING: Vessels stored by truck only, through assistance of stevedores and forklifts. Can be done close alongside ship.

GENERAL: *Dangerous Cargo:* Ships carrying dangerous cargo must notify Port Authorities in advance of nature, quantity and IMO code number of goods concerned.
Wintertime: Ice-breaker service available if needed (Wintertime December to April).

AUTHORITY: Sundsvalls Hamnforvaltning, Hamnplan 4, S-851 85 Sundsvall, Sweden. *Tel:* (060) 19 10 00. *Contact:* Sten Lundell, Harbour Master, Tel: (060) 19 15 91.

TRELLEBORG: 55.21 N. 13.09 E. (See Plan)

DOCUMENTS: See "Stockholm".

PILOTAGE: Available day and night. To obtain Harbour Pilot report 5 hours in advance. To obtain outward Pilot report 24 hours in advance of departure. Meet inward-bound ships on Roads with motor boat. Outward-bound Pilot obtained from pilot station of Malmo. Tel: 040-115269, 040-978315. Pilot boats provided with short-wave radio telephone. Also see "Stockholm".

ANCHORAGES: Recommended West of entrance fairway between Fairway Buoy and No. 1 Light Buoy. Depth varies from 7 m. – 14 m. Anchor ground good – clay and sand.

RESTRICTIONS: Entrance a straight, perch-buoyed fairway of about 1,300 m. length, having measured depth of 8.5 m., and a bottom width of 100 m. Distance between moles (outer – 125 m.) and (inner – 96 m.)

HEALTH: See "Stockholm".

VHF: Port and pilot station on Channels 16 and 9.

TUGS: Tug-boats can be obtained promptly from Malmo.

BERTHING: New Harbour has depth of 8 m. with quay on Northern side of basin. It is 1,640 ft. long and served by 1 bridge crane (6.2 tons) and 1 mobile crane of 36 tons. Western Harbour Basin has depth of 7 m. in Western and Northern part and 8 m. in Eastern part. Eastern Harbour Basin has depth of 8.0 m. Oil Quay 230 ft. long, depth at quay of 8 m. is situated on Southern side of New Harbour. Tankers of max. length 570 ft. can approach this quay. From oil harbour area direct importation of oils is made to the Trelleborgs Gummifabriks AB (Trelleborg Rubber Factory Ltd.). Five berths equipped for Ro/Ro traffic.

STEVEDORES: Available (Tel: 43135).

FRESH WATER: Available on all quays at request to Harbour Office.

FUEL: All grades bunker oils supplied at oil quay through direct pipe-line from sea depot. Order on phone Trelleborg 107 76.

REPAIRS: Available through private firms. Tel: Trelleborg 150 60, 109 66 or 124 50.

CONSULS: Denmark, Finland, Norway and West Germany.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

TELEPHONES: Ship's telephone available at Oil Quay, Tel: 148 28, and at the Harbour Bridge, Tel: 147 67. Order is made through Harbour Office.

SERVICES: Divers available through the Harbour Office. Refuse containers can be hired.

AUTHORITY: Trelleborgs Hamn, Box 26, 23101 Trelleborg, Sweden. *Tel:* 0410-53900. *Contact:* Karl-Axel Green, Harbour Master.

UDDEVALLA (including Froland): 58.21 N. 11.56 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
Health Document. Derat Certificate when ship arrives from abroad, except from Denmark, Norway and Finland.
3 Manifests.
1 copy of Bill of Lading.
Tonnage Certificate.
Nationality Certificate.
2 Crew Effects Declarations.
2 Ship's Stores Declaration.
1 Declaration of Living Animals (if any).

PILOTAGE: Pilotage at Marstrand. Address "Marstrand Pilotstation". Required ETA 5 hours. VHF 16 and 11. Pilot boat S.W. of Hatteberget Lighthouse (Lat. 57° 51.8′ N., Long. 11° 27.65′ E). (Also see "Stockholm".)

MAX. SIZE: Draft 11 m., airdraft 43 m.
Bado Quay: Max. LOA 180 m. Max. draft 9.0 m. (MLW).

HEALTH: Cable to Agent and he will arrange with Health Authorities.

RADIO: SAG. Gothenburg Radio (Goteborg Radio).

RADAR/VHF: No port radar service, VHF Channels 16, 11 and (working channel) 14.

TUGS: 3 Tugs up to 3,200 h.p. available. Can be ordered through Pilot or Agent.

BERTHING: Depths alongside (at MW) as follows:

	Length (m.)	*Depth* (m.)
Skeppsholm Quay	340	10.7 – 11.2
Bado Quay	430	6.0 – 9.5
Bave Quay	180	7.0
Skans Quay	180	6.0
Thule Quay	105	4.0
Juno Quay	200	6.0
Froland	225	12.0
Kasen – K1	200	5.0–6.0
K2	200	5.0
K3	260	5.0–9.0
Sorvik – K6	250	10.8

CARGO HANDLING FACILITIES:
Skeppsholmspiren: 6 electric cranes of 12 to 35 tons capacity. Warehouse of 3,500 sq.m. Very large storage areas. 1 berth equipped for Ro-Ro traffic. Container handling facilities improved during 1987.
Bado Quay: 7 electric cranes with capacities of 7 – 12 tons. 16,000 sq.m. of warehouses and 20,000 sq.m. of storage. 2 silos for grain owned by private companies.
Bave Quay: 1 electric crane with capacity of 12 tons. 3,400 sq.m. of warehouse and 14,000 sq.m. of storage.
Froland: (Lat. 58° 20′ N., Long 11° 52′ E.) Total length 225 m., depth alongside 12 m., 3 electric cranes with capacities of 35 tons, 35,000 sq.m. of storage. One berth equipped for Ro/Ro traffic, depth 8.0 m., 2 conveyor belts 500 t.p.h. – 800 t.p.h. This berth is specially constructed to handle the loading/unloading of bulk cargo.
Also see "Developments".

STEVEDORES: Arranged by Agent.

TANKERS: Draft in the Skeppsviken Oilport, 10.7 m.; at the Bado Oilport, 9.5 m.

FRESH WATER: Available at all quays.

FUEL: All grades available.

FIRE PRECAUTIONS: Watchmen necessary when loading or discharging oils by pipe-lines.

GANGWAY/DECK WATCHMAN: Watchman accepted by Harbour and Fire Authorities on vessels loaded with explosives.

OPENING/CLOSING HATCHES: Preferably by crew. Can be arranged by stevedores.

CERTIFICATES: Tonnage Certificate, Nationality Certificate, Derat Certificate.

CUSTOMS ALLOWANCES: 100 cigarettes/250 gm. tobacco, 1 bottle of spirits, 1 litre of wine and 10 beers for each man (every 10 days) as a normal quantity. Possible to be increased for Master.

IDENTIFICATION CARDS: Not required.

CONSULS:

Barbados	Tel: 738 54	Netherlands	Tel: 144 60
Germany F.R.	Tel: 360 00	Norway	Tel: 353 71

REPAIRS: Facilities available.

SURVEYORS: All kinds of cargo inspectors and surveyors available.

REPATRIATION: In accordance with instructions of Consul.

AIRPORT: Gothenburg, 100 km.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE/FIRE: Police Tel: 90 000; Ambulance Tel: 90 000; Fire Tel: 90 000.

EMERGENCY CO-ORDINATION CENTRE: Dial telephone number 90 000 for Fire/Ambulance/Police.

TELEPHONES: Available for placing on board.

SERVICES: Compass adjusters and ship's chandler available.

BANKS: Gotabanken, Kungsgatan 15, 451 30 Uddevalla. Tel: 0522-143 50. Telex: Stockholm 19420 Gotban S. Goteborg 21750 Gotban S.

PK-Banken, Kungsgatan 7, Box 373, 451 19 Uddevalla. Tel: 0522-361 00. Telex: Stockholm 19310 Pkbank S. Goteborg 2562 Pkgot S.

Skandinaviska Enskilda Banken, Kungsgatan 12. Box 136. 451 16 Uddevalla. Tel: 0522-363 10. Telex: Stockholm 11000 Essebh S., Goteborg 21020 Essebg S.

Svenska Handelsbanken, Kungsgatan 10, 451 30 Uddevalla. Tel: 0522-363 30. Telex: Stockholm 11090 Handst S., Goteborg 27500 Handgb S.

Foreningsbanken Uddevalla, N. Drottninggatan 12, Box 251, 451 17 Uddevalla. Tel. 0522–143 80.

STORING: See "Prelims".

1. Vessel can be stored by barge or truck.
2. Before storing the Port Authority must be contacted.
3. Trucks can proceed alongside at every berth.
4. Fork lift can be used.
5. Storing under Customs supervision.
6. Local riggers can be employed.

SHORE LEAVE: No restrictions.

DEVELOPMENTS: Storage area at Froland to be extended by 20,000 sq.m. during 1988-89.

Storage area at Sorvik and Kasen to be extended by 100,000 sq. m. and 15,000 sq. m. respectively during 1988.

AUTHORITY: Uddevalla Hamn, Box 504, 451 21 Uddevalla, Sweden. *Tel:* 0522-147 70. *Telex:* 42269 Uddport S. *Contact:* Mr. Morgan Lexberg, Traffic Manager.

UMEA: 63.49 N. 20.16 E. (See Plan)

DOCUMENTS:

Ship's Documents:

Tonnage Certificate.
Certificate of Nationality.
Derat Certificate (not older than 6 months).

Supplied by Master on arrival:

1 copy of each Manifest.
1 copy of each Bill of Lading.

Supplied by Agent and signed by the Master on arrival from foreign ports:

1 Maritime Declaration of Health.
3 Crew Lists (one set).
2 Passenger Lists (one set).
1 Crew Effects Declaration.
2 Ship's Stores Declarations.
2 Cargo Declarations.
4 Reports of Arrival.
1 Declaration of Living Animals (if any) (supplied by the Customs Officer).

Furthermore on arrival from any port:

1 Report of Arrival, with double net tons, if applicable (Harbour Office).
1 Passenger List (if any in transit).
1 Crew List.

On departure to a Foreign Port:

5 Reports of Departure.

PILOTAGE: Umea Pilot Station: Bredskar. Tel: 090-41622 and 090-40372. Telegraphic address "Pilotstation Umea".

At least 5 hours' advance notice of ETA at pilot station, stating time and pilot station and destination, can be given over any Swedish coastal radio station or free of charge on VHF over any Swedish pilot station and some lighthouses.

Pilot station and pilot boats fitted with VHF Channel 16 – calling and safety; Channel 13 – pilotage and traffic; Channel 12 – spare Channel.

All pilot boats orange with flag "H" and equipped with radar.

Boarding point, Lat. 63° 36.5′ N., Long. 20° 25.5′ E., 1.0 nautical miles 145° (T) from Vaktaren Lighthouse. In case of bad weather, in the fairway, closer to the pilot station.

Anchorage for vessels awaiting Pilot: Lat. 63° 36′ N., Long. 20° 28′ E., 1.5 nautical miles S.E. of Vaktaren Lighthouse. Depth 18 m. to 30 m.

ANCHORAGES: See "Pilotage".

Osterfjarden roadstead between Umea Hamn and Obbola. Length about 2,800 m. and about 400 m. wide, midstream in River Umea. To the North and South of Lat. 63° 42.3′ N., Long. 20° 21.0′ E. and with a depth of 12 m. to 22 m.

Anchorage is forbidden around position Lat. 63° 40.5′ N., Long. 20° 20.0′ E.

Cables and fresh water pipe-line on Osterfjarden roadstead passing East-West around Lat. 63° 42.5′ N.

RESTRICTIONS: Entry permitted during darkness, for tankers, not more than 13,000 d.w.t. and a max. draft of 7.62 m., and dry cargo vessels with a draft not exceeding 8.53 m.

During unsuitable weather conditions, according to the Pilot on duty. Tankers exceeding 1,600 g.r.t. and with a cargo of mineral oil products and other dangerous cargoes, must take a Pilot.

MAX. SIZE: Max. depth and max. permissible draft (at MW) in the fairway as follows:

The fairway to:	*Maximum draft* (m.)	*Depth* (m.)
Ferry Station No. 1-2	7.6	6.0
Ferry Station No. 3	9.7	7.0
Stormskar Oil Berth and Obbola	9.7	
Holmsund Oil Jetty	5.5	
Umea Inner Harbour and Gimonas Oil Jetty	3.0	

No tide.

HEALTH: Free Pratique automatically for ships arriving from non-infected areas. In event of any suspected disease or fever on board notify the Agent, who will give necessary directions. It is possible to send a telegraphic message to "Sanitary Authority, Umea" containing state of health on board, in ordinary items or code. (Also see "Documents").

RADIO: Harnosands Radio (SAH) on 2182 kHz or on VHF Channel 23-26 or 28 (depending on ship's position).

Port Radio: Umea Port Radio keeps watch, Monday to Friday, 0600 – 1500 hrs. on VHF Channel 16. Working Channels 11 and 13. At other times Umea Pilot Station. No port radar service, but Umea Pilot Station and the pilot boats are equipped with VHF and can assist on request.

TUGS: Normally necessary only for larger tankers when berthing. Tugs join vessels just off the jetty. Ship's lines always used.

BERTHING: Depth alongside (at MW) as follows:

Umea Outport	*Depth* (m.)
Ferry Stations	
No. 1 Hillskar	6.0
No. 2 Hillskar	7.0
No. 3 Truthallan	7.0
Oil Berth, Stormskar	11.0
Pilot Berth	5.3
South Quay, Berth Nos. 9 to 10	11.0
Pier Quay, Berth Nos. 7 to 8	9.0
North Quay, Berth Nos. 2 to 6	7.0
North Quay, Berth Nos. 1 to 2	6.0

CRANES:

North Quay: 1 crane, 2 – 5.0 tons and 1 mobile crane 36 tons.
Pier Quay: 3 cranes, 3 – 7.5 tons.
South Quay: 1 crane of 40 tons.
Ferry Station No. 3: 1 crane 3 – 5 tons.

TANKERS: Oil berths at Port of Umea.

Stormskar: Depth 11 m. Reducing pieces for all diameters between 6 in. and 12 in. and all types of flanges available. One crane for handling hoses. Max. LOA 215 m., max. beam 30.0 m., max. draft 9.7 m. (channel limitation at MLW is 9.2 m.) Max. d.w.t. 42,000. Vessels usually berth starboard side to.

Obbola: Oil Jetty, depth 11.0 m. Max. LOA 200 m., max. draft 9.7 m. (channel limitation at MLW is 9.2 m.). Max. d.w.t. 40,000. Vessels berth port side to.

DENSITY: Nearly fresh water.

STEVEDORES: Holmsunds Stuveri AB. Tel. 090-40970. To be ordered before 1300 hrs. local time, day before gangs required. For work on Saturdays, Sundays, and holidays, special regulations.

Working hours: Monday to Friday 0600 – 1500 hrs., meal hour 1000 – 1100 hrs. Coffee breaks 0800 – 0810 hrs.; 1300 – 1310 hrs.

MEDICAL: All kinds of medical attention and hospital facilities available. Notify Agent as soon as possible.

FRESH WATER: Delivered from water posts in Port of Umea at Ferry Station No. 1, Oil Berth, Berth Nos. 1 – 10 and in Umea Inner Harbour.

FUEL: All kinds and grades of fuel oil available in Port of Umea. Bunkering at Berths 1 – 10 possible during normal loading or unloading from pipe-line. At Ferry Station Nos. 1 and 2 and the Oil Berth also bunkering from pipe-line. Fuel can also be delivered from lorries. Notice as early as possible.

FIRE PRECAUTIONS: Security watchmen from Port of Umea while alongside the Oil Berth. Alarm regulations in writing will be delivered on arrival.

GANGWAY/DECK WATCHMAN: Available but not compulsory except for tankers.

OPENING/CLOSING HATCHES: Can be done by stevedores if necessary, except patent hatches.

CUSTOMS ALLOWANCES: *Tobacco:* 200 cigarettes or 250 grammes of tobacco (7 ozs.)

Spirits and Wine: 1 bottle of each (1 litre), minimum age 20 years.

Above mentioned quantities are per crew member and per week in Sweden. After a week quantities are taken out after request to the Customs Office.

IDENTIFICATION CARDS: Not required. Seaman's Book sufficient.

CONSULS: Following countries have representatives in Umea: Denmark, Finland, Netherlands, Norway.

REPAIRS: Most deck and engine repairs.

REPATRIATION: Facilities exist for effecting crew changes and arranging repatriation.

AIRPORT: Umea, approx. 20 km. away, served by regular airlines.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day (1st January); Twelfth Day (6th January); Good Friday; Easter Monday; May Day (1st May); Whit-Sunday; Whit-Monday; Midsummer's Day (nearest Saturday to 24th June); All Saints' Day (1st Saturday in November); Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: Alarm central 90-000 and ask for service required.

TELEPHONES: Available for placing on board at Berths 1 – 10 and Oil Berth at Stormskar.

AUTHORITY: Umea Hamnforvaltning, Umea Hamn, S – 91300 Holmsund, Sweden. *Tel:* 090-163280. *FAX:* 090-23649. *Contact:* Per Ove Englund, Port Director.

VALLVIK: 61.11 N. 17.11 E. (See Plan)

DOCUMENTS: See "Stockholm".

PILOTAGE: Pilot station at Soderhamn (Ljusne Station).

ANCHORAGES: *(a)* Ljusne bight sheltered from West, North to N.E. winds, depths 6 to 8 fathoms. *(b)* North side of Storjungfrun Island sheltered from South to S.W. winds, depths 10 to 12 fathoms.

RESTRICTIONS: No direct restrictions. Ships of about 5,000 d.w.t. or more are recommended not to enter or leave the harbour in darkness (due to Pilot and weather conditions).

HEALTH: No special action except if suspected disease. In that case contact Agent.

LENGTH OF

MAX. SIZE: Max. draft in fairway 7.5 m. Loading pier is 200 m. Berthing possible on both sides.

East Side (from outer end):

Distance	Depth MWL (m.)
0 – 80 m.	8.3
80 – 85 m.	7.7
85 – 110 m.	7.2
110 – 140 m.	6.7
140 – 175 m.	5.8
175 – 195 m.	5.7
195 – 200 m.	5.2

West Side (from outer end):

Distance	Depth MWL (m.)
0 – 40 m.	7.6
40 – 70 m.	5.8
70 – 90 m.	5.5
90 – 140 m.	4.6

RADIO: Northward bound ships contact Stockholm Radio, Southward bound Harnosand Radio.
RADAR/VHF: No port radar service. There is a radar station at Ljusne. Pilot station and some of the pilot boats are fitted with radar. Master may contact Pilot by means of VHF Channels 16 and 13.
BERTHING: Ship's Agent keeps contact with Port Authorities.
STEVEDORES: Agent arranges required or available gangs according to the Shipmaster's wishes.
TANKERS: 10 in. diameter discharging hoses and pipe-line. Tanker berth at loading pier, 3 different connecting points.
FRESH WATER: Delivered by hose from quay. Rate about 8 t.p.h.
FUEL: Tanker lorries ordered through Agent, available with a few hours' notice.
GANGWAY/DECK WATCHMEN: Not necessary. If wanted, can be arranged.
OPENING/CLOSING HATCHES: Normally carried out by crew. Can be done by stevedores.
CARGO GEAR: Cargo gear certificates valid.
IDENTIFICATION CARDS: Not needed.
CONSULS: Danish, Dutch and French Consuls in Soderhamn.
REPAIRS: Machinery repairs, plate-work and welding can be carried out to a certain extent.
DRY DOCKS: None.
REPATRIATION: Facilities for crew changes available.
AIRPORT: Nearest airport Arlanda, about 15 miles North of Stockholm.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Soderhamn".
POLICE/AMBULANCE/FIRE: See "Soderhamn".
TELEPHONES: No arrangements for placing telephones on board. Telephone for ship's use available in Harbour Master's Office.
AUTHORITY: Vallviks Hamn, NCB-Vallvik, 82021 Vallvik, Sweden. *Tel:* 0270-69510. *Telex:* 47011. *Contact:* Benny Westin.

VARBERG: 57.07 N. 12.15 E. (See Plan)

DOCUMENTS:
Crew List.
Passenger List.
Maritime Declaration of Health (including Derat Certificate).
Ship's Certificate of Registry.
Manifests and B/L copies.
PILOTAGE: Application for Sea Pilot through ship's Agent. Telephone to Pilot station 0340/10300. Pilot to board vessel on the road about 0.5 nautical miles off Varberg. (Also see "Stockholm".)
ANCHORAGE: On the roads 33 ft. depth.
RESTRICTIONS: No tide or other entry restrictions.
MAX. SIZE: Length 170 m., breadth 25 m., draft 23 ft. No tide.
HEALTH: Vessel to be kept in quarantine if disease on board suspected.
RADIO: Gothenburg Radio, SAG. VHF Channels 16 and 26.
TUGS: Tugs to be ordered in advance.
STEVEDORES: Gangs to be ordered in advance through ship's Agent.
MEDICAL: Hospital facilities available. Desirable to give advance notice.
TANKERS: 1 tanker berth, max. draft 23 ft.
FRESH WATER: Available all docks 35 t.p.h.
FUEL: Fuel Oil No. 1 – 5 available from tank trucks.
FIRE PRECAUTIONS: Oil and petrol to be discharged under supervision of watchman.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: Generally done by stevedores.
CERTIFICATES: Certificate of Registry, Derat and also Crew List.
CUSTOMS ALLOWANCES: (Tobacco), 200 cigarettes per man. (Wine/Spirits), 1 bottle per man.
IDENTIFICATION CARDS: Not needed.
CONSULS:
Vice-Consul of Finland, Tel: 0340/16000
Vice-Consul of Netherland, Tel: 0340/16270
Vice-Consul of Denmark, Tel: 0340/16130
REPAIRS: Only minor repairs.
REPATRIATION: Can be effected.
AIRPORT: Nearest airport with regular airlines, Torslanda/Gothenburg, 50 miles North of Varberg.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Principal Swedish Holidays – when no cargo work is obtainable: New Year's Day; Good Friday; Easter Day; 2nd Easter Day; Labour Day (May 1st); Whitsun Day; 2nd Whitsun Day; Midsummer Day; All Saint's Day (November); Christmas Day; 2nd Christmas Day.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
TELEPHONES: Available on dock and one for placing on board.
DEVELOPMENTS: Planned increases of draft at the entrance to 9 m. = 29 ft. and in the harbour to 8 m. = 26 ft.
AUTHORITY: Port Authority of Varberg, Hamnkontoret, 43200 Varberg, Sweden. *Tel:* 0340-88526. *Contact:* Tore Gustavsson, Port Manager.

VASTERAS: 59.37 N. 16.33 E. (See Plan)

DOCUMENTS:
Ship's Register.
2 Crew Lists.
1 Tobacco List, signed by all hands on board.
1 Valid Derat Certificate.
1 copy of Manifest or Bill of Lading for each Swedish port of call.
Light dues receipts, if on board.
PILOTAGE: Incoming ships receive Pilot from Landsort. Pilot ordered by VHF Channel 16 or by RT. Pilot boats fitted with VHF. Give order 5 hours before Pilot required. Pilots meet ships about 2 nautical miles outside Landsort. Light and signals in accordance with the international rules. (Also see "Stockholm".)
ANCHORAGES: Within harbour area. Depth 9 m. – 10 m.
RESTRICTIONS: None. No tides.
MAX. SIZE: Vessels reach port through two deep navigable channels – through Sodertalje Ship Channel or via Stockholm through Hammarby Ship Canal. Least depth of channels at average water level is 7.3 m. (24 ft. 1 in.).
Sizes of Locks:

	Length	Width	Depth
Sodertalje	136 m.	20 m.	7.5 m.
Hammarby	115 m.	17.4 m.	7.0 m.

Limitation of Vessels: For Sodertalje: With beam of 18 m. max. draft 6.5 m. With beam of 17 m. max. draft 6.8 m. Max. LOA 124 m.
HEALTH: No special requirements or health documents, only valid Derat Certificate. Disease or fever on board must be declared before entering port.
RADIO: Stockholm Radio.
VHF: Harbour Office, VHF Channels 16 and 14, Monday-Friday 0800 – 1600 hrs. Traffic – Channel 11.
TUGS: 1 tug for unberthing. Ship's lines. Boatmen can be ordered via VHF Channel 16. Tug can be used as icebreaker.
BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Remarks*
Djuphamnskajen	660	7.6	2 jib cranes 12 tons – 33 tons 1 crane × 12 tons 3 cranes × 8 tons 1 crane × 5 tons 1 crane × 22 tons
Oljekajen	125	7.6	
Kolkajen (Ro/Ro)	120 plus dolphins	7.6	2 jib cranes 12 tons – 33 tons
Ostra Kajen	527	5.0 – 7.6	1 jib crane 25 tons 1 jib crane 12 tons-33 tons 4 cranes × 5 tons 1 heavy lift crane 210 tons
Lillakajen	120	7.6	2 cranes × 6 tons
Silokajen	130	7.3	1 loader, rate 750 t.p.h.
Tullhuskajen	483		

BRIDGES: 4 bridges. All of them to be opened at passage except bridge at Sodertalje which closed from 1630 – 1830 hrs. weekdays and 1300 – 1500 hrs. Saturday or day before a holiday.
STEVEDORES: Stevedores for next working day ordered by at least 1500 hrs. day before and ETA to be given in due time. Tel: 021-12 71 20.
MEDICAL: Necessary service given by local hospital and private doctors. Vaccinations carried out.
FRESH WATER: Ordered through Port Administration.
FUEL: Bunkering of all grades of oil can be carried out at all quays from trucks.
FIRE PRECAUTIONS: Accordance harbour regulations.
GANGWAY/DECK WATCHMEN: Can be obtained from shorewatch companies at different rates for night/day work.
OPENING/CLOSING HATCHES: Crew. Can be carried out by stevedores.
CERTIFICATES: Measurement certificate and all gear test certificates required, if ship's gear to be used.
CUSTOMS ALLOWANCES: (Tobacco), 200 cigarettes or 200 gm. tobacco. Additional allowance depending on expected stay in port and size of vessel. (Spirits), 1 bottle of 0.75 c.l. for each crew member over 21. Additional allowance on request.
IDENTIFICATION CARDS: None required.
CONSULS: Denmark, Finland and Norway.
REPAIRS: Most deck and engine repairs, as well as electrical.
DRY DOCKS: None.
REPATRIATION: Possible. Accommodation to be ordered in good time.
AIRPORT: Arlanda, 120 km. International lines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Stockholm".
POLICE/AMBULANCE/FIRE: Tel. 90000.
TELEPHONES: In oil and deep-water harbour, most quays fitted with telephones.
SERVICES: Compass adjusting. Small radio repairs by local radio men.
SHORE LEAVE: Crew can leave vessel after Customs clearance and Immigration control.
DEVELOPMENTS: Constant new development and extensions. Additional room for extension in old harbour, deep harbour and oil harbour.
AUTHORITY: Vasteras Hamn, Sigurdsgatan 1, Box 256, S-721 06 Vasteras, Sweden. *Tel:* 021-180100. *Telex:* 40916. *FAX:* 021–180656. *Contact:* Ingmar Gynt, Port Director. Gunnar Kofod, Port Captain. Stig Jansson, Traffic Manager.

VASTERVIK: 57.46 N. 16.38 E.

PILOTAGE: Compulsory. Pilot boards in Lat. 57° 45.1' N., Long. 16° 57.3' E., available day and night. Tel: 0490-28041. Call sign "Lotsarna Ido".
BERTHING: *Outer Harbour:* Djuphamnskajen Lucernakajen, length 200 m., depth 8.3 m.

Oil Quay (North part of Lucernakajen): Depth 8.3 m., equipped with 3×8 in. pipe-lines.

Ferry Harbour: Quay length 100 m., depth 6.3 m.

Inner Harbour: Quay length 900 m., depth alongside from 4 to 6 m.

Oil berth: Length 15.0 m., depth alongside 6 m.

FRESH WATER: Can be obtained from all quays.
AUTHORITY: Vasterviks Hamn, Box 3093, 593 03 Vastervik, Sweden. *Tel:* 0490-10690, 16920. *Contact:* Olof Lindroos, Harbour Master.

VISBY: 57.38 N. 18.17 E. (See Plan)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot stationed at Visby Pilot Station. Pilot boards in Visby Roads and is available between 0600 hrs. and 2200 hrs. 12 hours' notice of ETA is required. Pilot listens out on VHF between 0600 hrs. and 2200 hrs. Tel: (0498) 10138.
ANCHORAGES: Outside harbour, water depth 30 m. to 50 m. Clay bottom. No mooring buoys.
Restrictions: It is forbidden to anchor within the marked area outside Visby port entrance (for limits see chart).

At Hogklint, which is approximately 4 miles South of Visby, there are several sea cables, amongst which is the "Gotland Cable" which supplies Gotland with electricity. Anchoring is not permitted within 30 m. either side of the "Gotland Cable".

RESTRICTIONS: No tide in harbour. Currents outside harbour up to 4 knots running along coast. Prevailing winds, Summer time mostly S.W., Winter between N.W. and N.E. Harbour open to winds between S.W. – W., which when strong produces swell along the piers.
Fairway: This passes from the sea between the breakwaters to the oil harbour and is dredged to approximately 9.0 m., permitting vessels with drafts of 7.2 m. to enter.

There are leading lights (4 lights) for entrance into Visby Harbour, also red day markers.

Water Levels: High water level +0.8 m.
Normal high water level +0.5 m.
Normal low water level −0.4 m.
Low water level −0.7 m.

MAX. SIZE: Maximum draft permitted for vessel proceeding to the oil harbour is 7.2 m., to the outer harbour 6.3 m. and to the inner harbour 5.6 m.
TUGS: None available.
BERTHING:

Harbour	*Length* (m.)	*Depth* (m.)	*Remarks*
Outer Harbour			
Ferry Berth No. 6	160	7.0	Ferry berth with fixed 32 m. width ramp. Terminal Building serves both Berths No. 5 and 6.
Ferry Berth No. 5	200	7.0	Same as Berth No. 6.
Outer Oil Quay	60	8.0	3 ton crane for hose lifting. 8 in. hose connections. Capacity 250-300 cu.m.p.h.
Southern Small Boat Harbour	300	2.0	Small boat harbour with 2 bridges. Entry to the West of Fish Harbour.
Inner Harbour			
Outer Part North Breakwater	350	6.0	Ferry Berth No. 3 at quay's inner part (quay length 130 m.) Ro/Ro berth with fixed 20 m. width ramp. Remaining quay length used mainly for timber and pulp loading.
Holmen			
West Quay	220	6.0	Ferry Berth No. 4 with fixed 18 m. ramp. 1×5 ton rail mounted gantry crane, movable along 125 m. of quay length.
Eastern Quay	120	6.0	Fixed electric crane (max. 15 ton). Sawdust loading via nozzle (capacity 120 t.p.h.)
G:a Oil Quay	42	6.0	Quay with support dolphin.
Fishing Harbour	390	3.0	
Inner Part			
Ferry Berth No. 1	110	6.0	Fixed 16 m. wide Ro/Ro ramp.
Ferry Berth No. 2	115	6.0	Fixed 30 m. wide Ro/Ro ramp.
Fish and Small Boat Harbour	240	4.0-3.0	Visitors' Harbour 3 m. deep (approx.)

BRIDGES: No bridges or overhead cables.
STEVEDORES: Working hours, Monday – Friday 0700 – 1600. Overtime possible.
TANKERS: See "Berthing".
FRESH WATER: Available.
FUEL: Oil available.
REPAIRS: Only small repairs are possible.
AUTHORITY: Visby Harbour Office, Skeppsbron 18, S-62157 Visby, Sweden. *Tel:* 0498-69475. *Contact:* Bengt Widegren, Harbour Master.
AGENT: AB Carl E. Ekman, Hamngatan 3, Box 2067, S-62102 Visby, Sweden. Tel: 0498-49000. Telex: 4134. Cables: Ekman.

WALLHAMN: 58.01 N. 11.42 E. (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
2 Tobacco and/or Stores List.
2 Crew Effects Declaration.

PILOTAGE: Pilot boards at Hatteberget. Telegraphic Address: "Pilotstation Marstrand", Tel: 0303–60004. VHF Channel 16.

5 hours' notice to be given through Agent.

2 hours' notice to be given by vessel.

ANCHORAGE: As advised by Pilot Station.
MAX. SIZE: Max. draft 10.0 m. Max. length – no restriction. Berth No. 6: Max. draft 5.5 m., max. length 110.0 m.
HEALTH: No special action except for suspected disease, in which case Agent should be contacted for further information.
RADIO: Gothenburg Radio.
VHF: Wallhamn Harbour Radio – Channel 16.
TUGS: Tugs from Gothenburg will join at entrance.
BERTHING: Four berths for Roll-on/Roll-off: (1) 180 m. × 10.8 m. depth. (2) 130 m. × 10.8 m. depth. (3) 160 m. × 8.5 m. depth (4) 240 m. × 8.5 m. depth.

One berth for loading stone products. Length 110 m. Depth 6.0 m.

CRANES: 1×70 ton mobile crane and 1 container gantry crane.
STEVEDORES: ETA given to Agents is sufficient.
MEDICAL: Doctors and dentists available at short notice. Nearest hospital in Kungaelv, 35 km.
FUEL: Most grades of bunker oil available with short notice.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: By crew or by stevedores.
IDENTIFICATION CARDS: Not necessary. Seamen's Book or Passports should be carried.
CONSULS: In Gothenburg, 60 km. away.
REPAIRS: Can be arranged.
REPATRIATION: All facilities available.
AIRPORT: Landvetter International Airport, Gothenburg, 85 km. away.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Stevedoring and clearance of vessels can be performed every day of the year, 24 hours' service.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
SHORE LEAVE: Permitted within limits laid down by police.
AUTHORITY: Wallhamn Terminal AB, S-440 60 Skarhamn, Sweden. *Tel:* (46) 30460720. *FAX:* (46) 0304-60977. *Telex:* 2429. *Cables:* Wallhamn. *Contact:* C. Blidberg, Agency Manager. C. Frisk, Managing Director.

YSTAD: 55.26 N. 13.50 E. (See Plan)

DOCUMENTS:
Crew List.
Passenger List.
Custom Documents.
Manifests.
Bills of Lading.
Ship's Papers, etc.

TRAFFIC WARNING SYSTEM: Vessels approaching Ystad listen on Channel 16 for broadcast announcing ferry departures. All inward bound vessels have to make contact.
PILOTAGE: Vessels approaching Ystad's Harbour must apply for Pilot at Malmo at least 5 hours before pilotage due to commence. Tel: 040-115269 or 040-978315 or VHF (Channel 16), stating tonnage, draft and destination. VHF call sign "Lotsarna" plus name of pilot's station. (Also see "Stockholm".) Pilot boards at Ystad entrance buoy.
ANCHORAGES: Road: 1.0 nautical mile S.W. harbour entrance, 9 m. – 10 m. depth; sand and clay, good anchorage ground. The road is open to winds from S.S.W.
MAX. SIZE: Largest fully loaded vessel that can enter harbour about 5,500 d.w.t. Depth 7.2 m., max. draft 6.7 m. (22 ft.)
RADIO: Goteborg and Stockholm.
VHF: 24 hour watch at Malmo pilot station on VHF Channel 16 and "Ystad Port Radio" on Channel 16 during office hours (0700 – 2400 hrs.).
TUGS: Tug usually meets vessel at entrance buoy. Ship's lines used. Tugs not compulsory.
BERTHING: Vessels of 150 m. length and 20 m. breadth can enter harbour. Max. draft 22 ft. at MWL.

Ro/Ro Berth: Three movable ramps for lorries/goods. Breadth 8 m., 10 m. and 12 m. One railway ferry ramp with a fixed car ramp to upper deck.

CRANES: 2×6 tons (9 ton with double gear), 1×5 ton, 1×3 ton. All cranes are rail-mounted and electric. 1×36 ton mobile crane.
STEVEDORES: Stevedores must be ordered from Ystads Stuveri AB, Tel: 0411-18080. Working hours Monday – Friday 0700 – 1630 hrs. Meal intervals 0900 – 0930 hrs. and 1200 – 1230 hrs.
MEDICAL: Agents to be notified in advance if medical attention wanted.
TANKERS: Load/discharge lines 8 in. diameter, but reducing pieces for 6 in. and 10 in. diameter. (Tankfarm of 40,000 cu.m.)
FRESH WATER: Available from quays. About 10 t.p.h.
FUEL: Coal and oil can be obtained by lorries.
GANGWAY/DECK WATCHMEN: Can be arranged.
OPENING/CLOSING HATCHES: Crew or stevedores.
CERTIFICATES: See "Stockholm".
CUSTOMS ALLOWANCES: Tobacco, about 200 cigarettes or 200 gram of tobacco for each member of crew. Spirits, 1 bottle for each member of crew.
CARGO GEAR: Loading/discharging with shore cranes and Roll-on/Roll-off ramps.
IDENTIFICATION CARDS: Not needed.
CONSULS: Danish Consul, Tel: 72840. Finnish Consul, Tel: 18400. Norwegian Consul, Tel: 11635.
REPAIRS: Mechanical workshop.
SURVEYORS: Surveyor appointed by the Swedish National Administration of Shipping and Navigation at the Port Office.
AIRPORT: 30 km. distant and served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Christmas; New Year; Easter; Whitsun and Midsummer. No cargo work.
POLICE/AMBULANCE/FIRE: Police, Tel: 13620; Ambulance and Fire, Tel: 90000.
GENERAL: *Refuse Disposal:*
Contaminated Water: To the reception station at Revhuskajen (max. 500 cu.m.).
Waste Oil: Via a tank-truck (max. 10 cu.m.).
Solid Garbage: Via a motorised container to a refuse dump (max. 12 cu.m.).
SHORE LEAVE: Permitted.
AUTHORITY: Ystads Hamn, Hamnkontoret, Hamngatan 18, S-27100 Ystad, Sweden. *Tel:* 0411-77263, 77000. *Cables:* Southport. *Contact:* Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Switzerland

NOTES

Please also advise Shipping Guides Ltd.

BASLE: 47.33 N. 7.34 E. (See Plan)

PORT LIMITS: A line drawn 50 m. off the shore.

DOCUMENTS:

1 Rhine-Manifest or "T"-Paper.
1 Provisions List.

The respective documents, mentioned in No. 1.10 of the Rhine Shipping Police Regulation have to be on board. Where possible, cargo manifests and stowage plans should be forwarded ahead of the vessel to the local Agent.

PILOTAGE: Holders of a High Rhine Shippers Licence have to Pilot the vessel between Basle and Birsfelden. Such licence-holders can be ordered at Signal-station (VHF Channel 18 or telephone 65 44 00).

ANCHORAGES: Vessels moored at riverside quays have to use anchors.

RESTRICTIONS: Shipping is blocked from high water mark II (gauge Rheinfelden 430 cm. up– resp. 450 cm. downstream of the Middle Bridge at Basle). Other restrictions will be announced by the Port Authority.

MAX. SIZE: Water Depth: 3.50 m.

Air Draft: 5.70 m. to basin II, port of Kleinhuningen; 7.00 m. to all the other port areas of Basle Town; 4.80 m. to 7.00 m. to the ports of Basle Country.

Beam: 11.40 m. to basin II, port of Kleinhuningen and through the locks of Birsfelden.

Length: 110 m. for the section between the Middle Bridge at Basle and the locks of Birsfelden.

VHF: Port Authority on Channel 18 (call: SIGNALSTATION). Working hours: Monday to Friday 0500 – 2100 hrs., Saturday 0500 – 1300 hrs.

TUGS: Only one private tug/pushboat is available (call: BRAGTANK, Tel: 65 44 22 or from ship to ship on VHF Channel 10: VOGEL GRYFF). Tug assistance is necessary for the section between Basle and Birsfelden from High Water Mark I (gauge Rheinfelden 350 cm.) for single engine vessels.

BERTHING: Two artificial basins at Kleinhuningen, riverside quays at Kleinhuningen (Klybeckquai), St. John, Birsfelden and Au. Load/discharge of dry cargo is done by shore equipment.

Also see "Max. Size".

CRANES: 62 shore cranes with lifting capacities up to 2×300 tons.

SPECIALISED CARGO HANDLING FACILITIES: 2 container terminals. No LPG berth.

BRIDGES: Railway bridges across the channel to basin II, port of Kleinhuningen, permit a max. air draft of 5.70 m.

STEVEDORES: Working hours: Monday to Friday 0500 – 2100 hrs., Saturday 0500 – 1300 hrs.

MEDICAL: Hospital facilities available.

FRESH WATER: Good quality potable water available.

FUEL: Diesel oil available.

TANKERS: Tanker piers at Kleinhuningen (Klybeck Quay and Basin I; the last one for oil only), St. John (vegetable oil and heavy stove oil), Birsfelden and Au.

Tankers with dangerous goods (K1 and K2 products) are not allowed to enter the basins. Load/discharge done by vessel's pumps.

CONSULS:

Austria
Belgium
Benin
Brazil
Denmark
Dominican Republic
Ecuador
Finland
France
Italy
Jamaica
Mali
Mexico
Monaco
Netherlands
Norway
Peru
Uruguay
Sweden
Spain

REPAIRS: Deck and engine repairs are possible as well as those to electric installations and electronic equipment.

DRY DOCKS: No dry dock, no slip.

SURVEYORS: Agents of Surveillance and Classification Societies are nearby.

GANGWAY/DECK WATCHMEN: At least one member of the crew has to stay aboard as watchman.

HATCHES: Opening/closing carried out by ship's crew before arrival or alongside the quay.

CUSTOMS ALLOWANCES: Swiss Regulations apply.

REPATRIATION: Scheduled aircraft connect Basle-Mulhouse airport daily with most important European airports. Also good railway connections.

AIRPORT: See "Repatriation".

HOLIDAYS: The ports are closed for work on New Year's Day, Carnival (two half days in February or March), Good Friday, Easter Monday, 1st May, Ascension Day, Whit Monday, Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: Emergency services are available through the Port Authority (VHF Channel 18) or direct by telephone:

Ambulance:	144
Police:	117
Fire:	118

TELEPHONES: This service is available aboard ships at the berths for passenger boats by prior arrangement through the Agents.

SERVICES: Oily waste disposal boat available from Monday to Friday 0700 – 1700 hrs.

SHORE LEAVE: Permitted when Immigration and Customs requirements have been satisfied, as long as the crew rejoin the vessel before departure.

IDENTIFICATION CARDS: It is recommended to carry an identification card or a passport. Shore passes are not issued.

REGULATIONS: All the Rhine Shipping Regulations, recommended by the Central Commission for the Navigation on the Rhine, are valid.

AUTHORITY: Rheinschiffahrtsdirektion Basel, P.O.Box CH-4019 Basel, Switzerland. *Tel:* 061-654545. *FAX:* 061-654594. *Telex:* 997130 SBB CH. *Contact:* A. Vogel, Director.

Syrian Arab Republic

GENERAL

PORT REGULATIONS:

In corroboration of Articles 2 and 8 of the Decree Law No. 154/1961 which created the General Directorate of Ports and invited them to control the safety and security of ports and territorial waters and empower them to enact communiques and instructions for same and for public interest, the following provisory instructions will be in force for vessels lying in the Syrian ports and territorial waters until permanent regulations are issued for the safety of the harbours.

1. Any vessel calling at Syrian ports should contact the pilotage station or the signal towers upon entering Syrian territorial waters 12 miles (marine) giving her name, nationality and her cargo in case the whole or part is dangerous, also her ETA at the waiting zone of the port of destination.
2. The Masters of foreign vessels lying in Syrian ports should hoist the Syrian flag (size 63 cm.×126 cm.) in accordance with international maritime courtesy. The Agent should supply any vessel without same upon her arrival at Syrian ports.
3. The vessel should hoist international signals for a Pilot or for dangerous cargo, also the quarantine flag, etc., in accordance with her situation while approaching Syrian ports.
4. The vessels once in territorial waters are not authorised to receive any person on board before Free Pratique is granted by Harbour Authorities.
5. It is forbidden to receive any person after Free Pratique and during the stay of the vessel either in road or inner basin unless by written authorisation from the Harbour Authorities. Customs and Security are exempt when in service.
6. It is forbidden for a vessel to use her wireless when lying in Syrian ports or at anchorage unless with authorisation from the Harbour Authorities and in emergency cases.
7. It is forbidden for vessels lying in Syrian ports to use their own steam or electrical blowers, amplifiers or make any other signals not allowed by international rules to avoid sea collisions or the light signals authorised by the Harbour Authorities in accordance with Article 14 of the present communique.
8. Masters should keep at any time on board of their vessels while lying in the ports a continuous watch and enough seamen in order to secure the exploitation department necessities or during emergency cases, and in order to take the necessary steps to avoid fire and damages to others (Article 17 of D/Law 193).
9. If a Syrian watchman is appointed to watch the vessel, he must have an authorisation order from the Harbour Authorities. The shipping Agent is responsible for the execution.
10. It is forbidden to use the vessel's life-boats in the ports or in territorial waters unless by previous written authorisation from the Harbour Authorities on the basis of a written request stating the causes, the time of the dropping down of the life-boat from the vessel, and the time of its lifting provided the cause is necessary.
11. All vessels should keep their gangways up from sunset to 0700 hrs.
12. The hatches, stores, etc., should be covered and locked, if possible, during the night.
13. In case any objects from the vessel or their cargo drop into the sea, the Master should inform both the Port Co. and the Harbour Master immediately of same.
14. The following signals should be used for the above mentioned cases as follows:

		Signals	
	Case	*Sound*	*Lights*
a)	Attack by thieves	Sequence of 6 short blasts.	Sequence of 6 light signals and flashes from the foremast.
b)	Case of fire onboard or alongside	Sequence of long blasts, each set 6 blasts.	Sequence of 6 long flashes.
c)	Case of serious injury	Sequence of 2 long blasts.	Sequence of 2 long flashes from the foremast.
d)	Case of stranding	Sequence of 4 long blasts.	Sequence of 4 long flashes.

N.B.

1. Distance time between each sequence is half a minute, but the length of the signals should be in accordance with international signals regulations.

2. The above signals should be accompanied by wireless call on Channel 16 to both Pilotage and Stations in Syrian ports.

3. The above instructions do not forbid the use of other sound and light signals stated in the international rules.

NOTICE: Vessels proceeding to Syrian ports are required to signal the following to the port radio station when 50 miles from the port of destination.

(a) ETA.
(b) Nationality.
(c) Name.

BANIAS: 35.14 N. 35.56 E. (See Plan)

DOCUMENTS:

5 Copies Crew List.
1 Copy Vaccination List.
1 Copy Stores List.
1 Copy Private Stores List.
1 Copy Slop Chest.

In case of cargo to be discharged, Original and 2 Copies Manifest and 3 Copies Bill of Lading.

PILOTAGE: Compulsory. Pilots board all tankers approaching the Terminals. These Pilots act in the same capacity as Mooring Masters in the berthing of vessels, after which they supervise the raising of the flexible hoses and their connection to the ship's manifold. During loading operation they act as the Company's Representatives. The Company's Mooring Masters will meet tankers in the vicinity of Marqab Light Buoy.

It is requested that tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft., above the water. This can be adjusted to suit conditions. A pilot ladder should be rigged abaft the accommodation ladder, to within 4 ft. above the water. This will enable the Pilot to ascend the pilot ladder clear of the launch and then step on to the lower platform of the accommodation ladder. United Kingdom Merchant Shipping (Pilot Ladders) Rules is relevant.

APPROACHES: Vessels approaching the port should keep to the authorised passage, defined by the following co-ordinates:

(a) Lat. 35° 13′ 00″ N., Long. 35° 42′ 00″ E.
(b) Lat. 35° 13′ 00″ N., Long. 35° 56′ 00″ E.
(c) Lat. 35° 16′ 00″ N., Long. 35° 55′ 24″ E.
(d) Lat. 35° 16′ 00″ N., Long. 35° 40′ 34″ E.

ANCHORAGE: In the event of a berth not being available, or suspension of mooring operations on arrival, a good anchorage can be used South of the berths in the vicinity of the Marqab Light Buoy positioned at: Lat. 35° 12′ 7″ N., Long. 35° 54′ 46″ E. It is important to maintain a listening watch on VHF, Channel 16 or visual watch on the shore Signal Station positioned approximately at Lat. 35° 13′ 25″ N., Long. 35° 57′ 00″ E. and recognised at night by lozenge shaped lights, in order to avoid delays.

Vessels awaiting at anchorage for confirmation or other reasons, will be boarded by Mooring Master within 4 hours after berthing is decided.

MAX. SIZE:

	Draft		Length	
Berth No.	*Winter* (ft.)	*Summer* (ft.)	*of Vessel* (ft.)	*Purposes*
1	Removed			
2	48	50	900	Discharging Crude Oil
	50	51	925	Loading Crude Oil
3	49	50	950	Discharging Crude Oil
	51	52	950	Loading Crude Oil
4	40	42	800	Loading/Discharging Crude Oil
5	40	42	800	Fuel Oil and White Products
6	32	34	700	Fuel Oil and White Products
7	22	24	400	Liquid Gas
	26	28	550	Jet

Danger Marker: Positioned South of Berth No. 7, Lat. 35° 13′ 03″ N., Long. 35° 56′ 03″ E.

NOTICE OF READINESS: Time of Notice of Readiness tendered will be considered when vessel arrives in the very near vicinity of the Marqab Light Buoy (position Lat. 35° 12′ 27″ N., Long. 35° 54′ 46″ E.), where the Mooring Master, who is the Company's Representative, will board and receive ship and remain on board throughout the entire operation.

HEALTH: Masters of tankers due may obtain Free Pratique by addressing the usual quarantine message to their Agents through commercial radio channels.

RADIO/VHF: Syrian Company for Oil Transport, Banias Terminal must be informed 72, 48 and 24 hours prior to arrival of a vessel's ETA, quantity of cargo required if in a state to load and maximum loading rate required. All times to be given in GMT.

Banias Terminal Radio Station – Call sign: "YKM 5". Frequency: 500 kHz and 442 kHz and VHF Channel 16. Also see "Radio Procedure" below.

Tanker VHF Radio Communications: Vessels approaching Banias can communicate with the Terminal by FM, VHF, Channel 16. Range 30 to 40 miles. Frequency 156.8 MHz. Simplex Operation. Call sign: "Banias". On arrival, ship's radio installations will be sealed according to normal practice and the boarding Mooring Master will put his own portable equipment on board. Communications will then be as follows:

Banias – Equipment: Fixed station sited in the Terminal. Call sign: "Banias". Frequency: Transmitting 163.6 MHz. Receiving 159.1 MHz. Range: 8 miles. Watches: Continuous whilst vessels are in port or immediate vicinity.

Mobile Station – Equipment: Placed aboard vessel on arrival at Banias. Call sign: Ship's name. Frequency: Transmitting 159.1 MHz. Receiving 163.6 MHz. Range: 5 miles. Watches: Mutually agreed between ship and the Terminal on first establishing contact.

Note: The radio telephone circuit is connected with the main Company Communications network in Banias Terminal.

Radio Procedure:

Station Banias Syria
Private station for communication
with tankers bound for Banias, Syria.

Call sign: YKM5
Address: S.C.O.T. Banias – Syria

MF Schedules (A1)

Banias Radio Station (YKM5) keeps a 24 hours continuous watch on 500 kHz and answers calls on 500 kHz QSY 440 kHz for traffic. Broadcasts traffic list on 500 kHz at 0430, 0830, 1230, 1630 and 2030 (GMT) receives on ship frequencies 425, 454, 468, 480 and 512 kHz – also broadcasts traffic lists, on 440 kHz at 0432, 0832, 1232, 1632 and 2032 (GMT).

HF Schedules (A1)

Time GMT	*Listens on*	*Answers on*	*Traffic list at (GMT)*
04 – 05	4 MHz Band	4351 kHz	0410
05 – 06	8 MHz Band	8667 kHz	0510
08 – 09	6 MHz Band	6493 kHz	0810
09 – 10	12 MHz Band	12987 kHz	0910
12 – 13	8 MHz Band	8667 kHz	1210
13 – 14	16 MHz Band	16967 kHz	1310
16 – 17	16 MHz Band	16967 kHz	1610
17 – 18	6 MHz Band	6493 kHz	1710

VHF Schedules (F.3)

Banias Terminal keeps watch on 156.8 MHz (Channel 16). This has a range of approximately 40 miles and its call sign is "Banias".

Confirmation of ETA's: It is essential that tankers, bound Banias, communicate with YKM5 at least 48 hours prior to arrival and thereafter maintain contact, stating cargo quantity and grade, maximum loading/discharging rate and pressure at ship's manifold, SWL of derrick capacity, n.r.t. and d.w.t. and actual draft.

Failure to give any notice at least 24 hours prior to arrival will increase the laytime allowed by an amount equal to the difference between 24 hours and the number of hours prior to arrival.

Note 1: YKM5 deals only with TFC. For:
S.C.O.T., Banias
QSJ Nil.

Note 2: YKM5 uses only two frequencies out of HF Schedule until further notice.
0500 – 0600 8667 kHz
0800 – 0900 6493 kHz
1700 – 1800 6493 kHz

TUGS: Available only on demand from General Directorate of Harbours at Lattakia.

MOORING REQUIREMENTS: For tankers loading/discharging at Banias are as follows:

Forward:

Anchors to be fitted with marker buoys with 20 fathoms of line.
2×120 fathom mooring lines.
2 rope stoppers.
1 suitable wire stopper (preferably Carpenter Patent) for use with 4.75 in. to 5.5 in. mooring lines.

Aft:

4×120 fathom mooring lines.
4 rope stoppers.
2 suitable wire stoppers (preferably Carpenter Patent) for use with 4.75 in. to 5.5 in. mooring lines.

Boat Ropes

To be rigged on either side of ship, and of not less than 4.5 in. circumference.

BERTHING: At all berths vessels moor using both anchors forward, with wires to a buoy on the port bow, one buoy astern and one on each quarter. Hoses are lifted on the port side to be connected to the ship's manifold which must have pressure gauge fitted.

Berthing Operations: Berthing Operations will take place:

a) Loading Crude Oil: Day and night SHinc weather permitting.
b) Discharging Crude Oil: Only between 0600 hrs. and 1600 hrs. local time SHinc weather permitting. Number of hours beyond the restricted hours will not count as lay-time for vessels on demurrage or not.
c) Loading/Discharging Products: According to "Mahroukat" and "Banias Refinery" instructions.

HOSES:

Berth No. 2: 2×20 in./16 in. hoses. } End in 12 in. reducers
Berth No. 3: 2×20 in./16 in. hoses.
Berth No. 4: 1×16 in. hose.

Berth Nos. 5 and 6: 2 submarine pipes of 24 in. each connected with 2 strings of 7 hoses by 16 in. each ended with 12 in. reducers.

Berth No. 7: One liquid gas line of 10 in. connected with 1 string of hoses by 8 in. ending with butterfly valve and camlock.

One balance line of 6 in. connected with 1 string of 7 hoses by 4 in. ending with butterfly valve and camlock.

One kerosene line of 20 in. conncted with 1 string of 7 hoses by 12 in. ending with 12 in. butterfly valve for 150 ASA flange.

SWL of Derricks:

Berth Nos. 2, 3, 4, 5 and 6: Minimum 7 tons.
Berth No. 7: Minimum 3.5 tons.

FRESH WATER: Available through Agents by means of barges, cost US$10.00 per ton.

BALLAST: All tankers should ensure ballast is clean. Authorities are most strict and impose heavy fines for the slightest contravention. Ballast quantity should be kept to the minimum required to ensure safe manoeuvring. No facilities for disposal of ballast ashore.

Banias is an open roadstead and sudden changes in weather can be experienced especially during the Winter months. It is good practice to commence loading as soon as hoses are connected and whilst ballast discharge is still in progress, always providing this can be achieved safely and with no danger of contamination.

FUEL: Bunkers are not available at Banias.

POLLUTION: The Port Authorities will, in cases where pollution is ascertained, collect a declaration from the Master of the offending ship, in which declaration he authorises his Agents to pay any fine to be levied by the Official Committee in the future.

In the light of the above and to avoid any delay to vessels, Owners are kindly requested to:

1. Supply vessels with necessary chemicals to destroy any quantity of oil overflowing into the sea.
2. Provide a bank guarantee of Stg. £5,000 to be deposited against eventual fines. Such a guarantee (or cash) must be given before offending vessel is released.

LOADING: Ships' Personnel are solely responsible for the loading operation, i.e. starting, loading rate, tank switching, topping off, stopping, etc. The Mooring Master will pass requirements to the shore control. It is in vessel's interest to advise loading rate required, also to give 30 minutes' notice of expected time of commencing loading. Order to start will be taken as final.

The Mooring Master must be advised when ship estimates 1,000 tons to go for completion of loading.

Ensure scuppers are effectively plugged. On no account are plugs to be removed.

A complete watch on deck must be maintained throughout the operation, especially towards the shore signal station, to ensure safe loading and avoid delays.

Discharging pressure which should be maintained during the operation at ship's manifold is to be according to Terminal Requirements which will be handed over to the Master at each call of vessel.

MEDICAL: Hospital facilities or other relevant medical information are available through Agent on and/or prior to arrival of vessel.

TANKERS: See "Hoses". Slops (residue) are not allowed to be discharged as no facilities for treating same are available.

CUSTOMS ALLOWANCES: According to regulations or at Customs' own discretion.

SURVEYORS: Through Agents – Shipco.

REPATRIATION: Facilities exist through Agents.

TIME: Local time is GMT plus 2 hours.

SHORE LEAVE: Permission may be obtained from Immigration Dept. ashore through Agents.

DELAYS: Confirmation, restricted berthing hours, unsuitable weather and free berths.

REGULATIONS: Terminal Requirements and Conditions of Use of Terminal Facilities will be handed over to Master of vessel at each time of call. The following are some of the regulations in the booklet.

Vessel in Berth: Ships are not allowed to remain in berth for any reason when loading operation stopped. Hoses should be disconnected and dropped to sea unless stay authorised by Terminal Superintendent.

Lighting: During hours of darkness the manifold and poop mooring area of the sea in vicinity of ship should be adequately lit.

Main Engines: Must be kept on shore notice. Repairs which will immobilise must not be carried out in berth.

Deck Machinery: Must be ready for immediate use at all times.

Whistle or Siren: To be available at all times.

Signalling: An "Aldis" type lamp to be readily available.

Stores, Provisions, Etc.: It is strictly forbidden for provisions, stores or other items to be received or discharged whilst loading is in progress. Launches or other craft must not lie alongside during the same period.

Tanker Safety Regulations: Tanker Safety Requirements must be strictly adhered to at all times. The Mooring Master is authorised to stop all operations should he consider the safety regulations are not being complied with.

Boarding: The boarding of a vessel whilst in mooring should be restricted to persons holding valid passes which are issued by the Syrian Company of Oil Transport (SCOT) on application to ship's Agents and authorised chandlers.

This restriction is carried out in conjunction with the Syrian Harbour and Security Authorities.

WEATHER: The Director of Port Authorities has issued statistics of the weather conditions along the Syrian coast after an experience of 20 years.

State of winds and whirlwinds on the Syrian Coast

Winter	*Kind and direction of winds*
December	Regular winds blowing from N.E. to S.E., sometimes S. to S.W., the alteration of winds is accompanied with rains.
January	Excess of storms starting to blow from S.E. to N.E. The alteration of winds from the E. is occasionally accompanied by heavy rains with probability of hail.
February	Excess of storms and heavy rains blowing from S.W. to N.E. and E.
Spring	
March	Variable winds from S.E. to S.W. and accompanied by heavy rains and altering to N.W. slight.
April	Variable winds from N.W. and S.W., and S. winds accompanied with light rains.
May	Regular winds blowing S.W. to N.W. and altering to S. sometimes accompanied by rain.
Summer	
June	Slight winds from S.W. and S.
July	Moderate winds from S. to S.W.
August	Slight N.W. winds.
Autumn	
September	Winds S.W. and N.W. accompanied by some rain from 15th September. Winds will lighten during the end of the day and will alter at night to slight E.
October	Variable winds from W. to S. and N.W. accompanied by rain will alter at night to E.
November	The winds are variable from N.E. and N.W. accompanied sometimes by rain which will alter to E.

SERVICES: In the event of tankers requiring assistance to lift loading hoses, recover lost anchors, and cables, etc., limited aid may be given during normal working hours. Current charges are available on application from Agent.

SHIPMASTER'S REPORT: Cigarette allowance is strictly enforced at 40 cigarettes per man, and has to be carefully declared. If the Chief Steward has a slop-chest, it has to be carefully declared. Whisky has to be declared separately from other spirits, but in practice it is better to declare each type of spirits separately.

The ship's Log Book is stamped by the police.

AUTHORITY: Syrian Company for Oil Transport (S.C.O.T.), P.O.Box 13, Banias (Tartous), Syrian Arab Republic. *Telex:* Scot 441012 Sy. *Cables:* Scot, Banias. *Contact:* Terminal Superintendent.

AGENT: The Shipping Agencies (Shipco) Syria, P.O.Box 28, Banias. Tel: 21583. Telex: 470020 Sy. Cables: Shipco, Banias. Radio: VHF Channel 16.

BORJ ISLAM: 35.40 N. 35.48 E. (See Plan)

SHIPMASTER'S REPORT: October 1980.

LOCATION: Borj Islam is located at Lat. 35° 40′ N. Long. 35° 47′ 35″ E. 1.4 miles to the North of Ras El Fasori.

This location was adapted about 2 years ago by the Syrian Government as a discharge zone for LPG carriers and tankers of small tonnage. In this respect, we know that the last vessel to visit this port was an LPG carrier of approximately 5,000 tons.

The coast is a conspicuous promontory with deep water in front of it. For mooring at night, there are no lights indicating this berth, and this presents difficulties.

By day, one can steer towards the cement works which is the most important point of reference in that vessels berth beneath these works.

ANCHORAGES: Vessels arriving by night should anchor in the nearby roads of Lattakia.

By day, the advisable anchorage is 200 m. on a bearing of 140° from the cement works.

PILOTAGE: Pilot must be contacted on arrival on VHF Channel 16 at Lattakia, and instructions will be given for berthing. The Pilot boards vessels at Borj Islam.

BERTHING: This is very difficult since there are no berths or buoys. The vessel berths "stern to the land" with 2 anchors 6/7 shackles on each and lines are fixed on to rocks.

Great attention must be paid to winds from the South or S.W. and West or N.W., since this location is open to such winds.

DISCHARGE: This is effected with hoses (supplied by the ship for connection purposes). The product is discharged slowly to tanker trucks.

The position where the vessel anchors has a depth of water from 11 m. to 40 m.

LATTAKIA: 35.31 N. 35.46 E. (See Plan)

PORT LIMITS: The seaward boundary of the port is about 2 miles West of the main breakwater, starting with the entrance line of 133° South.

DOCUMENTS: In addition to the copies of Bills of Lading, Cargo Manifests and the various Ship's Certificates, the Master of an arriving vessel must produce the following documents:

Crew List, showing full names of crew members, nationality, date of birth, and rank onboard.
Stores List.
Passengers List.
Health Certificates and International Inoculation Certificates.
All other documents relevant to the ship.

PILOTAGE: Upon a vessel's arrival at the anchorage area, she may call the Pilot in any of the following ways:

(a) Flying the internationally recognised flag.
(b) Blowing the ship's whistle – 2 long and 1 short.
(c) Calling the pilot station on VHF – Lattakia pilot station – using Channel 16.
(d) Signalling the pilot boat. – Grey colour hull and white colour bridge, always flying the Pilot's flag (letter "H").

The Pilot boards an arriving vessel when she has reached a distance of about a few hundred metres West of the Breakwater Head under good weather conditions. When the weather is bad, an arriving vessel is directed to the port basin entrance by VHF. The Master is advised of proper directions to follow and when he is to lower the pilot ladder to the lee side, by the Pilot.

Traffic List: Broadcast twice daily on VHF Channel 16:

Meeting takes place at 1100 hrs.

ANCHORAGES: Upon arrival at the anchorage area referred to under "Port Limits", the vessel has to wait for orders. This Anchorage Area has a depth of 20 m. – 25 m., and all Masters waiting there have to keep listening on VHF Channel 16, from 0600 until 2200 hrs. local time, for fresh orders. It is always recommended to keep a special watch on VHF Channel 16, for sudden orders.

RESTRICTIONS: The state of tide at Lattakia is negligible, and all vessels may enter and sail out of the harbour by night or day provided she has a Pilot onboard.

MAX. SIZE: The maximum permissible length, breadth and draft of an arriving vessel are determined by the place of berth or anchorage point outside the breakwater.

HEALTH: All arriving vessels are boarded by the quarantine service to whom all relevant documents are submitted, in particular the Derat Certificate, and incidents onboard reported.

The application is filed by the Agent, who accompanies the boarding authorities. Free Pratique is never automatic.

RADIO: The name of the Lattakia station is "Lattakia Radio" on 2182 kHz or Channel 16 on the VHF. Following first contact another Channel is agreed upon, leaving Channel 16 for the pilotage service.

VHF: See "Radio" and "Pilotage".

TUGS: 16 tugs up to 1,100 h.p. Tugs are always under the direct orders of the Pilot and join the vessel at the point the Pilot boards. Usually ship's lines are used but there is no charge for the use of the tug's lines.

BERTHING: Quay berths available as follows:

Name	*Length* (m.)	*Depth* (ft.)	*Remarks*
Khahaleh Quay	600	31	28 ft. 6 in. at the root.
Silo Quay	185	25	27 ft. 6 in. at the root.
Passenger Quay	240*	22 – 31	
*East Division	55	—	21 ft. at the root.
*West Division	185	—	25 ft. at the root.
Eastern Quay	270	22	
Northern Quay	276	13	
Others	530	—	For Port Services.

None of these quays is a specialised one. Cargo is loaded or discharged either by the ship's gear or Port Co. Cranes, at the entire discretion of the latter. A ship may operate in the basin or open road in and from barges.

CRANES: Electric quay cranes: 16×3-6 tons. Mobile cranes: 58×3-12 tons, 4×15 tons, 6×70 tons. Floating cranes: 1×100 tons, 1×32 tons. Forklifts: 2×30 tons (containers), 92×2-6 tons, 4×8 tons. Straddle carriers: 4×32 tons.
2 floating cranes, 100 ton and 32 ton.

BULK CARGO FACILITIES: *Grain Silos:* In the silo, there are 72 storage bins, the capacity of each is 45,000 tons of grain in which operations of sieving, fumigation, drying and filling can be carried out.

Grain is shipped automatically onboard vessels at a rate of 150 t.p.h. This rate can be doubled when the repairs are completed. Grain is discharged ex-vessels by sucking devices, the total capacity of which reaches 200 t.p.h. A study is being carried out to provide grain silos with automatic intake equipment and to develop the silos quay.

STEVEDORES: 24 hours' ETA advice is required to arrange working gangs if vessel is scheduled to operate on arrival. The average loading and discharging rates vary with the type of vessel, nature of cargo, where berthing and whether working in lighters or not.

MEDICAL: Except for urgent cases on board, the Agent need not be notified in advance. Hospitals in town available, and likewise doctors and private clinics. No particular inoculations are required.

DENSITY: Salinity is 1.033 (33 grams Salt per cu.m.).

FRESH WATER: Supplied either from hydrants alongside main quay or from tank barge (capacity 170 tons).

FUEL: All types of marine fuels are available, may be delivered in any quantity from tank trucks alongside quay. 48 hours' notice is required.

FIRE PRECAUTIONS: No specific precautions except that vessels carrying explosives must operate and discharge into lighters in the open Roads.

CONSULS: Sweden, Finland, Netherlands, Greece, Italy, Spain, Portugal.

REPAIRS: Only minor deck, radio, and radar repairs may be carried out. Extensive and specialised workshops are not available.

DRY DOCKS: Not available. Only a 900 ton slipway is in operation.

SURVEYORS: Only minor surveys by Lloyd's, German Lloyd's and Veritas.

GANGWAY/DECK WATCHMEN: Compulsory and are supplied at a hire rate of LS 48.00 per watchman per day.

HATCHES: Normally opened and covered by the ship's crew.

CUSTOMS ALLOWANCES: Cigarettes, 2 packs per man. Spirits, as would be reasonably agreed with the Customs on board prior to sealing the vessel's stores.

CARGO GEAR: Two floating cranes are available – one of 100 tons capacity and the other of 32 tons. Both may be used at the entire discretion of the Lattakia Port Company. Also one mobile crane of 25 tons capacity.

REPATRIATION: All facilities exist and are attended to by the vessel's Agent.

AIRPORT: Damascus International airport is 340 km. from Lattakia by road.

TIME: Winter Time GMT plus 2 hours. Summer Time GMT plus 3 hours.

HOLIDAYS: Following the Lunar Calendar, the first 2 days of Bayram and Al-Adha are the only non-operational days.

POLICE/AMBULANCE/FIRE: Police Tel. No. 93; Ambulance Tel. No. 93; Fire Tel. No. 91.

TELEPHONES: No proper arrangements exist. Vessels in port may use VHF Channel 16 with the pilot station of Lattakia Radio.

SHORE LEAVE: Crew members allowed ashore to visit the city with shore passes issued by the Police Authorities in the port.

IDENTIFICATION CARDS: Shore passes in addition to the Seaman's Book.

DELAYS: Vary with state of congestion prevailing in the port.

DEVELOPMENTS: The execution of the 2nd development stage underway and it will cover the following new facilities:

Specialised container and Ro/Ro quays.

Draft	*Length*	
13.3 m.	260 m.	Containers
11.8 m.	190 m.	Containers
11.8 m.	200 m.	Ro/Ro
11.8 m.	350 m.	General Cargo
10.5 m.	425 m.	General Cargo
7.0 m.	450 m.	General Cargo

In addition there will be new warehouses and stacking areas totalling 230,000 sq.m.

In its planning, the Company has provided for the import of equipment and machinery in a way that meets the needs of the enlarged area. Same will be supplied in accordance with fixed time schedules corresponding to the progress of execution.

There have been calls for tenders for the supply of the following equipment:

16 mobile quay cranes of 6 tons capacity (contract presently being negotiated).

2 mobile quay cranes of 16 tons capacity (contract presently being negotiated).

2 tug boats 1,500 tons (under contract).

3 passenger boats, each can accommodate 15 passengers (under contract).

Gantry cranes 45 tons capacity (under contract).

10 forklift trucks 10 tons capacity (under contract).

2 forklift trucks 30 tons – 35 tons capacity (under contract).

4 straddle carriers (under contract).

A call for tender for the supply of the following equipment is presently being prepared:

Diesel mobile crane 10 tons capacity.

A pilot boat.

VHF station and equipment.

SHIPMASTER'S REPORT: December 1979.

Documents: Health Declaration, De-Rat Certificate, Ship's Register, Cargo Manifest, all Safety, Loadline and Radio Certificates.

Pilotage: Compulsory. Pilot boards in the Roads. Normal ETAs required.

Anchorage: Vessel anchored approximately 1 mile West of the breakwater in 60 ft.

Restrictions: Vessel may enter and leave at any stage of the tide; day or night.

Max. Size: Max. draft at present 28 ft. 6 in., (this is to be increased). Keel clearance of 1.5 ft. required.

Health: Vessel anchors on arrival. Free Pratique filed by Agent who accompanies boarding authorities. The authorities sign the log book and inspect all certificates which must be up-to-date.

Radio: Lattakia Radio or Banias Radio.

VHF: Pilot and Port Authority on Channel 16.

Tugs: 5 tugs available. Tugs are required for berthing, however vessels may unberth without tugs.

Berthing: Vessel berthed at the main quay which is 1 mile from the entrance. A total of 4 berths are available plus a Ro/Ro berth. Max. size (approximately) LOA 190 m., beam 25 m. and deepest draft 28 ft. 6 in. The least depth of water in the channel from sea to the berth is 30 ft. Mean tidal range is negligible. Nature at the bottom is mud and the density is 1033.

Cargo Handling Facilities: There are bulk handling facilities for grain and molasses.

Cranes: There are approximately 20×5 ton cranes on the main quay. There are 2 floating cranes, 1 of 35 tons capacity and the other 100 tons capacity.

There is limited storage space for containers, however this is to be increased. There is equipment for handling 20 ft. and 40 ft. containers.

Facilities: The following are available: Fresh water (poor quality), fresh provisions (poor quality), minor repairs, airport (at Damascus 340 km.), Lloyd's Surveyor (Agency), Salvage Surveyor (Agency), ship's laundry (good but expensive), bunker fuel oil and diesel oil (by truck), doctor and hospital, groceries and meats.

Consuls: Sweden, Finland, Netherlands, Greece, Italy and Portugal.

SHIPMASTER'S REPORT: January 1982.

Approaches to Lattakia: The entrance to Lattakia Harbour is well defined but vessels must approach the Green Buoy near breakwater with extreme caution. A wreck is located in position: Lat. 35° 32′ N., Long. 35° 43′ E., approximately on a bearing of 275° – 1.8 miles from the Green Buoy. A wide berth must be given on entry to Lattakia to this wreck (m.v. "Bravo Neck") with full load of cargo.

The harbour is generally congested and a long delay at outer anchorage must be anticipated. It is advisable for ships to register in advance if this is feasible, to avoid delay. The outer anchorage does not afford good holding ground and during near gale force winds ships are liable to drag anchor.

A traffic list is generally broadcast on VHF Channel 16 at 0600 hrs. and 1800 hrs. daily.

Logistic supplies are poor and water is a difficult commodity to obtain. Ships are advised to top up with water and fuel before arrival at Lattakia.

A prominent land mark (whitish hotel) is visible approximately 1 mile West of Rasibin Hani Light.

AUTHORITY: Lattakia General Port Company, P.O.Box 220, Baghdad Street, Lattakia, Syrian Arab Republic. *Tel:* 23900/1/2/3/6. *Telex:* 451008 Lapoco Sy. *Cables:* Latakia Port. *Contact:* Madhat Abul Shamlat, General Manager.

AGENT: Shipco (Sole Agent), P.O.Box 28, Lattakia. Telex: 51057. Cables: Shipco.

TARTOUS: 34.53 N. 35.45 E. (See Plan)

DOCUMENTS: Bill of Health – The usual International form should be filled in on arrival and the Agent will deliver on board the Bill of Health and Port Clearance upon departure.

Manifests – Should be certified by the Syrian Consulate at port of loading in 4 copies.

Ship's Registry – To be presented to the Port Authorities upon request.

Crew List – 4 copies should be handed over to the Agent along with passenger or transit manifests.

Stores List – 2 copies required by Customs who will allow 40 cigarettes to be retained by each person on board, the balance of slop chest and stores shall be sealed during ship's stay in port. Customs officers are at liberty to search crew quarters.

Derat Certificate – Valid certificate required and no extension can be obtained.

APPROACHES: Vessels approaching the port should keep to the authorised passage defined by the following co-ordinates:

Lat. 34° 56′ 24″ N., Long. 35° 38′ 00″ E.
Lat. 34° 56′ 24″ N., Long. 35° 48′ 36″ E.
Lat. 34° 59′ 00″ N., Long. 35° 50′ 00″ E.
Lat. 34° 59′ 00″ N., Long. 35° 52′ 36″ E.
Lat. 34° 54′ 24″ N., Long. 35° 51′ 12″ E.
Lat. 34° 54′ 24″ N., Long. 35° 37′ 48″ E.

ANCHORAGE: Vessels proceeding to Tartous pick up Pilot at the Anchorage which is 0.5 miles S.W. of the main breakwater. The rocky bottom constitutes good holding ground with a depth of up to 20 m. of water.

MAX. SIZE: At present minimum depths are at the entrance of the harbour about 2 cables seaward of the green light on the S.W. Breakwater. Depth about 33 ft. Max. draft 32 ft. dependent on swell. Also see "Tankers".

RADIO: *Confirmation of ETA:* Before arriving at Tartous terminal, tankers must inform Tartous Control (T.T.C.) of their ETA, 72 hours and 24 hours in advance, stating: Discharging port and quantity of cargo required. Also must make contact with T.T.C. at least 2 hours before ETA at Tartous anchorage area to receive loading instructions.

Procedures for Coast Station Communication: All times in GMT.

1. After general call on 500 kHz, terminal broadcasts traffic lists on 479 kHz at 0730, 1130, 1430 and 2030 hrs., and keeps watch on 500 kHz from 0500 hrs. till 2130 hours. Answers on 479 kHz.

2. After general call, transmits its traffic lists simultaneously on 8472 and 12699 kHz at 0830, 1330 and 1930 hrs.

Keeps watch on the 8354 – 8374 kHz band from 1100 – 1130 hrs.
from 1500 – 1530 hrs.
from 1800 – 1830 hrs.

And answers simultaneously on 8472 and 12699 kHz.

3. Keeps watch on Channel 16 for 24 hours.

4. Keeps watch, calls and replies on 2182 kHz from 1100 – 1130 hrs.
from 1430 – 1500 hrs.

5. Land station charge free for motor tankers.

Tartous Terminal Station, Lat. 34° 57′ N., Long. 35° 52′ E.:
FC YKI 500 A1 600 watt. Hours 0700 – 2300 hrs.
479 A2
427 A2
8472 A1
12699 A1

BERTHING: Mooring Masters are temporarily supplied by Lattakia Port and vessels should therefore contact Agents at Lattakia giving them their ETA and requirements. Vessels berth heading to the predominant S.W. winds, i.e. starboard side alongside unless contrary winds prevail at the time of the berthing.

Southern breakwater – 2,650 m. long called Main breakwater
Northern breakwater – 1,650 m. long called Lee breakwater

The distance between the 2 heads of these breakwaters is 250 m. with a depth of 10.5 m., which is being dredged in order to bring it up to 13 m.

The harbour is divided into 3 basins which are protected by the 2 breakwaters: (1) The North basin; (2) The Middle basin; (3) The Southern basin. The Southern basin is the only one used presently, for the discharge of cargo.

12 vessels can be moored at anchor inside the breakwater of this basin, the depth being between 8 m. – 13 m. The turning circle at the entrance is 450 m. diameter with a depth of 11 m. – 13 m.

The main quay which is 150 m. wide offers on its Southern side from the shore side 300 m. of jetty with a depth alongside of 2 m. – 4 m., 300 m. with 8 m. and 200 m. with 9 m. to 10.5 m. depth. A standard gauge railway line is installed on the entire length of the quay.

POLLUTION: See "Banias".

TANKERS: *Operator:* Syrian Crude Oil Transportation Co.

Maximum safe length of tankers acceptable – 280 m.
Maximum safe draft of tankers acceptable – 52 ft.
Maximum deadweight of tankers acceptable – 100,000 tons.

There are 2 berths for loading:

No.	*Max. Rate*	*Sealine*	*Hoses*	*Depth of Water*
1 (North)	4,000 t.p.h.	1×28 in.	2×12 in.	76 ft.
2 (South)	5,000 t.p.h.	1×28 in.	2×12 in.	72 ft.

Loading is by gravity and loading rate depends upon height of tank and level of oil. All strings of hoses are fitted with 12 in. connections.

Notice of Readiness: Notice of Readiness will be accepted when vessel arrives in the very near vicinity of the anchorage area (Position Lat. 34° 56′ 42″ N., Long. 35° 49′ 30″ where the Mooring Master, who is Company's representative, will board and receive vessel and remain on board throughout the entire operation.

Pilot Ladder: Combination of accommodation and pilot ladder to be rigged, accommodation ladder to be lowered to within 12 ft. of water. Pilot ladder to be placed abaft and to within 3 ft. of water.

Anchorage: In the event of berth not being available or suspension of mooring operations on arrival a good anchorage is to be used South of the berths in the vicinity of the anchorage area.

Shore Control will keep vessel advised of expected time of berthing, etc.

It is important and in the vessel's interest to maintain a listening watch on Channel 16 or a visual watch on the shore, to avoid delays.

On being advised of expected time "Mooring Master will board", heave short anchor before his arrival.

Moorings:

Forward: Anchors to be fitted with marker buoys with 20 fathom of line. 2×120 fathom mooring lines; 2 rope stoppers; 1 suitable wire stopper (preferably carpenter patent) for use with 4.75 in. – 5.5 in. circ. mooring wires.

Aft: 4×120 fathom mooring lines; 4 rope stoppers; 2 suitable wire stoppers (preferably carpenter patent) for use with 4.75 in. – 5.5. in. circ. mooring wires.

Boat Ropes: To be rigged on either side and of not less than 4.5 in. circ.

Derricks and Cranes: SWL of 7 tons is recommended. it must be capable of plumbing overside abreast of loading manifold.

Loading Manifold: 2 suitable reducers to be fitted prior to arrival on port side and to be connected to the Oil Company's hose connections (12 in. series 150 flanges). The following tools to be available: 2 spanners 0.375 in., 2 spanners 0.875 in., 2 hammers 7 lbs., 1 axe 2.5 lbs.

Hose hang-off bitts are required at about 10 ft. from the ship's rail at the loading manifold to secure submarine hoses on the port side.

Safety of Mooring: On completion of mooring operation vessel must have not less than 7.5 shackles of anchor chain in the water.

Ballast: No dirty ballast.

(a) The Port Authority is most strict and will impose heavy fines for any oil pollution of the sea. In addition they may order vessel out of the berth to sea to clean any such contaminated ballast, and keep it on board vessel in a separate or slop tank. N.O.R. will not be accepted until ballast becomes clean.

(b) Ensure ballast quantity on board is kept to a minimum to safe manoeuvre in the prevailing weather conditions.

(c) Excess ballast causes delay, Tartous is an open roadstead consequently sudden changes in weather can be experienced especially during the Winter months. It is good practice to commence loading as soon as hoses are connected and whilst ballast discharge is still in progress, always providing, this can be achieved safely and with no danger of contamination.

(d) Leakage or spillage of oil on board ship must be collected and not be swept or washed overboard.

Ship's Assistance: Ship's crew with an Officer in Charge to assist in all operations as advised by the Mooring Master. This includes lifting, connecting, disconnecting, lowering of hoses and tending anchor cables and moorings.

Deck Watch: A complete watch on deck must be maintained throughout the operation, especially towards the shore Signal Station to ensure safe loading and to avoid delays.

Deck Scuppers Plugs: Ensure scuppers are effectively plugged. On no account should plugs be removed.

Loading Operations: (a) Ship's personnel are solely responsible for the loading operations, ie. starting, loading rate, tank switching, topping off, stopping, etc. The Mooring Master will pass requirements to Shore Control. It is in vessel's interest *to advise loading rate required, also to give 30 minutes' notice of expected time of commencing loading.*

(b) Should vessel require adjustments in the loading rate, please advise the Mooring Master, sufficient notice must be given to enable shore operators to comply. Failure to give proper warning may cause delay or a tank overflow on board.

(c) The Mooring Master will not transmit any loading instructions to the shore until the responsible Ship's Officer has admitted that:

Ship is safely moored.
Hoses are correctly connected.
All valves have been set for receiving cargo.

Order to start will be taken as final.

Vessels in berth: Ships are not allowed to remain in berth for any reason when loading operation is stopped, or disconnect hoses and drop them into the sea unless authorised by Terminal Superintendent.

Lighting: During hours of darkness the manifold, poop, mooring area of sea in vicinity of ship should be adequately lit.

Main Engines: Must be kept on short notice. Repairs which will immobilise them must not be carried out in berth.

Deck Machinery: Must be ready for immediate use at all times.

Whistle or Siren: To be available at all times.

Signalling: An "Aldis" type lamp to be readily available.

Stores, Provisions, etc.: It is strictly forbidden for provisions, stores or other items to be received or discharged whilst loading is in progress, launches or other craft other than Company launches must not lie alongside during the same period.

Tanker Safety Regulations: Must be strictly adhered to at all times. The Mooring Master is authorised to *stop all operations* should he consider that Safety Regulations are not being complied with.

Boarding: The boarding of vessel whilst in mooring should be restricted to persons holding valid passes which are issued by the Terminal Superintendent on application to ship's Agents and authorised Chandlers. This restriction is carried out in conjunction with the Syrian Harbour and Security Authorities.

Vessel not allowed to send any crew or materials outboard for any reason before asking Agents for granting the official authority.

Guests: Masters wishing to receive guests on board should make arrangements through their Agents.

Action in Case of Emergency: In the event of fire, oil spillage or other emergency on the vessel

The Emergency Signal is

3 or more blasts of not less than 10 seconds duration each
on whistle or siren supplemented by a continuous ringing
of the general alarm bells.

Corridor: The corridor must be followed by vessel to Tartous Terminal:

Corridor Leading to Tartous Terminal

(a) Lat. 34° 59′ 00″ N., Long. 35° 50′ 00″ E.
(b) Lat. 34° 59′ 00″ N., Long. 35° 52′ 36″ E.
(c) Lat. 34° 56′ 24″ N., Long. 35° 38′ 36″ E.
(d) Lat. 34° 56′ 24″ N., Long. 35° 38′ 00″ E.
(e) Lat. 34° 54′ 24″ N., Long. 35° 37′ 48″ E.
(f) Lat. 34° 54′ 24″ N., Long. 35° 51′ 12″ E.

FRESH WATER: Unlimited supplies available to vessels berthed alongside the main pier.

FUEL: Only available in very limited quantities by tanker truck.

MEDICAL: Medical facilities are available, but serious cases may involve transportation to Lattakia or Damascus.

FLOATING CRANE: A floating crane of 100 tons lifting capacity available.

SHORE LEAVE: No amenities for the crew exist in the town of Tartous but crew may, if required, proceed ashore with a landing permit issued by the local security services.

WEATHER: See "Banias".

DEVELOPMENTS: A new quay for phosphate is now under construction 300 m. long and 4 m. depth and will be prolonged by a quay of 250 m. length and 11 m. depth for vessels loading phosphate up to 35,000 tons capacity. 1 shiploader, rate 1,000 t.p.h.

A dry dock will be soon under construction for repairing vessels and tankers with a capacity varying between 40,000 tons and 60,000 tons. Also 2 slip-ways for general overhaul for small vessels of 1,000 tons and less.

SHIPMASTER'S REPORT: September 1979

Time Zone: GMT plus 2 hours.

Papers Required:

1 Health Declaration.
8 Crew Lists.
1 General Information Sheet (Ship's details)
1 Provisions List.
1 Bonded Stores List.
1 Crew Effects List.
1 Firearm & Ammunition Declaration (Letter even if none).

Radio: Certain regulations are in force when approaching Tartous. When 50 miles off the coast, the following should be sent through Lattakia Radio to Tartous Harbour Master.

1. Name of ship.
2. Nationality.
3. Type of Vessel.
4. Position and time.
5. Maritime Passage to port of call.
6. Speed.

From experience it was found that Lattakia Radio did not answer until 0630 hrs. Local Time.

Approaches: Approach to Tartous should be made along the Maritime Passage between the parallels of 34° 54′ 24″ N. and 34° 56′ 24″ N. on a course of 090° from 12 miles off.

Pilotage: Pilots commence work between 0530 hrs. and 0600 hrs. and can be called on VHF Channel 16. The pilot station will require draft, length, and type and tonnage of the cargo. The latter being important as vessels with less than 300 tons have priority, as do container vessels and Ro/Ro ferries.

It is most probable that it will be necessary to anchor off because of congestion. Vessel was anchored in a position with the end of the main breakwater bearing 110° True, distance 1.35 miles in a depth of 15 fathoms. Holding ground is reputed to be good.

Clearance: Vessels will normally be cleared on arrival at the anchorage if arriving in the morning or before 1400 hrs. If not, then Notice of Readiness can be sent via Tartous Radio.

Registration: It is possible to proceed to Tartous, register a turn for berthing and then proceed to another port.

When waiting for a berth, provision should be made for a delay of about two weeks.

Fresh Water: Requests for fresh water should be made in good time. At time of writing, there is only one meter in the port, though all the berths have water laid on, so vessels have to take it in turn. Applications should be made through the Agent for water. Vessels at anchor are brought in and tie up stern to the N.W. corner of the Southern pier, the water hose then being passed over the stern, ship's hoses will be required. Pressure is good, water being supplied at about 15 to 20 tonnes/p.h. As supply of water cannot be guaranteed when a request is made, water stocks should be conserved.

Berthing: Berths are available on both sides of the Southern pier and at the end, though this area is reserved for the Ro/Ro ferries and small craft. Further berths are at the breakwater with the vessels tying up in a "Mediterranean Moor", i.e., stern to.

General: The Government Agency, Shipping Agencies Co., can be reached on Channel 16 or through Tartous Radio, their telephone numbers being 21541 & 20940.

Information regarding berthing is given by the pilot station on Channel 16, possibly in the evening before berthing, or in the morning about half an hour before berthing. Standard procedure is to weigh anchor and proceed slowly towards the four buoys marking the entrance channel. The Pilot may request that you enter the port slowly and he will board inside the breakwater. There is no difficulty in this, but it should be noted that there is a noticeable current flowing Northwards even though there is no wind.

In the Summer months, there is a seasonal low over the mainland of Syria which gives rise to a prevailing Southwesterly air stream, more noticeable in the afternoons with the advent of the sea breezes. Periods of calm are also experienced and winds from other directions but not of any great force. In the Winter months gales are experienced.

A launch service is available for vessels at anchor and at the breakwater berths, this can be arranged through the Agents. Four tugs are available, two large and two small, one of the latter doubling as the pilot launch, identifiable by the pilot flag.

Cranes are available on both sides of the pier except where the silo is under construction. A phosphate berth is situated at the South side of the harbour, there being silos for this berth, at present it is fed by road transport from the mines inland. However, it is understood that a railway is being constructed for this. Another pier (mole) is being constructed between the existing Southern Pier and the Naval Pier in the North of the harbour. Fresh vegetables are available in season.

AUTHORITY: Harbour Master, Tartous, Tartous Port Administration, *Telex:* 20562.
Oil Terminal: Syrian Crude Oil Transportation Company, P.O.Box 52, Tartous, Syrian Arab Republic. *Telex:* 41052. *Cables:* Petsyria. *Contact:* S. Mualla, Terminal Superintendent.

AGENT: Shipco *(Sole Agent):* P.O.Box 3, Tartous, Syrian Arab Republic. Tel: 21541 and 20940. Telex: 41063. Cables: Shipco.

NOTES

Please also advise Shipping Guides Ltd.

Taiwan

GENERAL:

RESTRICTIONS: The Taiwan Authorities have the following countries on their blacklist: The People's Republic of China, Albania, Rumania, North Korea, Cuba, Vietnam, Kampuchea and the Soviet Union. They have decided that ships are not allowed to call at a port in Taiwan immediately before or after a call in these countries, and that ships belonging to, managed by, or operated by companies in breach of these rules are not allowed to call at ports in Taiwan.

ENTRY PERMIT: Vessels flying the flags of nations not having diplomatic relations with the Republic of China (Taiwan) must obtain an Entry Permit before arrival. To enable Agents to apply for an Entry Permit, the following documents must be supplied prior to vessel's arrival:

1 photograph, 6 in. × 8 in., shipside view, clearly showing the vessel's name, 1 copy of the vessel's Certificate of Registry. (In the case of a Danish, Norwegian or Swedish vessel, a copy of the International Tonnage Certificate will serve this purpose).

The following ships do not require an entry permit:

(a) those flying the flag of Japan, Liberia, the Philippines or the U.S.A.
(b) those flying the flag of any country having diplomatic relations with the Republic of China (Taiwan).

Vessels arriving at Taiwan ports to carry out cargo discharging and/or loading operations must be registered with the Harbour Authorities, and the following documents are required.

Discharging: A letter of appointment from the vessel's Registered Owners (not Managers, Operators, Agents, or Disponent Owners) to the vessel's Taiwan Agents. If the agency appointment is made by a Charterer, then a copy of the Charter Party (and Time Charter Party if relevant) will be required. If the Charter Party is signed on behalf of Owners, then a copy of the authority from the Owners to the signatory will be needed. In all events, documents clearly showing the line of authority from Registered Owner to Agency Appointed must be produced.

Loading: As for discharging, together with a copy of the Export Permit issued by the Board of Foreign Trade.

When a vessel is loading export cargo where freight is paid in Taiwan, a detailed Freight List and a deposit or a bank guarantee covering the total freight must be lodged with the Harbour Bureau. The deposit, or guarantee, is returnable after the cargo reaches its destination.

HUALIEN: 23.59 N. 121.38 E. (See Plan)

PORT LIMITS:
(A) Lat. 23° 56′ 28″ N., Long. 121° 36′ 13″ E.
(B) Lat. 23° 56′ 29″ N., Long. 121° 36′ 48″ E.
(C) Lat. 24° 00′ 20″ N., Long. 121° 38′ 45″ E.
(D) Lat. 24° 00′ 47″ N., Long. 121° 38′ 18.1″ E.

DOCUMENTS:
Ship's Register.
Derat Certificate.
Last Port Clearance.
Aids to Navigation Charges Memo.
Pratique.
8 Copies Crew List.
1 Copy Crew List visaed by office of China Mission (applicable to American vessels).
8 Copies Passenger List – landing and transit.
1 List showing dates of vaccination of all crew and any landing passengers from infected areas.
1 Chinese Maritime Customs Stores List.
1 copy Crews Personel Effects List.
1 List Foreign Currency in Safe.
1 List Narcotics in Safe.
2 Lists Arms and Ammunition.
1 Set of copy Bills of Lading.
3 Manifests of Inward Cargo.
3 Manifests of Through Cargo.
3 Lists of Unmanifested Inward Parcels.
3 Lists of Mail for Landing.
Vessel's Log Book.

PILOTAGE: Compulsory. Pilot boards at quarantine anchorage. At anchorage hoist 'G' flag.

ANCHORAGE: *Quarantine Anchorage:*

Positions:		
(A)	Lat. 23° 57′ 25.5″ N.,	Long. 121° 36′ 15.5″ E.
(B)	Lat. 23° 57′ 18″ N.	Long. 121° 36′ 33.5″ E.
(C)	Lat. 23° 57′ 53.3″ N.	Long. 121° 36′ 52.5″ E.
(D)	Lat. 23° 58′ 01″ N.	Long. 121° 36′ 34.1″ E.

APPROACHES: Vessels should approach on a course of not less than 280°(T). There is extensive construction work taking place on both the Eastern and Western breakwaters with caissons anchored in the channel.

The inner channel is very narrow (80 m.) and care should be taken when adjusting course, when approaching and passing Berth No. 1.

RESTRICTIONS: Hualien Harbour closed to all ships at 0000 hrs. until 0500 hrs. Large ships not allowed to enter after sunset.

MAX. SIZE: Draft not exceeding 10.5 m. may enter Hualien Harbour at present time.

HEALTH: At anchorage hoist 'Q' flag. If the vessel receiving a notice of Radio Pratique can take up a berth; it need not hoist "Q" flag.

RADIO: Hualien Radio XSY; ETA reported at least 24 hours before arrival.

TUGS: Normally used in harbour. Ship's lines should be used. 3 tugs, 1×2,400 h.p., 1×1,600 h.p. and 1×1,200 h.p.

BERTHING: *Deep Water Wharf:* 2,887 m. (18 berths) capable of berthing 2 – 3×6,000, 3 – 4×7,000, 4 – 5×1,000 and 3 – 4×15,000 and 30,000 ton vessels, at the same time.

Berth No.	*Length* (m.)	*Max. Draft* (m.)	*Remarks*
1	123	7.5	General Cargo
2	153	7.5	General Cargo
3	134	7.5	General Cargo
4	160	9.5	Sugar
5	160	9.5	Gravel
6	160	8.5	General Cargo
7	120	6.5	Gravel
8	220	10.0	Gravel
9	103	9.5	—
10	183	9.5	Cement Clinker
11	185	9.5	Minerals
12	150	7.5	Construction Ship use
13	185	9.5	Logs and Woodchips
14	185	9.5	Logs and Woodchips
15	100	9.5	Logs and Woodchips
16	144	7.5	Not in use at present
17	200	10.5	Open yard
18	200	10.5	Open yard

SPECIAL CARGO FACILITIES: There are 6 godowns on the Western wharves with a total capacity of over 40,000 tons.

There are 4 hoppers at Berth Nos. 13 and 14, owned by Chang Hwa Pulp and Paper Corp., for discharging woodchips into rail wagons or trucks.

CRANES: There are mobile cranes: 1×45 tons, 3×25 tons and 1×2 tons. There are 26 fork lift trucks (with 2 tons – 20 tons lifting capacity) and 10 mini-tractors.

BULK CARGO FACILITIES: At Berth Nos. 5, 7 and 8 there is a conveyor system for loading gravel. At Berth No. 10 two cement silos (12,000 tons) with a conveyor system owned by Asia Cement Co., for loading bulk cement and Kiln Fresh Cement Clinker. At Berth No. 11 there is a conveyor system owned by China Steel Corp. for loading dolomite.

There are 21 single rope hook-on type grabs; 4 grabs at Berth No. 15 owned by Chung Hwa Pulp and Paper Corp. for discharging woodchips into trucks, 7 grabs at Berth No. 18 owned by Asia Cement Co., for discharging coal and 10 grabs belonging to Hualien Harbour Bureau for discharging gypsum, coal, metal and ores, etc. into trucks.

STEVEDORES: Stevedores will be assessed against ships except when otherwise agreed between ships and consignees or shippers.

Advise ETA before 0800 hrs. in order to arrange gangs for 1800 hrs. same day.

Port Performance:

Daytime Work: 0800 – 1700 hrs. (0800 – 1730 hrs. in Summer).
Night Work: After completion of 8 hours daytime work till 24 hours.
Morning Work: 0600 – 0800 hrs.
General Cargo: 200-250 tons per day with only 1 gang.

Bulk: Cement loader at Berth No. 10 can load 600 t.p.h. Dolomite elevator at Berth No. 11 can load 1,200 – 1,500 t.p.h. Gravel elevators at Berth Nos. 5, 7 and 8 can load 500 t.p.h. each. Coal, ores, gypsum etc. grab buckets can unload 80 t.p.h. with only 1 gang.

MEDICAL: Hospitalisation can be arranged through Agent.

FRESH WATER: Fresh water available at all berths. Water supply will be assessed against ships and ordered through Agent. Rate 30 t.p.h.

FUEL: 6 grades obtainable from Chinese Petroleum Corporation:

1. Marine Gas Oil: SUS at 100°F, max. 38.
2. Marine Diesel Oil: SUS at 100°F, 35 – 45.
3. MF-80 (MD-600) C.S. at 122°F, max. 80 (RD No. 1, 100°F, max. 600).
4. MF-280 (MD-2700) C.S. at 122°F, max. 280 (RD No. 1, 100°F max. 2700).
5. MF-380 (MD-4000) C.S. at 122°F, max. 380 (RD No. 1, 100°F max. 4000).
6. Bunker C: SFS at 122°F, max. 200, C.S. at 122°F, max. 400.

Fuel line 6 in. connection, no barge available, notify in advance.

REPAIRS: Only minor repairs can be attended to in Hualien. For other repairs the nearest facilities are at Keelung or Kaohsiung.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CARGO GEAR: Loading/unloading normally effected by ship's gear.

CERTIFICATES:
Ship's Nationality Certificate.
Passenger ship Safety Certificates.
Cargo ship Safety Construction Certificates.
Cargo ship Safety Equipment Certificates.
Cargo ship Safety Radiotelegraphy (Radiotelephony) Certificates.
International Load Line Certificate.
International Oil Pollution Prevention Certificate.
International Sewage Pollution Prevention Certificate (1973).

SHORE LEAVE: Crew members are allowed ashore only in the city of Hualien, from 0600 hrs. till 2400 hrs. Before going ashore each crew member must apply for shore pass at the Immigration Office.

IDENTIFICATION CARDS: Passport or Seaman's Book required.

AIRPORT: Domestic airport (10 km.) with connection to Taipei and Kaohsiung Airport.

TIME: GMT plus 8 hours.

POLICE/AMBULANCE/FIRE: Police, Tel: 223419. Ambulance, Tel: 223419. Fire, Tel: 223419. Emergency, Tel: 119 or 223419.

DEVELOPMENTS: The outer harbour extension began 1978 and will be completed in 1988/9. The project will increase the berthing capacity to 25 ship berths.

AUTHORITY: Hualien Harbour Bureau, Hualien, Taiwan, Republic of China. *Contact:* Lee Pei-Chou, Director. Lee Chao-Min, Harbour Master.

AGENT: Sub-Agent controlled by: Jardine, Matheson & Co. Ltd., 13 14th Floor, World Trade Building, P.O.Box 81, 50 Hsin Shen South Road, Section 1, Taipei. Tel: (02) 393-1177. Telex: 21851, 11391 Jardines. Cable: "Jarocean Taipei".

Associated with Jardine Shipping Agencies.

KAOHSIUNG: 22.37 N. 120.16 E. (See Plan)

PORT LIMITS: Ship considered to be an "arrived vessel" when anchored at either of following locations:

1. Northern Anchorage: Within 2 miles radius off Kaohsiung Lighthouse (Lat. 22° 37′ 01″ N., Long. 120° 15′ 25″ E.) forming a sector between Southern side of outer harbour channel toward shore line Southward.
2. Southern Anchorage: Within a radius of 2.5 miles from the signal station of the second harbour entrance (Lat. 22° 33′ 21″ N., Long. 120° 18′ 28″ E.) forming a sector between Northern side of outer harbour channel toward shore line Northward.
3. For VLCC to discharge at 2 Monobuoys: SBM No. 1 position Lat. 22° 30′ 29″ N., Long. 120° 17′ 49″ E. SBM No. 2 position Lat. 22° 29′ 45″ N., Long. 120° 16′ 41″ E. Tankers are to anchor 1.5 miles West of the No. 2 SBM as directed by Agents.

DOCUMENTS:

10 Crew Lists.
1 Customs Stores List (plain form acceptable).
1 Narcotic List.
1 Foreign Currency List.
1 Crew's Declaration List.
1 Arms and Ammunition List.
1 Parcel, Passenger and Mail List (all 'nil' items may be put in one statement).
1 Set of Bills of Lading and Manifests if any.

PILOTAGE: Compulsory. Agents will arrange for Pilot to board vessel at anchorage outside breakwater. Pilot boat flies code flag "H".

Container ships over 15,000 g.r.t. and other freighters or tankers over 15,000 g.r.t and 200 m. LOA must take 2 Pilots at double pilotage.

APPROACHES: The First Harbour Entrance is dredged to 11 m. MLWS. The Second Harbour Entrance, dredged to 16 m., can accommodate vessels up to 100,000 d.w.t.

ANCHORAGES: To avoid being charged double pilotage fees, arriving vessels should anchor within a 2 miles radius of Chihoushan Lighthouse (Lat. 22° 38′ N., Long. 120° 15.4′ E.) unless instructed to wait off the Second Harbour Entrance, in which case they should anchor within a 2.5 mile radius of the Second Harbour Entrance Signal Station (Lat. 22° 33.4′ N., Long. 120° 18.4′ E.). The holding ground at both anchorages is good, and they are sheltered from the worst of the N.E. monsoon winds in Winter. Vessels may have to vacate the anchorages and proceed to sea should a typhoon approach.

Tankers arriving at the SBM terminals should anchor 1.5 miles West of the No. 2 Buoy to await arrival clearance, quarantine, Immigration, Agent and Cargo Supervisor who will board by Agent's launch. CPC Pilot, Loading Master and Watchmen will board by CPC tug. After discharge, the vessel should proceed to the Northern Anchorage to await clearance for sailing.

Also see "Port Limits".

RESTRICTIONS: Container ships can enter and sail 24 hours a day. Other vessels up to midnight only. Vessels with max. draft 34 ft. if not through the Second Harbour Entrance, must await high water to enter via the First Harbour Entrance.

MAX. SIZE: Length and breadth no restriction (largest container ship entered: 950 ft. LOA and 106 ft. beam). Max. draft inner harbour 52 ft. during high tide. Tankers with draft over 50 ft. (2 ft. keel clearance) discharge at Monobuoy outside.

HEALTH: Free Pratique granted at anchorage after Master completes Quarantine Declaration Form furnished by quarantine doctors. Radio Pratique available (see "Keelung"). No quarantine necessary if second port in Taiwan.

Shipmaster's Report: Master visited the port in 1976 and Cholera Certificates were not requested for inspection.

RADIO/VHF: Kaohsiung Radio (XSW). Normally used by Agents when cabling vessels. Contact with the Agent and Port Authorities may be made via Kaohsiung Port Radio on VHF Channel 16. Call Port Radio on Channels 16/14, 1 hour before arrival to report ETA at Kaohsiung Roads.

TUGS: Harbour tugs usually join vessel after entry and while berthing. Ship's lines always used. 20 tugs, 300 h.p. – 3,300 h.p. available.

CONTAINER HANDLING FACILITIES: No. 1 – total length 848 m. consists of 4 berths, Nos. 40 – 43. Berth Nos. 42 – 43 served by 3 gantry cranes with capacity 30-35 tonnes. 5 straddle-carriers available for 20 ft. - 40 ft. containers.

No. 2 – Includes 4 berths total length 1,025 m., Nos. 63 – 66. Berth Nos. 64 – 66 are leased to lines for exclusive use. Berth No. 63 is the only common user berth. Container handling equipment includes 8 gantry cranes with capacity 30-35 tonnes and 16 straddle-carriers for handling 20 ft. – 40 ft. containers.

No. 3 – Includes 3 berths, Nos. 68 – 70, with total length of 960 m. and a depth of 14 m. The terminal has 8 container cranes with capacity 40 tonnes, 5 transtainers and a 60 hectares container yard.

No. 4 – Container Terminal No. 4 is located at Chung-Hsing Commercial Harbour Area. The project is to build 7 deepwater container wharves from No. 116 to No. 122 with a total quay length of 2,210 m. The 99 hectare container yard is capable of storing 32,000 containers (TEU). The first Berth No. 116, completed in February 1985, has 320 m. length, 14 m. depth and 4,900 container (TEU) capacity. Its container handling equipment includes 3×40 tonnes container cranes and 3 transtainers for handling 20 ft. – 40 ft. containers. Berth No. 117 is equipped with 2×40 tonne capacity gantry cranes, 4×35 ton transtainers and 1×15 tonne forklift. Berths No. 118 and 119 are scheduled to be fully operational by January 1989 and will be equipped with 3×40 tonnes capacity gantry cranes and 3×40 tonne transtainers. Berth Nos. 120 – 122 (each 320 m.) will be completed by late 1990.

BERTHING: No specific requirement except bulk-carriers and tankers with max. draft of 34 ft. via the First Harbour Entrance, must berth during high tide.

Berth No.	**Length (m.)*	*Depth (m.)*	*Remarks*
1	260	9	Berth for m.v. "Taipen" Kaohsiung-Makung and Custom House
2, 4 – 5	150	9	Coastal-Japan/Korea general cargo

*Length of each berth. †Total length.

Wharves: There are at present 87 wharves with a total length of 18,900 m. and 27 mooring buoys capable of accommodating 129 ships.

BULK HANDLING FACILITIES: *Coal:* China Steel Berth: Max. Size 130,000 d.w.t. Max. LOA 320 m. Max. Draft 14 m. 2 cranes, 2 grabs and conveyors. Daily rate 10,000 tonnes.

Berth Nos. 52 – 57: Max. LOA 200m. Max. Draft 10.5 m. Discharge by grabs and ship's gear. Rate 3,500 tonnes per day.

Grain: There are 3 silos, 2×40,000 tons capacity and 1×80,000 tons capacity, unloading rate 300 – 500 t.p.h. 105 grabs also used to discharge grain by ship's gear at hourly rate of 40 – 50 tons per gang/hour.

CRANES: 39 mobile cranes × 15-80 tonnes capacity, 14 stationary derricks, 41 tractors, 117 towing tractors, 271 forklifts, 18 container gantries, 2 P&H container gantries, 21 straddle carriers, 19 container tractors, 2 railtainers, 8 transtainers, 84 grab buckets, 60 hoppers and 1,381 small trailers. The CSBC shipyard has 2×350 ton cranes.

4 floating cranes (30 ton, 60 ton, 100 ton and 200 ton), other floating equipment includes 5 dredgers, 5 mud barges, 17 barges and 70 small craft of various descriptions.

STEVEDORES: All Government stevedores ordered by Agents as required.

Cargo Working Hours:

General Cargo:
0800 – 1200
1230 – 1800
1830 – 2400 (1600 – 2400 plus 100%)
0030 – 0700 (plus 150%) { Night shifts only by special arrangement with Harbour Bureau and cargo receivers.

Containers:
0800 – 1200
1230 – 1800
1830 – 2400
0300 – 0700

N.B.: For quick despatch, relief gangs can be hired to work through meal breaks.

Port Performance:

Containers: 25 crane moves per hour.
General: 35 CBM/gang/hour or 420 tons/gang/day.
Bulk (except at special berths): 50 tons/gang/hour.

MEDICAL: No advance notice required unless emergency case. Vaccination Certificates against cholera inoculation (6 months) required.

See "Health" – Shipmaster's Report.

TANKERS: Discharge lines at oil terminal inside harbour 8 in. (2 berths), and 12 in. at Monobuoy outside with necessary reducers supplied from ashore. In latter case, Master must inform Agents size of ship's manifold.

There are two Monobuoys situated about 7 miles S.S.E. of the Northern Anchorage. Their positions are:

SBM No. 1 – Lat. 22° 30′ 29″ N., Long. 120° 17′ 49″ E. A white flashing signal light is mounted at the centre of the buoy with a range over 5 miles. The light appears for 1 second and goes off for 2, it then appears for 1 second and goes off for 11 seconds. This cycle is repeated. The area around the mooring buoy has a depth of 66 ft. and can accommodate tankers up to 100,000 d.w.t. The current runs at a maximum of 2.5 knots.

SBM No. 2 – Lat. 22° 29′ 45″ N. Long. 120° 16′ 41″ E. depth around the area about 98 ft. capable of discharging tankers up to 250,000 d.w.t. Characters of signal light mounted at the centre of the buoy: White flash 1 second on and 1 off for 3 times then 1 second on and 8 seconds off in that cycle.

The 2 buoy moorings have facilities for 2×12 in. hose connections. Bunkers and fresh water not obtainable. Stores can be arranged for delivery by boat. Other services available to tankers at the buoys are confined to those of urgent nature.

VLCCs programmed to use the SBM Terminal are required to anchor 1.5 miles West of the No. 2 SBM for arrival clearance. Pilot/Quarantine/Immigration, Cargo Supervisor and his hose-handling party board in this area from a tug. After the discharge of cargo, the vessel is required to proceed to the Northern Anchorage to receive sailing clearance.

Petrochemical Storage Centre – Berth No. 61: Max. LOA 232 m. (225 m. preferred) Max. Draft 10.0 m.

LPG: At Talinpu at Southern entrance to Kaohsiung Harbour.

LOA – Maximum 250 m., minimum 130 m. Chicksan flange 23.0 m. above LWL. Liquid line 16 in. Vapour line 8 in. Max. Depth 14.0 m. Discharge rate up to 2,000 kl.p.h. Tank capacity: (C3) 30,000 kl, (C4) 30,000 kl.

Berth	*Shore Lines (in.)*	*Hoses (in.)*	*Grades Handled*	*Max. p.s.i.*	*Rate t.p.h.*
18 – 20	4 – 16	4 – 8	Asphalt, FO, DO, Avgas, JP4, JP5	100	700
60 – 62	4 – 10	4 – 8	Petrochemicals, LPG, liquid NH_3	100	680
Talin E, W	10 – 24	8 – 12	Crude, FO, DO, Naphtha, JP4, JP5	100	3,000
SBM No. 1	1×34	2×12	Crude	100	5,000
SBM No. 2	1×42	2×12	Crude	100	7,000

N.B.: At SBM derricks/cranes of 10 tons SWL required. There are no tank cleaning or ballast disposal facilities.

DENSITY: Average 1015 in Summer, 1023 in Winter.

FRESH WATER: Most berths supplied from shore line, otherwise from barge (500 tonnes – 100 tonnes capacity) paying additional lighterage.

FUEL: All grades, mostly received from 3 barges (capacity 500 tonnes each). Owners must contact suppliers for nomination through Chinese Petroleum Corp. before ship's arrival.

FIRE PRECAUTIONS: No specific regulations, but routine precautions should be enforced.

GANGWAY/DECK WATCHMEN: Recommended, to meet local security requirement.

OPENING/CLOSING HATCHES: Mostly handled by stevedores except steel hinged covers, which are to be done by crew.

CERTIFICATES: Ship's Registry, Load-line, Safety Construction, Safety Equipment, Safety Radio-telegraphy and Derat Exemption Certificates must be inspected by Customs/Harbour Authorities.

CUSTOMS ALLOWANCES: 200 cigarettes or 1 box cigars and 1 bottle of wine or spirit allowed each. Application can be made to break seal for next issue once every 4 days.

CARGO GEAR: Cargo Gear Certificate must be valid.

IDENTIFICATION CARDS: Not required.

CONSULS: All in capital city Taipei, 230 miles North of Kaohsiung.

REPAIRS: China Shipbuilding Corp. provide 1,800 m. of quaywall and can handle any kind of repairs.

DRY DOCK: China Shipbuilding Corp. have a dry dock of 950 m. long with breadth 92 m. and average depth of 14 m. This dry dock is separated into 3 stages by 2 intermediate gates in between, of 380/390/180 m. respectively. Each stage can be independently operated to facilitate fabrication of ship sections, as well as to dock and repair ships.

A floating dock "Viva Island" LOA 174 m. with distance between side walls of 30 m. Draft over keel blocks 7.3 m. with lifting capacity of 11,500 tons.

SURVEYORS: S.G.S., Tel: (07) 561-1281. BV in Taipei, Tel: (02) 731-4218.

REPATRIATION: Crew changes can be arranged.

AIRPORT: Kaohsiung Airport has frequent scheduled flights to major cities in Taiwan as well as regular international flights to Hong Kong, Singapore and Japan. For other international destinations, travellers must use C.K.S. International Airport which can be reached by motorway (3.5 – 4 hours) or via Taipei by domestic flight (40 minutes) and motorway (40 minutes).

TIME: Local: GMT plus 8 hours. No alteration during the year.

HOLIDAYS: New Year's Day (Jan. 1st – 2nd); Youth Day (Mar. 29th); Ancestors' Memorial Day (Apr. 5th); Labour Day (May 1st); Dragon-boat Day (5th day of 5th Lunar Month); Mid-Autumn Festival (15th Day of 8th Lunar Month); Confucius' Birthday (Sept. 28th); National Day (Oct. 10th); Taiwan Restoration Day (Oct. 25th); Late Pres. Chiang's Birthday (Oct. 31st); Dr. Sun's Birthday (Nov. 12th); Constitution Day (Dec. 25th); and Chinese Lunar New Year's Day (2 days mostly in Feb.). No work on New Year's Day (Jan. 1st), Labour Day (May 1st) and Chinese Lunar New Year's Eve and New Year's Day. Double stevedoring rates for rest of holidays.

POLICE/AMBULANCE/FIRE: Police and Ambulance: call 5612311 Ext. 441 or 2613000 Ext. 2717; Fire: 5612311 Ext. 443 or 2613000 Ext. 2731.

TELEPHONE: Telephone available for ships alongside wharf.

SERVICES: Laundry, ship-chandler and competent technicians available for repair of radar, radio, compass adjusting and other navigational aids. Tank cleaning equipment and facilities not available.

SHORE LEAVE: Normally can be arranged.

SHIP SUPPLY SERVICE: Off-limits deliveries can be arranged, although they are the exception rather than the norm.

REGULATIONS: No curfew exists. Port opened for container ships 24 hours day and night; for other vessels between 0600 – 2300 hrs. only. For vessels, having dangerous cargo on board, and super ore carrier (beyond Panama Max.) desiring of docking at China Steel Corporation's Berth No. 97, between sunrise and sunset only. Vessels flying flag of nations without diplomatic relations with the Republic of China must send 1 copy each of ship's photo (4 in.×6 in. broadside) and photocopy of Registry or Tonnage Cert. and 10 crew lists for application of entry permit. The application must be made 1 week before their arrival.

DELAYS: With rapid extension of the harbour and more new wharves and container terminals built, delay has been considerably reduced and very rarely occurs.

DEVELOPMENTS: An 80,000 ton silo will be built at the rear of Berth No. 72, which, includes continuous mechanical unloaders, take-in and take-out conveying systems, truck-loading device and railway car-loading device, is expected to be finished and opened in late 1989.

Construction of Container Terminal No. 5 will commence in 1989, with completion in 1997. Terminal will have a length of 2,320 m., providing 3 berths with 16.0 m. depth and 4 berths with 14.0 m. depth.

SHIPMASTER'S REPORT: June 1983 (updated 1986).

Pilotage: Normal pilotage fees are charged from sunrise to sunset; a 50% surcharge is levied from sunset to 2400 hrs., and from 0500 hrs. to sunrise, and 100% surcharge from 2400 hrs. to 0500 hrs. If the Pilot(s) is/are embarked 2 miles or more from the breakwater at the First Harbour Entrance the above charges are doubled.

Immigration: Immigration Officials board with the Pilot/s off the First Harbour Entrance, and will join at any time between 0800 hrs. and 1800 hrs. Between 1800 hrs. and 2400 hrs. they only leave their office on the odd hour, and between 2400 hrs. and 0800 hrs. they only leave on the even hour. Time from leaving office to boarding is approximately 30 minutes.

AUTHORITY: Kaohsiung Harbour Bureau, 62 Lin Hai 2nd Road, Kaohsiung, Taiwan. *Tel:* (07) 561-2311, Ext. 200. *Telex:* 71219 KHB. *Contact:* Admiral C. Y. Yuan, Harbour Director. S. I. Ma, Deputy Harbour Director. M. W. Chen, Harbour Master.

AGENT: Jardine, Matheson & Co., Ltd., 5th Floor, No. 21, Fu Peng Building, Chung Hwa 3rd Road, Kaohsiung. Tel: (07) 231-7141. Telex: 81957 Jardines. FAX: (07) 201-5492.

Associated with Jardines Shipping Agencies.

KEELUNG: 25.09 N. 121.44 E. **(See Plan)**

PORT LIMITS: Any ship is considered to be an "arrived ship" once she has reported to Keelung Port Radio Station whether or not actually entering the outer harbour. However, Quarantine and Customs Inspectors do not attend ships outside the breakwaters due to lack of adequate transportation also they do not consider any ship an "arrived ship" unless she actually enters the outer harbour.

LOCATION: Exact position of Port – Lat. 25° 09′ 26.5″ N., Long. 121° 44′ 22.5″ E.

DOCUMENTS:

Ship's Registry.
International Load Line Certificate.
International Safety Certificates.
Cargo Ships: Safety Equipment, Safety Construction, Safety Radio Telegraphy.
Passenger Ships: Passenger Safety.
Last Port Clearance.
Crew List.
Fumigation Certificate.
Import Manifests.
Through Cargo List.
Stores List.
Arms and Ammunition List.
Narcotics List.
Foreign Currency List.
Parcel List.
Passenger List.
Yellowbook for every person on board (Vaccination Certificate).

Shipmaster's Report: November 1988.

Customs:	1 Arms and Ammunition List.
	1 Foreign Currency List.
	1 Narcotics List (will be sealed).
	1 Parcels List.
	1 Crew List.
	1 Mail List.
	1 Passenger List.
	2 Import Cargo Manifests.
	1 Through Cargo Manifest.
	1 Crew Personal Effects List.
	1 List of Signatures.
Agent:	All Certificates (originals).
	Last Port Clearance.
Quarantine:	1 Maritime Declaration of Health.
	1 Crew List.
Immigration:	2 Crew Lists.
	Shore Passes (obligatory).

PILOTAGE: Compulsory from anchorage to dock and any other movements in port. Pilot may also meet ships within 1 or 2 nautical miles North of breakwaters, commencing sunrise till sunset upon ship's Agent's request. While waiting outside breakwaters for a Pilot, vessels shall keep adequate space and take care of both ship's and Pilot's safety. Before arrival, vessels shall contact Keelung Port Radio Station (Lat. 25° 09′ 42.5″ N., Long. 121° 44′ 57.5″ E.) via VHF on Channel 16 to ascertain Pilot's exact boarding time.

ANCHORAGES: Area in outer harbour is 13.0 m. to 13.5 m. in depth and can only contain 4 ocean-going vessels at a time. Vessels may also anchor outside breakwaters for Pilots or entry instructions.

HARBOUR APPROACHES: At a location of 1.5 nautical miles N.N.W. from Keelung Isle ships should take Wan Jen Tsui Pi lighthouse and Chiu Tzu Shan lighthouse as coordinates and sail in on course of true bearing 201°. When 2 nautical miles North from harbour entrance, ship's course should be adjusted for entry. Ships should allow adjustment for their planned course and speed and should pay special attention to Hsin Lai Reef, East Breakwater, wind and current.

RESTRICTIONS: Keelung Port Radio Station consists of Naval Harbour Control Signal Station and Harbour Bureau Signal Station. The former controls the entry and exit of all the vessels with the latter's assistance. Any ship shall apply in advance of her actual entry/exit by light signal or via VHF to Keelung Port Radio Station and shall not leave dock nor weigh anchor nor sail and remain close to harbour entrance before obtaining from Naval Harbour Control Signal Station the signal permit to enter or leave.

Pilots berth vessels 0700 hrs. – 2300 hrs. Unberthing at any time.

MAX. SIZE: Max. possible overall length less than 900 ft. Vessels or Agents shall declare ETA to Harbour Bureau 24 hours prior to their arrival.

HEALTH: Radio Pratique possible. Pratique will be granted when vessel is in anchorage. Three measures will have to be conducted by ship, these are: disinfection of ship, sampling of food and water, tetracycline drug for person, if the vessel arrives from an affected area within 5 days.

1. To obtain Free Pratique by radio, the Master is required to cable the following information to Agent within 6 to 36 hours prior to the vessel's arrival at the port.
   (1) Ship's name.
   (2) First port of the voyage and date/time of sailing.
   (3) Name(s) of port(s) and respective departure time, where the vessel called within the last 10 days prior to arrival at Republic of China ports.
   (4) ETA.
   (5) Kind of Derat Certificate, place and date of issue.
   (6) Number of crew and passengers on board.
   (7) If any illness or death occurred within 10 days prior to the vessel's arrival, and if so, give a detailed report.
   (8) If any rat or abnormal death of rats is found on board within 10 days before the vessel's arrival.
   (9) If there is any shipment of foodstuff on board from an infected area.
   (10) Any other information (if any doctor on board, etc.)
   (Example:)
   mv " . . . . " (ship's name)/New York 1st Mar 1300/Honolulu 16th Mar/25th Mar 1000/Yokohama 1st Nov 1977 Exemption/Crew 35 Passenger Nil/7 to 10 None
2. Vessels under the following conditions are not allowed to apply for the Radio Pratique:
   (1) The interim time from the date when the vessel left the infected area and/or the place where infection is suspected to the date of the vessel's ETA at the Republic of China port, is not over the legal incubative period of infectious disease, i.e. 5 days for cholera, 6 days for plague and yellow fever.
   (2) Infectious disease and/or suspected infectious disease and death occurred within 10 days prior to the vessel's arrival in the Republic of China.
   (3) When any inactive rat is found or abnormal death of rats is found on board within 10 days prior to the vessel's arrival in the Republic of China.
   (4) When the vessel possesses no valid Derat/Exemption Certificate.
3. The Quarantine Officer may still go on board the vessel after her berthing for re-inspection even if the Radio Free Pratique is granted.

If any discrepancy is found twice or more, then the vessel will be deprived of the right to apply for the Radio Pratique for one to three voyages.

4. Fumigation by hydrocyanic acid gas (discoids) and methyl bromide is carried out by quarantine station. Derat Certificate or Derat Exemption Certificate issued also by quarantine station.

RADIO:

1. Call Name: Keelung Port Radio Station is called Keelung Port Radio (or K.P.R.).
2. Channel:
   (1) Channel 14 (156.7 MHz.) is used for longer communications after making contact on Channel 16.
   (2) Channel 12 (156.6 MHz.) is a spare Channel, used for emergency.
3. Communication Contents:
   (1) Messages for vessels to enter or leave.
   (2) Matters concerning navigation and anchorage.
   (3) Other Emergencies.
4. Communication Distance: Any waters within diameter of 10 nautical miles from this station.
5. Priority:
   (1) Emergency salvage at sea.
   (2) Messages for vessels departing.
   (3) Messages for vessels waiting outside breakwaters for entry instructions.
   (4) Messages for vessels at anchor in outer harbour.
6. Languages to be used:
   (1) Mandarin.
   (2) English.
7. Remarks: Communications always in plain language. Any codes or private conversations are not allowed unless approved by officers in charge.
8. Vessels shall contact Keelung Port Radio Station via VHF as soon as they are 10 nautical miles from the harbour and shall not be considered as "reported" unless answered by the station. The reporting time is to be counted for the basis for allocating berths. The report includes:
   (1) Nationality.
   (2) Vessel's Name.
   (3) Call Letters.
   (4) ETA Outside Harbour.
9. Communication Procedures: In accordance with international radio communication procedures.
10. Vessels without VHF or with VHF out of operation and thus unable to report earlier to Keelung Port Radio Station (25° 09′ 42.5″ N., 121° 44′ 57.5″ E.) shall contact the station by light signal until answered, as they report when vessel arrives within the visual scope of Ton Pan Yu Signal Station (domiciled with Keelung Port Radio Station) in the waters outside the harbour. The report includes:
    (1) Nationality.
    (2) Vessel's Name.
    (3) Call Letters.
    (4) Actual arrival time or anchoring time outside the harbour.
11. Vessels unable to report by light signal through lack of power shall use other means to report same information as indicated in item 10 above or hoist vessel's call letters enabling registration at the station.

Keelung Radio (XSW) 500 kHz and 460 kHz. Also on 8 MHz.

TUGS: The Harbour Bureau operates 9 tugs viz., 2×2,800 h.p. 1×2,400 h.p., 4×1,600 h.p. China Petroleum Corporation (CPC) operate 2×2,200 h.p. at their Shen Ao Terminal.

BERTHING: Docking during daytime, and also during night-time if weather permits.

Berths (all 200 m. length)	*Depth* (m.)	*Remarks*
Eastern Berths		
E2	9.00	Passenger Terminal, Quick Dispatch Berth (QDB) for cargo vessels.
E3	9.00	Quick Dispatch Berth.
E4	9.00	General Cargo/Bulk.
E5	9.00	Private use.
E6	9.00	Quick Dispatch Berth.
E7	9.00	General Cargo/Bulk.
E8	9.00	General Cargo/Bulk.
E9	9.00	General Cargo/Bulk.
E10	12.00	Container Terminal. 2×35 ton Gantry Cranes.
E11–E22	Various	Shallow water berths.
Western Berths		
W2	9.00	
W3	9.00	
W4	9.00	Quick Dispatch Berth.
W5–W6	9.00	Private.
W7–W8	9.00	Keelung-Hong Kong Line.
W12B	9.00	Bulk Wharves.
W13	9.00	
W14	9.00	2 cranes.
W15	9.00	2 cranes.
W16	9.00	1 crane.
W17	10.00	2 cranes.
W18	10.00	2 cranes.
W19	11.50	Berths, 19-20 Container Terminal.
W20	12.00	19 also used for general cargo, no cranes.
W21	12.00	Berth 20 is leased by Yang Ming, 2×35 ton container carriers.
W22–W23	11.50	Container Terminal No. 1.
W24	12.00	2×35 ton container cranes at No. W22–W23.
W25–W26	12.00	3×35 ton container cranes at No. W25–W26.
W27	7.50	Coastal Shipping.
W29	7.25	Coastal Shipping.
W30	11.50	Grain Silo 50,500 ton Capacity (Rate: 600 t.p.h. 3 Suckers)
W31	11.50	Wharves for bulk cargo but with strengthening to allow discharge of heavy lifts.
W32	11.50	
W33	10.85	Oil Tanker berth.
W33B	8.20	Oil Tanker berth.

In total there are 37 deep water berths and 21 shallow water berths. Four mooring buoys can accommodate 6 vessels of up to 10,000 tons and length overall 215 m.

SPECIALISED CARGO HANDLING FACILITIES: Wharves No. 2, 3, 14, 15, 16, 17 and 18 equipped with 3 ton cranes. Wharf No. 4 equipped with a stationary 30 ton shore crane. Other wharves can be served by 10 tons – 100 tons mobile cranes, and No. 19 to No. 26 wharves can be served by 250 tons mobile crane.

Wharves No. 19 to No. 26 and East No. 10, for container ships, Ro/Ro ships, and "LASH" vessels, equipment includes 10 gantry cranes, capacity 35 tons; 12 straddle carriers for 20 ft. – 40 ft. containers; 2 port stackers, capacity 35 tons; 2 transtainers, capacity 35 tons; 5 forklifts (2×35 ton, 2×15 tons and 1×10 tons capacity) and 9 yard trucks.

Wharves No. 30, 3 pneumatic unloaders for grain in bulk, max. capacity 600 t.p.h. average capacity 480 t.p.h. Silo capacity 50,500 tons.

Wharf No. 31-32: Max. LOA 120 m. Max. draft 10.5 m. Coal discharged into trucks by ship's gear and shore grabs. Average discharge rate 3,000 tonnes per day. Working Hours: 0800 – 1800 hrs., 1900 – 0300 hrs. and 0300 – 0500 hrs..

CRANES: 22 mobile cranes, capacity 10 tons – 250 tons, 17 wharf cranes, capacity 3 – 30 tons. 10 container cranes, capacity 35 tons, 4 floating cranes, capacity 110 tons, 60 tons, 30 tons and 30 tons.
Other equipment: 194 forklifts, capacity 1 ton – 25 tons; 5 portable pneumatic unloaders (for grain unloading), and 75 grab buckets and 15 excavators.

STEVEDORES: According to the stowage plan and cargo details, stevedores are assigned by Harbour Bureau. Work time is divided into dayshift and nightshift.

Cargo Working Hours:

General Cargo and Bulk Wharves.	Container Terminal.
0800 – 1200 hrs.	0800 – 1220 hrs.
1300 – 1800 hrs.	1300 – 1820 hrs.
1900 – 2300 hrs.	1900 – 2320 hrs. – 100% Extra Charge.
0001 – 0300 hrs.	0001 – 0620 hrs. – 150% Extra Charge.

Port Performance:

General cargo up to 30 tons/gang/hr.

Average rate per day 480 tons.

Coal up to 60 tons/gang/hr. Rate per day 1,500-2,500 tons depending on availability of trucks.

China Steel's berth – 10,000 – 15,000 tons/day.

Containers – 25 per crane/hr. excluding waiting time.

RADAR/VHF: No radar service to aid navigation in port. VHF and flashing lamp only used on ship's arrival. However, Pilots carry pocket walkie-talkie's to communicate with tugs and line-men on dock.

MEDICAL: All clinics and hospitals in Keelung area with English-speaking doctors. Modern hospitals available in Taipei, 30 km. away.

TANKERS: Bulk oil is discharged at Berth No. 33 and No. 33B which are fitted with 8 in. and 4 in. pipe-lines. Length: 210 m. and 100 m., maximum draft: 10.85 m. at No. 33 and 8.2 m. at No. 33B.

Tankers may also discharge oil at Shen Ao monobuoy in a bay 7 miles East of Keelung. Max. LOA 224 m., max. draft 10.8 m., max. displacement 50,000 tons. Depth of water 12 m. Monobuoys are also situated at Sha Lun, (W. Taiwan), connected to Taoyuan Refinery, at positions:

No. 1 Lat. 25° 09′ 00″ N., Long. 121° 11′ 27″ E.
No. 2 Lat. 25° 08′ 32.4″ N., Long. 121° 10′ 06.3″ E.

Discharge is possible at Shen Ao and Sha Lun only under good weather conditions.

DENSITY: 1002 to 1023.

FRESH WATER:

1. Water supply facilities: Every wharf equipped with 2 hydrants of 2.5 in. in diameter, each tap delivering at rate of above 20 t.p.h.
2. 4 water barges, each barge delivering at rate of over 60 t.p.h.
3. Price:
   (1) Water supplied alongside priced at NT$39.00 (current exchange rate NT$38.00 to US$1.00) per ton.
   (2) Water supplied by barges at NT$74.00 per ton.
4. Application: Ships/Agents shall notify Harbour Bureau as early as possible if they need fresh water.

FUEL: Bunkers available subject to ship's/Agent's advance notice to C.P.C. who operate the bunker facilities. 5 bunker barges available.

FIRE PRECAUTIONS: Special wharves for tankers, Wharves No. 33 and 33B having automatic fire equipment; fire brigade and fire boats available.

GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by authorities at gangway free of charge. Other gangway/deck watchmen are recommended.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, excepting new designs on modern vessels.

CUSTOMS ALLOWANCES: (1) Each crew member allowed 200 cigarettes in bulk or half a pound of tobacco. (2) Each crew member allowed 1 opened bottle of wine and 12 cans of beer.

IDENTIFICATION CARDS: Passport or other identification papers are needed.

CONSULS: None. Mostly stationed at Taipei.

REPAIRS: Any ship which needs repairs must itemise repairs and declare them to Harbour Bureau via shipping company or Agent and then the repairs will be carried out in accordance with the relating articles under Administration Regulations on Harbour Business for Taiwan Provincial Commercial Harbours. As to docking, ships may deal with China Shipbuilding Corp. Keelung Dockyard or Keelung Harbour Bureau repair plant via shipping companies or Agents.

There are over 400 m. of repair wharves, cranes up to 60 tons, plate and machine shops and foundry and a full staff of skilled tradesmen.

Repairs to radio, navigational and electronic equipment can be effected.

DRY DOCK: China Shipbuilding Corp. Keelung Dockyard has 3 dry docks, 2 for vessels under 100,000 tons and another for 25,000 tons. Keelung Harbour Bureau Repair Plant has 1 dock for vessels under 5,000 tons.

REPATRIATION: Crew repatriation usually carried out through International Airport in Taoyung, and Immigration prefer either individual or group visa for landing crew from ship.

AIRPORT: Taiwan's international airport C.K.S. is 65 km. from Keelung via the motorway. Travelling time approx. 1 hour. Flights are available direct to U.S.A., South Africa and most Asian destinations, and for Europe/Australia via Hong Kong. Taipei domestic airport (30-40 minutes travelling time) has frequent scheduled flights to most major cities in Taiwan.

TIME: GMT plus 8 hours. No alterations.

HOLIDAYS: New Year's Day (1st–2nd Jan.); Chinese Lunar New Year's Eve and Day (3 days in Jan. and Feb.); Youth Day (29th Mar.); Ancestor Memorial Day (1 day in April); Labour Day (not a national holiday but only for labourers) (1st May); Dragon Boat Day (1 day in June); Mid-Autumn Day (1 day in September); Confucius' Birthday or Teachers' Day (28th Sept.); National Day (10th Oct.); Taiwan Restoration Day (25th Oct.); late President Chiang's Birthday (31st Oct.); Dr. Sun's Birthday (12th Nov.); Constitution Day (25th Dec.).

SURVEYORS: Surveys of all types can be arranged. Major classification societies are represented.

POLICE/AMBULANCE/FIRE: The gangway guard assigned by Harbour Police or ship's Agent will act in emergencies.

TELEPHONE: Local telephones available to be placed on board.

SHORE LEAVE: Crew allowed ashore except for crew members from Communist countries.

REGULATIONS: Searching for stowaways is strictly carried out on arrival and departure.

Discharge of smoke, tank washings, garbage, etc., not allowed.

DELAYS: Keelung has rainfall on about 210 days in a year, port is sometimes congested after continuous rain.

GENERAL: Shore pass issued by Immigration for each crew member on ship's arrival and will be collected on ship's departure. Anyone who loses a shore pass is subject to fine.

DEVELOPMENTS: 100,000 tonne grain silo to be built.

3 container berths under construction in West Harbour to be completed in 1988.

Additional container berths will be available in the East Harbour by 1991.

AUTHORITY: Keelung Harbour Bureau, No. 1 Chung Cheng Road, Keelung, Taiwan, Republic of China. *Tel:* (032) 231111. *Cables:* Kehbroc Keelung. *Contact:* Y. C. Chu, Harbour Master, S. C. Teng, Director.

AGENT: Jardine, Matheson & Co. Ltd, 4 Second Floor, Chung Cheng Road, Keelung. Tel: (032) 230161. Telex: 32187 Jardines. Fax: (032) 266371.

Associated with Jardine Shipping Agencies.

SUAO: 24.36 N. 121.52 E. **(See Plan)**

PORT LIMITS: Radius of 1 mile from North Point Lighthouse.

DOCUMENTS: Ship's Register, Derat Certificate, Last Port Clearance, Taiwan Tonnage Dues Certificate (valid 1 year), Crew List (8 copies), Stores List, Vaccination List and Yellow Book, Foreign Currency in Safe, Narcotics List, Bills of Lading, Manifest of Inward Cargo, Manifest of Through Cargo, Mail and Parcels List. Also see "General".

Distribution:

Quarantine Station: One copy each of Health Declaration, Crew List, Ports of Call, Manifest of Inward Cargo, Manifest of Through Cargo.

Customs Office: One copy each of Arms and Ammunition List, Narcotics List, Foreign Currency List, Parcels List (including Landing Parcels and Through Parcels), Stores List, Crew List, Specimen Signatures of Master and Chief Officer, Taiwan Customs Tonnage Dues (can be purchased from the Customs Office), and 3 copies each of Manifest of Inward Cargo and Manifest of Through Cargo.

Immigration Office: One copy each of Crew List, Arms and Ammunition List, Manifest of Inward Cargo, Ports of Call List.

Port Authority: One copy each of Crew List, Manifest of Inward Cargo, Manifest of Through Cargo.

Local Shipping Agent: One copy each of Ship's Particulars, Crew List, Manifest of Inward Cargo, Manifest of Through Cargo, Ports of Call.

PILOTAGE: Compulsory. Pilot boards at outside anchorage position (Lat. 24° 35′ 20″ N., Long. 121° 52′ 30″ E.). Hoist "G" flag. Daytime service only available.

ANCHORAGES: Water area from North shore to South shore, depth 14 m. to 31 m. and outer depth over 30 m. Ship may anchor and remain outside breakwater when waiting for Pilot or entry instructions.

APPROACHES: If approaching from the North or East, Kui Shan (Turtle Shaped) Island, 15 miles N.N.E. of the harbour entrance, provides a good landmark, with its 408 m. elevation.

San-Shien-Tai Island (30 m.), 1 mile E.N.E. of the entrance, is a good leading mark, and vessels should make their approach from the S.E., clearing the island by half a mile, before turning to enter. A 4.7 m. shoal exists about 450 m. S.W. of the island and another lies to the N.W. A red light sector marks danger areas near the entrance. The channel depth at the entrance is 22 m. The inner channels have depths of 15 m. to the North and 10 m. to the South.

RESTRICTIONS: Permission to enter must be granted by naval signal station located on North shore, ship's Agent should give ship's ETA to Port Authority of Suao 24 hours before arrival. Port closes from 2301 hrs. to 0200 hrs. daily.

MAX. SIZE: Max. draft 14 m. and LOA less than 290 m.

HEALTH: Radio Pratique possible (see "Keelung"). Quarantine will clear vessel in anchorage area. Stool test will be conducted if vessel arrives from an affected area within 5 days.

RADIO: Radio Suao, send cables to Harbour Master Suao, or Agent. Report ETA, draft, etc.

VHF: Channel 14 – 156.7 MHz for calling. Call sign "Suao Harbour Radio".

TUGS: Port Authority tugs assist with mooring and unmooring. Ship's lines used. 6 tugs, 2×2,400 h.p., 1×1,600 h.p., 1×1,200 h.p., 1×1,000 h.p. and 1×600 h.p.

BERTHING: Docking during daytime, departure also during daytime, but sometimes at night time if permission granted from Authorities. Pilot compulsory. Vessel usually anchors in outer harbour for Pratique and inspection.

Deep water wharf 2,705 m. (13 berths) capable of accommodating vessels up to 298,000 d.w.t.

Wharf No.	*Length* (m.)	*Depth* (m.)	*Designed Depth* (m.)	*Uses*
1W	210	7.0	7.5	Service Craft
2W	170	10.5	11.0	Breakbulk
3W	215	10.5	11.0	Breakbulk
4W	300	10.5	11.0	Breakbulk
5W	200	10.5	11.0	Breakbulk
6W	290	14.0	15.0	Containers and Breakbulk
7W	240	12.5	13.0	Containers and Breakbulk
8W	125	7.0	7.5	Timber
9W	125	7.0	7.5	Timber
10W	175	8.5	9.0	General Cargo
11W	175	8.5	9.0	General Cargo
12W	200	8.5	9.0	Breakbulk
13W	180	8.5	9.0	Breakbulk

CARGO HANDLING FACILITIES: The port has no special facilities, 1 gantry crane for handling container cargoes. For the present time ship's derrick only for logs, timber, cement and general cargo.

Grabs:	12×3.5 cu.m. (3.5 tonnes each). 16×2.2 cu.m. (1.8 tonnes each).
Fork Lifts:	8×3 tonnes. 2×2 tonnes. 1×7.5 tonnes.
Mobile Cranes:	2×40 tons 1×20 tons 4×16 tons
Shovels:	1×3 ton (Bulldozer)

STEVEDORES: Arranged by local Agent. Working hours: 0800 – 1200, 1300 – 1700, 1800 – 2300 and 0000 – 0600.

MEDICAL: Clinics with English speaking doctors available, modern hospitals available in Lotung, (St. Mary's Hospital, sponsored by Catholic Society) Ilan and Taipei by train or by car, 20 minutes, 30 minutes and 2 hours away respectively.

DENSITY: 1025.

FRESH WATER: Available by barge or alongside, subject 24 hours' advance notice.

FUEL: Supplied by tanker trucks.

GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by Authority for gangway, free of charge.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES: International certificates, Register, Safety Equipment, Safety Construction, Safety Radio, Load Line, Cargo Gear, etc.

CUSTOMS ALLOWANCES: Each Crew member allowed 200 cigarettes for own use and 1 bottle of wine for entertaining and for own use, Master enjoys some privileges and can keep additional cigarettes for entertaining.

IDENTIFICATION CARDS: Shore pass for foreigners issued by Immigration Office according to the passport or other identification papers.

CONSULS: None.

REPAIRS: Minor repairs can be carried out in port.

DRY DOCKS: Length 165 m., width 23.7 m., depth 7.7 m. Vessels under 10,000 g.r.t. can be accommodated.

REPATRIATION: Crew repatriation usually carried out through international airport in Taoyuan, near Taipei. Application to be made to Keelung Harbour Bureau.

AIRPORT: International airport in Taoyuan, 3.5 hours by car from port.

TIME: GMT plus 8 hours. For local time check in Chinese, dial telephone 117 (free of charge).

HOLIDAYS: New Year's Day (January 1st), Youth's Day (March 29th), Late President Chiang Kai-Shek's Death – Memorial Day (April 5th), Labour Day (May 1st), Dragon-Boat Day (May 5th of Lunar Calendar), Mid-Autumn Festival (August 15th of Lunar Calendar), Birthday of Confucius (September 28th), Double Tenth Day (October 10th), Recovery Day of Taiwan (October 25th), Late President Chiang Kai-Shek's Birthday (October 31st), Birthday of Dr. Sun Yet-Shen (November 12th), Constitution Day (December 25th), Eve of Chinese New Year's Day (December 29th or 30th of Lunar Calendar), Chinese New Year's Day (first day of Lunar Calendar).

POLICE/AMBULANCE/FIRE: The gangway guard assigned by Harbour Police or ship's Agent will act in emergencies; in case of fire dial 119. Police and ambulance dial 110.

TELEPHONE: Local telephones available to be placed on board.

SHORE LEAVE: Crew allowed ashore, except for crew members from Communist countries.

REGULATIONS: Crew cannot shelter any unlawful person on board. Searching for stowaways is strictly carried out on arrival and departure.

DELAYS: Port is sometimes congested after continued rain and delays of a few days may be caused.

GENERAL: 3 Crew Lists sent by airmail from last port to Agent. Shore pass issued by Immigration Office for each crew member on ship's arrival and will be collected on ship's departure.

AUTHORITY: Suao Harbour Bureau, Suao, Ilan, Taiwan, Republic of China. *Tel:* 039-972001. *Contact:* M. C. Chiang, Port Director.

AGENT: Sub-Agent controlled by: Jardine, Matheson & Co. Ltd., 13/14th Floor, World Trade Building, P.O.Box 81, 50 Hsin Shen South Road, Section 1, Taipei. Tel: (02) 393-1177. Telex: 21851, 11391 Jardines. Cables: "Jarocean Taipei".

Associated with Jardine Shipping Agencies.

TAICHUNG: 24.18 N. 120.29 E. (See Plan)

PORT LIMITS: In radius of 1.5 miles from centre of the entrance between North and South Breakwater.

LOCATION: Exact position of Port – Lat. 24° 17′ 40.3″ N., Long. 120° 29′ 27.3″ E.

DOCUMENTS: *Required by Quarantine Station:*

1 copy Health Declaration.
1 copy Crew List.
1 copy Passenger List.
1 copy Ports of Call List.
1 copy Manifest of Inward Cargo.
1 copy Manifest of Through Cargo.
1 copy Derat Certificate.

Required by Customs Office:

1 copy Arms and Ammunition List.
1 copy Narcotics List.
2 copies Foreign Currency List.
3 copies Parcels List (1 for landing parcel, 2 for through parcels).
1 copy Stores List.
2 copies Crew List.
2 copies Mail List.
2 copies Passenger List.
4 copies Manifest of Inward Cargo.
4 copies Manifest of Through Cargo.
1 copy Personal Effects List.
1 copy Specimen Signatures of Master and Chief Officer.
1 copy Log List (for log ships only).
1 copy Taiwan Tonnage Dues (can be purchased from the Customs Office).
1 copy Ship's Register.

Required by Immigration Office:

2 copies Crew List.
2 copies Passenger List.
2 copies Arms and Ammunition List.
2 copies Narcotics List.
2 copies Manifest of Inward Cargo.
4 Photographs of each Chinese Crew Member (only for first arrival).

Required by Port Authority:

1 copy Crew List.
1 copy Passenger List.
3 copies Manifest of Inward Cargo.
2 copies Manifest of Through Cargo.

Besides above documents, ship's Master should present Certificates of Ship's Registry, Safety Equipment, Safety Construction, Safety Radio and Load Line to the Port Authority for inspection.

Required by Local Shipping Agent: One each of Ship's Particulars, Crew List. Last Port's Name and Leaving (Last Port) time should be forwarded by airmail to the local Agent.

PILOTAGE: Compulsory. At anchorage hoist "G" flag, contact Taichung Port Radio on VHF Channel 16. Pilots board 0.5 – 1 mile off the end of the breakwaters. In the winter, however, the pilot launch is sometimes unable to leave the shelter of the breakwaters, and the Pilot must embark inside the breakwaters. Alternatively, if sufficient notice is given, vessels may pick up a Taichung Pilot off either Keelung or Kaohsiung. When it is known that bad weather exists off Taichung, this latter course of action is recommended to avoid possible berthing delays and danger to the ship.

APPROACHES: Daytime entry only.

The entrance channel has a minimum depth of 11 m. (MLWS), is 16 km. long and 300 m. wide in a direction of 115° (T). Sometimes strong cross currents exist outside the breakwaters. In strong winds, the pilot vessel may be unable to leave the shelter of the breakwaters and vessels must pick up the Pilot inside the harbour entrance (see "Pilotage"). There have been groundings outside the harbour but these all appear to have been the result of bad navigation or the neglect of basic precautions.

ANCHORAGE: Water area in port limits, except entrance channel can be used for anchoring, depth from 10 m. to 18 m. Ship may anchor and remain outside breakwater when waiting for Pilot.

RESTRICTIONS: Permission to enter must be granted by signal station. Ship's Agent to report ETA to Port Authority 24 hours before arrival.

MAX. SIZE: Max. draft 13 m., LOA no limit.

HEALTH: Radio Pratique acceptable, also quarantine will clear vessel at anchorage. Special quarantine will be conducted if vessel arrives from a cholera affected area within 5 days.

Also see "Keelung".

RADIO: Via Radio Taichung (XSW2) or Radio Keelung and Radio Kaohsiung. Send cables to Agent or Harbour Master Taichung for reporting ETA, draft, etc.

RADAR: No radar service to assist navigation in port.

VHF: Call sign "Taichung Port Radio", Channel 16 (156.8 MHz) for calling purpose, Channel 14 (156.7 MHz) for further communication. Pilots use walkie-talkies to communicate with tugs and mooring men.

TUGS: Authority tugs assist mooring and unmooring, ship's line used. 10 tugs, 250 h.p. – 4,600 h.p.

BERTHING: Wharf 1, depth 13 m., length 250 m., for grain cargo, discharged by shore grain unloaders.

Wharves 2 and 3, depth 13 m., 500 m., for bulk cargo.

Wharf 4, depth 11 m., length 200 m., for liquid cargo.

Wharf 4A, depth 9 m., length 180 m., for logs and cement.

Wharves 5A, 5, 6, 7 and 8, depth 11 m., length 1,000 m., for general cargo.

Wharf 8A, depth 11 m., length 260 m. for general cargo.

Wharf 9, depth 14 m., length 260 m., for containers.

Wharves 10 and 11, depth 13 m., length 640 m., for containers (See "Shipmaster's Report" – 1982).

Wharves 12, 13, 14 and 15, depth 10 m. to 11 m., length 760 m., for general cargo.

Wharves 23, 24 and 25, depth 10 m. to 11 m., length 560 m., for general cargo.

Wharves 26 and 27, depth 11 m., length 400 m., for general cargo.

Wharf 28, depth 11 m. to 14 m., length 180 m., for general cargo.

Wharf 29, depth 14 m., length 215 m., for coal (coal unloader is planned) (See "Shipmasters' Reports" – 1982 and 1987).

Wharves 31 and 32, depth 14 m., length 640 m., for containers.

Wharves W1 and W2, depth 13 m., length 250 m. each, for petroleum and chemical products.

(For their locations see "Plan").

SPECIALISED CARGO HANDLING FACILITIES:
Container Terminal: Wharves 10 and 11. Each has 1×35 ton quay-side container crane.
Grain: Grain Elevator installed at Wharf 1, silo capacity 60,000 tons. 2 unloaders, 400 t.p.h. each.

CRANES: 7 mobile cranes up to 40 tons capacity, 1 mobile crane of 140 tons capacity. Large supply of forklifts, hoppers, grabs, electro magnets, conveyors, etc.

STEVEDORES: Stevedores and equipment can be hired from the Taichung Harbour Warehousing & Stevedoring Co., Teh-Long Warehousing & Stevedoring Co. and Taichung Harbour Bureau Marine Terminal Operations.
Cargo Working Hours:
0800 – 1200
1300 – 1700
1800 – 2300 (plus 100%)
0000 – 0600 (plus 150%)
Port Performance: General cargo 200 tons/gang/day. Bulk (other than grain silo) 300 tons/gang/day.

MEDICAL: Clinics and hospital with English speaking doctors available at town of Wuchi near the port.

DENSITY/TIDE: 1023/High tide and low tide difference 4.5 m., when alongside pier keep watch on moorings.

FRESH WATER: Available alongside and by barge with capacity 25 tons. No limitation on quantity.

FUEL: Ordinary bunkers available but 24 hours' advance notice required. Fuel barge (550 tons) operated by C.P.C.

GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by authority at gangway free of charge.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, except new designs on modern vessels.

CUSTOMS ALLOWANCES: Each crew member allowed 200 cigarettes and 1 bottle of wine for own use. Bonded store will be sealed on arrival.

IDENTIFICATION CARDS: Not required, however passports or other identification papers must be submitted for request of a shore pass.

CONSULS: None.

REPAIRS: Minor repairs can be carried out in port.

REPATRIATION: Crew repatriation usually carried out through international airport in Taoyuan near Taipei, or Kaohsiung, about 200 km. from this port.

TIME: GMT plus 8 hours. For correct local time dial Tel: 117, time report in Chinese, free of charge.

HOLIDAYS: Commemoration Day of the Republic of China and New Year's Day (1st and 2nd January), Lunar New Year's Eve and Spring Festival (3 days late in January or early February), Youth Day and Chinese Martyrs' Day (29th March), National Tombs' Sweeping Day and Death of President Chiang Kai-shek (5th April), Labour Day (1st May, for labourers only), Dragon Boat Festival (one day in June), Mid-Autumn Festival (one day in September), Confucius' Birthday and Teacher Day (28th September), National Day (10th October), Taiwan Restoration Day (25th October), Chiang Kai-shek's Birthday (31st October), Dr. Sun Yat Sen's Birthday (12th November), Constitution Day (25th December).

Cargo work can be arranged on holidays except Lunar New Year's Day, Labour Day, Dragon Boat Festival (only afternoon) and Mid-Autumn Festival (only afternoon).

POLLUTION: Discharge of tank washings, etc., in port is prohibited (Also see "Regulations – Harbour Bureau Notice").

POLICE/AMBULANCE/FIRE: Call Taichung Harbour Police Tel: 562394 or Liaison Centre of Taichung Harbour Bureau Tel: 562164.

TELEPHONE: Local telephone available to be placed onboard.

GENERAL: Recommended chart: Chinese Navy Chart No. 0357, Tai-Chung Kang.

SHORE LEAVE: Crew allowed ashore except for crew members from communist countries.

REGULATIONS: Searching for stowaways is strictly carried out on arrival and departure.
Harbour Bureau Notice:

1. Please show your shore pass together with your hand-carried articles to the gangway guard when going ashore and to the gate police when coming aboard.

2. Photographing of the harbour, storing of explosive articles and displaying of fire crackers in the harbour area are prohibited.

3. Before obtaining a boarding pass which can be applied for you by your ship's agency, you are not allowed to board another ship with your shore pass.

4. Before going ashore, read over carefully the notice on your crew shore pass and comply with it.

5. Be sure not to lose your shore pass, nor should it be used by others, since it is an important official document. The expense of announcing the loss of shore pass for 3 days in the local newspapers is to be on loser's account.

6. To avoid getting lost, keep in your mind the number and location of the wharf at which your ship is alongside, and in case the location of the ship is shifted contact your ship's Agent.

7. Always maintain aboard your ship a sufficient number of crew in case of emergency.

8. For the prevention of stowaways, thefts and accidents, crew quarters and passenger cabins should be kept locked before their shore leave.

9. Pumping wasted oil and throwing rubbish into the water, or exhausting thick smoke in the port area shall be subjected to a heavy fine.

10. For the protection of foreign copyrights, pirated editions of foreign books and records are not exportable.

11. Unless an application is approved by the Customs, any taxable article should not be taken off the ship, while each crew member is allowed to carry ashore 2 opened packs of duty free cigarettes, 10 cigars or 2 ounces of tobacco.

12. Each crew member may carry ashore no more than 2,000 New Taiwan Dollars (NT $2,000).

13. Each crew member is allowed purchases not exceeding US $200 in value in local products or handicrafts which can be carried aboard by the buyer with purchasing invoice; a Customs permit should be shown to the guard if exceeded.

14. Whenever you need assistance, please feel free to call 562394 or 562611 ext. 275 upon which the Foreign Affairs Division of the Harbour Police is obliged to serve you.

15. For further information, please consult directly with your Agency or Authorities concerned, as the rules contained in this notice may be revised at any time.

Thank you very much for your co-operation.

DEVELOPMENTS: The 2nd phase project with an expansion of the commercial harbour and a new industrial harbour will be carried out soon.

SHIPMASTER'S REPORT: November 1982 (updated 1987).
Stevedores: Cargo work: Around the clock. 0800 – 1200 hrs., 1300 – 1700 hrs., 1800 – 2300 hrs. and 0000 – 0600 hrs.
Health: Cholera still declared in Radio Pratique message but no action taken if certificates are out of date.
Customs: Issues can be made after 5 days.
VHF: Pilots and Port Radio also officially work Channel 16 but we only make contact on Channel 14.
Berthing: No. 11 (Container Berth) is completed (Extension of No. 9 and 10)
Consuls: No British Consul.
Airport: Nearest airport at Tauyuan.
Report: This is a new port midway up the West coast of Taiwan. Plans for very extensive developments are at present in hand, stage one is almost completed.

The Western coast is low lying and exposed. During N.E. monsoon season, when cold front comes from mainland China, the wind can be very strong, ships are advised to go South or North so that the Pilot may be taken off at Kaohsiung and Keelung. The water shelves fairly slowly and I am given to understand that in bad weather Panamax vessels anchor 2 miles West of port entrance, holding conditions not known. We were fortunate with calm conditions and anchored 5 cables S.W. of Breakwater South Light for a short period with no difficulties.

Pilot boards from launch outside and 1 tug is normally taken outside. VHF Channel 14 is used. They also use walkie-talkies to contact Harbour Control and tugs. Panamax vessels normally berth during daylight hours but may sail at any time. Pilot seemed competent and had an Assistant Trainee Pilot with him. (September 1987: Pilot disembarks inside breakwater. Vessel must attain good speed and allow for set and N'ly wind when passing between Inner Breakwater and Outer Breakwater.)

Depth of Water: Vessel berthed at half tide with 12 m. draft. Grain silo 13 m. Berth No. 10 depth 13 m. Berth No. 9 depth 14 m. Dredging being carried out. Rise and fall of tide 3.5 m. depth 4.0 m. Dock water density Berth No. 10 found to be 1023.

Tugs: There are 5 modern tugs. 3×2,400 h.p. and 2×1,600 h.p. Ship's ropes used. Normal conditions for Panamax, 1 tug each end.

Berths: Berth No. 10 (Berth No. 9 is similar) is a brand new container berth with 2 gantries for containers. Berth used for bulk coal discharge into lorries until new coal berth constructed. (Berth still not constructed in September 1987). Large flat area. Mooring bollards set at jetty edge every 23 m. A further set of unequally spaced large bollards are set along line 34 m. in from jetty. When mooring 4 head/stern lines, 2 springs and 2 long breasts each end are recommended. We experienced winds of over 30 knots off berth for short period, nobody seemed at all surprised, so would suggest this is reasonable tie-up.

Discharge: As stated this is a container berth. Panamax vessel with side opening hatches, port side to. Hatch centre stops and minor hatch fittings burnt off. Centre piece of hatch rail track tack welded on. Both hatch lids moved to starboard side. Section of ship's side rail in line with hatch burnt off. (This method not used on Berth No. 29). Wood sleepers placed on deck and mobile cranes lifted on board, 1 per hatch. These use small 4 – 5 ton grabs and discharge into lorries. Small bulldozer type vehicle put in each hold to move cargo to port side. Preparation about 1 day, discharge 9 days, replacing of pieces, etc., 1 day.

Bunkers: Heavy oil and diesel available by barge.

Lub. Oils: Most available, plenty of advance notice required.

Fresh Water: Available, from jetty or barge.

Repairs: Ship repairs undertaken with a 10,000 ton dry dock.

Money: Only New Taiwan Dollars available. US Dollars can NOT be obtained. Obtain any other requirements at previous port.

Immigration: For non-Taiwanese crew this is a problem, including Hong Kong, British and Indian. If any crew changes expected give plenty of notice. Visiting Hong Kong shore staff such as Superintendents, etc. required to renew dock pass every 2 days. Crew issued with shore pass (with photo for Chinese ratings) this has to be shown at dock gate outward and inward. Passes collected in on sailing, loss of pass results in fine on holder.

Stores: Victualling, fresh fruit and vegetables, reasonable price and good quality. Milk, meat, European style tinned goods all up to Chinese National Standard (CNS). Chinese dried foods, etc. appear good.

Beer can be obtained but not spirits or foreign cigarettes.

Customs: One person at least, around all the time. Bond and beer locker sealed. Issue will be given after a week in port, but give plenty of notice.

Certificates Required: Register, Loadline, Safety Equipment, Safety Construction, Radio Safety, Derat, Liferaft.

Documents: Crew List, 10 copies. Crew Manifest, watches, etc. and including foreign money. List of Stores. Deck, Engine, Victualling, Bond, Arms & Ammunition List, Narcotics List, Arrival Report, Declaration of Health, Departure Report (these three their forms). Specimen signature Master and Mate, General paperwork, large amount for any purpose. If landing spares or items for overhaul (motors rewound, etc.) give plenty of notice.

Medical Facilities: All available.

Drugs: Do not appear to be a problem in this port.

Grain Silo: I was informed that usual discharge rate is 5,000 tonnes per day.

Radio Station: Taichung Local. 24 hour watch M/F, W/T no difficulties encountered.

Cameras: Not to be taken ashore.

Walport: Possible to change video tapes. NOT films.

Telephone: Placed on board.

SHIPMASTER'S REPORT: September 1987.

Vessel berthed at Berth No. 29.

There are still no bulk discharge facilities at the port.

The method used in the Shipmaster's Report (November 1982) for Berth No. 11 is still used, but the ship's rails were not cut away. Rigging and cutting took about 12 hours, and all 7 mobile cranes in operation from the deck after 24 hours.

On completion of discharge, hatches were completed at irregular intervals, due to machine downtime, etc. Rewelding and rigging carried out as discharge continued and the interval between completion of discharge and completion of hatch repairs was about 3 hours.

Arrangements were made for Class Surveyor to inspect and issue certificate at end of work but this was not done efficiently.

The rate of discharge varied between 5,800 t.p.h. – 6,500 t.p.h., variation being due to very heavy rain and typhoon. The average rate per hatch per day was approximately 800-900 tons. — SNR

Associated with Jardine Shipping Agencies.

NOTES

Please also advise Shipping Guides Ltd.

Tanzania

CHAKE CHAKE: 05.14 S. 39.46 E.

DOCUMENTS, HEALTH: Refer to "Zanzibar", where vessel required to call for clearance by Port Offícals.
PILOTAGE: Not compulsory, but restricted to daylight only.
RESTRICTIONS: Entrance approached through Owen Channel or through passage between Mesale Island South and Ras Kingojelin. Depths from 10 to 22 fathoms but there are patches of 2.5 fathoms. Narrowest part of channel is 1.5 cables wide.

Vessels may enter and leave at any state of the tide, but in daylight hours only.
ANCHORAGES: No mooring buoys. Vessel's work cargo to lighters. Depth decreases to 3 fathoms for coastal anchorage off Ras Banani.
MAX. SIZE: 170 ft. length, 15 ft. draft.
TUGS: Not available and not required.
FRESH WATER: Not available.
FUEL: Not available.
STORING: Very limited facilities and it is recommended that where necessary all storing be done in Zanzibar.
AUTHORITY: See "Zanzibar".

DAR-ES-SALAAM: 06.50 S. 39.17 E. (See Plan)

PORT LIMITS: The Port of Dar-es-Salaam includes all tidal waters enclosed by a boundary which, commencing at high water mark at a point S.E. of Ras Koronja (approximately 9.66 km. East of the City of Dar-es-Salaam), follows a straight line due North to the West tip of the Outer Sinda Island. Thence a straight line to Makatumbe Lighthouse, thence a straight line drawn to South tip of Mbudya Island, thence a straight line drawn 254° to the high water mark at a point on the mainland South of the entrance to Mto Peremji. Thence following the high water mark around Msansani Bay, Dar-es-Salaam Inner Harbours to the first point due South of Outer Sinda Island.
DOCUMENTS:

Health Certificates (forms supplied by Pilot).
6 Crew Lists.
10 Passenger Lists.
Ship's Manifest.
Heavy Lift List.
Dangerous Cargo List.
Ship's Register.
Declaration and Advice of Consumable Stores (Form C-7 supplied by Customs).
Crew Declaration (Form C-8 supplied by Customs).

Shipmaster's Report: March 1981.

Declaration of Health.
1 Set of Vaccination Lists.
7 Crew Lists.
6 Passenger Lists.
Clearance from Last Port.
Ship's Register (Copy).
Dangerous Cargo Manifest.
Stores List (Form C-7).
Crew Declarations (Form C-8).
Parcel List (Form C-3).
Ship's Record & Master's Report (Form EAH-6007) (To Pilot).
Entry Report (Nasaco Form).
Departure Report (Nasaco Form).
Shore Pass (Form TIF 10).

PILOTAGE: Compulsory South of Makatumbe Lighthouse for all vessels over 200 n.r.t. The pilot launch is painted white and shows the conventional day and night signals. Vessels wishing to enter must await the arrival of the pilot launch at the Outer Anchorage, and, if necessary, must anchor clear of the leading marks.
ANCHORAGES: Anchorage outside in 7 – 8 fathoms, sheltered by Makatumbe Island during S.W. monsoon but exposed to swell in N.E. monsoon.
Shipmaster's Report: In good weather tankers waiting can anchor in a depth of 18 m., 12 cables from Makatumbe Light on bearing 250° True.
RESTRICTIONS: Movements in and out of the basin are subject to restrictions depending on drafts and state of the tide at Spring tides. Tankers, vessels over 135 m. LOA and vessels carrying explosives are not allowed to leave or enter during hours of darkness.

There is a signal station (with tower, flagstaff and red roof) on East Ferry Point (Lat. 6° 50′ S., Long. 39° 18′ E.). Entry prohibited signals are: day signal – black flag on masthead; night signal – 3 red lights disposed vertically, and distant signals – black square on white background.

The entrance channel at North end of the basin is about 1.25 miles in length from its outer entrance between the edges of the banks fronting North and South Reefs to the Inner Harbour, South of West Ferry Point.

There is a sharp bend in the channel at West Ferry Point. Minimum depth of 6.7 m. LWOST, and minimum width of 128.02 m. between the 4 fathoms contour lines. A very strong ebb and flood runs through the channel at periods of Spring tides. Maximum current at Spring tides – 3.5 knots. During period of S.E. monsoon strong winds and heavy seas may make entry difficult, but in Inner Harbour port working is normally unaffected by weather.
MAX. SIZE: Twin-screw vessels not exceeding 182.9 m. Draft 10.1 m. at HWOST, 7.0 m. at LWOST, and 9.1 m. at HWNT, and single-screw vessels not exceeding 175 m. Tankers LOA 175.26 m., 36,000 d.w.t., and draft 9.75 m. Also refer to "Mjimwema".
HEALTH: Radio Port Health Officer giving ETA, name last port and health condition of passengers and crew. "Q" flag to be displayed until Free Pratique given. Radio Pratique not available.
TUGS: 3 tugs available.
BERTHING: In the Inner Harbour there are mooring and anchorage berths for up to 9 deep-sea ships ranging from 350 ft. to 600 ft. (106.48 m. – 182.88 m.) in length and from 23 ft. to 30 ft. (7.01 m. – 9.14 m.) in draft.

Deep water quays total length 2,016 m. comprising Berths No. 1-11 with 10.06 m. in depth at LWOST.

Also see "Developments".
Accommodation:

Harbour sheltered and roomy, water area 95.9 ha; consists of tidal basin and Southern Creek, the latter having 11 deep-water berths. Anchorage in basin and creek.

		Depth	*Max. length*
"A"	Stern mooring	9.1 m.	183 m.
"B"	Moored mooring	7.6 m.	153 m.
"C"	Moored mooring	7.6 m.	183 m.
"D"	Single anchor	7.3 m.	183 m. waiting berth only.
"F"	Moored, buoys and anchor	7.3 m.	152 m.
"G"	Buoys	7.3 m.	168 m.
"H"	Buoys	7.1 m.	168 m.

In addition there are 2 coaster anchorages. The Southern Creek, at the S.E. corner of the basin has a navigable distance of 1.5 miles for ships drawing up to 30 ft. of water.
CARGO HANDLING FACILITIES: The port has no special facilities for bulk handling cargoes but, subject to advance notice being given, grabs can be made available.
Equipment and Other Facilities:

Deep water vessels berthed in stream are loaded and discharged by lighters. At the lighter quay there are 8 electric portal cranes for working lighters (1 × 5 ton and 7 × 3 ton), on the main quay, the port has 6 × 7 ton and 21 × 5 ton. There are 8 other portal cranes on the stacking yards as per details below:

(a) Belbase (AMI) — 2 × 10 ton cranes.
(b) Tanzania — 3 × 5 ton cranes.
(c) Yard 5, 6 & 7 — 1 × 7 ton and 1 × 7-20 ton Gosna Cranes
(d) Yard 8 — 1 × 5 ton Conrad.

Main Quay Cranes: Berth Nos. 1 – 8 have between them 24 portal cranes of 7 tons capacity each.
Mobile Cranes: 2 × 30 ton, 13 × 11 – 7 ton, 14 × 6 ton, 2 × 4 ton and 1 × 120 ton floating crane – "Ndovu". These are moved between deep-water quays, lighterage quays and any other points of work on the stacking yards as and when required.

Also see "Developments".
DENSITY: 1025.
TANKERS: Kurasini Oil Jetty at which tankers up to 175.26 m. LOA and 9.75 m. draft can discharge refined products to tanks ashore. Depth alongside 10.06 m. There is a refinery on the opposite side of the creek to the Kurasini Oil Jetty; the tankers serving the refinery are not to exceed 20,000 s.d.w.t. capacity. Also refer to "Mjimwema" where crude oil imports for Tanzania and Zambia are received.
STEVEDORES: Week days (except Saturday) 0700 – 1500 hrs. (45 minutes' break), 1500 – 2200 hrs. (no break), 2200 – 0600 hrs. (no break). Saturdays 0700 – 1345 hrs. (no break), 1400 – 2100 hrs. (no break). Sundays and public holidays 0700 – 1500 hrs. (45 minutes' break), 1500 – 2200 hrs. (no break).
FRESH WATER: Available at deep-water berths, and a water barge supplies water to ships at anchorage. All water is chlorinated but should be boiled and filtered. Water for boiler requires feed treatment (formal solutions adequate).
FUEL: Fuel oil, diesel oil and gas oil available.
MEDICAL: Facilities available.
REPAIRS: Several light engineering workshops. There is a Tanzania Harbour Authority Dockyard for construction and maintenance of Tanzania Harbour Authorities' lighters and other small craft. This has a slipway for vessels up to 100 ft., lifting power 100 tons. The Port Administration employs scuba divers.
REPATRIATION: Can be arranged.
CUSTOMS ALLOWANCES: Each crew member is allowed 1 carton of cigarettes, 1 opened bottle of spirits and 8 small beers.

All cabins are inspected by Customs.
AIRPORT: International airport with daily connections to all parts of the world.
TIME: GMT plus 3 hours. No alterations.
HOLIDAYS: Christmas Day and International Workers' Day are the only holidays on which no work is performed. Other holidays on which restricted working may be carried out are: Zanzibar Revolutionary Day (January 12th); Id-el-Fitr (2 days); Id-el-Haj; Good Friday; Easter Monday; Union Day (April 26th); Maulidi Day; Saba Saba Day (July 7th); Tanganyika Independence and Republic Day (December 9th).
SHORE LEAVE: Allowed.
SHIP SUPPLY SERVICE: Contact: PAC Lloyd (International) Inc., P.O.Box 1301, Dar es Salaam or Eagle Tugs, P.O.Box 98574, Mombasa.
DEVELOPMENTS: The port is currently in the middle of major developments which should significantly affect its capacity and efficiency. No new berths are being constructed but all the existing berths (excluding the SPM Oil Terminal) are being modified, modernised or rehabitated.

Berths No. 9, 10 and 11 are being converted into a dedicated container terminal (2 berths × 280 m.) with a capacity of about 100,000 TEU per annum. The terminal will have 2 × 35 ton gantry quay cranes, 5 × 35 ton rubber tyred gantry yard cranes and a rail container terminal (for both Tazara and TRC Railways) with 1 × 35 ton rail mounted gantry crane.

Backing up the port terminal will be 2 inland container depots in the Dar-es-Saleem area (Kurasini IDC, adjacent to the port and Ubungo IDC, about 15 km. along the port access road).

These container facilities were completed in December 1988.

The rehabitation of Berths No. 1 – 8 will provide a better lay-out, refurbished buildings and new heavy duty paving throughout for handling all general cargo traffic in the port. This work is due to be completed in 1991.

The Lighter Wharf modernisation, which was interrupted, is now due for completion with the provision of new paving and services.

A new bulk grain silo of 30,000 tonnes capacity is being constructed in the port to facilitate grain imports. This is due for completion in 1989.

The oil jetty which handles all petroleum oil products and other bulk liquids is undergoing major rehabitation, which is due for completion in 1989.

Among future developments which are under consideration are:

1. Improvements to the dockyard.
2. Improvements to the entrance channel.
3. New crude oil import facility.

AUTHORITY: Tanzania Harbour Authority, P.O.Box 1130, Dar-es-Salaam, Tanzania. *Tel:* 25839, 32064. *Telex:* 41346 Portreeve. *Cables:* Bandari, Dar es Salaam. *Contact:* Port Manager.

MJIMWEMA TERMINAL: 06.49 S. 39.22 E.

DOCUMENTS and all General Information; refer to "Dar-es-Salaam".

LOCATION: The position of the Monobuoy is Lat. 6° 48.8′ South, Long., 39° 22.1′ East, lying approximately 1.5 miles offshore in Mjimwema Bay. The buoy lies in 24 m. depth of water. The currents are up to about 1 knot and the direction varies.

PILOTAGE: Mooring Master/Pilot boards at position Lat. 6° 46.5′ N., Long. 39° 22.1′ E., subject to advice from Signal Station. Should the Pilot not be available on arrival, vessels are advised to keep underway and await the Pilot rather than anchor.

After mooring operations a Mooring Master/Pilot will remain on board.

Vessels must provide adequate means of boarding for Pilot, Customs and other officials. A pilot ladder with spreaders 4 ft. from the water and manropes are required.

The Mooring Master shall be provided with meals and accommodation comparable to a senior officer on board. The crew of the mooring launch will be provided with food comparable with ratings on board. No special foods need be provided. Accommodation also required for 2 divers.

RESTRICTIONS: Berthing during daylight hours only. Unberthing at anytime.

MAX. SIZE: Monobuoy accommodates tankers up to 100,000 d.w.t. (part discharge) and 125,000 d.w.t. (complete discharge). Minimum length allowed 650 ft. Max. draft allowed 55 ft.

HEALTH: Customs, Port Health and Immigration will board vessels on arrival.

RADIO: Within 6 hours of clearing the loading port, each tanker shall provide the Agent with the following information:

(a) Name of Ship.
(b) Name of last port from which the vessel cleared and the loading port if different from above.
(c) Estimated date and time of arrival at Dar-es-Salaam (Mjimwema).
(d) Cargo loaded.
(e) API gravity.
(f) Arrival draft, fore and aft.
(g) Lifting capacity of derricks.
(h) Size of manifolds.
(i) Personnel requirements.

72 hours from the pilot station, a second cable should be sent to Agent with following information:

(a) Name of ship.
(b) Amended time of arrival.
(c) Names of crew leaving the vessel (if any).
(d) Requirements of doctor and dentist.
(e) Any other requirements.

A final cable should be sent about 36 hours from the pilot station giving finally amended ETA.

When within 20 miles of the terminal vessel should call Dar-es-Salaam Signal Station on Channel 12 VHF. Channel 16 is available but is not continuously monitored.

VHF Channels 16 calling, 12 berthing. VHF Channel whilst discharging to be decided.

The Mooring Master will be in direct control of all radio communications on the vessel while in the terminal area. Any unauthorised communications may result in the immediate cessation of all operations and removal from the berth.

READINESS: Notice of Readiness will be accepted by the Receivers Representative when the ship is berthed and connected.

Any vessel which is not, in the opinion of the Berth Controller, ready in all aspects to discharge, may be rejected until corrections are made. The Harbour Master's decisions are final.

MOORING: The following equipment is supplied by Tanzania Harbours Authority. 2×10 in. circumference nylon ropes, 100 ft. long with 2 joining shackles. These will be hoisted aboard from the launch using the Starboard boom.

The vessel approaches the buoy head to wind and tide or the resultant of these forces, and should have one ship's mooring rope lowered through the centre Panama Lead down to the water level with 15 ft. of 3 in. rope lashed to the eye. As the vessel approaches the buoy the launch will connect the ship's rope to the floating pick-up rope, which is hauled aboard until the mooring chain is through the Panama Lead. The 2 shore ropes are then shackled to the chain and made fast aboard.

BERTH: The Monobuoy is a single point mooring buoy. The body of the buoy being secured in a fixed position with 6 moorings and the top of the buoy is in the form of a turntable allowing the ship, moorings and hoses to take up the position the vessel lies naturally due to tide, wind and current conditions.

HOSES: Raising and lowering of, connecting and disconnecting of hoses as well as other shipboard duties will be performed by the ship's crew under the advice of the Mooring Master. The ship should be capable of lifting 10 tons on her derrick, with a minimum of 7.5 tons.

When the vessel is securely moored, the launch will bring the hoses alongside on the starboard side. The vessel will lower the cargo hook to the boatman who will hook it on to the lifting ring on the forward hose. The hose will then be lifted to full height on the boom and secured on the "Hang-off Chains" supplied. The hose is then lowered to the deck and the operation repeated with the after hose.

After completion of discharge the hoses will be filled with sea water by the ship. The hoses can then be disconnected from the manifold and lifted over the side of the ship and hung there on the slip ropes to be slipped off simultaneously with the moorings. This last operation will be carried out on the advice of the Mooring Master.

UNMOORING: On sailing, hoses will already have been disconnected and towed clear by the attendant launch. The weight of the moorings is taken off the pick-up rope, the shackles disconnected, and the chain and pick-up rope lowered into the water. The shore ropes and shackles are then lowered into the launch, usually from the port bow.

The Pilot will then disembark, using a combination gangway/pilot ladder on the port side.

BALLAST: Ballasting will be allowed during discharge but only with the express permission of the Discharging Master. In the case of ballasting into dirty tanks a Dry Tank Certificate must be first obtained. Vessels will be allowed to carry out Crude Oil Washing, but no other form of tank cleaning. There are no sludge tanks ashore.

FUEL: Agip Tanzania have a bunker barge but can only supply fuel oil.

FRESH WATER: Up to 250 tonnes of fresh water is available by water barge. A pumping rate of approximately 10 tonnes per hour may be expected. Approximate cost is U.S.$4.60 per ton.

STORES: Stores are available in Dar-es-Salaam, but the Tanzania Harbours Authority cannot undertake to transport stores to the Monobuoy. Transport of stores to the buoy will be the responsibility of the Agent.

REPAIRS: During periods of calm and the fact that there is little current, it is foreseen that the problem of riding up on the buoy may occur. The vessel's engines shall therefore be available at all times and the telegraph shall be on stand-by while the vessel is in the berth. Engine repairs are not permitted. Should a vessel not be able to use her engines the cargo will be stopped and the vessel towed to a safe anchorage at the vessel's cost, until she can safely return to the berth.

SHORE LEAVE: Shore leave can be arranged through Agents. Should any of the crew require to be landed for medical or relief reasons, the Agent will be reponsible for providing transport to the Inner Harbour. Tanzania Harbours Authority craft will on no account be available to ferry crew members to and from the passenger pontoon. The Monobuoy lies 4.5 miles from the passenger landing pontoon, which is situated in the Inner Harbour.

POLLUTION: It is the Master's responsibility to see that no oil of any kind is pumped or spilled overboard from his vessel. This includes oily water from bilges, crude residues from the previous voyages or any other matter that may result in the pollution of the area. Owners and Masters should comply with any international regulations and recommendations concerning the prevention of pollution of the sea.

Serious consequences will arise if the above rule is broken. All costs and expenses involved will be for the account of the vessel concerned and the Master may be prosecuted under the Tanzania Merchant Shipping Act.

REGULATIONS: While in the berth the vessel should provide a pilot ladder on the opposite side of the vessel to the gangway, secured at the rail and ready for use.

No boats of any kind shall be lowered without permission from the Customs, Immigration and Harbour Master, except in an emergency.

Tanzania Harbours Authority maintains vessels to assist in berthing. These vessels are under the direct supervision of the Mooring Master/Pilot. Any service or facility provided by the Tanzania Harbours Authority, including the services of the Mooring Master/Pilot and boats are the vessel's risk. The furnishing of Mooring Master/Pilot and launches or other services and facilities shall not be construed to be or give rise to a personal contract.

STOWAWAYS: Vessels are warned that stowaways remain a serious problem at the Terminal. All exterior doors should be kept locked, especially in the forecastle, and, if possible, the chain lockers should be sealed on deck. A thorough search prior to departure is essential. Stowaways found aboard will be escorted ashore by the Port Police or the Pilot when he disembarks (contact Signal Station on VHF Channel 12).

AGENCY: The sole ship's Agency in Tanzania is National Shipping Agencies Co. Ltd (NASACO). The Department dealing with tankers at the Terminal is Ruvuma Department. Tel: Dar-es-Salaam 29425. Telex: 41235. P.O.Box 9082, Dar-es-Salaam.

SHIPMASTER'S REPORT: August 1985.
Fresh Water: Not available.
Stores: Not available.
Medical: Doctor and dentist not always available.

AUTHORITY: Tanzania Harbours Authority, P.O.Box 1130, Dar-es-Salaam, Tanzania. *Tel:* 25839, 32064. *Telex:* 41346 Portreeve. *Cables:* Bandari Daressalaam. *Contact:* Harbour Master.

MKOANI (Kohani): 05.21 S. 39.38 E. (See Plan)

DOCUMENTS, HEALTH: Refer to "Zanzibar".

PILOTAGE: Pilot available on request from Zanzibar.

RESTRICTIONS: Vessels passing through channel between Zanzibar and Pemba should inform Port Authorities 24 hours in advance.

Entrance through Mkoani leading marks, buoyed and well-lit channel, depth of 11 fathoms. Vessels may enter and sail any time night and day.

ANCHORAGES: No mooring buoys. Minimum depth 6 fathoms. Vessels work cargo to lighters. Sandy bottom with mud close inshore.

MAX. SIZE: Length 250 ft.

TUGS: 2 tugs available.

FRESH WATER: Not available.

FUEL: Not available.

STORING: Very limited facilities and it is recommended that where necessary all storing be done in Zanzibar.

DEVELOPMENTS: A jetty, 130.4 m. long, is to be constructed offshore and joined to the shore by a causeway 466 m. long and 4.0 m. wide. Depth alongside 9.0 m. The jetty will be able to accept a vessel 4,000 d.w.t. on the outer side and small domestic steamers and dhows on the inner side.

AUTHORITY: Ministry of Ports and Shipping, Port and Marine Department, P.O.Box 263, Zanzibar. *Tel:* 32858, 32847 (home). *Telex:* 57267 Shipco TZ. *Contact:* Port Officer.

MTWARA: 10.16 S. 40.12 E. (See Plan)

DOCUMENTS, HEALTH: Refer to "Dar-es-Salaam".

PILOTAGE: Compulsory. Pilot based at Dar-es-Salaam and flies to Mtwara when required. Scheduled flights 3 times a week. Early information concerning ETA to Harbour Master, Dar-es-Salaam. (Southbound vessels requested to divert to Dar-es-Salaam to embark Pilot).

Pilot boards 0.5 mile North of Shangani Reef Buoy from tug or available craft.

Signal Station can be contacted on VHF, Channels 12 and 16, between 0600 hrs. and 2200 hrs.

APPROACHES: The entrance is approached by a channel marked by buoys and leading beacons. At its narrowest point abreast of Msemo spit the channel is 1.5 cables wide. In spite of the sharp turn in this vicinity, vessels of up to 175.26 m. in length can enter the harbour at all stages of the tide. Once around the Msemo Spit there is a very good natural harbour with room for two 500 ft. vessels and 1 coaster alongside. There are 6 marked anchorages to accommodate vessels of up to 9.5 m. draft.

ANCHORAGES: No safe anchorage outside port.

RESTRICTIONS: Port closed from 1800 hrs. to 0600 hrs. No tidal restrictions.

MAX. SIZE: Length 175 m., draft 9.76 m.

RADIO: Dar-es-Salaam or Mombasa Radio.

TUGS: Join vessel off Signal Station.

BERTHING: Deep-water Quay: 1,248 ft. length; 9.75 m. depth alongside at low water. 2 berths available at quay.

Sheds and Stacking Yards:

The port has 4 sheds for reception and storage of cargo with a total area of about 16,272 sq.m.

Transit shed No. 1 floor area is 3,121.4 sq.m.
Transit shed No. 2 floor area is 3,121 sq.m.
Transit shed No. 3 floor area is 728 sq.m.
B.P. shed floor area is 9,302 sq.m.
Stacking yard area is 9,000 sq.m.

Cargo Handling Appliances:

2 Jones mobile cranes (11 tons).
7 Fork lift trucks (2.5 tons and 5 tons).
5 Tractor trailers.
2 Tractors.

Marine Craft:

The port owns 3 floating craft. These include 1 berthing tug "Kongoni" (not on station) and 2 labour launches.

CARGO GEAR: Vessels load/discharge using ship's gear.

STEVEDORES: Stowage plan required, preferably 2 weeks prior to arrival. Gang arrangements to be made 24 hours before arrival.

Normal Working Hours:
Weekdays: 1st shift: 0700-1500
2nd shift: 1445-2215
Saturdays: 1st shift: 0700-1230
2nd shift: 1230-2030

A maximum of 3 hours overtime is permitted after 2nd shift in order to finish the ship.

MEDICAL: Doctor available. All crew require valid cholera and yellow fever inoculation certificates.

DENSITY: 1025.

FRESH WATER: Not normally available during daytime but available at night.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Arranged by Agents.

HATCHES: Opening/closing carried out by stevedores.

IDENTIFICATION CARDS: Required.

REPATRIATION: Possible.

AIRPORT: 7 miles from the port. 3 scheduled flights a week to Dar-es-Salaam International Airport.

TIME: GMT plus 3 hours.

HOLIDAYS: All holidays worked as Sunday except following days when no work done: Christmas Day and 1st May.

POLICE/AMBULANCE/FIRE: Port Police Tel. 059-2182. Port Fire Brigade Tel. 059-2062.

TELEPHONES: Direct connection on board not possible.

BANKS: The National Bank of Commerce (NBC), P.O.Box 142, Mtwara. Tel. 059-2306. Telex: 56296. This bank is within 2 km. of the port.

STORING: Trucks can proceed alongside the quay.

SHORE LEAVE: Crew allowed ashore.

SHIPMASTER'S REPORT: December 1981 (Updated 1986).

Vessel called at Mtwara on 1st December, 1981. The following facts were obtained from Port Manager and Pilot:

Documents/Health: Refer to Dar-es-Salaam.

Pilotage: Pilot is based at Dar-es-Salaam and flies to Mtwara when required. Early information concerning ETA to "Harbour Master – Dar-es-Salaam". Pilot arrives by Air Tanzania regular flight. He may stay at the Pilot's Rest House or aboard the vessel. Pilot boards 0.5 miles N.W. of Shangani Reef Buoy from tug. Pilot ladder to be 6 ft. above water. Pilotage during daylight hours only. Signal station can be contacted on Channel 12 between 0600 hrs. and 1800 hrs. Channel 16 also available if required.

Approaches: Cape Delgado lighthouse unlit. The entrance is approached by a channel marked by buoys and leading beacons, all unlit. Buoys only weighted and liable to drift. There are 6 unmarked anchorages to accommodate vessels of up to 9.5 m. All buoys and leads unlit.

Radio: "Mombasa Radio".

Tugs: Available from Dar es Salaam.

Cargo Gear: Ship's cranes or derricks used. Shore facilities (not used for discharging) consist of: 12 Hyster fork lift trucks (max. 3 tons); 2 tractors and 10 trailers SWL 15 tons; 2 Jones mobile cranes × 15 tons each and 5 Coles mobile cranes × 7 tons each.

Stevedores: Stowage Plan required, preferably before ship's arrival.

Medical: Doctor available. Medicine and/or injections in short supply and may not be available. All crew require valid Yellow Fever Certificates and anti-Malaria tablets should be taken on arrival.

Density: 1025.

Fresh Water: Sometimes available from quay in small quantities. No water barge.

Provisions: Fresh fruit and vegetables available in market.

Fuel: Not available.

Repairs: No facilities.

Gangway/Deck Watchmen: Arranged by Agent.

Agent: Only one Agent – National Shipping Agencies. Cable address: "Navigation Mtwara".

Identification Passes: Made out by Immigration Officials on board. Collected by Agent prior to departure.

Repatriation: Daily internal flights to Dar-es-Salaam.

Airport: 7 miles distant by road.

Time: GMT plus 3 hours (permanent).

Holidays: All holidays normally worked except Christmas Day and 1st May when no work possible.

Working Hours: Seven days weekly 0700–1500; 1500–2200 with requested extension from 2200–0100 if to finish vessel (except Heavy Lifts).

Telephones: Direct connection on board not possible.

Telex: One machine in Post Office for general use. Otherwise Agent telephones Dar-es-Salaam Agent who forwards telexes.

Shore Leave: Crew allowed ashore.

Mail: Very slow.

Main Exports: Cashew nuts, sisal, timber, pigcon peas, Casava in bags (not palletised) or bulk (bags slit).

Fenders: Tyre fenders alongside cemented quay. Additional fenders by ship recommended.

Cargo Security: Though adequate guards, security of cargo on quay is a problem as frequent blackouts due to power failures.

Aero (RC): Strong signal operational 0800–1530 LMT.

Restrictions: Cameras must not be used. Taking of any photographs whatever is strictly prohibited.

Customs Allowances: Officers: 8 cans beer, 1 part bottle spirits. Ratings: 8 cans beer.

Heavy Lifts: Not worked after 1800 hrs. due to darkness.

Notes: (a) All navigation lights in Tanzania (except Zanzibar Island and Pemba Island) are unreliable.

(b) If next port is Dar-es-Salaam, Pilot will remain on board and take vessel into Dar-es-Salaam.

SHIPMASTER'S REPORT: December 1983 (Updated 1986).

Documents/Customs Regulations:

Crew Declaration Form (Form C.8)
Declaration and Advice of Consumable Stores (Form C.7)
Passenger List or Nil List (Form C.6)
Parcels List or Nil List (Form C.3)

One copy of each of the above being required and 1 copy of the Manifest. (Company Manifest not acceptable, Form supplied locally.)

Dutiable goods allowance:

Each member of the crew including the Master is allowed 1 ounce of tobacco or 25 cigarettes per day. The Master and officers are also allowed a quarter pint of potable spirits and 1 quart of wine or beer. The other members of crew are allowed either a third of a pint of spirits or one sixth gallon of beer or one sixth gallon of wines. Dutiable stores are issued to a limit of 8 days (cigarettes) and 4 days (beer and spirits).

Quarantine Regulations:

1 copy of Maritime Declaration of Health.
1 Crew List with valid dates for Cholera and Yellow Fever.
Pratique not granted by radio.

Pilotage: Compulsory. Pilot is available between 0600 – 1800 hrs. and boards in an approximate position 1 to 2 miles North of Shangani Shoal. Pilot boat (VHF Channels 12 and 16) – Pilots have hand set.

Anchorages: No recommended sea anchorage. If arriving off Mikindani Bay at night, it is prudent to cruise WELL OFF until daylight, currents are strong and set onshore.

A sheltered anchorage exists in the inner bay with reported good holding ground in about 12 fathoms.

Approaches to Berth(s): From the pilot station passing S.W. of Shoal Buoy into channel marked by an unlit buoy. The sharp bend around Msemo Spit requires very careful navigation and steering.

Radio: Standard instructions/communications.

VHF: Channels 12 and 16 available between 0800 – 1200 hrs. and 1400 – 1600 hrs. local time Mtwara Signal Station.

Tugs: Possibly available (on prior notice) from Dar-es-Salaam.

"Kongoni", a diesel tug of 1,100 h.p., equipped with fire pumps (water only) and VHF Channels 12 and 16. Stationed at Dar es Salaam and temporary awaiting repairs.

Description of Berth(s): Berth No. 3 situated on the main wharf which is of stone construction with rubber tyre fendering. Owned by Tanzania Harbours Authority.

Berthing: Night berthing/unberthing is not permitted.

Vessels normally berth starboard side to, 1 tug meets vessel off the signal station.

Mooring wires are permitted: shore gangway is available.

Density: 1025.

Tankers: Shore Lines: 10 in. Connections: 8 in. flexible hose. 65 m. from Eastern end of quay approximately. Grades: M.S., G.O., and K. Maximum Pressure: 75 p.s.i.

Ships' lifting gear required for 1.5 ton lift.

Fuel: Bunkers not available.

Fresh Water: Water supply has been improved but shortages may be felt in the dry season. It is reported to be of poor quality and should not be used for domestic purposes, unless boiled and filtered (See "Laundry and Stores").

Ballast: No ballast disposal or tank cleaning facilities available.

Port Regulations: Immobilisation of engines not permitted alongside.

Laundry and Stores Facilities: Reports indicate that fresh water and/or provisions obtained at Mtwara are of very poor quality and may have been the source of a severe infection which affected several ships' crews. Masters are, therefore, warned accordingly.

Repair Facilities: None available.

Crew Identification Cards: Crew require identity cards when proceeding ashore.

Medical: Medical facilities with government hospital available.

Precautions: Be careful of stowaways.

AUTHORITY: Tanzania Harbours Authority, P.O.Box 530, Mtwara. *Tel:* 2155, 2121. *Telex:* 56076. *Contact:* Pilot and Port Manager.

TANGA: 05.04 S. 39.08 E.

PORT LIMITS: From high water mark at Ras Kwawa 090° to the meridian of 39° 15′ E., thence 180° to the parallel of Lat. 5° 05′ S., thence 270° to the mainland at high water mark. Time of anchorage within port limits to constitute an "arrived vessel".

DOCUMENTS, HEALTH: Refer to Dar-es-Salaam.

Shipmaster's Report: March 1981.

Same as Dar-es-Salaam "Shipmaster's Report" except: 7 Passenger Lists, 2 sets Vaccination Lists, Heavy Lift List.

PILOTAGE: ETA required via Mombasa Radio, if not given by Agents at previous port of call. Pilot embarks from white launch in vicinity of Ulenge Beacon on Ras Kazone leading line. Pilot ladder required on port side in N.E. monsoon, and on starboard side in S.W monsoon.

Vessels wishing to enter must await the arrival of the Pilot at the outer anchorage and, if anchored, must anchor well clear of the leading lines.

APPROACHES: Tanga is approached from the S.E. through channel in line with Ulenge leading marks bearing 319° (T). A 3 fathom bank to starboard is marked by ship channel buoy. Care should be taken in this vicinity as there is frequently a strong set to the N.E. On the port hand, Niule Reef is marked on Northern tip by a buoy. After passing Niule Reef Beacon it is necessary to turn to port on to Ras Kazone leading marks bearing 266° (T) until Ulenge Beacon is sighted.

A signal station is situated immediately below Ras Kazone High Light. Signals are exhibited to indicate if inner channel to harbour is clear and morse lamp messages may be exchanged with incoming vessels.

Late afternoon arrivals to Tanga may encounter poor visibility of land marks due to haze from setting sun, but a chimney on the fertiliser factory site on Ras Kazone with 3 vertical red lights at a height of 100 m. is conspicuous.

ANCHORAGES: Tanga has no deep water berths. It is a lighterage port where ships are worked at anchor in the stream. Eleven safe anchorages have been marked by means of beacons. The inner harbour provides 7 anchorages for use by deep sea vessels with length of up to 213 m., and drafts of between 6.4 m. and 9.5 m.

The outer harbour has 3 anchorages with drafts well over 9.45 m.

Incoming vessels without Pilot should not anchor within 1 mile of Ras Kazone.

RADIO: Mombasa Radio. Ras Kazone Signal Station keeps 24 hour VHF watch on Channel 16, working on Channel 12.

TUGS: 2 small tugs available.

BERTHING: All except bulk cargo work is carried out at anchor. Vessels are not berthed in Inner Harbour during hours of darkness except by special request in cases of urgency.

Fertiliser Jetty: A Fertiliser Jetty with a single berth of 16 m. maximum draft is available in the harbour. The jetty has 2 cranes connected to a sophisticated hopper system for handling materials for the fertiliser factory only.

Also see "Cargo Handling Facilities".

Quays: The new Lighter Wharf, 240 m. long, is situated at the Eastern end of the port. It has a depth of 2.44 m. at low tide. The old wharf now under modernisation has a length of 140 m., and has similar depth of 2.44 m. at low tide.

Facilities for harbour dhows and schooners engaged in coastal wise cargo transportation are provided at the end of the old wharf where only 1 schooner or dhow can work at a time. The water alongside has a depth of 2.44 m. at low tide.

CARGO HANDLING FACILITIES: One 20 ton fixed crane is available on lighterage wharf for heavy lifts. 12 cranes of 5 tons capacity also available. A jetty on the Eastern side of Ras Kazone provides 1 berth for vessels of 20,000 d.w.t. equipped for the discharge of bulk cargoes and liquid ammonia. Two portal cranes of 7 tons capacity fitted with grabs. Jetty currently handling bulk products for fertiliser factory.

The port is able to handle 20 ft. containers on 5×20 ton trailers.

The port has 33 fork lifts, 3 tractor, 1 shunter and 2 Coles cranes, 3×16 ton Scamel trailers, 6×8 ton Scamel trailers, 4 Hyster cranes and 4 Scamel hoses. The above equipment is maintained by the Authority's mechanical and electrical workshops at the port.

Sheds and Stacking Yard: There are 3 sheds for reception and storage of cargo.

The main stacking yard which is rail and road served covers a total area of 20,000 sq.m. There is also a new yard which covers an area of about 861 sq.m. Shed Nos. 6 and 8 are mainly for handling exports while Shed No. 7 is for imports. Total floor space of the shed is 10,000 sq.m.

Marine Craft: The transfer of cargo from vessels working at anchor to the wharves and vice-versa is done by means of lighters. There are 15 lighters in use. In addition there are 4 lighter towing tugs, 3 runboats, 4 labour launches and 2 landing pontoons.

PASSENGER FACILITIES: All passengers and visitors to ships pass through the Customs Passenger Terminal at the Eastern end of the new lighter wharf, and embark or disembark from the pontoon landing stage. Private hire launches available.

FRESH WATER: Not available.

FUEL: Only available to coasters at the lighter quay.

GENERAL: Refer to "Dar-es-Salaam" for all general information.

AUTHORITY: Tanzania Harbours Authority, P.O.Box 443, Tanga. *Tel:* Tanga 2721. *Telex:* 45000 Harbor TZ. *Contact:* Harbour Master.

WETE (Pemba): 05.14 S. 39.43 E.

DOCUMENTS, HEALTH: Refer to Zanzibar.

PILOTAGE: Not compulsory, but restricted to daylight only. Vessels passing through channel between Zanzibar and Pemba should inform Port Authorities 24 hours in advance.

RESTRICTIONS: Entrance through Uvinje Cap, channel depth decreasing to 11 fathoms, with shallow patches to be avoided. Narrowest part of channel is 1.5 cables wide. Vessels may enter and leave at any state of tide but in daylight only.

ANCHORAGES: No mooring buoys. Vessels work cargo to lighters. Depth decreases to 2.5 fathoms. Mud bottom.

MAX. SIZE: 240 ft. length; 25 ft. draft.

TUGS: 2 tugs and 1 labour boat.

LIGHTERS: 3 lighters of 200 tons each.
6 lighters of 100 tons each.

FRESH WATER: Not available.

FUEL: Not available.

STORING: Very limited facilities and it is recommended that where necessary all storing be done in Zanzibar.

AUTHORITY: See "Zanzibar".

ZANZIBAR: 06.09 S. 39.11 E. (See Plan)

DOCUMENTS:

Bill of Health.
3 Crew Lists.
6 Passenger Lists.
3 Cargo Manifests.
3 Customs Manifests.

Also Required: Bills of Lading, Ship's Papers, Ship's Certificates, Health Certificates (Yellow Fever and Cholera).

PILOTAGE: Compulsory. Pilot requires ETA 24 hours before arrival. Contact can be made through pilot station (VHF Channel 16 – 24 hours a day). Pilot boat may be contacted on VHF when in operation – pilot boat is painted orange.

Vessels approaching from English Pass embark Pilot at Seagull Buoy, and vessels approaching from South Pass meet Pilot at Penford Buoys. Pilot takes vessel in an out, day and night. Vessels awaiting Pilot anchor at the boarding position.

Recommended time for entry and departure is between 0600 hrs. and 1800 hrs.

ANCHORAGES: 6 anchorages to accommodate vessels drawing up to 32 ft. Additional anchorage provided for vessels carrying explosives.

RESTRICTIONS: 2 entrances, English Pass and South Pass. The former is approximately 1 mile wide and has minimum depth of 6 fathoms 4 ft. and a very narrow angular turning corner of 1.7 cables width. South Pass wider and deeper than English Pass. Passes are well buoyed and lit. In English Pass, tidal stream runs North and is stronger on ebb than on rising tide. South Pass, tidal stream runs N.N.W. and stronger on flood than on ebb-tide. Vessel may enter or leave at any state of tide.

MAX. SIZE: (Anchorage) Length 1,100 ft., beam 110 ft., draft 32 ft. Also see "Developments".

HEALTH: Pratique given by Quarantine Officer who boards on arrival. All crew required to be in possession of valid yellow fever and cholera inoculation certificates.

RADIO: No official call sign for the control station, but there is a new radio installation at the Agency on VHF Channel 16 with a call sign ZANSAC (Zanzibar National Shipping and Agency Corporation).

There is also a long-range radio on frequency 8297.3 kHz.

RADAR: No installation.

TUGS: No tugs are required as all vessels work in stream. Tugs are only used for towing barges to and from vessels, transporting labour and other stevedoring activities.

BERTHING: Concrete pile wharf 800 ft. long to North of Ras Shangani used mainly for lighterage purposes and for berthing Government coasters. Under special circumstances, upon prior request to Port Officer, vessels of less than 375 ft. length and drawing less than 20 ft. may be permitted to berth alongside, but due prevailing onshore winds this practice not encouraged.

Also see "Developments".

CRANES: Four old cranes and 1 mobile crane of 7 tons at the Wharf. No heavy lift cranes, however if heavy lift crane required arrangements are easily made to put the load in a landing craft to be discharged at a point near the port, using lowloader to tow it to its destination. No objection to vessel using its own gear.

BULK CARGO FACILITIES: No berth for foreign vessels, all work carried out in stream.

Discharging Rate: 350 – 400 tons per gang per day in case of bagged stuff or pallets. No facilities for bulk cargo handling or containers, but one or two containers can be handled.

STEVEDORES: Normal working hours Monday to Thursday, 0700 to 1500 hrs. Friday 0700 to 1200 hrs.

Work can be extended on overtime for a second shift up till 2300 hrs.

Average rates: bagged cargoes 15 tons per gang hour, general cargo 8 tons per gang hour.

LIGHTERS:

2 lighters, open at the top for heavy equipment 280 tons each.

2 lighters for bag and general cargo, each with a capacity of 300 tons.

5 lighters for bag and general cargo, each with a capacity of 200 tons.

5 lighters for bag and general cargo, each with a capacity of 150 tons.

6 lighters for bag and general cargo, each with a capacity of 100 tons.

FRESH WATER: There is one water barge of 250 tons capacity. Water can be supplied at the wharf by hydrant or at the anchorage in the stream by water barge.

FUEL: Not available.

SURVEYORS: Department of Marine Transport, P.O.Box 263. Tel: 32857.

STORING: See "Prelims".

1. Storage done by barges.
2. There is no restriction in doing so, provided the Master can allow both operations to be done simultaneously.
3. Yes.
4. Yes.
5. Stores have to be checked by the Customs Authority.

GENERAL: Members of the crew who wish to fish around the harbour limits have to notify the Signal Station and the harbour police of direction they are going. If the crew wish to visit the offshore island, they have to contact the Agent who will obtain permission for them and advice.

DEVELOPMENTS: *Malindi Wharf:* Rehabitation of the wharf expected to be completed by early 1990.

The West Wharf: Facing West with a total length of 260 m. This is a combined length of 170 m. on the Northern end with 9.0 m. water depth for longer vessels of up to 30,000 d.w.t. The Southern portion of 90 m. length with 5.5 m. water depth is for smaller vessels berthing.

The North Wharf: Facing North with 130 m. length and 5.5 m. water depth. This will also be used for smaller vessels' berthing.

The new jetty will extend some 10.0 m. further seaward of the existing one, and will have a container storage area located on the Southern end of the West Wharf.

AUTHORITY: Department of Marine Transport, P.O.Box 263, Zanzibar, Tanzania. *Tel:* 32858. *Telex:* 57267 Shipco TZ. *Cables:* Shipping. *Contact:* Captain Ramadham Saleh, Port Officer. Major H. Kh. U. Minde, Director, Department of Marine Transport.

NOTES

Please also advise Shipping Guides Ltd.

Thailand

GENERAL:

IMMIGRATION: The Thai Immigration Department has issued a Notification, dated March 15th, 1976 to the following effect:

"Chinese or Hong Kong crew members not in possession of Seamen's Discharge Books, but holding Certificates of Identity only are not recognised as bona fide crew members, and are liable to Immigration Guarantees at 50,000 Baht per person, to be filed upon arrival."

All concerned are kindly requested to check and ensure that all Chinese crew members are in possession of either Passports or valid Seamen's Discharge Books, and not Certificates of Identity, to avoid complicated Immigration procedures involving deposits, etc.

REGULATIONS: Thai Government Regulations: Thai laws relating to the production, possession, distribution and use of narcotic drugs are extremely severe. Penalties for infringement range from prison sentences and fines to life imprisonment and even execution.

The Thai Navigation Act requires Masters of all vessels calling at Thai ports to observe the following:

On preparing to depart Thai waters, vessels shall fly the International Code flag indicating that the vessel is about to proceed to sea (code flag P).

If the vessel is to depart in the morning this flag is to be flown in the afternoon of the previous day, if departure is in the afternoon code flag P is to be flown in the morning.

Departure shall be notified to the Harbour Master at least 6 hours before expected time of departure.

Documents required by Port Authorities (other than those required for specific ports) include:

Ship's Licence and Safety Equipment Certificate.
Certificate of Registration.
Certificates of Competency (including Radio Officers).
Radio Certificate.
Ship's Articles.
Last Port of Call Clearance.
Log Book.
Load Line Certificate.
Derat or Exemption Certificate.

BANGKOK: 13.26 N. 100.35 E. (See Plan)
KOHSICHANG: 13.10 N. 100.50 E.

PORT LIMITS: A vessel is normally considered to be an "arrived ship" on passing the Paknam Customs Station.

DOCUMENTS: Ship's forms: Crew List; Passenger List; Store List; List of Arms and Ammunition for ship's use; List of Arms and Ammunition in possession of passengers; List of opium and harmful habit-forming drugs; List of crew private belongings (cigarettes, radio, gramophone, camera, etc., including foreign currencies and liquors); Dangerous Cargo List; List of heavy lifts; Stowage Plan; Inward Cargo Manifest; Transit Cargo Manifest; Through Cargo Manifest; List of Containers.

Documents to obtain from officials and Agents: Immigration forms No. 3, 4 and 35, obtainable from Agents. International Maritime Declaration, obtainable from Quarantine Officer.

For safety reasons, all dangerous goods such as calcium hypochlorite, butanox (methyl ethyl ketone peroxide), sodium hydrosulphide, nitrocellulose and potassium chlorate, are not allowed to be kept in a godown or dangerous goods warehouse. Such dangerous goods have to be discharged overside into a barge or cargo boat or truck.

APPROACHES: The entrance of the river Chao Phraya is marked by the Bangkok Bar light beacon situated at the Lat. 13° 26′ 24.3″ N., Long. 100° 35′ 48.1″ E. Sea-going vessels have to cross the bar at the mouth of the river through an 18 km. long bar channel, which is dredged to a depth of 8.5 m. from MSL (mean sea level), and a bottom width of 100 m. in the straight section and 250 m. in the curve.

The depth of the river within the port area varies from 8.5 m. to 11 m. from MSL.

The MSL at the Bangkok Bar and at Klongtoi is 2.3 m. and 1.63 m. above lowest low water respectively.

At present the limiting length of vessels entering the port is 172.2 m. (565 ft.). The limiting draft of vessels will be determined by the bar constant plus the depth of water (predicted in the Tide Table published yearly by the Hydrographic Department RTN) from LLW at the Bangkok Bar, but the max. draft of vessels allowed to cross the bar is not over 27 ft.

PILOTAGE: Compulsory at Bangkok (Kohsichang not required); Advance notice required 48 hours prior to arrival.

Location pilot station Bangkok: Lat. 13° 22.6′ N., Long. 100° 35.9′ E. Area waiting pick-up Pilot will be close to pilot station.

Also see "Shipmaster's Report" dated March 1984.

ANCHORAGES: See "Shipmaster's Report" dated March 1984.

RESTRICTIONS: *Bangkok:* No restrictions, able enter day and night, dependent tide at Bar Channel.

Kohsichang: No restrictions, able to enter day and night.

MAX. SIZE: Bangkok: Not exceeding 565 ft. LOA. Max. draft 27 ft.

Kohsichang: See "Berthing".

HEALTH: *Radio Pratique:* According to the Thai Ministry of Health's Regulations and International Health's Regulations Article 36:

Under the responsibility of ship's Master and shipping Agents, vessels from infected areas may apply for exemption of Quarantine through Radio Pratique by telegram sent to Quarantine Bangkok, stating name of ship, last port, number of passengers and health of crew and passengers.

(a) Vessels with passengers from infected areas proceeding to the berthing places in Bangkok must slow down at Paknam enabling Port Health Officer to board the ship for inspection.

(b) Vessels without passengers from infected areas go directly to berthing places in Bangkok where they will receive Port Health Officer for inspection.

Remarks: In case of suspected infectious disease on board any ship or anything suspect about health or ship sanitation, the ship's Master is requested, as early as possible, to inform the Port Health Officer at International Quarantine Office (Medical) Section, Immigration Division, North Sathorn Road, Bangkok, Tel. 39588.

Documents Required: 1 copy of Maritime Declaration of Health; 1 copy of Crew List; 1 copy of Passenger List; Derat or Derat Exemption Certificate.

Vaccination: Vaccination Certificates required: Cholera (only when leaving from infected areas); Yellow fever (only when leaving from infected areas).

However, vaccination may be done as deemed necessary by Port Health Officer even if the crew or passengers are from non-infected areas.

Vaccination certificates will be shown collectively for transit passengers/crew members and individually for disembarking passengers/crew members only.

Exemption from Vaccination: If the Port Health Officer is of the opinion that vaccination is contra-indicated on medical grounds, he shall provide the persons with reasons, written in English, underlying that opinion, which Health Authorities should take into account.

Death on Board: In the case of death on board after the ship arrived at the anchorage or at the port, permission to land the corpse must be obtained after the inspection of the Port Health Officer, if the cause of death was not quarantinable diseases.

Ship's Master or shipping Agent must inform the Port Health Officer if there are cadavers and/or remains on board of persons who died in a foreign port, in order to pass through the quarantine. The dead should be accompanied by a death certificate (or a true copy), signed by the medical officer and placed in a coffin hermetically sealed in a casket, which is air-tight and waterproof.

According to Immigration Law B.E. 2493 (1950): The traveller to Thailand must be free from diseases forbidden under section 14 (4) of the Immigration law such as: trachoma, leprosy, tuberculosis, venereal diseases, including persons having physical or mental defects who cannot earn their living.

RADIO:

Name of Station	*Frequencies*	*Remarks*
Bangkok Radio:		
HSA Long Wave	500 kHz (for calling) 512 kHz (for traffic)	operate 24 hours
HSA Short Wave	8686 kHz (for calling) 8573, 8686, 12800 kHz (for traffic)	operate 7 times a day every day beginning hours of 0000, 0200, 0500, 0800, 1100, 1400 and 1600 (GMT).

In addition to above, communication can be made through the Port Radio and Pilot Radio; these 2 stations can only be reached when less than 24 hours from Bangkok, their particulars as follows:

HSC 61	L.W.	500 kHz (for calling) 443 kHz (for traffic) operate 2300 hrs. – 1700 hrs. GMT Traffic Lists broadcast at 0450 hrs. GMT, and the beginning of every hour every day.
HSC 62	S.W.	8466 kHz. Operate 5 times a day every day beginning hours of 0000, 0300, 0600, 0900 and 1300 hrs. GMT. 8292.5 (S.S.B./R.T.) also available.

Information to be supplied by incoming vessel:

(1) Vessel's name and nationality.
(2) Last port of departure.
(3) Estimated time of arrival pilot station.
(4) Draft (fresh water) in metres or feet.
(5) General cargo tonnage for discharge.
(6) Dangerous cargo.
(7) Heavy lift required.
(8) Fresh water required.
(9) Number of passengers (landing and transit).
(10) Time of dropping anchor at pilot vessels.

VHF: VHF communication with port radio and pilot radio through Channel 16 – 156.8 MHz (Calling – 24 hours service), Channel 14 – 156 MHz. (Working). Also VHF communication with shore for International Maritime Mobile Service under following:

Channel 24		
For ship transmitting frequencies	157.20	(for calling)
For shore ,, ,,	161.80	
Channel 26		
For ship transmitting frequencies	157.30	(for traffic)
For shore ,, ,,	161.90	service 24 hours
Channel 28		
For ship transmitting frequencies	157.40	(for traffic)
For shore ,, ,,	162.00	

TUGS: Will join when vessel approaches berth, using tug's line without extra charge. 8 tugs available, 1,000 h.p. – 1,200 h.p.

BERTHING: No difficulties in approaching berth. Agents will cable Master to inform when Pilot has been ordered to board vessel.

Midstream: 21 anchorage places and mooring buoys for sea-going vessels.

2 berths in front of Co-operative Salt wharf for 500 ft. vessels
4 berths in front of Customs boarding station for 300 ft. vessels.
2 berths at Bangplakod for 565 ft. vessels.
1 berth at Bangplakod for 500 ft. vessels.
6 berths South Sathupradit (6 mooring buoys) for 450 ft. vessels.
3 berths North Sathupradit for 400 ft. vessels.
4 berths North of Krungthep bridge for 280 ft. vessels.

Berths: 87 wharves on both sides of the river for sea-going vessels:

16 berths for imported general cargo (km. 27 to km. 29) on the left bank of the river at Klongtoi operated by the Port Authority of Thailand for 565 ft. vessels with 27 ft. draft.

1 berth for imported cargo (km. 39.5) on the right bank of the river operated by Thai Maritime Company for 400 ft. and 280 ft. vessels.

2 berths for imported general cargo (km. 46) on the right bank of the river operated by Thai Maritime Company for 250 ft. vessels.

14 berths for imported petroleum products operated by private and government organisations for 150 ft., 350 ft. and 565 ft. vessels.

54 berths for export cargo operated by private companies for 280 ft. to 565 ft. vessels.

36 dolphins in front of Klongtoi Wharf. A row of 36 dolphins along the river at a distance of 275 m. from the Klongtoi Wharf, to accommodate 7 ocean-going freighters for exported cargo.

25 dolphins at Bang Hua Sua, Samutprakarn to accommodate 8 ocean-going freighters for imported-exported cargoes.

Kohsichang: 7 berths available, no limit on length, max. draft 35 ft. – 47 ft. Kohsichang is not under the jurisdiction of Port Authority of Thailand.

Also see "Shipmaster's Report" dated September 1982.

CRANES: 2 floating cranes of 125 tons capacity may be used for handling cargo in the ship's holds. Both are owned and operated by private companies.

Port Authority Equipment:	*No.*	*Capacity*
Semi portal cranes	12	3-5 tons
Mobile cranes	25	5-50 tons
For containers and heavy lifts	2	165 tons
Side loaders	2	35 tons
Top loaders	10	10-35 tons
Forklift trucks	431	5,000-10,000 lbs.
Towing tractors	29	8,000-12,000 lbs. DBP.
Trailers	84	1-30 tons
Yard hustlers	25	30 tons
Tractors (for trailer)	7	30 tons
Fifth wheels	7	—
Full trailer vans	5	5-7 tons
Motor trucks	151	5-7 tons
Shifter containers	4	30 tons
Chassis	78	30 tons
Pallets	50,800	—

BRIDGES: Bangkok port has one bridge only. However, as bridge up river, vessel permitted to pass bridge with LOA not exceeding 280 ft.

STEVEDORES: Vessel to advise Agents 48 hours prior arrival, text required in this cable to be ETA, Drafts, Tonnage of cargo aboard for Bangkok, Number of crew/passengers, Dangerous cargo/Heavy lifts, Gangs required. Undertaken by private companies.

Working Hours: 0800-1200 hrs. – day shift, 1300-1630 hrs. – day shift, 1630-1800 – overtime (working through), 1900-2400 hrs. – first half-night shift, 0100-0500 hrs. – second half-night shift, 0500-0700 – overtime (working through, but should apply for P.A.T. approval).

On Saturdays, Sundays and public holidays, the day shift finishes at 1600 hrs.

MEDICAL: Hospital facilities available, advance notice of ETA required.

TANKERS: Diameter of shore line various from 6 in. to 20 in. All terminals are able to provide reducers. No slop facilities available.

DENSITY: Bangkok: Minimum 1000, maximum 1011; Kohsichang: 1021.

CUSTOMS ALLOWANCES: *Customs Regulations:* It is prohibited by law to bring the following articles into Thailand: narcotics: hemp, morphine, cocaine, opium, heroin, marijuana etc.; obscene literature or pictures, firearms or ammunition (except those obtained a permit from the Police Department or the local registration officer).

Following items are permitted to bring into Thailand free of duty: personal effects: accompanied with the owner for his own or professional use in reasonable quantity, except motor vehicle, fireams and ammunition, provisions. As for spirituous liquor, cigarettes, cigars or smoking tobacco, being personal effects and accompanied with the owner, the Director General of Customs may impose any restriction with respect to the exemption from payment of duty at any port as he considers suitable but the quantity must not exceed: a) cigarettes; two hundred grammes, b) cigars, smoking tobacco; two hundred and fifty grammes, each or altogether, c) spirituous liquor; one litre. Photographic/cinematographic apparatus and sound recording machines imported by persons who temporarily visit Thailand for the purpose of taking photographs or recording; but films, plates or articles for recording, imported for such purpose must be in accordance with the condition and quantity specified by the Ministry of Finance: a) photographic films (roll); not exceed 5 rolls, b) photographic films (plates); not exceed 40 plates, c) cinematographic films (8 or 16 mm. in width); not exceed 5 rolls, (to be re-exported within six months from the date of importation).

Permanent residents of Thailand must register their cameras on the outgoing trip to gain duty free status.

The export of Buddha images and antiquities are prohibited except for qualified educational, cultural and archaeological purposes.

CARGO GEAR: Supplied by stevedores except cargo tent and forklift truck.

IDENTIFICATION CARDS: Required for all crew and officers.

FRESH WATER: Available, supply can be made through barges and shoreline. Capacity of barges from 120 to 250 tons, rate of supply approx. 30 t.p.h. Advance notice 24 hours.

FUEL: Available. Supply can be made by barge and alongside terminals, no delay on bunkering, advance notice 48 hours.

GANGWAY/DECK WATCHMEN: Necessary. Theft of wire, paint and tools has occurred.

OPENING/CLOSING HATCHES: In general carried out by stevedores without extra charge. (Ordinary hatch covers, not new hatch cover system.)

REPAIRS: Only minor repairs.

DRY DOCKS: 1 for vessels up to 360 ft. LOA.

REPATRIATION: Possible; however, no facilities for crew changes.

AIRPORT: About 25 km. from Bangkok, regular services by airlines.

TIME: GMT plus 7 hours. No change during the year.

HOLIDAYS: Able work all around the year except December 31st and January 1st.

POLICE/AMBULANCE/FIRE: Police (Highway) 816240, 816241, 816250. (C.I.D.) 219111, 225151; Ambulance 811544; Fire 816666, 811544.

TELEPHONE: Available when alongside PAT berths.

SERVICES: No tank cleaning equipment. No facilities for discharge of tank washings. Compass adjusting, but spare parts unavailable. Radar/VHF/radio repairs. Lloyd's/ABS/Veritas/Nippon Kaiji Kentei Kyokai Surveyors available.

SHORE LEAVE: Permitted.

DELAYS: Occasionally congestion, delay 1 to 2 days.

DEVELOPMENTS: 6×32.5 ton gantry cranes on order. 3 cranes will be delivered late 1988 and a further 3 cranes will be delivered in 1989.

SHIPMASTER'S REPORT: September 1980.

During S.W. monsoon Pilots appear to always require pilot ladder on starboard side and for vessel to leave pilot station platform to starboard when entering. Custom Officials board at Paknam on way up river to check documents. For repatriations, Immigration require 2 clear working days. After 30 days in Thailand must apply for extension from Immigration at a cost of U.S. $15.00 per man. Vessel must fly 'Blue Peter' 12 hours before sailing from Bangkok or liable to a fine of U.S. $5,000. Require 2 copies of Immigration Form 4 (Crew List) for departure.

Telephone calls can be made via Bangkok Radio on Channels 25, 26, 27, after calling on Channel 26.

SHIPMASTER'S REPORT: September 1982.

Loading of tapioca products in bulk quantities of 25,000 tons and more at Kohsichang:

There are three ways of loading:

1. Vessel anchors off the N.E. coast of the main island. A number of mobile cranes, 12 to 15, are placed on deck by means of a floating crane. The cargo is brought alongside in barges, shovelled by stevedore-labour in canvas slings and dumped into the cargo holds. An average of approximately 3,500 tons per day can be reached, however, delays are experienced by rain and by too much swell for some of the barges alongside.

Stevedore Labour: An average of 300 persons (men, women, children) are onboard during the whole of the cargo operation. The cooking is done on deck. The daily fresh water consumption will increase by 20 tons to 25 tons. Fresh water is available by barge from the mainland. This way of loading involves most ships; 7 to 9 ships can be handled simultaneously.

2. At the same anchorage as No. 1 above, the vessel will have alongside two floating elevators. A daily average of 13,000 tons can be reached, also depending on rain/swell. Many less people are involved. One ship at a time can be loaded.

3. Loading alongside a silo based on the mainland. The daily average here will be about 14,000 tons, however at a draft of about 40 ft. – 42 ft. the vessel will have to shift to the anchorage to complete loading as under 1 or 2 above, most probably No. 1. The silo belongs to 2 shippers of cargo only.

Trimming of cargo is done mainly by means of bulldozers but trimming by hand/shovel is often required additionally.

Holding ground at anchorage is good. Ships swing round on a rather strong tide. Wind/rain squalls are experienced.

SHIPMASTER'S REPORT: March 1984.
Pilotage: There is no longer a pilot vessel at the Bar. Instead, a peculiarly shaped red-painted lighthouse type beacon has been erected. This beacon has accommodation for the Pilots, who board vessels using a small grey pilot boat. Position of beacon Lat. 13° 22.8′ N., Long. 100° 35.9′ E. (BA Chart 1046).
Anchorages: Bangkok Bar Anchorage: Any ship with draft able to enter Bangkok Harbour, can anchor at this anchorage to wait its turn to enter. Limits of this anchorage are shown on BA Chart No. 1046. Ships proceed close to the beacon mentioned under "Pilotage", to pick up the Pilot.
Kohsichang Anchorage: There are no longer any N.E. or S.W. monsoon anchorages. Throughout the year Kohsichang Harbour limits are from the Island, East to Long. 101° 51.5′ E. and between Lat. 13° 08.9′ N. and Lat. 13° 11.3′ N. (Thai Chart No. 114).

AUTHORITY: Port Authority of Thailand, Klongtoi, Bangkok 10110, Thailand. *Tel:* 2490399, 2490362. *Telex:* 72331 Pat Th. *Cables:* Pat Bangkok. *Contact:* Director-General.

AGENT: Jardine, Matheson (Thailand) Ltd., Shipping Agency Division, 1032/1–5 Rama IV Road, GPO Box 40, Bangkok. Tel: 286–9951. Telex: 82672 Jarthai. Cables: Jarocean. Fax: 287-1556.

KANTANG: 07.25 N. 99.31 E.

SHIPMASTER'S REPORT: April 1982.

PORT LIMITS: Vessels anchored in the bay between Ko Talibing and Ko Liang Hnua are considered to be "arrived ships".
DOCUMENTS:
6 Crew Lists.
4 Passenger Lists.
2 Store Lists (including dangerous drugs, explosives, bonded items, ship's wireless sets, TV, radio, etc.).
2 Personal Property Declaration.
2 Cargo Manifests.
PILOTAGE: Not compulsory.

Due to shallow waters and absence of chart it is recommended to take the services of the local Pilot, though he speaks only local language. Pilotage distance is about 15 miles up the river.

Pilot boards at the anchorage and takes the vessel up to Kantang. Berthing is also done by him, but it is recommended that the Master does this himself.

ENTRANCE: No large scale chart is available. The only chart available is B.A. Chart No. 3942.

Keep well clear of Light Ko Liang and after passing Ko Liang Hnua on the starboard side keep equidistant from Ko Talibing and Ko Liang Hnua. Depth of water is about 10 m. up to Ko Liang Hnua Point (bearing 190°×4 miles approx.). This place is good for anchoring.

While going up and down river, there is a Customs check post at the mouth of the river and the vessel has to stop for Customs check and sign the register.

The maximum depth in the river at high water is about 5.5 m. at Springs and as low as 3.5 m. at Neaps.

The loading should be restricted as per the tidal conditions.

HEALTH: No Port Health Officer available. Hence Free Pratique not required.
RADIO: No way of communicating with the port from vessel. ETAs, etc. should be sent from the previous port by cable. On receipt of the ETA the local Agents will arrange berthing, etc.
VHF: Not available.
BERTHING: Berth is approximately 140 m. length. Hand leadline sounding at berth indicated depths minimum 10 ft. and maximum 16.5 ft. at low water and minimum 16 ft. and maximum 22.5 ft. at high water.

While the vessel is being loaded it sits on the bottom at low tide and again floats at high tide. The ground is soft sand. Since the vessel is not afloat at all times the cargo calculations and distribution should be accurate.

The main exports are cement in bags, fish meal and rubber in pellets which is mainly exported in LASH barges. The barges are loaded once a month. Generally half the wharf is occupied by LASH barges.

One oil berth also available. Small tankers with about 4 m. draft can go alongside.

CRANE: One mobile crane of 5 ton capacity is available. Priority given to loading LASH barges.
FRESH WATER: Available. Supplied by a small boat of 4 tons capacity.
FUEL: High speed diesel is available. Price is very high.
REPAIRS: Small repairs can be effected.
CONSULS: No consulates or embassies.
WATCHMAN: Recommended.
OPENING/CLOSING HATCHES: MacGregor Hatches opened and closed by Crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits.
CARGO GEAR: Supplied by the Stevedores.
REPATRIATION: No crew changes possible.
TELEPHONES: Trunk calls can be made from the main Telephone Exchange. Sometimes delays up to 1 hour is normal.
STORES: No ship chandler. Market is very close to the berth where fresh vegetables, pork, fish, beef and chicken available. No mutton available but live goats can be purchased.

KHANOM: 09.12 N. 99.54 E. (See Plan)

SHIPMASTER'S REPORT: October 1988.

LOCATION: Khanom, Nakorn Si Thammarat (Sumpun Mining Wharf).
DOCUMENTS: Same documents as Bangkok.
PILOTAGE: Not available. Wharf Foreman will board at anchorage and will give berthing advice.
ANCHORAGE: Lat. 09° 12′ N., Long. 99° 54′ E.
MAX. SIZE: *New jetty:* 25,000 d.w.t. Draft 9.0 m. – 9.5 m.
Old jetty: 15,000 d.w.t. Draft 8.5 m.
TUGS: None available. Small boat assists with running lines.
BERTHING: *New Jetty:* Vessel is moored to 6 buoys (3 forward and 3 aft) and is kept 3.0 m. off the jetty. Vessel is to be equipped with 6 lines of at least 240 m. length each.
LOADING: *Loading:* One belt conveyor for loading gypsum in bulk, rate 500 – 550 tonnes per hour.
Shifting: Good co-operation required with Foreman as vessel had to shift 3 or 4 times for each hatch.
Trimming: By small bulldozer, weight 2,000 kg.

KRABI: 08.04 N. 98.44 E. (See Late Plan)

SHIPMASTER'S REPORT: June 1987.

DOCUMENTS:
6 copies Crew List.
4 copies Crew Personal Effects Lists, including Currency Declaration.
4 copies Bonded Stores List.
4 copies Deck, Engine and Provisions Stores List.
2 copies All electrical items belonging to vessel (T.V., radios, tape recorders, video recorders, refrigerators, etc.).
Certificate of Registry.
Last Port Clearance.
All valid Safety Certificates.
Immigration: On arrival and departure all Crew Members have to sign a Thailand Immigration form in duplicate. All crew members must be in possession of Seaman's Discharge books.
PILOTAGE: No pilot available. A Loading Master boards with the Agent at anchorage and advises Master regarding manoeuvring and berthing. At berth vessel uses port anchor with 3 shackles and must have 14 good mooring ropes, minimum length 200 m. each and 70 mm. diameter.
APPROACHES: We used BA. Chart 3941. Berth can be approached from South West between islands of Ko Dok Mai and Ko Kai. Care must be taken of rock 6 ft. high (Him Hmusang), and the dangerous rock (P.D.) 1 mile N.N.W. of Him Hmusang. Coast and islands well defined on radar. It is best to approach in daytime due to the absence of any lights or navigational aids. The only light is East of Phuket (Ko Taphao Noi). The port can also be approached from South, keeping 2 miles to 3 miles East of Ko Kai and setting course 2.5 miles from Ko Ngang. The stockpile of gypsum is clearly visible from a distance of 6 miles. Approach is very picturesque.
ANCHORAGE: Anchorage when awaiting berthing is about 1.5 miles West of the trestle berth.
MAX. SIZE: Depth alongside at low water is 13.0 m. – 14.0 m.
HEALTH: Pratique granted by boarding party at anchorage. All ship's personnel to have valid Health Certificates.
RADIO/VHF: Bangkok Radio (HSA 4) used for contacting Agents and Charterers. VHF via Phuket Radio. Overseas calls can be made via Phuket Radio. Vessel allowed to use ship's radio station while loading.
TUGS: None available.
BERTHING: Vessel berthed at Leamphong Jetty at Krabi (South Thailand) to load Thailand natural gypsum in bulk.

Vessel manoeuvres to within 25 m. – 30 m. of the finger conveyor loading spout, and first drops port anchor. Then 2 lines each are given to bow and stern buoys, also 2 each to port bow and starboard bow and stern buoys. The vessel then breasts on the starboard lines to bring the starboard side to about 5 m. from the dolphin and spout. An extension conveyor is hung from the ship's crane to convey the gypsum into the hold. The vessel then shifts on mooring lines to bring the other holds under the spout. It is advisable to pre-plan loading so as to avoid unnecessary shiftings.

All mooring lines are to have equal strain and are to be kept tight. The bow and stern lines prevent the vessel from getting too close to the loading spout and dolphin.

Vessel must arrive with full ballast as the height from the waterline to the loading conveyor 12.0 m.

Loading rate is approximately 300-400 tonnes per hour.

The vessel's cranes/derricks must be capable of lifting the extension conveyor (approximately 3 tonnes) and bulldozer (approximately 2 tonnes).

MEDICAL: Medical attention only available in the most severe cases. The medical facilities are in Krabi town.

DENSITY: 1022.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: None available locally.
REPAIRS: No facilities available.
SURVEYORS: None locally, but may be arranged from Bangkok.
CUSTOMS ALLOWANCES: Normal allowances.
REPATRIATION: Possible through Bangkok.
SHORE LEAVE: Allowed. Nearest town is Krabi, distance 30 km., half the journey is on an uneven dirt road. Crew have to climb a vertical steel ladder fixed to one of the trestle supports of the conveyor.

An excellent beach, safe for swimming, lies very close to the moorings.
GENERAL: There is no need for special watchmen as only personnel required for loading board the vessel. There are about 10 persons on board at any time. Other normal precautions to be taken.
Agent: Thaising Shipping Services Co. Ltd., No. 2/17-19, TSS Building, Soi Sukhumvit 24, Phrakanong, Bangkok 10110, Thailand. Tel: 259-0247 (6 lines). Telex: 84436, 20012 (THAISIN TH). Cables: TSSSCO. Fax: (662)-258-5163.

PHUKET: 07.50 N. 98.25 E.

DOCUMENTS:
Entry documents and advance information.
Customs and Immigration Entry forms as well as list of other documents required on *vessel's own forms* to be completed in advance for presentation on arrival Phuket. Sent in advance to the Agent from one of the previous ports together with request for the following information required 4 days in advance of vessel's arrival.

Confirmation of ETA and any subsequent revised ETA.
Master's name.
Last port of call before Phuket.
Next port of call after Phuket.
Net registered tonnage (n.r.t.).
Hatch distribution and gangs workable.
Cash advance of Master.

Flags: Vessels are required to fly the Thai flag and display the code flag "Q" on arrival.
PILOTAGE: There is no official Pilot available.
ANCHORAGES: The following anchorages are regularly used by ocean carriers of deep draft calling Phuket for loading or discharging cargo.
During the N.E. Monsoon Season: Prevailing wind from November through March, and periods of strong Easterly winds, vessels are recommended to anchor in position Lat. 7° 53′ N., Long. 98° 27′ 15″ E. about 0.5 mile off Laom Mai Pai to pick up the boarding party and stevedores before proceeding to the actual anchorage for loading at position Lat. 7° 57′ N., Long. 98° 33′ E., about 1 mile off Koh Yac Hyai, depth approx. 16 m. (50 ft.) at LWOS. However, during calm weather periods cargo operation will be carried out at the first mentioned anchorage.
During the S.W. Monsoon season: Prevailing from April through October, and any periods of strong Westerly winds, vessels are recommended to anchor at position Lat. 7° 53′ N., Long. 98° 27′ 15″ E. about 0.5 nautical miles off Laom Mai Pai, depth approx. 14 m. or 45 ft. at LWOS.

To facilitate cargo operations during swell from South, vessels are requested to anchor as close as possible to the above anchorage positions according to the Master's judgement.

No Pilot is required on approaching the above anchorage; however, it should be noted *three ocean-going dredgers* are operating in the area between Koh Dok Mai and Kon Khai Nok which should be passed at a distance of about 1,500 ft. to keep clear of their anchor lines. The dredgers are lit up and clearly visible at night.

It should also be noted during the new moon period there are several small fishing craft in the area.
RESTRICTIONS: *Channel:* The channel around Koh Tapae Kyai is normally passed clockwise and is marked by a system of buoys, the position of which are shown on Thai charts. However, it is also possible to turn around by swinging on the anchor just after passing Buoy No. 3 on a rising tide (South to North) just before high tide.
Width of Channel: Minimum 230 ft. at Buoy No. 6 measured (chart datum at LLW) at 6 m. depth curve. Maximum 900 ft. at Buoy No. 4 measured at 6 m. depth curve.
Restriction in Navigation: (1) Entering or leaving through the North channel involves a rather sharp turn with a radius of about 1,000 ft. and angle of about 115° between the axis of channel in a restricted area between Buoy No. 6 and Koh Tapai Noi Island. Please also note the wreck buoy between Buoy No. 6 and Koh Tapao Noi.

(2) The draft at Buoy No. 6 is about 24 ft. 6 in. at Lowest HW.

(3) At Buoy No. 5 are placed two pairs of mooring buoys parallel in the channel, occasionally used by tankers discharging petroleum products to Esso and Shell installations ashore. The width between the narrowest pair is about 150 ft. and vessels are required to pass between these mooring buoys.
HEALTH: All crew and passengers must have valid health certificates for cholera.
RADIO: Messages to and from vessels at sea on the West coast of the Malayan Peninsula are best transmitted via Penang Radio in time to allow retransmission to Phuket at about the following local times:

Weekdays at 0930 hrs., 1400 hrs. and 1630 hrs. Sundays at 1630 hrs.

For vessels outside this area, messages can be sent via Bangkok or Singapore as applicable. Cables via Bangkok Radio are normally transmitted every second hour from 0800 to 2100 hrs. local time, whereas cables via Singapore are sometimes retransmitted via Bangkok Radio and sometimes via Penang Radio.

There are no facilities for ship-to-shore communication in Phuket, but vessels are *not* required to close down their radio station or VHF set while in port.

There is long-distance telephone connection with Bangkok, Penang, Singapore and Kuala Lumpur from Phuket at all hours.
Despatch Cables: Agent will in all probability need to send cables via the ship's radio re-loading results, etc., subject to the Master's approval. The cost of all such cables is to be borne by the vessel.
TUGS: No tugs available.
BERTHING: At Laen Klusi, Thailand Smelting and Refining Co. Ltd. have built a crossway connected by a short bridge to a pier which is parallel to the channel. The pier and channel are presently only suitable to accommodate vessels up to about 10,000 d.w.t. and approx. 430 ft. long, not exceeding 22 ft. draft. Vessels berthing at the pier are recommended to anchor at position Lat. 7° 48′ 24″ N., Long. 98° 25′ 12″ E. to await loading and favourable tide.
Dimensions of the Pier: Length 61 m. (200 ft.), width 12 m. (40 ft.). Depth about 24 ft. 6 in. at LLW.
Fenders: The pier is protected by a system of wooden fenders in addition to which there is 1 fender at each end of the pier with solid rubber buffers.
Mooring Buoys: There are 2 mooring buoys about 700 ft. apart each at equal distance from the end of the pier.
MEDICAL: It is only possible to get a doctor on board in the most severe cases, but otherwise there are two hospitals in Phuket, one of which is managed by American Seventh Day Adventists Mission Doctors and the other is a General Hospital.
FRESH WATER: Limited and difficult to obtain.
FUEL: Limited and difficult to obtain.
CONSULS: None.
SURVEYORS: No marine surveyors in Phuket; however, a surveyor can be called from Bangkok.
REPAIRS: No facilities.
DEVELOPMENTS: 2 berths under construction, completion expected 1988. Depth alongside 10.0 m.

SATTAHIP: (Commercial port).
Chuk Samet Port: 12.35 N. 100.55 E. (See Plan)

LOCATION: Sattahip Bay is located on the Eastern coast of the Gulf of Thailand about 184 km. from Bangkok in Plutaluang sub-district of Cholburi Province.
PORT LIMITS: Extend to approximately 1,500 yards from the quay wall at Chuk Samet Port, and 1,000 yards from piers at Tungprong Port.
DOCUMENTS: See "Bangkok".
PILOTAGE: Compulsory for vessels over 50 m. LOA. Working daily during the day time only. Advance notice required 4 hours prior to arrival on working day (on holiday notice required at 0830 – 1200 hrs.) Radio frequency used when handling the vessel is 27125 kHz
ANCHORAGES: Anchorage area for waiting berth and Pilot:
Chuk Samet Port: Capacity: Eight deep-draft ships minimum depth 8 fathoms.

Tanker Berth (Pol Pier)	Commercial Berths (DWP 1 – 4)
Lat. 12° 37′ 03″ N.	Lat. 12° 37′ 25″ N.

Map Pier:

Lat. 12° 41′ 47″ N.	Long. 100° 50′ 31″ E.

APPROACHES: The entrance channel is 100 m. wide, 2.7 km. long and the harbour basin 450 m. wide in front of the West quay-wall, having available a depth of about 10 m. below Lowest Low Water (LLW).

The entrance light buoy is at Lat. 12° 35′ 07″ N., Long. 100° 54′ 20″ E.
RESTRICTIONS: Berthing possible throughout 24 hours.
MAX. SIZE: See "Berthing".
TUGS: 2 tugs available, 3,000 h.p. Join when vessel approaches berth, charge for use of tug's lines. 2 mooring boats available.
BERTHING:
Limitation of Draft:
Chuk Samet Port: Depth 32 ft. below LWOST or 36 ft. below MLW.

(1) For cruising in the channel
32 ft.
– 3 ft. for squat, tidal phenomena, etc.
– 2 ft. for under keel clearance
Draft = 27 ft. at LWOST

(2) For staying in port
32 ft.
– 2 ft. for under keel clearance
Draft = 30 ft. at LWOST

(3) Draft of the vessel could be increased for the day alongside by adding the figure of the height of tide at low water of that day to the figure of draft in (2) above (30 ft.+Height of tide at LW).
Sattahip Commercial Port:

Berth	Length (m.)	No. Berths	Max. LOA (m.)	Max. Draft (m.)
West Quay	540	3	180.0	10.5
North Quay	360	2	150.0	8.5

Cruise passenger ships are permitted to berth at Sattahip.
Map Pier: 1 berth, length 443 ft. Depth at MLW 38.8 ft.

RADIO: Radio telephone.

Name of Station	*Frequencies*	*Remarks*
MSC	2738 kHz	Day time
Portsat	2738 kHz	Day time
	4145 kHz	R/T – SSB
	8292.5 kHz	R/T – SSB

VHF: Calling Channel 16 (156.8 MHz)
Calling Channel 14 (156.7 MHz)
Interport use 157.5 MHz (Special Channel)

CARGO HANDLING FACILITIES:

	No.	*Capacity*
Forklift trucks	7	7,000 lb.
Shortmast trucks	7	5,000 lb.
Yard hustlers	5	—
Chassis	15	—
Top loader	1	35 tons
Transtainer	1	—
Straddles – 8×40 ft.	3	—
– 8×20 ft.	3	—
Semi-portal cranes	2	23-45 tons
Pallets	1,000	—
Van carriers	10	—

Storage Area:
3 transit sheds of 14,000 sq.m.
Open storage area of 120,000 sq.m.
1 container freight station.
Container yard of 36,000 sq.m.

STEVEDORES: Vessel to advise Agent 7 days prior to arrival. Text required in this cable is: flag, ETA, draft, tonnage of cargo aboard for port, number of crew/passengers, dangerous cargo/heavy lifts, gangs required.

194 stevedoring contractors (both liner terms and chartered vessels under F.I.O. terms).

Working Hours: 0800-1200 hrs. – day shift, 1300-1630 hrs – day shift, 1630-1800 hrs – overtime (working through), 1900-2400 hrs. – first half-night shift, 0100-0500 – second half-night shift, 0500-0700 – overtime (working through, but should apply for P.A.T. approval).

On Saturdays, Sundays and public holidays, the day shift finishes at 1600 hrs.

MEDICAL: Hospital facilities available.

TANKERS: *POL Jetty:* Max. LOA 600 ft. depth alongside 36 ft. Diameter of shore lines are 6 in., 12 in. and 20 in.

DENSITY: 1021.

FRESH WATER: Limited, 200 tons per trip, addition 100 tons for boiler. Supply can be made by water trucks, advance notice of ETA required.

FUEL: Available, supply can be made by barges, advance notice of ETA required.

GANGWAY/DECK WATCHMEN: Necessary.

OPENING/CLOSING HATCHES: Carried out by stevedores without extra charge.

CUSTOMS ALLOWANCES: 200 cigarettes for each officer, 100 for each crew member for 3 days. One bottle each, wines and spirits, opened.

CARGO GEAR: Supplied by stevedores.

IDENTIFICATION CARDS: Required for all crew and officers.

REPAIRS: Only for minor repairs.

TIME: GMT plus 7 hours throughout the year.

POLICE/AMBULANCE/FIRE: Security centre 2187; Duty officer 2102 (after duty hours); Police 3180; Ambulance 116; Fire 117.

TELEPHONES: Available (U.S. military circuits).

SHORE LEAVE: Permitted.

DEVELOPMENTS: No major developments as the port will be privatised in the near future.

SHIPMASTER'S REPORT: July 1981.
CHUK SAMET PORT:
For details concerning navigation, currents, clearance and documents, etc., see "B.A. Pilot No. 30" and "Guide to Port Entry".

Vessels approach on the beacon line at 017.5° (T), along the fairway marked by buoys. The beacons are installed on the pier and are easily visible. When entering and leaving, the cross current should be watched. The fairway buoys appear to be displaced somewhat Westwards.

Entry and Leaving: Only permitted between 0600 hrs. and 1800 hrs.

The Pilot comes from Bangkok. Also Authorities come from Bangkok for clearance.

A local Agent's office is not yet available, but will shortly be installed.

Wireless traffic from the port with Bangkok is permitted.

There are two tugs of 3,600 h.p. available.

Max. Draft: At present 32 ft. is allowed.

The pier running approximately North – South is 500 m. long, and the cross pier 365 m. long. Both are well equipped with rubber type fenders. The free area on the pier in front of the sheds is about 45 m. wide.

Cargo Handling: Both cranes and the tapioca conveyor can run on the crane rails both on the main and cross piers. The large crane lifts up to 40 tonnes at 35 ft. The small crane lifts 23.5 tonnes but is currently out of use, but should be back in service shortly. The port has 20 forklift trucks, 10 at 3.4 tonnes, and 10 at 2.3 tonnes. Also there are 10 lorries type HINO KL 340 at 7 tonnes.

A Sea Container Shifter is already available, capacity 30 tons. For containers there are three 40 ft. and three 20 ft. spreaders in the equipment store.

Water: Any quantity available. Water must be boiled prior to use.

Bunkers: Only by road tanker.

Ship Repairs: None.

Ships' Chandler: Should be available.

Hospital: Available.

VHF: Port Authority on Channel 16.

Weather Conditions: During S.W. monsoon there is a slight swell. From May to July is the rainy season, with storms and typhoons occurring in June and July. Currents are unimportant. The tide rises about 2 m.

General: S.W. from Sattahip, in the Thailand Gulf, natural gas is obtained. A gas pipe-line from there to Sattahip is under construction. The line will then be taken overland from Sattahip to Bangkok.

A railway connection is being built. A road to Bangkok (approx. 180 km. = approx. 3 hours by car) is available.

Further Developments: Dredging and building of new piers will begin.

A large Gottwald crane (mobile at 40 tonnes) is stated to have been ordered, and will be delivered in about 6 months.

It is planned later on to install a IHI container bridge, and sheds 1 and 2 will be demolished to make room for container handling.

AUTHORITY: Port of Thailand Authority, Sattahip Commercial Port, Plutaluang Sub-District, Sriracha District, Chonburi 20180, Thailand. *Tel:* 038-436344/436360. *Contact:* Director.

AGENT: See "Sriracha."

SRIRACHA (Including Laem Chabang):
13.07 N. 100.52 E. **(See Plan)**

DOCUMENTS:

Boarding of Immigration, Customs and Quarantine Officials:
The Immigration and Customs Officials will board all incoming vessels, whereas the Quarantine Official will board on arrival at berth. If however a vessel comes from an infected port the Quarantine Doctor will board. The Officials demand that the main gangway is lowered.

Order of Clearance and Documentary Requirements:
Customs Authority: (Ship's forms)

12 copies Cargo Manifest (including port and Agent's requirements).
5 copies Transit Cargo Manifest.
10 copies Crew List.
6 copies Ship's Stores.
6 copies List of Ship's Provisions, Steward, Deck and Engine Departments.
6 copies Foreign Currency List.
6 copies List of Arms and Ammunition for Ship's Use.
6 copies List of Opium and Narcotics.
6 copies List of Ports called.
6 copies List of Passengers.
6 copies List of Mail.
6 copies List of Crew members' Personal Effects stating brands and serial numbers of watches, cameras, TV/radio sets, electronic calculators, refrigerators, typewriters, all sound and electrical equipment, etc.
6 copies List of Ship's Movable Properties, to declare brands and serial numbers as above.

When preparing the list of Crew members' Personal Effects and ship's stores' lists, particular care should be paid to the exact quantities. Crew are allowed 200 cigarettes each, during the vessel's stay in port.

Failure to provide correct quantities on various forms will entail heavy fine and confiscation.

NOTE: Pornographic magazines and materials are prohibited and will be confiscated if found onboard.

Immigration Authority: For vessel having Thai Immigration Forms onboard, please prepare them ready for arrival. Otherwise Agency clerks will bring forms onboard and assist in completing them.

5 copies each of Immigration Form No. 3 (separately for *Landing* passengers and *Transit* passengers).
5 copies of Immigration Form No. 4 (Crew List).
2 copies of Immigration Form No. 35. Make out in duplicate, and 1 line for each name. Leave signature columns blank, where each crew member shall sign in presence of Immigration Officers in port.
1 copy Disembarkation/Embarkation card for each passenger, to be supplied in port.

Repatriation Crew holding valid passports may be declared as passengers in order to facilitate Immigration Exit papers. Otherwise we need one full working day for preparation of Immigration papers (Sat/Sun/Holiday excepted).

Quarantine Authority:
1 copy of Maritime Declaration of Health (may be supplied in port).
2 copies of lists certifying the date of vaccination against Cholera for each crew member.
1 copy of Derat Certificate.

International Certificates of Vaccination against Cholera for all passengers and crew members.

Important to Master: On first arrival at Roads or berth do not allow any unauthorised people to board the vessel or allow any officers/crew members to disembark before 'Checking In' formalities by Immigration Officers and Customs Searching Party. Offence in this respect is liable to a fine not exceeding Baht. 5,000.00.

Departure: The 'Blue Peter' flag should be hoisted at the foremast of all sea-going vessels about to leave the harbour and shall be kept hoisted until the voyage has begun. In the case of vessels leaving in the afternoon, the flag shall be hoisted in the morning, in case of those leaving in the morning, the flag shall hoisted on the previous afternoon. Failure to comply with the regulations is subject to a fine not exceeding Baht. 5,000.00.

PILOTAGE: Compulsory in Sriracha area. Sriracha pilot station is established on "Ban Ao Udom", and can be contacted directly by VHF Channel 16 within 30 miles radius.

Boarding Area: The Government Pilot and Marine Supervisor will board at about 2 miles East of "Koh Thai Ta Mun" which lies South of Kohsichang, or at the position centred on Lat. 13° 07′ N., Long. 100° 51′ E. with a radius of 1 mile.

On receipt of an accurate ETA vessel will be advised by VHF regarding berthing time, whether to anchor and any likely delays. Flags indicating a request for a Pilot or Pilot on board should be flown. Accommodation ladder required (or in conjunction with pilot ladder).

APPROACHES: The recommended courses approaching seaberth through the Southern part of Kohsichang are as follows:

from Junction point named "A"	Lat. 12° 43′ 00″ N. Long. 100° 44′ 36″ E.	True Course =360°
to Junction point named "B"	Lat. 12° 62′ 14″ N. Long. 100° 44′ 36″ E.	
from Junction point named "B"	Lat. 12° 56′ 14″ N. Long. 100° 44′ 36″ E.	True Course =022°
to Junction point named "C"	Lat. 13° 00′ 00″ N. Long. 100° 46′ 12″ E.	
from Junction point named "C"	Lat. 13° 00′ 00″ N. Long. 100° 462 12″ E.	True Course =037°
to Junction point named "D"	Lat. 13° 06′ 20″ N. Long. 100° 51′ 00″ E.	

from Point "D" A/C to 000°(T) up to Anchorage Area or Point "E"

Point "E"	Lat. 13° 07′ 00″ N. Long. 100° 51′ 00″ E.	

Refer Admiralty Chart No. 986; the "Hulk" at position Lat. 13° 07.7′ N., Long. 100° 52.8′ E. has been removed.

Vessels should always keep clear of the fairway channel as large bulk carriers sail on deep draft.

ANCHORAGES: Recommended anchorage for vessels awaiting berth is within 1 mile of the position: Lat. 11° 04.8′ N., Long. 100° 51.0′ E. Refer Admiralty Chart No. 3965 and 986.

MAX. SIZE: MBK Bulk berth: 150,000 d.w.t. Draft 14.3 m.

Also see "Tankers".

HEALTH: See "Documents".

RADIO: *Commercial Radio Telegraphy:* (Tel: 5880842-4, 5882689, 5882683).

"BANGKOK RADIO".
Medium wave: Call sign HSA (Hotel Sierra Alpha).
Operating time: 24 hour service.
Traffic: 0700, 0900, 1200, 1500, 1800, 2100 and 2300 hrs. local time.
Calling frequencies: 500 kHz and 512 kHz.

Short wave: Call sign HSA 2 and HSA 3.
Operating time: 24 hour service.
Traffic: 0700, 0900, 1200, 1500, 1800, 2100 and 2300 hrs. local time.
Calling frequencies: 8686 kHz, 8573 kHz and 12800 kHz.

Masters of all vessels proceeding to Sriracha are to notify their Agent by radio of their expected time of arrival at least 3 days prior to arrival. This notice shall be amended in the event of any change in the time of arrival.

In addition to the above, the ETA message shall be confirmed 48 and 24 hours before arrival.

The first notice of arrival is to contain the following information:

Last Port of Call.
ETA Pilot Sation.
Best trimmable arrival S.W. draft.
Number of crew including the Master and his name.
Number of passengers, landing and transit.
Cargo grade and quantities to be discharged.
Discharging rates, barrels per hour.
Bunkers and water on arrival.
Urgent stores to be delivered on arrival, if any.
Bunkers and water to be delivered, if any.
Laundry service, if any.
Nature of any extraordinary repairs to be effected.
Any other matter to be attended to on arrival such as electronic equipment repairs, medical attention or hospitalisation, crew repatriation (in this case advise name, age, nationality, passport number).
Cash required, if any.
Crew liberty launch service, if any.

TUGS: Local company privately operates 3×2,500 h.p. tugs which are available on calling during working hours, and outside working hours when required if advance notice given.

BERTHING: See "Shipmaster's Report".

TANKERS: *Thai Oil Sea Berth:*

1. One conventional buoy mooring, consists of 6 buoys.
2. Position of berth: Lat. 13° 07.5′ N. Long. 100° 52.5′ E., 2.5 miles offshore.
3. Depth of water in berth: 48 ft. plus tidal height of the day above LLW. Minus 2 ft. under keel clearance. Vessel can berth heading either North or South depending on the current.
4. Capacity of berth: Capable of handling vessels of minimum size 30,000 d.w.t. up to max. size 120,000 d.w.t. with max. LOA 900 ft. (Max. distance from bow to manifold 435 ft.).
5. Discharge line: 1×24 in. dia. submarine line with 3 strings of 12 in. hose.
6. Mooring and unmooring of vessel are compulsorily carried out 24 hours by Government Pilot. Night-time berthing at the discretion of the Pilot.
7. Total of 18 ship's mooring lines (rope/wire) are required in good condition, not less than 220 m. in length each line, for 3 head and 3 stern buoy lines.
8. Communication: Thai Oil Company Limited, P.O.Box 2387, Bangkok, Thailand. Telex: THAIOIL TH 85802, 85808. Tel: Sriracha Thailand (038) 311069-74, (038) 322170-5. FAX No: 3220.

Esso: 6 buoy conventional mooring owned and operated by Esso Standard Thailand Ltd. Vessels berth heading in either direction depending on the tide at the time of arrival. Max. size: 90,000 d.w.t.

2 ship's moorings required to each of 2 head and 2 stern buoys and one ship's mooring to each of 2 breast buoys. These are supplemented by 1 shore "preventer" wire from the 2 head and 2 stern buoys.

1×32 in. submarine line for crude oil with 2 strings of 12 in. hoses.

Ballasting is required during discharge to maintain 30% deadweight at all times. Additional ballast may be required during the S.W. monsoon period 1st June to 31st October. Technical test data for winches/wires required on arrival.

PTT: The PTT Sea Berth consists of a concrete platform with two breasting dolphins and mooring buoys for head and stern lines.

Vessels berth heading in either direction depending on current direction, using seaward anchor.

Mooring: 3 head/stern ropes, 3 forward and aft backsprings plus one buoy rope to seaward buoy aft.

Night berthing not recommended in view of unlit buoys and platform.

Vessels programmed to this sea island berth are advised that it is to be regarded as an offshore buoy berth as far as shore facilities are concerned. Access to/from the shore should be by accommodation ladder rigged on the offshore side of the vessel.

In common with offshore buoy berths and in the absence of any shore standby craft, the vessel's lifeboats to be used for emergency evacuation of personnel.

PTT Sea Island berth currently only handles high flash point products, i.e. fuel and gasoils.

General: Qatar Crude Discharge: Considerable delay can be encountered in the discharge of Qatar Crude.

In this connection your attention is particularly drawn to any advice given to you on arrival by the Thai Oil Representative.

Back Loading from Coasters: Occasionally vessels are required to load cargo from 2,000/4,000 ton coasters at Sriracha. Loading a full cargo could take 3 to 4 days and Masters should bear this in mind for bunker and fresh water calculations.

Lightening to coasters to make Bangkok Bar draft: On arrival there is no VHF contact with shore, as vessel does not take a Pilot, and so should proceed straight to an anchorage within about half a mile of position 13° 07.6′ N., 100° 50.9′ E. There may be other vessels in this area engaged in ship/ship transfer. Do not rig an accommodation ladder, as four Yokohama rubber fenders are brought straight out to the vessel, and 2 lashed each side midships. Shore officials will board via the pilot ladder to clear the vessel inwards. Accommodation is required for 2 Police Officers (one room) and 2 Supervisors with one Customs Officer (a second room) throughout the vessel's stay. 8 in. hoses are brought out on the first coasters, connected by a seven man hose handling gang, and left connected to the ship's manifold throughout the operations; the gang handles all hose connecting, and mooring, with a crane driver provided by the ship. This gang stays onboard most of the time and need to be allocated a smoking area. The coasters are programmed by Bangkok – copies of the programme being put onboard on arrival – and can be handled simultaneously one each side. If 2 products are involved usually one side is allocated for a particular product. The coasters moor with lightweight polypropylene lines and are well handled and efficient, capable of loading at about 1,250 tonnes/p.h. There are 4×2,000 d.w.tonnes, and 1×3,500 d.w.tonnes coasters with a round trip taking about 24 hours from departure to return alongside.

MEDICAL: Hospital facilities available, advance notice of ETA preferred.

DENSITY: About 1021.

FRESH WATER: Can be supplied by barge at sea berths. 24 hours' notice required to Agent.

FUEL: Can be supplied by barge. 48 hours' notice required.

CUSTOMS ALLOWANCES: 200 cigarettes for each officer, 100 for each crew member for 3 days.

Each man allowed 1 opened bottle wine/spirits.

IDENTIFICATION CARDS: Required for all officers and crew.

CONSULS: See "Bangkok".

AIRPORT: Situated about 25 km. from Bangkok, regular international services.

TIME: GMT plus 7 hours. No changes during the year.

SHORE LEAVE: No restriction on crews landing after immigration and health formalities have been satisfactorily completed.

DEVELOPMENTS: Thai Oil Co. Ltd. may build 2 new berths for 6,000 d.w.t. product carriers.

Laem Chabang Deep-Sea Port Project: The construction of a deep-sea port in the Eastern seaboard region at Laem Chabang, Cholburi Province is aimed to accommodate vessels of about 15,000-100,000 d.w.t. which are not able to be berthed at the Bangkok Port due to some limitations in the access channel, and to promote other developing projects in the region according to the National Economic and Social development Plan.

The construction started in 1986 and the 1st Stage will be completed for operation around late 1991.

The 1st Stage of development will include:

1. 2×300 m. length container berths with depth 14.0 m. for 33,000 d.w.t. vessels.
2. 1×250 m. length break-bulk berth with depth 14.0 m. for 25,000 d.w.t. vessels.
3. 1×200 m. length domestic berth with depth 6.5 m.
4. 2 bulk berths with length 250 m. and 340 m. and depth 14.0 m. for handling tapioca, sugar and molasses.

One break-bulk berth will be ready late 1990.

SHIPMASTER'S REPORT: March 1984.

Loading of Tapioca Pellets in bulk at MBK berth:

Vessel: LOA 243.6 m., beam 32.3 m., deck over keel 18.6 m., draft 13.51 m. = t.d.w. 74,010 tonnes, 8 holds.

Silo with a berth called MBK Berth (Mah Boon Krong), operated by Cargill Ltd., has been in existence for about 6 years.

The berth consists of 3 loading towers with sufficient mooring posts at both ends. Location of berth: Lat. 13° 08.2′ N., Long. 100° 53.1′ E. Distance from shore: 1.6 miles. Distance between towers: 50 m. Radius of loading booms: 32 m. Total loading range: 166 m. Depth of water alongside: 12.8 m. at LW. Loading capacity: Loading with 1 tower 350 t.p.h. Loading capacity with 2-3 towers 600 t.p.h.

A vessel of our size has to be shifted for loading the end holds.

The loading spouts are equipped with trimming machines. The only connection to the shore is a conveyor belt of 2.8 km. length which cannot be used for traffic. All traffic is carried out by boats. Therefore gangways on both sides to be used.

A Pilot/Berthing Master brings the vessel alongside. Berthing with 2 tugs, bow to the North and starboard side alongside using the port anchor.

AUTHORITY: *Operators:* Thai Oil Company Limited. Refinery: Km. 124.5 Sukhumvit Highway, Au Udom, Sriracha, Cholburi 20110, Thailand. P.O.Box 2387, Bangkok 10501. *Tel:* (038) 311.070.4. *FAX:* 3220. *Telex:* 85802, 85808 THAIOIL TH. *Contact:* Captain Prasit Khumsribus, Marine Supervisor.

NOTES

Please also advise Shipping Guides Ltd.

Togo Republic

KPEME: 06.12 N. 01.30 E. (See Plan)

PORT LIMITS: In accordance with the terms of Charter party a vessel is considered to be an "arrived ship" when she is anchored between 1 mile and 2 miles from the end of the jetty.

Shipmaster's Report: April 1986.

Notice of Readiness can be tendered when ship is 1.2 nautical miles from jetty.

DOCUMENTS:

2 Crew Lists.
2 Stores Lists.
2 Private Property Declaration Lists.
2 Lists of last 2 Ports of Call.
2 Passenger Lists (if no passengers, 2 lists stating same).
2 Cargo Manifests.

PILOTAGE: The limits of the port of Kpeme are fixed at 1 mile from all points of the jetty. Pilot boards out at the above limits. The Company Pilot remains on board while ship is berthed and disembarks when vessel cleared port limits. International code pilot signal used. At night, vessel should anchor between 110° and 180° at least 1 mile from the end of jetty.

VHF: Radio station, call "Kpeme pilot station" on Channel 16. Pilot boat grey motor boat without special signals.

APPROACHES: By day the extremity of the jetty (3 artificial islands and 2 loading machines) forms an obvious landmark.

At night a white light (situated at the extremity of the jetty, 23 m. above the sea) all around horizon – light 3 sec., occulting 1 sec., light 1 sec., occulting 1 sec.

ANCHORAGE: Good holding ground (sand and mud) between 14 m. and 16 m.

RESTRICTIONS: Vessels should twice signal the date and probable time of her arrival. The first time 72 hours and the second time 24 hours prior arrival. Vessels berth in daylight only from 0530 hrs. – 1530 hrs. GMT. Unmooring can be effected day and night. Water approaches are clear. Any ship should have both fore anchor cables in perfect order and capable of being used in their entirety. Any ship should be able to leave immediately if she receives order to do so from Harbour Master. With this in mind, engines must be on standby. Ships are not authorised to cross port entrance without a Pilot on board. Winches aft to be in perfect order.

MAX. SIZE: Tankers up to 27 ft. draft on arrival. Bulk carriers up to 38 ft. draft on sailing. Max. length 220 m. Max. breadth 32 m. Height from waterline to hatch coaming 14.0 m.

HEALTH: Send message for Free Pratique within 24 hours of arrival to Port Health Officer, Kpeme.

RADIO: Until vessel within 600 miles, communicate through Portishead Radio, Senlis Radio and Dakar Radio. Within 500 to 300 miles via Abidjan Radio TUA 487 kHz. and within 300 miles via Lome Radio 5VA 472 kHz.

VHF: VHF radio station, call "Kpeme Port" on Channel 16. Also see "Pilotage".

TUGS: No tugs available. 2 mooring launches of 150 h.p. each are at vessel's disposal.

BERTHING: Loading facility comprised of 3 artificial islands carrying conveyor belts (2) for loading phosphate only. They are breasted by a row of 4 dolphins. Vessel moors using port anchor first and then the starboard anchor, and wires to 7 buoys which hold the ship parallel to the dolphins and about 20 m. off. Springs are run to the dolphins. Each loader delivers at a rate of 1,250 t.p.h. and 2 holds can be loaded at same time.

TANKERS: Moor at a special berth situated to the East at 0.4 miles away from the extremity of the phosphate pier. 1 submarine line 12 in. diameter, hose connection 8 in. diameter. At any time sufficient draft for securing and sailing, also fire hoses to be ready rigged on deck.

FRESH WATER: Not available. Vessel has to go to Lome.

FUEL: Not available. Gas oil available at Lome.

MEDICAL: Doctor of the Office Togolais des Phosphates at the Factory.

OPENING/CLOSING HATCHES: By ship's crew.

CONSULS: Nearest at Lome.

REPAIRS: No facilities available. Emergency repairs could be arranged in Lome.

CUSTOMS ALLOWANCES: 200 cigarettes or 2 oz. tobacco; 1 bottle of spirits. No Customs Authorities board the vessels or seal bonded stores.

REPATRIATION: Possible. Mooring boats have to be used for going ashore.

AIRPORT: Nearest Lome – 4 flights a week to Europe.

TIME: GMT.

HOLIDAYS:

Official Holidays in Togo:

1st January, New Year's Day; 13th January, National Holiday; 24th January, Economic Liberation Day; 24th April, Victory Day; 1st May, Labour Day; * Ascension Day; 21st June, Patriots of Pya; 15th August, Assumption; 23rd September, Agression Day; 1st November, All Saints' Day; ** Ramadan Day; ** Tabaski (Islamic Holiday).

*Date given by Christian calendar.

**Date given by Islamic calendar.

TELEPHONES: Placed on board, charges included in stay-in-port tax.

SHORE LEAVE: Allowed, but not advisable. See "Restrictions" and "Repatriation".

GENERAL: In the rainy season, high winds and swell may delay berthing operation.

Vessels do not berth with an Easterly current.

SHIPMASTER'S REPORT: February 1985 (Updated 1988).

Location: Kpeme is situated about 15 miles East of Lome, and about 115 miles West of Lagos, Nigeria. The position of Kpeme Jetty is approximately Lat. 06° 12′ N., Long. 01° 31′ E.

BA Chart 1861, Cape St. Paul to Lagos Harbour, with Plan, "Rade de Kpeme".

Approaches: The Coast Eastward of Cape St. Paul is practically featureless, but good navigational marks are Port de Lome Breakwater, and Kpeme Jetty, which show well on the radar at distances of up to 20 miles. No dangers in the immediate approach from any direction. The occulting light on Kpeme Jetty Head is difficult to identify, and should not be relied upon, especially in hazy weather.

Documents: The Pilot deals with all port formalities, acting for Customs and Immigration. Documents required are as follows:

2 Crew Lists.
2 Stores Lists, including Bonded Stores.
2 Crew's Effects Declarations.
2 Lists of Ports of Call.
(For the last voyage or last 4 weeks, whichever is longer.)
2 Passenger Lists.
(If Nil, list should be made out with a "Nil" declaration.)

Under normal circumstances the Agent does not visit the vessel until after loading is completed, when he brings all documents and clearance for the ship. (The vessel usually unberths, and drifts off the berth to await arrival of the Agent by boat).

Pilotage: Pilot, sometimes with Assistant Pilot, boards at the Anchorage together with 2 mooring gangs, each under the supervision of a Foreman, who is in constant contact with the Pilot. 2 mooring boats are available to assist with mooring. The Pilots remain on board at all times whilst the vessel is at the Jetty and have to be accommodated and fed.

Anchorages: The anchorage area is from 1.5 to 2 miles S.E. of Kpeme Jetty Head. Good holding ground, sand and mud; in about 20 m. of water.

Restrictions: All berthing and unberthing operations performed on an East going current only. (Due to the configuration of the berth.) If a vessel happens to be at the berth when a West going current should start, she will remain at the berth until such time as the normal East going stream re-establishes itself. In extreme cases berthing and unberthing could be accomplished with the assistance of 2 tugs from Lome.

Max. Size: Our vessel, (Panamax) LOA 228 m., breadth 32.2 m., is about the largest vessel handled by Kpeme. Largest vessel normally handled is LOA 220 m., but this vessel was accepted on condition that no cargo was to be loaded into No. 1 hold.

Also see "Loading".

Radio: The usual ETAs and requests for berthing prospects were sent to the Agents, (Office Togolais des Phosphates. Telex: 5214. Cable Address: Phospat Lome) but no replies were received at any time from them.

VHF: We called Kpeme Port Control on VHF from 2 hours before arrival, but no response was gained from the shore until the vessel had actually arrived in the anchorage.

Port Control calls on Channel 16, and works Channel 13. Takes all details of the ship, and any requirements on arrival.

Notice of Readiness: Notice of Readiness Time is taken as the time the vessel actually anchors, and within the confines of the Charter Party.

Berthing: From the anchorage, the vessel approaches the berth in a wide sweep, to arrive about 1 cable off the berth, heading in a Westerly direction, when the port anchor is dropped. This is paid out to full scope, then the starboard anchor is let go. A headrope is then led to the buoy on the bow. Meanwhile, a shore after spring wire is hove up on the after mooring winch. Using this and also the main engine, the vessel is manoeuvred into position. This also involves heaving up the port anchor and slacking on the starboard anchor cable, to end up with about 7 shackles on the port anchor and about 4 shackles on the starboard anchor. Vessel then ends up in position for the shiploaders, which is on a heading of about 190° and about 4 m. off a set of small hydraulic fenders which front the islands on which the shiploaders are constructed. The mooring gangs then complete the mooring with shore wires.

Loading: Loading is by 2 shiploaders of 1,300 tonnes/p.h. each. Max. airdraft from Datum to loaders is 15 m. Berth is dredged to 14 m. at Chart Datum. Max. draft allowed at the berth is 38 ft. (11.58 m.) With these various restrictions, large vessels must berth with practically full ballast, and careful deballasting whilst loading is necessary to ensure that the vessel remains within the acceptable limits of draft and airdraft. It has to be remembered that the berth is an open roadstead, and a considerable swell can sometimes run (up to 2 m.). The berth is designed to berth vessel's head directly into the prevailing direction of the swell, to reduce rolling as much as possible, even so, there is still an appreciable movement of the vessel, even with little swell running. Also due to the swell, it is very difficult to read the draft with any accuracy. However, the shore weighing facilities for the phosphate are very accurate, and no real problems were encountered in this direction. (B/L is based on weight recorded by loaders during loading. No draft surveys.)

Liaison with the shore is carried out through the Pilot. No other contact with Agents, etc., available.

Terminal staff friendly and very co-operative.

Unberthing: As soon as, or just before the completion of loading, the shore mooring gangs start to single up the shore moorings. As soon as all shore wires are let go, the vessel's stern starts to move away from the berth with the current. The starboard anchor is weighed and then the Port anchor. Whilst swinging clear of the berth, and weighing anchor, an eye should be kept on the port breast line buoy aft, as it can pass quite close to the stern as the ship swings. After the port anchor is aweigh, the vessel is moved a little way from the berth, and drifts waiting for the Agent to bring out the documents; which usually takes about 1 hour.

Medical: Basic medical treatment is available at Kpeme. Hospitalisation can be effected but it is necessary to go to Lome, where there are adequate facilities.

Fresh Water: Not available.
Fuel: Not available.
Repairs: No repairs can be carried out. If these are required, vessel would have to go to Lome, 15 miles to the Westward.
Repatriation/Airport: There is an International Airport at Lome, and repatriation can be arranged if necessary.
Shore Leave: Although not actually prohibited, shore leave is not really feasible, due to the fact that there are no facilities at Kpeme. Also there are no proper arrangements for a liberty boat to be laid on.
Storing: Fresh provisions are available in limited quantities. Rather expensive and of poor to fair quality. Orders taken by Port Control on vessel's first arrival.

AUTHORITY: Office Togolais des Phosphates, B.P. 362, Lome, Togo. *Tel:* Lome 21.39.01 *Telex:* 5214 Fosfat TG. *Cables:* Phosphates-Lome. *Contact:* Commandant J. R. Capdeville, Harbour Master.

LOME: 06.08 N. 01.17 E. (See Plan)

DOCUMENTS:
- 13 Crew Lists.
- 5 Kroo-boy Lists.
- 5 Passenger Lists.
- 4 Lists Previous Ports of Call.
- 1 Maritime Declaration of Health.
- 1 List of vaccinations.
- 1 Set cargo manifest and bills of lading.
- 2 Lists of arms and ammunition.
- 1 List of Stowaways onboard.
- 1 List of Animals onboard.

Togo Port is a free-port where no individual crew member declaration is necessary.

APPROACHES: By night, the approach to the port is assisted by the following 4 lights:
Lome Light: Position 06° 08′ N., and 01° 15′ E. On top of the big water tower in the village between Lome City and the harbour. Group Fl. (2) white every 10 sec. Vis. 20 miles.
Baguida Light: Position 06° 09.5′ N., and 01° 19.5′ E. occ. white and red. Light 2.5 sec. occ. 0.5 sec. period 3 sec. Vis. 17 miles. The red light sector (42°) covers the breakwater as well as the old Lome Wharf in position 06° 07′ N., and 01° 13.5′ E.
Togo Port Entrance: On the head of the main breakwater a red tower is situated in position 06° 08′ N., and 01° 17.5′ E. Occ. red light 5 sec. every 6 sec. vis. 5 miles.

On the head of the counter-breakwater a green tower is situated in position 06° 08.2′ N. and 01° 17.4′ E. Occ. green light 5 sec. every 6 sec. vis. 5 miles.
Fairway Buoy: A red buoy with metallic structure, situated in position 06° 07′ N., and 01° 19.94′ E. Quick flash red. Vessels entering the harbour have to leave this buoy on the port side. The buoy marks the beginning of the fairway.

By day, large light coloured transit sheds and a high, grey water tower (30 m.) in position 06° 08′ N., and 01° 16.5′ E. are the first indications of the port from the sea side.

PILOTAGE: Pilots are available 7 days a week and throughout 24 hours. Berthing is possible at anytime on Owners/Master's request, but movements normally commence between 0530 hrs. and 0600 hrs. (sunrise).

The sailing time is not restricted, but ships sailing after midnight have to give a written notice to the pilot station at 2200 hrs. latest. The pilot station is equipped with VHF radio-telephone listening on Channel 16, 14 and 12, throughout 24 hours.

Call and safety Channel 16. Communications on 12 and 14.

Business languages: French – English.

Only simplex operation, no telephone patch.

The pilot cutter is a dark motorboat with yellow-orange superstructure on whose mast the international signal flag "H" flies. Showing pilot lights after sunset. The boat also has VHF telephone and is accessible on Channel 12.

Pilots board the vessel approximately 0.5 to 1.0 mile Southwards of the breakwater.

Pilots are compulsory for all ships of more than 300 g.r.t.

ANCHORAGES: Vessels which arrive during darkness should anchor about 0.5 to 1 mile South to S.E. of breakwater, in white sector of Baguida light in 15 m., where good holding ground (sand) obtained. Northern boundary of anchorage is red sector of Baguida light.

RESTRICTIONS: Tankers may only berth during daylight hours but may unberth at anytime. Also see "Pilotage".

MAX. SIZE: The max. length of vessels admitted must not exceed 270 m. The max. draft for the general cargo-quay is 9.5 m. (31 ft.), for the bulk berth 11.5 m. (38 ft.) and for the tanker berth 14 m. (45 ft.)

For the West side of the container quay 11 m. (36 ft.) and the East side 12 m. (39 ft.)

HEALTH: Health Inspector will board on arrival alongside and examine for cases of infectious diseases, after which he will declare vessel Free or not. Vessels entering must fly international quarantine signal "Q".

RADIO/VHF: Lome has a radio coast station. Working frequencies are: 500 and 472 kHz. Call sign "5VA". Also on VHF Radiotelephone Channel 16 and medium wave telephone on 2182 kHz. when requested.

Lome Port has a VHF station working on Channels 16, 14 and 12 day and night. A radio homing transmitter is working on 379 kHz. Signal "LME". Position 06° 10.7′ N. and 01° 16.3′ E.
Notification of Ship's: Ship's agencies should be informed as soon as possible about the vessel's arrival at Lome. The ETA telegram should contain the ship's length, draft, the quantity of cargo to be loaded and discharged and the number of stevedore gangs required. In addition to that the ship's agency should be advised to inform the pilot station as soon as possible.

ETA notification can also be sent by telex directly to the harbour. Telex No. 5243 TGPORT TO.

TUGS: The port has 3 harbour tugs. "Akodessewa", 960 h.p., 17 tonnes bollard pull; "Lome", 1,620 h.p., 24 tonnes bollard pull and "Aneho", 300 h.p., 42 tonnes bollard pull.

For all vessels over 500 g.r.t. the tug service is compulsory. Over 10,000 g.r.t. 2 tugboats are compulsory.

All tugs are equipped with following equipment: radar, fire fighting equipment and VHF radio-telephone. Working Channel 12. On Master's request, the tug can supply a towing wire.

BERTHING: Vessels berth according to their time of arrival in the roads. Priority is however given to passenger ships, Ro/Ro vessels, container ships as well as to vessels having less than 50 tons of cargo for loading/discharging.

The port is protected on the Western side by the main breakwater (1,720 m. long) and on it's East side by the counter breakwater (950 m.).

The general cargo quay is on each side (320 m. long) and has a width of 72 m. 4 berths are available. 3 berths are suitable for ships with max. draft of 9.5 m. (31 ft.) and one for ships up to 7.0 m. (23 ft.) draft and a max. length of 145 m.

The container pier has 2 berths, each 250 m. in length and 145 m. wide. There is 11 m. depth on the West side and 12 m. on the East side.

In times of heavy swell, special mooring-hawsers are available.

The bulk berth is situated on the inside of the counter-breakwater. There is space for a vessel of 200 m. with a max. draft of 11.5 m. (38 ft.). There is 6,400 sq.m. of free storage space. A clinker loading installation is able to load 1,000 t.p.h.

A tanker terminal is situated inside the counter-breakwater. Tankers with a max. length of 250 m. and max. draft of 13.50 m. (45 ft.) can berth here. Also see "Tankers".

The fishing port is situated in the Eastern part of the harbour. The length of the quay is 60 m. and the max. draft 4.50 m. This installation has an auction hall of 1,500 sq.m.

The height of the piers at low water is 4.50 m. The average tide difference is 1.20 m.

There is no special Ro/Ro berth available for bow/stern/ramp vessels.

The sheds "A" (5,000 sq.m.) and "B" (2,000 sq.m.), are situated on the general cargo pier. There are another 4 warehouses "C, D, E and F", each having 7,500 sq.m. of storage space in the vicinity of the piers. One shed of 1,000 sq.m. is available for dangerous cargo.

Burkina Faso have 2 warehouses of their own, each 5,000 sq.m. Mali and Niger each have one of 5,000 sq.m.

The free-storage space for containers and heavy-lift cargo is about 90,000 sq.m.
Equipment/Gear: The port is provided with:
- Mobile cranes from 10 tons – 60 tons.
- Fork-lifts from 2.5 tons – 30 tons.
- Toplifter of 30 tons.
- Platform Trailers of 40 tons.
- Tractors of 60 h.p.
- Grain-elevator and Mobile-gangways.
- Also container handling gear, trailers, chassis and spreaders.

There are 3 Pilot boats and 2 line-handling boats. On vessel's request, aluminium gangways are available.
Railway: The Togo-Railway (C.F.T.) which serves large parts of the country has an extension of its network into the port. Quay-sides and sheds are connected.

MEDICAL: Large hospital situated in Lome with doctors in attendance.

STEVEDORES: Agent should be informed as soon as possible of ship's ETA, length, max. draft, tonnage to load and/or discharge and number of gangs required.
Working Hours: In Lome the working time is as follow:
1. Day shift from 0700 hrs. – 1200 hrs. and 14.30 hrs.– 1730 hrs.
2. 1st shift from 0600 hrs. – 1400 hrs.
   2nd shift from 1400 hrs – 2100 hrs.
   3rd shift from 2100 hrs. – 0600 hrs.

Except Saturdays and holidays when work is possible in overtime.

Furthermore, extra labour is available if required for night work in order to complete loading and discharging operation. All work is done by port stevedores.

TANKERS:
Societe Togolaise des Hydrocarbures:
Max. Size: LOA – 250 m.
Dirty Ballast: Capacity 4,000 tons. Discharge rate 800 t.p.h.
Fresh Water: Available, 30 t.p.h.
Shore Gangway: Available.
Current: None.
Tidal Range: 0.90 m. – 1.50 m.
Nature of bottom: Sand.

Restrictions: Berthing and unberthing at any stage of the tide. Berthing during daylight hours only, unberthing anytime.

Cargo facilities:

Grades handled	*Pipe-line Reference*	*Length (m.)*	*Load/ D'charge Rate t.p.h.*	*Max. Pressure*	*Hoses No.*	*Hoses Size (in.)*
Ballast		1200			1	6
Crude Oil	Brown	4200	1100	7/9 kg/ cu.m.	1	8
Fuel Oil	Black-Brown	4200	1000		1	8
Kerosene	Yellow-Ash	4200	600		1	8
Benzene	Blue-Yellow	4200	800		1	8
Diesel Oil	Yellow-Orange	4200	900		1	8

DENSITY: Density 1025. Harbour open to sea.

FRESH WATER: Available at every berth except tanker Sealine. Delivery rate 30 t.p.h. Fresh water examined monthly for purity by Sanitary Authority.

FUEL: Diesel/gasoil is available in small quantities. There are 2 bunker spots on the pier. Tank-lorries can supply bunkers at any berth.

FIRE PRECAUTIONS: No extraordinary precautions are required. Vessels with hazardous cargo should declare this on ETA telegram to Agent. During time in port these vessels should take necessary precautions themselves, and all fire hoses should be ready rigged on deck. By day international code signal "B" should be displayed and by night a red light should be shown at masthead or at an all-round visible place. Ships with dangerous cargo have to engage a watchman.

Smoking on berths and within sheds *strictly* prohibited. Infringements of fire regulations punishable by fine.

GANGWAY/DECK WATCHMEN: Gangway watchmen and hatch security watchmen available; they wear a distinctive uniform. Also see "Fire Precautions".

OPENING/CLOSING HATCHES: Either ship's crew or dockworkers.

CERTIFICATES: All normal ship certificates should be available for inspection.

CUSTOMS ALLOWANCES: Because Togo-Port is a Free Port, no individual declaration by Crew members necessary.

CARGO GEAR: The port has no shore cranes. Ships have to use their own cargo gear. Only mobile cranes for cargo handling on the pier are available.

IDENTIFICATION CARDS: Shore landing passes issued by port police on exchange of crew I.D. cards at the port gate.

CONSULS: Ambassadors or Consuls from nearly all major maritime nations at Lome.

REPAIRS: Minor repairs only carried out by local workshops.

DRY DOCKS: Not available at present, but a slip for small vessels is included in future development.

AIRPORT: Lome International Airport with flights most days to Europe.

TIME: GMT throughout year.

HOLIDAYS:

1st January	New Year's Day
13th January	National Holiday
24th January	Economic Liberation Day
24th April	Victory Day
1st May	International Labour Day
*	Ascension Day
21st June	Patriots of Pya
15th August	Assumption
23rd September	Agression Day
1st November	All Saints' Day
**	Ramadan Day
**	Tabaski (Islamic Holiday)

*Date given by Christian calendar
**Date given by Islamic calendar

All other holidays will be worked in port with supplementary labour charges.

POLICE/AMBULANCE/FIRE: A telephone to contact Police, Fire service and Hospital is available day and night at the pilot station or on VHF Channel 16. The port is provided with an Ambulance Car as well as with a Fire Engine. Services have to be requested at the control tower of the pilot station.

TELEPHONES: 3 public telephones within the port limits. No telephones on board.

SERVICES: No tank cleaning or compass adjusting available.

DELAYS: Ships berth in rotation of arrival at anchorage. Priority given to passenger ships as well as to vessels having less than 50 tons of cargo for discharge. No lengthy delays in Spring of 1986.

GENERAL: *Port and Lome Town:* The Port Autonome de Lome is the only harbour of the Republic of Togo. There is a bulk phosphate jetty at Kpeme (position 06° 12′ N., and 01° 31′ E.).

Lome is the capital of the country and has 300,000 inhabitants. The port is situated about 5 km. East of the city. Taxis are available at the entrance of the pilot station.

All ship agencies and 2 banks maintain offices within the port premises.

On ship's request, a ship chandler comes onboard in order to provide fresh food and bonded stores.

Currency: The money in circulation is the Franc CFA. (100 Frcs. CFA=2 NF).

Seamen's Club: A modern seaman's club with swimming pool, video-room, library, hotel and bar is situated 0.6 km. away from the main gate of the port, and is at ship's crews disposal.

SHIPMASTER'S REPORT: July 1978 (updated 1986).

Documents: A mooring boat is available to Agents for the collection of documents on the Roads given prior notice.

Max. Size: Berth No. 1 depth 7.5 m. Berth No. 2, depth 10.5 m. Berth No. 3 depth 9.5 m. Berth No. 4, depth 9.5 m. Berth No. 5, depth 11.5 m. Berth No. 6 (New oil pier), depth 12.0 m.

Allowance is made for swell hence the max. draft at No. 6 is 39 ft.

Health: Free Pratique can be obtained from the roads if all documents are sent to Agents concerned with directions for distribution.

Radio: Lome Radio has been out of commision since May, 1978, and may continue thus until further notice unless spares are obtainable from France.

Tugs: There is an additional tug 3,000 h.p., 42 ton bollard pull, fully equipped for fire and salvage. The smaller tug of 17 tons bollard pull, is also equipped for fire-fighting.

Tankers: Berth No. 6 on Western side of East Mole with a depth of 13.5 m. and max. draft allowed of 39 ft.

Fuel: Gas Oil available ex-road tankers at all berths but full range of fuels to be provided at new tanker berth (No. 6) by August, 1978.

Cargo Gear: While no fixed cranes are available, there is a range of mobile cranes 5×10 tonnes, 1×25 tonnes, 1×45 tonnes and a container tower crane of 70 tonnes. All capacities are reduced by reach and angle while freeboard may limit use still further. A grain hopper and vacuvator gear are in use.

Airport: Flights are frequent, mainly indirect, to and from Europe, with 1 weekly direct to New York.

Consuls: At present there is no British representation in Togo but a Consulate may be re-established. Accra is 3/4 hours drive from Lome.

Seaman's Club: A large accommodation block offering various rooms and flatlets is part of the compound. Seamen have priority and at reduced rates. The Home is in the charge of a German pastor and under German control and has a VHF set for communication with vessels in the Roads. It is open to non-seafarers.

Hotels: A wide range of hotels are available including luxury type catering for the expanding tourist traffic which takes advantage of the unique climate for this part of the Gulf of Benin.

Fresh Provisions: Wide choice and good quality but not cheap. It is advisable to have samples brought onboard before ordering.

Delays: While there is no registration as such, certain vessels on regular trade, plus those with cargoes qualified as important, do get priority and all are subject to the daily (except Sunday) Port Captain's Meeting at which all elements are represented. The results are not available until 1300 hrs. after which most Agencies communicate by VHF to their vessels in the Roads. Container ships and Ro/Ro ships have a priority.

Working Hours: Gangs work 0600 – 1400 hrs.; 1400 – 2200 hrs. and 2200 – 0600 hrs. daily except, there is no 2200 – 0600 hrs. shift on Sunday nights. Each has a half hour break after 4 hours working.

Surveyors: The Port Captain and Senior Pilot, represents Germanischer Lloyd. There is no Lloyd's representative.

General: Lome is the entry port for Niger and Upper Volta as well as Western Ghana so the road and rail traffic is considerable. The border with Ghana is on the Western side of Lome City. A re-entry visa is necessary when proceeding to Accra and takes 1 or 2 days to process. The Ghana Border Police can issue 1 day Visitors' passes.

AUTHORITY: Port Autonome de Lome. B.P. 1225, Lome, Togo. *Tel:* 214742. *Telex:* 5243 TGPORT TO. *Cables:* TOGOPORT. *Contact:* S. Ottinger, Harbour Master.

AGENT: Socopao Togo, B.P. 821, Lome. Tel: 21.55.88; Telex: 5330 (Maritime) and 5205. Fax: 217317. Cables: "Freight Lome". VHF Channel 16.

NOTES

Tonga (Friendly Islands)

NUKU'ALOFA: 21.08 S. 175.12 W. (See Plan)

DOCUMENTS:
Immigration:
2 Crew Lists.
2 Passenger Lists.
Customs:
2 Crew Lists.
2 Passenger Lists.
1 Bond List.
3 Cargo Manifests.
Agents:
1 Crew List.
1 Passenger List.
3 Cargo Manifests.

PILOTAGE: Order through Agents at least 24 hours prior to arrival. Pilot boat may be contacted on R/T 1 hour before arrival at pilot station. This position is indicated on B.A. Chart (Approaches to Nuku'alofa). There are 2 approaches, namely the Ava Lahi Passage and the Piha Passage. Vessels using Piha Passage are limited to a length of 500 ft.

Vessels may anchor in the vicinity of No. 1 Buoy if required to await Pilot, but this is not normally necessary as the Pilot is available as requested. Pilot boat carries usual signals.

ANCHORAGES: Vessels may anchor wherever they wish within the port, subject to the approval of the Harbour Master.

MAX. SIZE: Length unlimited, beam unlimited, draft 40 ft.

HEALTH: Radio Pratique may be requested from "Tongamed", Nuku'alofa. Any suspected disease or fever must be reported by radio.

TUGS: No tugs available.

BERTHING: Queen Salote Wharf, Berths No. 1 and 2 are the only international berths in Nuku'alofa. Berth No. 1 length 93 m. and Berth No. 2 length 110 m.

STEVEDORES: There is a Master Porter employed by the Queen Salote Wharf Administration, who will supply whatever gangs are required. The number of hatches to be worked and the tonnage of cargo must be passed by the Agent to the Harbour Master at least 24 hours before vessel arrives.

MEDICAL: It is advisable to inform Agent in advance should medical attention be required. Hospital facilities are available. Vaccination Certificates are required for visitors who are staying. Ship's crew do not require them generally.

DENSITY: 1025 at all states of tide.

FRESH WATER: Available Queen Salote Wharf at 25 t.p.h.

FUEL: A small quantity of light diesel fuel could be supplied, sufficient to enable a vessel to make the port of Suva.

GANGWAY/DECK WATCHMEN: Not necessary as entry to wharf is restricted.

OPENING/CLOSING HATCHES: This work is completely optional.

CERTIFICATES: Normal requirements. Harbour Master may require to inspect cargo gear record.

CUSTOMS ALLOWANCES: A reasonable quantity is allowed by Customs according to expected stay in port. There are heavy penalties for smuggling.

CARGO GEAR: Valid certificates issued by competent authorities are recognised.

IDENTIFICATION CARDS: Not necessary.

CONSULS:
Australia
China
France
Germany F.R.
Korea
Naura
New Zealand
Spain
Sweden
United Kingdom

REPAIRS: Minor repairs can be carried out in the marine workshop.

REPATRIATION: Crew changes and repatriation possible.

AIRPORT: 25 km. from town. Flights to and from Suva (Fiji) Saturdays and Wednesdays. Flights to and from New Zealand Saturdays, Mondays and Wednesdays. Flights to Apia (Western Samoa) Saturdays, Mondays and Wednesdays. Flights to Hawaii Mondays and Thursdays.

TIME: The local time is 13 hours fast on GMT.

HOLIDAYS: *No work of any description is permitted on the Sabbath. This is strictly enforced.* Official Holidays are: Christmas Day; Boxing Day; Good Friday; New Year's Day; Easter Monday; Anzac Day; Emancipation Day (June 4th); Constitution Day (4th November); King's Birthday (July 4th).

POLICE/AMBULANCE/FIRE: In an emergency dial 911.

OTHER PORTS: Pangai, Ha'apai Group; Neiafu, Vava'u Group; both these ports are suitable for any size of vessel at anchor. Service is by lighter. Vessels of 400 ft. in length with a max. draft of 22 ft. may berth at Neiafu.

AUTHORITY: Harbours and Wharves Department, P.O.Box 144, Nuku'alofa, Tonga. *Tel:* 21-166. *Contact:* Wharf Administrator.

SHORE LEAVE: No restrictions.
DELAYS: Not usual.
AUTHORITY: Lake Asphalt of Trinidad & Tobago (1978) Ltd., Brighton, La Brea, Trinidad, W.I. *Tel:* 648-7556, 648-7477. *Telex:* 37374 Asphalt. *Cables:* Trinfalt. *Contact:* Ainsley Nichols, General Manager.
AGENT: See "Port of Spain".

CHAGUARAMAS: 10.40 N. 61.39 W.

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Compulsory. Pilots board in Chaguaramas Bay – Lat. 10° 46′ N., Long. 61° 43′ W.
ANCHORAGE: Safe anchorage in Chaguaramas Bay between mainland and Gaspar Grande Island about 0.5 miles off the dock.
RESTRICTIONS/MAX. SIZE: No restrictions on night operations. 2 docks – main wharf with overhead cranes for loading and discharging bauxite – 960 ft. long, max. draft 33 ft. Smaller wharf – 400 ft., draft 18 ft.
TUGS: Not used. Launch assists in mooring.
STEVEDORES: Not necessary. All loading/discharging done by Chaguaramas Terminals employees.
MEDICAL: All facilities available.
FRESH WATER: Available from dock, 40 t.p.h. Also supplied by barge.
FUEL: Can be delivered by barge.
GANGWAY/DECK WATCHMEN: Customs guards on duty at ship's side.
CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount of spirits.
IDENTIFICATION CARDS: Not required.
CARGO GEAR: Loading by travelling tower, rate 1,000 t.p.h. Conveyor system. Discharging – carried out with travelling rig of 2×4 ton grabs. Conveyor system.
REPAIRS/FLOATING DOCK: Operated by Swan Hunter Docks. Displacing up to 11,380 tons, 560 ft. long vessels. Also good berthing alongside, draft to 35 ft., and a safe close anchorage, draft 50 ft. General extensive repairs undertaken.
REPATRIATION: Can be arranged.
AIRPORT: See "Port of Spain".
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions.
AUTHORITY: Chaguaramas Terminals Limited, Pointe Gourde, Trinidad. Mailing Address: P.O.Box 608, Port-of-Spain, Trinidad. *Tel:* 637-4494/5. *Telex:* (294) 3288 (Answerback 3288 Chag Wg). *Cables:* Chagterms-Port-of-Spain-Trinidad. *Contact:* General Manager.
AGENT: See "Port of Spain".

CRONSTADT ISLAND: 10.39 N. 61.38 W. (See Plan)

Terminal owned and operated by Baroid Trinidad Services Ltd., handling bulk barytes and general oilfield supplies.

Vessels from abroad calling at Cronstadt are required to proceed first to Chaguaramas for clearance formalities.
DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Compulsory.
TUGS: One tug used for berthing if required.
RESTRICTIONS: Berthing/unberthing in daylight only.
MAX. SIZE: 350 ft. length. This size vessel would overhang wharf approx. 80 ft. fore and aft. Depth alongside 13.7 m. Longer vessels can be accommodated with special clearance.
BERTHING: Vessel moored with 2 springs, 3 head and stern lines to dock. Discharging carried out with 15 ton shore crane and grab bucket with 3 yards with capacity for bulk ore.
FRESH WATER: Available by barge.
FUEL: Available by barge.
AUTHORITY: Baroid Trinidad Services Ltd., 59 Sackville Street, P.O.Box 765, Port-of-Spain, Trinidad. *Tel:* 62-51691/2/3, 62-52584. *Telex:* 22446 Baroid WG. *Cables:* Baroid Trinidad. *Contact:* W. Smith, General Manager.
AGENT: See "Port of Spain".

GALEOTA POINT: 10.05 N. 61.01 W. (See Plan)

LOCATION: Galeota Single Buoy Mooring Terminal is located 2.6 miles on a bearing of 208° from Galeota Point Lighthouse, and is an open unsheltered roadstead. Galeota Point is a narrow headland about 210 ft. high and located in Lat. 10° 08′ 00″ N., Long. 60° 59′ 30″ W. The lighthouse, mounted on a lattice steel tower located in Lat. 10° 08′ 32″ N., Long. 60° 59′ 40″ W., exhibits a light 87 m. above sea level which flashes white every 5 secs. and is visible for 22 miles. The buoy itself exhibits a quick flashing, (1 flash per sec.), red light, 10 ft. high, and visible for 4 miles through 360°.
DOCUMENTS:
Health Declaration (International Health Form to be filled out by Master on arrival).
Derat or Exemption Certificate.
Crew List (4).
Crew Customs Declaration (2).
Register.
Stores List (2) (Signed by Master).
Passenger Manifest (2) (If any passengers are aboard).
Bonded Stores List.
Clearance from last Port.
Manifest (if no cargo, a statement that vessel is in ballast).
ESSENTIAL REQUIREMENTS: MOST ESSENTIAL REQUIREMENTS TO BE MET BY TANKERS LIFTING OIL AT GALEOTA TERMINAL.
1. *Disposal of Ballast:* No dirty ballast will be pumped overboard. A separate ballast disposal line (16 in.) is available at the Terminal to pump ballast to a pit onshore where oil and water can be separated and disposal made.
2. *Notice of Arrival:* Incoming tankers must send ETA via commercial radio at least 72 hours before arrival at Galeota. Local time is GMT minus 4 hours and daylight saving (Summer Time) is not applicable.
3. *Arrival:* Company Loading Master and a Government Pilot if requested by the Tanker's Master will contact all incoming tankers about 3 to 4 miles from Galeota Point on a bearing of 220°/230° from the lighthouse, and will advise the ship's personnel on mooring and unmooring. If the buoy is occupied, or if arriving at night, vessels should anchor at least 1 mile S.W. of the buoy.
4. *Tankers to Have Ready:* (a) 2 nylon or manila messenger lines of not less than 6 in. circumference and at least 300 ft. long, placed at the bow. (b) at ship's manifold there must be equipment capable of lifting the floating hoses. Weight of hose is about 3 tons.
5. *Crew Duties:* The tanker's crew will raise, rig, and operate vessel's derrick and winch for the hoisting of the floating hose. The Terminal crew will connect and disconnect loading hoses.
6. *Tanker's Valves:* Tanker's valves must not be closed against incoming oil stream. At least 1 minute is required to shut down pumps and stop flow of oil from the Terminal storage.
7. *Communication-Emergency:* If ship-to-shore communications fail, a line launch is always alongside and has radio contact with the Terminal Control Centre.
8. *Responsibility:* The Tanker's Master is responsible at all times for the safety of all ship's operations. Galeota Terminal rules and regulations do not contravene International Safety rules such as SOLAS (Safety of Life at Sea) or other maritime regulations such as those of appropriate classification societies. In case of any conflict, the latter shall apply.
PILOTAGE: Vessels arriving should approach to within 3 to 4 miles of Galeota Lighthouse on a bearing of 220°/230° and will be met by the Amoco Loading Master and a Trinidad and Tobago Pilot (if requested through vessel's Agent). The Pilot will be stationed on the bridge and will advise the vessel on the approach to the buoy. The Amoco Representative will be positioned in a most advantageous position and will advise the ship's crew on picking up and making fast the floating nylon mooring lines.

Vessels are requested to make a proper lee and to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Loading Master's launch. At night, adequate lighting must be rigged overside for the Loading Master to approach the side of the ship and climb the ladder safely.

Raising, connecting, disconnecting and lowering of floating hoses will be performed by the Terminal's crew with the assistance of the ship's crew as advised by the Amoco Loading Master, who will remain on board while the ship is secured to the buoy. The Loading Master will be in direct charge of the portable VHF ship-to-shore radiotelephone communications.

If, in the opinion of the Loading Master, the vessel is not equipped with adequate mooring or hose lifting facilities, he will so inform the vessel's Master, and in such event the vessel shall not be brought into the moorings until facilities, lines, or gear are deemed satisfactory.
APPROACHES:
Port Limits: Approaching vessels should never anchor to the East or N.E. of Galeota Point. A submarine pipeline from a platform in Lat. 10° 10′ 24″ N., Long. 60° 39′ 56″ W., enters the Galeota Point area about 0.5 miles Northward of the lighthouse. Vessels should approach from the South-westward and never anchor less than 1 mile from the SBM or between the buoy and the coastline.

Navigational Aids: Galeota Point Lighthouse is located in Lat. 10° 08′ N., Long. 60° 59′ 30″ W., and exhibits a white flashing light every 5 secs. and is visible for 22 miles. The lighthouse is unattended and frequently does not operate. The SBM exhibits a quick flashing red light every second, and is located in Lat. 10° 05′ 47″ N., Long. 61° 00′ 45″ W.

Landmarks: Galeota Point appears as an island when approaching from seaward, since it is connected to the island of Trinidad by lower land. Situated on this lower land about 0.5 miles Northward of the lighthouse is the tank farm and processing area.

There are 5 oil storage tanks and they are painted a grey colour.

A small boat harbour is located 0.5 miles due West of the lighthouse in Guayaguayare Bay. The sheet piling type jetty extends seawards, on a bearing of 245°, 1,900 ft. from a point at Lat. 10° 08′ 14″ N., Long. 61° 00′ 00″ W. The seaward 300 ft. of this jetty has a controlling draft of 13 ft. at extreme LW.

Vessels approaching from a North through East direction will observe lighted drilling platforms with following locations:

1. Teak "A"	Lat. 10° 10′ 24″ N.,	Long. 60° 39′ 56″ W.
2. Teak "B"	Lat. 10° 11′ 41″ N.,	Long. 60° 39′ 55″ W.
3. Teak "C"	Lat. 10° 10′ 29″ N.,	Long. 60° 40′ 36″ W.
4. Teak "D"	Lat. 10° 02′ 12″ N.,	Long. 60° 38′ 54″ W.
5. Teak "E"	Lat. 10° 10′ 26″ N.,	Long. 60° 39′ 55″ W.
6. Samaan "A"	Lat. 10° 20′ 30″ N.,	Long. 60° 40′ 47″ W.
7. Samaan "B"	Lat. 10° 19′ 46″ N.,	Long. 60° 41′ 04″ W.
8. Samaan "C"	Lat. 10° 19′ 47″ N.,	Long. 60° 41′ 35″ W.
9. Poui "A"	Lat. 10° 06′ 35″ N.,	Long. 60° 49′ 47″ W.
10. Poui "B"	Lat. 10° 06′ 55″ N.,	Long. 60° 49′ 02″ W.
11. Tesoro "A"	Lat. 10° 11′ 05″ N.,	Long. 60° 54′ 59″ W.
12. Cassia	Lat. 09° 55′ 00″ N.,	Long. 60° 31′ 53″ W.
13. Mora	Lat. 10° 10′ 49″ N.,	Long. 60° 51′ 32.8″ W.

Vessels should exercise caution and keep well clear of these platforms because of unlighted buoys, small boat operations, submarine pipelines, and anchored test barges nearby.

The lighthouse 4 miles to the Southwestward of Manzanilla Point situated on Brigand Hill (Lat. 10° 29.4′ N., Long. 60° 51′ 32.8″ W.) is an excellent landmark for vessels approaching from the Northward. The lighthouse is elevated 712 ft. and exhibits a group flashing (3) white light every 30 secs. and visible for 20 miles.

RESTRICTIONS: The Terminal operates 24 hours per day, 7 days a week. Ships are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, however an exception to this rule may be made at the discretion of the Terminal. The Terminal will never be closed due to holidays.

MAX. SIZE: 250,000 d.w.t. Depth of water 95 ft.

RADIO: *Long Range and Radio Communications:* Ships may send their cable(s) to the Amoco office through the commercial station, "North Post Radio/9YL", which is about 10 miles N.W. of Port of Spain. Upon receipt of such cable(s) North Post will immediately relay it to Amoco's office through their Telex system. Messages pertaining to oil liftings should be addressed to AMOCOTRI, Trinidad. If it is necessary to send messages through vessels' Agents or Owners via International Telex Service, then they may be sent to Amoco by using the Telex address "WG 287" (Amoco – Port of Spain).

Cable or Telex messages addressed to Galeota Terminal would undergo the same procedures, but upon receipt in Amoco's radio office in Port of Spain, they will immediately be relayed to Galeota Point by HF/SSB radio teletype channel.

Cables from Galeota Terminal to the ships would be given to Amoco, Port of Spain radio office on the SSB, which will be telephoned to North Post Radio Station.

The coast radio station transmits traffic lists at regular intervals listing the call signs of all ships for which they have traffic on hand. At the end of their traffic lists, the coast radio station starts searching for answers on the frequency bands listed below. Thus, any vessel hearing its call sign in the traffic list, will immediately start calling the coast station on its own working frequency in the same band on which the traffic list has been heard. The searching coast station radio operator would eventually pick up the signals from the calling ship and would pass her his traffic.

Listed below is information on "North Post Radio Station" – 9YL:

Station	*Call Sign*	*Frequency*	*Hours*
North	9YL	(HF) 17184 kHz	1200 hrs. – 1530 hrs. (GMT)
Post		(HF) 12885 kHz	1330 hrs. – 2050 hrs. (GMT)
Radio		(HF) 8710 kHz	0100/0600/0900/1300 1500/1730 & 2130 hrs. (GMT)
		(HF) 6470 kHz	2300 hrs.
		(MF) 476 kHz	0300 hrs. and every 4 hours thereafter.

Medium Short Distances: Ships may contact Galeota Terminal within 3 days before arrival on the marine HF frequencies. Galeota Point listens on 2182 kHz and operates with Amoco's marine units on 2398 kHz.

Ships equipped with FM/VHF radios may call Galeota Point on 156.8 MHz = Channel 16 and/or Channel 8.

Advice of Arrival: It is important that ships establish radio contact with Amoco when 3 days distant from Terminal and maintain this contact until just prior to arrival at the Terminal. All ships should send a 72 hours ETA message to Amoco giving the best estimates of ship's arrival time at the Terminal. This ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. Further ETA messages should be sent to Amoco when the vessel is 24 hours and 12 hours distant from Galeota Point and at any other time any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hours ETA should include a positive statement regarding ship's Readiness to Load on arrival, and the number of hours that will be required to discharge ballast after the ship is berthed in mooring (see "Ballast").

Ship-to-Shore Communication: Ship-to-shore communication, while ships are in moorings, will be by portable VHF radiotelephone units. The Loading Master will advise Masters and Officers regarding the emergency whistle signals set up for use in event VHF radiotelephone units become inoperative. The use of the ship's radio station and/or battery charging equipment is prohibited during cargo transfer operations.

Ship's Radio Stations: The use of ship's radio equipment while ship is on anchorage in Terminal waters is prohibited by law, unless transmission is made through the local commercial station.

BERTHING:

Single Buoy Mooring: Tankers are loaded by means of a 42 in. pipeline from shore to the SBM which is 2.6 miles offshore. The facility for receiving dirty ballast has been permanently terminated. The loading hoses from the buoy to the tanker consist of 2×20 in. floating hoses, 755 ft. and 790 ft. long ending in 3×12 in. hoses of 90 ft. length. Valves are fitted in the buoy connectors so that the flow in one 20 in. diameter floating hose string can be diverted to the 16 in. diameter underbuoy hose string.

The SBM is designed for maximum tanker size of 250,000 d.w.t. and is located in 95 ft. water depth. The buoy is 11 m. in diameter, 4.8 m. high, and equipped with a navigation light and radar reflector. There is a skirt at the bottom of about 15 m. in diameter.

Ship's Gear: Vessels calling at the Galeota Point must be equipped with 2 nylon messenger lines of a minimum 6 in. circumference and at least 300 ft. long. These lines should be laid out free for running at the bow of the vessel. Warping winch or windlass should be in good working order and adequate to handle 12 in. nylon floating rope under heavy strain. Efficient stoppers must be available to transfer floating nylon from winch to bitts.

Vessels must be equipped to fit flanges on floating hoses which are ASA standards.

Ships must be adequately equipped with blocks, tackle and booms to hoist the floating hoses, each weighing about 3 tons, from the sea surface over the ship's port rail to the manifold, in a safe, efficient and expeditious manner. Ships must also have an adequate supply of nuts, bolts, gaskets, and wrenches to connect cargo/deballast hoses.

Ship's Alertness: The Terminal is an open roadstead, therefore, during the time a ship is moored at the Terminal, the ship's engines and gear must be ready with full power for immediate use.

Vessel at the SBM must be able to clear and shall clear immediately upon advice of the Loading Master or as directed by Amoco's Terminal Superintendent.

Ship's personnel should be at their stations and alert at all times during mooring, unmooring and cargo transfer operations.

Mooring Launches: Amoco maintains launches to assist in mooring and unmooring vessels.

BALLAST: It is the Shipmaster's responsibility to see that no oil (crude, diesel, bunker C, or bilge) is pumped or spilled overboard from the ship. All vessels are required to arrive at Galeota with clean ballast only, which will be discharged overside.

All precautions shall be taken to prevent any loss of oil overboard; drip pans must be in place and used when disconnecting oil hoses from manifolds. The waters in and adjacent to the Galeota Terminal, and Amoco's offshore platforms must *never be polluted.*

As soon as practical after arrival, all vessel's tanks will be inspected. If during first inspection or during loading, it is revealed that ship's tanks are not oil-tight, tanker will be rejected and refused further loading. Ship will not be accepted later for loading unless satisfactory evidence, duly certified by Lloyd's, ABS Surveyors, or other authorised survey agency, of effective repair is submitted.

A vessel must have sufficient ballast for safe manoeuvring and usually one-third of its tonnage is adequate. However, by a careful watch of the weather information and berthing instructions and by a knowledge of the behaviour of his own vessel, a Master may desire to come to the Terminal with minimum ballast.

Shipmaster should be aware that at any time deballasting at sea occurs and has been reported or viewed by Amoco Trinidad Oil Company personnel, the offence will be documented, where possible, by Amoco personnel, and a report submitted to the proper Ministry of Trinidad and Tobago.

In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness, will illuminate the area around the ship, to the satisfaction of the Loading Master, in order that any oil on the surface of the sea may be readily detected, and appropriate action taken. Vessels unable to illuminate the sea satisfactorily may not discharge ballast during darkness. Vessels should provide explosion proof flood lights for working on deck during night operations.

Loading and Deballasting Simultaneously: Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is received from the Terminal Superintendent.

LOADING:

Rate of Loading: Maximum crude oil loading rate through 2×12 in. deck hoses is approximately 40,000 bbls.p.h. The flow is by pump and the line pressure will not exceed 100 p.s.i.

In order to save ship's time, it is requested that ballast water be pumped *as fast as possible* and that the tanker receives oil as fast as it can be delivered, both operations having due regard for safety. It is requested that any impediment (such as "Y's", strainers, or mud boxes) to the flow of oil be removed before arrival at the Terminal. Connections should be provided so that 12 in. ASA deck hoses may be used.

Berthing: Tenders to load crude oil cargo will normally be accepted and the berth will be assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at the time and are in all respects equipped and ready to moor. In the event that the berthing is delayed on account of weather, vessels will keep their position in line. Vessels required to leave the port area on account of weather (port closed) should keep in contact with the Terminal via radio in order that they will be available when the weather moderates. Amoco reserves the right to load vessels "out of turn" following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other vessels in line. For example, in the event that weather makes it necessary for vessels awaiting berth to vacate the terminal and put to sea, Amoco may load another vessel which arrives first after the return of good weather, but before the return of the vessels waiting in line ahead of it. And further, Amoco reserves the right to decline to moor a specific vessel if its condition or facilities are unsafe for mooring or loading, even though the port may be open to other vessels.

Connecting Hoses: After the tanker is securely moored, the floating loading/deballasting hoses must be lifted to the rail with ship's equipment. The two 12 in. hose lifts weigh about 3 tons each. The flange connection on each hose is for a 12 in. manifold. Hoses are lifted individually by the ship's gear and are connected on the port side. The 12 in. hoses are connected direct to the manifold and tankers should have their manifold fittings available.

The Loading Master and the hose crew will sling and connect the hoses to the vessel's manifold. The ship's personnel are expected to operate the winch and assist where necessary. A deck officer should be present at all times.

Loading Readiness and Arrival Time: The Company will make every effort to load vessels upon arrival or as promptly as berth is available, weather permitting.

Notice of Readiness will not be accepted as at time of arrival, unless the vessel is in all respects ready to load. Arrival time will be considered as the time the Loading Master boards the vessel or the time that vessel anchors, whichever occurs first.

Responsibility: The vessel is responsible for the deballasting and loading. The Company Loading Master will advise the vessel in respect to loading pressures and hazards, but will not direct the loading except as may be necessary to protect the terminal facilities. Manipulation of ship's valves is the direct responsibility of the ship's personnel.

All Masters will ensure that only clean ballast is discharged overside. Periodically, Masters may be requested to flush the floating hose string with sea water to facilitate loading hose replacement.

Oil Valve Control: Caution: The incoming oil stream is controlled onshore, and it is extremely dangerous to close a ship's valve against the incoming stream. Such a procedure creates excessive pressure, which may damage hose, ship's piping, or Terminal facilities. Vessels will be held responsible for damage resulting from failure to observe this precaution.

A reduction in loading rate before topping the final tank or tanks may be arranged through the Loading Master by the ship's officer in charge and a normal standby warning should be given about 15 minutes before the shut down of loading operations per normal tanker practice. On advice from the ship a minimum of 1 minute is required to stop the flow of crude oil.

Emergency Signal: A battery-operated emergency shut down signal is expected to be installed in the near future.

Code Flag: During loading or deballasting the International Code Flag "B" shall be displayed from a topmost signal halyard during daylight hours. During hours of darkness, a red light shall be displayed. This light should be of a character such as to be visible at a distance of at least 1 mile, and to show an unbroken light all round the horizon.

Shore Stops: Requests for the Terminal to stop the flow of cargo at a pre-determined tonnage will be made verbally to the Loading Master, and Amoco will not be responsible for any error, and in the case of overloading excess cargo will not be pumped back ashore.

Some delays are always incurred when such a shore stop request is made.

MEDICAL: Vessels requiring emergency medical assistance should immediately contact the Terminal, by marine VHF radio, and supply the necessary pertinent information which will be passed on to the vessel's Agent.

Neither medical or hospital facilities are available at Galeota or provided by Amoco. Limited facilities are available in Mayaro, which is about 30 minutes drive and unlimited service is available in Port of Spain which is 2 hour's drive.

FRESH WATER: Only available by barge from Port of Spain.

FUEL: Only available by barge from Port of Spain.

REPAIRS: Masters of vessels loading or discharging at Galeota Terminal are advised that this port is considered an "Open Roadstead", and under no circumstances may engines be shut down for repairs while their ships are moored to the SBM system. There are no facilities at Galeota Terminal for making vessel repairs, but arrangements may be made through vessel's Agent, to utilise the Port of Spain facilities. It is emphasised that all vessels at the SBM must be in readiness to clear immediately on instructions to do so.

SURVEYORS: Amoco maintains an inspection laboratory at Galeota Terminal and will inspect cargo on specific request of off-tanker companies.

Classification agencies are represented in Port of Spain as follows:

American Bureau of Shipping	Lloyds Register of Shipping
Grell and Company Ltd.,	Geo. F. Huggins and Co. Ltd.,
60 St. Vincent Street,	72 – 74 South Quay
Port of Spain	Port of Spain

TIME: GMT minus 4 hours, and daylight saving (Summer time) is not applicable.

CONSULS: There are no consulates at Galeota; however, consular or diplomatic representatives for most nations maintain offices in Port of Spain.

CUSTOMS ALLOWANCES: Each Crew member is allowed to retain in his possession 200 cigarettes and 1 bottle of spirits. The balance must be listed and will be sealed in a locker by the Customs.

SHORE LEAVE: Shore leave for personnel of vessels loading or unloading at the Terminal is arranged through the vessel's Agent. All personnel going ashore must land at the Amoco small boat harbour. Sufficient crew must be aboard at all times for letting go lines in order to clear the mooring immediately if necessary.

SAFETY: The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Loading Master, having in mind, the hazards of the operation because of the product being handled, weather conditions and any other circumstances requiring special care or caution.

It should be noted that Amoco Trinidad Oil Co. does not maintain any specialised fire-fighting vessel. However, workboats with limited fire-fighting capability may be available in event of such emergencies.

While the vessel is moored or within the vicinity of the moorings, all vessel's personnel and vessel's operations must comply or be in accord with the following safety rules:

1. The ship's engines must remain ready with full power for immediate use.
2. The Loading Master may request the Master to extend the ship's "No Smoking" areas as conditions warrant. Masters are also requested to instruct their crew not to throw lighted cigar or cigarette butts over the side or out of the portholes. All alleyway doors to passage ways leading to deck areas are to be kept closed during cargo transfer operations.
3. Not less than 1 deck officer and 3 seamen shall be available on deck at all times while vessel is in the mooring system.
4. Power must be available at all times on all deck winches and on the anchor windlass while vessel is in the mooring system.
5. Explosion proof deck lighting must be available for night mooring and loading. A good floodlight will be required to illuminate the area around the cargo hose connections during cargo transfer operations. During the discharge of ballast at night, the sea area around the vessel is to be adequately lighted.
6. All deck scuppers must be plugged tight before connecting the floating and deck hose and remain plugged until all hoses are disconnected.
7. The presence of unauthorised craft alongside is extremely hazardous. Ship's Masters are requested to require all non-Amoco craft to clear ship's side as soon as personnel have been embarked or disembarked.
8. No stores may be handled on the weather deck while ship is loading cargo, discharging dirty ballast, or while any ullage hatches, loading hose, or tank tops are open.
9. No cargo will be loaded while tank tops or ullage hatches are open.
10. During the time a vessel is moored in the Galeota Terminal, a continuous and efficient fire watch must be kept on deck and in the engine room. Fire hose (at least 2 pairs) shall be left out for immediate use at all times while in the berth.
11. In the event of fire breaking out in any part of the vessel, however minor it may be, the fire alarm must be given immediately. This will consist of a succession of long blasts on the ship's whistle, together with a rapid and continuous ringing on the ship's bell.
12. A safety check-off list and Terminal rules for safety will be delivered by the Loading Master.

WEATHER:

Climate: The climate around Trinidad is generally very good, and is strongly influenced by the N.E. trade winds. Visibility is usually excellent except during passing thunderstorms and the percentage of days with less than 1 mile visibility is very small.

Weather Data and Summary:

Average rainfall	60.0 in.
Mean maximum temperature	87°F
Mean minimum temperature	69°F
Extreme maximum temperature	101°F
Extreme minimum temperature	52°F
Average relative humidity (0700 hrs.)	92%
Average relative humidity (1500 hrs.)	67%

Winds: Winds are predominantly from the N.E. and East (about 90% of the time). The mean velocity is about 8 – 12 knots and infrequently 30 knot winds may be experienced.

Tides: A tidal range on the East coast of Trinidad is 4 ft. – 5 ft., and the tides occur 17 minutes later than Port of Spain.

Sea Conditions: As Trinidad is constantly under the influence of the N.E. trade winds, the seas and swells are predominantly from the Eastern quadrant throughout the year. Wave heights average about 6 ft. – 8 ft. and during a 2-year observation period waves of 11 ft. and higher occurred for as many as 20 days per year.

Currents flow to the N.W. 53%, North 24%, and N.N.W. 14%. The currents are not seasonable as currents of 2 to 3 knots are experienced during all months of the year. Average current velocity is about 1.5 knots.

Sea Temperatures: The surface temperature over coastal areas average about 75°F to 80°F in the Winter months and 80°F to 85°F in Summer.

General: Trinidad is an area where buildings have been damaged by earthquakes and the S.W. tip has experienced mud volcanoes and disappearing islands. The rainy season occurs in late Summer and Autumn at which time as much as 15 in. per month may be experienced. Hurricanes are seldom felt in Trinidad and Tobago since these islands are to the South of the storm track.

GENERAL:

Government Officials: Trinidad and Tobago Customs Officials will be stationed at Galeota and in most instances the Customs Officer will also handle the duties of the Quarantine and Immigration Officers. Should Customs Guards be stationed on board vessels while in the moorings, it is expected that ships will provide food for these guards and other officials.

Quarantine Regulations: The rules governing quarantine of vessels are the same found in other ports of the world.

Visitors: Visitors must obtain a special pass from the Amoco Terminal Superintendent and it is strongly recommended they be restricted to a minimum due to the hazards involved.

Supplies: Commissary supplies, as well as steward's stores are not available at Galeota Point, but a limited amount of fresh fruits and vegetables may be purchased at the market in Mayaro, which is 30 minutes' drive from the shore terminal. Unlimited supplies may be purchased in Port of Spain and all arrangements must be made through the ship's Agent.

Bunkers, gas oil, marine lubricants or potable water are not available at Galeota.

Flag: All vessels are required to fly the Trinidad and Tobago ensign on the foremast during daylight hours. TT flags may be obtained from ship's Agent.

Contraband: Amoco prohibits unauthorised craft from coming alongside ships while in the moorings.

To avoid the possibility of undesirable items getting aboard vessels, it is recommended that Masters discourage "bumboats" or similar craft, coming alongside while vessel is in the Terminal vicinity.

Small Boat Harbour: A sheet piling type jetty is used for the harbouring of mooring launches and supply vessels. The entrance is defined, by a spar topped buoy exhibiting a quick flashing red light located 1,700 ft. Southwestward from the end of the jetty.

Company's Terminal: The Company's Terminal and marine administrative offices, storage tanks and laboratory for testing stock are located onshore at Galeota Terminal.

Agency: Amoco does not perform any vessel agency functions. Owners of vessels calling at Galeota Terminal must arrange for their own Agent.

OPERATOR: Amoco Trinidad Oil Company, P.O.Box 714, Port of Spain, Trinidad, Trinidad & Tobago. *Tel:* 62-27331.

AGENT: See "Port of Spain".

POINTE-A-PIERRE (Oil Terminal and Refinery):

10.19 N. 61.29 W. **(See Plan)**

DOCUMENTS:

5 Copies Crew List.
4 Copies Stores List.
1 Copy Unmanifested Cargo.
2 Copies Crew Declaration.
1 Copy Declaration of Health.
1 Copy Arrival Report.
1 Copy Firearms & Ammunition List.
Derat Certificate.

Officials require accommodation ladder to be rigged, usually on port side, for boarding and clearance.

PILOTAGE: Compulsory. Pilot boards from tug. Pilot ordered by Agent after receipt of ETA. Pilot ladder conforming to International Safety Regulations to be supplied by vessel.

If vessel proceeding to SPM, Pilot boards 2 miles West of SPM. If vessel proceeding to berths Pilot boards 1.2 miles S.E. of SPM.

ANCHORAGE: Safe anchorage and good holding ground in the roadstead. On account of Pierre Shoal, a 21 ft. patch about 1.75 cables S.W. of the head of the main viaduct, vessels of moderate draft should approach with the main viaduct bearing more than 075°. The main viaduct consists of pipe-lines supported by reinforced concrete piling, located at Lat. 10° 20′ N., Long. 61° 30′ W. and extends in a W.S.W. direction for 6,190 ft.

RESTRICTIONS: Controlling depth in main channel 42 ft. No entry restrictions day or night. However, Free Pratique must be obtained, Crew Lists, Stores Lists, etc., to be presented to local Agents on arrival. Arriving vessels must contact Trintoc, Pointe-a-Pierre on VHF Channel 16 two hours prior to arrival for berthing instructions, traffic information, cargo nominations etc.

MAX. SIZE: Max. draft at SPM 73 ft. 6 in.

Also see "Shipmaster's Reports".

HEALTH: See "Port-of-Spain".

TUGS: Trintoc maintains 3 tugs to assist in berthing.

RADIO: Vessels to send ETA messages 72, 48 and 24 hours prior to arrival to "Trintoc Marine Pointe-a-Pierre". Messages should be sent through one of the following: Chatham (USA), North Post (Trinidad), Barbados or Curacao.

VHF: The Trinidad and Tobago Oil Co. Ltd. maintains their own radio station (24 hours). Call "Trintoc-Marine Pointe-a-Pierre" on Channel 16, working Channel 13. If at SPM – Channels 6 and 10.

BERTHING:

	Max. Permissible			
Berth No.	*Draft* (ft.)	*LOA* (ft.)	*D.W.T.*	*Remarks*
1	37.5	720	50,000	
2 (North)	37.0	775	63,000	
2 (South)	22.0	—	—	Small vessels and barges only
3 (North)	35.0	640	35,000	
3 (South)	—	—	—	For barges only
4	23.0	360	—	
5 (Sea Island)	41.5	900	100,000	
6 (Sea Island)	54.0	950	120,000	
7	36.0	700	35,000	
8 (General Cargo)	28.5	700 (pier length) 70 (pier width)	25,000	
SPM	73.5	—	286,000	

DISCHARGING:

Maximising Cargo Discharge (Squeeze Dry Operations): Due to the current high costs of crude oil the following guidelines have been compiled which should be followed by all Owned, Managed and Time Chartered vessels at every cargo discharge operation in order to maximise cargo outturn. Special importance should be attached to the discharge immediately preceeding shipyarding. A Representative from the Company will attend vessels periodically in order to advise and assist as required.

General Guidelines for Maximising Cargo Discharge:

1. Inerted vessels capable of Crude Oil Washing must strictly follow the routines set out in their Tank-cleaning Manuals. Owned, Managed and Time Chartered vessels should COW all cargo and slop tanks prior to shipyarding. TC vessels should also COW all cargo and slop tanks prior to re-delivery.
2. Stripping operation to be performed twice, first during normal discharge and the second time after all cargo (except partial contents in the aftermost (slop) tank) has been discharged ashore. The Inspector must ensure that vessel is adequately trimmed by the stern during all stripping operations.
3. On completion of normal discharge (except for partial contents in aftermost (slop) tank) and second stripping of all tanks, contents of main deck and drop lines and loading arm connections must be stripped to slop tank. (NB: Air or tank atmosphere must be used to break the vacuum).
4. Line content in all main suction lines must also be dropped into aftermost tanks and all main suction valves in tanks opened to drain suction elbows. On completion of dumping line contents, stripping system to be used to drain cargo remaining in the suction system and pumps back to the slop tank, with tank suction shut.

   This is best achieved by commoning up all main cargo pipe-lines on the suction side of the main cargo pumps, opening the suction valves to these pumps and cross connecting the suction side of the stripping system to the main cargo line.
5. Where available, open by-pass valves connecting discharge side with suction side of main cargo pumps.

   Note: When vacuum starts building up in the suction system, allow tank atmosphere to enter the pipe-lines by opening a suction valve in a forward tank.

   It is recommended that one hose or loading arm remains connected to the manifold to which the small diameter deck stripping line (where available) discharges into. This line discharges outboard of the vessel's manifold valve, which of course is left shut during final discharge ashore of slop tank contents using stripping system.
6. The reasons for stripping back line and final tank contents to the aftermost (slop) tank rather than direct to shore are that:
   (a) Operator has better idea when suction is lost (by seeing no increase in slop tank ullage).
   (b) Accurate measurements can be made of total quantity of cargo recovered by operation "Squeeze Dry".
7. On completion of final line and tank draining, discharge contents of aftermost (slop) tank ashore via small diameter deck stripping line, where fitted, or via main discharge line where not.

Check List for Line Draining – Operation "Squeeze Dry":

1. Are following design features available to improve line draining:
   (a) By-pass to connect discharge side with suction side of main cargo pumps?
   (b) Connections from stripping system to both suction and discharge lines of main cargo pumps?
   (c) Vent valves in deck lines near manifold?
   (d) Suction and discharge pressure gauges and stroke counters in stripping pumps?
   (e) Small diameter deck line, for final draining?
   (f) Block valves in stripping line system?
2. Is cargo discharge *completely* finished and all cargo tanks checked by dipping to be well drained?
3. Have contents of tank washing line that was used for COW been properly dropped into slop tank?
4. Are all manifold valves with shore connection (except one if no small diameter line available) open?
5. Are all valves in deck, pumproom and drop lines open?
6. Are all valves (except tank valves during line draining) in suction lines open?
7. Are all lines dropped in aftermost (slop) tanks?
8. Has air/inert gas been allowed to enter to vessel's line system both at forward end of bottom lines and in the manifold area?
9. Are stroke counters (where fitted), suction and delivery pressure gauges of drain pumps working correctly?
10. Has dropping operation been checked by measuring oil level in aftermost holding or slop tank/tanks?
11. Have all manifold valves been shut after dropping operation?
12. Has valve in small diameter deck line been opened, or where not fitted, has "final" manifold valve been opened?
13. Have stripping pumps been set correctly to drain holding or slop tank ashore through small diameter line (or deck line)?
14. Have all lines in cargo tanks, on deck and in pumproom been set correctly for line draining to holding or slop tank?
15. Has holding or slop tank been properly drained ashore and checked to be well drained by dipping?
16. Has vacuum been allowed to build-up before air/inert gas was let in and has this been done repeatedly?
17. In addition to checking holding or slop tank ullage, are drain pumps checked to see if actual delivery from line draining/tank draining has stopped?
18. Has shore been asked to check delivery of final holding or slop tank into shore system?
19. Have all valves been shut after line draining?

Note: During draining of discharge lines to holding or slop tank, open the non-return valves in the discharge lines (if movable from the outside).

List of Crudes unsuitable for Crude Oil Washing:

Due to their very high viscosity, the following crudes should not be used for Crude Oil Washing.

(a) Boscan Crude
(b) San Ardo Crude
(c) Corcorna Crude
(d) Laguna Crude
(e) Monagas Crude
(f) Tia Juana Pesado Crude

Vessels should contact FHQ for instructions if any COW problems are envisaged with *High Pour Point* crudes in areas where low air and sea temperatures are likely to be encountered.

Minas Crude (Waxy crude loaded at Sungai Pakning, Sumatra)

Pertinent properties of Minas Crude are:

A.P.I. Gravity	35.5
Flash	Ambient Pour
Point	95°F
Viscosity SSU at 100°F	87
Heat Requirements	100°F to 120°F

Based on information now available regarding the characteristics of Minas Crude, the procedure to be observed in handling of this crude should be as follows:

1. *Cargo Tanks* – Due to high wax content of Minas Crude, considerable wax may accumulate in tank bottoms. A regular tank cleaning routine should be established by vessels in this trade to assure reasonable cleanliness of tanks. Vessels should arrive at loading ports with a minimum amount of clean ballast.

2. *Heating* – Minas Crude is to be maintained at a temperature of 110°/120°F throughout a voyage. In order to facilitate the discharge of the cargo, the temperature should be raised to 120°F just prior to arrival. *Caution:* Light ends on this cargo will be lost if temperatures are maintained in excess of 120°F over an extended period of time; therefore heating above 120°F should be done only on instruction from the Marine Superintendent or Agent as the case may be at the receiving terminal. Experience has shown that on most vessels this temperature can only be obtained by controlled heating through the entire voyage, although the steam pressure required will vary on individual ships, weather conditions and temperature of the sea water encountered in transit. In addition to these requirements, the 72 hour ETA should include the average temperature of the cargo.

3. *Discharging* – Due to Minas Crude having a very high wax content and a pour point of 90°F, many unusual difficulties can be encountered.

Major difficulties may be expected during stripping of tanks due to the oil congealing in the vessel's tank bottoms when the level of the oil is below the heating coils. It is therefore of the utmost importance that, in order to prevent large amounts of product remaining on board, tanks should be immediately stripped as the discharge progresses.

Recommended discharging procedure is to discharge one or two tanks simultaneously in each section of the vessel, maintaining a considerable drag to insure maximum flow of the oil into the cargo piping suctions. Heat should be maintained on the cargo tanks throughout the discharge. In the event tanks become foggy, as the level of the oil becomes progressively lower in individual tanks, a rod or sounding tape should be introduced to ascertain the amount of cargo remaining and it is highly recommended that the steam not be turned off the tank in order to prevent fogging. One of the characteristics of Minas Crude when it cools is not to remain on vertical surfaces, but rather lay in hills and valleys on horizontal surfaces. In many instances, a sounding rod will show only a few inches of oil remaining under the ullage plug and two or three feet could remain in the forward end of the tank if temperatures are allowed to drop.

4. Removal of solidified oil from tank bottoms upon completion of discharge. If necessary a sufficient quantity of hot water taken from a fire line over-all into individual tanks through the ullage holes to cover heating coils, will assist in heating the remaining portion of the cargo for discharge. In many cases, the introduction of a pyrate machine with hot water will assist in removing solidified oil from horizontal surfaces of internal members of the tanks. The vessel may also be listed slightly in one direction or another to facilitate the free flow of oil into the suctions in the wing tanks.

Duri Crude (Intermediate Gravity Crude)

Duri Crude, which is loaded at Dumai Terminal, is a high viscosity relatively heavy crude oil. No unusual handling problems are anticipated in the bulk carriage and discharge of this crude.

Pertinent properties of Duri Crude are:

API Gravity	About 22.0
Flash Point	94°F
Viscosity (Range of Tests)	1000–455 SSU at 100°F 400–220 SSU at 130°F
Heat Requirements	100°–120°

The high viscosity of this crude requires that it be heated in order to assure a satisfactory discharge rate. The actual viscosity of shipments may vary, but is believed to be nearer the low figures of the range quoted above. The recommended discharge temperature is 100°F at this time, subject to change if higher viscosities and/discharging difficulties are experienced.

The recommended cargo heating procedures are:

1. Test heating coils and repair as necessary.
2. Commence heating cargo 96 hours before arrival at discharge port.
3. Raise cargo temperature gradually until it reaches the required 100°F.
4. Maintain cargo temperature at 100°F throughout the discharge.

Discharge procedures which have proved effective in the handling of heavy fuel oils should also be used when handling Duri Crude. Tanks should be stripped quickly on an "as you go" basis to take advantage of the faster flow of hot cargo and thereby minimise stripping and the accumulation of cargo residue below the heating coils.

TRANSHIPPING: *Instructions to VLCC Masters from Trintoc Marine:*

1. Anchor your vessel in designated anchorage with starboard anchor and rig gangway starboard side. Enter and clear vessel in normal manner, co-ordinating all activities via VHF with Trintoc Marine Superintendent at Shipping Office.
2. Gauge all tanks, determine amount of cargo on board and advise Shipping Office along with A.P.I., temperature and other particulars. Re-secure all tanks. Advise Lightering Vessel A.P.I. and temperatures.
3. Barge will come alongside, port midships. Receive on board 6×30 ft. lengths of 12 in. cargo hose along with necessary reducers, blanks, bridles, straps, etc. Ship's crew must rig 2 strings of 90 ft. long hose connected to your manifolds, and supported by your vessel's boom. Hoses will be tended by your vessel's crew throughout transhipment.
4. A string of 4 ft.×11 ft.×21 ft. Yokohama fenders, each separated by 100 ft. length wire will be brought alongside (port). Your forward and after main deck wire springs will be lowered down and secured to the ends of the fender string to secure same alongside. Four of the fender positioning wires will then be lowered from your deck and one secured to each of the fenders. The fender string must then be positioned and secured alongside centred on your manifold.
5. Two additional fenders will then be brought alongside and secured approximately 150 ft. forward and aft of the main fender string to provide additional protection to your vessel in mooring and unmooring the lightering vessel. Two positioning wires will be passed up to your deck from each of these fenders to secure them in place.
6. When lightering vessel comes alongside your crew must be stationed fore and aft on deck to handle lines. Your bridge should be manned with engines on standby in the event of emergency. During entire transhipment all fire fighting equipment must be rigged and ready. Additional fire fighting equipment and anti-pollution devices will be on harbour tugs and available if needed.
7. A lightering vessel assisted by tugs will come abeam of your vessel and send out synthetic lines, one forward, one aft, by launch.

   Your crew must lower heaving lines or messenger lines to launch, then heave lines on board and secure fore and aft on your vessel. Lightering vessel will then be brought alongside and positioned with her manifold approximately 10 ft. – 40 ft. aft of yours. The lightering vessel will then pass her wires (all containing nylon straps) to your vessel and safely secure alongside.
8. After the lightering vessel is safely secured alongside, to your satisfaction, the two hose strings will be passed to her and secured to her manifolds. The lightering vessel will support the hose ends, however, the main support will remain your vessel's boom. Agreeable handling rates, procedures and signals must be agreed upon between the Masters of the vessels involved and the Trintoc Co-ordinator of the transhipment. Portable VHF radios operating on Channels 16 and 10 will be supplied from ashore. VHF Channel 10 will be used for all ship-to-shore communication.

   Your control room must be manned at all times by a competent individual who must be monitoring Channel 10. Additionally a competent individual (Officer) and a full watch must be maintained on deck to tend hoses, fenders, etc. One man must be stationed at the manifold and in full view of the hoses and other vessel at all times.

   The Trintoc Co-ordinator and Marine Staff will be available and will assist in all ways possible, however, the responsibility for a safe operation rests with you and your vessel.
9. Upon completion of loading the lightering vessel, your tanks must again be gauged and figures passed to Shipping Office. All tanks must then be secured prior to unmooring of lightering vessel. The Marine Office will co-ordinate handling of necessary cargo documents depending on the destination of the lightering vessel.
10. Hoses will be drained to the lightering vessel, then disconnected, blanked and taken back aboard the VLCC.

    Your crew must again be stationed fore and aft, your bridge manned and the lightering vessel unmoored.
11. The procedure will be repeated for the next lightering vessel.
12. It is anticipated ballast will be taken after the second lightering or as soon as one isolated section is stripped of cargo. Prior to ballasting Trintoc Co-ordinator should certify tanks to be ballasted as dry.

ALTHOUGH IT IS IMPORTANT TO MINIMISE DELAYS THIS CONSIDERATION MUST TAKE SECOND PLACE TO PROPER SAFETY PRACTICES AND TO ANY STEPS NECESSARY TO AVOID POLLUTION.

Also see "Discharging".

DENSITY: 1025, (August to November approximately 1023).

FRESH WATER: Available alongside or by barge (if available and adequate notice given prior arrival). Limited in dry season (January-June).

FUEL: Fuel oil, diesel, gas oil and lubes supplied ex-pipeline or by barge. Also see "Shipmaster's Report" dated August 1979.

BALLAST: No facilities. Vessels to arrive with clean ballast.

REPAIRS: Almost all types of deck and engine repairs can be carried out.

DRY DOCK: Trinidad Foundry and Fabricating Ltd. located at Chaguaramas.

SURVEYORS: Lloyd's, A.B.S. and N.V.

REPATRIATION: Facilities exist for effecting crew changes and arranging repatriation.

AIRPORT: Piarco International Airport 28 miles (approx.) away from Pointe-a-Pierre, served by International Airlines and flights are regular.

TIME: GMT minus 4 hours.

SPECIAL PRECAUTIONS: *Emergency Alarm:* This safety device is conveniently placed on all docks and is under the control of the jetty personnel. This is used only in cases of emergency and has the effect of stopping all shore pumps immediately it is used. Loud-sounding horns are situated on the hose structures and are sounded by the jetty attendant when urgent attention from the ship is required.

Hose Pressure: The max. discharge pressure allowed on the jetty hose is 130 lbs. Pressure of jetty hose for loading shall not exceed 130 lbs.

GANGWAY/DECK WATCHMEN: An efficient watch must be maintained on deck and in the engine room of all ships in port, and a sufficient number of men must be on board at all times to move the vessel either for harbour operations or in emergency situations.

CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or 0.5 lb tobacco and 1 bottle of spirits.

IDENTIFICATION CARDS: Not required.

MEDICAL: Advance notice of medical attention preferred. Modern hospital facilities.

TELEPHONES: On dockside and at all sea berths.
SHORE LEAVE: Regular launch service from ship to Pointe-a-Pierre only, for all crew members.
GENERAL:
Tidal Variation: Rise and fall is approximately 3 ft. 6 in.
Prevailing Winds: N.E. trade winds.
Flags Required: Republic of Trinidad & Tobago and International Code Flags "B", "G", "H" and "Q".
Launches: Launch service to Pointe-a-Pierre for Officers and crew.
Laundry/Provisions: Available.

SHIPMASTER'S REPORT: August 1979 (updated 1986).
Bunkering:
Approach: (From Passage Book). Trinidad and Tobago Islands observed on radar at 48 miles, although echo masked by clouds, islands observed visually at over 40 miles. Marked by towering Cumulus clouds. Numerous tide rips and abrupt change of colour of water (green) at the 200 m. sounding line.

Good position obtained at a distance 35 miles from Galera Point and Scarborough using visual bearings of Galera Point and Little Tobago and distance off Granby Point.

North coast Trinidad current approximately 1.5 knots West going.

Chupara Point Light not conspicuous during daylight and not seen at night.

Chacachacare Light (Admiralty List of Lights No. 5846) good, seen at 35 miles.

Gulf of Paria can, with moderate sized vessel, be approached through any of the channels of Bocas Dragon. We used Boca de Huevos which was safe, no problems. Parallel Indexing very useful on Point au Diable, Point Braba and Cape Cola.

Serpents Mouth not recommended at night.

Gulf of Paria not very busy, many vessels anchored off Port of Spain.

An intense white light (Fl. ev. sec.) is located on Chimney just South of South Pier at Pointe-a-Pierre (position: Lat. 10° 18′ 38″ N., Long. 61° 27′ 36″ W.). B.A. Chart No. 482 seen at 12 miles.

No appreciable current in Gulf of Paria.

VHF: Called "Trintoc Shipping Office Pointe-a-Pierre" on Channel 16 about 5 miles North of Boca de Huevos Strait, contact reasonable. Working on Channel 13, very prompt.

Anchorage: General anchorage along parallel of 10° 19′ North from 3 miles West of No. 1 Buoy (Lat. 10° 19′ 06″ N., Long. 61° 29′ 18″ W.) to 0.5 miles off buoy.

We anchored with No. 1 Buoy 072°×1.0′, good position in 17 m.

For bunkers, oil company like vessel as close as possible to No. 1 Buoy, but not closer than 0.5 mile.

Immigration/Customs: Came out very promptly. No difficulties, forms as per "Guide to Port Entry". Must have gangway rigged. Pratique message sent, no answer received, given on arrival.

Bunkering: Trintoc: Dumb barge of 1,500 tonnes capacity. Delays caused by waiting for harbour tug to bring barge alongside vessel also delay waiting for tug on completion of bunkering. Contact 'Shipping Office' Channel 16 well before barge finishes in order that they may call tug. We waited for tug for one hour before bunkering and 2 hours on completion.

Diesel 6 in. line, 150 ASA, ship's derrick required.

Rate: Up to 200 tonnes p.h. for diesel.

Films: Walport Films and Vidpack can be changed on prior notice to Agents.

SHIPMASTER'S REPORT: September 1979 (updated 1986).
Approaches: Deep drafted vessels use Boca Grande to enter Gulf of Paria in which is situated the Pointe-a-Pierre Terminal. An area marked by dotted lines on the chart has been surveyed and declared safe for large vessels and this route should be followed up to the anchorage off Pointe-a-Pierre.

Anchorage: Trintoc Shipping advise vessel where to anchor when making the approach and on this occasion we used two anchorages whilst waiting, first with the "SBM" bearing 083°T×2.4 miles and the second with La Luc Lt. bearing 334° and Radio Mast bearing 110°. At both anchorages vessel used 6 shackles on starboard anchor in about 60 m. of water. Bottom, heavy glutinous mud which gives good holding ground. The deepest draft vessel which arrived in the port was drawing 73 ft. and appeared to have no difficulty anywhere.

Navigational Restriction: VLCCs are required to advise Harbour Master, Trinidad, of their time of arrival off Boca Grande, 24 hours before arrival so that other vessels can be advised to give a clear berth. On approach to Boca Grande vessel can contact North Post Radio on VHF to confirm transit time and receive information of other movements. Our ETA was broadcast 3 hours out.

Port Officials: Customs and Immigration board with Agent and clear vessel inwards. No special requirements. Bond is sealed but Customs will board to make crew issues after each 7 days if requested through Agent. Port Health work is carried out by Agent and we renewed Derat Certificate. Shore leave passes are issued by Immigration and are of two types, one for Officers which allows them to use the Pointe-a-Pierre jetty to land and also the Trintoc Club and one for the crew which only allows them to land at Pointe-a-Pierre jetty.

Shore Leave: (Launch cost TT$8.00 per hour of stay). A fast launch calls at the ship every two hours, day and night, to take personnel to Pointe-a-Pierre. The launch can be contacted on VHF Channel 15 or 16. We found that by advising them of whether we had crew to go ashore before they arrived at the ship we received better service. Officers wishing to go to the club could get a separate launch arranged by Trintoc Shipping (when available) direct to Pointe-a-Pierre.

Bunkers: Bunkers are supplied by barge of which there are two, one of 10,000 bbls. capacity and the other of 25,000 bbls. Pumping rate is very slow, we had 3 separate lifts and the average rate was about 120 t.p.h. The larger barge also has capacity to supply good fresh water if previously arranged through the Agent, which is more economical and better quality than in the official water barge.

Fresh Water: Normal source of supply is by barge from Port of Spain which requires about 4 days' advance notice. Cost of supply is TT$3,000 no matter what quantity you require and we found the water supplied was heavily polluted with sea water giving a reading of 500 p.p.m. salt and also tasted oily. It is better to take water when bunkering (See "Bunkers").

Ship Chandler: Stores were expensive and many items unobtainable. All stores have to come through Pointe-a-Pierre jetty and the chandler has to make arrangements with the launch supervisors for transport to the ship. If large quantities involved, a barge and tug are used. We tried to get everything at one time but this was impossible. No canned beer or minerals are available and all bottles are returnable which increases the price.

Cargo Handling: We lightened into two vessels and discharged the balance of cargo at the SBM. The discharge plan was changed frequently during the waiting time. Discharge into the ships was via a 12 in. hose and only one pump was required to achieve the required discharge pressure and gave rates of 2,075 t.p.h for the first and 2,933 t.p.h for the second. Discharge to the SBM was via one 16 in. hose with a second hose connected in case of difficulties with the first, although not actually used, and a rate of 2,224 t.p.h. was achieved. All discharging was carried out using the port side manifold and derrick.

Before lightening, three lengths of hose were placed on board to be connected together and attached to the ship's manifold, then a string of four "Yokohama" type fenders were made fast alongside using the spring wires from forward of No. 1 and from between Nos. 8 and 9 holds. We were instructed to keep the wires slack at all times to prevent the joining wires breaking. All the moorings from the lightening ships have to be fed through "Panama type" fairleads and no open leads used to prevent the rope/wire jumping out of the lead when the lightening ship is completely deballasted. Communications between vessels is via walkie-talkies supplied by Trintoc and a co-ordinator from Trintoc attends the vessel for liaising operations. Bunkering cannot be carried out while lightening but is acceptable at the SBM, we managed to complete it before any cargo operations started. No gangways are used between ships.

Mooring at the SBM was carried out with the assistance of one tug made fast on the starboard side of No. 1. A ship's line is sent away to connect with the SBM port line, as usual, this starting line should be two ropes joined together to ensure adequate length. Once the connecting line is brought on board (a 16 in. nylon) in sufficient quantity it is made fast on the bitts and the starboard connecting line picked up and secured. When connecting hoses, we found that our manifold flanges were too thin to accept their patent clamps and we had to fit 12 in. reducers to our manifolds and also to their pipe-lines to get a good fit. Ship's crew carry out all operations although there are personnel placed on board for mooring to the SBM to advise and assist.

Mooring and unmooring are usually carried out during daylight but for some reason we unmoored during the night, much to the surprise of the Pilot and co-ordinators, being the first vessel to do it for 6 years.

Personnel Changes: We carried out several changes of personnel over the period and in general, the joining people arrived on time without much difficulty but the personnel leaving, unless previously booked in advance, met with delays getting flights. A vessel which arrived the day after us, had eight men delayed ten days before flights were available. Non-crew personnel, such as technicians, who arrived and stated they were coming to do work on the ship were not allowed entry into the country without obtaining a work permit.

SHIPMASTER'S REPORT: February, 1980 (updated 1986).
Documents: 5 Crew Lists, 2 copies of Crew Personal Effects, 2 Arrival Reports, 1 unmanifested Cargo List, 2 Report of Ship's Stores. All these on local forms except Crew Lists.

Anchorages: Usually given an anchorage position by Trintoc, Trinidad, and normally use starboard anchor and require starboard accommodation ladder.

Tankers: Advise Agents time of transiting Bocas del Dragon and then North Post Radio will advise all ships. If using SBM, require forward 2 ship's lines to bring aboard 2×16 in. nylon lines which have to be heaved around drum ends. Sometimes have tug to assist.

SHIPMASTER'S REPORT: November 1983 (updated 1986).
Documents:
Agent: P&I 48 (Arrival Report)
Immigration: P&I 10 (Arrival Report), P&I 53 (Arrival Report form in triplicate)
Quarantine: P&I 31 (Maritime Declaration of Health)
Customs: C-1 (Ship's Stores in duplicate)
C-2 (Crew Declaration)
C-3 (List of Unmanifested Cargo)
5 copies of Crew List.

Anchorages: It is necessary to anchor in position given by Trintocmarine otherwise they request you to shift to correct position but also necessary to check there is not another vessel anchored there already.

Radio: We found it very difficult to communicate with North Post Radio from the bay. 'Shipping' or Trintocmarine are very helpful passing messages to agents, etc.

Shore Leave: Apparently the liberty boat rarely goes to San Fernando these days (apparently due to the unsafe state of the jetty).

Currency: Agents require at least 10 days' notice if vessel requires any foreign currency and, apart from this delay, Sterling and U.S. Dollars seemed readily available. 4 days' notice is required for local currency. This 4 days would probably be longer if not using Company Agents.

Mail: Mail took 4 days from arrival at airport to delivery on board.

AUTHORITY: The Trinidad and Tobago Oil Co. Ltd., Pointe-a-Pierre, Trinidad, W.I. *Tel:* 65-84200. *Telex:* 39366/39367 Trintoc Marine. *FAX:* (809) 658-1315. *Cables:* Trintoc, Pointe-a-Pierre. *Contact:* R. F. Jones, Marine and Harbour Division. Govert Hooft, Port Captain.
AGENT: See "Port of Spain".

POINT FORTIN: 10.12 N. 61.42 W. (See Plan)

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Pilotage is compulsory. Pilots board 0.5 miles off main jetty (Lat. 10° 12′ N., Long. 61° 42′ W.).
ANCHORAGE: There is safe anchorage 0.5 miles off the head of the jetty.
MAX. SIZE: Jetty 2 miles long with "T" head providing two outer berths of 700 ft. length and a depth of 38 ft. 1 inner berth of 300 ft. length and a depth of 35 ft. and other inner berths of 300 ft. length with a depth of 15 ft. 6 in.

1 conventional buoy mooring (6-buoy mooring) of 850 ft. length and a depth of 53 ft. situated 4,819 ft. North off jetty head.
TUGS: Required for berthing at outer berths for vessels of 30,000 d.w.t. and over and for unberthing vessels with a draft of 36 ft. or deeper. Also required for berthing and unberthing at conventional buoy mooring. Launch assists in berthing and unberthing.
BERTHING: Bottom alongside, mud; back pressure (hose), 100 lb; Current, flood S.W., ebb N.E. 2 to 5 knots; rise and fall tide, 4 ft.
MEDICAL: All facilities available.
FRESH WATER: Not available at CBM.
FUEL: Not available at CBM.
DIRTY BALLAST: No facilities available. Only small amount (approx. 200 tons) of tank drainings acceptable on jetty and only if fluid at ambient temperature.
FIRE PRECAUTIONS: Normal oil terminal safety precautions applicable.
GANGWAY/DECK WATCHMEN: Customs guards on duty at ship's side.
CUSTOMS ALLOWANCES: 200 cigarettes, and a moderate amount of spirits.
IDENTIFICATION CARDS: Not required.
REPAIRS AND DRY DOCKS: At Chaguaramas.
REPATRIATION: Can be arranged.
AIRPORT: See "Port of Spain".
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions.

SHIPMASTER'S REPORT: April 1977
The Port of Point Fortin is situated in S.W. Trinidad. The light beacon on the "T" pier head is in position Lat. 10° 12′ 05″ N., Long. 61° 42′ 06″ W. The port is owned and operated by the Trinidad and Tobago Oil Company Ltd. (TRINTOC), to serve the 100,000 bbls. per day refinery at Point Fortin. A 24 hour communications service is provided, telex via international lines (TRINTOC Point Fortin) or VHF 16 (Call sign: Point Fortin Shipping) working on Channel 11.

Pilotage is compulsory with the boarding area 1 mile seaward from the jetty head. There is 1×1,000 h.p. tug normally available for berthing vessels over 30,000 Summer d.w.t.

Tides in the area of Point Fortin vary in strength throughout the year with a max. rate of 3 knots. Masters are advised to check sea water density for corrected loadline readings. Water density varies throughout the year from salt to fresh.

Engine repairs which entail immobilisation of engines are not permitted when moored at the berths.

Vessel must arrive with clean ballast consistent with safe manoeuvring of the ship. A ballast condition of 25% of the vessel's Summer d.w.t. is recommended.

Only clean ballast may be pumped overboard.

Notice of Readiness is accepted when vessels' tanks are ready to receive cargo.

Bunkers and fresh water can be supplied at all berths except No. 5 (C.B.M.) Stores and laundry facilities are available on request. A diver is available. The only way of getting ashore is by means of a liberty launch. Walking the pipe-line bridge is strictly forbidden.

Inward Clearance is effected immediately on arrival by the Port Authorities; the following documents should be available for official use:
- Clearance from Last Port.
- Derat Certificate.
- International Health Certificate.
- Declaration and Crew Vaccination Certificate.
- Cargo Manifest, if any.
- Bill of Lading, if applicable.
- List of unmanifested packages, if applicable.
- 3 Copies Arrival Report.
- 7 Copies Crew List.
- 3 Copies Stores List.
- 3 Copies Personal Effects.
- Licence for Dangerous drugs, if any aboard.

In the interest of reducing tanker port time, vessels' Masters are advised to request Pratique by Radio prior to their arrival.

Berths:

No. 1 – Draft 37 ft. 6 in. (Loading over tide 39 ft.).
Max. length 700 ft. – Max. berthing displacement 45,000 tons.
Grades handled: Crude oil, Fuel oil, Gas oil, Diesel oil, Kero, LDF, JP4, Platformate. All via 10 in. hoses. Napthanic Oil Residue via 4 in. hose.

No. 2 – Draft 36 ft. (Loading over tide 38 ft.).
Max. length 700 ft. Max. berthing displacement 25,000 tons.
Grades handled: Crude oil, Fuel oil, Gas oil, Diesel oil, Platformate, Kero, LDF, JP4, Mogas. All via 10 in. hoses. (Napthanic Oil Residue via 1×4 in. hose).

No. 3 – Draft 34 ft. 6 in.
Max. length 300 ft. max. berthing displacement 5,500 tons.
Grades handled: Fuel oil, Diesel oil, Gas oil, Kero, Mogas, all of them through 6 in. hoses.

No. 4 – Draft 14 ft. 6 in.
Max. length 300 ft. Max. berthing displacement 3,000 tons.
Berth port side to. Berthing at slack water and flood tide, unberthing at slack water tide and flood tide.
Grades handled: Fuel oil, Diesel oil, Gas oil, LPG, Bitumen, Emulsion (COLAS).

No. 5 – C.B.M., 6 buoys, max. draft 51 ft. max. length 850 ft. Berth either side. Daylight berthing only.
Grades handled: Crude oil, Fuel Oil via 2×16 in. hoses.

AUTHORITY: Trinidad & Tobago Oil Co. Ltd.
AGENT: See "Port of Spain".

POINT LISAS (Fedchem): 10.22 N. 61.29 W. (Plipdeco Marine): 10.24 N. 61.29 W.

(A) FEDERATION CHEMICALS LTD.

DOCUMENTS:
- 7 copies Crew List.
- 2 copies Ship's Stores List.
- 2 copies Passenger List.

The following should be on Trinidad Forms:
- 2 copies Crew Stores List – Form C2.
- 2 copies Ships Stores (Bond) – Form C1.
- 3 copies Immigration Arrival Report – Form P&I 10.
- 2 copies Unmanifested Cargo – Form C3.
- 1 copy Declaration of Health – Form P&I 31.
- 2 copies Arrival Report – Form P&I 53.
- 1 copy Stowaway List – Form P&I 12.

Ship's Register.
Derat Certificate
Passports.

PILOTAGE: Pilots ordered through Agent; 48/24/12 hour ETA needed. Pilotage is compulsory. Pilots board at Head of Pt. Lisas Channel (Lat. 10° 22′ 37″ N., Long. 61° 39′ 38″ W.); Pilot ladder conforming to International Safety Regulations to be supplied by vessel.

Launch hire arranged by Dock Master to take out Pilot to vessels on arrival, and again take off Pilots from vessels on departure.
CLEARANCE: Point Lisas being a port of entry is equipped with resident Customs Officer and Guard. Ships arriving from abroad could proceed directly to Point Lisas as Customs Officer acts for Harbour Master/Port Health. Tel. 636-2020. Immigration Officer boards on arrival.
ANCHORAGE: Safe anchorage 0.25 miles off head of channel. On occasions, when port congested, vessels may be requested to anchor Port of Spain Roads (Lat. 10° 41′ N., Long. 61° 33′ W.) before proceeding Pt. Lisas.
RESTRICTIONS: No restrictions on night entry – departure.
MAX. SIZE: See "Berthing".
HEALTH: For quarantine if required, or authentication of vaccination certificate, Honorary Port Health Officer could be in attendance at short notice. Tel. 636-2311.
VHF: Pt. Lisas Dockmaster can be contacted on VHF Channels 16, 14 and 12.
TUGS: Molasses, bulk sugar and LPG carriers use a tug to assist in berthing and unberthing at Pt. Lisas "Liquid Pier". Tug will be ordered by the Agent.
BERTHING: Point Lisas "Liquid Pier" (vessels handling bulk sugar, molasses, caustic soda and Anhydrous Ammonia in Liquid form), Maximum LOA: 550 ft. Maximum draft: 28 ft. LW. Also see "Shipmaster's Report" August 1988.

Point Lisas "Solids Pier" (vessels discharging plant equipment, and loading sulphuric acid in drums and bagged and bulk fertiliser). Maximum LOA: 250 ft. Maximum draft: 20 ft. LWOST.
STEVEDORES: If necessary will be ordered by Agents. No ETA to stevedores necessary.
MEDICAL: Advance notice of attention required will assist. Modern hospital facilities available.
FRESH WATER: Only by barge.
FUEL: All grades supplied by barge. At "Solids Pier" gas oil only can be supplied ex shore installation (Monday – Friday from 0800 – 1600 hrs.).
FIRE PRECAUTIONS: When loading LPG. No smoking on pier or on ship's deck.
GANGWAY/DECK WATCHMEN: Customs guards on 24 hours duty at ship's side.
OPENING/CLOSING HATCHES: Normally by crew.
CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount of spirits.
IDENTIFICATION CARDS: Not required.
CONSULS: At Port of Spain.
REPAIRS AND DRY DOCKS: At Chaguaramas 20 miles North of Pt. Lisas.
POLICE/FIRE/AMBULANCE: Accidents – Police – Help, 62999; Fire – First Aid, 62998.
HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Monday; Whit Monday; Corpus Christi; Discovery Day (First Monday in August); Independence Day (August 31st); Diwali Day (late October early November); Eid-ul-Fitr (December 21st – 22nd, approximately); Christmas Day (December 25th); Boxing Day (December 26th); Labour Day (June 19th); Republic Day (September 19th). Work is possible, except for Labour Day, Union Anniversary Day and Christmas Day, on these holidays.
REPATRIATION: Crew changes and repatriation can be arranged.
AIRPORT: Piarco International Airport – 30 miles from Point Lisas. Daily flights to world-wide destinations.

TIME: GMT minus 4 hours.

TELEPHONES: No facilities for telephones on board.

SERVICES: Efficient maintenance gang available for normal work, tank cleaning, painting, etc.

SHORE LEAVE: No restrictions.

DELAYS: Due to congestion, sometimes delays are unavoidable, usually not more than 24 hours.

DEVELOPMENTS: Present depth of channel 28 ft. at MLW.

SHIPMASTER'S REPORT: August 1988.

Vessel loaded ammonia at the Liquids Pier.

Max. draft 28 ft. at LW and if at this draft, vessel can only sail at HW.

Mooring consisted of 2 head/stern lines and 2 breast lines and 2 springs at each end and with very long leads.

One tug used.

Connections made by ship's crew (6 in. 300 ASA). Max. loading rate 700 t.p.h. at a temperature of −31°C. Vessel allowed to purge alongside with shore providing hot ammonia vapours.

Ship's brow gangway used.

AUTHORITY: Federation Chemicals Ltd., P.O.Box 952, Port of Spain, Trinidad, W.I. *Tel:* 636-2020. *Telex:* 3353 Fcl Wg. *Cables:* Fedchem.

(B) POINT LISAS INDUSTRIAL PORT DEVELOPMENT CORP. LTD.

LOCATION: Point Lisas lies on the Western side of Trinidad in the Gulf of Paria, in position Lat. 10° 24.2′ N., Long. 61° 29.6′ W.

DOCUMENTS:
- 7 copies Crew List.
- 2 copies Ship's Stores List.
- 2 copies Crew Stores List.
- 4 copies Immigration Arrival Report (supplied on arrival).
- 1 Declaration of Health (supplied on arrival).
- Ship's Register.
- Derat Certificate.
- Ship's Safety Certificate.
- Passports.
- Seaman's Identification Cards.

PILOTAGE: Pilotage compulsory. Pilots ordered through Agents. Advice at 120, 96, 72, 48, 24, 12 hours' necessary prior to ETA. Pilots board at entrance of Savonetta Channel Lat. 10° 22′ 57″ N., Long. 61° 31′ 11.2″ W. Pilot ladder must conform to International Safety Regulations. Launch hire arranged through Plipdeco Marine to take Pilot on or off vessels.

CLEARANCE: Point Lisas (Plipdeco) is a Port of Entry. On arrival ships may proceed directly alongside or to anchorage for clearance by resident officers.

ANCHORAGE: In-bound vessels may anchor in the anchorage bounded by:

Lat. 10° 23.5′ N.	Long: 61° 31.2′ W.
Lat: 10° 24′ N.	Long: 61° 32.2′ W.

Out-bound vessels may anchor in the anchorage bounded by:

Lat: 10° 22.5′ N.	Long: 61° 31.2′ W.
Lat: 10° 22′ N.	Long: 61° 30.2′ W.

APPROACHES: *Plipdeco's Channel and Basin Markers:*

No. 10 Starboard Hand Buoy	10° 23′ 52.16″ N., 61° 29′ 44.00″ W.

*Newly established positions.

MAX. SIZE: See "Berthing".

HEALTH: Valid Yellow Fever certificates if last Port of call was in an infected area. Quarantine on authentication of certificate available at short notice.

VHF: Plipdeco Marine Channel 16, working frequency Channel 9.

RADAR: Not installed at Plipdeco Marine.

TUGS: 4 Resident tugs available. 2×2,250 h.p. and 2×500 h.p. Towage services ordered by Agent.

BERTHING: The Channel is 1.75 nautical miles long and 152 m. wide. Turning basin 700 m. long and 500 m. wide. Both are dredged to 12.8 m. True course 052.25°. The Channel serves the following terminals:

Berth 1A:	Max. LOA:	100 m.
	Draft:	5.5 m.
	Facilities:	None.
	Dock Length:	24 m.
Berth 2:	Max. LOA:	130 m.
	Draft:	2.5 m.
	Facilities:	None.
	Dock Length:	170 m.×40 m. Ro-Ro ramp.
Berth 3:	Max. LOA:	120 m.
	Draft:	5.8 m.
	Facilities:	None.
	Dock Length:	32.3 m.
Savonetta Pier No. 1 (South):	Max. LOA:	220 m.
	Dock Length:	310 m.
	Max. Draft:	11.6 m.
	Facilities:	Specialised installation for loading Anhydrous Ammonia. Maximum rate 1,000 m/t.p.h. Specialised facilities for loading Methanol (700 t.p.h.) and Urea (800 t.p.h.) in bulk.
Savonetta Pier No. 1 (North):	Max. LOA:	110 m.
	Dock Length:	164 m.
	Max. Draft:	6.1 m.
	Facilities:	None, however ideal for bulk liquids.
ISCOTT Terminal:	Max. LOA:	407 m.
	Draft:	11.6 m.
	Facilities:	Specialised installation for discharge of bulk Iron Ore – Loading Direct Reduced Iron (DRI). Maximum rate 1,200 t.p.h., connected to conveyor system. Two (2) Level Luffing Cranes – Capacity 25 tons.

STEVEDORES: All stevedoring and longshoring labour ordered through Point Lisas Terminals Limited (PLTL).

CRANES: Mobile and track cranes available up to 180 tonnes SWL. Ordered through Agents.

MEDICAL: Advance notice required. Agent will arrange.

FRESH WATER: Available on all berths and ex-barge.

FUEL: Bunkers available ex-barge.

FIRE PRECAUTIONS: No smoking Savonetta Pier No. 1 or on the open decks of vessels alongside.

GANGWAY/DECK WATCHMEN: 2 Customs guards on duty for 24 hours aboard all vessels.

OPENING/CLOSING HATCHES: Normally done by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount of spirits.

IDENTIFICATION CARDS: It is advisable to carry identification when proceeding on shore leave.

CONSULS: At Port of Spain.

REPAIRS/DRY DOCKS: A repair facility is available at Chaguaramas. However, competent technicians are available for shipboard repairs. Arrangements made through Agents.

SURVEYORS: (1) Cargo Surveyors: Caleb Brett, Saybolt and Redwood available.

(2) Surveyors such as Lloyd's, ABS, Bureau Veritas are available. Arrangements through Agents.

HOLIDAYS: Work is possible all year except on Labour Day (June 19th) and Union Anniversary Day (Last Saturday in November).

POLICE/FIRE/AMBULANCE: Accidents, Police help 62 999. Fire and First Aid 62 998. Fire assistance and ambulances also available on the estate by calling 2211, 2215, 2205/7 and 636-8155.

REPATRIATION: Crew changes and repatriation possible. Agent will arrange.

AIRPORT: Piarco International Airport, 60 km. from Point Lisas. Daily international flights available.

TIME: Local time is GMT minus 4 hours.

TELEPHONES: No facilities for telephone aboard. However international dialling to most countries possible.

SHORE LEAVE: No restrictions except, for persons not holding documents which grant entry to Trinidad and Tobago. Prior approval of Ministry of National Security must be arranged through Agents.

BANKS: National Commercial Bank of Trinidad and Tobago (NCB), Southern Main Road, Couva.

STORING: Vessels can be stored by barge or truck.

No storing of vessels while loading at the Fertrin Terminal.

All storing must be done with Customs approval.

Local riggers and forklifts are available for storing. These may be ordered through local chandlers.

DEVELOPMENTS: Extension of Berth No. 3 to 100 m. max. length.

Construction of Berth No. 5, a Ro/Ro dock. Max. draft 7 m.

AUTHORITY: Point Lisas Industrial Port Development Corporation, P.O.Box 191, Goodrich Bay Road, Point Lisas, Couva. *Tel:* 636–2132/2133/4913. *Telex:* 31341 Phildec WG. *Cables:* Phildeco, Couva. *Contact:* Captain Rawle Baddaloo, Port Manager.

PORT-OF-SPAIN: 10.39 N. 61.32 W. (See Plan)

DOCUMENTS:
Immigration:
2 Crew Lists.
2 Passenger Lists.
1 Maritime Declaraton of Health.
*1 Stowaways List.
*4 Arrival Report Forms.
*Supplied by the Immigration Department on boarding the vessel and must be completed by the Master of the vessel.
Customs:
2 Crew Lists.
1 Passenger List.
2 Customs Ship's Stores Lists.
1 Crew Stores List.
1 copy of Cargo Manifest (if cargo vessel).
2 Lists of unmanifested cargo.
Quarantine:
1 Cargo Manifest.

PILOTAGE: It is not compulsory to apply for a Pilot into Port-of-Spain anchorage. However, if required notification must be sent to the Pilot Station (Port-of-Spain) at least 1 hour before arrival at the Station on VHF Channel 16.

The Pilot vessel has a black hull and white housing and is 35 ft. long. The word 'Pilot' is written on the housing. It is equipped with VHF radio and carries an international pilot boat light.

Vessels requiring a Pilot can call Pilot by International Code Flag "G" by day and white light and red light at night or by International Code Signal "G" on whistle.

The Pilot Boarding Station is located within 0.5 miles seaward of the Grier Channel Entrance. The vessel awaiting a pilot may anchor anywhere seaward of the Pilot Boarding Station.

International Requirements are applicable for pilots with respect to Boarding and Safety measures. Gangway or standard type pilot ladder with spreaders about 10 ft. apart is required. Ladder must be clean. It is desirable that 1 stanchion be securely fitted in the bulwark at the top of the ladder.

Pilot station is situated at the Western end of the Port-of-Spain Wharf.

ANCHORAGE: Depends entirely on draft but should not be nearer than 0.5 miles from Grier Channel Entrance, except in cases of vessels loaded with explosives; this anchorage is clearly defined on Chart.

Open roadstead in Gulf of Paria but can be considered as sheltered with choppy seas at times. Bottom shelves gradually from shoreline to 7 fathoms at Western end of harbour limits, increasing to 20 fathoms outside harbour limits Westward. Type of bottom, mud. Swinging area unlimited. No mooring buoy. Distance from anchorage to shore 2.25 miles at 5 fathoms to 5 miles at 7 fathoms, vessel will swing to the tide if loaded, and to the wind if light.

Currents 0.5 to 1.5 knots flood and ebb. Rise and fall of tides, variable. Minimum 1 ft. 5 in., maximum 4 ft. Rainy season June-December. Dry season December-June. Rain squalls occur during months of July, August and September up to 30-40 knots unpredictable hurricane most unusual. Prevailing winds are mostly Easterly, normally stronger during daylight.

RESTRICTIONS/MAX. SIZE: The Grier Channel, 350 ft. wide, leads to a dredged basin in which are the docks. No restrictions on length, but maximum draft in channel, in basin and alongside is 32 ft. MLWOST.

RADIO: Advise through North Post wireless or telephone, call sign 9YL. ETA 48 hours and 24 hours with other requirements.

TUGS: All vessels of over 1,000 n.r.t. are required to use a tug. Specifications of the 2 tugs are as follows: g.r.t. 2,961.72 tons, n.r.t. 75 tons, speed 12 knots, engines 2×1,200 b.h.p. Ship's lines are normally used.

BERTHING:

Berth No.	*Length (m.)*	*Depth (m.)*	*Use*
1	90	8.0	Break Bulk, Multi-Purpose, Ro/Ro, Cruise Vessels.
2	152	7.4	Break Bulk, Multi-Purpose, Cruise Vessels.
3	152	8.0	
4	152	8.4	
5	152	8.9	
6	152	9.5	Container vessel using ship's gear or shore crane, cruise ships.
6AE	166	9.9	Container vessel using Portainer crane.
6AW	166	10.0	
*7	182	9.5	Rice, Break Bulk, Multi-Purpose.
8	182	9.5	Rice, Break Bulk, Multi-Purpose, Ro/Ro.
8AW	61	4.0	Rice

*At present this berth is under repair.

In addition to the deep water facilities mentioned above there are shallow draft facilities which are located at the Eastern end of the Port. They provide docking facilities for coastal and regional vessels. The Caricom Berth (for regional vessels) is 45 m. long and 4.0 m. deep.

Loading/discharging can be operated by shore equipment supplied by the Port Authority or ship's gear or both.

CRANES:

Type	*No.*	*Capacity tons*
Portainer–Rail Mounted	2	40
Ferranti rubber tyred gantry	5	40
FMC Linkbelt Mobile Crane	1	200
Demag Mobile Crane	1	100
FMC Linkbelt Mobile Crane	2	75
FMC Linkbelt Mobile Crane	3	50
IMC Linkbelt Mobile Crane	4	30

MEDICAL: Advance notice of attention required will assist. Modern hospital facilities available.

CARGO HANDLING: One berth on the Eastern side is an open wharf without a seafront warehouse. This berth is strictly used for containerised and passenger (cruise) vessels. The Eastern Wharf is 3,300 ft. with five seafront warehouses. On the Western side the wharf is 1,200 ft. long with two seafront warehouses for general cargo, but at these two berths there are also facilities for receiving bulk cargo, i.e. grain, liquid oil, fats and molasses. These cargoes are usually discharged by vessel's equipment, but grain can be discharged by shore equipment at a slower rate.

In addition to the cranes mentioned above, other cargo handling equipment available is as follows:
5 top lifters × 28 tons capacity.
7 front loaders × 10 tons capacity.
40 Mercury Reliance Haul Majors.
17 Motor trucks.
117 Trailers × 20 ft.
45 Trailers × 40 ft.
79 Forklifts × 5 tons capacity.

STEVEDORES: Integrated longshore and stevedore gangs available on request by Agents. Gang sizes vary from 12 men to 18 men, dependent on the type of operation.

Hours of Work: Normal Time: 0700 – 2300, Monday to Friday.
Overtime Hours: 2300 – 0100, Monday to Friday (if necessary to complete an operation).
0700 – 1900, Saturday, Sunday and Public Holidays.

FRESH WATER: Fresh water is available at Berths No. 1 – 6 from hydrants alongside the Pier. Alternative arrangements can be made to supply truck-borne water if necessary.

FUEL: All grades supplied by barge, contact Agent in advance.

CONSULS:

Belgium	6238711	Italy	6236255
Bolivia	6254123	Japan	6232866
Colombia	6236601	Lebanon	6231652

Brazil	6225779	Jamaica	6224995
Great Britain	6252861	Netherlands	6251722
Canada	6234787	U.S.A.	6226471
France	6251437	Venezuela	6253872
Germany F.R.	6251898		

REPAIRS: Limited facilities available.

DRY DOCKS: See "Chaguaramas".

SURVEYORS: Lloyd's.

HATCHES: Opening/closing of hatches is normally done by the crew where the system is an automatic one. For manual systems, stevedores are used.

CUSTOMS ALLOWANCE: Crew is allowed either 25 grammes or 2 packs or 40 cigarettes or 5 cigars. No alcoholic drinks allowed.

CARGO GEAR: Vessels normally load and discharge break bulk cargo with their own gear but shore cranes and heavy lift cranes are available on dock.

Container vessels using the Container berths are required to use the Port's Portainer Cranes.

REPATRIATION: Crew changes and repatriation can be arranged through Agents.

AIRPORT: Piarco International Airport (17 miles from Port-of-Spain) has daily flights to worldwide destinations.

TIME: GMT minus 4 hours.

HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Monday; Labour Day (June 19th); Whit Monday; Corpus Christi; Emancipation Day (first Monday in August); Independence Day (August 31st); Diwali Day (late October/early November); Eid-ul-Fitr (December 21st/22nd, approximately); Christmas Day (December 25th); Boxing Day (December 26th). Any work performed on public holidays will be charged at overtime rates.

POLICE/FIRE/AMBULANCE: Port Security – 6251861, Port Health & Safety – 6253777, Police – 999, Fire – 990, Ambulance (Red Cross) - 6278214, Hospital – 6237715/6232951-6.

EMERGENCY CO-ORDINATION CENTRE: National Emergency Relief Organisation (NERO), Coast Guard Headquarters, Staubles Bay, Chaguaramas. Tel. No. 6254939.

BANKS:

Bank of Commerce of Trinidad and Tobago Limited, 72 Independence Square, Port-of-Spain. Tel: 6252711.

Bank of Credit and Commerce International (Trinidad & Tobago Merchant Bankers) Limited, 41-43 St. Vincent Street, Port-of-Spain. Telex No. 22650 BCC PTT WG. Tel: 6233210, 6230005.

The Bank of Nova Scotia, Trinidad and Tobago Limited, Park & Richmond Streets, Port-of-Spain. Tel: 6253566.

The National Commercial Bank of Trinidad and Tobago Ltd., 68 Independence Square, Port-of-Spain. Tel: 6252893.

Republic Bank Limited, 40-42 Frederick Street, Port-of-Spain. Tel: 6231021, (After hours) 6254418.

The Royal Bank of Trinidad and Tobago Limited, 55 Independence Square, Port-of-Spain. Tel: 6253511.

Trinidad Co-operative Bank Limited, 80-84 Charlotte Street, Port-of-Spain. Tel: 6235330.

United Bank of Trinidad and Tobago Limited, 74 Independence Square, Port-of-Spain. Tel: 6251040.

Workers Bank of Trinidad and Tobago, Cnr. Duncan Street and Independence Square, Port-of-Spain. Tel: 6253371.

SHIP SUPPLY SERVICE: For helicopter service, contact Nealco Air Services Limited, 63 Piarco International Airport. Tel: 6645416. Telex: 25314 Nealair.

4 seater helicopters; rendezvous points – oil rigs with helicopter landing facilities on the East Coast of Trinidad.

SHORE LEAVE: Possible with valid identification.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

DELAYS: A berth scheduling system is in operation. Berthing Application must be submitted at least 24 hours in advance.

GENERAL: An inter island ferry service is available. Two Government-owned vessels, the M.F. "Tobago" and newly acquired M.F. "Panorama", operate a regular cargo and passenger service between Trinidad and Tobago. Seating accommodation is 700 passengers per vessel.

DEVELOPMENTS: Berth No. 7, length 198 m. to be upgraded to Container Berth with container handling cranes.

AUTHORITY: Port Authority of Trinidad and Tobago, Ajax Street, Port-of-Spain, Trinidad, W.I. *Tel:* 6254074. *Telex:* 22477 Patt Wg. *Cables:* Gateway. *Contact:* General Manager.

AGENT: Gulf Shipping Ltd., Furness House, First Floor, 90 Independence Square, P.O.Box 8, Port-of-Spain, Trinidad. Tel: 623-4121-5, 623-7712. Telex: 22522 Gulfship Wg. Fax: (809) 623-4124. Cables: Gulfship, Trinidad.

SOBO (Pitch Point): 10.15 N. 61.37 W. ✓

Crude Oil Terminal operated by Trinidad & Tobago Petroleum Company Limited is no longer in operation.

TEMBLADORA (Alcoa Bauxite Terminal): 10.41 N. 61.35 W. ✓

Also refer to "Port of Spain".

DOCUMENTS:

2 Crew Manifest/Stores List for Customs.
2 Ship's Stores List for Customs.
3 Immigration Arrival Report.
8 Crew Lists.
1 Declaration of Health.
1 Stowaway List (even if no stowaways on board).

PILOTAGE: Pilotage is compulsory. Pilots board 0.5 miles off installation.

ANCHORAGE: Safe anchorage 0.5 – 0.75 miles off head of jetty.

MAX. SIZE: No. 1 (Western berth) for discharging, length of berth 976 ft. Max. draft 23 ft.

No. 2 (Eastern berth) for loading. Length of berth 675 ft. Max. draft 36 ft.

RADIO: ETA should be given at least 36 hours before arrival via North Post Radio "9YL" or Barbados Radio "8PO" to Alcoa.

TUGS: Alcoa maintain their own tug to assist in docking operations.

BERTHING: There are two wharves: No. 1 with a length of 976 ft. and No. 2 with a length of 675 ft.

STEVEDORES: Not necessary.

FRESH WATER: Supplied at both piers, also by barge.

FUEL: All grades by barge and pipe-line.

GANGWAY/DECK WATCHMEN: Customs guards on duty at ship's side.

OPENING/CLOSING HATCHES: Handled by crew.

CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount of spirits per man.

CARGO GEAR: Loading: Carried out with travelling tower conveyor system, rate 1,000 t.p.h. Discharging: With travelling tower grab 5 tons capacity, rate 300 t.p.h.

IDENTIFICATION CARDS: Required. Vessel must issue I.D. cards to all onboard.

REPAIRS AND DRY DOCKS: At Chaguaramas.

MEDICAL: All facilities available. Advance notice of requirements should be given.

REPATRIATIONS: Can be arranged (Advance notice must be given for citizens from Eastern Bloc countries).

AIRPORT: See "Port of Spain".

TIME: GMT minus 4 hours.

TELEPHONES: No facilities for telephones on board.

SHORE LEAVE: No restrictions (except for citizens of Eastern Bloc countries who need visas or special permission).

AUTHORITY: Alcoa Steamship Company Inc., Tembladora Transfer Station, Carenage, Trinidad, W.I.

Alcoa Steamship Company Inc., P.O.Box 609, Port-of-Spain, Trinidad, W.I. *Tel:* 63-23308/13. *Telex:* 21221 (Alcoa Wg). *Cables:* Alcoaship, Port of Spain. *Contact:* General Manager.

NOTES

Please also advise Shipping Guides Ltd.

Tristan da Cunha

NOTES

Please also advise Shipping Guides Ltd.

EDINBURGH (Tristan Island): 37.03 S. 12.18 W.

DOCUMENTS: Cargo Manifest.

APPROACHES: Chart B.A. 1769 Pilot Book Africa Vol. 2 to be used, local knowledge should be sought regarding weather.

Island is good radar target and may be seen visually at 20 miles in good weather.

PILOTAGE: Local Radio Officer will indicate safe anchorage by handheld VHF (Channel 16).

ANCHORAGES: Edinburgh anchorage is on N.W. side of Island. Town is difficult to observe as houses are very low. Leading marks are white triangles in field to right of crayfish factory.

Area most likely for large vessels has depth of 18 fathoms. Vessel to be wary of large amounts of kelp blocking intakes, etc.

In rough weather vessel could shelter to South of Island. Although due to katabatic winds off the mountains it is possible that no shelter will be found around the island.

HEALTH: Any person suffering a cold will not be allowed ashore; if colds are prevalent aboard then no one will be permitted ashore.

RADIO: Radio contact made via Cape Town who will arrange schedule.

Tristan (ZOE)	Ship
3737 kHz	3737 kHz
8187 kHz	8281 kHz
12325 kHz	12423 kHz

BERTHING: Calshott boat landing (used for all landings) is small (40 ft. – 50 ft. long). Local knowledge required. 1 motor launch and several whalers available. On average whalers can be launched 60 days a year. February is the month with the best conditions.

SHIPMASTER'S REPORT: February 1986.

The navigational marks are as per the pilot book. These are made of wooden slats. The beacons on the 203° (T) bearing are in a large field behind the new canning factory, just above the boat harbour. The lower of the beacons on the 114° (T) bearing is on the top of a little hillock and the higher is on the cliff side.

When the sun is shining on these beacons they are easily discernable but when the sun is at right angles or behind them they are not easily seen.

There are no lights on the beacons.

There are lights illuminating the entrance to the boat harbour.

All lights are extinguished at 2230 hrs., including the lights at the entrance to the boat harbour.

The soundings that we obtained were as per the chart.

Whilst we were there, with a force 7 on the starboard beam, we lay with the bow to the shore. When the wind moderated we then lay with our bow into the wind so it would appear that strong Westerly winds cause an offshore current in the anchorage area.

Radio Communications at Tristan Island: The Station has a daily schedule with Cape Town Radio at 0830 hrs. GMT.

Cape Town Radio will arrange schedules for ships as required.

The frequencies used are as follows (all SSB R/T):

Tristan da Cunha (ZOE)	Ship
3737 kHz	3737 kHz
8187 kHz	8281 kHz
12325 kHz	12423 kHz

Whilst at anchor VHF communication on Channel 16 is provided by a hand held walkie talkie on the island.

The manifest of the cargo for Tristan da Cunha only. No documentation of any kind is at present required.

SHIPMASTER'S REPORT: March 1988.

The Report above is correct; but to the East of the settlement, there are a further two small triangular leading marks, which when in transit (114° T), indicate the beam bearing for the safest anchorage. The top mark is part way up the cliff to the left of the land-slip, the lower mark is on top of a small outcrop of rock. There are no lights on these beacons.

Tunisia

ASHTART: 34.17 N. 11.23 E. (See Plan)

PORT LIMITS: The Ashtart Field is limited by 4 cardinal buoys.

North	Lat. 34° 20′ 10″ N., Long. 11° 23′ 48″ E.
East	Lat. 34° 17′ 06″ N., Long. 11° 27′ 20″ E.
South	Lat. 34° 14′ 11″ N., Long. 11° 23′ 38″ E.
West	Lat. 34° 17′ 17″ N., Long. 11° 20′ 04″ E.

DOCUMENTS:
Customs: 1 Crew Declaration, 1 Ship's Stores List.
Immigration: 1 Crew List.

PILOTAGE: Compulsory within 3 miles of any installations. To avoid a delay, Owner must report to SEREPT SFAX 24 hours in advance of ETA.

ANCHORAGE: 3 miles South of the storage barge.

HEALTH: Masters must declare on arrival, condition of health of all on board with details of any sickness.

VHF: Call "Ashtart Terminal" on VHF Channels 9 and 16.

TUGS: One tug required to be in attendance while loading.

BERTHING:
(a) *Tanker Berths:*

One SBM for tankers up to a max. size of 150,000 d.w.t. Water depth 66 m. Loading Rate 3,000 cu.m.p.h. Max. quantity available 105,000 tons. 1×12 in. hose.

Vessels mooring use one line, and must be able to easily heave on board an anti-chafing chain whose links are 32 cm. wide.

(b) *Storage Barge Berths:*

Starboard side alongside storage barge, tankers up to a max. size of 70,000 d.w.t. Depth 66 m., loading rate 4,500 cu.m.p.h. Max. quantity available 105,000 tons. 2×12 in. hoses.

(c) *Tanker on Storage Barge Berth:*

Tankers up to a max. size of 100,000 d.w.t. Depth 66 m. Loading rate 3,000 cu.m.p.h. Max. quantity available 105,000 tons. 1×12 in. hose on starboard side.

MEDICAL: No facilities.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: France and Libya at Sfax.

REPAIRS: No facilities.

REPATRIATION: Not possible.

AIRPORT: At Sfax.

TIME: GMT plus 1 hour. GMT plus 2 hours (Summertime) from April 10th to September 15th (1988).

HOLIDAYS: None.

GENERAL: No dirty ballast facilities. No provisions available. Master supplied with booklet containing special port regulations on arrival.

AUTHORITY: Societe De Recherches Et D'exploitation Des Petroles en Tunisie – SEREPT, B.P. 246, 3018-SFAX, Tunisia. *Tel:* (04) 35 400. *Telex:* 40859, 40700. *SFAX Telex:* 13.800 Tn. Tunis Telex: 13.042 Tn. *Contact:* MM. H. Gharsallan or Mr. B. Nahdi.

BIZERTE: 37.17 N. 09.54 E. (See Plan)

PORT LIMITS: Commence 0.5 mile from the Port.

DOCUMENTS:
5 Crew Lists.
5 Passenger Lists.
4 Crew Personal Effects Lists.
4 Ship's Stores List.
3 Copies Bill of Lading.
3 Copies Manifest.
Health Declaration.

PILOTAGE: Vessels approaching the port applying for Pilot by day by flying the flag "G". Advise Pilot of ETA 48 hours before arrival. Pilot vessel and pilot station may be contacted by VHF Channel 16. The Pilot boat exhibits the letters "P" & "H". The Pilot boards half a mile from the Southern fairway, vessels have to slow down to enable the Pilot to board. The anchorage for vessels awaiting the Pilot is half a mile from the Southern fairway.

ANCHORAGE: See "Pilotage".

RESTRICTIONS: Entry at night is forbidden for tankers.

MAX. SIZE: See "Berthing".

HEALTH: Free Pratique normally given at the quays after mooring. Pratique is automatic for vessels coming from another Tunisian port. In case of suspected disease on board vessel will be ordered to quarantine anchorage.

RADIO: Bizerte Radio, call sign 3VWA. Frequencies: 2182, 1743, 1637, 2321 and 2506 kHz. Range 200 km.

VHF: Channels 16 and 14.

TUGS: The tugs join the vessel at half a mile from the fairway. The 2 tugs available are equipped with radar.

BERTHING: There are 10 alongside berths in the 3 docks at Bizerte and 3 alongside berths at Menzel Bourguiba. The water is salt. Length of the main quays: 500 m., depth 9.00 m. Length of the oil handling berth "A": 200 m., depth: 8.50 m. Length of the oil handling berth "B": 150 m., depth: 8.50 m. Molasses handling berth, depth: 7.5 m. Berth in front of the silo: depth 8.50 m. Iron ore handling berth "Douaria": depth 8.50 m. Berth in front of the cement factory: depth 7.6 m. Wooden wharf No. 2 at Menzel Bourguiba: depth 8 m.

Load and discharge is carried out by ship's own gear.

CRANES: 1 travelling gantry crane, capacity 6 tons. 1 travelling gantry crane, capacity 3 tons. 1 crane car, capacity 6 tons. 1 fork lift, capacity 7 tons. 2 fork lifts, capacity 3.5 tons. 1 fork lift, capacity 4 tons. 1 fork lift, capacity 8 tons. 2 tractors with tipping wagons. 1 floating pontoon crane of 30 tons.

BULK HANDLING FACILITIES: Grain is handled on the main quay, if cargo in bulk it is loaded into bags. Fertiliser also handled in bags. Ore and coal is unloaded into lorries.

SPECIAL CARGO HANDLING FACILITIES: None.

BRIDGES: New bridge (mobile) in operation.

STEVEDORES: Minimum of 24 hours' advance notice of ETA to Agent is required.

MEDICAL: Doctor available to board vessel. Hospital, private clinics and all facilities available. 48 hours' notice required for Cholera and Yellow Fever inoculations. Advise Agent of requirements.

TANKERS: Crude oil load/discharge line 20 in. diameter. Fuel oil load/discharge line 14 in. diameter. No slop discharge facilities. Tugs stand-by during cargo operations.

FRESH WATER: Available from the quay at most berths. Rate 20 cu.m./hr.

FUEL: Not available.

FIRE PRECAUTIONS: The Petroleum Harbour is equipped with fire hydrants. A tug of 1,600 h.p. is required to be permanently standing by when tankers are moored alongside the quay.

GANGWAY/DECK WATCHMEN: It is recommended to employ shore watchmen.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: Each crew member is allowed 1 carton of cigarettes and 1 opened bottle of wine or spirits. In case of a prolonged stay in port, Customs may renew these quantities.

IDENTIFICATION CARDS: Crew Members' Identification Cards will be collected by the Immigration service and exchanged for shore passes while vessel is in port.

CONSULS: Italy Tel: 02.31.747.

REPAIRS: Some types of deck and engine repairs can be effected.

DRY DOCKS: There are 4 dry docks which are located at Menzel Bourguiba.

		(m.)
Dry Dock No. 1 & 4	Length	190.90
	Higher width	30.25
	Lower width	26.50
	Draft	8.80
Dry Dock No. 2	Length	247.50
	Higher width	40.60
	Lower width	36.00
	Draft	12.00
Dry Dock No. 3	Length	84.10
	Higher width	14.78
	Lower width	13.00
	Draft	4.15

SURVEYORS: Bureau Veritas.

REPATRIATION: Can be arranged.

AIRPORT: Tunis/Carthage airport is situated 70 km. from Bizerte. Served by international airlines.

TIME: GMT plus 1 hour. GMT plus 2 hours (Summertime) from April 10th to September 15th (1988).

HOLIDAYS: There are 17 days official holiday during the year. Work can be carried out on all holidays except 1st May on payment of 100% overtime.

POLICE/FIRE/AMBULANCE: Police Tel: (02)31.200; Fire (02)31.022; Ambulance (02)31.422.

TELEPHONES: No arrangements exist.

SHORE LEAVE: Allowed.

SHIPMASTER'S REPORT: January 1982.

Documents: It is essential that the various declarations re stores, bond, etc., are accurate as heavy fines and confiscation can result when the officials discover any mistakes or inaccuracies.

Restrictions: Due to the lift bridge at the Eastern end of the Quai de Commerce there is no entry during a period in the morning and another in the evening when the main flow of traffic is expedited. These are about 0700 to 0800 hrs. and 1600 to 1700 hrs. Passage through this bridge is difficult for a deep draft vessel owing to the supporting piers being so close to the main channel.

Health: Free Pratique will be granted on application by radio.

Berthing: The Western end of the Quai de Commerce showed depths of 10.25 m. along the 600 ft. to the East, the discharging berth for grain vessels.

There is some 10 m. in the entrance channel and as far as the turning basin, but LESS in the basin hence the operation is difficult.

Bulk Handling Facilities: For grain there are portable vacuvators which discharge into hoppers from which some 8 bags can be filled at the same time.

Fresh Water: Using ship's hoses, some 23 tonnes per hour may be attained overall, but pressure can drop at any time and care must be taken to make sure of a large quantity or if proceeding to La Goulette elevator where there is no water to be shipped.

Gangway/Nightwatchmen: Most helpful and able to get results when Agents not available.

Identification Cards: These are sighted by the Immigration Officer and crew passes issued which are valid for all Tunisian ports but which must be collected before the vessel sails from the last port.

AUTHORITY: Direction du Port de Bizerte, 6 Rue de Russie, Bizerte, Tunisia. *Tel:* 31.139 and 33.688. *Telex:* 13707 Bimpor. *Cables:* Direction du Port de Bizerte. *Contact:* Harbour Master or M. Ben Menna, Port Director.

GABES (Ghannouche): 33.57 N. 10.04 E. (See Plan)

LOCATION: The port is located in the Gulf of Gabes, 22 miles (approx.) South of the oil port of La Skhirra, 58 miles S.W. of Sfax and 32 miles to the West of Djerba.

APPROACHES: Landfall by day is easy by virtue of the landmarks and oases around the port.

One can distinguish:

To the South of the port: The Oasis of Sidi Abdeslem and a 30 m. high tank.

To the North, the Oasis of Ghennouch and the red and white chimney, 44 m. high, of the power station.

To the West, the mass of buildings and industrial installations with, at the rear, the grey mushroom of the water tower, 36 m. high, and the Oasis of Bouchemma.

Landfall by night is equally easy, the port approaches being indicated, for vessels coming from the:

S.E.: The lighthouse of Ras Turguness (flash white 5 secs., range 24 miles) and then by the lighthouse of the Gabes fishing port (flash white 12 secs., range 11 miles).

N.E.: After coming round the belt of lights of the buoys of the Kerkennah Islands; by the mooring buoy N.W. of the channel of the Port of La Skhirra (flash white 10 secs., range 10 miles) and then by the lighthouse of the fishing port of Gabes.

The Roads:

The roads are indicated by the mooring buoy N.W. of the port channel (isophase white light: on 3 secs. off 3 secs., range 12 miles) and by the lighthouse of the fishing port.

Access Channel:

The port is entered via an access channel 3,220 m. long and 130 m. wide, dredged to 13.5 m.

This channel runs S.W. – N.E. and is joined to the entry passage by a curve 1,200 m. long.

On its 2 banks, there are 4 pairs of fixed light buoys, except Buoy No. 8 located in the curve of the channel.

At the breakwater entrance, there are lights placed on the heads of the North and South breakwaters.

ANCHORAGE: The Roads generally offer anchorage with good holding, and it is advisable to anchor to the South of the channel.

MAX. SIZE: "See Berthing".

TUGS: One tug of 1,200 h.p. and 2 fast pilot launches.

BERTHING:

The Basins:

The water area of the port, covering 80 hectares, is enclosed by 2 breakwaters (North breakwater 2,642 m., South breakwater 1,400 m.) leaving between them a passage 350 m. wide of which 200 m. is dredged to a depth of 13.5 m. This water area is divided into 2 basins:

An outer basin (50 ha.) dredged to 12.5 m., and having a manoeuvring circle 600 m. in diameter.

An inner basin (30 ha.) dredged to 10.5 m.

The Quays:

For berthing of vessels, the port has available:

A quay 375 m. long (Berth Nos. 3 and 4) running approximately E.N.E./W.S.W. and dredged to 10.5 m. This quay can take vessels up to 25,000 tons.

A quay 600 m. long (Berth Nos. 5, 6 and 7) running approximately N.N.W./S.S.E. and dredged to 10.5 m. This quay will take vessels up to 25,000 tons.

A quay 260 m. long (Berth No. 8) perpendicular to the first, and dredged to 12.5 m. This quay will take vessels up to 50,000 tons.

Port access is possible at all times to vessels with 33 ft. (10.06 m.) max. draft for Berths Nos. 5, 6 and 7, and 39 ft. (11.86 m.) max. draft for Berth No. 8.

Open storage areas:

The open areas for the storage of goods transiting through the port include in the public zone – a shed of 4,000 sq.m., open areas which are properly surfaced 70,000 sq.m., open areas of rolled earth: 100,000 sq.m.

CARGO HANDLING EQUIPMENT:

Public:

One gantry crane of 20 tons; Lift trucks from 4 tons – 10 tons; Crane on rails of 20 tons (on order); Crane on rubber tyres of 20 tons.

Private:

Cranes on rubber tyres of 10 tons – 25 tons; Lift trucks from 4 tons – 10 tons; Tractors and trailers.

FRESH WATER: Available.

FUEL: Not available.

REPAIRS: Possible.

TIME: GMT plus 1 hour. GMT plus 2 hours (Summertime) from April 10th to September 15th (1988).

WINDS/TIDES: The winds in the Gulf of Gabes present a seasonal variation with the character of a monsoon.

During the cold season (October – March) winds come from the land, from the West and North.

During the hot season (April – September) the winds come from the sea, from the East to S.E. The strength is then from Force 3 to Force 5, very infrequently reaching Force 7.

Tidal currents are negligible and have no influence on navigation.

The characteristics of the tides are as follows:

High Spring Tide	2.45 m.
High Neap Tide	1.60 m.
Low Spring Tide	1.10 m.
Low Neap Tide	0.15 m.

DEVELOPMENTS: The Port of Gabes has been essentially created to serve the chemical industries in the area which process the natural Tunisian phosphates coming from the S.W. of the country. There is some importation of sulphur for use in the various processes, likewise aluminium for production of aluminium fluoride. As the South of the country develops, traffic in various general cargoes, foodstuffs and capital equipment, is increasing.

The port is currently advanced in its 5th Development Plan. The new infrastructural works comprise:

1. Transformation of the current Quay No. 8 into a much lengthened version.
2. Construction of a service quay.
3. Surfacing and equipping of 50,000 sq.m. of open area for storage of goods.
4. A second tug of 1,200 h.p. will be acquired.
5. Fertiliser bulk loading unit of 500 t.p.h. capacity will be installed.
6. An electric crane, on rails, of 20 tons will be acquired.
7. Cranes on tyres of 15 – 20 tons will be purchased.
8. Fork lifts from 4 – 10 tons will be acquired.

SHIPMASTER'S REPORT: The following reports are from the same vessel. Vessel discharged ammonia at Gabes – Ghannouche.

May 1980:

Approaches: BA. 3327 and 372.

Approaching from the East good positions were obtained off Ile Djerba, keeping outside the 9 fathom soundings as the bottom shoals quite steeply.

The 'Fairway' Buoy "O" showed up well on the radar at 8 miles and the channel buoys themselves at 5 – 6 miles. Details of the breakwater were also visible on the radar at this range.

There is a Radio Beacon at Gabes but this is not marked on either chart. ALRS Vol. 2 refers to this.

Caution: The positions of the outer and channel buoys should not be relied upon. New positions as at 22nd/24th May, have been marked on chart 372 and a tracing made. The current sets quite strongly across the axis of the channel and care is required when rounding the bend in the channel immediately before the entrance. The Pilot reported that channel buoys frequently break adrift.

Pilotage: Reportedly there is a 24 hour watch kept on VHF Channel 16 but we did not succeed in making contact until after we had anchored; time of arrival 0330 hrs. Even then reception was poor.

Fluency of English fair.

Pilot boards from a black hulled launch of about 10.0 m. length with white upperworks. Pilot ladder about 1 m. from the water. Pilot boards outside the fairway buoy.

Vessels with draft in excess of 10.0 m. must berth head in, port side to, owing to existence of 10.5 m. shoal in the Southern corner of the harbour. No night time pilotage for vessels of this size.

Only 1 tug is available and only of moderate power; on berthing she pushes according to hand signals and whistles from Pilot (no VHF). When unberthing she takes a ship's line from the stern to swing ship to port clear of berth.

Berth: The berth is a concrete quay in the Southern corner of the harbour about 250 m. long with depths alongside of 11.3 m. (forward) 13.8 m. and 14.2 m. taken by ship's leadline. Communication with shore personnel was not very good with conflicting advice as to whether vessel was in position or not.

The quay is used for the export of fertiliser products which are loaded by means of a large travelling chute. Despite fears, the gangway when swung out did not foul the gantry.

Well fendered with round rubber fendering.

Mooring arrangements were reasonable but the bow lines have to be taken to the far wall to afford a good lead when in position.

The gangway is landed on the quay without any problems.

The berth is open to swells from the East through S.E and is not very well protected from winds, except from due South. Since the bow is close up to the quay, special care should be paid to backsprings and all moorings. Ensure that watchmen are warned.

Discharge: The shore plant has storage for about 10,000 tonnes and relies on these shipments to keep the fertiliser section in production. Should tanks be empty they will be warm and high back pressures may be expected – 9 bar. The facility uses about 7,500 tonnes per month.

They claim to be able to accept cargo at a maximum rate of 350 t.p.h. but is usually in the region of 200 – 250 t.p.h. Our overall rate this call was 220 t.p.h.

The discharge line consisted of an 8 in. pipe from which there was provision for up to 4×4 in. flexible hoses to be connected. Only 2 hoses were used at this call. The shore flange has 12 holes which do not match the pitch of our manifold and, despite cabling ahead, this was not apparent until berthing and some time was lost. Shore personnel connect and disconnect. Line taken on board using ship's derricks. Shore provided the converting spool piece. Ship blew through lines on completion.

No vapour return line.

No venting to atmosphere.

Surveyor: Redwood's Surveyor in attendance and all figures based on gauging of ship's tanks.

Surveyor used a strange vapour factor which was not familiar in any way and declined to give us copies or explain its origin.

General: Fresh water available. No fuel oil available, if required proceed to oil terminal at Sfax. Repatriation and relieving of personnel possible without difficulties. Good road and rail communication with Tunis, Sousse and Sfax. Good access to Gabes by taxi. Shore passes required – take Discharge Book to Immigration office and a pass will be issued. Collect Discharge Book inward.

Papers: 3 Crew Declarations. 3 Stores Lists, including Bonded Stores. Declarations on the contents of all Bars onboard. (This is most important. Tunisia is largely Moslem).

2 Lists of ports previously visited.

Port Health Form – normal Health Declaration.

The Officials were very fair but very thorough in checking bonded stores. Fresh provisions available.

July 1980:

Discharge: The discharge rate at this call was only in the region of 177 t.p.h. (perhaps due to Ramadan) with a very high back pressure throughout in excess of 9 bar.

Total delays this call amounted to some 28 hours 20 minutes.

General: IMPORTANT: Since our last call the authorities have instituted strict currency control regulations and a number of the crew were caught on arrival during cabin searches. Personnel must therefore be warned before leaving that *ALL* Tunisian currency has to be handed back. The penalty for non-compliance being confiscation of the currency and a fine of at least twice the value of the money discovered. Before arrival personnel should be warned accordingly.

All authorities subjected the ship to a much more thorough scrutiny than at last call.

Repatriating personnel were subjected to baggage searches either on board or ashore.

Fresh stores were taken at this call and were of good quality.

Freon "R22" available in small quantities.

Fresh water taken and treated with "Stabochlor" as a precaution.

November 1980:

Approaches: BA. 3327 and 372.

When rounding Kerkennah Banks the buoys should not be relied upon.

On the flood tide the current from Kerkennah to Fairway Buoy sets in a S.S.W. direction. Fairway Buoy shows up at about 8 miles on radar and Channel Buoys at 5 to 6 miles.

A number of oil rigs are found between Kerkennah Banks and Ile Djerbe, these should not be relied on for navigation fixes. Ile Djerbe gives good positions. Approaching the Fairway Buoy a 'Minaret' marked on BA. 3327 to North of port is conspicuous and Beida Mt. (902) to N.W. of port is conspicuous.

Breakwater is visible on radar at 15 miles but difficult to make out visually until very close too on account of haze. A radio beacon not marked on BA. 3327 is listed and operating as per ALRS Vol. 2.

Fairway Buoy is number "O" and named "Ghannouche" it is a tall red pillar buoy, its permanent position as per the alterations on BA. 372.

Channel buoys have been altered and are best seen from the changes to BA. 372. Pilot reports that all have new moorings and should be considered reasonably reliable. They are lifted about every 4 months, one at a time, so the official numbers as changes to BA. 372 do not always correspond to the actual number.

Anchorage: For large vessels about 1.0 – 1.5 miles East of Fairway Buoy and for small vessels to East of No. 2 Buoy. Good holding ground.

Wind: The prevailing wind is from the East and is strongest during Winter months. Due to the harbour being open to the East a swell carries into the harbour making berthing and working of small vessels impossible at times.

V.H.F.: Call 'Gabes Port' on Channel 16, range limited (12 miles). English reasonable.

Berthing: No berthing if wind over Force 4 to 5 and no unberthing over Force 3 to 4. Largest ship to use port 'Galconda' (LPG) gross 34,893 tonnes and deepest draft ship 'Hampshire' (LPG) gross 32,060 tonnes draft 11.2 m.

Channel: Minimum depth Chart Datum found to be 11.0 m. (36 ft.) plus 0.8 m. MHWN and 2.2 m. MHWS.

Liable to silting. Official depth is 41 ft. (12.5 m.) but last dredged 1974.

Pilot reports little current in channel, but reports suggest cross current can be encountered particularly near breakwaters. Channel dredged in box shape.

Pilot: Two Pilots employed by National Port Authority. Only senior Pilot handles large vessels. Good English spoken.

No berthing/unberthing of large vessels at night. Sunrise to Sunset only. Boards from black hulled 10 m. launch with white upperworks. Pilot ladder about 1 m. above water. Prefers gangway if weather suitable. Boards outside Fairway Buoy.

Tugs: Only one Port Authority tug of 1,200 h.p. with suspect towing hook. In November 1980 this tug was under repair and a Greek Construction Co. tug was being hired for port use as necessary. This tug (800 h.p.) would not work on a Sunday. When berthing, tug pushes; when unberthing, tug takes ship's line from starboard quarter. Pilot reports second tug in design stage.

Berthing/Moorings: All berths port side to.

Fertiliser/Ammonia/Phosphoric Acid Berth – Berth head in.

Sulphur and Grain berths – berth head North.

Vessels on all berths moored close together. Three large and 1 small vessel can moor on Sulphur/Grain berths.

Good back springs essential at all berths.

Moorings: 3, 2, 2. Forward head lines go to quay ahead of Ammonia Berth, mooring boat used. On Ammonia Berth our bow was about 3 m. off stern of vessel immediately ahead and at right angles to us.

Berths: Ammonia Berth of concrete trestle construction with bollards and fenders on concrete projections proud of quay face. All other berths solid concrete construction.

Ammonia Berth about 250 m. in length and 13.2 m. C.D. minimum. Other berths reported to be 10.5 m. alongside.

Density: 1029. (3 visits) May, July and November. Good fendering on all berths.

Cargo: Anhydrous Ammonia: Intake for fertiliser plant about 10,000 tonnes per month.

Loading/Discharge: Discharge rate varies but maximum claimed to be 350 t.p.h., in practice this has been 220, 177 and 233 t.p.h. over three visits with back pressure of 8.5 to 9.5 bars. No vapour return line. 2×4 in. flexible pipes join onto common manifold union with 8 in. coupling of odd size. The plant has a spool piece to fit standard 150 ASA connection on ships. Shore labour assists with connection.

For large LPG/NH_3 carriers it is necessary to berth as far up quay face as it is safe to do so in order to be able to connect pipes. On this vessel the after end of gangway must be past travelling shiploader stowage position on quay. Generally 2 ship pumps are required. Shore tank capacity 9,800 tonnes.

Same berth is used for loading Ammonia Phosphate for export at about 30,000 tonnes per year and Phosphoric acid in liquid form at 60,000 tonnes per year.

Travelling shiploader for Ammonia Phosphate loads at 800 t.p.h.

The Sulphur Berths nearest to Ammonia Berth have 2 discharge cranes/gantry. The Grain Berth at the Northern end is worked by ship's gear. Both these are import berths. Sulphur berth direct into fertiliser plant. It is planned to export Nitric acid in the near future.

Gangway: Can be turned out on all berths prior to berthing even though it seems vessel cannot due to shiploaders.

Communications: At Ammonia Berth after connection there is little English spoken by personnel ashore. Two watchmen always onboard.

N.O.R.: Tender on arrival to SAEP GABES, accepted alongside berth.

Surveyor: SGS/Redwood in attendance. Does not always appear on arrival.

General: Fresh water available from quay, but salty. If fuel required go to Sfax. Personnel reliefs quite easy through Djerba. Direct flights to Frankfurt 3 times per week. Baggage may go missing. Road and rail communication with Tunis, Sousse and Djerba. STD International telephones. Holiday resort at Djerba.

Authorities: Immigration board first to check International Health Declaration and Vaccination List. If all in order 'Q' flag is pulled down – Quarantine Pratique granted and Customs and Agent can board. Port Health/Immigration: require all Cholera Certificates up to date, if not Port Health will carry out inoculation on board the ship.

Customs currency control is rigid – all currencies must be declared and all Tunisian currency drawn and not used handed back on departure. Bars are particularly subject to inspection. Customs also very carefully check Bars stocks, if any discrepancies a fine is levied.

Customs conduct cabin searches for undeclared articles. Master's safe is checked together with dangerous drugs which must be properly declared, every single item and amount of each. Personnel going ashore take their Discharge Books to main gate where a shore pass is issued and Discharge Book collected on return.

Papers required: 3 Copies Personal Effects Declaration (Make sure Jewellery is declared).
3 Copies Personal Currency Lists.
2 Stores Lists.
2 Drugs Lists.
2 Bond Lists.
2 Vaccination Lists.
6 Cargo Declaration Lists.

Chandler: Fresh provisions available and seem good and prices reasonable. Cable ahead for chandler as normally does not work at weekends.

Agent: Societe Tunisiene De Transit D'Agencies Et De Transports. Cable: STTAT GABES.

Have office just outside main gate. Good English and generally helpful and obliging. Crew transfers conducted without difficulty. Can telephone STD from office.

Developments: On North side of Harbour general cargo berths are being constructed. The retaining breakwater has been completed and the berth concrete caissons are being placed in position.

SHIPMASTER'S REPORT: February 1985.
Vessel discharged anhydrous ammonia.

Bow-thruster: It is advisable to inform the Agent well in advance whether vessel is equipped with a bow-thruster or not. When negative, a second tug is required for large vessels, as only 1 tug, small and low powered, is available at Ghannouche. The second tug has to be ordered from Sfax (distance approx. 60 miles). This might cause delay in berthing if Port Control is not aware that the vessel does not have a bow-thruster.

Hoses: The shore connection now consists of a 10 in. 150 ASA hose. Due to the height of our manifold above the water (41 ft.) at 24 ft. draft, extra lengths of hose had to be provided by shore.

Maximum allowable pressure for hoses: 8 bars.

Discharge: Maximum shore receiving capacity approx. 600 tonnes/h. Receivers urgently requested us not to go beyond the 8 bars back pressure.

We discharged approx. 550 tonnes/h. at 7.5 bars back pressure, however, a few hours after commencement of the discharge, the plant requested us to reduce the rate to 400 tonnes/h. as they experienced problems with their compressors.

AUTHORITY: Direction du Port de Gabes, Office des Ports Nationaux, Batiment Administratif, Port de la Goulette, Tunisia. *Tel:* 275300 (6 lines). *Telex:* 12-386 Oporna-Tunis. *Cables:* Ofpornatu. *Contact:* B. Karra, Harbour Manager, P.O.Box 65, Gabes, Tunisia. Tel: (5) 22.9.22.

LA GOULETTE (Including Tunis): 36.49 N. 10.18 E. (See Plan)

DOCUMENTS:

Required by Police:
1 Crew Lists.
2 Passenger Lists.

Required by Customs:
1 Crew List.
2 Passenger Lists.
2 Crew Manifests.

Required by Port Health:
1 Crew List.
1 Passenger List.

PILOTAGE: To call Pilot contact Goulette Radio station, call sign 3VW, 24 hour watch on 2182 kHz or VHF Channel 16. Pilot boats are in permanent direct contact with Goulette Radio. International code visual and sound pilot signals may be used on arrival at the Sea Buoy.

Pilot launches are stationed inside the port, and proceed on call to meet vessels about 0.25 miles beyond the sea buoy, i.e. the Buoy No. 1 in the entrance channel to the port.
ANCHORAGE: Anchorages in the port roads are safe except during strong winds and heavy seas from the North or N.E.; good holding ground.

Larger vessels anchor about 0.5 miles N.E. of the sea buoy in depths of 12 m. – 14 m. Small vessels may anchor either North or South of the approach channel in depths of 7 m. – 9 m. in the vicinity of Buoy Nos. 4 and 5 provided that they do not obstruct navigation in the entrance channel.
RESTRICTIONS: Tankers and ore carriers are not allowed to enter and leave port during the hours of darkness. Depth of water at LW is 32 ft.
MAX. SIZE: *La Goulette:* Up to max. draft 32 ft. Max. length 185 m. *Tunis:* Up to max. draft 20 ft. 6 in.
HEALTH: Master is required to complete Declaration of Health on arrival. Vessels which have previously called at another Tunisian port are given automatic Free Pratique except in time of epidemic.
RADIO: Tunis Radio 24 hour watch on 2182 kHz; radio-telephone from 0600 to 2200 hrs. on 500 kHz. Goulette Radio call sign 3VW. 24 hour watch on 2182 kHz and VHF Channel 16.
TUGS: Available to assist berthing as directed by the Pilot. Tugs join vessels in the vicinity of Buoy Nos. 4 and 6, that is 400 or 500 m. from the berths. Vessel's lines always used. Vessels over 1,500 g.r.t. not equipped with bow-thrusters must use 2 tugs.
BERTHING: *La Goulette:* one ore berth, unloading rate 2,000 t.p.h.
Also see "Shipmaster's Report" and "Developments".
STEVEDORES: Gangs are ordered before 0600 hrs. for morning work; before 1300 hrs. for the afternoon and before 2000 hrs. for night work.
MEDICAL: Preferable to advise Agent in advance if doctor required on board. Crew members should possess international vaccination certificates.
TANKERS: One berth is reserved for tankers with a max. draft of 27 ft. 6 in.
FRESH WATER: Hydrants are situated on the quays supplying fresh water at a rate of 12 – 15 cu.m.p.h. A water barge "El Ain" of 50 tons capacity can supply vessels berthing in "Basin Sud".
FIRE PRECAUTIONS: A watchman has to be permanently employed on board tankers when alongside. A tug equipped with fire-fighting equipment is required to stand by tankers discharging.
GANGWAY/DECK WATCHMEN: The employment of gangway watchmen is necessary.
OPENING/CLOSING HATCHES: Performed by ship's crew or by stevedores on payment of special premium.
CUSTOMS ALLOWANCES: Each crewman is allowed 2 packets of cigarettes or 4 cigars or 50 gm. of tobacco and 1 opened bottle of alcohol.
CONSULS: Following countries are represented in Tunisia:

Algeria
Australia
Denmark
France
Great Britain
Greece
Italy
Morocco
Norway
Panama
U.S.A.
Venezuela

REPAIRS: Machinery and boiler repairs can be effected on board. For large repairs it is necessary to send part to the shipyards of Soconema at Menzel Bourguiba 70 miles away.
DRY DOCKS: At Menzel Bourguiba 4 dry docks, the largest of which is 253 m. long, 41 m. wide, 10.5 m. depth.
REPATRIATION: Can be arranged.
AIRPORT: Situated 10 km. from the port. Regular daily flights to Europe and North Africa.
TIME: GMT plus 1 hour. GMT plus 2 hours (Summertime) from April 10th to September 15th (1988).
HOLIDAYS: 20th March (Independence Day); 1st May (Labour Day); 25th July (Republic Day); 15th October (Evacuation Day). In addition there are 13 other holidays on which work is carried out on payment of overtime.
POLICE/FIRE/AMBULANCE: Police, Tel: 197. Fire, Tel: 198. Ambulance (express), Tel: 141313. Ambulance (S.O.S.) 341269.
TELEPHONES: Telephones can be connected on board vessels and are compulsory for tankers.
SHORE LEAVE: Crew members are permitted to go ashore after obtaining a pass from the Port Police.
DEVELOPMENTS: *Port de Rades:* A new commercial port with 7 berths and industrial complex, incorporating container and Ro/Ro facilities (4 Ro/Ro berths in operation), grain silo (discharge rate 1,200 t.p.d.) quays, jetties, transit sheds and back-up services, has been built on reclaimed land, covering approximately 100 ha., immediately inside the Lake of Tunis. Max. draft permissible 9.5 m.

SHIPMASTER'S REPORT: January 1982.
Documents: It is essential to ensure that all arms and ammunition are declared at first port of entry in Tunisia and that the proper authority has them sealed inside the bond during the entire stay in Tunisia.

When coming from another Tunisian port all cash (Dinars) remaining from sums drawn in the previous port must be declared.
Pilotage: The VHF is the only viable communication for the pilot service, the Sea Buoy being too far for either visual or sound signals.

When required to enter, the vessel will be told to proceed inwards down the approach channel which has been dredged to 12.25 m. from Sea Buoy to the moles. This was completed on 20th December, 1981 as the first part of the work for the new port being constructed on the Southern side of the canal to Tunis and some 3 kilometres inside the present port of La Goulette.
Berths: The elevator/silo berth in Basin Sud has a depth of water of over 10 m. throughout its whole length and extending some 80 m. to the seaward end as the actual wharf is short (about 135 m.) and vessels have to warp along the face to ensure all hatches are serviced. Discharge rate 1,200 tons per day.

There is *no water* at this berth either drinking or boiler nor can it be taken at the adjacent tanker berth or the iron ore pier.
Developments: The port appears to be concentrating on the Ro/Ro berths and the new passenger terminal to the exclusion of the more mundane cargoes. The traffic is such that there is reluctance to allow a vessel from the silo that is short of water to take up a berth on the Northern quay. The harbour area is to be dredged in stages so as to give access, eventually, to the new port under active construction.
Telephones: There are no telephones available at the silo berth unless access can be had to the one in the office, while the Oil Berth unit is only available if there is a tanker in the berth.

AUTHORITY: Office des Ports Nationaux, Batiment Adminstratif, Port de la Goulette, C.P. 2060, La Goulette, Tunisia. *Tel:* 730300. *Telex:* 15386 Oporna. *Cables:* Of. Pornatu.

LA SKHIRRA (Terminal Platform): 34.18 N. 10.09 E. (See Plan)

DOCUMENTS:
5 Crew Lists.
2 Lists of Crew Personal Effects.
2 Stores Lists.
5 Passenger Lists, if passengers carried.
Manifest of cargo on board.
Manifest of cargo in transit.
PILOTAGE: Compulsory for berthing alongside. Pilot employed by TRAPSA. ETA required 48 hours and 24 hours before arrival. Call Pilot by international code signals on arrival, or by VHF Channel 16. TRAPSA will advise if vessel required to anchor, or berth immediately. Pilot boards 2 miles off the terminal by black and white motor launch. If it is necessary (vessel without chart) Pilot will proceed outside the port limits.
ANCHORAGE: Vessels should anchor outside the prohibited zone which is limited to the South by the parallel of Buoy No. 5 and to the East by bearing 350° from the terminal platform light.
MAX. SIZE: Length 300 m. Draft 47 ft. 6 in. or up to 50 ft. at high water.
HEALTH: International Quarantine signals to be shown on arrival. Vessels normally receive Free Pratique at the quay after berthing. Suspect vessels must wait at anchor until Pratique is given.
RADIO: TRAPSA operate coastal station La Skhirra Radio (3VP), vessels to make contact 48 hours before arrival. Messages for TRAPSA passed by other stations should be addressed "Rapetrol Laskhirra".
VHF: The harbour office and loading terminal are equipped with VHF on the following channels: 156.8 MHz (calling), 156.6 MHz, 156.7 MHz, 156.55 MHz Contact with tugs can be made on all 4 channels.
TUGS: Two tugs 1,500 h.p. each, normally used for berthing. 3 tugs required if over 70,000 d.w.t. Lines provided by tugs.
BERTHING: Two loading berths situated one each side of terminal platform connected by a gangway from the shore. For safe manoeuvring tankers are recommended to arrive with ballast up to 30% of Summer deadweight. Mooring may need to be doubled during months of December to April, when sudden violent squalls sometimes occur. A vessel alongside requiring tug assistance may sound one long blast at frequent short intervals.

Depth alongside loading berths is 15 m. – 16 m. Loading platform is served by 3×30 in. oil pipe-lines and 1×24 in. and 1×18 in. ballast lines. Each berth equipped with 4×12 in. flexible hoses. Max. loading rate 12,000 cu.m./hr.
Paktank: A new tank installation of Paktank Mediterranee S.A. has been constructed for storing fuel oil, gas oil, naphtha and kerosene. 2×12 in. flexible hoses will give a loading/discharging rate of up to about 3,000 t.p.h. Bunker facilities can be expected in the near future.
MEDICAL: Advance notice required of any medical assistance needed. Hospital facilities available. Crew members require valid vaccination certificates.
BALLAST: All ballast, except permanent, to be pumped to shore installation. Heavy fines for water pollution. Max. rate 6,000 cu.m./hr.
FRESH WATER: Not available.
FUEL: Not available. See "Berthing – Paktank".
CUSTOMS ALLOWANCES: 2 packets cigarettes allowed each Crew member.
CONSULS: Following countries are represented at Sfax: France, Sweden, Great Britain, Netherlands and Italy.
REPAIRS: There are no facilities for repairs. Nearest at Sfax.
REPATRIATION: Can be arranged.
AIRPORT: Airport at Tunis 350 km. away, or Sfax 80 km. away.
TIME: GMT plus 1 hour. GMT plus 2 hours (Summertime) from April 10th to September 15th (1988).
SHORE LEAVE: Not allowed in Trapsa installation. Can be arranged through Agent.
AUTHORITY: Compagnie des Transports par Pipe-line au Sahara (T.R.A.P.S.A.), 3050 La Skhirra, Tunisia. *Tel:* 04-95453. *Telex:* 40811 TN. *Cables:* Rapetrol, La Skhirra. *Contact:* Mr. Maaloul, Port Director.

SFAX: 34.44 N. 10.46 E.

DOCUMENTS: On arrival Masters must submit a written declaration giving the name of ship and of the Master, Owner or Charterer, vessel's tonnage, draft, cargo, port of origin and destination, number of crew on board. Also required:
Customs Manifest.
Crew List for Police.
List of Dangerous Cargo.
Health Declaration.

PILOTAGE: Compulsory for all vessels over 100 gross tons. Pilotage commences at the outer buoys of the entrance channel. Day signals for Pilot, International Code Signal "P.T" or Code flag "S" hoisted alone or below code pennant. Night signals according to International rules. For entry at night, vessels must radio Harbour Master at the latest 1 hour before sunset to confirm their intention. Before boarding, Pilot will check that vessel does not exceed the max. authorised draft. If the "Entry Prohibited" signal is not hoisted at the port signal mast, vessel may await Pilot in the channel axis about 1 mile off the outer buoys. Pilot boards from a launch 11 m. long, displaying international pilot signals. Pilot may be contacted by radio through Radio Port de Sfax. Agent must give advance notice of vessels arrival to Harbour Master 24 hours 48 hours beforehand.
ANCHORAGE: In immediate vicinity of the port, depths up to 15 m., good holding ground.
MAX. SIZE: Length 185 m. and draft 32 ft. – 33 ft. at Petrol Pier and Sulphur Pier and 200 m. at all other berths.
HEALTH: To request Free Pratique, hoist "Q" flag on arrival, or radio to Port Health Service. Pratique normally given at the berth after mooring. Suspect vessels are required to wait at anchor until Pratique is given.
RADIO: Sfax. Port Call – call sign 3VW2, operating 24 hours on 2182 kHz and Channel 16 VHF.

Calling frequency 2182 kHz, working frequency 1743 kHz CR3. Used only for communications with port services. Meteorological information provided on request.
TUGS: Join vessel at outer buoys or according to circumstances in the outer port.
BERTHING: N.E. Quay 820 m. long, phosphate berth.

West Quay 150 m. long, phosphate berth.
Petrol Pier 105 m. long. Max. size: length 185 m., draft 33 ft.
Salicole Pier, salt loading berth.
Sulphur Quay 370 m. long, draft 32 ft.
Also see "Developments".

STEVEDORES: Available, arranged by Agent basis vessel's ETA.
MEDICAL: Advance notice preferred if medical attention required. Hospital facilities available. Vaccination certificates required for all crew.
DENSITY: 1028.
FRESH WATER: Hydrants fitted on all quays. Written request for replenishing water is required by Harbour Master.
FUEL: Available by barge.
GANGWAY/DECK WATCHMEN: Normally ship's crew. Available from shore if required.
OPENING/CLOSING HATCHES: Normally performed by crew.
IDENTIFICATION CARDS: Required by all crew.
CONSULS: Local representatives for Belgium, Denmark, France, Greece, Italy, Netherlands, Norway, Portugal, Spain, Sweden and U.K.
REPAIRS: Small engine repairs can be effected. Floating dock for vessels less than 350 tons.
REPATRIATION: Can be arranged.
AIRPORT: 7 km. from the city. Regular services to Tunis, Paris and La Valette.
TIME: GMT plus 1 hour. GMT plus 2 hours (Summertime) from April 10th to September 15th (1988).
HOLIDAYS: 1st January; Aid El Kebir; Hegirian New Year; 20th and 21st March; 9th April; 1st May; Mouled; 25th July; 13th August; 15th October; Aid Es Seghir; Aid El Kebir.
POLICE: Tel. 21-700.
SHORE LEAVE: Allowed.
DEVELOPMENTS: Entrance channel to be widened to 60 m. Dredging to 12.50 m. of channel and principal quays. These projects are under study.

Since April 1985 the port has been equipped with 3 new berths totalling 517 m. in length, depth 33 ft., max. LOA 200 m., max. draft 33 ft. Included is a Ro/Ro berth with length 135 m., depth 33 ft.

SHIPMASTER'S REPORT: 1976 (Updated 1988).
Documents:

1 General Declaration.
2 Stores Lists.
3 Crew Lists.
1 List of Dangerous Cargo.
1 Health Declaration.

Pilotage: To be contacted on VHF Channel 16 throughout 24 hours. Also Harbour Master may be contacted at the same hours on Channel 16. At other times the same Authorities may be contacted by radio 2182 kHz.

My vessel had a draft of 26 ft. By the VHF the Harbour Master ordered me to enter the channel and continue up to the Outer Basin where a Pilot would embark on the Port side.

It was later confirmed both by the Pilot and Agent to be usual for ships up to 10,000 tons to enter the Outer Basin without Pilot. Also upon our departure, the Pilot disembarked at the Outer Harbour Basin (Authority state that this is rare and only if vessel visits port regularly).

The Agent told me the channel was 34 ft. deep, although no measurements have been taken for 10 years. Lately a ship with draft of 33 ft. has passed through the channel without any difficulties.

An unmarked wreck is situated in position Lat. 34° 37.5′ N., Long. 10° 49.5′ E. The best way to approach the outer channel from S.W. or South, would therefore be to navigate to a position 6.5 miles S.E. of Tina's Lt. Tr., then change course for the outer buoys of channel.

The only beacons illuminated around Kerkenah Banks were Beacon No. "1" and No. "8". All other buoys were in correct position, but sometimes extinguished.

Stevedores: Work in shifts from 0700 hrs. till 1300 hrs. and from 1400 hrs. till 2000 hrs. In case of sailing it is possible to arrange overtime up to 2100 hrs. It is also possible to have night gangs from 2100 hrs. till 0300 hrs.

AUTHORITY: Office des Ports Nationaux Tunisiens, Directions du Port de Sfax, Rue Okbaa Ibn Nafaa, 3029 Sfax, Tunisia. *Tel:* (04) 25.644, 25.040 and 25.070. *Telex:* 40847 Porsfa. *Contact:* Mohamed El Mouldi, Port Director. Captain Mokhtar Hedider, Port Captain.

SOUSSE (Soussa): 35.50 N. 10.38 E.

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
4 Crew Personal Effects Lists.
Health Declaration.
Manifest of Provisions on Board.
2 copies Vessel's Particulars Declaration.

PILOTAGE: Contact pilot station on VHF Channel 16 or Tel. 03.24.401 and 03.25.755.
RESTRICTIONS: Entrance to the port coming from the sea is East to West. Channel 820 m. long, dredged to 10.5 m. Depth in port area 8.70 m., height of tide 0.50 m.
MAX. SIZE: Max. LOA. 170 m.
HEALTH: Free Pratique normally given at the quays after mooring. Pratique is automatic for vessels coming from another Tunisian port. In case of suspected disease on board vessel will be ordered to quarantine anchorage.
RADIO: Sousse Control "3VW4" on 2182 kHz and VHF Channel 16.
TUGS: One tug of 900 h.p.
BERTHING: One basin for ocean-going ships, yacht basin and fishing vessel harbour.

Length of quays 830 m., 8 berths.
South Basin Quay, length 140 m., dredged to 8.7 m.

CRANES: 1×18 tons and 2×10 tons.
STEVEDORES: Minimum of 24 hours' advance notice of ETA to Agent is required.
MEDICAL: Doctor available to board vessel. Hospital, private clinics and all facilities available.
REPAIRS: No facilities.
GANGWAY/DECK WATCHMEN: It is recommended to employ shore watchmen.
OPENING/CLOSING HATCHES: Carried out by stevedores at the request of Masters.
CUSTOMS ALLOWANCES: Each crew member is allowed 1 carton of cigarettes and 1 opened bottle of wine or spirits. In case of a prolonged stay in port, Customs may renew these quantities.
IDENTIFICATION CARDS: Crew member's Identification Cards will be collected by the Immigration service and exchanged for shore passes while vessel is in port.
TIME: GMT plus 1 hour. GMT plus 2 hours (Summertime) from April 10th to September 15th 1988.
HOLIDAYS: There are 13 days official holiday during the year. Work can be carried out on all holidays except 1st May on payment of 100% overtime.
AIRPORT: Skanes Monastir – 13 km. from the port.
AUTHORITY: Office des Ports Nationaux Tunisiens, Rue Abdallah Ibn Zoubair, Sousse, Tunisia. *Tel:* 03.25.755 or 03.24.401. *Telex:* 30960. *Contact:* Zine El Abidine Khalki, Port Director. B. Kalia Mohamed, Harbour Master.

TAZERKA: 36.36 N. 11.41 E. (See Plan)

PORT LIMITS: 5 nautical miles radius from Tazerka FPSU.
DOCUMENTS:

4 Crew Lists.
1 Health Declaration.

PILOTAGE: A Berthing Master will board the visiting tanker at a location 2 nautical miles downwind of the Tazerka FPSU. He will remain on board the visiting tanker until after departure and will disembark when the visiting tanker is clear of Tazerka FPSU.

The Berthing Pilot/Loading Master will be familiar with pilot/berthing/unberthing vessels at Tazerka and will advise the Master of the visiting tanker accordingly. Throughout the operation, he will be the liaison between the Master of the visiting tanker and the Tazerka SIS (Senior Installation Supervisor). He will advise the Master of the visiting tanker on documentation procedures and carry out any assistance.
ANCHORAGES: None.
APPROACHES: There are clear navigation approaches to and from the Tazerka FPSU. From time to time, special work barges and rigs will operate in the vicinity of the Tazerka FPSU. Information on such rigs will be broadcast through Normal Navigation Warnings and also by Tazerka Operations when visiting tankers first make communications contact.
RESTRICTIONS: Daylight mooring only.

Weather operating limits will be decided at the time of operations, but are approximately as follows:

(a) Maximum mean hourly wind speed = 20 knots.
(b) Maximum significant wave height = 2.5 m.
(c) Minimum visibility for berthing = 0.5 nautical miles.

MAX. SIZE: Minimum LOA 170 m. Maximum LOA 275 m. Under special circumstances LOA may be extended to 297 m.

No limit on beam and draft.

Minimum deadweight 20,000 tonnes (approx.). Maximum deadweight 140,000 tonnes (approx.).

Maximum displacement during berthing 150,000 tonnes.
RADIO: Vessels to send an initial ETA message to Agent via Tunis Radio on departure from the previous port and updated 72 hours, 48 hours and 24 hours prior to arrival at Tazerka. Thereafter changes greater than 3 hours should be reported. Where a ship departs from a port which is less than 72/48/24 hours' steaming distance away she shall advise her ETA as soon as possible.

ETA messages should include the following information:

(a) Location of cargo manifold in relation to the length overall of ship.
(b) Type of moorings (synthetic rope, wire, wire with synthetic tails, etc.)

VHF: Tazerka Floating Production Storage Unit is equipped with VHF Channels 16/6. Notice of Readiness may be issued when vessels are within 5 nautical miles radius of the Tazerka FPSU.

TUGS: One supply boat available to assist with mooring/unmooring.

BERTHING:

Tanker's Draft: The tanker must be on a suitable draft and trim for the approach run. No hard and fast rules will be applied but Masters of visiting tankers must bear in mind the need for accurate steering with a minimum of speed coupled with good stern power ability.

As a guideline a suitable draft is provided by applying the following criteria:

(i) Moulded draft amidships (dm) in metres to be not less than:
$dm = 2.0 + 0.02L$

(ii) Trim by the stern not greater than $0.015L$;

(iii) In any case draft at the after perpendicular not less than that which is necessary to obtain full immersion of the propeller(s).

This is in accordance with the requirements of the "International Conference on Marine Pollution, 1973" Regulation 13. In practice it has been found that ballast required to achieve these criteria typically approximates to 25% of Summer Deadweight.

Vessels berth port side to the starboard side of a Floating Production Storage Unit (a converted VLCC) which is moored to a SPM consisting of a yoke and rigid single anchor leg system. The FPSU is free to rotate through 360°. Vessels will berth against up to 5 inflatable Low Pressure Floating Fenders.

Wire moorings must have synthetic rope tails with a breaking strain at least 5% greater than the minimum breaking load of the wires to which they are attached.

Two long rope messengers to be ready forward and aft. Both anchors home and secured. (If reducers and/or tails are not available on board, advise Tazerka FPSU with initial ETA. Prepare to lift this equipment on board from the pilot boat).

Immobilisation of engines not permitted under any circumstances.

HOSE CONNECTION: Port side midships – 2×12 in. 150 ASA hoses. Port side derricks should be rigged for minimum 5 tonnes SWL.

Cargo manifolds must comply with OCIMF Standards for Tanker Manifolds, 1981 Edition.

LOADING/DISCHARGING: Typical VLCC pipe-line system with special manifold located 225 m. from stem on the starboard side.

2×12 in. hoses for Crude Oil discharge. Maximum loading rate – 7,000 cu.m.p.h.

1×8 in. hose for Fuel Oil receiving. Maximum receiving rate – 1,000 tonnes/h.

1×3 in. hose for Diesel Oil receiving. Maximum receiving rate – 50 tonnes/h.

Concurrent receipt of fuel oil and diesel oil with crude oil discharge is required.

BALLAST: No dirty ballast facilities. It is a condition of loading that vessel's ballast is clean and suitable for discharge to sea as defined in MARPOL 1973, Regulation 13. All other ballast shall be retained on board.

MEDICAL: Emergency cases can be treated.

DENSITY: 1025.

FRESH WATER: Not available.

REPAIRS: Not available.

TIME: GMT plus 1 hour. GMT plus 2 hours (Summertime) from April 10th to September 15th (1988).

REPATRIATION: Not possible.

REGULATIONS: Access to FPSU not permitted.

The Authorities of all Arabic Ports subscribe to the Israeli boycott and administer checks on ships. Apart from the usual checks on Log Books, etc., store rooms, can be inspected for evidence of Israeli produce. If found, ships can be fined and/or blacklisted from all countries subscribing to the boycott.

It is recommended that stores be checked to ensure that there are no items which can be interpreted as being of Israeli origin. This includes items which bear trade marks incorporating Hebraic symbols such as the six point star, irrespective of the country of origin.

AUTHORITY: Shell Tunirex, B.P. 349, Tunis, Tunisia. *Tel:* 341.509, 341.510, 341.514, 247.411. *Telex:* TREX 13831 TN, TREX 14393 TN.

NOTES

Please also advise Shipping Guides Ltd.

Turkey

GENERAL: (See Plan)

On arrival off Canakkale coming from the Aegean, or off Buyukdere coming from the Black Sea, ships must stop for sanitary inspection. However, tankers with a d.w.t. over 100,000 tons proceeding to the Gulf of Izmit to discharge or load petroleum products may obtain Pratique there without stopping at Canakkale, provided Agents are notified 96 hours in advance.

In the event of bad weather at Canakkale, vessels may be allowed to continue their voyage to Istanbul and undergo the sanitary inspection there. Permission to do so is notified to vessels by the Canakkale Sanitary Office with the signal "H.M." in daytime and three vertical lights (green, white, green) at night.

Pilotage through the Dardanelles and the Bosphorus is compulsory. Pilot stations, equipped with VHF operating on Channel 16, are located at Canakkale, Istanbul and Telli Tabia (Upper Bosphorus).

Turkish Flag: All foreign ships are required to fly Turkish flag during their stay in Turkish ports or when passing through the Straits (Dardanelles and Bosphorus).

Sanitary and Port Inspections: On arrival at a Turkish port, every ship is boarded by a Sanitary Officer for examination. Nobody may join or leave the ship before this inspection is completed.

The ship must produce the following documents:

Sanitary Declaration Form.
Derat Certificate.
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Cargo Ship Safety Construction Certificate.

Police Customs Controls: After obtaining Free Sanitary Pratique, the ship must likewise produce:

(1) 3 Crew Lists together with every member's Passport, Discharge Book or Z-card.
(2) 1 List of Provisions, Stores and Bunkers.
(3) 1 Declaration of all Monies or cheques carried in the ship's safe.
(4) Manifests of all cargo on board, whether for discharge at Turkish or foreign ports.
(5) 1 List of Passengers Landing in Istanbul showing nationality, number, date and source of entrance visa (if such visa is required) together with the Passports.
(6) 1 List of Transit Passengers together with the Passports.

Documents covered by items 1, 2, 3, 4 and 6 as well as a List of Passengers Embarking at Istanbul are also required on departure.

Police and Customs Controls are effected at Istanbul when arriving from the Aegean and at Buyukdere when arriving from the Black Sea. However, vessels under 500 n.r.t. have to undergo control formalities at Canakkale, both inwards and outwards, apart from those to be effected at Istanbul. It is recommended to prepare the accommodation ladder to facilitate the boarding of officials.

Excepting the case of tourist vessels, the Customs Officers will seal stocks of provisions and tobacco, spirits, as well as any other items in bond. Sufficient quantities of the foregoing will be left unsealed for the needs of the ship during the stay in port.

If stores left unsealed are exhausted while a ship is in port, a request to the Customs Officers will ensure further withdrawal.

The seals must not be broken before the ship's exit from territorial waters or if sailing from one Turkish port to another Turkish port.

Special Rules for the Passage of the Bosphorus: During their passage through the Bosphorus, ships must regulate their speed, without exceeding the 10 knot limit over the bottom, so that piers, landing stages, etc., or other craft (sailing and rowing boats, etc.) may not be damaged by their wash. Further, they must take care not to hinder fishing and diving operations or to damage submarine telephone, telegraph or electric cables.

Sound Signals, Wireless Sets: It is forbidden to make use of sirens or steam whistles in the harbour, except for manoeuvring purposes as laid down in the regulations for the avoidance of collisions.

Radio transmitters are not sealed on arrival of a vessel but it is recommended that their use in Turkish territorial waters be restricted to cases of emergency.

Refuse: No refuse such as garbage, ashes, polluted oil and the like can be thrown or pumped overboard, nor any scraping, cleaning of tanks and/or bilges can be effected inside port limits.

RESTRICTIONS:

The Bosphorus – Height of Power Transmission Line: A transmission line with a vertical clearance of 70 m. (B.A. Chart 3930, 229 ft.) has been installed alongside the power transmission line in position 41° 10.4′ N., 29° 04.7′ E. (approx.)

Masters of vessels with a similar masthead height intending to pass beneath this cable must contact the Harbour Authority for permission to pass.

NOTICE:

New Traffic Regulations in Conformity with International Regulations for Preventing Collisions at Sea (IMO Colreg of 1972) are being established in the Strait of Istanbul.

A. It is decided that a new traffic regulation conforming to the international rules of navigation be established in the Strait of Istanbul. The new regulation which will be effective in the Strait of Istanbul as of 1st May 1982, 0900 hrs. GMT (1200 hrs. LMT) is as follows:

1. The existing left side navigation regulation in the Strait of Istanbul which is applicable between Kizkulesi-Ortakoy line in the South and Tarabyaburnu-Umuryeri feneri line in the North will be abolished on 1st May 1982, at 0900 hrs. GMT (1200 hrs. LMT) and then the new regulation in conformity with Rule 9 of International Regulations Preventing Collision at Sea of 1972 will come into force.

2. Ships in their transit from the Sea of Marmara to the Black Sea or from the Black Sea to the Sea of Marmara will, in accordance with Rule 9 of IMO Colreg 72, navigate throughout the Strait of Istanbul on the right side of the median line (traffic separation line) and under no circumstances will they pass to the left of the said line.

3. Ships during their transit in the Strait of Istanbul will not overtake other vessels unless they are forced to do so and will navigate inside the designated traffic lane.

B. Pilotage Services:

The pilotage stations are providing pilotage services on 24 hour basis for ships navigating in the Strait of Istanbul. The location of these stations are given in the international pilotage books and marked in the Strait of Istanbul chart (TR.2921).

C. Amendments to Charts:

"Caution I" on Chart TR.2921 will be cancelled with the coming into effect of the new traffic regulation.

D. Navigational Notices:

Explanatory information and navigational warnings regarding the new traffic regulation in the Strait of Istanbul are broadcast in English and Turkish by the following by Weekly Notices to Mariners and also will be mailed.

Istanbul	(TAH)	(Yesilkoy)	: 441 – 2670 kHz
Izmir	(TAN)		: 458 – 516 – 1850 kHz
Mersin	(TAM)		: 524 – 2820 kHz
Samsun	(TAF)		: 416 – 2760 kHz
Bandirma	(TAA4)	(Meteoroloji)	: 478 – 3636 – 6965 kHz

NOTICE: British Admiralty Notice No. 3590/1986.
Mediterranean Sea - Turkey - Istanbul Bogazi (The Bosphorus - Bridge under construction.
(1) Pecked lines are to be inserted joining the following positions:-
(a) 41° 05.533′ N., 29° 03.315′ E. and 41° 05.569′ N., 29° 04.102′ E.
(b) 41° 05.504′ N., 29° 03.318′ E. and 41° 05.540′ N., 29° 04.105′ E.
(2) The legend, Bridge under construction (1986), is to be inserted close N. of (1) above.
Chart (Last correction). – 1198 (1792/86).

2nd bridge under construction in 1988.

SHIPMASTER'S REPORT: November 1979.

Dardanelles and Bosphorus:

Vessel bound for Odessa with a full cargo of corn. According to Charterer's orders (Sovfracht Moscow), vessel was to encounter 4 to 5 weeks at anchor at Odessa Roads and for this reason had to take sufficient fresh water at Ahirkapi Roads on the West side of the Bosphorus.

The quantity (and quality) had to be ordered 3 days prior to arrival through Charterer's Agent (Bumeran) in Istanbul. 2 days' notice and 24 hour notice were required.

The vessel also wished to make crew changes at the same time as taking water and this was arranged by Husbandry Agent (Rammoc, Istanbul).

Vessel took a Pilot all through the Dardanelles and Bosphorus and he boarded at Mehmetoik (Mehmetcik) Point.

When passing Canakkale, vessel slowed down and an Officer had to go down into the Sanitary Inspector's motorboat.

In addition to the sanitary boat another motorboat arrived, bringing the sub-Agent of the vessel's Istanbul husbandry Agent. The sub-Agent passed a message for Master with the latest information for Ahirkapi Roads to the ship's Officer after vessel having received Free Pratique from the Sanitary Officer. This sub-Agent is acting for several Istanbul Agents, the address is as following:

Denizciler Shipping Agents, Isfendiyar Anafarta & Co., Carsi Cad. 10, Canakkale. P.O.B. 5, Canakkale. Cables: 'Denizciler'. Tel: 1032-1878 after hours – 1055. Telex: 58128 dzck tr.

The information from the sub-Agent also included the kind and number of forms and lists required at Istanbul.

Immediately upon letting go anchor in Ahirkapi Roads, the motor launch with the Turkish Authorities arrived, some minutes later the Agent's boat arrived with the new crew members and some spare parts.

The Authorities required the following forms and lists:

Certificate of Registry.
Tonnage Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Transit Cargo Manifest.
3 Currency Lists of vessel's safe.
2 Personnel Effects Lists (Not officially required, but taken because at hand).
3 Stores Lists/Provisions.
3 Crew Lists.

There was no report of inspection, etc., given to the vessel by the Authorities and *no* written outgoing clearance was issued. When asking for an outgoing clearance, the Officials stated it was *not* necessary in this case.

No special lists of crew changes were required.

The Pilot left at Ahirkapi Roads because the time for taking fresh water was expected to be 5 to 6 hours (60 m.t.p.h.)

One hour after arrival the waterboat arrived and the vessel took fresh water (drinkable quality) as per order.

Half an hour before finishing pumping, Istanbul Pilots were called on VHF Channel 16. The Pilot arrived on schedule and the vessel continued the voyage to Odessa.

On approaching Ahirkapi Roads from the West, care has to be taken of numerous fishing boats and sand/gravel digging barges.

SHIPMASTER'S REPORT: October 1980 (Updated 1988).
Dardanelles and Bosphorus:
Dardanelles:
Pilotage: Compulsory. Cable: 'Canakkale Pilot Station' 48 hours if possible in advance to be sure of obtaining Pilot. At present Pilots are in short supply due to an increase in traffic.

One Pilot for Dardanelles and Bosphorus.

Boards from grey hulled launch of about 8 knots speed from Sebbulbahir on Northern entrance.

VHF: Call 'Mehmetcik Pilots' on Channels 16 and 71.

Generally starboard side ladder or gangway.

Pilot gives Master form to fill in for Canakkale.

Control: Sanitary Control at Canakkale on Asian side of Strait near narrows about 1 hour after Pilot boarding.

Two launches come out. One Agent, one Immigration.

Require: 2 Crew Lists, sight Ship's Register and Derat Certificate. Officer has to go down to Immigration launch, no one boards.

Immigration Officer gives ship yellow form which is required to be shown next port.

Control only Northbound whether coming from overseas or a Turkish port.

Navigation: Forecastle manned at Canakkale.

In fine weather, Straits present no problems, but in poor weather and visibility it can be more difficult, especially at Canakkale with other ships around where the vessel is nearly stopped. Also the narrows can be dangerous.

Pilots like maximum sea speed which is not possible.

Vessel passed through the narrows on manoeuvring speed.

Current S.W. flowing at 1 knot – 2 knots.

Transit takes about 3 hours, dependent on weather and delay at Canakkale.

Pilot hands over 'Control' at Inceburun, and takes over Southbound at the same place.

Sea of Marmara: Good positions obtainable. Ship carries out navigation, no Pilot. Very busy but most traffic, apart from ferries and small craft, on straight course from Bosphorus through to Dardanelles and vice versa.

Keeping well to starboard is advisable.

Transit about 6 hours.

Bosphorus:
Pilotage: Compulsory.

If coming from the Dardanelles, Pilot takes over at 'Yesilkoy' or joins by launch at position South of Athirkapi Point. From the North (Black Sea) Pilot boards (and disembarks) at Tellitalya Point just below Kavak (about 4 miles South of Rumeli Point, the Western entrance to the Strait).

Wait North of Rumeli Point until Pilot available.

Cable: 'Kavak' Pilot Station minimum of 6 hours' notice. Generally boards starboard side (and disembarks). Pilot gives Master form to fill in for control.

Control: At Buyukdere North and South about 20 minutes from pilot station.

Control requires: 2 Crew Lists, sights Ship's Register and Derat.

Yellow Immigration form given to Master. An Officer has to go down into launch. Two launches. Agent and Sanitary Inspector.

Navigation: No transit in fog. Forecastle manned for anchoring all transit. As per BA 1198.

Extreme vigilance is required on account of ferries, small boats, ships not under pilotage, strong currents, etc.

Transit time about 2 hours.

Signal Station: At Kavak on Asian bank just North of pilot station. Aldis lamp required.

Currents: Generally a 2 – 5 knot Southerly current, this can be pushed down by strong Southerly wind at Southern entrance at Istanbul.

Pilots advise that in these conditions transit for large bulk type ships is very hazardous on account of steering. Caution must be exercised in picking the Pilot up Southbound at Kavak due to Southerly current building up ship's speed.

SHIPMASTER'S REPORT: December 1983.

Earlier this year a pilot station was established at Gelibolu at the Eastern end of the Dardanelles. It is served by a 60 ft. fishing boat, painted white. The pilotage fee for Mehmetcik-Gelibolu and Harem-Kavak is 50% of the fee for Mehmetcik-Kavak.

If taking stores/spares when passing the Bosphorus, Agents should be instructed to arrange for the delivery at the Istanbul end as it is highly undesirable to have the Agent's launch alongside at Kavak before the Pilot boards.

REPORT: June 1985 (Updated 1988).

The following was received by a Master from his Agent in Istanbul.

For vessels proceeding and destined to Istanbul (not transitting vessels), the Gulf of Izmit or any other port inside Marmara Sea, pilotage is compulsory through the Dardanelles from the Southern entrance (Mehmetcik Point/Cape Hellas Lat. 40° 02′ N., Long. 26° 11′ E. to the Northern exit (Gelibolu Lat. 40° 24′ N., Long. 26° 41′ E.).

The same applies for vessels coming from a Marmara Sea port and proceeding Southwards.

From Gelibolu to the entrance of Izmit Gulf (Darica Lat. 40° 45′ N., Long. 29° 21′ E.) or vice versa, pilotage is not compulsory.

From Darica inside Izmit Gulf pilotage is again compulsory.

All pilot stations can be contacted by VHF Channel 16, working Channel 71.

For vessels passing, in-transit pilotage through Dardanelles-Marmara Sea-Bosphorus or vice versa is not compulsory. It is, however, strongly recommended to employ pilotage services through the Bosphorus.

Dardanelles Pilot can be picked-up at Mehmetcik Point (Lat. 40° 02′ N., Long. 26° 11′ E.) and dropped at new pilot station at Gelibolu (Lat. 40° 24′ N. Long. 26° 41′ E.) respectively picked up there and on outward voyage, thus saving the open Marmara Sea stretch. Another Pilot can then be requested at Istanbul (Harem) for Bosphorus.

Please make sure to enter into Pilot bills the exact times of services given. Please bear in mind that if part of a service falls into overtime, the whole service is charged as overtime. Service hours are as follows:

0800 – 1700 straight time.
1700 – 0800 overtime charged at 50% extra.
0800 – 1200 Saturday straight time.
After 1200 Saturday overtime till Monday morning 0800 hrs.

For vessels with inflammable, dangerous cargoes, etc. 30% extra is charged on all pilotage services, therefore whenever tankers are gas free this must be inscribed on Pilot bills. Also when tankers are loaded with harmless cargoes.

Whenever Pilots remain onboard after completing their service, as guest-passengers, Pilotage bill should be signed for the service part only.

SHIPMASTER'S REPORT: June 1987.
Pilotage through Dardanelles: Compulsory for all foreign vessels bound to and from a Turkish port. Northbound vessels take a pilot at Mehmetcik and Southbound vessels take a pilot at Gelibolu.
VHF: Pilots on Channels 16 and 71.
Notice: 48 hours notice of arrival required.

ALANYA: 36.32 N. 32.03 E. (See Plan)

RADIO: Alanya Radio. Call sign TAC4.
BERTHING: Jetty length 277 m., depths alongside 8 m. – 12 m. Can accommodate 4 vessels.
CRANES: No shore cranes available; vessels use their own gear for loading/discharging.
STEVEDORES: Loading/discharging carried out by hired stevedores. Average rate per shift/gang of 150 tons for cotton, bagged and general cargoes.
Working Hours: 0800 hrs – 1630 hrs. Lunch break 1230 hrs.
FRESH WATER: Available.
AIRPORT: At Antalya (150 km.).
CHARGES: Light and sanitary dues.
AUTHORITY: Kerim Saygi, Harbour Master. *Tel:* 1095. *Telex:* 25673. Turkiye Denizcilik Isletmeleri, Genel Mudurlugu, Rihtim Caddesi, 80120 Karakoy, Istanbul, Turkey. *Contact:* Head of Port Operations Department or Assistant General Manager.

ALIAGA: 38.50 N. 26.57 E. (See Plan)

LOCATION: *Northern Point:* Lat. 38° 50′ 10″ N., Long. 26° 56′ 33″ E.
Southern Point: Lat. 38° 50′ N., Long. 26° 57′ 36″ E.
DOCUMENTS: See "Izmir".
PILOTAGE: Pilot boards 2 to 3 miles West of Tasli Burnu Light.
ANCHORAGES: The port itself is situated about 40 miles N.N.W. of Izmir on the Southern arm of the Gulf of Candarli and the anchorage is considered safe for large ships.
RESTRICTIONS: Water depth at entrance about 14 fathoms. Water depth at crude oil wharf 17 m. – 18 m.
MAX. SIZE: Crude Oil Berth designed for up to 100,000 d.w.t. Products Berth designed for up to 22,000 d.w.t.
HEALTH: *Customs:* Customs post at refinery.
Immigration: None locally. Incoming and outgoing personnel have to be processed at Izmir and escorted under guard to and fro.
Health: No office locally. Officials have to be brought from Izmir.
RADIO: Cable address of Aliaga Refinery: "Petrol Izmir".

Four days prior arrival, Agents require notice of ETA (time and date) followed by any subsequent change.

TUGS: 2 × 2,400 h.p. tugs are on order. Meanwhile tug can be obtained, if available, from Port Monopoly Izmir at additional cost. Mooring boat also on order, meanwhile local boat available for hire.
BERTHING: *Aliaga Refinery Terminal:* Incoming tankers discharge at a "T" type oil jetty just South of Tasli Burnu Light. The jetty runs parallel to the coastline and is situated Lat. 38° 49′ 30″ N., Long. 26° 57′ 30″ E. approximately. The outer arm of the jetty, 317 m. long, is designed for crude oil tankers of 75/100,000 d.w.t. on the outer side and for tankers of 25,000 d.w.t. on the inner. The outer S.W. arm is designed for products tankers of up to 22,000 d.w.t. and the inner berth for small tankers of up to 5,000 d.w.t.

The crude oil berth is roughly in the centre of the N.E. arm and has 4 loading arms. The jetty is protected by 4 pivotal concrete buffers.

The products berth is similarly in the centre of the arm and is equipped with flexible hoses. Crude oil pumping rate up to about 3,000 t.p.h.

FRESH WATER: Available.
FUEL: Available.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron and B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi - Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

AIRPORT: Izmir is not an international airport.
DELAYS: Cargo is nearly always transhipped leading to unforeseen delays.
SUPPLIES: From local towns; adequate fresh fruit and vegetables and meat.
AUTHORITY: See "Izmir".
AGENT: See "Izmir".

ANTALYA: 36.50 N. 30.37 E. (See Plan)

PILOTAGE: Compulsory. 1 pilot boat and 1 service boat available.
RADIO: Antalya Radio. Call sign TAL.
TUGS: 3 tugs and 1 mooring boat available.
BERTHING: Outer breakwater is 1,440 m. long, inner breakwater is 650 m. long. Port area is 331,600 sq.m.

Vessels can enter port and anchor at any time with a Pilot aboard. Manoeuvring area has 400 m. diameter, depths 8 m. – 11 m.

8 operating quays, 1 passenger quay and a military quay available.

Quay No.	Length (m.)	Depth (m.)
1	150	10.00
2, 3	165	5.5 – 6.5
4	60	8.00
5, 6	290	8.00
7	170	10.00
8 (Passenger Quay)	170	10.00
9 (Military Quay)	270	5.50
Ro/Ro (New Quay)	35	5.50

Storage:

Open warehouse area is 200,000 sq.m. Closed warehouse area is 3,000 sq.m. Closed warehouse (for combustible cargo) is 400 sq.m.

Cold storage plant (new) is 6,900 sq.m. with capacity of about 10,000 tons.

PORT EQUIPMENT:
1 floating crane (60 tons).
8 cranes (1×25 tons (fixed), 5×5 tons).
6 mobile cranes (3×10 tons, 1×25 tons, 1×5 tons, 1×3 tons).
12 forklifts (10×3 tons, 1×5 tons, 1×10 tons).
5 tractors.
24 trailers (20×1 ton, 4×6 tons).

BULK CARGO FACILITIES: 4 alumina silos each of 4,000 tons capacity which can load into vessel by conveyor belt at a rate of 250 t.p.h.
STEVEDORES: Gangs of 6 – 8 men each, load/discharge cotton at rate of 100 tons per shift, general cargoes 125 tons per shift.
Working Hours: From 0800 to 1630 hrs. Lunch break from 1200 to 1300 hrs. No overtime rate implemented.
AIRPORT: Antalya airport is 22 km. from the port, 12 km. from Antalya city centre.
HOLIDAYS: Work is possible on Turkish holidays, weekends upon request.
DEVELOPMENTS: TMO and SEKA quays (3) are still under construction for passenger vessels, grain and lumber.
AUTHORITY: TDI is in charge of loading/ discharging.

BANDIRMA (including Bagfas): 40.22 N. 27.59 E. (See Plan)

LOCATION: Bandirma is situated on Southern side of Marmara Sea about 63 nautical miles from Istanbul. Admiralty Chart No. 294.
PORT LIMITS: The sea area of the Port of Bandirma is an area inside a line joining Latitude 40° 23′ 42″ N., Longitude 27° 54′ 12″ E. and Latitude 40° 22′ 00″ N., Longitude 27° 59′ 30″ E.
DOCUMENTS:
7 copies Crew List.
4 copies Passenger List.
2 copies Transit Cargo Manifest.
3 copies Inward Cargo Manifest (1 copy must be legalised by Turkish Consulate at loading port. If no Consulate existing same to be certified by Local Customs Officer of the Chamber of Commerce.)

PILOTAGE: Compulsory. Ordered by Agent on basis of Master's ETA. International Code signals used to call Pilot who boards at harbour entrance.
ANCHORAGE: Anchorage is in the open roadstead.

For safe entry and departure from the harbour it is forbidden to anchor between the line 008° from the lighthouse on the North Breakwater and 337° from the lighthouse on the West Breakwater.

MAX. SIZE: At anchorage no limitations. Alongside pier max. length 200 m. and max. draft 34 ft.
HEALTH: Arriving vessels are inspected at the Dardanelles and Istanbul (Bosphourus) No other inspections are required.
RADIO: Istanbul Radio – call sign TAH; Bandirma Radio – call sign TAA4; Tekirdag Radio – call sign TAA3.
TUGS: 3 tugs available, each 1,025 h.p.
CRANES: There are 15 shore cranes.
1 fixed crane with a capacity of 25 tons.
2 portal cranes with hooks with a capacity of 10 tons.
2 portal cranes with a capacity of 10 tons.
6 portal cranes with hooks with a capacity of 5 tons.
4 portal cranes with a capacity of 5 tons.
1 rubber wheeled mobile crane with a capacity of 25 tons.
3 rubber wheeled mobile cranes with a capacity of 10 tons.
2 mobile cranes with a capacity of 25 tons.

BERTHING:

Berth No.	Length (m.)	Depth (m.)	Remarks
1	130	8.25	Ro/Ro vessels can berth.
2 – 3	284	10.00	
4 – 5	324	10.00	
6	130	10.00	
7 – 8	379	11.00/10.00	Fixed crane with capacity 25 tons.
9	204	10.00	
10	100	10.00	
11	190	10.00	
12	182	10.00	Berths of Etibank
13	80	10.00	
14	180	8.25	
15 – 16	270	4.00	
17 – 18	315	4.00	For vessels under 300 n.r.t.

Bagfas: Bagfas Iskur Fertilisers:
Location: Bagfas Iskur Fertilisers Jetty is situated on Southern side of the Marmara Sea about 5 nautical miles from Bandirma. (Admiralty Chart No. 294).
Pilotage: The jetty is private but pilotage/tug boat/mooring boat services are operated by TCDD (Turkish State Railways).
Anchorage: Port of Bagfas is an open port, but good anchorage in roads a few cables off the entrance in depths up to 7 fathoms.
Accommodation: Port of Bandirma/Bagfas fertilisers jetty, length 77 m., depths between 11 m. and 9.30 m.

NOTE: From jetty to each mooring dolphin 61 m.

Port Facilities: One moving crane available on the jetty with 10 tons lifting capacity which loads bulk cargoes into bunker which is connected to conveyor belt with discharging capacity up to 3,000 tons daily.

Receiving capacity of products (liquid Ammonia) is 350/400 tonnes per hour.

Working hours from 0800 to 0200 hrs.

Imports: Mainly Phosphate, Acid, Phosphoric Acid, Sulphur, Ammonia and various fertilisers.
STEVEDORES: 2 consecutive shifts of 7.5 hours each day are worked. If required a 3rd shift is possible.

160 tons of general cargo can be handled in 1st shift and 600 tons of bulk cargo can be loaded in the 1st shift.

Gangs are arranged by vessel's Agent through the Port Monopoly 24 hours prior to arrival.

EQUIPMENT: 3 towing tractors, 2 trucks, 1 forklift × 5 ton capacity, 2 forklifts × 3 ton capacity.
Warehousing: 2 warehouses available at dockside where vessels can berth 20 m. to 30 m. away.

Measurements of warehouses: Length 100 m., width 35 m., height 8.6 m. minimum, 12.3 m. maximum.

Each gang for fertilisers discharging contains 9/10 men. Extra labour can be supplied from either Port Authority or outside which can be arranged by Agent in best possible way.

Exports: Colemanite, Ulexite, Tincal in bulk, Borax/Boric Acid and Byrites in bags, Tomato Paste in cartons.
Imports: Fertilisers and general.
MEDICAL: Every kind of health service is arranged by the Agent.
FRESH WATER: Available at berths.
FUEL: Vessels at anchorage can be supplied with fuel.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron and B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09, 337 36 86, 337 88 31, 336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

OPENING/CLOSING HATCHES: May be opened or closed by ship's crew, or by stevedores at no extra charge.
CUSTOMS ALLOWANCES: 50 cigarettes for each man going ashore. On board the vessel each man may hold 200 cigarettes and a bottle of spirits.
IDENTIFICATION CARDS: Seamen's Book is sufficient.
CONSULS: None.
REPAIRS: Minor repairs are possible at the port workshop.
AIRPORT: Nearest airports are at Istanbul and Izmir.
POLICE/AMBULANCE/FIRE: Police 10870, Ambulance 17331, Public Hospital 12932.
TIME: GMT plus 2 hours.
HOLIDAYS: New Year's Day (January 1st), National Sovereignty Day (April 23rd), Youth and Sports Day (May 19th), Victory Day (August 30th), Proclamation of Republic (October 29th), Religious Holidays (3-4 days).
AUTHORITY: TCDD (Turkish State Railways), Liman Isletme Mudurlugu, Bandirma. *Tel:* 1211.

TCDD Isletmesi Genel, MD, Talatpasa Bulvari, Ankara, Turkey. *Telex:* 42571.

AGENT: See "Istanbul".

BORUSAN: 40.25 N. 29.05 E. (See Plan)

LOCATION: Borusan Jetty is situated near Gemlik in position Lat. 40° 25′ 03″ N., Long. 29° 05′ 21″ E., on East side of Marmara Sea about 52 nautical miles from Istanbul.
DOCUMENTS:
4 copies Crew List.
4 copies Cargo Manifest.
2 copies Stores List.
2 copies Crew Declaration.
2 copies Health Declaration (including the Clearance from Canakkale).
2 copies Ship's Particulars.

PILOTAGE: Not compulsory. If vessel requires a pilot, a private pilot is available.
VHF: Channel 16.
TUGS: 1×1,000 h.p.
BERTHING: The 170 m. jetty offers 2 berths alongside. Depth 4.5 m.-8.5 m. Vessel may be loaded and discharged while moored stern to the open sea.
Facilities: Borusan Gemlik has 11,000 sq.m. of storage area, 1,600 sq.m. is covered and 2,000 sq.m. covered storage will be built next year (1989).
CRANES: One with lifting capacity 55 tons and another with 30 tons capacity operating on the jetty.
STEVEDORES: Private Borusan group. Normally working in 2 shifts from 0830 hrs. to 1700 hrs. and second shift from 1700 hrs. to 2330 hrs.
MEDICAL: Emergency hospital and dental facilities are available at Bursa, approximately 30 km. from the Borusan plant.
FRESH WATER: Available.
GANGWAY/DECK WATCHMAN: Not necessary, ship's gangway used.
OPENING/CLOSING HATCHES: By ship's crew.
TIME: GMT plus 3 hours.
HOLIDAYS: No work on Turkish holidays.
FIRE PRECAUTIONS: Factory fire brigade available.
AIRPORT: Nearest airport at Bursa which has daily flights to Istanbul, flight time 30 minutes.
GENERAL: Borusan Jetty, built in 1984, is located at the entrance of Gemlik Bay and Eastern part of Marmara Sea which is known as Cape Tuzla. Type of pier is reinforced concrete jetty and clear alongside distance is 170 m., width 20 m. Maximum depth at jetty changes from 4.5 m. to 8.5 m. Bottom is sandy and shelving.

Borusan Jetty has been operating since 1984 and about 150/200 Turkish and foreign flag vessels call at pier every year. The deadweight of vessels changes from 1,000 tons up to 10,000 tons and sometimes more than 10,000 tons, depending on arrival draft and cargo quantity on vessel. For example, in 1988 following vessels called at pier and safely berthed and discharged. Vessel with deadweight 38,962 tons, cargo on board 10,000 tonnes and another vessel with deadweight 28,031 and cargo of 13,000 tonnes.

Port loads and discharges about 500,000 tons per year, especially steel products.

CANAKKALE: 40.08 N. 26.24 E.

DOCUMENTS: Vessels in transit through the Dardanelles must stop at Canakkale and produce following documents to boarding Officer.
Certificate of Registry.
Derat Certificate.
Crew List.
Name of Agent in Istanbul.
Vessels proceeding to a Turkish port will require in addition:
4 Crew Lists.
2 Personal Effects Lists.
2 Currency Lists.
2 Stores Lists.
PILOTAGE: Not compulsory for vessels proceeding to Istanbul. Compulsory for vessels over 1,500 g.r.t. proceeding to Canakkale. Vessels requiring a Pilot use International Code signals, or signal "G" by light or whistle. No advance notice required. Telegraphic address of pilot station, Kilavuzluk Canakkale, via radio station TAT. Pilot boards off Khepez lighthouse, where vessel should slow down but no need to anchor. In bad weather pilot boat will anchor in Gulf of Kilya.
Also see "Shipmaster's Report".
ANCHORAGES: Vessels may anchor in depths of 12 to 16 fathoms.
MAX. SIZE: Vessels of any size may navigate Canakkale Strait.
HEALTH: All vessels bound for a Turkish port must stop for Sanitary Clearance at Canakkale. Any suspected disease on board must be declared. Sick crew members may be landed for hospitalisation.
Also see "Shipmaster's Report".
RADIO: Radio station TAT situated at local Post Office.
TUGS: One tug available, belonging to pilot station. Ship's tow lines always used.
BERTHING: Agents require at least 24 hours' notice to arrange berthing at Canakkale Pier. Vessel may be required to shift anchorage to give place to Turkish passenger vessels which have priority.
STEVEDORES: Arranged by Agent on basis of Master's ETA.
MEDICAL: 12 hours' notice required to arrange medical assistance. Hospital facilities available.
DENSITY: Salt water. No tide.
FRESH WATER: Only available from the pier, rate approx. 10 t.p.h.
FUEL: Marine grades not available.
GANGWAY/DECK WATCHMEN: Customs guard compulsory for vessels at the pier.
OPENING/CLOSING HATCHES: May be operated by crew or stevedores according to Charter Party.
CUSTOMS ALLOWANCES: Crew allowed to retain only quantities for personal consumption.
IDENTIFICATION CARDS: Required for crew members going ashore.
CONSULS: Italy, tel. 1008.
REPAIRS: Minor repairs can be effected.
REPATRIATION: Can be arranged if visa requirements are satisfactory.
AIRPORT: Situated 2 km. from Canakkale, internal services only.
TIME: GMT plus 3 hours.
HOLIDAYS: Cargo work can be arranged on all holidays by agreement.
POLICE/FIRE/AMBULANCE: Police Tel. 1181; Fire 00; Ambulance 1098.
SHORE LEAVE: Allowed at all times.
DEVELOPMENTS: New installations and berths under construction.

SHIPMASTER'S REPORT: *Dardanelles and Bosphorus:* A pilot station has been established at Mehmetcik Point (Cape Hellas); if the weather is too bad to embark the Pilot here, vessels should proceed to Canakkale. If a Pilot is required for both Dardanelles and Bosphorus, give 24 hours' notice through Istanbul Agent. Same Pilot remains on board for full transit, Sea of Marmara included, and this applies for both North and Southbound traffic. Pilots at Dardanelles and Bosphorus work VHF Channel 16.
Sanitary Control: White launch. Officers do not board but require Chief or 2nd Officer to go down into boat. Canakkale required Ship's Register, Derat, Crew List and Quarantine Declaration of Health. It is also required to fill in a form giving details of ship, cargo, last port, number of crew and passengers, etc., also name of ship's Agent in Turkey.

AUTHORITY: Canakkale Liman Baskanligi.
AGENT: See "Istanbul".

DERINCE: 40.45 N. 29.50 E. (See Plan)

PORT LIMITS: A vessel that has arrived in Izmit Anchorage is considered an "arrived ship".
DOCUMENTS:
Quarantine:
Declaration of Health.
Valid Derat Certificate.
International Vaccination Certificates.
Free Pratique Received from Canakkale or Buyukdere.
Customs:
Crew Declaration.
Ship's Stores List.
Cargo Manifest.
Customs Clearance from last port.
Immigration:
Crew List.
Passenger List.
Shore leave passes arranged by Agent. Passenger embarkation disembarkation not possible.
PILOTAGE: Compulsory. 24 hours' service available. ETA must be confirmed 24 hours prior to arrival. Pilot boards 5 cables off the port entrance, Pilot on VHF Channel 16. Berth arranged by Agent through the Harbour Master. Berthing or anchoring permission must be received by Agent before arrival at Darica Pilot Station.
ANCHORAGES: Forbidden near the port. Waiting anchorage is at Izmit, 4 miles East of Derince. It is compulsory for vessels with explosives to anchor in Yarimca Anchorage.
VHF: See "Pilotage".
TUGS: Compulsory for vessels over 500 g.r.t.
500 g.r.t. – 5,000 g.r.t. One tug.
5,000 g.r.t. – 25,000 g.r.t. Two tugs.
25,000 g.r.t. – 50,000 g.r.t. Three tugs.
1×970 h.p. and 1×1,500 h.p. tug available. Mooring boat arranged by Pilot.
BERTHING:

Berth No.	*Length (m.)*	*Depth at LW (m.)*	*Remarks*
1	110	4.0	For small coasters
2	82	6.5	Ro-Ro
3	117	8.0

8	None	—	

22 mobile cranes with capacity 3 tonnes – 25 tonnes also available.
BULK HANDLING FACILITIES: Old silo not in service. TMO are planning to have new silos with jetty.

STEVEDORES: Normally working is in 2 shifts. First shift from 0800 hrs. – 1630 hrs. Second shift from 1630 hrs. – 2400 hrs. Labour provided by Port Authority on request from Agent.
FRESH WATER: Available at all berths.
FUEL: Fuel and diesel, also marine lubricants can be obtained by trucks through suppliers.
OPENING/CLOSING HATCHES: Stevedores or ship's crew, whichever is to the vessel's advantage.
CERTIFICATES:
Safety Construction.
Safety Equipment.
Safety Radio.
Load Line.
Tonnage.
CUSTOMS ALLOWANCES: 200 cigarettes and one bottle of spirits per week per crew member.
REPAIRS: Most deck and engine repairs can be carried out.
SURVEYORS: Available from Istanbul through Agent.
REPATRIATION: Crew changes and repatriation can be carried out.
AIRPORT: 130 km. to Istanbul Yesilkoy International Airport.
TIME: GMT plus 3 hours.
POLICE/AMBULANCE/FIRE: Emergency services available in the port.
SERVICES: Arranged by Agent, from Istanbul.
SHORE LEAVE: No restrictions. Also see "Documents".
HOLIDAYS: (1988) 1st January; 23rd April; 17th, 18th, 19th May; 25th, 26th, 27th July; 29th October (loading and discharging possible on this date).
DEVELOPMENTS: Container terminal with 4 gantry cranes and 8 transtainers to be in operation between 1987 and 1991. An additional general cargo berth and 2 gantry cranes will also be available to meet the increase in traffic.
AUTHORITY: TCDD Derince, Limani Isletmesi Mudurlugu (General Directorate of Turkish State Railways-Derince), Derince, Turkey. *Tel:* 131574/134278. *Cables:* TCDD Derince Limani. *Contact:* Fahri Sayali, Port Director.

TCDD – Isletmesi Genel, MD, Talatpasa Bulvari, Ankara, Turkey. *Telex:* 42571.

DILISKELESI: 40.46 N. 29.32 E.

(A) ALEMDAR HOLDINGS
(B) COLAKOGLU METALURGI
(C) SOLVENTAS

A) ALEMDAR HOLDINGS PIER

LOCATION: Lat. 40° 46′ 15″ N., Long. 29° 32′ 15″ E.
PILOTAGE: Pilotage is compulsory in the Gulf of Izmit from Darica to Diliskelesi and vice versa and also for berthing and unberthing.
BERTHING: *Jetty No. 1:* Length 210 m. Depth varies from 5.5 m – 14.0 m. *Jetty No. 2:* Length 200 m. Depth varies from 7.8 m. – 12.0 m. (Jetty No. 2 still under construction).

Jetties are used for loading sinter magnesite and for loading and unloading other dry cargoes and discharging chemicals.

No shore cranes available on the jetties. Magnesite is loaded by conveyor system at a rate of 2,000 tons per day.

The installation works around the clock.
TANKERS: Discharging rate for tankers is 200 t.p.h. – 250 t.p.h. There are storage tanks for tallow and vegetable oil.
FRESH WATER: Not available at the jetty. Fresh water can be supplied by barge from Izmit.
FUEL: Not available.
CUSTOMS: The port is under control of Gebze and Derince Customs Authorities.
AUTHORITY: Alemdar Holdings, Istanbul, Turkey.

(B) COLAKOGLU METALURGI PIER

LOCATION: Approximate location of the pier is Lat. 40° 46′ 05″ N., Long. 29° 32′ 10″ E.
PILOTAGE: Pilotage is compulsory in the Gulf of Izmit from Darica to Diliskelesi and vice versa and also for berthing and unberthing.
BERTHING: Length of Pier No. 1 is 119 m. and depth 11.0 m. Length of Pier No. 2 is 100 m. and depth varies between 7.40 m. and 9.0 m. No shore crane available at either pier. Imports are steel and iron scrap and sometimes ferro manganese and ferro silicone. Exports are iron and steel products. Discharging rate of scrap iron and steel products is 3,000 – 4,000 tons a day. Installation works around the clock.
FRESH WATER: Available.
FUEL: Not available.
CUSTOMS: The port is under the control of Izmit and Derince Customs Authorities.
AUTHORITY: Colakoglu Metalurgi AS. *Telex:* 34125 Cmg Tr.

(C) SOLVENTAS

LOCATION: Approximate location of the pier is Lat. 40° 41′ 30″ N., Long. 29° 32′ 12″ E.
PILOTAGE: Pilotage is compulsory in the Gulf of Izmit from Darica to Diliskelesi and vice versa and also for berthing and unberthing.
BERTHING: Length of pier is 39 m. and depth 8.5 m. Capacity of installation is approximately 200 t.p.h. – 250 t.p.h.
FRESH WATER: Not available.
FUEL: Not available.
CUSTOMS: The port is under control of Derince and Izmit Customs Authorities.
AUTHORITY: Solvent A.S., Gebze.

EDINCIK: 40.21 N. 27.51 E.

LOCATION: In the South of Erdek and on the West coast of Kapidag Peninsula. See BA Chart No. 884.
PILOTAGE: Pilotage compulsory. Pilot comes from Bandirma.
MAX. SIZE: 5,000 d.w.t.
BERTHING: This is a colemanite loading berth of Etibank, where loading is effected by conveyor.

Five dolphins exist in front of the conveyor house and in enough deep water for mooring and shifting of vessels. As there is little movement of the conveyor, vessels have to shift in order to load bulk cargo in all hatches.
DENSITY: 1025.
FRESH WATER: Available.
TIME: GMT plus 3 hours.
GENERAL: Formalities with the Harbour Master are carried out in Erdek but all others in Bandirma. All services to be supplied from Bandirma.
AUTHORITY: Erdek Liman Baskanligi, Erdek, Turkey. *Tel:* 90-1989-1044. *Telex:* 58-214. *Contact:* Nezih Önal.

EREGLI (Karadeniz Eregli), including Usunkum: 41.18 N. 31.27 E. **(See Plan)**

PORT LIMITS: Line joining Lat. 41° 17′ 23″ N., Long. 31° 23′ 43″ E. and Lat. 41° 14′ 46″ N., Long. 31° 23′ 43″ E.
DOCUMENTS:
5 copies Crew List.
5 copies Passenger List.
3 copies Provisions List.
3 copies Bonded Stores List.
5 copies Crew Effects List.
3 copies Cargo Manifest.
3 copies Bills of Lading.
1 copy Health Declaration.
PILOTAGE: Pilotage is compulsory and available day and night. Vessels bound for the old port of Eregli should send their ETA to their local Agent. Vessels bound for Usunkum should send their ETA to the factory in accordance with the Charter Party terms.

Pilot will board vessels at a reasonable distance off the North Breakwater (red light). The pilot boat has a steel hull and is painted grey. Pilot may be contacted on VHF Channel 16.
ANCHORAGE: Anchorage for the deep draft vessels is about 0.5 miles – 1 mile West of the North Breakwater (red light). However, smaller vessels may anchor 0.5 miles West of the South Breakwater (green light). The bottom is muddy and sandy.
RESTRICTIONS: Vessels over 500 g.r.t. have to take a pilot and vessels over 1,000 g.r.t. have to use tugs. Number of tugs required increases in accordance with the vessel's gross registered tonnage.

Vessels of large deadweight are not permitted to berth at night.
MAX. SIZE: *Eregli:* Port maximum draft is 28 ft.
Usunkum: Oil and Coal Discharge Berth: Maximum LOA 240 m., maximum beam 36 m., maximum draft 36 ft.

Cargo Berth: Maximum LOA 240 m., maximum beam 32 m., maximum draft 35 ft.
HEALTH: Pratique is granted after the Quarantine Officer has visited the vessel on arrival.
RADIO: Eregli Radio. The Marine Operator is on VHF Channel 16 throughout 24 hours.
VHF: The calling channel for all stations is Channel 16.
RADAR: Not available.
TUGS: 3 tugs. 1×2,650 h.p. and 2×800 h.p. Tugs normally join the vessel outside the harbour and ship's lines are always used.
BERTHING: *Eregli Old Harbour:* Length of quay 400 m. Depth alongside 28 ft. There is also a small wharf of 80 m. in length and 14 ft. depth.
Usunkum: Ore and Coaling Unloading Dock: Length of berth 408 m. Depth alongside 36 ft.

Cargo Dock: Length of wharf 280 m. Depth alongside 35 ft.
CRANES: *Eregli Old Harbour:* Heavy lift derrick with a capacity of 147 tonnes and a fixed coal loading conveyor with a rate of 220 tonnes per hour.
Usunkum Cargo Dock: 3×15 tonnes capacity shore cranes.
BULK CARGO FACILITIES: In Usunkum Harbour there are 2 grabs (1×10 tonnes, 1×15 tonnes) for unloading ore and coal. Maximum air draft 14 m.
STEVEDORES: *Eregli Old Harbour:* Working hours are from 0800 hrs. – 1600 hrs. for coal loading and from 0800 hrs. – 2200 hrs. for loading and discharging of general cargo.
Usunkum: Work is carried out continuously throughout 24 hours.
MEDICAL: All types of medical assistance are available.
TANKERS: No facilities available.
DENSITY: Average density 1012 – 1014.
FRESH WATER: Fresh water is available at Usunkum at a rate of approximately 15 t.p.h.
FUEL: Diesel oil can be supplied by tank trucks.
GANGWAY/DECK WATCHMEN: Usually ship's crew, ship's gangway used.
OPENING/CLOSING HATCHES: Normally carried out by ship's crew.
CERTIFICATES: Cargo Gear Certificates required.
CUSTOMS ALLOWANCES: Each crew member is permitted 200 cigarettes and 1 bottle of spirit.
CONSULS: None locally.
REPAIRS: Minor repairs can be carried out.
DRY DOCKS: None available.
SURVEYORS: Available locally.

AIRPORT: The nearest airports are at Istanbul and Ankara, about 300 km. by road.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
SHORE LEAVE: No restrictions.
HOLIDAYS: Work is carried out on all holidays at Usunkum Harbour.
REPATRIATION: Crew changes and repatriation are possible.
TELEPHONES: There are no facilities for placing telephones on board vessels.
SERVICES: None available locally.
BANKS: There are no foreign banks in the city.
DEVELOPMENTS: 2 tugs of 2,700 h.p. each are under construction and will be available in the near future.
AUTHORITY: Karadeniz Eregli Liman Baskanligi. *Tel:* 11007. *Telex:* 48451 KRDL. *Contact:* Turgut Ege, Harbour Master.

FINIKE: 36.16 N. 30.13 E.

RADIO: Finike Radio. Call sign TAC3.
BERTHING: Jetty 80 m. long, depths alongside 4.5 m. – 5.5 m. Vessels of more than 3,000 g.r.t. cannot berth alongside, but anchor outside the port.
CARGO HANDLING: Vessels at anchor are worked by 4 lighters towed by a motor boat. Only 200 tonnes of cargo worked per day by lighters.
At the jetty, 300 – 500 tonnes of cargo are handled per day.
AIRPORT: At Antalya (280 km.).
GENERAL: Port is dangerous in Winter.
OFFICIALS: Halil Tarhan, Port Master.

GEMLIK: 40.25 N. 29.06 E. (See Plan)

SHIPMASTER'S REPORT: July 1980.

VESSEL: L.P.G. Carrier – 32,000 g.r.t. Vessel discharged ammonia.
FORMALITIES: Formalities were dealt with quickly. Bonded stores are sealed and remain sealed until clearing outward from last Turkish port. Application may be made to open under Customs control and these applications were granted.

Travelling manifests of cargo and ship's stores are made up and accompany the vessel from port to port.

Papers required:
2 Stores Lists.
6 Cargo Manifests.
6 Crew Lists.
2 Vaccination Lists.
1 List of Monies in ship's safe.
2 Health Declarations (including the clearance from Canakkale).
2 Lists of Ports of Call.
2 Crew Declarations.
3 Crew Currency Declarations.
2 Ship Particulars.

APPROACHES: Chart BA. 1005.

The inset on Chart BA. 844 does not quite cover the area in which the berth is situated. (Position of Ammonia section of quay Lat. 40° 25′ N., Long. 29° 06.5′ E.).

The approach itself presents no difficulty since good fixes are available both by radar and visually. Similarly, although care is needed, an approach may be made in poor visibility with complete confidence.

Fishing vessels, inter-island ferries and local trading craft must be expected through the island passages and fishing vessels will be met within Gemlik Liman. Some of these craft are very small although sea conditions are invariably smooth and they should show up well on the radar. Not all carry lights.

An anchorage position as near as 4 cables from the berth may be used although this should be chosen to Eastwards of the berth to keep the departure path clear for any vessels leaving.

The Pilot obtained for the Dardanelles passage, who will leave here however short a stay, will be able to give advice on choosing a suitable anchorage, should this be necessary.

PILOTAGE: The Pilot may be summoned by whistle and will board from a small, open fishing craft. Gangway or pilot ladder must be lowered to the water's edge.

No night time berthing. Unberthing may be carried out at night at the Master's discretion and presents no difficulty. The starboard anchor may be used for berthing (not on this call) and is used to heave the vessel off when leaving.

Unberthing is a long manoeuvre; 2 forward back-springs are lead as far astern as possible, the vessel hove astern about 30 m. (to ensure that the bow does not fall inside the line of the quay and foul the 'bridge' to the forward mooring dolphin), everything let go aft, hard to port and dead slow ahead on the engine until the vessel is at an angle of 45°. The vessel is then backed out, after which the Pilot leaves.

VHF: Not available.
TUGS: None available.
BERTHING: Vessel always berths port side alongside.
REPAIRS: No facilities.
SURVEYORS: With sufficient notice, Lloyd's Surveyor may be ordered from Istanbul.

SHIPMASTER'S REPORT: September 1980.

FORMALITIES: Customs Officer stays on board whilst vessel is in port.

Travelling manifests of cargo and ship's stores to be made up and accompany the vessel from port to port. For Cargo Manifests I use the U.S. Customs Declaration of Cargo Form with the U.S. Seal blanked out, Authorities had no objection.

PILOTAGE: If vessel requires an outward Pilot through the Dardanelles remember to order in good time, 12 hours minimum order time is required, especially when the vessel's stay in port is short.

There is 1 Pilot who is also the 'Lloyds' sub-Agent in Gemlik and is generally a useful person to know.

When unberthing make sure the Port anchor is home otherwise it will foul the quay.

BERTHING: Gangway may be turned out prior to berthing.

The quay consists of 2 berths, the Eastern Berth for loading bulk or bagged fertiliser has 2 loading booms. This berth, if it has another vessel on it, may well cause some problems on leaving the Western Berth which is the liquid ammonia facility. When the vessel is in position with the liquid Chicksan, the bow overshoots the jetty and provision is made for the forward mooring ropes to be taken to a large dolphin, connected to the main quay by a catwalk with a *wooden* walkway.

Berths are very good being of large, substantial concrete structure with good fendering.

Minimum depth alongside 12.6 m.

There is an 8 m. patch at the Eastern end of the Fertiliser Berth which causes the Pilot problems.

Density varies: 1020 – December 1979, 1016 – July 1980, 1019 – September 1980.

DISCHARGING: 2 Chiksans, liquid line 10 in., vapour line 10 in., both 150 ASA, both can be used for either liquid or vapour so be careful when connecting.

Discharge rates vary: December 1979 – 640 t.p.h.; July 1980 – 502 t.p.h.; September 1980 – 800 t.p.h., they can take it at over 1,000 t.p.h. depending on shore tank ullages.

Fertiliser plant usage of raw ammonia presently 400 tonnes per day increasing in January 1981 to 600 tonnes per day. The actual production of ammonia is expected to commence in about five years' time.

Shore surveyor attended and his figures taken as quantity discharged. Attends the vessel at subsequent Turkish ports by flying between ports, not allowed to stay with vessel. Very helpful. No gauging of shore tanks.

GENERAL: No fuel. Available at great expense if brought from Istanbul or Izmit by barge or tank lorry.

All communications are dealt with by head office in Istanbul and then passed to Izmit thence by car to Gemlik which has no Telex.

Telephone to U.K. about 2 hour wait for connection, line clear.

Cables: Watship Izmit or sub-Agent: 'Kinay' Gemlik. For urgent messages cable address should be prefixed by the Turkish word 'Yildirim' – all ports.

Personnel repatriation is a problem due to the distance from Istanbul and the fact that the Immigration post is not in Gemlik.

Chandler: Agent does the chandlering, good vegetables available September 1980, payment in cash only.
Doctor: Available at Bursa about 30 km. (30 minutes).
Dentist: In Gemlik, near Agent's office.
Shopping: Best in Bursa about 30 minutes South of Gemlik along new dual carriageway. Agent will arrange transport. An hourly bus service runs from the plant into Gemlik.

SHIPMASTER'S REPORT: November 1980.

BERTHING: If weather suitable berthing now undertaken at night. We eventually berthed at night in calm conditions with small coaster on fertiliser berth without any difficulties, proceed slowly. Unberthing at night.
DISCHARGE: Very keen on correct discharge temperature. Use forward liquid line, aft vapour line. Shore tanks hold 40,000 tonnes total (20,000 tonnes each).
FRESH WATER: Available but not potable. At L400 per tonne (1.90 pounds). A fire tender is used as a pump at Chiksan. I believe it is well water.
FUEL: With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

AUTHORITY: Gemlik Directorate, Port of Gemlik, Liman Baskanligi, Gemlik, Turkey. *Tel:* 1133. Gemlik Customs House: *Tel:* 1411; Gemlik Police Station: *Tel:* 1628; Gemlik Hospital: *Tel:* 2329.

GIRESUN (Kerasunda): 40.56 N. 38.24 E. (See Plan)

PORT LIMITS: The Port of Giresun is the sea area contained in the inner part of the imaginary lines which joins Lat. 40° 56′ 40″ N., Long. 38° 19′ 40″ E. and Lat. 40° 54′ 51″ N., Long. 38° 26′ 10″ E., Aksu River mouth and the point 2,778 m. (1.5 miles) away from this mouth in an 019° true direction with Lat. 40° 56′ 15″ N., Long. 38° 27′ 00″ E. and Lat. 40° 55′ 10″ N., Long. 38° 19′ 40″ E. Gure River mouth and the point 2,778 m. (1.5 miles) away in true North direction.
PILOTAGE: Pilot ordered by Agent who requires 24 hours' notice in advance of vessel's arrival. Compulsory for all foreign flag vessels.

Pilot service operates 24 hours a day and vessels may enter and leave at any hour on request.

ANCHORAGES: Good anchorage in Outer Harbour. Vessels should keep the entrance channel clear.
RADIO: Giresun Radio. Call sign TAB4.
TUGS: Compulsory for all foreign flag vessels.
BERTHING: The Port of Giresun is composed of 2 parts. These are the inner harbour and the outer harbour.

(a) The inner harbour is the sea area contained in the inner side of the line which joins the light at the end of the main breakwater with the light at the end of the auxiliary breakwater.

(b) The outer harbour is that part of the sea which remains between the port boundary and the inner harbour boundary.

The Inner Harbour

The berthing, tying-up and stern to shore anchoring places for the ships are given below:

A – The passenger berth has been converted to a general cargo berth and is equipped with a shore crane of 3 tons capacity. This quay is 150 m. long and the water depth is 8 m.

B – The cargo wharf: This is reserved for cargo ships. It is 250 m. long and the water depth is 7 m. The cargo wharf is equipped with shore cranes of 3 tons capacity.

C – The small craft quay is 135 m. long and the water depth is 3 m. Small tonnage ships are berthed here.

D – Service wharf: This is 88 m. long and the depth of the water is 4 m. The service craft of the Harbour Authority berth here.

E – Providing that they obtain the Harbour Authority's permission, ships waiting their turn to berth may tie-up stern to shore, at the bollards on the main breakwater in such a way as not to impede the traffic.

F – The outer harbour is an unrestricted anchoring area but it is strictly forbidden to anchor or wait at the mouth of the breakwater. Anchoring is unrestricted 315° true North of and 2.5 cables away from the centre of the main breakwater, North of the normal anchoring area.

STEVEDORES: Working hours normally 0800 to 1200 and from 1300 to 1700. Four gangs available.

CRANES: 4 cranes available, 3 tonnes – 6 tonnes.

FRESH WATER: Available.

FUEL: Not available.

REPAIRS: No repair facilities.

AUTHORITY: Giresun Port Authority, Denizcilik Bankasi T.A.O., Giresun Liman Isletmesi Mudurlugu, Giresun. *Tel:* 2447, 1490 (Port Director). *Telex:* 22188 Giresun. *Contact:* Port Manager.

GOLLUK: 37.14 N. 27.38 E.

DOCUMENTS: The following documents have to be prepared by Masters before arrival:

4 copies of Crew Lists.
2 copies of Stores Lists.
1 copy Health Document.
4 copies of Passenger Lists.
3 copies of Customs Documents.
3 copies of Manifests for cargo destined to port.
1 copy of Manifest for all transit cargo aboard.

N.B. Ship's particulars form is to be filled by Masters upon arrival and remitted to the Port Authorities.

RESTRICTIONS: Golluk is a well-protected natural harbour, not affected by winds from any direction. Deep water approaches to pier.

PILOTAGE: Pilot not available.

HEALTH: Vessels to show their Sanitary Certificate if available aboard and also their Registry. Presentation also of Vaccination Certificate of all the crew, if required by Sanitary Officials. Pratique is necessary on arrival even if vessel has called at another port in the same country. Sanitary Certificate is required for live animals aboard.

RADIO: Izmir Radio Station, call letters TAN2. Istanbul Radio Station, call letters TAH.

TUGS: Not available.

BERTHING: One pier 170 m. long used for handling emery ore in bulk. Depths alongside 39 ft. shelving to 20 ft. at 90 m. from seaward end.

CUSTOMS ALLOWANCES: 50 cigarettes for each member of crew going ashore. Aboard the vessel each member of the crew is permitted to have one carton out of Bond. One litre wine/spirits for each member of the crew in opened bottle is permitted out of Bond. However, this allowance is to be kept aboard the vessel.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day (from December 31st 1200 hrs. to January 1st 2400 hrs.); National Sovereignty Day (from April 22nd 1200 hrs. to April 23rd 2400 hrs.); Spring Day (1st May), Constitution Day (27th May); Sports Day (19th May); Victory Day (30th August); National Holiday (28th October 1200 hrs. to 30th October 2400 hrs.); Sheker Bayram (3 days movable); Kurban Bayram (4 days, movable).

GOLOVASI, Botas (Ceyhan) Terminal, including Dortyol Terminal and Toros Gubre: 36.53 N. 35.56 E.

(See Plan)

(A) BOTAS (CEYHAN) TERMINAL.
(B) TOROS GUBRE.
(C) DORTYOL TERMINAL.

(A) BOTAS (CEYHAN) TERMINAL

PORT LIMITS: The Botas (Ceyhan) Harbour is operated under the Authority of Iskenderun Harbour Master's Office and the harbour area is the sea area North of a line between:

(1) 36° 36′ 00″ N., 35° 47′ 42″ E. (Yumurtalik Lighthouse).
(2) 36° 49′ 06″ N., 36° 10′ 06″ E. (mouth of brook "Deli Cay").

"Botas Terminal", "Toros Terminal", "Delta Terminal", "Dortyol Terminal" and "Aygaz Terminal" are in Botas Port Limits.

Pilotage is compulsory for mooring and unmooring by day or night according to regulations of Botas (Ceyhan) Port, which is in force within Botas Port Limit.

DOCUMENTS:

7 Crew Lists
7 Passenger Lists
2 Stores Lists
2 Crew Declaration Lists
1 Free Pratique
Last Port Clearance
Load Line, Ship Safety Construction, Safety Radio, Safety Equipment Certificate

Agent has to take the last four Certificates to the Port Authority at Iskenderun.

PILOTAGE: Pilotage is compulsory for mooring and unmooring. Pilot will meet the ships 2 miles South from the end of the jetty in the anchorage zone.

It is requested that pilot ladder be of an approved pattern and securely rigged.

After the ship has berthed, the Pilot / Loading Master stays on the ship and requires a separate cabin.

ANCHORAGES: There are 2 "Tanker Anchorage Zones" near the terminals.

Tanker Anchorage Zone (I):

Point	(a1)	36° 53′ 02″ N.,	36° 00′ 00″ E.
"	(b1)	36° 49′ 30″ N.,	35° 57′ 04″ E.
"	(c1)	36° 49′ 00″ N.,	35° 59′ 40″ E.
"	(d1)	36° 52′ 36″ N.,	36° 02′ 05″ E.

Tanker Anchorage Zone (II):

Point	(a2)	36° 51′ 50″ N.,	36° 04′ 50″ E.
"	(b2)	36° 50′ 00″ N.,	36° 05′ 05″ E.
"	(c2)	36° 50′ 00″ N.,	36° 06′ 52″ E.
"	(d2)	36° 51′ 50″ N.,	36° 06′ 20″ E.

There are 2 "Prohibited Anchorage Zones".

Prohibited Anchorage Zone(I)

Point	(A1)	36° 52′ 12″ N.,	35° 55′ 07″ E.
"	(B1)	36° 50′ 30″ N.,	35° 56′ 05″ E.
"	(C1)	36° 51′ 30″ N.,	35° 58′ 30″ E.
"	(D1)	36° 52′ 25″ N.,	35° 58′ 52″ E.
"	(E1)	36° 54′ 28″ N.,	36° 00′ 48″ E.
"	(F1)	36° 55′ 50″ N.,	36° 00′ 22″ E.

Prohibited Anchorage Zone (II):

Point	(A2)	36° 52′ 24″ N.,	36° 07′ 48″ E.
"	(B2)	36° 51′ 36″ N.,	36° 06′ 30″ E.
"	(C2)	36° 49′ 45″ N.,	36° 07′ 00″ E.
"	(D2)	36° 49′ 48″ N.,	36° 10′ 00″ E.

RESTRICTIONS: Berthing and unberthing possible at any time day or night, weather conditions permitting. However, vessels over 80,000 d.w.t. are not allowed to berth at Berth No. 4 after sunset.

MAX. SIZE: 300,000 d.w.t. at outer berths and 150,000 d.w.t. at inner berths.

RADIO: It is essential that tankers bound for the Botas Terminal communicate with their Agent with at least 72 hrs., 48 hrs. and 24 hrs. before arrival and state ETA, cargo required, maximum loading rate, S.W.L. of derrick, manifold measurements and quantity of ballast on board, time required for deballasting and whether vessel is gas-free. Vessel should request Agent to forward the information to Botas.

VHF: Botas Terminal Shore Control on VHF Channels 16 and 22.

Arriving vessels should make contact at least 4 hours before arrival at the anchorage in order to avoid delays.

Channels 16 and 22 always watched.

Channel 11 is for manoeuvring and Channel 12 is for deballasting and loading operations and not to be used for other purposes.

When the ship makes contact with Botas, the following information to be given to the Iraqi representative:

Ship's name, nationality, deadweight, cargo required, loading rate required, dirty, clean and permanent ballast quantity and deballasting time.

RADAR: There is no port Control Radar. The approach from the SW or South can be made without difficulty as the coast line provides very good fixes.

TUGS: There are 7 tugs available to assist in berthing and unberthing. 3×2,600 h.p., 2×3,200 h.p. and 2×1,200 h.p. The tugs are provided with fire fighting equipment.

For vessels of 1,000 g.r.t. up to 4,000 g.r.t., which are berthing/unberthing at the jetty, it is compulsory to take at least 1 tug, 2 tugs for vessels from 4,001 g.r.t. up to 50,000 g.r.t., 3 tugs for vessels from 50,001 g.r.t. and over.

Depending on weather and having regard for safety conditions, additional tugs may be assigned by Botas or Port Master's Office or requested by vessel.

BERTHING: Four loading berths available:

Berth No.	*Max. size* d.w.t.	*Depth Alongside* (m.)	*Max. Permissible Draft* (m.)
1 (Outer East)	300,000	22.00	21.60
2 (Outer West)	300,000	22.00	21.60
3 (Inner East)	150,000	17.00	16.70
4 (Inner West)	150,000	17.00	16.70

LOADING:

Berth No.	*Max. Loading* Rate cu.m.p.h	*Loading Arms*	*Ballast Arms*
1	20,000	4×20 in.	20 in.
2	20,000	4×20 in.	20 in.
3	10,000	4×16 in.	16 in.
4	10,000	4×16 in.	16 in.

Two grades of oil are loaded in BOTAS:

1) Kirkuk Blend Crude Oil (API: 36.95-35.98 and temperature: 80°F.-105°F.).

2) Basrah Light Crude Oil (API: 34.97-33.05 and temperature: 80°F.-105°F.).

Maximum loading rates are dependent upon availability of loading lines on the ship.

Pilot / Loading Master is the adviser for all mooring, unmooring, cargo operations and communications with shore, etc.

Derricks and Cranes: Derricks and cranes S.W.L. of 1 ton are recommended.

Loading Operations and Shore Communication: Ship's tanks are inspected by Loading Master and passed as suitable for loading.

Responsible ship's officer must certify to the Loading Master that all ship's valves are closed or blanked except those required for loading and water circulation purposes, and that these Rules and Regulations are being and will be observed.

The Loading Master will not transmit any loading instructions to the shore until the responsible ship's officer is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

Loading rates requested by the vessel or quoted by the Terminal will be the peak or maximum rate at any time during the loading period.

The Loading Master will advise the Master of the ship as to shore communication and any signal needed for local requirements.

Ship's crew with an officer in charge will assist in all operations as advised by the Loading Master. This includes lifting, connecting, disconnecting, lowering of hoses and tending moorings.

Lighting: Manifold and mooring areas should be adequately lit to enable night mooring and loading operations to be carried out with safety. Sea area around the ship to be illuminated.

Notice of Readiness: Notice of Readiness will be received by the Loading Master. It should be tendered at the time of anchoring or Pilot boarding. Lay time will commence 6 hours after receipt of Notice of Readiness. Notice of Readiness to be addressed "S.O.M.O. Representative, Botas Terminal – Ceyhan".

Deck Watch: A responsible ship's officer shall be on watch on board at a point near the ship's tanks which are receiving oil during the process of loading and NOTICE IS HEREBY GIVEN that the Loading Master has received instructions to stop loading immediately this rule is disregarded.

Capable members of the ship's crew shall be stationed by the ship's tank valves which are receiving oil during the process of loading.

All pipe-lines and hoses shall, while rigged for loading crude oil, be directly and continuously under supervision. No crude oil shall be allowed to escape or overflow.

BALLAST: Max. ballast discharge rate 5,000 cu.m.p.h.

Shore ballast tanks capacity – 65,000 cu.m.

Vessels should arrive with sufficient ballast for safe handling of vessel under prevailing weather conditions.

Vessels shall not discharge into the waters of the port any part of the content of their cargo, slop, or ballast tanks or bilges which is liable to pollute these waters. If the vessel is sure that ballast is extremely clean, it is permissible to deballast to sea, but in case of pollution, fine is heavy. Masters of tankers will be held responsible in cases of wrong declaration of clean or dirty ballast. Deballasting during loading (simultaneous) especially in Winter season is preferable for safety.

Ballast water must be declared and signed by the Master and delivered to the Terminal to this effect. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard.

It is an offence to discharge dirty ballast or pump out bilges.

MEDICAL: Master to inform Agent by cable if urgent medical assistance is required upon arrival, also indicating, if possible, seriousness of case in order that adequate steps may be taken. Hospital and doctor are available at Ceyhan 25 km., Adana 75 km., and Iskenderun 65 km., distance from Botas (Ceyhan) Terminal.

DENSITY: 1025.

FRESH WATER: Available at jetty. Rate 25 t.p.h. Arrangements to be made through Agent.

FUEL: Not available.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

CONSULS: At Iskenderun.

REPAIRS: Not possible.

SURVEYORS: There are no Classification Societies at the port.

GANGWAY/DECK WATCHMEN: There is no watchmen service.

CUSTOMS ALLOWANCES: 40 cigarettes for each crew member going ashore. On board the vessel each crew member may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.

AIRPORT: Adana Airport, served only by domestic lines with routes to Istanbul and Ankara. Airport is situated 75 km, from Botas (Ceyhan) Terminal. Twice daily service to international airport at Istanbul.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: New Year's Day (January 1st); Sports Day, (May 19th); Victory Day, (August 30th); National Holiday from October 28th (1200 hrs.) to October 29th (2400 hrs.); Shakear Bairam (3.5 days, movable); Kurban Bairam (4.5 days, movable).

The terminal works all year round.

POLICE/AMBULANCE/FIRE: All information given after berthing.

TELEPHONES: Cannot be connected on board.

SERVICES: There are no special services.

SHORE LEAVE: Crew permitted to go ashore with shore passes and Seaman's Book.

It is forbidden to walk on jetty and in terminal area. A vehicle is obtained by Botas for the needs (transportation) of ship's personnel on jetty. The vehicle goes only to the gates.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

REGULATIONS: In addition to Harbour Regulations all ship Masters are at all times responsible for the application of all safety precautions as prescribed in the International Oil Tanker and Terminal Safety Guide.

GENERAL: The main engines of all vessels while at the berth shall be kept ready for immediate use. Deck power (steam) is to be maintained at all times and water pressure shall be maintained on the fire fighting system.

Repairs which may prevent the working of the vessel's main engines may only be undertaken in the Port with the written permission of Botas Representative.

The Master shall at all times retain on board sufficient crew to work the vessel.

No craft, other than one having on board the Pilot or Port Health Officer, may approach any vessel entering the Port and no other person may board until Free Pratique has been granted.

Whistle or siren to be available at all times.

Boarding of Vessel: The control of persons boarding vessel is the ship's responsibility. Boarding should be restricted to Botas employees on duty and to persons authorised by the Port Authorities as advised by vessel's Agent.

Stores/Provisions: Vessels may store at the anchorage or while vessel is at the berth with permission from Botas Authority.

Tanker Safety: Masters are at all times responsible for the application of all safety precautions as prescribed in the International Oil Tanker and Terminal Safety Guide.

I.O.T.T.S.G. Safety Check List: The tanker safety check list must be completed after inspection of each item prior to commencement of and during loading. The Loading Master is authorised to stop all loading operations should he consider that the safety of lives and property is endangered by the infringement of safety rules.

Signals: The following signals must be shown when vessel is in the Port.

By day: Flag "B" of the International Code of Signals. At night: 1 clear red light visible all around.

Fire Fighting Equipment: Vessels must be adequately manned for fire-fighting and vacating the berth in case of an emergency.

The following fire-fighting precautions must be taken.

(a) Fire hoses must be run out fore and aft or monitors ready for use.
(b) Fire-mains must be under pressure.
(c) 1 dry chemical extinguisher must be stationed on either side of the ship's manifold.

Fire Fighting Equipment on each Loading Berth: Equipment is provided for fire fighting on the platforms or exposure protection for the platforms, and the tankers being loaded as follows:

(a) 2 elevated foam/water monitors are mounted on each access tower on the platform capable of delivering 3,550 l.p.m. (800 g.p.m.) of water or foam solution, and has a throw of 60 m. Each monitor is remote controlled from the control room and has flexibility of full horizontal rotation and vertical reflection.
(b) 2 deck level manual water spray monitors of 450 l.p.m. and 2 foam branch pipes of a capacity of 450 l.p.m. of foam delivery used to extinguish fires on the manifolds.
(c) A number of portable dry chemical and CO_2 extinguishers are located in various locations.
(d) There are numerous foam pourers and water spray facilities located under the deck for water surface foam blanketing and fire smothering.
(e) Water curtain facilities are provided on the loading towers to prevent fire spread to and from the berths.

Action in Case of Emergency: In the event of a fire, oil spillage or other emergency on the vessel.

Emergency and Fire Signal: One or more blasts of the ship's whistle, each blast of not less than 10 seconds duration supplemented by a continuous sounding of general alarm system.

SHIPMASTER'S REPORT: 1978.

Documents: Turkish Health Form (supplied when vessel boarded), 2 Stores Lists, 2 Crew Declarations, 8 Crew Lists.

Pilotage: Compulsory. Pilot meets ship 1 mile South of the pier at the anchorage zone.

Anchorages: At least 1 mile South of Southern end of jetty.

Restrictions: Max. drafts 72 ft. to 98 ft. at Berths 1 and 2 and 66 ft. to 72 ft. at Berths 3 and 4.

Max. Size: 300,000 d.w.t.

Health: Free Pratique granted at anchorage or when berthed.

Radio: Via Mersin.

VHF: Communicate with Botas Terminal Channel 16 at least 4 hours before arrival. Uses Channel 22 for working.

Radar: None.

Tugs: 3 of 2,600 h.p. and 1 of 1,200 h.p. All provided with fire fighting equipment.

Berthing: Normally facing Southwards (bow to sea) for emergency purposes.

Cranes: 1 on each berth.

Medical: A doctor is available ashore but vaccinations not possible.

Density: 1025.

Fresh Water: Available at all berths, arranged through Agent.

Fuel: Not available.

Fire Precautions: I.O.T.T.S.G. Safety Check List is utilised.

Consuls: See "Iskenderun".

Repairs: Repairs to engines alongside may be permitted with written permission from Terminal Management.

Dry Docks: None.

Surveyors: None.

Gangway/Deck Watchmen: Not required.

Customs Allowances: 200 cigarettes and 1 bottle per man.

Repatriation: Possible via Iskenderun and Istanbul.

Time: GMT plus 3 hours in November 1978.

Services: Limited fresh stores available.

Shore Leave: Permitted.

Identification Cards: Shore passes issued.

Mail: To U.K. takes about 5 days. None received due late orders.

General: No large scale B.A. chart available but B.A. 2632 is adequate if radar working. A Turkish Chart No. 334 is available. The position we anchored (2.1 miles South of jetty in 35 m.) was thick mud on bottom and good holding ground with wind from North about Force 7. At present berthing only during daylight but sailing any time. Each berth is equipped with shore gangway. Dirty ballast can be accepted up to 40,000 tonnes

and clean up to 60,000 tonnes at a rate of 4,500 t.p.h. Loading rates up to 20,000 cu.m.p.h. on berths 1 and 2 and up to 10,000 cu.m.p.h. on berths 3 and 4. S.G. about 0.8459 (API 35.78) at 60/60F. with a loading temperature (November) of about 80°F. The oil is Kirkuk Blend Crude from Iraq. There are facilities for storing about 1,000,000 tonnes. Berths 1 and 2 manifold 6×20 in. with reducers to 16, 18 or 20 in. if required. Berths 3 and 4 manifold sizes 16 in. with reducers to 12, 14 or 16 in. if required. Automatic couplings may be used. At berths 3 and 4, 4 hoses can be connected if distance between ship's manifold centres is more than 150 cm. There is a Doppler approach system on jetties but it has not been calibrated. All moorings on quick release hooks and usually 3 head, 2 breast and 2 back spring moorings for 140,000 d.w.t. tankers, same aft. For berthing, 2 tugs make fast with their own lines, 1 tug at each end of main deck and 3rd tug stands by. For unberthing, 1 tug makes fast to bow and stern with ship's rope (not wires) and 3rd tug stands by. Pilot will not use pilot hoist but requires accommodation ladder when in ballast and disembarks with pilot ladder. 7 Notices of Readiness and Dry Certificate required by Pilot, 1 of each and 1 ullage report required by Agent. Agent takes ashore certificates of Safety Construction, Safety Equipment, Safety Radio, Loadline and Class. No early departure procedure available and ship stays on berth up to 2 hours after loading awaiting papers. N.O.R. is made out to I.N.O.C.–Bagdhad – Botas – Ceyhan. Pilot requires separate cabin as he acts as Loading Master, also cabin required for 1 Customs official and possibly Agent. Abnormal ship/shore differences appear to be usual as evidenced by the fact that when you handed them a letter of protest they hand you a reply at the same time.
Authority: Botas District Management.

SHIPMASTER'S REPORT: December 1980.
Botas and Toros Gubre Piers:
Approach: Situated in the Gulf of Iskenderun on the N.W. corner of the Gulf. The oil pier, which is the outlet from the "Kirkuk" oilfield in Iraq, is about 5 miles below the head of the Gulf on the Northern shore with the fertiliser pier 2 miles from the Gulf head.

The approach from the S.W. (Mersin direction) or South (Suez Canal) can be made without difficulty as the coast line provides very good fixes.

The lights marked on the piers do not exist. The oil pier light has been broken for six months and the Pilots say it will probably never be fixed, also the fertiliser pier light is not connected to the supply. The oil pier is visible at 24 miles (radar) and is well lighted at night by arc lamps. Generally there are a few anchored tankers lying off.

BA. 2632 is at present the only British chart available. There is a Turkish chart 334 which is considerably better.
VHF: The Fertiliser Pier has no VHF.

Botas Oil Pier uses Channels 16, 10, 24 (Duplex).

Channel 24 is used for intercommunication between various installations for transfer of figures. It can also be used to plug into the general telephone system to talk to the Toros Fertiliser Pier.

Call "Botas Terminal", 24 hour watch. In the early hours of morning no English spoken.
Anchorage: Toros Fertiliser: 1.0 – 1.5 miles S.E. of pier. Good holding.

Botas Oil Terminal: 1.5 – 2 miles S.E. of pier.

Both open to S.W. winds.
Pilot: Botas Pilot serves both terminals. Priority given to Botas.

A total of 6 Pilots are on 24 hour call.

Pilots board in anchorage area from black hulled and brown superstructure launch of about 10 knots.

They will also travel by car to Toros berth in about 15 minutes.
Berthing: Botas: 24 hours a day with wind speeds up to 25 knots.

Toros: Wind speeds up to 15 knots and then only if good forecast.

No berthing from 1 hour before sunset to sunrise. Unberthing throughout 24 hours.
Tugs: Botas fire fighting tugs on 24 hour stand-by, 4 available.

Kort nozzles: 3 of 2,600 h.p. and 1 of 1,600 h.p.

When berthing, push with bow line onboard. When unberthing, use ship's line which is doubled up.

Botas: 300,000 d.w.t. – 4 tugs
150,000 d.w.t. – 3 tugs
Toros: – 1 or 2 tugs

Pilot reports that they will operate with wind speeds up to 35 knots with large swell to take vessels off piers. Botas Terminal has priority.
Botas Berths: Nos. 1 and 2 at outer end of pier, No. 1 (East) and No. 2 (West), depths 27 m., loading rate up to 20,000 cu.m.p.h.

Nos. 3 and 4 at inner end of pier, No. 3 (East) and No. 4 (West), depths 18 – 19 m., loading rate up to 10,000 cu.m.p.h.
Weather: By observations and Pilots advice a low pressure to the North causes a large S.W. swell which coupled with a S.W. wind makes the Toros berth very dangerous.

N.W. winds up to Force 6 cause no real problems as the berth is in the shelter of the hills and the swell is not apparent. With N.W. winds on the Botas berth, the Pilot says it can cause problems due to the berth not having much shelter.

During the Summer months, often strong S.W. winds are common between 1100 hrs. to 1500 hrs. each day, which in the Pilot's opinion could make the Toros berth untenable.

Forecast: The local television gives a weather report. Rome Nato, if on time, is the only area forecast in English. Watch the barometer.
Toros Berths: Discharge only at present.

Berth head out. Bulk – Port side to on West side. Liquid – Starboard side to on East side.

Extends about 0.5 miles from shore, the berthing section lying in a 194° – 014° direction. Liquid side in position 36° 54.60′ N., 35° 59.04′ E.

Both berths designed for max. of 30,000 d.w.t.

Bulk berth has 5 tonne grab crane. Liquid side Chicksan.

Depths each berth minimum 12.5 m.
Mooring/Fenders: Toros: This can be a problem, and is dependent on length of vessel, particularly aft as the mooring dolphins do not go far enough astern.

As far as possible a 4, 2, 3 arrangement is required. With a swell, expect to part moorings, we parted six lines. Two good mooring boats from Botas Terminal used.

Fenders are 4 large flat plastic/steel faces on sprung rubber compresses. Unfortunately for a long vessel they are set too close together and need to be another 10 m. in each direction to give good coverage.
Jetty Dimensions/Gangways: Toros: Liquid side: Jetty face is 18 m. long and 9 m. above MLW.

Bulk side: 120 m. face and 7.5 m. above MLW.

For gangway purposes this means that on the bulk side the gangway can be used as long as the ship is not small.

On the liquid side a straight "B.O.T." type gangway will be necessary to land on the small pipe platform.
Discharge: Toros: Bulk side: 5 tonne capacity travelling grab crane which discharges into conveyor belt to the plant.

3 shifts of 8 hours worked, total 24 hours.

Liquid Ammonia: 6 in. Chicksan into 6 in. main line and 2 in. cooling line. Connection 6 in. 150 ASA – spool piece 12 in. – 6 in. provided. Shore labour connects/disconnects.

Sulphuric Acid: Connection on jetty of 10 in. 300 ASA.

Phosphoric Acid: Connection on jetty of 8 in. 150 ASA.

Lines South to North: Ammonia, Sulphuric Acid, Phosphoric Acid.

Ammonia is discharged into a refrigerated tank of 7,332 cu.m. equal to about 5,000 tonnes at a rate of 140 t.p.h.

The 6 in. loading line cascades into the top of the tank NOT bottom, therefore pressure problems can result.

Tank served by two Malcon compressors and usual condensers.

Sulphuric Acid tank is 3,420 cu.m.

Phosphoric Acid tanks (2) total 8,500 cu.m.

Air draft Ammonia – about 18 m. maximum.

Air draft Acids length of ship's hoses.

It is proposed to import about 10,000 tonnes Ammonia per month and 12,000 tonnes Phosphoric Acid per month, plus small quantities Sulphuric Acid.

Bulk commodities are Urea and Potassium Chloride.
Water: From metered pipe at about 10 t.p.h. Water hard but potable. Price $3.97 per tonne. Pipe on liquid platform. Ship's hoses.
Agent: Agent comes from Iskenderun about 30 miles away.
Communications: At the time of our visit to Toros Gubre there were no telephones. The nearest centre is the Botas Oil Terminal about 3 miles away.
Chandler: From Iskenderun, very good, low prices, obliging.

Local produce, vegetables, salads and fruit which is wide ranging in Spring. End of Summer, August and September not so good.

All in kg. Stores alongside, chandler provides labour.

December 1980: Vegetables $1 kg., fruit $2 kg., salad $1.50 kg., cheese (good) $3.00 kg. in tins of 25 kg.

To be paid for in cash drawn from Agent.
N.O.R.: Tendered in usual manner on anchoring, accepted at that time unless weather prevents berthing.
Customs: For Botas Terminal, reside in complex.

For Toros Terminal, Customs come from Iskenderun with Agent, which results in delay when clearing vessel outwards on completion.

Two Customs Officials reside on board – cabin required.
Money: If vessel coasting around Turkish ports money drawn at one Agency can not be deposited at another Agency in final port unless Customs clearance given from original port.
Personnel Changes: Nearest airport in Turkey is at Andana about 1 hour from Ceyhan Berths, but if waiting for ship have to stay in Iskenderun about 2 hours from airport.

Personnel travelling are advised to have Istanbul Agent's Office and home telephone numbers.

The Agent says it is easier to fly direct to Damascus about 3 hours taxi ride from Iskenderun but he cannot meet personnel and clearance at Syrian border has to be done on one's own.
Note: (December 1980): It is not expected that the plant will be in full production until mid-1981, the pier being used for material imports and production going to a wide area of S.E. Turkey and Iraq.

SHIPMASTER'S REPORT: April 1988.
Documents: Agent requires the following:

Load Line Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Certificate.
Classification Certificate.
Tonnage Certificate.

Restrictions: Unberthing any time.

Berthing at Berths No. 1, 2 and 3 at any time.

Berthing at Berth No. 4 during daylight hours only.

AUTHORITY: Botas Petroleum Pipeline Corporation, P.O.Box 73, 01921 Ceyhan-Adana-Turkey. *Tel:* 1388, 1431, 2488, 2514. *Telex:* 63838 Btas Tr. *Cables:* Botas-Ceyhan-Adana. *Contact:* Esat Can, District Manager. Captain B. Uzbilen, Marine Operations Manager.

AGENT: See "Iskenderun".

(B) TOROS GUBRE

LOCATION: Lat. 36° 55′ 00″ N., Long. 35° 58′ 54″ E.
PORT LIMITS: Toros Gubre is in the Botas (Ceyhan) port limits.
DOCUMENTS: Similar to Botas (Ceyhan) Terminal.
PILOTAGE: Similar to Botas (Ceyhan) Terminal, but there are no Loading Master's services.
ANCHORAGE: See "Botas (Ceyhan)" port plan.
RESTRICTIONS: Berthing possible by day and unberthing possible at any time.
MAX. SIZE: There are 2 jettys in the Toros Gubre. First is the old jetty and max. size is 30,000 d.w.t. The new jetty has a max. size of 80,000 d.w.t. but is not yet completed. Also see "Berthing".
RADIO: See "Botas (Ceyhan)" Terminal.
VHF: Always standing by on Channel 16.
RADAR: There is no port control radar.
TUGS: Botas (Ceyhan) Terminal's tugs are used.
BERTHING: There are 2 loading berths available on the old jetty.

Berth	*Max. d.w.t.* tonnes	*Max. LOA* (m.)	*Depth Alongside* (m.)	*Max. Draft* (m.)
East Side (Cargo ships and tankers)	30,000	175	12-14	10-12
West Side (For tankers only)	30,000	214	12-14	10.50

Six loading berths will be available on the new jetty. It will be completed in June 1989. See "Plan".
BALLAST: There is one ballast tank with a capacity of 5,000 cu.m., but not always in use.
MEDICAL: See "Botas (Ceyhan)" Terminal.
DENSITY: Salinity 39 p.p.m.
FRESH WATER: Available at jetty.
FUEL: Not available.
SURVEYORS: There are no classification societies at the Terminal.
GANGWAY/DECK WATCHMAN: There are no watchman services.
CUSTOMS ALLOWANCES: Same as Botas (Ceyhan) Terminal.
AIRPORT: Adana Airport is 82 km. from Toros Gubre.
TIME: GMT plus 2 hours. (Summertime is GMT plus 3 hours.)
HOLIDAYS: Similar to Botas (Ceyhan) Terminal.
POLICE/AMBULANCE/FIRE: All information given after berthing.
TELEPHONES: It is possible to make calls via Iskenderun Radio Station.
SHORE LEAVE: See "Botas (Ceyhan)" Terminal.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
REGULATIONS: All information given after berthing.
DEVELOPMENTS: See "Berthing".
GENERAL: See "Section A" – Shipmaster's Report – dated December 1980.
OPERATOR: Toros Gubre ve Kimya Endustrisi A.S., P.K. 83 01921, Ceyhan-Adana, Turkey. *Tel:* 7321-5001 (4 lines). *Telex:* 63840 Tors Tr.
AGENT: See "Iskenderun".

(C) DORTYOL TERMINAL.

OPERATOR'S REPORT: April 1988.

LOCATION: Lat. 36° 50.65′ N., Long. 36° 08.71′ E.
DOCUMENTS: Vessels are to call at Iskenderun for Customs Clearance, after which they will sail to the Terminal.
PILOTAGE: Compulsory. Pilot boards off Botas Oil Terminal.
RESTRICTIONS: Normally mooring is not undertaken after sunset. However, without any commitment from the owners of the Terminal, mooring after sunset is left entirely at the discretion of the pilot who might decide to moor the tanker after sunset, weather permitting.

Unmooring is carried out day and night.
MAX. SIZE: Maximum draft 12.6 m.
RADIO: Masters to advise agent of vessel's ETA 72 hours, 48 hours and 24 hours prior to arrival.

Cable to include the following information:
ETA Iskenderun.
Quantity of cargo required.
Max. loading rate.
Number and diameter of manifolds.
Quantity of ballast on board and time required for deballasting.
Whether vessel is gas-free or not.
BERTHING: Vessel will moor at sea buoys. One buoy is located on the port bow and two buoys are located aft.
LOADING: 2×10 in. hoses are available for dirty products and 2×8 in. hoses are available for clean products. Hose connection is amidships.

Loading is carried out at an average rate of 1,700 t.p.h. – 1,800 t.p.h. for dirty products and 1,200 t.p.h. – 1,500 t.p.h. for clean products.
BALLAST: There are no facilities for receiving ballast. Vessels must arrive with clean ballast.

Fines for pollution are approximately U.S.$50,000.
FRESH WATER: Not available locally.

Tankers requiring fresh water should call at Iskenderun before or after loading. Fresh water is supplied by the state owned port company at Iskenderun by a 200 ton capacity barge. Cost of fresh water is U.S.$4.0 per 1,000 kg. A charge of U.S.$50 – U.S.$100 is to be paid for supply between midnight and daybreak. Minimum supply 20 tons.
FUEL: Available.
GENERAL: *Stores:* A ship chandler is available for supply stores.

Agent: ETS. A. Boutros and Fils, Ataturk Bulvari, Unsal Han Kat 1, 31200 Iskenderun, Turkey; P.O.Box 11, 32101 Iskenderun. Telephone: (90) (881) 15170/74 (5 lines), (90) (881) 13684/85. Telex: 68123 Sail Tr/68131 Sail Tr. Fax: (90) (881) 12036. Cables: Boutros – Iskenderun. After Hours Contacts: Mr. Ferit Uyar, telephone (90) (881) 12893. Mr. Taner Carpar, telephone (90) (881) 13846.

Office hours during which Master can contact Agent on VHF Channel 16: 0830 – 1230 and 1430 – 1830 every day (including Saturday/Sunday/holidays during which one person on duty).

Telephone contact possible through Iskenderun Radio, VHF Channel 16.

HEREKE: 40.42 N. 29.37 E.

DOCUMENTS: 5 Crew Lists, 2 Stores Lists, 2 Crew Declarations, 4 Cargo Manifests, 2 copies Bills of Lading, 2 Stowage Plans, Clearance from Last Turkish Port, Bill of Health, 2 Lists of Money in Ship's Safe, Tonnage Certificate, Safety Equipment Certificate, Safety Radio Certificate, Safety Construction Certificate, Load Line Certificate, Derat Certificate.
PILOTAGE: Compulsory pilotage from Darica to Hereke and vice-versa; also for berthing and unberthing. (For all movements in Izmit Gulf Pilot is compulsory).

Vessels proceeding to Hereke port have to take Pilot when entering Izmit Gulf at Darica pilot station, located:

Approx. Lat. 40° 45′ 18″ N., Long. 29° 23′ 18″ E.
ANCHORAGES: Anchoring places at Izmit Gulf are as follows:
For Dry Cargo Vessels:

Darica/Eskihisar Anchorage: Approx. Lat. 40° 46′ 05″ N., Long. 29° 32′ 10″ E.

Izmit Anchorage: Approx. Lat. 40° 44′ 00″ N., Long. 29° 52′ 48″ E.
For Tankers:

Yarimca Anchorage: Approx. Lat. 40° 44′ 50″ N., Long. 29′ 44′ 30″ E.
RESTRICTIONS: Berthing at jetties at night time is at Pilot's discretion.
MAX. SIZE: No restrictions if vessel suitable to load/unload at Hereke berth where jetty length 140 m. and depth varying between 7.70 m. and 11.35 m.
HEALTH: For vessels proceeding to Hereke Free Pratique obtained at Canakkale-Dardanelles or at Buyukdere/Bosphorus. Crew List and Derat Certificate required.
RADIO: Istanbul Radio Station. Call sign TAH.
VHF: Available only at Darica and Yarimca pilot stations, Channel 16.
TUGS: Compulsory towage for berthing and unberthing. The following number of tugs must be used during operations in Izmit Gulf:

500 to 5,000 g.r.t. – 1 tug
5,000 to 25,000 g.r.t. – 2 tugs
25,000 to 50,000 g.r.t. – 3 tugs
over 50,000 g.r.t. – 4 tugs

BERTHING: Only one jetty available at Hereke which belongs to NUH Cement Factory where only one vessel can berth at a time.
CRANES: No shore cranes available on jetty.
BULK CARGO FACILITIES: As pier belongs to cement factory only cement cargo loaded. For bulk cement loading rate is 3,000/4,000 tonnes per day. 24 hours continuous work.
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: Private.
MEDICAL: Hospital and dental facilities are available at Izmit approx. 30 km. from Hereke.
TANKERS: No tanker facilities.
DENSITY: 1020-1022.
FRESH WATER: Available by barge and small quantities available from the jetty.
FUEL: Not available at Hereke, can be supplied by barge or coaster from Istanbul.
FIRE PRECAUTIONS: None.
CONSULS: None.
REPAIRS: No repair facilities.
DRY DOCKS: None.
SURVEYORS: (1) Cargo Inspectors available at Istanbul.
(2) Surveyors available at Istanbul.

Cargo Inspectors and Surveyors can be ordered from Istanbul to attend vessels at Hereke.
GANGWAY/DECK WATCHMEN: Not necessary. Ship's gangway used.
HATCHES: Opening/Closing hatches carried out by the crew.
CUSTOMS ALLOWANCES: Tobacco: 1 carton of cigarettes per week, each man. Spirits: 1 bottle of spirits per week, each man.
CARGO GEAR: Load/discharge effected by ship's gear as no cranes available on the jetty.
REPATRIATION: Main embarkation/disembarkation Customs and Immigration formalities done at Istanbul but permission/formalities also required from Izmit Immigration and Izmit/Derince Customs to assist repatriations.
AIRPORT: Nearest airport at Istanbul, approx. 100 km. from Hereke.
TIME: Local time GMT plus 3 hours.
HOLIDAYS: New Year's Day, Sugar Bayram for 3 days, Kurban Bayram for 4 days (both religious holidays and dates are changeable every year), 23rd April, 19th May, 30th August, 29th October are National Holidays. Saturdays and Sundays official holidays.
POLICE/AMBULANCE/FIRE: Police: 211-10945, Ambulance: 211-11030, Fire: 211-00.
EMERGENCY CO-ORDINATION CENTRE: Police Headquarters: 211-10945.
TELEPHONES: No arrangements exist.
SERVICES: None.
BANKS: Only local banks.
STORING: See "Prelims".

1. Vessel can be stored by barge and truck.
2. Vessels can be stored by barges during loading or discharging.
3. Trucks can proceed alongside at berth.
4. Fork lift trucks not available.
5. Customs formalities required for storing, Agent assists.

SHORE LEAVE: Crew members allowed ashore, no shore pass required.
IDENTIFICATION CARDS: Seaman's book is sufficient.
REGULATIONS: Nil. No visitors allowed aboard without permission.
DELAYS: No delays expected.
AUTHORITY: NUH Cement Factory of Hereke. *Tel:* 2161-1052, 2161-1053. *Telex:* 33227. *Cables:* Nuh-Hereke.

HOPA: 41.28 N. 41.27 E. (See Plan)

DOCUMENTS:

Quarantine:
- Declaration of Health.
- Valid Derat Certificate.
- International Vaccination Certificates.
- Free Pratique (received from Canakkale or Istanbul).

Customs:
- 2 Crew Lists.
- 2 Crew Declarations.
- 2 Stores Lists, including bonded store.
- 2 Cargo Manifests.
- 2 Customs Clearance from last port.

Immigration:
- 2 Crew Lists.
- 2 Passenger Lists.

PILOTAGE: Compulsory for vessels berthing and unberthing.
2 Pilots available, ordered by Agent on basis of Master's ETA.
International code signals used to call Pilot, who boards at harbour entrance. Vessel may enter and leave at any hour on request.

ANCHORAGES: In the outer harbour, off the entrance.

HEALTH: Pratique granted after Sanitary Officer's visit on vessel's arrival.

RADIO: Hopa Radio. Call sign TAB-2. (41° 23′ 50″ N., 41° 25′ 19″ E.)

TUGS: 2 tugs of 900 h.p. and 1 mooring boat available.

BERTHING: 1,146 m. of berthing space.

Name of Quay	*Length* (m.)	*Depth* (m.)
Yolcu Rihtimi	198	9.3
Yuk Rihtimi	100	10.0
Genel Yuk Rihtimi	190	10.0
Ro/Ro Rihtimi	38	6.0
Cevher Rihtimi	215	9.0
Askeri Rihtimi	100	5.5
Motor Rihtimi	185	4.0
Balikci Rihtimi	120	4.0

CRANES: 4 shore cranes on rail and 1 fixed shore crane available. Capacity from 5 tonnes to 25 tonnes.

STEVEDORES: Gangs of stevedores secured by the Agent through the port monopoly 24 hours prior to arrival. Working hours 0800 – 1200 and 1300 – 1700. Overtime can be arranged.

MEDICAL: A Doctor and hospital facilities are available.

DENSITY: 1024.

FRESH WATER: Fresh water available at all berths, order through Agent. Rate 60 t.p.h. (approx.).

CONSULS: None.

REPAIRS: Small repairs possible.

DRY DOCK: None.

GANGWAY/DECK WATCHMEN: Recommended.

SURVEYORS: Available from Istanbul. Order through Agent.

HATCHES: Opening/closing hatches to be carried out by ship's crew.

REPATRIATION: All facilities available for crew changes and repatriation.

AIRPORT: At Trabzon. Approximately 185 km. from the port.

HOLIDAY: New Year's Day; Seker Bayrami (3 days), Kurban Bayrami (4 days), (Both are religious holidays and dates are changeable every year). 23rd April, 19th May and 29th October are National Holidays. Saturday and Sunday are official holidays.

POLICE/AMBULANCE/FIRE: Police Tel: 1624. Ambulance Tel: 1068. Fire Tel: 3625.

BANKS: Ziraat Bankasi, Is Bankasi, Ak Bank, Halk Bank.

SHORE LEAVE: Crew members allowed ashore.

GARBAGE: Trucks will remove garbage from vessel at berth on request.

IDENTIFICATION CARDS: Required.

AUTHORITY: T.D.I. (Turkiye Denizcilik Isletmeleri), Liman Isletmesi Mudurlugu, Hopa, Turkey. *Tel:* 1347, 2259, 3638. *Telex:* 83338. *Contact:* Emin Ali Yilmaz, Director of Port. Dursun Seheri, Assistant to Director. Nedim Kurum, Harbour Master. Tel: 1067. Telex: 83359.

ISDEMIR: 36.43 N. 36.11 E. (See Plan)

LOCATION: The port is located inside the Western Breakwater within Lat. 36° 43′ 30″ N., Long. 36° 11′ 06″ E. and the South Breakwater within Lat. 36° 43′ 35″ N., Long. 36° 11′ 15″ E.

DOCUMENTS: Same as other Turkish ports.

PILOTAGE: Compulsory for all foreign vessels. Pilot available 24 hours. Pilot boards 0.5 miles to 2.0 miles from the main breakwater. Call on channel 16, working on channel 12.

ANCHORAGES: Safe anchorage south of a line due west of the south breakwater light (green light) and at least one mile from the breakwater.

RESTRICTION: Large vessels (over 15,000 g.r.t.) and tankers are not allowed to enter during hours of darkness.

MAX. SIZE: No limitation at the anchorage.

	Max. Length (m)	*Max. Draft* (m)	*Max. DWT.*
Pier AI	500	16.0	150,000*
Pier AB	240	11.0	40,000
Pier EF	185	9.0	
Pier FG	90	5.5	
Pier CD	220	7.8	
Pier DE	200	9.5	
Fuel Wharf		13.0	

*Max. air draft 15.0 m.

HEALTH: See "Iskenderun".

RADIO: See "Iskenderun".

VHF: Channel 16, working Channel 12.

TUGS: 5 tugs available, 2×2,480 h.p., 1×1,200 h.p. and 2×125 h.p. Tug compulsory for vessels over 500 g.r.t.
1 Tug for over 500 to 4,000 g.r.t. vessels.
2 Tugs for over 4,001 to 15,000 g.r.t. vessels.
At least 3 tugs for vessels over 15,000 g.r.t. The third. tug is provided from Botas or Iskenderun Port. A third tug is to be available in the near future.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Cranes Capacity* tons	*Remarks*
1–A	500	14.0–18.5	2×25	2,000 t.p.h. (ore) 1,250 t.p.h. (coal)
A–B	270	12.0	5×15	400 t.p.h. (ore) 300 t.p.h. (coal)
C–D	260	8.0	2×10	General cargo
D–E	200	10.0	1×140	General cargo Heavy Lift crane
E–F	190	10.0	1×10	General cargo
F–G	120	6.0	1×10	General cargo

CARGO HANDLING EQUIPMENT:
4 electric cranes × 10 tons.
5 kangaroo cranes × 15 tons (300 t.p.h. each)
2 portal cranes × 25 tons.
1 fixed heavy lift crane × 140 tons (On pier "DE").
2 conveyor belts × 1,000 t.p.h. each.
Owned by steelworks:
Forklifts – 6 (2×7.5 tons, 4×4 tons).
Pallet Cranes – 6 (1×100 tons, 2×60 tons, 1×25 tons, 2×20 tons).
Load Cranes – 4 (1×90 tons, 2×16 tons, 1×6 tons).
Lo-Boy Trailers – 4 (1×120 tons, 1×60 tons, 2×40 tons).

STEVEDORES Available 24 hours. Written ETA advices to the Port Management required 8 hours before berthing.

Handling Rates:	*Tons per 24 hours*
Pig Iron	1,500
Iron Ore	20,000
Pipes	800 – 1,000
Timber	4,000
Coal	16,000
General Cargo	800 – 1,000
Wheat	1,500
Sugar	100
Rice	600
Cement	1,500
Fertiliser	1,500
Fuel-oil	3,500 – 5,000

TANKERS: Facilities owned by the Port. 8×5,000 ton capacity fuel and oil tanks. Depth alongside 14.0 m. Discharge rate for fuel and oil (1×10 in.) 350 t.p.h. – 400 t.p.h. Benzol (1×6 in.). Handling rate 70 t.p.h. – 80 t.p.h. Distance between dolphins 106 m.

FRESH WATER: Water tank available, but no potable water.

REPAIRS: No facilities.

DRY DOCKS: None.

SHIPMASTER'S REPORT: June 1981.

Location: 8 miles North of Iskenderun.

Pilotage: Pilotage is compulsory, but we arrived and sailed without Pilot. Permission must first be obtained via VHF Channel 16 through Iskenderun, usually the Agents. On no account must vessels enter and leave without permission.

Anchorages: Good holding ground inside breakwaters, protected from all directions except Southwesterly swell. Permission must first be obtained before anchoring inside.

Navigation: Good navigational entrance marks. No difficulties encountered on entering or leaving, plenty of water.

Tugs: Not available.

Berthing: Longest wharf appears to be "D", which at present is being extended (see "Plan"), the smallest being "C". All wharves appear to have plenty of water, (see "Plan"). All wharves have good access, wharves B, C and D being serviced with rail. Berth "A" has a heavy lift crane of 100 tonnes, no rail. Berth "D" has a conveyor for bulk cargoes. Most cargo being discharged into road transport.
Cargo Handling: Wharf "D" Bulk, "B" and "C" general cargo, Wharf "A" heavy lifts.

Cranes:

Wharf A – 1 × 100 tonnes for heavy lifts
B – 2 × 10 tonnes
C – 2 × 10 tonnes
D – 4 × 10 tonnes

Small mobile cranes also available.

Stevedores: Working hours – 24 hours continuous. Shifts change at 1600 hrs. Meal breaks at 1200 hrs. – 1300 hrs., 1700 – 1800 hrs. and 2000 – 2100 hrs.

Rate of discharge good, labour force good. Majority of port handling equipment is new, cranes, rail, etc. No warehousing available.

Fresh Water: Fresh water obtained by road tanker only, in quantities of 40 tonnes. Usually supplied at night as they supply the steel town during the day.

Fuel: No facilities observed.

Medical: Facilities at Iskenderun.

Consuls: At Iskenderun.

Repairs: No facilities observed.

General: Communications: Rail and road to Iskenderun, no local airfield. All instructions and information available through Iskenderun on VHF Channel 16, calling "Demicargo" which is local control, usually operating 0900 hrs. to 1700 hrs. and available only during working hours (Not meal hours).

Tonnage Handled: By observation only, it appears that relatively large vessels can be handled at the iron ore berth, up to 30,000 tonnes. A new berth is under construction (see "Plan") which will be able to handle vessels up to 100,000 tonnes. Other berths are for smaller vessels (A, B and C), the largest being "B".

Principal activities, steel, iron ores, general cargo.

Services: Tank cleaning services and ship chandlers available from Iskenderun.

SHIPMASTER'S REPORT: October 1986.

Clearance Inward: Vessel ordered to Iskenderun, anchored on arrival, cleared inward. All certificates and Seaman's I.D. Cards landed. Shore passes issued. 7 copies of Crew List required.

Radio: Istanbul for long distance messages. Iskenderun for messages when close by, port has VHF but uncertain if international connections possible.

Iskenderun Pilot has VHF Channel 16, opening watch at 0630 hrs.

Most Agents appear to be on VHF in office hours.

Fuel: Available with appropriate arrangements.

Isdemir: Vessels shifted up to wait for Pilot off Harbour Entrance on instructions of Agency. Pilotage available from 0830 hrs., VHF Channel 12. Tug channel monitored, 2 tugs on station, a third can be ordered.

The port imports coal and iron ore for the steel mill, using the newly completed portal grab cranes on Berth A-I. Berths A-B, C-D, E-F appear to be mainly used for exports of steel bars, coils, steel rods, pig iron, some coal and other minerals. Berth D-E mostly used for import of grain for direct delivery into lorries, and yard cargo for import or transhipment overland.

Working Hours: (3×8 hours) 0800, 1600, 2400 hrs. Though tally clerks may work (2×12 hours) 0800, 2000 hrs.

Vessel loaded 27,000 tonnes steel bars in 21 days after waiting 13 days for berth, with one shift to a deeper berth across harbour with tugs.

Facilities: Industrial grade or non-potable water piped to a few points in the harbour. Drinking water supplied in road tankers (ship's hose used). Agencies, communications, medical, ship chandlers, etc., all in Iskenderun. Agency charged by tariff for all services, rather than by the amount of work done.

International telephone system appears limited, and congestion occured soon after 0900 hrs. Agency telex machines only domestic models, head office relayed international messages.

Provisions, especially vegetables, limited choice in hot weather. No bonded stores, only duty paid beer, etc. available. Ship chandlers required Owners approve the cost of the order before arranging supply, also that only one delivery be made owing to the high costs involved. Bill made out in U.S. dollars.

The public highway is a walk of 1.5 hours in very hot weather, before taxis or mini buses can be obtained. The bus system at shift change time, with a transfer at the factory bus terminal was useful and economical. There are some small general stores in the 'Fabrik Town' about 1 hour's walk. Hourly bus service to Iskenderun until early evening.

Clearance Outward: Vessel returned to Iskenderun on a Sunday for outward clearance, where the certificates and Seaman's I.D. Cards were returned. It is possible to sometimes arrange clearance at Isdemir on weekdays.

AUTHORITY: Iskenderun Demir Ve Celik Fabrikalari, Directorate of Iskenderun Iron and Steel Plants, Isdemir, Turkey. *Tel:* 11164 General Manager, 13894 Asst. General Manager. *Telex:* 68696, 68697 Isde Tr. *FAX:* 9-881-13895. *Cables:* Isdemir-Iskenderun *Contact:* Mehmet Yardimci, – Port Manager Tel.: 13600/3580. Ziya Kural – Trade Manager, Tel. 13600.

ISKENDERUN: 36.35 N. 36.10 E. (See Plan)

DOCUMENTS:

7 Crew Lists.
2 Stores Lists.
7 Passenger Lists.
2 copies Crew Declaration.
2 copies Transit Cargo Manifest.
3 copies Inward Cargo Manifest, of which one must be legalised by Turkish Consulate at loading port. If no consulate existing same to be certified by local Customs Officer or Chamber of Commerce.
1 set Bills of Lading.
2 copies Cargo Stowage Plans.
Health Documents.
Ship's Certificates.

PILOTAGE: Compulsory. Ordered by Agent on basis of Master's ETA. International Code signals used to call Pilot who boards at harbour entrance. 2 pilot boats available.

ANCHORAGES: Safe anchorage in open roadstead at 0.5 to 0.75 miles from shore. Vessels over 30,000 d.w.t. work cargo at anchorage only. Loading/discharging to lighters only occurs in the case of explosive cargo.

MAX. SIZE: At anchorage, no limitations. Alongside pier, length 180 m., draft up to 30 ft. Also see "Tankers".

HEALTH: Pratique obtained on arrival. Master required to show vessel's Health Declaration and Certificate of Registry. Crew Vaccination Certificates to be produced if required. Sanitary Certificate required if live animals on board.

RADIO: Istanbul Radio, call sign TAH. Izmir Radio, call sign TAN. Iskenderun Radio, call sign TAI.

TUGS: 7 tugs available 300 h.p. – 2,800 h.p.

BERTHING:

Berth	Length (m.)	Depth (m.)	Remarks
No. 1	170	10.0	Container berth to be lengthened by 30 m. by 1989.
No. 2	170	10.0	General Cargo
Nos. 3 & 4	353	10.0	General Cargo
No. 5	185	10.0	Presently 137 m., Depth 5.0 m.
No. 6	200	10.0	
No. 7	—	—	Ro-Ro
No. 8	200	10.0	Completion 1988.
No. 9	166	11.5	Bulk and General
No. 10	166	11.5	Bulk and General
No. 11	200	10.0	Completion 1988.

Due to shelving depths, vessels of 20,000 to 30,000 d.w.t. berth partly alongside and lighten cargo then shift once or twice further in.

The T.M.O. have a silo of 60,000 tons capacity which can deliver up to 300 t.p.h. Loading capacity of ore, 500 t.p.h. Unloading capacity for coal, 100 t.p.h.

Inner Port, used only by pontoons, lighters and tugs.

Priority given to Army, food relief and passenger ships.

CRANES: 57 shore cranes with capacity 3 tonnes – 35 tonnes. 1 floating crane with capacity 90 tonnes.

STEVEDORES: 2 consecutive shifts of 8 hours. For bulk cargoes, 3 consecutive shifts of 8 hours can be worked. At anchor, approximately 100 tons can be handled each shift, for general cargo. Baled cargo, 125 tons per shift. Bagged cargo, 150 tons per shift.

Gangs secured by Agent through the Port Monopoly, 24 hours prior arrival.

MEDICAL: Master to inform Agent by cable if urgent medical assistance required on arrival, also indicating, if possible, seriousness of case in order to take adequate steps.

TANKERS: Two buoy mooring berths operated by Mobil Oil, Shell Oil and Petrol Ofisi, suitable for vessels up to 50,000 d.w.t. depth 12.10 m. Stern line connection required except at Mobil Oil Terminal. No slop reception facilities.

Also see "Golovasi".

FRESH WATER: Supplied only by barge, 2 available, each of 250 tons capacity.

FUEL: Available locally from Baytur Trading S.A., Telex: 68068 AUTT TR/68022 AUIS TR. Tel: (881) 14400/18958/11104. Fax: (881) 15737; Iskenderun, Turkey.

With 48 hours notice Petrol Ofisi can supply Marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 BUNK TR. Tel: (1) 338 25 09 / 337 36 86 / 337 88 31 / 336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

GANGWAY/DECK WATCHMEN: Services of watchmen recommended. 3 shifts of 8 hours each. Extra tariff for Sundays and holidays.

OPENING/CLOSING HATCHES: May be opened/closed by ship's crew. May be performed by stevedores at tariff rates.

CUSTOMS ALLOWANCES: 50 cigarettes for each man going ashore. On board the vessel each man may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.

IDENTIFICATION CARDS: Seamen's Book is sufficient. For repatriation and joining vessels, passport compulsory.

CONSULS: Vice-consulates of France, Germany F.R., Greece, Italy, Netherlands, Norway, Sweden and U.K.

REPAIRS: Welding and other minor types of repairs are possible.

REPATRIATION: Can be arranged but passport compulsory.

AIRPORT: Adana Airport, served by airlines with routes to Beirut, Jeddah, Ankara and Istanbul. Airport situated 140 km. from Iskenderun. Twice daily service to international airport at Istanbul.

POLICE/AMBULANCE/FIRE: Police 11007; Ambulance 11057; Fire 11000.

TIME: GMT plus 2 hours in Winter. GMT plus 3 hours in Summer.

HOLIDAYS: New Year's Day (commencing 1200 hrs. Dec. 31st); National Sovereignty Day (April 23rd); Sports Day (May 19th); Victory Day (August 30th); October 29th; Sheker Bayram (3 days, movable); Kurban Bayram (4 days, movable).

Iskenderun Port is not working only 1 day during Sheker Bayram and 2 days during Kurban Bayram, during all other days work carried out.

SHIPMASTER'S REPORT: Customs and Health Clearance is performed both at anchor and at the berth. Vessels should anchor about 0.5 miles North of the landing stage in the main part of the town. All Officials and Agents arrive by boat and when clearance is given the Pilot comes out. For vessels with cargo for the chemical works at Sariseki (3.5 miles North of the main port), the procedure is the same except that a Pilot is not required.

Customs, Immigration, and Health Officials require 4 Crew Lists on arrival. The Agent will require 2 more Crew Lists prior to the vessel's departure for clearance with the Harbour Master.

ISTANBUL: 41.01 N. 28.59 E. (See Plan)

(A) ISTANBUL (EUROPE)
(B) HAYDARPASA (ASIA)

(A) *ISTANBUL (EUROPE)*

DOCUMENTS: *Vessels bound for Istanbul:*

5 Crew Lists.
6 Passenger Lists.
3 Stores Lists.
1 Transit Cargo Manifest.
2 Inward Manifests of all cargo onboard.
Copies of relevant Bills of Lading for Inward Manifests.
3 Lists of Money in the Ship's Safes (if there is no money on board, please issue 3 "nil" lists).
Harbour Master's Sailing Permit (which must be exchanged at each Turkish Port and kept on board).
Ship's Certificates (Derat, Ship Safety, Safety Radio, Class or Freeboard).

Transit Vessels: Master to present only Tonnage and Derat Certificates during Sanitary Control at both Straits (Canakkale and Buyukdere).

PILOTAGE: For both vessels bound for Istanbul and transit vessels, Pilot secured by the Agent through the Port Monopoly Administration. Master to wire ETA notices 48 and 24 hours prior to arrival. ETAs must be confirmed or corrected not less than 2 hours prior to ETA. Pilot boarding vessel, using service boat hoisting red and white flag, off Haydarpasa and Sarayburnu (entrance from Marmara Sea) or off Kavak (entrance from Black Sea). Pilotage for entering and berthing in harbour areas is compulsory. Pilotage through Bosphorus is optional. All Pilots can be contacted by VHF Channel 16.

Also see "Shipmaster's Report".

ANCHORAGES: Free and safe anchorage in roads off Marmara coast approach to Istanbul. It is however recommended to anchor as near as possible to the harbour. Anchoring at other anchorage areas is subject to special permission via Harbour Master. Good anchorage off Haydarpasa and off Yenikapi, Ahirkapi for large vessels. For smaller vessels there is a good anchorage between Dolmabahce and Kurucesme.

RESTRICTIONS: Ships carrying hazardous cargoes (flammable, explosives, corrosives, etc.) are not allowed to enter the harbours. Ships can anchor in roads outside the harbour at any time without Pilot. Ships to operate upon arrival at night can enter the harbours with Pilot and with special permission through the Port Monopoly Administration. 48 hours' notice has to be given to the Harbour Master of Istanbul for vessels calling at Istanbul and/or passing in transit through Bosphorus.

MAX. SIZE: No limitation of draft in open roadstead at anchor. Max. draft in port alongside quay: 10 m. for dry cargo ships. Tankers up to 48 ft. draft can berth at Haramidere oil port.

HEALTH: Sanitary control of both transiting and operating vessels performed at the Straits entrance (Canakkale and Buyukdere). Ships entering from South must slow down at Canakkale and ships arriving from North must slow down at Buyukdere for Sanitary Control. In case of non-performance of such control due to bad weather, Master has to inform Agent in time and have to stop and wait at South Entrance of the Bosphorus until Sanitary Control is performed otherwise heavy fine would be levied.

Also see "Shipmaster's Report".

RADIO: Wireless messages to be routed to Agent via Istanbul Radio. Call sign of Istanbul Radio Station is TAH. Frequency MW 500 kHz. Ships can also communicate with Agent by radio telephone on frequency 2182 KHz. It is recommended that ships keep watch for any radio telephone call by Agent detailing any berthing and operation arrangement.

TUGS: Arranged by Agent. Vessels of 1,500 g.r.t. and over berthing at the quays or mooring to the buoys are compelled to take the services of at least one tug and vessels of 5,000 g.r.t. and over require at least two tugs. Charged per hour or fraction of each operation.

21 tugs ranging from 110 hp to 2,500 hp are available.

BERTHING: Priority to food and passenger ships. If no berth available then ships to wait for turn in roads at anchor.

Turkish Maritime Corporation Facilities:

Wharves:	*Length* (m.)	*Depth of Water* (m.)
Karakoy (ex Galata) exclusively for passenger vessels	520	7 – 10
Salipazari for cargo handling	600	10
Sarayburnu for passenger handling	240	6
Camialti and Haskoy (Golden Horn)	68	3 – 4
Kurucesme for coal handling	370	10

Equipment:

Electric Cranes along the quays:
  2 of 5 tons
  7 of 3 tons
  3 of 4 tons (coal transporter)
Rubber wheeled mobile cranes:
  1 of 25 tons
  7 of 10 tons
  8 of 5 tons
  5 of 3.5 tons
Floating Cranes: 5 tons – 60 tons.

BULK HANDLING: See "Section B" – Haydarpasa.

TANKERS: The oil port called Haramidere is a small bay open to Southern winds and 60 km. distant from Istanbul in the Sea of Marmara. There are buoys and an oil pumping platform in this bay. Tankers can berth by dropping 2 anchors and mooring by stern at these buoys or at platform. Average sea depth is 48 ft.

Ambarli: Position Lat. 40° 58′ N., Long. 28° 42′ E. Max. size 250,000 d.w.t. Vessels moor by the stern to a dolphin platform (offshore).

BRIDGES: There are 2 bridges: Galata Bridge is between Eminonu and Karakoy: Ataturk Bridge is between Unkapani and Azapkapi. Both bridges are opened in the morning for vessels entering the Inner Harbour (Golden Horn). Vessels wanting to pass through the bridges have to give notice in due time to the Harbour Master of Istanbul.

STEVEDORES: Gangs of stevedores secured by the Agent through the Port Monopoly, 24 hours prior arrival. Average loading and discharging rates of about 150 – 200 tons per gang per shift depending also on the kind of goods. Discharging operations are generally performed alongside the wharves and loading operations at buoys; however, as stated above, can also be effected alongside simultaneously with discharging. Working hours: Monday to Friday 0800/1200 and 1300/1700 hrs; Saturday 0800/1200 hrs.

MEDICAL: Master to inform Agent by cable if urgent medical assistance is required upon arrival, also indicating, if possible, seriousness of case in order to take adequate steps.

DENSITY: Always variable due to strong currents, however, can be reckoned as 1015.

FRESH WATER: Supplied by barge and shore installation at the rate of 30 t.p.h. – 60 t.p.h.

FUEL: Diesel oil, gas oil and bunker fuel can be supplied by barge at transit cost, subject 48 hours' pre-advice. Fuel supplied only against advance payment in foreign exchange (dollars, sterling or Swiss francs).

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.) Telex: 29048 Bunk Tr. Tel: (1) 338 25 09 / 337 36 86 / 337 88 31 / 336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Owners or Master to decide whether this work should be undertaken by the stevedores or by the crew.

CERTIFICATES: Safety, Safety Equipment, Safety Radio, Class and Freeboard documents.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 bottle wine/spirits per crew member.

CARGO GEAR: Generally shore cranes operating. However, ship using own means when such cranes are not available. Full lights to be supplied by ship.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

REPAIRS/DRY DOCKS: At the Golden Horn are 3 graving-docks:

(1) 388 ft. length, 72 ft. width at entrance
(2) 279 ft. length, 62 ft. width at entrance
(3) 600 ft. length, 63 ft. width at entrance

At Istinye (in the Bosphorus):

1 floating dock 137.50 m. length, 21.25 m. width with 8,500 tons lifting capacity. 1 floating dock 67.82 m. length, 30.40 m. width with 5,000 tons lifting capacity. 1 floating dock 126.14 m. length, 34.0 m. width with 10,000 tons lifting capacity. In cases of necessity floating docks of 5,000 and 10,000 tons capacity can be united and be put in operation as single floating dock with 15,000 tons lifting capacity. Every kind of repair can be effected at Istinye docks.

At Fener (Golden Horn) is a dry dock for vessels up to 600 tons, and at Haskoy (Golden Horn) is a dry dock for vessels up to 176 tons. There are also some privately owned. All kinds of repairs can be effected.

SURVEYORS: American Bureau of Shipping, Bureau Veritas, Germanischer Lloyd, Lloyd's, Norske Veritas, Turkish Lloyd.

REPATRIATION: Crew exchange and repatriation is possible for citizens of Italy, Great Britain, Benelux Countries, Sweden, Norway, Germany F.R., Austria, Switzerland, France, Ireland, U.S.A., Iceland, Pakistan, Monaco, Australia, Canada, Japan, New Zealand, Spain, Cyprus, Portugal, Tunisia, Kenya, Iran, Yugoslavia, Romania, Morocco. Citizens of other states not specified above are subject to a Turkish visa.

AIRPORT: Yesilkoy Airport is an international airport with daily connection throughout world. Airport 15 km. from Istanbul.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day (Dec. 31st p.m. and January 1st); National Sovereignty (April 22nd p.m. and April 23rd); Sports and Youth Day (May 19th); Sheker Bayram (3 days) (movable); Courban Bayram (4 days) (movable); Victory Day (August 30th); Proclamation of the Republic (Oct. 28th p.m. to Oct. 30th). In the event of a holiday ending on a Friday, the Saturday that follows is considered also as a holiday in full, and normal working starts as of Monday morning 0800 hrs.

POLICE/AMBULANCE/FIRE: Fire Istanbul 521 42 22, Uskudar 333 20 30; Police 527 45 00; Ambulance Istanbul 521 15 95, Beyoglu 144 49 98, Uskudar 333 04 01.

TELEPHONES: No installation for connection facility on board.

SERVICES: Tank cleaning (gas-free service), derat, compass adjusting carried out by experts of shipyards or Turkish Maritime Lines.

SHORE LEAVE: Crew members are allowed ashore at all times.

SHIPMASTER'S REPORT: *Dardanelles and Bosphorus:* If a Pilot is required for both Dardanelles and Bosphorus, give 24 hours' notice through Istanbul Agent. Same Pilot remains on board for full transit, Sea of Marmara included, and this applies for both North and South-bound traffic. Pilots at Dardanelles and Bosphorus work VHF Channel 16.

Sanitary Control: Required at Buyukdere: Ship's Register, Derat, Crew List and certificate issued at Canakkale North-bound.

No. 17	190	5.5–6.0	General cargo

There is also a silo of 70,580 tons capacity at the harbour.
CRANES:
7 shore cranes × 5 tonnes.
19 shore cranes × 3 tonnes.
1 shore crane × 8 tonnes.
1 shore crane × 25 tonnes.
2 shore cranes × 10 tonnes
1 shore crane × 15 tonnes.
1 shore crane × 35 tonnes.
1 floating crane with capacity 250 tonnes.
STEVEDORES: 2 consecutive shifts of 8 hours each day. At anchor approximately 100 tons can be handled each shift for general cargo. Baled cargo, 125 tons per shift. Bagged cargo, 150 tons per shift.
Gangs ordered by Agent through the Port Monopoly 24 hours prior to arrival.
MEDICAL: Master to inform Agent by cable if urgent medical assistance required on arrival, also indicating, if possible, seriousness of case in order to take adequate steps.
FRESH WATER: Supplied from hydrants on the berths.
FUEL: Available.
With 48 hours notice Petrol Ofisi can supply marine fuels, see "Section A".
GANGWAY/DECK WATCHMEN: Watchmen services recommended. 3 shifts of 8 hours each.
OPENING/CLOSING HATCHES: May be opened/closed by ship's crew or by stevedores at tariff rates.
CUSTOMS ALLOWANCES: 50 cigarettes for each man going ashore. On board the vessel each man may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.
IDENTIFICATION CARDS: Seamen's Book is sufficient.
CONSULS: 42 countries have Consulates in Istanbul.
REPAIRS: Welding and other minor types of repairs are possible under the Haydarpasa Port Directorate's control.
REPATRIATION: Can be arranged.
AIRPORT: Istanbul Ataturk Airport served by international and domestic lines. Airport situated 20 km. from Haydarpasa Port.
POLICE/AMBULANCE/FIRE: Police Control Office: 144 94 03; Ambulance: 354-383 (internal phone numbers of Haydarpasa Port), 338 10 10; Fire Brigades: Haydarpasa Port: 393-354-583 (internal phone numbers of Haydarpasa Port), 163 60 20.
HOLIDAYS:
Official Holidays: New Year's Day (from December 31st at 1200 hrs. and January 1st); National Sovereignty Day (April 23rd); Youth and Sports Day (May 19th); Seker Bayram (3.5 days), movable; Kurban Bayram (4.5 days), movable; Victory Day (August 30th); Proclamation of the Republic (from October 28th at 1200 hrs. to October 29th).

SHIPMASTER'S REPORT: Customs and Health Clearance is performed at anchoring areas Kumkapi (if coming from Marmara Sea) and Buyukdere (if coming from Black Sea). All officials and agents arrive by boat and when clearance is given, the Pilot comes out. For vessels with cargo for the chemical works at Meda (2 miles S.S.E. of the main port) the procedure is the same except that a pilot is not required.

AUTHORITY: Turkiye Cumhuriyeti Devlet Demiryollari Isletmesi Genel Mudurlugu – Talatpasa Bulvari, Ankara, Turkey. *Telex:* 42571.
TCDD Liman Isletmesi Mudurlugu Haydarpasa, Istanbul, Turkey. *Tel:* 337-06-83.

AGENT: Gulf Agency Co. Ltd., P.O.Box 1230, Karakoy, Istanbul 80008, Turkey. Tel: 1529878. After hours 1455744. Telex 24894 ("Tim Tr") and 25517 ("Mayu Tr"). Cables: "Gacshipping" – Istanbul.

IZMIR: 38.25 N. 27.09 E.

DOCUMENTS:
6 Crew Lists.
4 Passenger Lists.
2 Manifests of Transit Cargo.
3 Manifests of Inward Cargo, 1 of which must be legalised before arrival by Turkish Consulate at loading port.
1 set Bills of Lading.
1 set Cargo Stowage Plans.
2 Stores Lists.
Health Documents.
Ship's Certificates.

N.B. Ship's particulars form is to be filled in by Masters upon arrival at Izmir, and remitted to the Port Authorities.
PILOTAGE: Vessels are permitted to arrive and sail from Izmir by day and night. After entering the Gulf of Izmir, Masters who are not familiar with the waters, require a Pilot at Pelican Spit. The pilotage from Pelican Spit to Izmir is not compulsory and Masters must notify their Agents at least 12 hours in advance giving their ETA at Pelican Spit and ask for a Pilot.
Pilot can be contacted on VHF Channel 16.
ANCHORAGE: In the Outer Harbour, 300 m. outside Old Port breakwater, ample space for vessels to anchor. Cargo operations cannot be performed at anchor unless vessels have red label cargoes aboard for Izmir or in transit.
RESTRICTIONS: Docking of ships at the old port is not permitted during night, but ships can sail any time during night. At the new port, docking is permitted during night (weather permitting) also ships can sail any time during night. There are no tides at Izmir.
MAX. SIZE: Vessels of any size with a max. of 38 ft. draft can operate at Izmir. There is a pipe-line for oil-carriers in the Gulf of Izmir where tankers with a max. draft of 33 ft. can operate.
In Old Port, length restricted to 165 m., max. draft 8 m.
HEALTH: Vessels to show their Sanitary Certificate – if available aboard – also their Registry. Presentation also of Vaccination Certificate of all the crew, if required by sanitary officials. Pratique is necessary on arrival even if the vessel has called at another port in the same country. Sanitary Certificate is required for live animals aboard. If quarantine (fumigation) of the vessel is necessary, very considerable time is lost, and expense incurred because vessel must proceed to Fumigation Station at Klazomene, located at about 20 miles from Izmir (in the Gulf of Izmir) where fumigation can be effected and bad cases hospitalised.
RADIO: Izmir Radio Station, call sign TAN. Istanbul Radio Station: call letters TAH.
TUGS: Tugs are compulsory for vessels of more than 2,000 g.r.t. At Harbour Master's estimation, 2 tugs will be used for vessels over 4,000 g.r.t. in case of bad weather. Dues will be collected for each tug.
2×800 h.p. and 1×2,500 h.p. tugs available.
BERTHING: *Old Port:* Location Lat. 38° 25′ N. Long. 27° 10′ E. Harbour entrance to port 130 ft. wide, depth 40 ft., harbour length 1,200 m., harbour width 700 m. (Pilots boards 0.25 mile off entrance).
Precautions to be taken against N.E. and South winds. Mooring stern to quay. Operations effected by means of lighters. Altogether 8 vessels can berth in Inner Harbour with a draft of 24 ft. to 30 ft.
Alsancak: Located at a distance of about 2 miles from the old port. Depth alongside berths 22 ft to 38 ft. Pilot's board vessels outside breakwater old port. Presently 12 cargo vessels of various sizes (mainly medium and small sizes) otherwise 9 to 10 large vessels can operate at the new port. There is also a berth for 2 large passenger vessels or 3 small size vessels. 95,000 sq.m. of open storage and 24,000 sq.m. of sheltered storage available. Storage for 2,000 TEUs within port area.
CRANES: 48 mobile cranes (5 – 35 tons). 1×50 ton and 1 × 200 ton floating cranes available when required.
BULK HANDLING FACILITIES: Grain silo has capacity 40,000 tons. The conveyor can deliver between 2,500 and 3,000 tons in 24 hours.
Bulk ore loaded by grabs. Daily loading capacity per shift of 8 hours is between 750 to 1,000 tons.

STEVEDORES: Straight time 0800 – 1200, 1300 – 1700 hrs. Overtime Saturdays, Sundays and public holidays 0800 – 1700 hrs., otherwise 1800 – 0200 hrs. Overtime charges 50% increase on S.T. charges.

For overtime discharging operations at the new port, handling charges (overtime) from ship's tackle to the Custom's warehouse, are for account of the ship.

9 men per gang aboard (6 labourers, 2 winchmen, 1 hatch tender) 3 lightermen or men on the dock.

Extra men used to reinforce regular gangs and in hatches congested with cargo for discharge secures a quick despatch.

MEDICAL: Advance notice optional. There is a local English-speaking doctor for service on board vessels.

Hospitals: U.S. Military Hospital, French Hospital, Government Hospital (Memleket). Doctors available to board ships or patient to proceed to their clinics.

U.S. Military Hospital for emergency cases only.

TANKERS: Izmir is a discharge port for tankers. Socony Mobil Oil receives petroleum products in bulk through a pipe-line at a distance of about 1 mile from their shore installations. Depth at the end of the pipe-line is 33 ft. The pipe-line is of 12 in. and the pumping is effected through a flexible hose of 10 in. at an average of about 450/500 t.p.h.

British Petroleum receives petroleum products at jetty where the tankers berth stern to with a max. draft of 23 ft. Pumping is effected by the vessel from her stern with a 6 in. flexible hose.

Petrol Ofisi receives petroleum products at their jetty. Vessels berthed stern to with a draft of 17 ft. Same procedure for pumping as for British Petroleum. The above three installations are located in the Gulf of Izmir opposite the new port of Alsancak.

FRESH WATER: Fresh water is available for drinking. The water is given both from dock or by barge. Water is supplied by Port Monopoly. Delivery at the dock about 20 t.p.h. By barge about 40 t.p.h.

Two barges each of 200 tons capacity available.

FUEL: All kinds of fuel available subject to 24 hours' advance notice. Fuel supplied only against advance payment in free foreign exchange direct to Agent of the vessel.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

GANGWAY/DECK WATCHMEN: Services of watchmen recommended. Three shifts of 8 hours per day.

OPENING/CLOSING HATCHES: This work can be carried out by crew. If carried out by stevedores the cost is charged to vessel.

CERTIFICATES:

Derat Certificate.
Registry.
Vaccination Certificates (if required).
Health Certificate.

CUSTOMS ALLOWANCES: 50 cigarettes for each member of the crew going ashore. Aboard the vessel each member of the crew is permitted to have one carton out of Bond. Wine and/or spirits: 1 litre for each member of the crew in an open bottle is permitted out of Bond. However, this allowance is to be kept aboard the vessel.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

CONSULS:

Belgian Consulate (Honorary)	tel. 218847
Danish Consulate (Honorary)	" 124018
Finland Consulate (Honorary)	" 214782

U.S. Consul General	" 217204

REPAIRS: Ship's repair shops available: Denizcilik Bankasi (Turkish State-owned). Deck and engine repairs are possible.

DRY DOCKS: Floating dock, capacity 7,000 d.w.t.

REPATRIATION: All facilities available for crew changes and arranging necessary repatriation.

AIRPORT: Airport from dock – distance 30 kilometres. Airport is served by Turkish Airlines with 5 flights per day (local flights in connection with Istanbul International flights). Also 2 direct flights per week to Europe.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day (from December 31st 1200 hrs. to January 1st, 2400 hrs.); National Sovereignty Day (from 22nd April, 1200 hrs. to April 23rd, 2400 hrs.); Spring Day (May 1st); Constitution Day (May 27th); Sports Day (May 19th); Victory Day (August 30th); National Holiday (October 28th, 1200 hrs. to October 30th, 2400 hrs.); Sheker Bayram (3 days) movable; Kurban Bayram (4 days) movable.

On these days offices are closed. Work in port is allowed by paying 75% overtime to the S.T. wages. The overtime for the National Holiday (Oct. 29th) is paid 100% on the total regular overtime, which makes 300%. On the first days of Sheker and Kurban Bayram work aboard is not carried out.

POLICE/AMBULANCE/FIRE: Police, tel. 255460; Ambulance, tel. 252405; Fire, tel. 00.

TELEPHONES: It is possible to place telephones aboard vessels at the new port of Alsancak.

SHORE LEAVE: Crew members are allowed to go ashore with landing card.

REGULATIONS: Berths at the new port of Alsancak are obtained on basis of the time and date of arrival of each vessel. If the port is congested, vessels wait for their turn at anchor.

DELAYS: During the active export season, some delays occur varying 1 or 2 days.

DEVELOPMENTS: New port of Alsancak to be extended during the next 2 years by the construction of a breakwater, docks, warehouses totalling a berthing capacity of additional 2 to 3 vessels, especially container vessels. 2 container cranes ordered.

AUTHORITY: Denizcilik Bankasi TAO.

AGENT: Gulf Agency Co. Ltd., P.O.Box 857, Izmir. Tel. 217270, 217287. Telex 52371. Cables: "Gacship" Izmir.

IZMIT: 40.46 N. 30.00 E.

DOCUMENTS: 5 Crew Lists, 2 Stores Lists, 2 Crew Declarations, 4 Cargo Manifests, 2 copies Bills of Lading, 2 Stowage Plans, Clearance from Last Turkish Port, Bill of Health, 2 Lists of Money in Ship's Safe, Tonnage Certificate, Safety Equipment Certificate, Safety Radio Certificate, Safety Construction Certificate, Load Line Certificate, Derat Certificate.

PILOTAGE: Compulsory pilotage from Darica to Izmit and vice-versa, also for berthing and unberthing. (For all movements in Izmit Gulf Pilot is compulsory).

Vessels proceeding to Izmit Port have to take Pilot when entering Izmit Gulf at Darica pilot station, located:

Approx. Lat. 40° 45′ 18″ N., Long. 29° 23′ 18″ E.

ANCHORAGES: Approx. position: Lat. 40° 44′ 00″ N., Long. 29° 52′ 48″ E.

RESTRICTIONS: Berthing at jetties at night time is at Pilot's discretion.

MAX. SIZE: No restrictions for vessels loading on roads, and no special restriction if vessel suitable to load/unload at the jetty of Seka Paper Mills where jetty length 70 m., depth varying between 24 ft. and 27 ft.

HEALTH: For vessels proceeding to Izmit Free Pratique obtained at Canakkale-Dardanelles or at Buyukdere-Bosphorus. Crew List and Derat Certificate required.

RADIO: Istanbul Radio Station.

VHF: Available only at Darica and Yarimca pilot stations, Channel 16.

TUGS: Compulsory towage for berthing and unberthing. The following number of tugs must be used during operations at Izmit Gulf:

500 to 5,000 g.r.t.	– 1 tug
5,000 to 25,000 g.r.t.	– 2 tugs
25,000 to 50,000 g.r.t.	– 3 tugs
over 50,000 g.r.t.	– 4 tugs

BERTHING: Only 1 jetty available at Izmit which belongs to Seka Paper Mills where 2 ships can berth at a time to each side of the jetty.

CRANES: No shore cranes available at the jetty.

BULK CARGO FACILITIES: No bulk cargo facilities. Vessels load minerals on roads, by ship's gear, brought alongside by barges with rate of 800/1,000 tonnes per day, working hours generally from 0800 to 2000.

At the jetty of Seka Paper Mills working hours from 0800 to 1700 and 1700 to 2400. Generally paper and wood-pulp in bales discharged at a rate of 125/150 tonnes per shift per gang by ship's gear.

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Private. See also "Bulk Cargo Facilities".

MEDICAL: Hospital and dental facilities are available.

TANKERS: No tanker facilities.

DENSITY: 1020-1022.

FRESH WATER: Available by barge, and small quantities available from the jetty.

FUEL: Not available at Izmit, can be supplied by barge or coaster from Istanbul.

FIRE PRECAUTIONS: None.

CONSULS: None.

REPAIRS: No repair facilities.

DRY DOCKS: None.

SURVEYORS: Cargo Inspectors and Surveyors available from Istanbul and can be ordered to attend vessel at Izmit.

GANGWAY/DECK WATCHMEN: Not necessary. Ship's gangway used.

HATCHES: Opening/closing hatches to be carried out by the crew.

CUSTOMS ALLOWANCES: Tobacco: 1 carton of cigarettes per week, each man. Spirits: 1 bottle of spirits per week, each man.

CARGO GEAR: Load/discharge effected by ship's gear.

REPATRIATION: Main embarkation/disembarkation Customs and Immigration formalities done at Istanbul but permission/formalities also required from Izmit Customs and Immigration.

AIRPORT: Nearest airport at Istanbul, approx. 130 km. from Izmit.

TIME: Local time GMT plus 3 hours.

HOLIDAYS: New Year's Day, Sugar Bayram for 3 days, Kurban Bayram for 4 days (both religious holidays and dates are changeable every year), 23rd April, 19th May, 30th August, 29th October are National Holidays. Saturdays and Sundays official holidays.

POLICE/AMBULANCE/FIRE: Police: 211-10945, Ambulance: 211-11030, Fire: 211-00.

EMERGENCY CO-ORDINATION CENTRE: Police Headquarters: 211-10945.

TELEPHONES: No arrangements exist.

SERVICES: None.

BANKS: Only local banks.

STORING: See "Prelims".

1. Vessels can be stored by barge and truck.
2. Vessels can be stored by barges during loading or discharging.
3. Trucks can proceed alongside at berth.
4. Fork lift trucks not available.
5. Customs facilities required for storing. Agents assist.

SHORE LEAVE: Crew members allowed ashore, no shore pass required.

IDENTIFICATION CARDS: Seaman's Book is sufficient.
REGULATIONS: Nil. No visitors allowed aboard without permission.
DELAYS: No delays expected.
AUTHORITY: Izmit Seka Paper Mills. *Tel:* 211-31630. *Telex:* 33124. *FAX:* 23235, 20074.

MERSIN: 36.47 N. 34.38 E. (See Plan)

DOCUMENTS:

- 5 Crew Lists.
- 4 Passenger Lists.
- 2 Transit Cargo Manifests.
- 3 Inward Cargo Manifests, one of which must be legalised prior arrival by Turkish Consulate at loading port; if no Turkish Consulate, same to be certified by local Chamber of Commerce.
- 1 each of the Bills of Lading accompanying Manifests.
- 2 Cargo Stowage Plans.
- Health Documents.
- Ship's Certificates (Safety Equipment, Safety Radio, Class and Freeboard Documents).
- 2 Stores Lists.

PILOTAGE: Agent orders Pilot through Port Monopoly Administration. Master to cable ETA notices 48 and 24 hours prior to arrival. Pilot boards vessel with service boat hoisting red and white flag. Sound signals: 2 long and 1 short blast. Pilot boards vessel outside main breakwater. Shipmaster can use VHF station according existing international frequencies.
ANCHORAGES: Safe anchorage in open roads outside main breakwater.
RESTRICTIONS: No particular restrictions. Ships can anchor in roads outside main breakwater at any time without Pilot.

Vessels with more than 50 tons of explosives are not permitted to berth alongside.
HEALTH: Clearance is effected on arrival. Vaccination Certificates to be presented if required. If suspected disease on board radio Agents full details before arrival.
RADIO: Istanbul Radio, call sign TAH, Izmir Radio, call sign TAN, Mersin Radio TAM. Radio messages to be routed to Agent, preferably via Istanbul Radio. Port VHF service in operation.
TUGS: Tug boat compulsory for vessels over 1,000 g.r.t. charged per each operation. 6 tugs available up to 2,630 h.p.
BERTHING: Priority to Army, food relief and passenger ships. If no berth available then ships to wait for turn in roads at anchor.

BULK HANDLING FACILITIES: There is conveyor system which can deliver 600 t.p.h. from each spout. Discharging rate 100 t.p.h. from each of the 2 suckers. Silo capacity 100,000 tonnes. Max. size 23,000 d.w.t.
CRANES: 35 shore cranes, capacity 3 – 35 tonnes. 1 floating crane, capacity 60 tonnes.

3×35 ton container gantry cranes at Berths No. 9 – 10.
STEVEDORES: Gangs of stevedores secured by the Agent through the Port Monopoly, to be ordered 24 hours prior to arrival.

Generally 2 consecutive shifts of 8 hours per day.

Discharging/loading rates average:

100 tons per shift	general cargo.
200 tons per shift	bagged cargo.
150 tons per shift	baled cargo
175 tons per shift	bulk ore

Max. rate for ore 400 tons per shift if grab loading.
MEDICAL: Master to inform Agent by cable if urgent medical aid is required upon arrival, also indicating, if possible, seriousness of case in order that adequate steps can be taken.
TANKERS: *ATAS Refinery Terminal:* Depth in harbour channel, 11.2 m. (Masters have reported depths of 10.8 m. in the channel leading to ATAS) and, in approaches to channel, 12.3 m. Turning basin 1,148 ft. diameter, depth 42 ft. 8 in. Depth alongside berths 48 ft. 6 in. Maximum length 229 m., draft 11.6 m. Tankers up to 12.19 m. draft have berthed.

Tankers in ballast up to 15,000 d.w.t. may berth/unberth at any time, day or night. Other vessels manoeuvre in daylight hours only.

One finger pier, berths for 2 tankers, 10 in. hose connections to 26 in. shore line. No facilities for slop disposal ashore.

Fresh water available from barge, 100 tons each load.
DENSITY: Salt water 1025.
FRESH WATER: Fresh water supplied to tankers by barge but otherwise by shore installation at the rate of 30/35 t.p.h.
FUEL: Almost all kinds of fuel available in transit and facilities for delivery to ships.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron and B.P.). Telex: 29048 Bunk TR. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address. Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy Istanbul, Turkey.
GANGWAY/DECK WATCHMEN: Available and recommended.
OPENING/CLOSING HATCHES: Owners or Masters to decide whether this work should be undertaken by the stevedores or by the crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits per crew member.
CARGO GEAR: Generally shore cranes operated. However, ship using her own means when such cranes are not available. Full lights to be supplied by ship.
IDENTIFICATION CARDS: Seamen's Book is sufficient.
CONSULS: Italy, Lebanon, Norway and Sweden.
REPAIRS: Welding and other minor types of repairs are possible.
REPATRIATION: Repatriation can be arranged by air.
AIRPORT: Adana Airport served only by domestic line THY (Turkish Airlines) with routes to Cyprus (ERCAN), Ankara and Istanbul. Distance is 75 km. from Mersin.
TIME: GMT plus 3 hours.
HOLIDAYS: New Year's Day, (January 1st); National Sovereignty Day (April 23rd); Sports Day (May 19th); Victory Day (August 30th); Republic Day (October 29th); Sheker Bayram (3 days, movable); Kurban Bayram (4 days, movable).

Mersin Port is not working only 1 day during Sheker Bayram and 2 days during Kurban Bayram, during all other holidays working affected.
POLICE/AMBULANCE/FIRE: Telephone numbers: Police 15910; Ambulance 13555; Fire 0000.
TELEPHONES: No installation for connection on board.
SHORE LEAVE: Crew allowed shore leave.
GENERAL: Two consecutive shifts every day, the first shift 0800 hrs. - 1700 hrs. and the second shift 1700 – 2400 – 0100 hrs. Agent may provide extra men if necessary to help ship's despatch. Ships have to hoist a Turkish flag.
DEVELOPMENTS: Additional 310 m. of berthing space for container vessels will be available in 1988, depth alongside 12.0 m. 2 container gantry cranes will be available.
AUTHORITY: Turkiye Cumhuriyeti Devlet Demiryollari – Isletmesi Genel, MD, Talatpasa Bulvari, Ankara, Turkey. Telex: 42571. *Cables:* Demiryol.

NEMRUT BAY (including Foca): 38.46 N. 26.55 E. (See Plan)

PORT LIMITS: Nemrut Bay is situated on the South side of the port of Aliaga (see Aliaga). It is the area between the mainland and a straight line drawn True North from Kizilburun which is situated in position: Lat. 38° 45′ 00″ N., Long. 26° 53′ 50″ E.

The Bay is divided into two areas, the inner port and outer port.
Inner Port: Is the area remaining between the imaginary line connecting the South end of the Petkim Petrochemical Complex's breakwater with Karacadogan Penisula situated in position: Lat. 38° 46′ 10″ N., Long. 26° 54′ 22″ E.
Outer Port: Is the area between interior port and Nemrut Bay boundaries.
DOCUMENTS: See "Izmir".
PILOTAGE: Pilotage is compulsory for all vessels arriving at Nemrut Harbour.

Notice of ETA must be reported 24 hours before arrival to the Harbour Master's office at Aliaga (Telex No. 52626. VHF Channel 16). Time must be in GMT.

VHF Channel 16 is continuously watched at Nemrut pilot station and ETA may be confirmed on this frequency.

The address of pilot station is as follows:

Petkim Petrokimya A.S.
Aliaga Petrokimya Muessesesi,
Mudurlugu,
Satinalma Mudurlugu,
Aliaga – Izmir – Turkey
Tel: Aliaga (5431) 1240 (5 lines)
Izmir (51) 140910 (5 lines)
Telex: 53950 Pete Tr. (2 lines)
Cables: Petkim – Aliaga – Izmir.

In the ETA message, the following information must be indicated:

1. Name/call sign of vessel
2. Nationality
3. Agency
4. Length overall, max. draft and gross tonnage
5. Nature of Cargo (In IMO)

Rendezvous point with Pilot is: Lat. 38° 47′ N., Long. 26° 54′ E., in outer port. In the event of bad weather Pilot joins the vessel in inner port. A pilot boat of 210 h.p. is available. Call sign of the boat is "TCZJ".
ANCHORAGES: Anchorage in the inner and outer ports is possible. However, anchorage within the area of 5 cables diameter of middle of interior port boundary is prohibited for safety of sea traffic (See "Plan").
RESTRICTIONS: Mooring to or sailing from the Petkim's Tanker Quay and Ege Gubre's Pier from sunset to sunrise time needs the permission of Port Administration.

MAX. SIZE: See "Berthing".
HEALTH: See "Izmir".
RADIO: Complete MF/SSB type radio, 1.6 – 4.2 MHz International Navigation Code with 31 Channels capacity, radio transmitter 150-350, 300-535, 700-1650, 1650-4250 kHz, and a 4 band SSB/AM receiver.
VHF: Communication within 20-25 miles with VHF radio operating in 156 – 162 MHz band is possible. International navigational bands are used. Station listens on Channel 16. Call sign: "TAB".
RADAR: No radar facility.
TUGS: 2 tugs of 1,050 h.p. and 2,500 h.p. are available. Tugs normally join the vessel in the outer port.
BERTHING: Quays at port of Petkim Petrochemical Complex situated on the Northern side of Nemrut Bay (See "Plan").

Berth No.	*Name*	*Length (m.)*	*Depth (m.)*	*Remarks*
1	Tanker Quay	163	7	Load/discharge lines: 6 in., 8 in., 10 in., 12 in. Constructed for loading/discharging various chemicals such as ammonia, benzene, fuel oil, ethylene oxide, ethylene glycols, chloric hydrocarbons, wash oil.
2	Tanker Quay	175	10	
3	Caustic Quay	60	6	Loading lines: 8 in. for caustic, 4 in. for hypochloride.
4	Naphtha Quay	90	14	Discharge lines: 28 in. for fuel oil, 24 in. for naphtha.
5	Salt Quay	190	6	Constructed for discharge of salt to be used at Chlorine Alkali Plant.
6	General Cargo Quay	338 (175+163)	10 – 7	Constructed for loading/discharging various petrochemical raw materials, products and equipment.
	Petrol Ofisi Quay			Loading petroleum products.

Quays on the Eastern and Southern side of Nemrut Bay (See "Plan").

Ege Gubre Pier	122.90	12 – 14	Private jetty constructed for discharging/loading raw materials and products of fertiliser facility. Rate 1,000 tons/day.
Limas Pier	154	12	Private jetty constructed for discharging/loading iron scrap and iron products of Ironworks in Izmir.
Cukurova Pier	167	15	Private jetty constructed for discharging/loading iron scrap/iron products of Ironworks in the site.
Nemtas Pier	210	7-21	Private jetty constructed for loading/discharging iron and steel products of Ironworks at site.
Habas Pier	220	10-20	Private jetty for loading/discharging iron and steel products.

CRANES: Fixed/mobile cranes are available at Petkim Petrochemical Complex.

Lifting capacity of 2 cranes at Salt Quay is 3 tonnes each. Salt is transferred by conveyor belt to the plant. One mobile crane of 270 tonnes lifting capacity, 2 mobile cranes of 150 tonnes, 2 mobile cranes of 110 tonnes and 55 mobile cranes of 12 – 30 tonnes lifting capacity are available.

Nemtas and Cukurova have mobile crane facilities. Limas has 2 fixed cranes each with 10 tonnes lifting capacity. Ege Gubre has 1 × 10 ton crane.
BULK CARGO FACILITIES: See "Berthing" – Salt Quay and General Cargo Quay.
SPECIALISED CARGO HANDLING FACILITIES: Loading and discharging lines of liquid chemicals available at Port of Petrochemical Complex (See "Berthing").
MEDICAL: Hospital near Petrochemical Complex.
TANKERS: See "Berthing".
FRESH WATER: Available at Petkim's Quays, Ege Gubre and Limas.
FUEL: Available at Petrol Ofisi Quay.
CARGO GEAR: Load/discharge can be effected by mobile cranes at General Cargo Quay (See "Cranes").
AIRPORT: Izmir-Cigli Airport is approximately 30 miles from Petkim Petrochemical Complex.
TIME: GMT plus 2 hours in Winter. GMT plus 3 hours in Summer.
HOLIDAYS: *Official:* January 1st, April 23rd, May 19th, August 30th, October 29th.
Religious: "Bayram" days (Id-al-Fitr: 3 day, Id-al-Adha: 4 days) of Muslims (These dates are subject to visibility of new moon at Mecca).
POLICE/AMBULANCE/FIRE: Petkim has its own protection and medical units.
TELEPHONES: Available for national and international calls at Petkim.
BANKS: T. C. Ziraat Bankasi, Turkiye Is Bankasi, Akbank, Emlak Kredi Bankasi in Petkim site.
SHORE LEAVE: Petkim's permission is needed at Petkim Quays.
IDENTIFICATION CARDS: The list of personnel leaving/joining the vessel should be announced to Petkim.
GENERAL: Piers and facilities at Nemrut Bay are owned by industrial companies located in this area. For loading/discharging the cargoes of other private and public companies permission from Ministry of Transportation of Turkish Republic is needed.

SHIPMASTER'S REPORT: July 1980.
Port of Foca: Vessel discharged ammonia.
Approach: Charts: BA 1087, 1618.

The approach presents no real difficulties since good positions may be obtained from the coast either by radar or visual bearings. There was some haze on our approach but it did not pose a serious problem.
Berth: Consists of an "L" shape with the jetty being 125 m. in length. Distance to the foot of the jetty being about 300 m. The jetty is of concrete construction, standing on pilings and is fendered throughout with large tractor tyres. Ample mooring posts, although arrangements are not good for a vessel of this size.

There is a conveyor belt running the length of the jetty and to the shore plant. Two loading hoppers on the jetty. The Chicksan consists of a tall crane-like structure which is swung into position.

Connection: 6 in. 300 ASA. Shore provides 10 in./6 in. 150/300 reducer. The gangway may be swung out prior to arrival.
Density: 1028.
Discharge: Co-operation with the shore personnel very good, especially with the senior operators and managers. At a lower level language is the only problem. Shore personnel connect lines.
General: Fresh Water: Not available. (A vessel that visited at a later date reported that fresh water of good quality was available (metered) from a line amidships).

Fuel: Not available.

Officials: Officials come from Izmir, some 80 km. by road; the Agent therefore has to "keep hold" of them throughout discharge. The shore plant has facilities for sleeping in a hostel ashore.

The same cargo surveyor attends the vessel at Gemlik, Foca and Mersin.

Since this was the second port of call in Turkey the vessel is issued with a travelling manifest to cover cargo and a carrier for ship's stores. The procedure differs from port to port but ship's bonded stores are sealed from arrival Turkey to departure, although visiting Customs enter on arrival at a port. We did not have any trouble requesting the bond to be opened prior to departure.

Doctor: Not available.
Repairs: Not possible.
Surveyor (Lloyd's): Not available.
Chandler: Not available.

SHIPMASTER'S REPORT: September 1980.
Port of Foca:

To be read in conjunction with the previous report.
Approach: From the North (Dardanelles). 10 miles can be saved by going down 'Muslim Kanali' and 'Stenon Mitilimis' to the East of Nicos Lesvos (BA 1665) instead of going to the West of Lesvos.

There is one narrow spot but in two transits during September 1980 presented no problems at full speed. There is little traffic.

Southbound: Keep to North side of Muslim Kanali about 0.5 miles off Turkish coast to avoid Muslim Kaya shoals (beware of Southerly set).

Northbound: Once past Muslim Kaya shoals, turn W.S.W. to avoid any Eastbound traffic round Baba Burnu then 3 miles off Baba Burnu as required.

A further 8 miles can be saved from Dardanelles to Foca by using the channel to the East of Boscadda Island (BA 1608). The problem here is the shallow bank which may require a speed reduction. Not yet tried but the Pilots say quite safe. Approaching Nemrut Liman plenty of fixes can be obtained. With a Northerly or North Easterly wind the bay acts as a funnel and a considerable indraught occurs so care should be exercised so that the vessel does not get set in.

BA Chart No. 1618 should be held.

Approaching Nemrut Liman the construction work and breakwater at 'Petkim' refinery on the North side of the bay is soon apparent although at present the earthworks and tanks tend to blend in with the rather barren landscape.

The whole peninsula between Nemrut Liman and Aliaga Liman is in the course of development for a very large Petrochemical complex.

On the South side of the bay is a general cargo berth to seawards and the fertiliser/ammonia facility at the head of the bay. This facility is marked by a silver-pressure vessel. The Ammonia facility remains hidden by high ground until near the berth.

The vessel can be turned round inside the bay with ease in winds up to N.E. Force 4.
Pilots: Available on 24 hour basis from Aliaga Refinery. Boards either from tug or mooring boat. Gangway/pilot ladder should be 2 m. above water. Side depends on wind.

Pilot boards 1 mile N.W. of Karacadogan Burnu. He either drives across the peninsula to the new chemical berth and boards his boat there or comes by tug around the peninsula from Aliaga Refinery. On VHF Channel 16 when vessel expected. Reasonable English spoken. Pilotage one hour.
Tugs: Three tugs available. Two of 2,400 h.p. from Aliaga Refinery and one of 1,200 h.p. at the new chemical berth.

If there is any wind at all in the bay, two tugs are required both for berthing and unberthing. These should be ordered well beforehand through the Agent.

In my opinion two tugs are required at all times. Ship's lines used.
Berthing: Although on a 24 hour basis, I would not be keen to berth at night especially in Winter months due to the strong Northerly wind pushing vessel onto the berth.

Can berth port or starboard side alongside. For this size vessel (32,000 g.r.t.) port side to is the most suitable as leaving the berth is not hazardous as possibly starboard side to would be.

Vessel headed into berth at 90° with bow onto the N.W. corner. When about 2 cables off starboard anchor let go and the stern pulled round by tug.

Make sure stern tug (when vessel parallel with quay) pulls on starboard side otherwise stern will strike quay (September 1980).
Moorings: (See "Plan"). Back spring first forward, starboard buoy line first aft. Mooring boat available.
Berth: The fendering arrangements are poor. Consisting of large tractor tyres. The main problem is at the corners or knuckles where the tyres are strung too low to stop the bow or counter flare hitting the concrete (September 1980).

Protest noted in September 1980 about fenders. Operators say they will raise fenders and offer protection at corners.

Maximum Air draft 14 m. in September 1980 call, we used the low loader, which was very beneficial.

Discharge: A discharge rate of 150 t.p.h quoted. Around the 200 t.p.h. is normal. July and September 1980.

On completion the shore personnel drain their line direct into the sea. All personnel engaged in uncoupling must wear full breathing sets. Cargo Engineer and Officer of the Watch went through three bottles each. (September 1980).

The facility has a storage capacity of 2,800 tonnes and a monthly consumption of about 1,500 tonnes.

Phosphoric and Sulphuric acids are also handled.

General: If second or third port, vessel issued with travelling manifest from previous port to cover cargo and ship's stores.

Be careful to retain Turkish light dues certificate, if last port, for next Turkish call.

In addition to travelling manifests other papers required:

2 Crew Currency Lists.
2 Crew Declarations.
6 Crew Lists.
1 Vaccination List.
1 List of Cash in Ship's Safe.
1 Health Declaration.
2 Lists of Ship's Particulars (Turkish Form).
2 Lists of Previous Ports.
6 Copies of Cargo Manifests (to be stamped at previous port if Foca second or subsequent port).

SHIPMASTER'S REPORT: October 1987.

Chart: BA. Chart No. 1618.

Documents:

8 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.
8 copies Cargo Manifest.

Approaches: Good positions are obtained on approach. Crude carriers generally berth in Aliaga Bay and product and gas vessels in Nemrut Bay.

Pilotage: Pilot is based at the Dock Office of the Petkim Refinery in Nemrut Bay. Pilots also undertake berthing at other Nemrut Bay berths.

Pilotage is available 24 hours but in general pilotage not available between the hours of midnight and 0600 hrs. for berthing.

Pilot boards from a small black hulled cutter. Excessive use of the tug and anchor was made.

The Pilot boards 0.5 miles west of FL.R. light on Petkim Breakwater.

Prior to arrival Pilot may be contacted by Telex No. 607 53950 PETE TR and on approaching may be contacted on VHF Channel 16.

Anchorage: There is a prohibited anchor circle on BA. Chart No. 1618 but this does not seem to be observed. We found a good anchorage cables west of the FL.R. light of Petkim Breakwater. In October 1987 there were many ships at anchor.

Tugs: There are two tugs on standby (1 x 1500 h.p. and 1 x 2,500 h.p.) at Petkim Dock and they require 15 minutes notice. Ship's lines used.

Berthing: At Petkim Refinery in Nemrut Bay there are 6 berths. There are 3 berths for product and gas ships. 1 berth for Naphtha (vessels berth stern to), 1 berth for caustic soda and 1 general cargo berth. The two product berths are on the N.W. side of Petkim Dock and the general cargo berth is on the S.E. side.

The water depth in the dock is about 30 ft. although there is more water at the outer end.

The product berth which is on the outer side of the N.W. breakwater was damaged by Winter storms and was out of use.

We berthed head in port side to at the product/gas berth and used the offshore anchor. Moorings consisted of 2 head/stern lines, 1 breast line and 2 springs at each end. The berth was well fendered. Ship's gangway used.

Cargo: A full range of gases are handled for import and export, including ethylene. Also many chemicals and products are handled.

We discharged propylene with back pressure of 12 Bar (Maximum back pressure allowed 20 Bar) at 50 t.p.h., heater discharge to +5°C. We used a 6 in. Chicksan arm for liquid and a 4 in. hose for vapour return line.

We believe 4 x 4,000 cu.m. spheres used for storage of pressure gases. The Terminal and Surveyor were very helpful. Hot vapour pumped ashore on completion. The English spoken was fair.

Fresh Water: Fresh water is available from Petkim Dock and at a good rate. Shore hoses used.

General: Nearest airport is at Izmir with flights to Istanbul and Ankara.

Ship chandler available locally.

There are 4 berths on the West side of Nemrut Bay. One berth being for ammonia (Foca) and 3 for steel, scrap and finished exports.

AUTHORITY: Harbour Master's Office: Aliaga – Izmir, Mr. Atalay Karatas, Harbour Master.

SAMSUN: 41.21 N. 36.34 E. (See Plan)

DOCUMENTS:

6 copies Crew List.
6 copies Passenger List (if any onboard).

Customs:

2 copies Crew List.
2 copies Stores List.
2 copies Personal Effects List.

Health:

Valid Derat Certificate.
Maritime Declaration of Health.
1 copy Crew List.

Immigration:

2 copies Crew List.

PILOTAGE: Harbour Pilot compulsory for all foreign vessels. Ordered by Agent subject to vessel's advance notice of ETA.

ANCHORAGE: Good anchorage in the Outer Harbour.

VHF: Samsun Radio (TAF) on Channel 16.

TUGS: 4 tugs abvailable. 1×970 h.p., 1×450 h.p., 1×1,500 h.p. and 1×2,480 h.p.

Vessels over 4,000 g.r.t. are required to use 2 tugs.

BERTHING: Harbour protected by two breakwaters, entrance width 200 m., depth 11.9 m.

Berth No.	*Length* (m.)	*Depth* (m.)	*Remarks*
1-5	776	10.5	12 Cranes general, bulk, containers.
6-9	—	—	—
10	250	12.0	Berth to be available 1988-91 with 2 container cranes.
11-12	410	12.0	To be constructed.
13	–	–	Ferry terminal.
14-15	400	12.0	Industrial quay, 5 cranes will be available in 1988.
16	180	6.5	Coastal.
17	400	6.0	Fishing boats.

BULK HANDLING FACILITIES: Coal and ore handled at the Main Quay. Rate for coal 200 t.p.h. by conveyor and iron ore 250 t.p.h. by conveyor. Grain silo with 34,000 tonnes capacity.

Also see "Developments".

CRANES: 17 quay cranes, capacity 3-10 tons. Mobile cranes 3, 10, 25 and 40 tons capacity.

DENSITY: 1013, but changes according to season.

FRESH WATER: Available from the quay.

FUEL: Available.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron and B.P.). Telex: 29048 Bunk TR. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

STEVEDORES: Working hours for general cargo: From 0800 hrs. to 2400 hrs. in 2 shifts.

For bulk cargo: 24 hours operations in 3 shifts.

REPAIRS: Minor repairs possible.

SURVEYORS: Available.

GANGWAY/DECK WATCHMEN: Usually ship's crew and ship's gangway.

OPENING/CLOSING HATCHES: Usually by ship. Can be carried out by shore personnel is required by Master.

CERTIFICATES: Safety Construction, Safety Equipment, Load Line, Safety Radio, Hull Class, I.O.P.P. and International Tonnage Certificates are required. Garbage Pollution Prevention Certificate, if vessel has one.

CUSTOMS ALLOWANCES: 10 packets of cigarettes per man, per week and 1 bottle per man per week.

IDENTIFICATION CARDS: All passports (except Master's) are collected by Immigration in exchange for shore pass during vessel's stay in the Port.

POLICE/AMBULANCE/FIRE: Available in the port.

AIRPORT: Distance 5 km.

DEVELOPMENTS: New bulk cargo quay under construction. Length 500 m., depth 12 m.

AUTHORITY: Turkiye Cumhuriyeti Devlet Demiryollari Isletmesi, Genel Mudurlugu, Samsun, Turkey. *Tel:* (361) 11318. *Telex:* 82172 TCSL TR.

SINOP: 42.01 N. 35.08 E.

DOCUMENTS: See "Izmir."

PILOTAGE: Not available.

ANCHORAGES: Good anchorage in front of pier in 9 m. – 18 m.

RADIO/VHF: Sinop Radio. Call sign TAD2.

BERTHING: One pier, length 180 m. Max. draft 7.5 m.

STEVEDORES: *Working Hours:* 0730 – 1700 hrs.

MEDICAL: Facilities available.

DENSITY: 1025.

FRESH WATER: Available.

REPAIRS: Possible.

CONSULS: None.

REPATRIATION: Not possible.

AIRPORT: At Samsun, distance 190 km.

TIME: GMT plus 2 hours.

AUTHORITY: Sinop Liman Baskanligi, Sinop, Turkey. *Tel:* 90-36-61-2990. *Telex:* 82414. *Contact:* Mr. Hamdi Ersavas.

TRABZON: 41.01 N. 39.46 E.

PILOTAGE: Refer to "Canakkale" and "Istanbul".

Harbour Pilot compulsory for all foreign flag vessels. Arranged by Agent subject to vessel's notice of ETA in advance.

ANCHORAGE: In the Outer Harbour off the breakwater.

MAX. SIZE: Vessels up to 29 ft. draft.

RADIO: Trabzon Radio. Call sign TAO.

TUGS: 2 tugs available. Towage compulsory for vessels over 550 tons.

BERTHING: Main wharf 410 m. long, depth alongside 10 m. Vessels may be loaded and discharged while moored stern to the breakwater.

BULK HANDLING FACILITIES: Grain handled at the Main Quay using 2 rail mounted loaders. One grain silo with capacity of 10,000 tonnes and 1 warehouse with capacity 10,000 tonnes.

Containers handled by 25 tonne fixed crane.

CRANES: 10 cranes, capacity 3 – 25 tonnes.

FRESH WATER: Obtainable from the quay.

FUEL: Fuel oil obtainable in limited quantities.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

STEVEDORES: Working hours from 0800 to 1200 hrs. and from 1300 to 1700 hrs. Overtime can be arranged.

REPAIRS: There are no repair facilities.

DEVELOPMENTS: One quay of 400 m. length near completion. Depth alongside 10 m.

TUTUNCIFILIK: 40.45 N. 29.47 E. (See Plan)

SHIPMASTER'S REPORT: July 1981.

LOCATION: TUPRAS berths are situated just South of the 'Petkim' chemical complex at Yarimca (See "Yarimca"), as before the railway seems to be the dividing line between TUPRAS and PETKIM.

PILOTAGE/APPROACHES: See "Yarimca".

TUGS: Three tugs generally used. 1 Government and 2 TUPRAS. All large and powerful but rarely use their full power.

As a rule tug's lines used for berthing and ship's lines departing.

BERTHING: For LPG carriers, 2 berths are used. Also refined product carriers use same berths. Crude is imported to a sea island for VLCC's and on the original old jetty for smaller tankers.

The original jetty for all tankers is at the Southern corner of the refinery at Kilier Bar. This is not now used for LPG.

A new berth constructed in 1979/80 is now open 0.5 miles North of the old jetty. At present only the North side of the new jetty is used (No. 2) but soon the Southern side will be in use for all larger vessels for all grades.

The new berth is of modern concrete pile construction with a roadway out from the shore taking the pipes, with the berths leading off at 45° with 4 mooring/fender dolphins to seaward, connected by catwalks.

Draft alongside both berths is 18 m. with 3 m. clearance. Fenders and mooring arrangements are good.

Vessels generally berth head in, so can go either side alongside.

A small tug jetty is at the root of the main jetty.

See "Plans" for dimensions and general layout of all berths.

Mooring: Mooring boat used. 3, 2, 2, each end with line up very precise. Bow comes near the end of the jetty where it bends at 45° to a roadway.

CARGO HANDLING: *Discharge:* Valves shut against ship without warning, high back pressure – 7.5 to 8 bar., and line draining at completion non-existent. 8 in. rubber discharge hose 150 ASA.

No vapour return line as yet, and cannot see one on jetty, but one on old jetty suddenly appeared with TUPRAS wanting to return benzene to the ship.

5×10 in. Chiksans for refined products on North side.

5×12 in. Chiksans plus 2×16 in. Chiksans on South side.

Control hut at seaward end of roadway with telephone and a couple of operators.

Rate 250 – 300 t.p.h. when all shore valves open.

FRESH WATER: Available.

DENSITY: 1017.

SURVEYORS: Employed by Turkish Survey Bureau.

GENERAL:

Gangway: Can be a problem due to dolphins. We used accommodation ladder with half BOT gangway section between bottom platform and dolphin.

Customs/Immigration: Customs Officer on board requires room continuously.

Facilities: Agent very helpful. Personnel change through Istanbul Airport without too much difficulty.

Curfew in force from 2400 hrs. to 0500 hrs. for ship's crew, 0200 hrs. to 0500 hrs. for local population.

Overseas telephone calls delayed about 2 hours during weekdays and 30 minutes at weekends.

Lloyd's Surveyor from Istanbul – to be arranged 24 hours in advance.

Medical facilities from TUPRAS or local doctor through Agent. Izmit about 30 minutes by taxi/car.

General stores, apart from some fresh provisions, are difficult to obtain.

SHIPMASTER'S REPORT: January 1986.

DOCUMENTS:

6 Crew Lists together with passports for all persons onboard.

2 Lists of Provisions, Stores and Bunkers.

2 Manifests of all cargo onboard.

2 Crew Effects Declarations.

2 Declaration of all Money and Cheques carried in ship's safe.

2 Maritime Declarations of Health, one form supplied on arrival, one form supplied at Canakkale or Buyukdere when passing inwards.

PILOTAGE: Compulsory Pilot inwards at Darica Burnu. VHF contact possible. Call Darica Pilots on VHF Channel 16 normally working Channel 14.

Pilot boards from small tug, ladder should be about 1 m. above the water. Tug equipped with VHF but personnel only Turkish-speaking.

The Pilot berths all vessels at all Gulf of Izmit ports.

Pilots depart either off Darica or off berth depending on other employments and vessel's size.

Pilotage operates 24 hours.

APPROACHES: See B.A. Chart 497.

ANCHORAGE: The anchorage is situated to the Northwest of the berths, off Yarimca. Pilots consider it safe for any size of vessel.

MAX. SIZE: Max. draft 18 m. (59 ft. 00 in.) permitted at the new berth according to the Pilots.

TUGS: Up to 5 tugs used when berthing at Sea Island. 3 government and 2 TUPRAS. (TUPRAS tugs 2,500 h.p. each).

All tugs are large and powerful but rarely use their full power.

At the other berths three tugs generally used.

BERTHING: For LPG carriers 2 berths are used, also refined products carriers use the same berths.

Crude is imported to a Sea Island for VLCCs and to the original old jetty for the smaller tankers.

The original jetty is at the Southern corner of the refinery at Kilier Bar.

A new berth has been constructed some 0.5 mile North of the old jetty. The new berth is a modern concrete pile construction with a roadway out from the shore taking the pipes, with the berths leading of at 45° with 4 mooring/fender dolphins to seaward, connected with a catwalk.

Vessels berth on both sides of this jetty, generally head in. Fender and mooring arrangement is good. This jetty is used for LPG and refined products.

The Sea Island consists of a platform with three dolphins on each side. There are no connections between the platform and the dolphins. Fendering and mooring arrangements acceptable for tankers of 150,000 d.w.t.

Vessels normally berth port side to at the Sea Island.

2 mooring boats are used for rope handling.

CARGO HANDLING: *Discharge at New Berth:*

Valves shut against ship without warning, high back pressure – 7.5 to 8 Bars. Line draining at completion non-existent.

8 in. rubber discharge hose, (150 ASA).

No vapour return line.

5×10 in. Chiksans for refined products on North side.

5×12 in. Chiksans and 2×16 in. Chiksans on the South side.

Control hut at seaward end of roadway with telephones and operators.

Rate 250-300 t.p.h. when all shore valves opened.

Discharge at Sea Island:

4×16 in. Chiksans for crude. 3 normally connected. Generally low back pressure, but at times, when topping up of shore tanks, discharging rates reduced considerably.

Loading Masters have Control Room at platform. Communication with them by VHF. Communications sometimes difficult due to language problems. One representative of TUPRAS stays onboard throughout discharge.

FRESH WATER: Available at all berths.

FUEL: With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

DENSITY: 1017.

SURVEYORS: Employed by Turkish Survey Bureau, Katoni Persa or other local Turkish companies.

GENERAL:

Gangways: Can be a problem at the new berth, due to dolphins. At Sea Island, gangway from the platform.

Telephone: Overseas calls delayed about 2 hours during weekdays and about 30 minutes at weekends.

Lloyd's Surveyor: Comes from Istanbul. Has to be arranged 24 hours in advance.

General Stores: Apart from fresh provisions, difficult to obtain locally. Can be arranged from Istanbul but transportation costs are high.

Fuel: Available by barge only. It is more economical to anchor off Istanbul for fuel. All fuel supplied from Istanbul.

Airfreighted Stores: No difficulty with getting items onboard. If spare parts are to be taken onboard, items that cannot be carried will be put on a barge. Transportation costs are high.

Pollution: Strict anti-pollution laws in operation.

Facilities: Curfew has been in force earlier for ship's crew. In January 1986 no restrictions in force.

AUTHORITY: TUPRAS-Izmit Rafinerisi Bolge Mudurlugu, P.O.Box 43, Izmit, Turkey. *Tel:* 31660-31665, 20330-20333. *Telex:* 22285, 33152, 33153, 33154. *Cables:* Umipras, Izmit.

Izmit Liman Baskanligi, Yarimca, Turkey. *Tel:* 90-211-73754. *Telex:* 33292. *Contact:* Atilla Gorgunler.

YARIMCA: 40.45 N. 29.45 E. (See Plan)

SHIPMASTER'S REPORT: November 1980.

PETKIM REFINERY:

Petkim is an Industrial complex at the entrance to the Gulf of Izmit, near Yarimca. It includes the refineries of Petkim to the North and TUPRAS to the South (see "Tutuncifilik"). As far as can be gathered the railway line is the dividing line.

A wide range of oils, chemicals, gases bulk fertilisers and chemicals are handled. The Products Pier which includes ammonia is in position at Lat. 40° 45.4′ N., Long. 29° 45.1′ E., close by is a bulk handling berth with a solid quay face.

The area in general is one of the main trading areas for overseas shipping in Turkey.

To the North West of the Refinery at Yarimca is Hereke, another important shipping complex.

PILOTAGE: Compulsory Pilot inwards at Darica Point. VHF contact may be possible. Izmit Pilot Office which is the control centre works on Channels 14 and 12.

Proceed to position off Darica Point and sound 'G'. Pilot boards from small tug and the ladder should be about 1 m. from the water.

The Pilot berths all vessels at all Gulf of Izmit ports.

Pilot departs either off berth or at Darica depending on other pilotage requirements and curfew. Pilotage operates 24 hours.

APPROACHES: See B.A. Chart 467.

TUGS: Two Government tugs available, 1×2,000 h.p. and 1×2,500 h.p. If additional tugs are required they come from Istanbul. For IPRAS refinery only, there are 2 tugs of 2,500 h.p. Tugs generally use ship's line. Tugs rarely use all their power.

BERTHING: Berthing and unberthing throughout 24 hours. The berth is the usual type of tanker berth consisting of a 'T' shaped jetty at the end of a pipe-line roadway. There are dolphins connected by catwalk to main pier (Southern catwalk damaged in November 1980), plus further isolated mooring dolphins about 50 m. off inner dolphins.

Mooring arrangements are not very good with head lines virtually breast lines. (See "Plan").

Dolphins have good fenders and ship's centre section stands off jetty face. After dolphin (if port side to) comes on counter. Generally port side to due to anchored vessels, making starboard approach difficult. But possible for starboard side alongside.

It is safe to swing gangway out before berthing. It should be on the end of a derrick as it has to be swung clear of lamp post on quay and landed at an angle of 45°.

DISCHARGE: There are lines for naphtha, benzene, butadiene vapour and liquid, and ammonia vapour and liquid. Butadiene 8 in., ammonia 10 in., both sets Chicksans, naphtha and benzene use hoses. The ammonia connections are the Southerly set, ammonia coupling 10 in. 300 ASA to spool piece 12 in. 150 ASA. Shore personnel effect the connection. Vapour return line not used. Samples taken before discharge.

We used forward ship's crossover which gives forward mooring lines a slightly better lead.

Communication with shore personnel difficult due language problems. Hut on quay with telephone.

Refinery seems to have limited tank capacity judging from our 2 visits and has to transfer product to other plant at re-liquefaction rate of around 50 tonnes per hour. Not able to ascertain actual tank capacity.

Due to above, discharge rate varies from about 300 t.p.h. to 500 t.p.h. with back pressure varying from 2.5 to 7 bar.

Surveyors as normal, travel around Turkey following ships so can be late in boarding if ship early, then refinery representative notes temperatures and ullages.

GENERAL: Fresh water available from quay at 40 t.p.h. metered at L.750 (November 1980 – £3.60) per tonne. By barge is cheaper at L.30,000 (November 1980 – £145) per 50 tonnes minimum but not always available.

Fuel by barge. Istanbul is fairly close so may be cheaper to go to anchorage there for fuel as available locally by barge but costly.

In November 1980 a curfew still operated 2400 hrs. to 0500 hrs. Travel outside Izmit District not allowed. Difficult to get into either Yarimca or Izmit.

Strict anti-pollution laws in operation.

Over many voyages to this port and Gemlik, air freight items from North Europe always get through.

Lloyd's/Agent: Lloyd's Surveyor from Istanbul also covers all Turkey but travel is expensive.

ZONGULDAK: 41.28 N. 31.49 E.

PILOTAGE: Refer to "Canakkale" and "Istanbul".

Harbour Pilots obtainable from Coaling Company, Pilot boards off port entrance by launch. Ordered by Agent subject to vessel's ETA given at least 24 hours before arrival.

ANCHORAGES: Good anchorage off the harbour in a depth of 13 fathoms, sand and mud bottom.

Anchorage prohibited South of a line drawn in direction 292.5° distance 7.5 cables from head of the Northern breakwater. The Southern limit of this area is a line drawn in direction 262° from the head of the Northern breakwater to the shore.

RESTRICTIONS: Harbour entrance between breakwaters. Entrance width 600 ft.

Traffic signals displayed from signal mast on Northern Breakwater, as follows:

2 black balls or 2 red lights, meaning "Harbour closed".

2 black cones or 2 green lights, meaning "Harbour open".

A black ball over black cone or red light over green light, meaning "Do not attempt to enter".

A black cone over a black ball or green light over a red light, meaning "No tug available".

A black ball between 2 black cones or red light between 2 green lights, meaning "Wait. You will be piloted into the harbour".

3 black balls, or 3 red lights, meaning "Because of unfavourable weather you cannot be piloted into the harbour".

RADIO: Zonguldak Radio. Call sign TAR.

TUGS: 5 tugs available.

BERTHING: Coal quays length 1,650 ft. depth alongside 10 m.

Cargo quay length 500 ft. depth alongside 10 m. Loading rate 350 - 450 t.p.h.

Northern Breakwater, 2 berths, at inner end with depth of 7 m. alongside.

CRANES: Shore cranes up to 15 tons capacity and floating crane 60 tons capacity.

FRESH WATER: Available from the quays.

FUEL: Only coal bunkers available.

Turks and Caicos Islands

GRAND TURK: 21.28 N. 71.08 W. (See Plan)

DOCUMENTS: *Customs:* Clearance from last port, Inward Report, Crew List and Declaration, Ship's Stores List, Manifest of all goods to be discharged at each Port.
Immigration: Passengers Manifest, Immigration control cards.

PILOTAGE: Compulsory. The Owner, Master, or Agent of a ship bound for any Port in the Turks and Caicos Islands must report via Harbour Master or Cable and Wireless on VHF Channel 16 about 4 hours in advance of the ETA of the ship.

The following information is required.

1. Name/Call Sign of Vessel.
2. Nationality.
3. Length, Draft, and Gross and Net Registered Tonnage.

Pilot Office on VHF Channel 16. Berth arranged by Harbour Master through Local agent making request 24 hours in advance for use of dock and facilities.

ANCHORAGE: Available.

MAX. SIZE: No restrictions.

HEALTH: Pratique, given by Customs Boarding Officer.

RADIO: RTC 1460 kHz AM band (Cable and Wireless VHF 16).

TUGS: Only available at the Port of Providenciales.

BERTHING: See "Plan".

CRANES: Arranged by Agent, if ship's own is out of order.

STEVEDORES: Arranged by Agent.

MEDICAL: No advance notice except in case of emergency, hospital facilities available on Grand Turk and Providenciales.

TANKERS: Refined petroleum products are imported through the Bahamas by Shell and Esso at all ports. There is no special bunkering port, but bunkering services are available.

DENSITY: 1025.

FRESH WATER: Available, ordered through Agent at approximately 0.03 cents (U.S.) per imperial gallon.

FUEL: Delivered by tank trucks at all berths, diesel as well as marine lubricants can be obtained through suppliers (Shell and Esso Agents).

GANGWAY/DECK WATCHMEN: Usually ship's crew. Ship's gangway.

OPENING/CLOSING HATCHES: Stevedores or ship's crew, which ever to ship's advantage.

CERTIFICATES:

Safety Construction Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Load Line Certificate.
Cargo Gear Certificate.

CUSTOMS ALLOWANCES: Tobacco. Each man 200 cigarettes, or 100 cigarillos (cigars with a maximum weight of 3 grammes) or 50 cigars or 125 grammes of smoking tobacco, and one reputed quart of normally potable spirits or not more than 2 litres of wine containing less than 42% of proof spirit.

CREW IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS: Most deck and engine repairs can be carried out.

SURVEYORS: Registrar of Shipping, Natural Resources Branch, Iron Building, Front Street, Grand Turk. Tel: 2550.

DRY DOCKS: Caicos Marina & Shipyard, Providenciales. Tel: (809) 946–4600. Telex: TWX 3158440 TRUMPRO. Max. lifting capacity 85 tons.

REPATRIATION: Crew changes and repatriation possible.

AIRPORT: In Grand Turk the airport is about 1 mile from the port and is served by Pan Am 3 times a week and various charter operators. In South Caicos the airport is about 2 miles from the port and is served by Bahamas Air twice weekly and charter flight at anytime. In Providenciales the airport is about 7 miles from the port and is served by Pan Am daily, with connections from Grand Turk by T.C.N.A. and by various charter operators.

TIME: E.S.T. Daylight savings time starts the last Sunday in April when clocks are advanced 1 hour and ends last Sunday in October when clocks retarded 1 hour, returning to Eastern Standard Time.

POLICE/AMBULANCE/FIRE: Grand Turk Police 2299; Ambulance 2333; Fire 2233. Emergency No. 2570. Port Officer 2325. South Caicos Police 3299
Providenciales Police 4259, Ambulance 4201, Fire 4378.

EMERGENCY CO-ORDINATION CENTRE: Police Headquarters (Grand Turk) 2299, (South Caicos) 3299, Providenciales 4259.

TELEPHONES: No arrangements exist for placing telephones on board ships.

SERVICES: Divers available for underwater surveys and repairs.

BANKS: Barclays Bank Tel: 2831. The Bank of Nova Scotia Tel: 2506/7.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday, Commonwealth Day, Queen's Birthday, Emancipation Day, Columbus Day, International Human Rights Day, Christmas Day, Boxing Day.

SHIP SUPPLY SERVICE: Arranged through Agents.

DELAYS: Normal delays if berth is in use or docks under repair.

DEVELOPMENTS: A proposed area adjacent to South Dock, Grand Turk, for a new dock is under study. A new dock has just been completed on South Caicos and ports facilities are being installed.

AUTHORITY: Department of Customs, Custom's Office, Grand Turk, Turks and Caicos Islands. *Tel:* 2801-2808. *Telex:* TQ 8227.

Tuvalu

FUNAFUTI: 08.31 S. 179.13 W.

DOCUMENTS:
Customs: Boarding of ships after Radio Pratique granted.
Clearance from the Last Port.
Crew List.
List of Passengers.
Stores' Lists.
Ship's Inward Report.
List of Unmanifested Cargo.
Crews' Stores.
Manifest and Bill of Lading.
Health: Radio Pratique to be granted within 24 hours before arrival.
Vaccinations against Cholera.
Immigration:
Crew List.
Passenger List.
Next Port of Call.
Final Destination.
Passports.

PILOTAGE: Local Master available on 1 month's prior notice.
Chart: See Chart BA. 2983. Fongafale Anchorage – main anchorage.

RESTRICTIONS: None.

MAX. SIZE: See "Te Puapua Passage". Max. depth 15 m. 250 ft. wide at low water.

HEALTH: Radio Pratique available.

RADIO: Funafuti Radio (T2U) on 6215.5 kHz.

VHF: Funafuti Radio equipped with 80 channel VHF radio. Vessels to call on Channel 16.

VHF in operation when vessels approaching, arriving, manoeuvring and sailing.

TUGS: None.

BERTHS: Concrete on pile wharf. 2 berths, lengths are 50 m. and 40 m. respectively. LW depths of 8 m. and 5.5 m.

CRANE: None.

STEVEDORES: Available on 24 hours' notice, discharge rate high.

MEDICAL: Hospital radio advice available.

TANKERS: Must provide own discharge lines. No residue discharge facilities. Light diesel only available. No tanker berth.

DENSITY: Sea Water.

FRESH WATER: Max. 60,000 gallons in wet season, little or none in dry season, by pipe-line on wharf to vessel.

FUEL: Light diesel only. Max. 5,000 gallons from 500 gallon tanks (hand pump).

FIRE PRECAUTIONS: No special precautions other than normal for tankers.

CONSULS: None.

REPAIRS: None.

SURVEYORS: None.

WATCHMEN: Not required.

HATCHES: By stevedores or crew.

CUSTOMS ALLOWANCES: Passengers only, allowed 200 cigarettes and 1 bottle of spirit.

REPATRIATION: Air service to Fiji and Tarawa.

AIRPORT: 1.25 miles from jetty, fortnightly service. Special charters by arrangement.

TIME: GMT plus 12 hours.

HOLIDAYS: New Year (1st January); Public Holiday (3rd January); Good Friday; Easter Friday; Easter Monday; Queen's Birthday; Public Holiday (13th June); Bank Holiday (1st August); Tuvalu Day (1st October); Public Holiday (3rd October); Prince of Wales Birthday (31st October); Christmas Day (25th December); Boxing Day (26th December); Public Holiday (27th December).

POLICE/AMBULANCE/FIRE: Police 728 or 726. Ambulance 751 or 749. Fire – send messenger for fire engine.

TELEPHONE: Ship can use marine office telephone ashore.

SERVICES: None.

SHORE LEAVE: Allowed after clearance.

IDENTIFICATION CARDS: Not required.

REGULATIONS: No sullage, ballast, tank residue, etc., to be discharged in lagoon.

DELAYS: Unpredictable, depending on whether other ships in port.

AUTHORITY: Ministry of Works and Communications, Tuvalu Government, Vaiaku, Funafuti, Tuvalu. *Cables:* Wocom, Funafuti. *Contact:* Transport Systems Manager.

Union of Soviet Socialist Republics

GENERAL: ALL PORTS:

(a) **List of Soviet ports and port roads open to foreign vessels:**

I. Arctic Ocean Ports

1. Murmansk
2. Onega*
3. Archangel
4. Mezen
5. Naryan-Mar
6. Igarka

*The port of Onega is closed for foreign vessels from 1st September to 31st December yearly.

II. Baltic Sea Ports

1. Leningrad
2. Vysotsk
3. Vyborg
4. Tallinn
5. Pyranu
6. Riga
7. Ventspils
8. Klaipeda

III. Black Sea Ports

1. Reni
2. Izmail
3. Kilia
4. Belgorod-Dnestrovsky
5. Illyichevsk
6. Odessa
7. Kherson
8. Novorossiysk
9. Tuapse
10. Poti
11. Batumi
12. Yalta
13. Sochi
14. Sukhumi
15. Yuzhnyy (Grigorevsky)
16. Ust-Dunaysk

IV. Azov Sea Ports

1. Zhdanov
2. Berdyansk

V. Pacific Ocean Ports

1. Nakhodka
2. Aleksandrovsk-Sakhalinsky
3. Makarevsky (or Due) Roadstead
4. Octyabrsky
5. Shakhtersk
6. Uglegorsk
7. Kholmsk
8. Nevelsk
9. Makarov Roadstead
10. Poronaisk
11. Vostochniy
12. Korf
13. Okhotsk
14. Provideniya
15. Severo-Kurilsk

(b) **Addresses and telephone numbers of V/O "Sovfracht", V/O "Soyuzvneshtrans", V/O "Morcontainer" and V/O "Sovbunker":**

Vsesoyuznoe Obyedinenie (V/O) "Sovfracht" is the sole organisation in the U.S.S.R. rendering brokerage services to Soviet and foreign Shipowners. V/O "Sofracht" carries out chartering of foreign and Soviet tonnage and is the General Agent for foreign flag vessels in Soviet ports.

Postal address: V/O "Sovfracht" 1/4, Zhdanova Street, Moscow, 103759, U.S.S.R.
Cable: Sovfracht Moscow
Telephone: 926-11-18
Telex: 411168 a, b, 411170 a, b.

Vsesoyuznoe Obyedinenie (V/O) "Morcontainer" is a container and liner broker acting on behalf of Soviet Shipowners and Shippers.

V/O "Morcontainer" is responsible for the programming and arranging of container services and liner shipments, cargo bookings of Soviet and foreign shippers on Soviet and foreign liner tonnage including tracing, leasing of containers and various container equipment.

Postal address: V/O "Morcontainer", 1/4, Zhdanova Street, Moscow, 103759, U.S.S.R.
Cable: Morcontainer Moscow
Telex: 411341, 411168, 411171, 411369
Telephone: 926-91-29.

Vsesoyuznoe Obyedinenie (V/O) "Sovbunker" carries out ships' bunkering and port consignment stock operations.

Postal address: V/O "Sovbunker", 10/12, Kaloshin Lane, Moscow, 121002, U.S.S.R.
Cable: Sovbunker Moscow
Telex: 411170
Telephone: 248-23-52.

Vsesoyuznoe Obyedinenie (V/O) "Soyuzvneshtrans" carries out all transportation and forwarding of export and import cargoes as well as transit of goods via the U.S.S.R. and foreign territories.

Postal address: V/O "Soyuzvneshtrans", 17/16, Gogolevsky Boulevard, Moscow, 121019, U.S.S.R.
Cable: Soyuzneshtrans Moscow
Telex: 411441, 411442
Telephone: 203-11-79.

(c) **Guiding principles to comply with when calling at U.S.S.R. ports:** When calling at U.S.S.R. ports Masters of all foreign flag vessels are requested to comply with the Instructions and Provisions of the Government of the U.S.S.R. published annually in issue No. 1 of the U.S.S.R. Notices to Mariners. Special Instructions for vessels calling at U.S.S.R. in each particular sea basin published by the General Department of Navigation and Oceanography of the Ministry of Defence of the U.S.S.R. (GDNOMD).

All vessels calling at U.S.S.R. ports must also abide by the Customs and Obligatory Harbour Regulations of each particular port of call which are obtainable through the local Inflot agencies, viz. shipping Agents for foreign flag vessels at U.S.S.R. ports.

(d) **Ship/shore radio link:** Ships' communication with ports of call is usually maintained through the local port radio stations, some information of which is given in the respective entries for the ports.

Ships' radio stations and/or radio-telephones (excluding VHF), must not be operated when the vessel navigates or lies at anchor within the limits of the port boundaries as well as when calling at or leaving the port, except in emergency, e.g.

when giving distress signals;
when rendering assistance to other vessels in distress;
while making way through the ice;
after having obtained special permission of the Harbour Master.

Note: Superiority in use of radio communication means is given to an icebreaker when leading a convoy of ships through the ice; in case there are two or more icebreakers in a convoy – to a leading icebreaker.

Vessels equipped with VHF radio-telephones must keep them operated in the calling Channel stipulated by the Obligatory Harbour Regulations when navigating within a port limit.

(e) **Notice of arrival:** The Master of a vessel should send preliminary information to the Inflot Shipping Agency about the vessel and the cargo not later than 12 days prior to vessel's arrival at the port of destination (for tankers, gas carriers and vessels loaded with liquid chemicals, as a rule, 14 days prior to arrival).

In the preliminary Notice the Master should state the following information:

Name and nationality (flag) of the ship;
Port of departure (last port of call);
Draft fore and aft, cargo carrying capacity, volume of holds, measures of hatches, number and location of 'tweendecks, etc.;
Nature and total quantity of cargo and stowage plan; heavy lifts (over 3 tons) to be shown separately;
Amount and spacing of water ballast (for tankers only), as well as the name of cargo which was unloaded from the vessel before taking ballast;
Particulars of inoperative cargo handling gear as well as whether the vessel requires supply of electric power from the shore for lighting purposes during cargo handling operations (all possible damages which may occur either for lack of all relevant information mentioned above or due to untimely and/or incorrrect data given by the Master to the Port Authorities when advising ETA, etc., are to be for the vessel's account);
Request for any kind of port services.

More precise information about a vessel's approach to the port (roadstead) of destination is to be given by the Master to the Inflot Shipping Agency. Masters of dry cargo vessels are to inform ports of destination about their ETA at first 96 hours and then 12 hours prior to arrival and as far as Masters of tankers, gas carriers and vessels loaded with liquid chemicals are concerned they are to inform Port Authorities 72 hours and 12 hours prior to their arrival at a port.

Masters of tankers bound for loading/unloading oil products are to inform ports of destination 72 hours prior to their arrival that they have in their possession International Certificate on Civil Liability for Oil Pollution Damage.

According to Charter Parties, Sale Contracts and other documents stipulating conditions of carriage of goods by sea, Masters should give necessary information to additional addresses at stipulated time.

The Port of destination Authorities should be immediately informed by the Master about all unforeseen delays during the voyage.

Vessels calling at ports for bunkers, fresh water, provisions, etc. only, should advise their ETA to the Port Administration in due time stipulated above.

The Port Administration should provide Masters of calling vessels with all necessary information regarding anchorage, berthing and handling of cargo not later than 2 hours prior to vessel's arrival.

Since for some ports time and terms of giving Notice of Arrival are different to that mentioned above, Masters are advised to look at the information for a particular port.

(f) **Pilotage:** Pilotage is compulsory for all vessels when calling or leaving U.S.S.R. sea ports, as well as when mooring and unmooring. In addition the Pilots perform shifting berths and other duties related to the harbour operations.

A Pilot having boarded a vessel shall be advised by the Master of the precise draft and other particulars necessary for safe pilotage of a vessel.

According to the Merchant Shipping Code of the U.S.S.R. the Master of a vessel shall be obliged to pay a fine in an amount of double the rate due as pilotage fee for incorrectly declaring the draft, length or breadth of a vessel or its net registered tonnage, irrespective of the liability established by law for the consequences which may occur as a result of the incorrect information.

A Pilot should be ordered through the local Inflot Agency 12 hours prior to vessel's arrival at the Pilot boarding place. More accurate information should be given 4 hours prior arrival unless otherwise stated in the Obligatory Harbour Regulations.

(g) **Anchorages:** A vessel approaching the Port of Call and not having been boarded by a Pilot immediately on arrival, or for any other reason, shall anchor in the anchorage area specially designed for this purpose and under no circumstances let its hull go across the boundaries of this area or prevent other vessels from using the leading lights, navigation marks or lights.

No anchorage is allowed in the prohibited zones shown on the charts, listed in special manuals for navigation and/or in the Obligatory Harbour Regulations as well as those announced in the appropriate Notices to Mariners.

No anchorage is allowed at a distance of less than 1.5 cables length off fairways and leading lines as well as in depths not providing a vessel with a safe anchorage while drifting on the anchor chain.

No vessel shall anchor within the water area of a shipbuilding yard after being refused permission to carry out repairs.

It is prohibited to change a vessel's anchorage by drifting.

Vessels carrying explosives or inflammable liquids must anchor in the areas recommended for them only.

All vessels when at anchor shall carry the lights or the marks in accordance with International Regulations for Prevention of Collisions at Sea. Apart from that every vessel by night, when at anchor, shall be illuminated from stem to stern with additional lights placed so that the hull be as far as possible visible from the surface of the water.

Vessels using a kedge anchor shall, in addition to the lights and the marks as to the International Regulations for Prevention of Collisions at Sea, conspicuously display by night a white light and by day a red flag lowered from the stern by the anchor chain to the extent of half of the side's height.

In restricted visibility whether by day or night, every vessel when at anchor shall use sound signals conforming strictly with the International Regulations for Prevention of Collisions at Sea.

Masters of all vessels when at anchor are not allowed without the Harbour Master's consent, except in emergency, and/or in case of Port and Boarding officials, to give anybody permission to come alongside in a private launch or a small rowing boat whether under oars or sail and board a vessel.

Swimmers must not be allowed to come on board a ship.

Should, in case of emergency, swimmers have been taken on board or strangers have been discovered aboard a vessel, the Master of such ship shall forthwith without dèlay report the fact to the Harbour Master and shall later hand those people over to the Representatives of the Port Administration.

(h) Regulations for entering and leaving U.S.S.R. ports: When approaching U.S.S.R. ports all vessels must follow the recommended courses announced in issue No. 1 of the U.S.S.R. Notices to Mariners (GDNOMD).

All vessels when approaching a port or a Pilot's boarding place as well as when leaving a port during the daytime must keep their National flags hoisted. A vessel's National flag must be kept hoisted on the stern flagstaff from 0800 hrs. in the morning up to sunset, and the U.S.S.R. National flag on the fore mast. In Arctic ports during prolonged period of light National flags must be kept hoisted from 0800 till 2000 hrs.

Every vessel coming from abroad shall hoist Quarantine Signals of the International Code of Signals depending on health and sanitary conditions on board.

For entry permit a vessel must contact the Port Control service either by VHF radio-telephone or by means of visual signals, viz, by day, hoisting her call-sign, and by night, making call-sign signals in Morse Code by searchlight or by Morse-lamp.

No ship shall enter the Harbour until the proper signal has been hoisted at the signal station or by a pilot boat authorising such entry.

No vessel is allowed to enter the Harbour until the prohibition signals hoisted at the signal station shall have been lowered down.

If entry is refused a vessel must immediately slow down, alter course and if possible leave the fairway, and drift or drop her anchor in the recommended area.

Turn of entry to the Harbour is controlled by the Port Administration with regard to tonnage of vessel, nature of cargo, weather conditions in the port area, readiness of the port to start cargo operations and other circumstances.

Simultaneous entry of two or more vessels to the Harbour or vice versa is not allowed in the majority of ports.

In all cases a vessel entering the Harbour must give way to the outgoing one not preventing her manoeuvrability.

(i) Sanitary and Quarantine requirements: It is prohibited by law to contaminate inner and territorial waters of the U.S.S.R. with any kind of substances which are considered to be unhealthy for people or harmful to live resources of the sea. It is also prohibited to discharge into the sea oil contaminated, faecal, washing waters and oil residues; no rubbish, waste foodstuff shall be thrown into the water. The list of harmful substances is published annually in issue No. 1 of the U.S.S.R. Notices to Mariners.

Not later than 6 hours before arrival Masters of all vessels coming from foreign countries to the U.S.S.R. ports should advise Quarantine Authorities by radio through Inflot Agency giving full details of health conditions on board as well as sanitary conditions at the last port of call.

If medical assistance is required on board Master has to contact Inflot Agency.

No shore connection is allowed to a vessel until Free Pratique is obtained.

Masters are advised to ask a Sanitary Officer for inoculation, vaccination, fumigation, de-contamination, etc., if required, whilst he is on board a ship together with the other Boarding Officials.

Veterinary Certificates of Good Health are required for the livestock, all kinds of meat, animal food and raw meat stuff brought to the U.S.S.R. ports from abroad. Certificates should be issued by the proper authorities of the country from which the cargoes have been exported.

Masters should have a Phytoquarantine Certificate for the goods of vegetable nature.

It is prohibited to take ashore fruit, vegetables, grain seeds, plants, plant products, etc., without a certificate issued by a local branch of the U.S.S.R. Agricultural Quarantine Inspection; animals and birds are also not allowed to be brought ashore without getting pemission from the veterinary authorities.

Shipmaster's Report: March 1983.

Removal of garbage, food wastes, ballast, bilge and sewage waters at Soviet ports of the Baltic Sea is free of charge (excluding the port of Tallinn).

(j) Regulations for the Clearance of Vessels on Arrivals and Departures:

Upon arrival at a U.S.S.R. port the Master of a foreign flag vessel has to hand over to a representative of the Inflot Shipping Agency the following documents (filled in with full accordance of the IMO requirements) duly signed by the vessel's administration for further examination by:

(a) *Boarding Port of Call Officials:*

(1) Ship's Patent;

(2) Measurement Certificate;

(3) Load Line Certificate (or International Load Line Exemption Certificate);

(4) Passenger Ship Safety Certificate;

(5) International Certificate on Civil Liability for Oil Pollution Damage (for vessels carrying more than 2,000 tons of oil).

(b) *Health Authorities:*

(1) Ship's Health Certificate;

(2) Derat Certificate;

(3) International Certificate of Vaccination;

(4) Maritime Sanitary Declaration.

(c) *Customs Officials:*

(1) General Declaration;

(2) Cargo Declaration;

(3) Ship's Crew Personal Effects Declaration;

(4) Crew List;

(5) Passenger List.

The Master has to declare to the Customs:

(1) Cargo Manifest, Bills of Lading and other documents for the cargoes carried by the vessel.

(2) Other Ship's documents on request.

The Master fills in a form of Master's Declaration (Shipowner's address, cargo, cases of illnesses on board, if any, etc.) with the Agent's assistance.

In accordance with Article 38 of the Merchant Shipping Code of the U.S.S.R. in case a foreign flag ship which, on calling at the U.S.S.R. port, raises doubts as to her meeting the requirements of safe navigation may, irrespective of whether she possesses the necessary ship's papers mentioned above, be subjected to an examination by way of technical survey on the same basis as ships sailing under the State Flag of the U.S.S.R.

The Obligatory Harbour Regulations to be fully complied with during a vessel's stay at the U.S.S.R. ports are handed over to the Master either by Pilot or by representative of the Harbour Master's Office, or by Agent when arriving for the first time.

Upon sailing from a U.S.S.R. port: No other documents apart from those mentioned above are required in order to obtain the authorisation to leave the port.

No vessel is to get under way without having obtained the permission of the Harbour Master.

The authorisation to leave the port shall be given after a vessel herself and her draft shown in the Master's Statement have been checked by a Port Authorities' representative.

The Harbour Master may not allow a vessel to leave the port, if:

(1) The Cargo Loading Regulations have not been fulfilled, *i.e.* a vessel is considered overloaded or wrongly loaded in case:

a) a vessel's load lines corresponding to the maximum depth to which she should have been loaded are under water without any list;

b) the cargoes loaded in the holds and/or on deck have not been made fast in a proper manner or have not been made fast at all;

c) a vessel has a bad list* caused by faulty loading or her stability does not correspond with the ship's documents;

d) a vessel loaded with bulk or liquid cargoes has not used the necessary materials or accommodations to prevent cargoes from shifting or overflowing in case of vessel's pitching and rolling;

e) the deck cargo is considered as danger to the safety of a vessel and the safety or life on board caused by faulty loading;

f) the corresponding regulations for loading of dangerous cargoes or cattle to be carried by vessel have been broken;

g) other loading regulations have not been abided by in the course loading.

(2) Under other circumstances which may cause a danger to the safety of a vessel and the safety of life on board, as well as in case when the ship's documentation regulations have been infringed.

(3) When the port dues, tolls and fines have not been paid.

All expenses which may occur due to a vessel's possible delay in the port in connection with the reasons stated above are to be for the Owner's account.

Note: *According to the Harbour Regulations a vessel is not allowed to leave a port if her list exceeds 5° or she has trim by bow which was not specified by her construction.

ANNEX 2

The Memoranda for Masters of Foreign Vessels calling at Soviet Ports.

1. On arrival of the ship the Master is to submit to the representatives of the Port Authorities the following documents (IMO Forms) duly signed by ship's administration:

General Declaration (Form I). Filling in of points 8 and 11 is not compulsory (5 copies).

Cargo Declaration (Form II). (4 copies). Filling in of point 6 is not compulsory; points 7, 8 and 9 are to be filled in only for:

a) cargoes for which Bills of Lading were not issued (names of Shippers and Consignees to be stated);

b) transit cargoes;

c) cargoes for other Soviet ports;

d) cargoes of agricultural origin;

Ship's Stores Declaration (Form III) – not required.

Crew's Effects Declaration (Form IV). Amount of Master's and Crew members' valuables (gold, silver, platinum, jewellery, bonds, travel checks, etc.), personal firearms and cartridges (ammunition), explosives and narcotics are to be stated in point 2 (2 copies).

Crew List (Form V) (4 copies).

Passenger List (Form VI) (4 copies).

2. The Master of a ship is to instruct all members of the ship's crew that in accordance with the Rules in force in Soviet ports:

Exportation and importation of Soviet currency is forbidden;

No articles are permitted to be taken ashore or brought on board the ship without permission of the Custom House Authorities;

Articles taken ashore or brought on board the ship and concealed from Customs control shall be regarded as smuggled goods liable to confiscation with a fine imposed;

Likewise, the sale of any articles of foreign origin on the territory of the U.S.S.R. will be regarded as smuggling;

No wastes shall be thrown into the water or on the quay; the discharge of oil contaminated water and/or oil residues is prohibited;

All mooring ropes must be fitted with rat-guard plates;

Only one gangway must be led ashore at night when loading or discharging is not carried out;

It is prohibited to take ashore grain, seeds, plants, plant products, soil, etc. as well as animals and birds;

Violation of the above-mentioned rules will entail penalty in accordance with the laws of the U.S.S.R.

(k) **Customs Examination:** Immediately after the clearance formalities have been accomplished, all the vessel's premises with cargoes and articles not destined for the port of call and not being allowed to be taken ashore are sealed by the Customs Officials. In case a part of cargo and/or articles, not for discharge at destination port, are stowed in the same area as articles for discharge at the destination port, the sealing is carried out after discharge of articles destined for the port.

Extracts from the U.S.S.R. Customs Regulations:

It is allowed to bring in on arrival to the U.S.S.R.:

1. Personal effects in quantities necessary for the trip.

2. Food-stuff, wine and/or alcohol, cigarettes/tobacco in quantities necessary for personal consumption during the trip, but duty free for 1 person not more than:

spirits-1 litre;
wine-2 litres;
250 cigarettes or 250 gm. of tobacco/tobacco articles.

Fresh, salted or smoked meat, fat, dressed poultry, smoked and home-made sausages, eggs, honey, milk and fish-products, but not canned fish – unless permit of the U.S.S.R. Ministry of Agriculture is available.

3. Foreign currency without restrictions on quantity.

Bringing in Soviet currency from abroad (if not stipulated by special agreements), as well as U.S.S.R. State-loan bonds and Soviet lottery tickets is strictly prohibited.

4. Jewellery and every day necessities made of precious metals or jewels without restrictions in quantity (duty free.)

It is allowed to bring in not more than 2 jewellery articles for every day necessities made of pearl only or mixed with pearl having total weight not exceeding 100 gm.

It is prohibited to bring in natural pearl and seed-pearls.

5. Foreign currency, jewellery and every day necessities made of precious metals or jewels and pearl must be declared to the Customs.

6. It is *strictly prohibited* to bring in to the U.S.S.R.:

Fire-arms and ammunition of any military kind;

Narcotics and psychotropic substances as well as appliances for Smoking opium and hashish;

Printed matter cliche, negatives, developed films, photos, video-cassettes and video-discs with films recorded on them, manuscripts, gramophone records and any other type of sound recording, drawings, pictures and articles of fine arts containing data which may do harm to political and economic interests of the U.S.S.R., State security, public order, human health and morals of the people.

It is allowed to take out when leaving the U.S.S.R.:

7. Personal effects, foreign currency, jewellery and every day necessities made of precious metals, jewels and pearl that had been brought to the U.S.S.R. earlier.

(Taking abroad U.S.S.R. currency if not stipulated by special agreements, U.S.S.R. State-loan bonds and lottery tickets is strictly prohibited.)

8. Food-stuff, wine, spirits and cigarettes/tobacco in quantities necessary for personal consumption during the journey but not more for a single trip than:

spirits – 1 litre;
wine – 2 litres;
250 cigarettes or 250 gm. of tobacco/tobacco articles;
black or red caviar – 150 gm.;
ground or instant-coffee – 200 gm.;
spices 200 gm.

9. Articles bought for officially received Soviet currency for personal use only, not more than 5 pieces of jewellery and/or every day necessities made of precious metals, jewellery or any kind of pearl in total; articles and decorations made of silver having total weight not more than 400 gm.

10. It is allowed to take out without quantity restrictions any articles (except forbidden ones) bought for foreign free currency in specialised shops on the U.S.S.R. territory on producing corresponding bills (receipts) given by shops.

11. It is *prohibited* to take out of the U.S.S.R.:

1. Fire-arms and ammunition of any military kind as well as military outfits.
2. Narcotics and psychotropic substances.
3. Nullified securities.
4. Works or art, antiquities (paintings, sculptures, china, articles made of crystal, ceramics, wood, leather, precious and non-precious stones and metals, bone, hand-work, carpets, gobelins, furniture, fancy clothes and footwear, numismatics, works of art, weapons, books, manuscripts, gramophone records, musical instruments, stamps, etc.) and other articles being a high artistic, history making, scientific or other cultural valuables.

Note.: Articles mentioned above may be taken out of the U.S.S.R with special permission of the U.S.S.R. Ministry of Culture provided an export duty equal to 100% of the value stated in the Export Permit has been paid.

5. Antlers and hides of stags.

(l) **Berthing:** Berthing can only be effected with tug assistance and a State Pilot on board. Likewise, no vessel shall leave or shift berth without employing the services of a Pilot authorised by the Port Administration to make the voyage in question.

Vessels must take up the berths assigned to them and conform strictly to the Obligatory Harbour Regulations in force.

A Pilot or the Agent shall provide the Master with all necessary information as regard to depths, tugs, conditions in the Harbour, etc., before mooring and shifting berth starts.

The responsibility for the safety of a vessel during her manoeuvring and berthing as well as for possible damages to a berth or other port facilities shall always rest with the Master.

No vessel is allowed to change berth due to handling of cargo or for any other reason unless the main engines, the mooring winches, the steering gear, etc., are in good working order and there is sufficient number of the members of the crew to ensure shifting berth when required.

It is strictly prohibited to work with vessel's propellers when lying alongside berth. To avoid damage to the underwater parts of a berth while mooring or unmooring every vessel must have the main engines going "dead slow" until her stern is 10 m. from the quay.

When berthing, Masters should use strong and reliable mooring lines and make them fast over the quay pile-moorings and bollards only. It is strictly prohibited to make fast mooring lines over any part of the quay equipment which has not been intended for that purpose.

When lying alongside berth, every vessel must have a gangway or a gangway board with a lifeline secured, led ashore and made fast. There should be a net under the gangway platform and a lifebuoy nearby. Gangways must be sufficiently illuminated at night.

(m) **Stay in port at berths:** When lying alongside berths, all vessels to be moored by long safe ropes which are to be kept fast at all times, and constant watch should be kept by day and at night.

All mooring ropes must be fitted with rat-guard plates.

From sunset to sunrise all vessels' decks, cargo decks and gangways must be illuminated.

Every vessel, whether in the outer roads or in the harbour, must always have on board a sufficient number of crew to be able to ensure both the ship's safety and her everyday routine. Vessel's fire-fighting and life-saving equipment must always be ready for use on board or to render assistance to other vessels or shore objects in case of emergency.

When in port, no vessel is allowed, without having obtained the Harbour Master's permission, to make repairs to the main engines or to the ship's auxiliary equipment thus depriving her of the opportunity to shift berth at short notice in case of emergency.

It is not allowed, without the permission of the Port Administration, to use vessel's boats, underwater oxygen and any underwater apparatus of other types.

No vessel is allowed to clean boilers or discharge any sort of chemicals or organic products into the water, giving off smoke and sparking from vessels' funnels.

(n) **Ship's movement in the harbour and shifting berths:** No vessel shall leave or shift berths without the permission of the Port Authorities. In case there are no provisions in the Contract of Carriage of Goods by Sea or in the Bill of Lading, a vessel shall accomplish one shifting from berth to berth during the course of her loading and shifting upon unloading to the loading berth at the Owners' risk and expense. Any subsequent shifting shall be at the expense of the goods.

All shiftings in the port connected with a vessel's needs, viz. bunkering, loading supplies and/or provisions, making repairs, etc., shall be at the expense of the vessel.

All haulings both during the course of loading and unloading shall also be at vessel's expense.

(o) **Tugs' assistance:** Tugs, it necessary, are usually ordered by the Master according to a Pilot's advice.

In some ports use of tugs during mooring and shifting berths is compulsory due to the heavy conditions of navigation.

Ordering of tugs and payment for the assistance rendered is made in accordance with the tariffs in force. Masters of vessels shall order tugs through a local Inflot Shipping Agency.

A tug's detention time at a vessel's side while waiting for her readiness for the towage is considered to be as the working time and therefore is to be paid accordingly.

For cancellation of a tug, a vessel shall be charged full rate, including detention time and time of passage of a tug from the berth to the vessel and vice versa.

When ordering a tug for unmooring, Master should fill in and sign a special application form given by the Agent. The actual time of completing the towage shall be approved by the Master of a towed vessel.

In ports where the towage is compulsory when mooring and shifting berths, the Master shall be charged for the tugs' assistance whether used or not, and having refused tugs shall be held responsible for the consequences thereupon.

(p) **Notice of Readiness:** In case there are no special provisions in the Contract of Carriage of Goods by Sea, the Master shall, during the established office hours upon the accomplishment of Customs formalities and having obtained Free Pratique, deliver through his Agent in the port, viz. Inflot Agency, a notice of the ship's readiness for loading or unloading to the consignee or the shipper.

The notice of the vessel's readiness shall be considered accepted if she is actually ready to load the cargo into or unload it out of all the vessel's holds or tanks.

(q) Handling of cargo: All cargo handling areas in the ports are under control of the Port Administration which shall provide vessels with labour, tally staff, sheds and warehouses, employees, etc.

To ensure successful handling of cargo the vessel shall, when required by shippers or consignees, receive or discharge cargo day and night, as well as on Sundays and holidays, furnishing free of charge all necessary cargo handling gear. Though in most ports the cargo handling is done by port cranes both from the quays and lighters, a vessel shall, in some ports, use her own cargo handling equipment, which has to be in good working condition.

In the latter case, the Master shall produce to the Agent the Cargo Equipment Certificate which must be valid.

Loading or unloading time is calculated as to the rates stipulated in a Charter Party or according to the Customs of the Port in the absence of same.

Should the port labour participate in the opening or closing of hatches, a vessel's administration shall be responsible for the rules of safety engineering to be complied with.

Opening and closing of mechanised ship's hatches shall always be done by the ship's crew.

Should shore cranes be used for loading or unloading instead of a vessel's cargo-handling equipment, the Master shall beforehand remove aerials, aerial halyards, stay rods, wires, etc., crossing the air space over a ship's hatches and preventing the shore cranes' derricks from free circulation.

The vessel's derricks shall not project over the sides.

(r) Agency: All foreign vessels upon arrival at the U.S.S.R. ports are attended by the Maritime Agencies Inflot.

Inflot Agencies provide foreign vessels with the following services:

Inform the Port Authorities and other organisations about vessels' expected time of arrival (ETA), nature and quantity of cargo to be handled, expected time of loading or discharging, etc.;

Render assistance to the Masters in obtaining Pilots, tugs, berths, launches, etc.;

Perform all the necessary formalities connected with the vessels' arrival and departure;

Ensure that Masters are acquainted with the Port Rules, Obligatory Harbour Regulations as well as other documents and instructions issued by the Port Authorities;

Give advice to the Shipowners and other interested parties regarding vessels' movement and the prospects for the handling of cargo;

Render help in speeding up cargo handling operations;

Provide vessels with supervisors and tallymen;

Prepare time sheets and submit them to the Masters, Port Authorities and Shippers (Consignees) for their further approval;

Sign on Masters' behalf cargo and other documents;

Arrange bunkering, delivery of fresh water, provisions, technical supplies and all kinds of ship-repairs;

Render help to the members of the crews in obtaining medical assistance;

Make payment of dues, charges, fines (if any), etc., on behalf of the Shipowners and for their account;

Take all necessary measures for improvement of the handling of cargoes and ships' services;

Look after the Ccurt (Arbitration) cases and cargo claims on behalf of the Shipowners;

Make Sea Protests as well as translation and duplicating of any documents on Masters' requests;

Repatriate members of the crews from the U.S.S.R. to their home ports;

Invite surveyors qualified by the U.S.S.R. Register of Shipping to conduct vessels' surveys;

Make extension of ships' documents;

Render help to the Shipowners in delivering and redelivering of their vessels on time charter;

Assist in arranging cargo fumigation on board;

Perform any commissions on the instructions of the Shipowners in regard to the ships' services and protection of their interests before any Authorities.

It is in the interest of the Master to advise Inflot Agency timely information as regard to a vessel's name and flag, ETA, gross register tonnage; draft fore and aft; position of cargo in hold (stowage plan); number, weights and location of heavy lifts, number and length of oversized (over 9 m.) pieces and Owners' cable address and telex number thus putting the Agent in a position to calculate the approximate sum of the disbursement expenses and ask the Shipowners to remit same (disbursement accounts are to be paid before vessel's departure).

Note: Bearing in mind the fact that most of the shore offices are closed on Sundays and holidays, the Master shall cable to Inflot Agency well in advance his order for bunkers, repairs, technical supplies and cash to enable the Agent to make necessary arrangements.

All branches of Inflot Agency work round the clock, including Sundays.

Cable address of any branch of Inflot Agency is "Inflot", e.g. "Inflot Leningrad".

(s) Fire safety measures: Fire safety measures at U.S.S.R ports must comply with the provisions of the International Code for the Carriage of Dangerous Goods by Sea. Every vessel upon arrival at a port must keep constant fire watch day and night and have fire-fighting and life-saving equipment always ready for action. Members of the crew must keep strictly to the Fire Safety Regulations especially during vessels' stay at oil and timber berths. Giving off smoke out of the funnels is strictly prohibited. In all the U.S.S.R. ports a fire brigade could be called over the phone by dialling 01 in case of fire.

(t) Medical assistance: Medical assistance, if required, is available, including vaccination and inoculation as well as dispensary and hospital treatment in all the U.S.S.R. ports. In case of emergency an ambulance or a doctor should be called for by telephone – 03 in all the ports.

(u) Customs of the ports: Customs of the ports should apply in case:

(1) there is no Contract of the Carriage of Goods by Sea at all;

(2) there are no provisions in a Charter Party or in the Bills of Lading in respect of items covered by these Customs;

(3) a Charter Party or a Sale contract and/or any other Contracts of the Carriage of Goods by Sea specially refer to these Customs of the Ports.

(v) National and general holidays of the U.S.S.R.: National and general holidays in the U.S.S.R. are fixed.

5 days working week with 2 holidays has been introduced for most of the industrial enterprises, government and commercial offices and other institutions. Saturdays and Sundays are weekly holidays in the U.S.S.R.

The other holidays are:

1st January (New Year's Day); 8th March (International Women's Day); 1st and 2nd May (Days of International Workers' Solidarity); 9th May (World War II Victory Day); 7th and 8th November (Anniversary of the Great October Socialist Revolution, 1917); 7th October (U.S.S.R. Constitution Day).

(w) Places of Recreation for foreign seamen: In the majority of the Soviet commercial sea ports foreign seamen can spend their spare time in the International Seamen's Clubs which can offer concerts by professional and amateur actors and singers, evenings of public hearing of recorded Russian and foreign music, Soviet and foreign films, etc. Sightseeing is usually organised by the local excursion bureaux.

(x) Summer Time: 1st April to 1st October – clocks advanced 1 hour at 0000 hrs.

ARCHANGEL: 64.34 N. 40.30 E.

LOCATION: A White Sea port. Archangel is situated at the mouth of the Severnaya Dvina River, in the S.E. corner of Dvina Bay. A part of the harbour is situated at the Northern end of the Povrakulsky Island, at the junction of the Maimax River and the Kuznechikha River, and is called the Economia Avant-port. The total length of the port area is about 30 miles.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Notices of ETA in accordance Soviet Wood Charter Party. Pilot boat located in area of the light buoy "Mudyugsky I". VHF Channel 16. Pilot boat is tug-boat with word "Pilot" on wheelhouse. Vessels awaiting Pilot may anchor at safe distance to North from pilot boat location. In event bad weather pilot boat goes to shelter, being available by VHF radio.

While waiting for a Pilot, vessels may lie at anchor at a safe distance to the North from the pilot boat location.

In the event of bad weather a Pilot shall board a vessel at a sheltered place shown by him.

When a Pilot is not able to board a vessel due to weather conditions, a pilot boat is usually situated on the Southern side of the Mudyug Island. In this event vessels should anchor at the entrance of the channel from seaward and wait for a Pilot's arrival.

ANCHORAGES: There are several places which can be used by foreign vessels for anchorage. They are:

(1) The outer roads with depths from 10.0 m. to the North and N.W. from the reception buoy "Mudyugsky I".

(2) The Chizhovsky roadstead with depths of 7.0 m. – 9.0 m. is used by all vessels while the Customs formalities are carried out both before entering and leaving the port.

(3) The Solombala roadstead with depths of 5.0 m. – 9.0 m. is used by vessels for anchorage while awaiting a berth for loading cargo.

(4) The roadstead of the Maimaksansky timber port with depths of 5.0 m. – 9.0 m. is used by vessels while awaiting a berth for loading cargo or when awaiting good weather for going to sea being fully loaded.

(5) The Lower-town roadstead with depths of up to 6.0 m. is used for anchorage by coastal traders.

(6) The Town roadstead with depths of 6.0 m. – 9.0 m. is used for anchorage by vessels while waiting for bunkering or time for passage under the railway bridge.

(7) The Krasnoflotsky roadstead with depths of 9.0 m. is used for anchorage by vessels awaiting a berth for loading or a passage time under the railway bridge. The ground at all roadsteads – mud and sand; anchoring is performed according to the Pilot's recommendations.

RESTRICTIONS: Ice breaks up in April. Port area open from end of April through to November.

During the time of high water vessels can enter the port through the approach channel Berezovy Bar if having length not more than 160 m. and draft not exceeding 8.0 m. Changes of passage drafts are published in the U.S.S.R. Notices to Mariners. Vessels going to Timber Mills No. 2 and No. 3 as well as to the cargo area Bacariza pass through the central draw span of the railway bridge once during 24 hours. During bad visibility (less than 5 cables) movement of vessels within the port is not allowed.

In the Approaches to the Port there is an overhead power cable between:

(a) 64° 37.91′ N., 40° 29.05′ E. and

(b) 64° 37.72′ N., 40° 29.03′ E. The vertical clearance is 45.0 m.

HEALTH: All vessels coming from foreign countries inspected by Sanitary Office. If no diseases vessel obtains Free Pratique. If vessels entering after calling at another U.S.S.R. port, Pratique automatic.

RADIO: All information from sea may be routed through Murmansk Radio (UMN) and Archangel Radio (UGE), A1 500 kHz, A3 2182 kHz

All vessels when approaching the port of Archangel should establish radio contact through the coastal "Archangel Radio" station which operates 24 hours per day on the following frequencies:

Call Sign	Frequencies (kHz)		Type of transmission	Time	Remarks
	Working	Calling			
UGE	500/476	500/480	A1A	H24	
"Archangel-Radio"	2182	2182	H3E	H24	
"Archangel-Radio-1" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24	
"Archangel-Radio-8" (Inflot Shipping Agency)	156.375*(67)	156.8*(16)	F3E	H24	Operates during period of navigation only
"Archangel-Radio-5"	156.700*(14)	156.8*(16)	F3E	H24	
Vessels' movement control (VMC)	156.700*(14)	156.7*(14)	F3E	H24	

*Frequencies are given in MHz.

**CPR – Central Port Radio station.

The storm signals station is situated in the Solombala area on the embankment of the Severnaya Dvina River named after George Sedov (Lat. 64° 35′ N., Long. 40° 30′ E.).

Storm signals are shown by the International Code of Signals by day and by Morse system at night.

Masters of vessels proceeding to the port of Archangel should advise ETA and all necessary information to the Inflot Agency as per conditions of the "Soviet Wood" Charter Party.

24 hours prior to arrival advise ETA to Inflot Agency. Four hours prior to approaching the "Mudyugsky I" Masters should advise more precise time of arrival.

TUGS: If necessary ordered 2 hours before arrival and normally join vessel near berth. Usually use ship's lines.

BERTHING: To certain extent depends upon tides. 37 berths available with depths alongside up to 9.6 m.

There are a large number of berths in the port along the river front, as well as at the Economia Avant-port.

Berths are equipped to handle timber, wood-pulp, paper, machinery and general cargo. There are enclosed warehouses and concrete floor sheds in the port.

CARGO HANDLING FACILITIES: Berths of the commercial port are equipped with mobile electric cranes of up to 32 tons capacity. Loading of timber from berths of timber mills is effected by shore cranes and vessels' cargo gear. There are also floating cranes from 5 to 100 tons capacity as well as other cargo handling equipment and interport transport means. Container crane of 30 tons capacity and back-up facilities.

BRIDGES: Vessels proceeding to load cargo at sawmills 2 and 3 have to pass under bridge which is opened once a day.

STEVEDORES: No particular ETA advices to stevedores/shippers required except those mentioned in Soviet Wood C/P. Loading rates, etc., also stipulated by Charter Party.

Mobile electric cranes of up to 20 tons capacity are operated on the quays. There are also floating cranes of up to 50 tons capacity, other cargo handling equipment and intra-port transport facilities. Sometimes, cargo handling is by vessels' gear.

MEDICAL: If any medical attention or prompt assistance required, Master has to contact Agent. No advance notice required. Clinic and hospital available.

DENSITY: Fresh water practically throughout port.

FRESH WATER: Usually delivered by self-propelled barges (minimum charge for 15 tons). A few berths equipped with shore water lines.

FUEL: Bunkers (gas oil and marine diesel fuel) can be taken from barges stationed in the Town roadstead or can be delivered by lighters.

FIRE PRECAUTIONS: While lying alongside timber berth vessel to take maximum fire precautions.

GANGWAY/DECK WATCHMEN: Not available from shore. Usual watch kept by ship's crew.

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CERTIFICATES:

Seaworthiness.
Measurement.
Loading Line.
Cargo Equipment.
Safety Equipment Certificates.
Radio Telegraphy.
Radio Telephony.
Oil Pollution Prevention.
Sewage Pollution Prevention.
Derat Certificate.

CUSTOMS ALLOWANCES: Tobacco/wine: No quantity limits, but not allowed to be brought ashore.

IDENTIFICATION CARDS: Only Seamen's Books required.

CONSULS: No Consuls in Archangel.

REPAIRS: All types of repairs possible, also underwater surveys.

DRY DOCKS: There are floating docks with capacity up to 7,000 tons.

SURVEYORS: Register of Shipping of the U.S.S.R.

REPATRIATION: Repatriation and crew changes require visa formalities.

AIRPORT: Airport near town. Served by regular airlines.

TIME: GMT plus 3 hours, October 1st to April 1st. GMT plus 4 hours April 1st to October 1st.

HOLIDAYS: General holidays: all Sundays and Saturdays: January 1st (New Year's Day); March 8th (World Women's Day); May 1st, 2nd (World Labour Day); May 9th (Victory Day); October 7th (U.S.S.R. Constitution Day); November 7th, 8th (Great October Socialist Revolution Day). Cargo work on these days at shippers' discretion.

POLICE/AMBULANCE/FIRE: Police 02; Ambulance 03; Fire 01.

TELEPHONES: Can be arranged on board.

SERVICES: Compass adjusting, radar and radio repairs, etc.

SHORE LEAVE: Each crew member properly signed in Ship's Articles and having valid Seaman's Book allowed ashore.

BANKS: None.

EMERGENCY CO-ORDINATION CENTRE: None.

STORING: See "Prelims".

1. Barge or truck.
2. Vessels can be stored during loading.
3. Trucks can proceed alongside.
4. No.
5. Customs permission required.
6. No.

DELAYS: On account of rain when loading timber.

NAVIGATION: Masters proceeding for loading timber should bear in mind that the swing bridge on their way to Timber Mills No. 2 and No. 3 is open once daily.

All vessels with drafts of less than 3.6 m. especially when engaged in towing timber rafts, should keep out of the way of deep-drafted vessels when passing through narrow places and approaching channels both at sea and in the river, and should not hamper their safe passage in such places. They should also safely pass vessels engaged in dredging of a channel.

When approaching a bend in a channel, every vessel should beforehand give a signal by 1 prolonged blast on her whistle or siren, reduce her speed and when it is safe and practicable, keep to that side of the channel which lies on the starboard side of such vessel.

Every Master when passing through a narrow channel, or approaching a bend in a channel should take positive early action prescribed by the International Regulations for Preventing Collisions at Sea to avoid a risk of collision with a vessel approaching from the other direction.

Deep draft vessels shall not overtake each other when navigating in the channel of the Beresovy Bar. A vessel proceeding to the port along the course of the channel must keep out of the way of another vessel leaving the port.

No vessel shall navigate in the port harbours in restricted visibility when navigational lights, marks, leading lights, buoys, etc. are not visible.

Ice: At the head of Dvina Bay drift-ice extends as far as 12 miles from the shore by the end of November. The Severnaya Dvina estuary usually gets frozen over at the beginning of November. At Dvina Bay the ice usually breaks up in April and at the Severnaya Dvina estuary – at the beginning of May. Thus, navigation in the port area lasts all year round for vessels with ice-class for White Sea.

Powerful ice-breakers, ice-strengthened vessels and tugs are maintained by the Port of Archangel Authorities to assist in navigation of the Dvina Bay waters and off the coast when ice conditions prevail.

Tide: The tidal range at the head of Dvina Bay reaches 0.8 m. – 1 m. and at Mudyug Island 0.1 m. – 0.5 m.

The in-going flood stream is usually stronger and about 1 hour longer in duration than the out-going ebb stream.

Sometimes the in-going stream at the bar of Severnaya Dvina may be hardly observed, being reduced to a few minutes of slack water. It may run steadily for some time then gradually attains its usual strength and goes on to set up to the time of high water.

The tidal streams in the Severnaya Dvina are considerably influenced by both strength and direction of the wind.

Moderate Northerly and Westerly winds increase the height of the tide and hold the fall of the water.

Only the in-going flood streams have been observed at the Severnaya Dvina estuary at springs. The extreme tidal range of the water level observed there is about 4 m.

DEVELOPMENTS: For the immediate future no draft increase expected. Some berths under reconstruction and cranes being installed to load timber.

AUTHORITY: Chief of the Port of Archangel, Naberezhnaya Lenina 36, 163061 Archangel, U.S.S.R. *Tel:* 37840. *Telex:* 242111. *Cables:* 163061 Morport Archangel. *Contact:* Via VHF.

AGENT: Shipping Agency "Inflot", Archangel. Tel. 35874, 38573, 34040. Telex: 242115, 242231.

BATUMI: 41.39 N. 41.38 E. (See Plan)

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Batumi situated in South of Black Sea Caucasian coast, at head of Batumi Bay. Navigation is year round. Navigational range marks to note when approaching port are: Batumi Beacon, Burun-Tabia Light, Batumi Light Buoy with siren and Batumi Leading Light Marks. When proceeding Batumi, Master should give 96 hours' notice prior arrival, advising Port Controller and "Inflot" Agency: time of arrival, description and quantity of cargo brought in, location, ship's draft and length, as well as declare services required. 4 hours' prior to approaching port, Master shall advise more precise time of arrival. Inflot will arrange Pilot. Pilot on VHF Channels 16 and 12.

Pilot boards vessel either at the Receiving Buoy or in the Outer Port Roads. Watch is kept by a pilot boat day and night.

ANCHORAGES: The port harbour is protected by a mole from the seaward and provides a safe anchorage except at times when S.W., West and N.W. winds blow and the "Tyagun", strong variable current with surge is formed.

At the time of "Tyagun" vessels are recommended to stop cargo handling operations and go out to sea.

During S.W. winds which are considered particularly dangerous and usually accompanied by heavy surge, Masters should observe special precautions and take all necessary measures to avoid impact with the mole.

The Outer Roads of the port with depths of about 9 m. – 20 m. and 0.5 cables in width, extend for a distance of about 1.5 miles to the E.N.E. from the Batumi Light Buoy along the edge of the shoal. The bottom is mud and sand.

The Inner Roads are situated between the Western coast of the Batumi Bay and the shoal extending from the Southern and S.E. coasts of the Bay. Depths in the Inner Roads are between 25 m. – 11.5 m.

The anchorage in the Inner Roads is exposed to North winds. However it is not safe during strong winds blowing from other directions.

Every vessel when in the inner roads must take necessary measures so as not to drag her anchors.

The recommended anchorage is in the Outer Roads at a distance of 7.8 cables to N.N.E. from the Eastern side of Batumi Point, depths 9 m. – 14.4 m.

In the Outer Roads vessels may anchor only after having obtained the Harbour Master's permission and according to Pilot's recommendation.

In the Inner Roads vessels may obtain anchorage only Eastward of the entrance leading line. It is strictly prohibited to lie at anchor both on the leading line and to the West of it.

BALLAST: In case of stormy weather, in Autumn and Winter particularly, vessels without cargo must enter the port with ballast water on board, having ensured fore draft not less then 1.5 m. – 1.8 m.

Ballast water should not be contaminated with oil residues.

RESTRICTIONS: Vessels may enter and leave the port at any time of day and night. All vessels when entering or leaving the port must have keel clearance of not less than 0.3 m. (1 ft.).

In the event of stormy weather vessels approaching the port at time of S.W. and N.W. winds particularly, should obtain Harbour Master's entry permit. Vessels coming to the port without cargo are obliged to enter the port with ballast water taken in such a way that bow draft should not be less than 1.5 m. – 1.8 m. Ballast water must be clean. If due to the "Tyagun" vessels are not allowed to enter the harbour, they should anchor either in the Outer or Inner Roads.

All necessary information as regard to changes of wind, possibility or turn of entry to the port for vessels at anchor in the Outer Roads, is given by the Harbour Master over the VHF radio-telephone or by the signal station by flags of the International Code of Signals, in Morse Code or by semaphore signals.

MAX. SIZE: For oil carriers: Berth No. 1, 175 m. LOA, 36.0 ft. draft; Berth No. 2, 165 m. LOA, 30.5 ft. draft; Berth No. 3 165 m. LOA, 30.5 ft. draft; Berth No. 4, 150 m. LOA, 29.5 ft. draft: Berth No. 5, 212 m. LOA, 29.5 ft. draft. For Cargo ships: Two berths where vessels may discharge. Maximum draft 32.5 ft.

RADIO: Send ETA to "Inflot Batumi" 96 hours and 48 hours in advance and confirm 4 hours in advance.

All vessels when approaching the port of Batumi should establish radio contact via Batumi Radio port radio station operating 24 hours per day on the following frequencies:

Call Sign	*Frequencies (kHz)* *Working*	 *Calling*	*Type of Trans-mission*	*Time*
UFA	500	500	A1A	H24
"Batumi-Radio"	2182	2182	H3E	H24
"Batumi-2" (Port Controller)	156.8*(16)	156.8*(16)	F3E	H24
"Batumi-1" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24

Radio-telephone communication via VHF Channels is carried out in A1A type of transmission after preliminary arrangement.

*Frequencies are given in MHz.

**CPR – Central Port Radio Station.

Shore signal station is situated 1.6 cables W.N.W. from Batumi Point. International Code signals, and sometimes storm signals, are hoisted at the mast of the signal station.

VHF: Port Control on Channels 16, 13 and 14. Pilot on Channels 16 and 12. Tugs on Channel 9.

BERTHING: The berths of the port with depths alongside 8.0 m. – 13.0 m. are equipped to handle crude oil and oil products, bulks (coal, grain, ores) and general (machinery and mechanical equipment) as well as passenger shipping.

A vessel should lie at a berth with her bow directed to the port entrance and with her anchor dropped from the proper side. Berthing in the harbour may only be effected with tugs' assistance.

A vessel may be berthed at the outer side of the Oil Jetty after having obtained the Harbour Master's permission.

Vessels entering or leaving the harbour are not allowed to pass vessels loading at the outer (Northern) side of the Oil Jetty at a distance of less than 80 m.

The berths of the port are equipped with electric cranes of up to 20 tons capacity. There is also a floating crane of 100 tons capacity. Other cargo handling equipment, covered warehouses and concrete floor sheds are available. Rate of grain loaders 5 t.p.h. – 120 t.p.h.

TANKERS: Mooring buoys are placed to the North of the Oil Jetty and a pipe-line for loading tankers of up to 40,000 d.w.t. (Max. LOA 250 m. Max. draft 40 ft.) is led up to them. Mooring of such tankers is effected with tug assistance under control of the Senior Port Pilot. Vessels moored to these buoys should drop 2 anchors from the bow with 7 – 8 shackles of anchor chain and strong mooring lines should be lead to mooring buoys from the stern and made fast.

When lying at mooring buoys a vessel should keep a 24 hour VHF watch on receiving Channel and observe corresponding rules of the Port.

Products Handled: Light fuel oil, heavy fuel oil and gas oil.

TIDE: The range of water level in the port area is small and is due to the effects of strong winds. The maximum range observed 0.6 m.

MEDICAL: Medical attendance in local seamen's hospital. Masters to advise by radio prior arrival of medical attendance required on board.

DENSITY: 1018.5.

FRESH WATER: Supplied ex-shore to ship directly. Maximum pressure 20 t.p.h. Also supplied ex-water barge. Maximum quantity delivered by barge is 650 tons. Rate about 60 – 80 t.p.h.

FUEL: Bunkers may be taken at the oil berths and can also be delivered by bunkering vessel to a ship handling non-dangerous cargo. In the latter case fire precautions must be strictly observed by the vessel taking bunkers.

FIRE PRECAUTIONS: No special precautions. There is 1 fire-fighting boat.

OPENING/CLOSING HATCHES: According to Charter Party and contract.

CUSTOMS ALLOWANCES: Tobacco: No restrictions. Wine and/or spirits: No restrictions.

IDENTIFICATION CARDS: Not required.

CONSULS: Turkey.

REPAIRS: Only minor repairs are possible.

AIRPORT: Batumi connected by airlines with different towns in Soviet Union. Airport situated about 5 km. from port.

TIME: GMT plus 4 hours. GMT plus 5 hours in Summer.

HOLIDAYS: New Year's Day; 8th March (Women's Day); 1st May; 7th October; 7th – 8th November; but port works on those days.

SHORE LEAVE: Crew members allowed ashore till midnight.

SHIPMASTER'S REPORT: (Updated 1986). There is now a sea-loading berth at this port immediately outside the harbour, the vessel lying to 2 anchors and stern on close to the breakwater and close Eastward of the harbour entrance.

The stern is secured to 2 buoys, using ship's ropes, 5 to a port quarter buoy and 3 to a starboard quarter buoy.

The bow is in about 60 ft. of water and the stern in about 42 ft., and vessels of up to about 40,000 tons d.w.t. are loaded there, this vessel loading safely to a draft of 37 ft. 6 in. (40 ft. in 1986).

Two 10 in. pipe-lines are connected on the starboard side, 1 for discharging ballast ashore and 1 for loading at a rate of about 1,600 t.p.h. The charge for discharging ballast ashore is 0.25 rbls. per ton and it is not permitted to discharge any ballast into the harbour.

1 copy of a Money List was required.

AUTHORITY: The Port of Batumi Authority, 20 Gogebashvili Street, 384500 Batumi, U.S.S.R. *Tel:* 3-29-59. *Cables:* Morport, Batumi.

AGENT: The Port of Batumi Main Maritime Agency "Inflot", Postal address: 20 Gogebashvili Street, Port of Batumi, U.S.S.R. Cables: Inflot Batumi. Tel: 9-24-15.

BELGOROD-DNESTROVSKY: 46.12 N. 30.21 E.

(See Plan)

GENERAL: The commercial sea port of Belgorod-Dnestrovsky is situated on the North-Western part of the Black Sea coast, on the right side of the Dnestrovsky Estuary (the Southern Basin), at a distance of 80-90 km. to the S.W. of the port of Odessa. Navigational season lasts all the year round, with powerful (600 h.p. – 1,200 h.p.) tug assistance during severe Winters. The Tsaregradsky Lighthouse and the Tsaregradsky Leading Line should be used as guiding points when approaching the port.

Vessels should approach the port along the channel of the Dnestrovsky Estuary which is provided with a good navigational marks system.

DOCUMENTS:

7 General Declarations, IMO FAL Form 1
7 Crew Lists, IMO FAL Form 5
2 Crew's Effects Declarations IMO Form 4
2 Money Lists.
2 Cargo Declarations IMO Form 2
Safety Certificates.

PILOTAGE: Pilotage compulsory for all vessels. A Pilot usually boards vessel at Reception Buoy No. 1 (Lat. 46° 04′ N. Long. 30° 30′ E.) situated 1.2 miles to the S.E. of the Tsaregradsky Lighthouse.

ANCHORAGE: The port outer roads with depths of up to 14 m. are situated 0.5 mile to the S.E. of the Reception Buoy. The holding ground is good. There is an inner roadstead situated within the port area where usually two vessels can be anchored pending berthing.

RESTRICTIONS: Vessels are allowed to navigate along the channel during daytime only. The port can be entered by vessels with draft of up to 4.5 m. and the maximum height (from the water level) of 28.0 m. Vessels should follow the channel at a speed not more than 5 knots.

According to dredging project, which is to be effected by end of 1988, the depths of the Approach Channel and at the berths are to be increased to 6.0 m.

During bad visibility vessels which are not equipped with radar are not allowed to navigate along the channel. Vessels are piloted under the bridge 2-3 times daily (during daytime only).

RADIO: Communication is effected through the port radio station "Belgorod-Dnestrovsky-Radio"

Call sign	*Frequencies (MHz)* *working*	 *calling*	*Kind of transmission*	*Time of work*
"Belgorod-Dnestrovsky-Radio"	156.8	156.8	F3	H24

Harbour Master on VHF Channel 10.

Notice of Arrival: When approaching the port of Belgorod-Dnestrovsky Masters of vessels should not later than 48 hours prior to arrival advise the Harbour Master of ETA, draft, maximum height of a vessel in ballast (from the water level up to the top of a mast), kind and quantity of cargo services required to the vessel. 24 and 4 hours prior to arrival the Master should advise more precise ETA.

TUGS: If necessary, are ordered by the Master after having consulted the Pilot.

BERTHING: The berths of the port have depths alongside of up to 5.3 m. and are equipped to handle timber, containers, generals (rubber, non-ferrous metals, pipes, tinned products, fresh vegetables, fruit and citrus fruit) and other cargoes. There are covered warehouses and open concrete floor sheds in the port.

A port area Bugas is situated 14 km. to the South of the port, at the mouth of the Estuary.

Vessels fully laden with ballast water are as a rule allowed to moor at berths if winds do not exceed force 6. A vessel of a smaller size may be turned broadside to a loaded vessel of a bigger size but not vice versa. It is strictly prohibited to turn a third vessel broadside on to another 2 vessels having been turned broadside earlier.

Opening and closing of mechanised hatches is usually performed by the vessel's crew. Opening and closing of ordinary hatches is carried out by the crew on arrival and departure of a vessel and by the dockers during cargo handling operations. On the berths and on the port territory there are cranes of 20 tons lifting capacity.

FRESH WATER: Available at berths.

FUEL: Diesel oil available.

REPAIRS: Only minor repairs possible.

CONSULS: None.

TIME: GMT plus 3 hours October to March. GMT plus 4 hours April–September.

DEVELOPMENTS: See "Restrictions".

AUTHORITY: The Port of Belgorod-Dnestrovsky Authority, 81 Shabskaya Street, 272300 Belgorod-Dnestrovsky, Odessa Region, U.S.S.R. *Tel:* 2-25-51. *Cables:* Morport Belgorod-Dnestrovsky

AGENT: Shipping Agency "Inflot" in the Port of Belgorod-Dnestrovsky. Postal address: 81, Shabskaya Street, 272300 – Belgorod-Dnestrovsky, Odessa Region, U.S.S.R. Cables: Inflot Belgorod-Dnestrovsky. Telephone: 2-22-01; 2-56-73. Telex: 232717.

BERDYANSK: 46.37 N. 36.36 E. (See Plan)

DOCUMENTS: Also refer to beginning of U.S.S.R. section.

- 5 Crew Lists.
- 5 General Declarations.
- 4 Cargo Declarations.
- 2 Crew's Effects Declarations.
- 1 Master's Declaration.
- 1 Master's Declaration about arrival at a Commercial Port of the U.S.S.R.
- 2 Stores Lists.
- 1 Maritime Declaration of Health.

For discharging vessels also: Manifests, Bills of Lading and Cargo Plan.

For all vessels, necessary to have all Ship's Papers and Ship's Certificates.

APPROACHES: The Port of Berdyansk is situated in the N.E. part of Berdyansk Bay, on the Northern coast of the Azov Sea.

Inner roads and port facilities are protected from Southern and S.E. winds by a mole and a breakwater.

Navigation in the port is all year round, but in Winter ice-breaker assistance is necessary for about two months.

Vessels should proceed to the harbour through the approach channel, with a least depth of 8.2 m.

PILOTAGE: Pilotage is compulsory in Azov Sea. Kerch Pilot meets vessel near the entrance to the Kerch Strait and takes vessel to Berdyansk. Berdyansk Pilot meets vessel at Reception Buoy No. 2 (Lat. 46° 36.75′ N., Long. 36° 36′ E.). Telegraphic address of pilot station is: "Harbour Master Berdyansk". Vessels bound for Berdyansk should cable "Inflot Berdyansk U.S.S.R."/Ship's Agents/advance notice of ETA: ETA Berdyansk (date shown in group of four figures and if possible GMT of arrival); draft, beam, depth to upper deck, flag, b.r.t., n.r.t., length, if for discharging, kind of cargo should also be advised. After which Inflot arranges pilotage through Kerch Channel. First notice of ETA to be sent after leaving last port and then 72, 48 and 24 hours' notice of ETA.

For contacting pilot station use VHF Channel 16. Pilot boat has a white hull with black writing on her side: "Pilot-29". Vessels wait for the Pilot at the outer road anchorage.

ANCHORAGES: Vessels may obtain good anchorage with depths up to 8.0 m. in the Port of Berdyansk outer roads situated on both sides of the approach channel leading into the harbour.

The outer roads are well protected from Northerly winds, but during Southern and S.W. winds the anchorage is troublesome.

At time of strong S.W. swell ships in the outer roads are usually effected by heavy pitching and rolling, and plenty of cable should be paid out on both anchors. Holding ground in outer roads is shell and mud.

RESTRICTIONS: Vessels can enter and leave at any time of day and night. Vessels over 225 m. LOA can only enter during daytime.

MAX. SIZE: The max. permitted draft for entry to the port is 7.9 m., if max. draft then even keel.

HEALTH: To obtain Pratique it is necessary to complete 1 Maritime Declaration of Health and hand it in for doctor. In the event of any disease or fever contact Agents.

RADIO: *Notice of arrival:* 96 hours and then 12 hours prior to arrival at the port, Masters should advise the Port Administration via the local Inflot Agency, time of arrival and the maximum draft of a vessel. Not later than 2 hours prior to approaching Reception Buoy No. 2, placed at the beginning of the approaching channel, Masters should advise more precise ETA to the Harbour Master.

Vessels should establish radio contact through "Berdyansk Radio" Port Radio Station operating 24 hours daily on the following frequencies:

Call Sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time*
UBX	500/418	500	A1A	H24
"Berdyansk-Radio-2"	2182	2182	H3E	H24
"Berdyansk-Radio-1" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24
"Berdyansk-Radio-5"	156.8*(16)	156.8*(16)	F3E	H24

*Frequencies are given in MHz.

**Central Port Radio Station.

RADAR/VHF: There is no port radar service in Berdyansk.

Use VHF Channel 16 initally and further communication on another Channel on agreement.

TUGS: Join vessels abreast of breakwater. Vessel's lines usually used. No extra charge for tug lines. Vessels under 1,500 g.r.t. require 1 tug and vessels over 1,500 g.r.t. require 2 tugs.

BERTHING: Berth Nos. 1 – 2: Length 380 m. These berths are for general cargo. Berth Nos. 3 – 4: Length 270 m. These berths are for bulk cargoes (ores, minerals). Berth No. 5: Length 232 m. This berth for scrap iron. Max. permissible draft 7.9 m. Berth No. 6: Length 132 m. Berths No. 7 – 8: Length 351 m. Berth No. 9: Length 140 m. Load/discharge is by shore equipment. Depths alongside Berths No. 1 – 8 up to 7.9 m.

CRANES: All quays are equipped with electric cranes. Berth Nos. 1 – 2 are equipped with SOKOL type crane, of up to 32 tons capacity. Berth Nos. 3 – 4 – 5 are equipped with Albatros type crane, of up to 20 tons capacity. Berth No. 8 crane type SOKOL.

SPECIALISED CARGO-HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Provided by the Port of Berdyansk. Tel. Manager: 62 – 565.

MEDICAL: Medical attendance possible. All members of the crew must have sanitary (yellow) book indicating vaccinations, fever, etc. One hospital available.

TANKERS: No facilities available.

DENSITY: Approximately 1008. Salinity is 11.9.

FRESH WATER: Supplied at berths. Price 0.50 Rbls. per ton.

FUEL: Available in limited quantities. Supplied by special tanker.

CONSULS: No consuls in Berdyansk.

REPAIRS: Only minor hull and machine repairs.

DRY DOCKS: No dry dock in Berdyansk.

SURVEYORS: Inspection of the Registry of the U.S.S.R. Branch Office; Tel. 62 – 452. No cargo inspectors.

GANGWAY/DECK WATCHMEN: Not compulsory or necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco, wine, spirits are free of Bond.

CARGO GEAR: There are cargo-handling equipment and intraport transport facilities. No heavy lift crane.

REPATRIATION: Possible.

AIRPORT: Distance 15 km. Internal Soviet airlines only.

TIME: GMT plus 3 hours October to April. GMT plus 4 hours April to October.

HOLIDAYS: New Year's Day (1st January); International Woman's Day (8th March); World Labour Days (1st – 2nd May); Victory Day (9th May); Constitution Day (7th October); Anniversary of the Great October Socialist Revolution (7th – 8th November). Cargo work can be arranged on above days.

POLICE/AMBULANCE/FIRE: Police 02; Ambulance 03; Fire 01.

TELEPHONES: Not possible to place telephones onboard.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.

IDENTIFICATION CARDS: Not required. Only Seaman's Passport.

BANKS: State Bank of the U.S.S.R. only.

EMERGENCY CO-ORDINATION CENTRE: Contact Harbour Master's Office.

STORING: See "Prelims".

1. Barge or truck.
2. Vessels can be stored by barges during cargo operations.
3. Trucks can proceed alongside at the berth.
4. Fork lift trucks can be used.
5. Storing under Customs permission and control.
6. Local riggers can be employed.

AUTHORITY: The Port of Berdyansk Authority, 13/7 Gorky Street, Berdyansk 332440, U.S.S.R. *Tel:* 3-22-10. *Telex:* 131330. *Cables:* Morport Ocean Berdyansk. *Contact:* Port Director (Tel: 3-22-10). Harbour Master (Tel: 62-731).

AGENT: Maritime Agency "Inflot" at the Port of Berdyansk. Postal address: 13/7 Gorky Street, Berdyansk 332440, U.S.S.R. Tel: 62-539, 62-639, 3-34-42. Cables: Inflot Berdyansk.

IGARKA: 67.27 N. 86.35 E. (See Plan)

GENERAL: A sea and river port, Igarka is situated about 344 miles Southward of the mouth of the Enisei river which flows into the Enisei Gulf of the Kara Sea.

The port is open for navigation about 130 – 135 days from July till mid-November. Ice first begins to form in the second half of October.

No tidal range is observed in the port waters.

The port of Igarka specialises in timber exports.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

RESTRICTIONS: Vessels can enter or leave the port 24 hours per day.

To ensure safe passage across the Lipatnikovsky and Turushinsky Bars of the Enisei River, vessels proceeding to the port of Igarka must have draft not exceeding 7.3 m. (see "Max. Size").

PILOTAGE: Pilotage is carried out round the clock. Master of a vessel approaching the Port of Igarka from seaward has to order Pilots via the Chief of the Igarka Hydrobase and the Master of the pilot boat 48 hours prior to arrival to the Oshmarino Point where the River Pilots usually meet vessels. Confirm ETA 6 hours before arrival.

In case of bad weather, Pilot boards a vessel at a place as directed by the pilot boat. Since the distance of pilotage from the pilot station up to the port of Igarka is about 360 miles, 2 Pilots are usually required for the service.

The Master of a vessel should use VHF radio-telephone (calling frequency 156.8 MHz) or radio-telephone (calling frequency 500 kHz) for establishing the radio contact with a pilot boat in order to check the time and the place of boarding/unboarding of a Pilot.

ANCHORAGE: Information on best location of anchorage, if required, will be given by the pilot boat.

The anchorage in the outer roads is bounded on the East by the leading lines of Igarka and Northern Igarka leading marks, on the West by the left bank of the Enisei River, on the North by the beam line of the buoy of Igarka Oseryodok, on the South by the leading line of Port of Igarka entrance leading marks.

In the event of bad weather or main engine trouble a vessel should lie at anchor in a place as directed by a River Pilot, who shall advise a Master all necessary data about the anchorage.

MAX. SIZE: Max. LOA 150 m. Also see "Restrictions".

HEALTH: Not later than 4 hours before arrival, Master to radio "Inflot" advising health condition on board. International code quarantine signals to be shown on arrival at port limits. No one, except Pilot and Port Authorities, may board or leave the ship until Free Pratique is given after port health inspection.

RADIO: Radio communication is effected through the "Igarka Radio" port radio station operating on the frequencies given below.

Call sign	*Frequencies (kHz) Working*	*Calling*	*Type of trans-mission*	*Time of work*	*Remarks*
UFR	500	500	A1	H24	Operates during navigation only
"Sever" (Port)	156.7*	156.7*	F3	H24	

*Frequencies are given in MHz.

Notice of arrival: As per conditions of the "Soviet Wood" Charter Party.

TUGS: Normally join vessel with Harbour Pilot on approaching port. Vessels at anchor order tugs through "Inflot". Ship's tow lines used.

BERTHING: Tug assistance for berthing is compulsory. A berthing Pilot boards a vessel from a tug either in the outer roads or in the port. Depths alongside berths are up to 7.5 m.

After having approached a berth at a safe distance, a vessel, in most cases, should cast 2 anchors and then with tug assistance, turn stern to the Island and moor with 3 mooring ropes led from the stern. When mooring, a vessel should have ready on board 4 mooring ropes each not less than 100 m. in length (3 ropes to be led ashore and 1 rope prepared for a tug.).

Vessels moored in the inner roads must have strong ropes which should be made fast over the pile moorings only.

If 3 or 4 vessels are moored at the quay, the outside ones should have a red light exhibited in the middle of each mooring rope led ashore.

Notice of readiness and other conditions of loading – as per the "Soviet Wood" Charter Party. Opening and closing of hatches by ship's crew.

When a vessel is moored in the inner roads, stern to the Island, loading is by floating cranes; when at berth – ship's derricks are used.

Loading is done by ship's wire strops, with a test label attached to every strop.

MEDICAL: Medical assistance is free, hospital facilities available – all arrangements made by "Inflot".

DENSITY: Fresh water.

FRESH WATER: May be taken from the river in places indicated by the Pilot, but not in the port area.

FUEL: Not always available.

GANGWAY/DECK WATCHMEN: Ship's crew to provide watchmen services.

OPENING/CLOSING HATCHES: By ship's crew.

IDENTIFICATION CARDS: Required for crewmen going ashore.

CUSTOMS ALLOWANCES: Only reasonable quantities for personal consumption may be taken ashore.

REPAIRS: Only minor repairs.

REPATRIATION: No facilities.

AIRPORT: Situated 1.5 km. away, 1 daily flight to Krasnogarsk.

TIME: GMT plus 7 hours (all the year round).

HOLIDAYS: No official holidays are observed during the navigation season.

POLICE/AMBULANCE/FIRE: Police, Tel: 0-02; Ambulance, Tel: 0-04; Fire, Tel: 0-01.

TELEPHONES: Telephones cannot be connected on board vessel.

SHORE LEAVE: Permitted during 0600 – 2400 hrs. subject to police control.

GENERAL: It is forbidden for crew to swim in the harbour.

AUTHORITY: The Port of Igarka Authority, 47 Gorky Street, 663200 – Port of Igarka, U.S.S.R. *Tel:* 2-13-16. *Cables:* "Transflot" Igarka.

AGENT: "Transflot". Cables: "Transflot" Igarka.

ILICHEVSK: 46.19 N. 30.40 E. (See Plan)

GENERAL: The Port of Ilichevsk is situated on the N.W. coast of Black Sea, on the right bank of the Sukhoi Liman, about 15 miles S.W. from Odessa City.

The Sukhoi Liman is divided by dams into 3 parts called Basin No. 1, Basin No. 2 and Basin No. 3.

A part of Basin No. 1 bounded by the leading line of the Port of Ilichevsk leading lights, thence by the S.W. coast of the Liman, thence by the Southern Sand Headland, is called the Inner Roads of the port.

The berths for large sea-going vessels are along the Western side of the Southern Sand Headland, thence along Southern and S.W. sides of Basin No. 1.

The berths of the Western side of Basin No. 1 are used by fishing trawlers.

Navigation in the port is year round. Ice usually begins to form in the second half of December and finally disappears in February. Ice-breaker assistance is required in severe Winters for about a 30 day period.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: A Pilot usually boards a vessel in the outer roads at the approach light mid-channel buoy. (Lat. 46° 18′ N., Long. 30° 44′ E.). In the event of bad weather the place of embarkation or disembarkation of a Pilot can be changed with a Master's approval.

Vessels proceeding to ports of Kherson and Yuzhnyy take Pilot in the Outer Roads of Ilyichevsk (Lat. 46° 15′ 06″ N., Long. 30° 56′ 01″ E.).

APPROACHES: The approach channel leads from seaward into Basin No. 1. Depths in mid-channel are 13.5 m. Strong Easterly and Southerly winds may cause heavy surge in the channel influencing a vessel's manoeuvrability.

ANCHORAGES: Good anchorages can be obtained in the outer roads situated at a distance of 1 to 5 miles off the coast between the parallels of 46° 12′ N. and 46° 18′ N. The outer roads are open to all winds blowing from N.E. via S. up to S.W.

The anchorage (on charts marked as No. 352 and 351) are situated about 1.2 to 7 miles to the S.E. of the port entrance.

The holding ground is grey mud and clay. Depths in the roads are 19.2 – 25.5 m.

RESTRICTIONS: Entry to the port can be effected day and night.

In the night time movement of the vessels with length more than 200 m. is subject to special permission of the Harbour Master.

Vessel's speed should not exceed 6 knots when navigating along the channel.

MAX. SIZE: The maximum permitted draft is 11.8 m. length 280 m.

Vessels drawing over 11.8 m. must obtain the Harbour Master's permit for entry to the port.

HEALTH: Foreign vessels granted Free Pratique when berthed alongside and all arrival formalities accomplished by the boarding officials, irrespective whether day or night. If berthing delayed, under certain circumstances vessel may be granted Free Pratique at roads where anchored. Event suspected disease Master shall inform Agent by radio. When arriving from another Soviet Black Sea port, Free Pratique automatic.

RADIO: Channel 16 (156.80 MHz) for radio-telephone used for calling only, with subsequent switch to any other Channel. All information addressed to ship's Agent, Cable address "Inflot Ilichevsk", Telex No. 232448. Port Radio UEH.2.

Radio contact can be established through the port radio station "Ilichevsk Radio" operating 24 hours daily on the following frequencies:

Call sign	*Frequencies (MHz) Working*	*Calling*	*Type of trans-mission*	*Time of Work*
"Ilichevsk Port control"	156.6(12)	156.6(12)	F3E	H24
"Ilichevsk Traffic control"	Main 156.950(19)	156.950(19)	F3E	H24
	Spare 156.50(10)	156.50(10)	F3E	H24

The port radar station gives all possible information to all vessels navigating in restricted visibility and in the absence of floating marks, from the point of a Pilot's embarkation up to the port.

Radar navigation is controlled by a Pilot.

A signal post for regulating the movement of vessels is situated at the Northern side of the entrance to the port.

TUGS: Normally join vessel when approaching mooring berth. Ship's lines used. Number of tugs required for berthing shall be ordered by the Pilot with the Master's consent. Tugs compulsory for vessels over 1,500 g.r.t.

In case Harbour Master grants permission for vessel to stay at anchorage in the Inner Roads to get bunkers, provisions, or for any other purpose a tug should be ordered by ship's Master for the whole period of stay in the Inner Roads to ensure safety of manoeuvring of the other vessels in the port. All expenses on ship's account.

BERTHING: Quays with depths alongside of up to 14.0 m. are equipped to handle oil, general, 20 ft. and 40 ft. containers bulk and other cargoes. There are mechanised warehouses and open concrete floor sheds.

Electric cranes of up to 45 tons capacity are operated on the quays and by the warehouses. There are floating cranes with lifting capacity of up to 300 tons, other cargo-handling equipment and inter-port transport means.

Opening and closing of mechanised hatches is always done by the ship's crew.

In case vessel is moored at the Inner Road buoys the following requirements should be complied with:

1. Two towing ropes to be kept ready at bow and stern lowered 2 m. over the water surface.
2. To avoid picking up of mooring anchors ropes should be slacked with free board increase whilst discharging.
3. Vessel must be equipped with good pudding fenders to protect her boards and floating facilities alongside.

TIDE: The range of the water level caused by strong winds may reach 1 m. The rise of the water level is due to Northerly winds and the fall of the water level to Southerly winds.

The changes of the water level caused by variation in atmospheric pressure ("Seish" phenomena) are observed periodically. This phenomena can last from a few minutes up to several days and the range of the water level may reach 0.6 m.

RADAR: Port Radar Station gives all possible technical information to any vessel navigating within Station's broadcast zone, if requested. Navigation in channel controlled by Port Radar Station. Communication between Station and vessels established by radio-telephone on international frequencies.

STEVEDORES: 12 days' notice is required.

MEDICAL: Medical assistance rendered immediately when requested. Hospital facilities available. Particular inoculations required prescribed by International Sanitary Regulations.

DENSITY: Average density 1010.

FRESH WATER: Available at quays and by barge.

FUEL: Bunkers available.

GANGWAY/DECK WATCHMEN: Watch carried out by crew.

OPENING/CLOSING HATCHES: Mechanical hatches by crew.

CUSTOMS ALLOWANCES: No restrictions. Free use on board.

CARGO GEAR: No additional requirements. Cargo work usually carried out by means of shore cranes.

IDENTIFICATION CARDS: Required.

CONSULS: None.

REPAIRS: Good facilities. All kinds of repairs for vessels of up to 60,000 d.w.t. can be carried out.

DRY DOCKS: Docking arrangements settled with Black Sea Steamship Co. of Odessa, Lastochkina 1 Street. A floating dock, 250 m. length, 18 m. depth. There are new floating docks with a lifting capacity of 15,000 tons.

AIRPORT: The distance from Odessa Airport about 30 km.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

HOLIDAYS: Official Holidays are Sundays and following Calendar dates: January 1st, March 8th, May 1st, 2nd, 9th, October 7th, November 7th, 8th.

POLICE/AMBULANCE/FIRE: All mentioned services easily obtained through Agent.

SERVICES: Ship chandler's supplies, technical equipment supplies, laundry, car hire.

SHORE LEAVE: Permitted.

DELAYS: Vessels berthed at specialised berths depending upon cargo. Delays if berths occupied. Normally no delays in bunkering.

GENERAL: Shipowners should deposit funds for disbursements prior to arrival. All banking operations carried out by Vnesheconombank of Moscow.

DEVELOPMENTS: At present port only partially constructed. Work of further development being carried out.

AUTHORITY: Port of Ilichevsk Authority, 2 Korabelnaya Street, 270901, Ilichevsk. Odessa Region, U.S.S.R. *Tel:* 691-605, 691-634, 691-758. *Telex:* 232815. *Cables:* Morport Ilichevsk.

AGENT: Ilichevsk Inflot Shipping Agency, 2A Korabelnaya UL., Ilichevsk 270901, Odessa Region, U.S.S.R. Cables: "Inflot Ilichevsk". Tel. 691658, 620214, 620218, 691661. Telex: 232825 A.

IZMAIL: 45.20 N. 28.51 E. (See Plan)

GENERAL: The sea and river port of Izmail is situated on the left bank of the Kiliiskoe Ghirlo (Kilia Mouth) of the Danube River, between the 82nd and 96th km.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: All foreign flag vessels coming to or leaving the port of Izmail are allowed to navigate by the Kilia Mouth with the port of Izmail Pilot on board only. Masters of the vessels proceeding by the Sulina Channel from seaward shall order Pilots 24 hours in advance and confirm the order 4 hours prior to approaching the Chatal of Izmail, to the Harbour Master's office via Inflot Shipping Agency.

Vessels proceeding by the Prorva Canal from seaward should advise the Port of Izmail Harbour Master about the time of approaching the Reception Buoy 24 hours prior to arrival. Pilot shall board/disembark vessels at the Reception Buoy of the Prorva Channel (Lat. 45° 30′ 07″ N., Long. 29° 46′ 04″ E.) and the Izmail Chatal (116th km. of Kilia Mouth of the Danube River).

ANCHORAGE: Vessels can obtain anchorage in the roads situated in the area between 95.7 km. – 96.2 km. of the Kilia Mouth 50 m. from the left bank, 86.7 km. – 87.7 km. of the Kilia Mouth 100 m. from the left bank and between 85.0 km. – 85.6 km. of the Kilia Mouth 200 km. from the left bank.

Depth at the places of anchorage is 7.0 m., the holding ground is soft mud.

RESTRICTIONS: Draft and length of vessels entering the port of Izmail should be the same as for vessels navigating through the Sulina Channel (7.0 m.) or Prorva Canal (4.0 m. – 4.8 m.). There are no restrictions for day or night entry to the port.

All navigation within the port area is controlled. Zone of regulation begins at the 80th km. up to the 100th km.

Masters of the vessels entering the port area should make contact with the Vessels' Traffic Management Service and inform them of the name of the vessel, draft and place of destination. The Vessels' Movement Control Post will advise the place to anchor. Entry into the port area, shifting and any other movement of the vessel can be arranged with permission of the Vessels' Movement Control Post only. No passing allowed within the port area.

Permissible speed of movement should not exceed 8 km./hr. while navigating upstream and 12 km./hr. while navigating downstream.

HEALTH: International code quarantine signals are to be shown on arrival and Free Pratique is given by the quarantine doctor who will board the vessel to examine Master's Health Declaration.

RADIO/VHF: Radio communication can be established through the port radio station "Izmail Radio", some data of which is given below:

Safety Channel – Channel 16
Central Port Radio Station – Channels 16, 27, 22,
call sign "Izmail Radio"
Inspection of the Port Control – Channel 9,
call sign "Izmail Radio-2"
Vessels' Movement Control Post – Channel 14,
call sign "Radio-17"
Inflot Shipping Agency – Channel 16,
call sign "Inflot Izmail"
While navigating between 80th and 100th km. of the Kilia Mouth all vessels are to keep watch on Channel 16.

RADAR: There is no Port Radar Service.

TUGS: Tugs shall be ordered by the Master as directed by the Pilot.

BERTHING: Vessels drawing up to 7 m. can moor at berths with same depths alongside.

Quays are equipped to handle general cargoes (equipment, steel, cars, etc., containers including), bulk (coal, ore, minerals, building materials), timber and perishable goods (butter, vegetables, fruit).

There are enclosed warehouses, open concrete floor sheds and a grain elevator.

CRANES: On the quays there are portal cranes of 5 tons – 40 tons capacity. There are also floating cranes of 16 tons capacity and other cargo handling equipment and machinery. Mobile cranes of up to 25 tons capacity available.

SPECIALISED CARGO-HANDLING FACILITIES: There are specialised berths for handling ISO containers. There are no berths for handling liquid chemicals or LPG carriers.

BRIDGES: No bridges within the port area.

STEVEDORES: The port works round-the-clock, including holidays. Usual ETA advice required.

MEDICAL: No advance notice except in case of serious illness. Hospital and Dental facilities are available.

TANKERS: No tanker berths available.

FRESH WATER: Fresh water can be supplied from the quays or delivered by barges

FUEL: Bunkers available.

GANGWAY/DECK WATCHMEN: Gangway watchmen compulsory, carried out by ship's crew. Ship's gangway used.

OPENING/CLOSING HATCHES: According to the customs of the port opening and closing of hatches is usually by ship's crew but it can also be done by stevedores if requested by Master in advance.

CUSTOMS ALLOWANCES: No restrictions on crew consumption of tobacco and alcohol on board. It is prohibited to take these items ashore.

IDENTIFICATION CARDS: Required for crewmen going ashore.

REPAIRS: Hull and machine repairs can be effected.

REPATRIATION: Can be arranged.

AIRPORT: Regular connections with internal services.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

TIDE: Changes of water level in the river are due to effects of the wind and seasonal increase and decrease of the amount of water brought down from the shore. In Winter; rise of water level is due to the ice piling up. Max. range of the water level is about 4.0 m. – 6.0 m.

Max. rise of water level is in April, May and June, usually caused by Easterly winds. The least water level is observed in August, September and October, due to Westerly winds.

HOLIDAYS: New Year's Day (1st January), International Women's Day (8th March); Days of International Workers' Solidarity (1st and 2nd May); World War II Victory Day (9th May); USSR Constitution Day (7th October), Anniversay of the Great October Socialist Revolution (7th and 8th November).

POLICE/AMBULANCE/FIRE: Police, Tel: 9-03-16; Ambulance, Tel: 9-06-00; Fire, Tel: 9-05-24.

SHORE LEAVE: Allowed up to midnight.

AUTHORITY: The Port of Izmail Authority, 7 Port Street, 272630 – Izmail, U.S.S.R. *Tel:* 9-04-06. *Cables:* Morport Izmail.

AGENT: Izmail Inflot Shipping Agency. Postal address: 14 Port Street, 272630 – Izmail, U.S.S.R. Cables: "Inflot Izmail". Tel: 9-01-81, 9-05-59, 2-04-63. Telex: 412699.

KHERSON: 46.37 N. 32.37 E. (See Plan)

GENERAL: The sea and river commercial port of Kherson is situated on the right bank of the Dnieper River and on the left bank of the Koshevaya River.

The port is open for navigation all the year round but in severe Winters ice-breaker assistance is required.

Ice at the estuary of the Dnieper finally disappears in the first half of March.

PORT LIMITS: A vessel is considered to be an "arrived ship" and laytime will commence on arrival to the inner roadstead of the port.

DOCUMENTS: *Quarantine:*
Maritime Declaration of Health.
Valid Derat Certificate.
International Vaccination Certificates.
Customs:
Money List.
Complete copy of each Manifest for goods onboard.
Immigration:
Crew List – 5 copies.
Passenger List – 5 copies.
Seaman's Book or Passport for each person.
General Declaration – 5 copies.

CERTIFICATES:
Construction Certificate.
Safety Equipment Certificate.
Radio Safety Certificate.
Load Line Certificate.

APPROACHES: The port is accessible for sea-going vessels. The approaching channel is very well marked by navigation marks; therefore, there are no difficulties in navigating a vessel along it when entering or leaving the port.

PILOTAGE: Compulsory. Navigational range marks, leading marks of Stanislov, Adjigolsky beacons, Verbchansky and Maliy Kasperovsky leading light buoys, and spar buoys. Master advises Port Controller and Inflot Agency ETA minimum of 96 hours prior notice.

Masters of vessels proceeding to the port of Kherson must advise ETA to the Harbour Master through Inflot Agency 48 hours, 24 hours and 6 hours prior to arrival at the point of Lat. 46° 15′ 06″ N., Long. 30° 56′ 01″ E.

Master shall order a Pilot via the Inflot Shipping Agency 8 hours and confirm the order 2 hours prior to leaving the port of Kherson.

Masters of vessels proceeding to the Port of Kherson must advise ETA both to Inflot Ilychevsk and pilot station Ilychevsk 48, 24 and 6 hours prior to arrival at point Lat. 46° 15′ 16″ N., Long. 30° 56′ 01″ E. On arrival at the point Masters must call Inflot Ilychevsk or pilot station on VHF Channel 16.

ANCHORAGES: A part of the Dneiper River from the Northern border of the town of Kherson, nearly up to the Maly Potemkin Island, is considered as the Port of Kherson Roads.

The anchorage for foreign flag dry cargo vessels is situated in the area restricted by 2 imaginary lines of the leading marks located on the left bank of the Dnieper River, upwards from the mouth of the Konka River and lower of basin (creek) No. 2.

The recommended anchorage for foreign flag tankers is situated in the area stretching down the river from the oil piers towards leading line No. 7, S.W. of the upper leading marks clearing the place where a submarine cable is laid.

RESTRICTIONS: The permitted draft for passing through the channel is 7.6 m. but it may vary depending on weather conditions.

In the Summer the channel is open for navigation 24 hours a day.

Speed of vessels having draft over 5 m. should not exceed 10 knots whilst navigating through the channel.

The port receives vessels with length up to 200 m.

Navigation through the channel in restricted visibility is strictly prohibited.

It is prohibited by local quarantine authorities to discharge sea-water ballast into the harbour.

HEALTH: No automatic Pratique. Cable to Inflot name and nationality of the ship, ports of call during last month, nature of cargo, number of crew and passengers, condition of health of all onboard with details of any sickness.

RADIO: Ship-shore radio link can be established through the port radio station operating 24 hours on the following frequencies:

	Frequencies (kHz)		*Type of trans-mission*	*Time of work*
Call sign	*Working*	*Calling*		
UHZ	500/487	500/468	A1A	H24
"Kherson Radio"	2182	2182	P3E	H24
"Mesyats" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24
"Mesyats-2" (Harbour Master)	156.45*(9)	156.45*(9)	F3E	HX

*Frequencies are given in MHz.
**CPR – Central Port Radio Station.

TUGS: Compulsory for mooring and unmooring or shifting. Number as required by Pilot but the charge depends on n.r.t. of the ship and not on the number of tugs used.

Tugs available: 2×1,412 b.h.p., 2×706 b.h.p., 1×352 b.h.p. and 1×65 b.h.p.

BERTHING: 9 berths, depths up to 8.25 m.

Mooring is effected with port Pilot assistance. Number of tugs required for mooring is determined by Pilot with Master's consent, ship's lines used.

Cranes of up to 10 tons capacity are operated on the quays and by the warehouses. There are floating cranes with lifting capacity of up to 100 tons and other cargo handling equipment, intra-port transport included.

Berths of the port, with depths of up to 8.25 m. alongside are equipped to handle general and bulk cargoes (ore, chemicals, building materials), metals, grain, timber, cotton, cement, food products, etc., as well as passenger traffic. There are enclosed warehouses, a grain elevator and open concrete floor storing spaces without roofs. There is a refrigerated warehouse at No. 4 berth. Cargo is generally loaded/unloaded by shore cranes but ship's derricks are always to be ready for use.

TIDE: Changes in the water level observed in the port are due to the effect of the wind and variation in atmospheric pressure. The maximum range of the water level caused by winds may reach 2 m.

The changes of the water level due to variation in atmospheric pressure ("Seish" effect) are observed at times. They may last from a few minutes up to several days and may reach 0.58 m.

MEDICAL: Hospital facilities available.

DENSITY: 1000.

FRESH WATER: Available by barge. Rate 50 t.p.h.

FUEL: Not available. Bunkering takes place at Odessa.

OPENING/CLOSING HATCHES: Opening and closing of hatches is usually done by the ship's crew. It may also be done by port workers for vessel's account.

REPAIRS: Only minor repairs can be carried out. There are no dry docks in the port.

TIME: GMT plus 3 hours. Daylight saving time, GMT plus 4 hours from last Sunday in March to last Sunday in September.

REPATRIATION: Crew changes and repatriation possible.

SHORE LEAVE: Possible from 0800 hrs. – 0000 hrs. No restrictions for Masters.

AUTHORITY: Port of Kherson Authority, 4 Ushakov Av., 325025 Kherson, U.S.S.R. *Tel:* 29-14-02, 2-38-48. *Cables:* Morport Kherson.

AGENT: Kherson Shipping Agency "Inflot". Postal address: 11 Petrenko Street, 325004, Kherson, U.S.S.R. Tel: 29-13-51, 2-35-96. Telex 232721. Cables: "Inflot Kherson".

KHOLMSK: 47.03 N. 142.03 E. (See Plan)

GENERAL: The seaport of Kholmsk is situated on the Western coast of Sakhalin Island, in the Tartarsky Strait of the Japan Sea and at the head of Nevelskoy Bay.

The port is open for navigation all the year round.

The outer roads of the port are bounded by an arc of 7 cables length radius, the centre of which is marked with a light located on the Southern mole of the Commercial Harbour.

The port is divided into 3 parts: The Kovsh (a basin), The Commercial and Fishing Harbours. The Commercial Harbour is situated in the centre of the port area. It is protected by the Southern and Northern moles. The entrance to the Harbour 150 m. wide, is situated between these 2 moles. Due to shoal water along the coast, there is not much space for vessels manoeuvrability in the Commercial Harbour. Cargo berths are situated in a basin (The Kovsh) of the Southern part of the Harbour.

The Port of Kholmsk, due to its position, size and weather conditions in the area, cannot be used as a sheltering port.

During Westerly and N.W'ly gales, particularly in the Autumn and Winter (October — March) the heavy sea swell penetrates into the Kovsh (mainly from the N.W.) causing the variable current with surge (the "Tvagun"). Due to this phenomena the stay in port is not safe therefore Masters of all vessels are recommended to leave the port for sea after having received a storm warning of a gale coming from Westerly or N.W. directions.

All vessels proceeding to the port of Kholmsk in the Autumn and/or Winter must have available on board a sufficiency of fuel, fresh water, provisions and strong manila ropes, be seaworthy in all respects, thus ensuring vessel's safety during a possible stay in the open sea roadstead.

In case there are no vacant berths in the port, vessels are not allowed to enter the harbour without prior permission.

It is also prohibited to enter the harbour after a storm warning has been received by vessel despite the fact that there are vacant berths in the port.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Pilot meets a vessel in the outer roads. In the event of bad weather, when Pilot is unable to come on board, vessel should follow in the wake of pilot boat.

ANCHORAGES: There are no anchorages protected from the wind in the Nevelskoy Bay.

During off-shore winds vessels may anchor in the outer roads situated opposite the port entrance. The outer roads are open to Westerly winds.

Masters should bear in mind that during the period of navigation fish nets are usually laid in the outer roads. The seaward side of the border of the fish nets, situated about 8 cables length off-shore, is usually marked by wooden buoys with flags.

Anchorage in the outer roads may also be obtained at 4 – 6 cables length off shore. Depths are from 18 m. to 20 m. Holding ground sand and stone.

A vessel should proceed to the anchorage along the leading line of the port of Kholmsk leading lights. At a distance of half a mile off the port entrance, a vessel should steer off the leading line at 2 – 3 cables length and then drop anchor.

The holding ground is better in the Southern part of the outer roads than in the Northern part.

When at anchor, a vessel may not approach the leading line closer than 1.5 cables length.

RESTRICTIONS: Vessels may enter the port at any time of day or night.

MAX. SIZE: The maximum permissible draft for entry to the port is 6 m. Length not over 105 m. and beam up to 20 m. Since depths in the channel may vary at times, the Port Authorities shall undertake to advise the Masters of incoming vessels accordingly.

HEALTH: Not later than 6 hours before arrival, Master to radio "Inflot" advising health condition on board. Health Authorities board together with Customs and Immigration and if all found in order Free Pratique is granted. If vessels enter after calling at another U.S.S.R. port, Pratique is automatic.

RADIO: Ship-shore radio link can be established through the port radio station Kholmsk Radio operating 24 hours a day on the following frequencies:

	Frequencies (kHz)		*Type of trans-mission*	*Time of Work*
Call sign	*Working*	*Calling*		
UFO	500	500	A1A	H24
"Kholmsk Radio"	2182	2182	H3E	H24
"Kholmsk Radio-2"	2720	2720	H3E	H24
(Port Controller)	156.45*(9)	156.45*(9)	F3E	H24
"Kholmsk Radio-5"	156.7*(14)	156.8*(16)	F3E	H24
"Kholmsk Radio-1" (Vessel movement control post)	2720	2720	H3E	H24

*Frequencies are given in MHz.

RADAR: No shore based radar.

TUGS: Two tugs of 300 h.p. and two tugs of 1,200 h.p. are available. Number of tugs required for assistance is usually agreed between Pilot and Master. Tugs normally join the vessel in the inner area of the port

BERTHING: Berths with depths up to 7.3 m. alongside, are equipped to handle general and bulk cargoes, metals, timber, food products, etc., as well as passenger traffic.
CRANES: Cranes of up to 40 tons capacity are operated on the quays. There are also other cargo-handling equipment and inter-port transport facilities. There are enclosed warehouses and open concrete floor sheds.
STEVEDORES: Arranged through "Inflot".
MEDICAL: All requirements should be ordered in advance through "Inflot" if medical assistance required aboard.
FRESH WATER: Available from berth, road delivery not possible.
FUEL: Not available.
CONSULS: None.
REPAIRS: Only minor repairs can be carried out.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Gangway watch compulsory and carried out by crew.
HATCHES: Opening and closing of mechanised hatches is always done by the ship's crews.
CUSTOMS ALLOWANCES: No restrictions on tobacco and alcohol on board ship. Only tobacco required for personal consumption may be taken ashore.
AIRPORT: No local airport.
SURVEYORS: Inspectors of the Shipping Register of the U.S.S.R. only.
HOLIDAYS: New Year's Day; March 8th (World's Women's Day); May 1st, 2nd (Labour Day); May 9th (Victory Day); October 7th (U.S.S.R. Constitution Day); November 7th, 8th (Great October Socialist Revolution Day). Cargo work can be arranged on these days.
POLICE/AMBULANCE/FIRE: Police Tel: 602. Ambulance Tel: 603. Fire Tel: 601.
TELEPHONES: Can be arranged on board.
TIDE: Changes in the water level are of small account. They are mainly due to the irregular diurnal tides. The maximum range of the water level observed is 0.4 m.
TIME: GMT plus 11 hours. Summertime (April 1st-October 1st) GMT plus 12 hours.
AUTHORITY: The Port of Kholmsk Authority, 39 Sovetskaya Street, 694620 Kholmsk, Sakhalin Is., U.S.S.R. *Tel:* 96-3-05. *Telex:* Via Morflot Kholmsk 412613 SSC SU. *Cables:* Morport Kholmsk. *Contact:* Harbour Master.

AGENT: The Sakhalin Main Maritime Agency Morflot. 6 Morskaya Street, Port of Kholmsk, Sakhalin Island 694620, U.S.S.R. Cables: "Morflot Kholmsk". Tel: 222-86; 220-80. Telex: 412613 SSC SU.

KILIA: 45.26 N. 29.17 E. (See Plan)

GENERAL: The Port of Kilia is situated on the left bank of the Kilia inlet of the Danube River, 47 km. from the estuary. The depths of the water within the port area vary from 3 m. up to 22 m. The holding ground is clay and mud. The season of navigation in the port area lasts from March till December depending on time when the Danube River is frozen over.
PILOTAGE: Carried out by the Pilot service of the port of Izmail.
ANCHORAGES: Allowed in the port area, in 5 m. depths according to the Pilot's instructions.
RESTRICTIONS: Vessels can enter or leave the port at any time of day or night. Movement of vessels during fog is not allowed.
RADIO: Communication can be effected via the port radio station viz. "Kilia-Radio".

	Frequencies (MHz)		*Type of*	
Call Sign	*Working*	*Calling*	*trans-mission*	*Time of work*
Kilia-1	156.8(16)	156.8(16)	F3E	H24
(CPR)*	157.25(25)	157.25(25)	F3E	H24
Kilia-2	156.8(16)	156.8(16)	F3E	H24
(Harbour Master)	156.45(9)	156.45(9)	F3E	H24

*Central Port Radio Station.

Notice of Arrival: Masters of vessels going to the port from seaward via Kilia Inlet should advise port of Izmail Harbour Master their ETA 24 hours prior to arrival at the Reception Buoy area. More precise time of arrival should be advised at a later time.
TUGS: Approaching and shifting berth is performed without tug assistance.
BERTHING: Cargo vessels drawing up to 7 m. are handled with the use of buffer barges. Berths of the port are equipped to handle general cargoes, metals, timber, coal. Embarking/disembarking of passengers is also performed. There are portal cranes of up to 6 tons capacity, a warehouse and open storage areas covered with concrete. There are also floating cranes of up to 5 tons capacity which are used for handling cargo in the Outer Roads. The loading of grain is carried out at the grain elevator berth by its own equipment.
FRESH WATER: Not available.
FUEL: Not available.
REPAIRS: Not possible.
TIME: GMT plus 3 hours. GMT plus 4 hours in summer.
CONSULS: None.
AUTHORITY: Port of Kilia Authority. 4, Zheleznyakov Street, 272610 Port of Kilia, Odessa Region, U.S.S.R. *Cables:* Port Kilia.

KLAIPEDA: 55.43 N. 21.07 E. (See Plan)

GENERAL: A Baltic seaport, Klaipeda is situated in a narrow strait called the Morskoi Canal, which connects the Kursky Gulf with the Baltic Sea.

The Port of Klaipeda comprises the Morskoi (Sea) Canal consisting of 2 harbours: the Zimnyaya and Zavodskaya, the Fishing Port, Ferry Terminal and the Dane River quays situated by the roadway-bridge.

The port is open for navigation all the year round.

During strong winds blowing from directions between the S.W. and N.W., lying in the port is dangerous due to strong waves and surge (called "Tyagun"). In this event vessels must proceed to sea.
DOCUMENTS: Refer to beginning of U.S.S.R. section.
APPROACHES: The width of the approaching channel to the port is 100 m. and depth 11.5 m. Depths of the channel at a distance of 400 m. – 600 m. from the entrance to the Sea Canal are subject to changes due to lots of sand and mud brought down from the Kursky Gulf by the Spring floods, in particular. The entrance to the Sea Canal is protected by the Northern and Southern moles.

The length of the fairway of the Morskoi (Sea) Canal from the entrance up to the Secluma-Kyaules-Nugara shoal at the entrance to the Kursky Gulf is 4 miles, width varies from 180 m. to 300 m. and the depths are from 6 m. to 9 m. at the mean water level.

The permissible drafts for vessels navigating along the Morskoi (Sea) Canal are as follows: 10.6 m. to 8.0 m. from the canal entrance up to the Zimnyaya (Winter) harbour, but further up to the Fishing Port situated 1.5 miles and Ferry Terminal situated 2.5 miles to the South of the Dane River estuary – not more than 7.5 m. From the Fishing Port up to the Timber Harbour – not more than 5.0 m.
PILOTAGE: A Pilot boat usually meets a vessel at Light Buoy No. 1 (Lat. 55° 44′ N., Long. 21° 00′ E.). It carries the Pilot flag by day and lights prescribed for a Pilot boat by night.

Pilot's watch is kept 24 hours a day except in periods of dense fog and strong S.W. – N.W. winds over Force 7 Beaufort Scale.

The Master of a vessel shall order a Pilot via the Inflot Shipping Agency in advance.

The port is equipped with a coastal radar vessels' movement control system.
ANCHORAGE: Anchorage can be obtained in the outer roads at Receiving Light Buoy No. 1 (Lat. 55° 44′ N., Long. 21° 00′ E.).

The outer roads anchorage for foreign vessels is situated at a distance 3.5 miles (N.W.) from Receiving Light Buoy No. 1. Depths from 31 m. – 35 m.

The holding ground is sand and clay. Anchorage in the outer roads is not safe during heavy seas caused by Westerly winds.
RESTRICTIONS: There are no restrictions for the entry to the port.

The width of the approaching channel to the port is 100.0 m. and depth 12.0 m.
MAX. SIZE: Length not greater than 185 m. and breadth unlimited. Max. permissible draft for all vessels entering the port, 10.6 m.; and for tankers loading at installations outside main port area, 10.5 m.
RADIO: Vessels can establish radio contact through the port radio station Klaipeda Radio operating 24 hours per day on the following frequencies:

	Frequencies (kHz) or Channel		*Type of*	*Time*
Call sign	*Working*	*Calling*	*trans-mission*	*of work*
UNM-2	500	500	A1	H24
	455	454	A1	H24
	4229	4183	A1	HX
	6427	6275.25	A1	HX
	8701	8370	A1	HX
	12703	12552	A1	HX
Klaipeda Radio	2182	2182	A3	H24
Klaipeda Radio – 1 (ODIN) (CPR)**	16, 3, 26, 27		F3	H24
Klaipeda Radio – 2 (DVA) (Dispatcher of Port)	14		F3	H24
Klaipeda Radio – 15 (Pyatnadtsat) (Oil Harbour)	7		F3	H24
Klaipeda Radio – 5 (Pyat) (Pilot Control)	16, 9		F3	H24
Klaipeda Radio – 17 (Semnadtsat) (Shore Radar Service)	9, 67		F3	H24

**CPR – Central Port Radio station.

Vessel traffic in the roads and harbours is governed by the Shore Signal station equipped with radar which gives all possible information for ensuring safe pilotage.
TUGS: Ordered by Pilot if necessary. Mooring and unmooring of large sea-going vessels can be effected with tugs' assistance only. Number of tugs to be ordered depends on the weather conditions and can be agreed upon between Master and Pilot. Master should order tugs by radio well in advance. Ship's lines to be used.
BERTHING: No specific requirements. Vessels allocated berth according to kind of cargo to be loaded/discharged and their turn.

The quays of the port with depths alongside of up to 10.6 m. are equipped to handle general, bulk and liquid cargoes. There are enclosed warehouses and concrete floor sheds.

Cranes of up to 40 tons capacity are operated along quayside and by warehouses. There are also other cargo handling facilities including floating cranes up to 50 ton capacity.
STEVEDORES: Report 12 days, 96 hours, 24 hours and then 12 hours prior arrival giving ETA, and 72 hours then 12 hours prior arrival advising perishable goods, characteristics of vessel, gross capacity, number and measurement of hatches, tween-decks, shelter-decks, description and quantity of cargo, stowage plan, heavy lifts, pieces of above 3 tons each especially indicated. Day and night loading/discharging operation, Sundays and holidays included.
MEDICAL: Master to advise by radio prior arrival if medical attendance required on board.

TANKERS: Three berths. Max. draft 10.5 m. Shore facilities for discharge of ballast.
FRESH WATER: Most berths supply by shore installations, otherwise barge.
FUEL: Deliveries only by bunker barge.
GANGWAY/DECK WATCHMEN: Compulsory for gangway checking. Guard net and life buoy required.
OPENING/CLOSING HATCHES: Normally done by crew.
CONSULS: No Consuls at Klaipeda.
REPATRIATION: No facilities for crew changes. Arranging any necessary repatriation at Master's request effected by Immigration Authorities.
AIRPORT: At Palanga (25 km. from Klaipeda), served by regular lines; Palanga-Moscow, Palanga-Leningrad, Palanga-Vilnius
POLICE/AMBULANCE/FIRE: Police, Tel: 02; Ambulance, Tel: 03; Fire, Tel: 9300, 001.
CERTIFICATES: All ship certificates required on every call.
CUSTOMS ALLOWANCES: Cigarettes and wine/spirits on board limited by personal requirements; take ashore max. 2 packets cigarettes, no wine/spirits.
REPAIRS: All kinds of repairs for vessels of 10,000 d.w.t. can be effected.
TIME: GMT plus 3 hours in Winter and GMT plus 4 hours in Summer (1st April – 1st October).
TIDE: There are periodical alterations in the water level, chiefly due to the effects of the wind. In general, strong Westerly, Northerly, N.W. and sometimes S.W. winds raise the water and Southerly and Easterly winds lower it.

The water level usually begins to rise suddenly. It rises very quickly but lasts for a very short period of time. The max. difference between high and low level is usually observed in Autumn and Winter.

Sometimes the changes in the water level can be caused by the considerable variation in atmospheric pressure ("Seish" effect).
TELEPHONES: May be arranged on board.
SHORE LEAVE: Crew members allowed ashore with shore-pass obtainable from Immigration Authorities.
GENERAL: In case of stormy weather or dense fog vessels are lying at Outer Roads until entering permitted by Harbour Master. In such cases vessels lying alongside berth to be shifted to Inner Road.

AUTHORITY: The Port of Klaipeda Authority, Ul. Plachioji 18, 235801 Klaipeda, U.S.S.R. *Tel:* 6-45-94. *Telex:* 278239. *Cables:* Morport, Klaipeda. *Contact:* The Harbour Master.

AGENT: "Inflot" Agency. Address: 235801 Klaipeda, Ul. Geguzhes, 8. Tel: 9-41-51, 6-42-70. Cables: Inflot, Klaipeda. Telex: 278113 A and 278114 B.

LENINGRAD: 59.53 N. 30.13 E. (See Plan)

GENERAL: A Baltic Sea port, Leningrad is situated on the islands of the Neva Delta, at the head of the Nevskaya Guba (Neva Bay), in the Eastern extremity of the Gulf of Finland. Year-round navigation is possible with ice-breaker assistance from the end of November until middle of April. Ice first begins to form in the middle of November, when usual Winter frosts come, and in January (time varies with the season) all the area becomes completely covered with fast ice.
DOCUMENTS: Refer to beginning of U.S.S.R. section.
APPROACHES: The Kronstadt Korabelny Farvater (Kronstadt Ship's Channel) which is about 12 miles in length, extends from the port of Leningrad Entrance light buoy to the Leningrad Morskoi Canal, which is about 15 miles in length, and leads to the entrance of the sea commercial port of Leningrad. The least bottom width of about 80 m. is in the part of the Canal which is protected by 2 dams (moles).
PILOTAGE: Pilots usually board and disembark vessels at the port of Leningrad approaching light buoy (Lat. 60° 02′ N., Long. 29° 26′ E.). In case of bad weather a vessel should follow the pilot boat up to the Kronstadt Roads where a Pilot will come aboard the ship.

Leningrad pilot boat on VHF Channel 16 and 9 throughout 24 hours. Call sign "Leningrad Pilot".

There is a Port Coastal Radar Vessels' Movement Control System ensuring vessels' radar pilotage along the Kronstadt Korabelny Fairway and the Leningrad Morskoi Canal in case of low visibility and during absence of floating navigational marks. Radar pilotage is carried out by a Pilot on board a vessel.
ANCHORAGES: Vessels approaching the port from seaward should take anchorage off the port of Leningrad Entrance Light Buoy. The depths in the Roads are between 20 m. – 25 m. and the holding ground is mud and sand.

Vessels anchored at Outer Roads and berthed in the port are requested not to operate VHF on Channels 6, 8, 9, 11, 12, 13, 14 or 26 for intership communications.
RESTRICTIONS: No restrictions on night entry, no tide in Leningrad. Vessels with drafts 8.5 m. and more, and length 170 m. and more, must be towed when proceeding in the Leningrad Morskoi Channel from the Lesnoi Mole Roads (Timber Mole Roads) up to the Neva Gates.

All vessels navigating within the port must keep strictly to the following regulations:

(a) Vessel's speed should not exceed 10 knots when navigating in the Kronstadt Korabelny Farvater and in the open part of the Leningrad Morskoi Canal (from the entrance up to the moles).

(b) When navigating in the channel between the moles of the Leningrad Morskoi Canal as well as in the Bolshaya Neva River from the Neva Gates up to Lieutenant Schmidt Bridge and also in the Ekateringofka River, vessels speed should not exceed 3 knots.

(c) In the Inner Roads and in the port harbours, Masters should navigate with a speed ensuring the safety of vessel but never exceeding 3 knots.

MAX. SIZE: Draft restriction 11.0 m. in fresh water under normal weather conditions. Length not over 260 m. Breadth up to 40 m.
HEALTH: Master coming from foreign port shall report every sick passenger or crewman; Health Authorities board together with Customs and Immigration and if find all in order grant Free Pratique. Each vessel shall produce Derat Certificate and Sanitary Patent.
RADIO: Cable Agent "Inflot" ETA, draft and other data, information required via Leningrad Radio Station (call sign URD). All vessels when approaching the port of Leningrad should establish radio contact via the Leningrad Coastal Radio Station operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans- mission*	*Time of work*
"Leningrad-Radio"	2182	2182	J3E	H24
"Leningrad-Radio"	156.8*(16)	156.8*(16)	F3E	H24
(CPR)**	161.9*(26)	157.3*(26)	F3E	H24
"Leningrad-Radio"	156.8*(16)	156.8*(16)	F3E	H24
(Vessels' movement control post)	156.45*(9)	156.45*(9)	F3E	H24

*Frequencies are given in MHz.
**CPR – Central Port Radio Station.

Note: Emergency calls with regard to collisions, fire on board and dangers to human life may be given on VHF Channel 9. Call sign of traffic controller is "Leningrad Port Control".

Port radar station gives all possible information to any vessel navigating in the Kronstadt Korabelny Farvater and Leningradsky Morskoi Canal during restricted visibility, from the Leningrad Entrance Light Buoy (Lat. 60° 02′ N., Long. 29° 26′ E.) up to the dams (moles) of the Leningrad Morskoi Canal. Navigation is usually controlled by a Pilot on board the vessel.

Signals for vessels approaching the entrance to the Commercial Port of Leningrad from seaward are hoisted at the pilot vessel.

Traffic prohibition signals, when the pilot vessel is absent from her usual position may be exhibited at a vessel specially designated for this purpose.
RADAR: Pilot in contact with radar service. Also see "Radio".
TUGS: Tugs up to 1,200 h.p. are available. Normally join incoming vessels at Inner Road. Ship's lines usually used.

The number of tugs a Master should order for inward and outward towage as well as for shifting berths in the harbour depends on Pilot's advice.
BERTHING: Berths of the port, with depths alongside of up to 11.5 m. are equipped to handle general and bulk cargoes (coal, ores, grain, building material), sugar, metals, timber products, etc. There is also a passenger and container terminal, warehouses, cold stores and concrete floor sheds.

Opening and closing of hatches is usually done by the ship's crew, otherwise according to the charter party conditions.
CRANES: Shore cranes 5 tons – 40 tons. Floating cranes 10, 25, 40, 60, 100 and 350 tons. Fork lifts 1 – 25 tons.
TIDE: Considerable rises of water level may be caused by strong Westerly winds – and falls by Easterly winds. Usually the changes in water level are greater during the Autumn and Winter months. During Autumn and Winter the range of level may reach 1.2 m. from the MWL and sometimes even more.

During Spring and Summer it is never more than 0.5 m. The greatest rises in the water level are observed in the Neva Bay. The extreme difference in level between the maximum rise and the minimum fall of these seasonal changes observed is about 3.5 m. At the mouth of the Neva River the greatest changes in the water level are caused by the S.W. Autumn gales. The difference in level usually reaches 0.2 m. - 0.3 m. and only sometimes up to 1 m.
STEVEDORES: Ordered by Agent.
MEDICAL: Masters to advise Agent prior arrival if medical attendance required aboard.
DENSITY: Fresh water in port area.
FRESH WATER: Most berths supplied by shore installations, otherwise barges. Also available at Outer Roads Anchorage.
FUEL: Bunkers available, usually delivered by lighters.
FIRE PRECAUTIONS: No smoking allowed in port area, except in places specially allocated.
GANGWAY/DECK WATCHMEN: Not compulsory.
OPENING/CLOSING HATCHES: According to charter party.
CERTIFICATES:

- Passenger Ship Safety.
- Safety Equipment.
- Safety Radiotelephony.
- Safety Radiotelegraphy.
- Exemption Certificate.

CUSTOMS ALLOWANCES: No restrictions on board.
IDENTIFICATION CARDS: Needed, will be given on arrival.
CONSULS: The Consulates of Czechoslovak Socialist Republic, German Democratic Republic, France, German Federal Republic, Hungarian People's Republic, Italy, Finland, Iran, Japan, Polish People's Republic, People's Republic of Bulgaria, Republic of Cuba, Sweden and United States of America are situated in Leningrad.
DRY DOCKS: *Floating Docks:*

No.	*Length* m.	*Depth* m.	d.w.t.
1	130	6.2	6,000
2	90	6.2	4,000
3	140	6.2	8,000
4	168.5	6.2	15,000

SURVEYORS: 1. Cargo inspectors not available.
2. Inspectors of the Shipping Register of the U.S.S.R. only.
REPAIRS: All types of repairs for vessels of up to 20,000 d.w.t. can be carried out in the port.
TIME: GMT plus 3 hours. Summertime from 1st April – 30th September

HOLIDAYS: 1st January, 8th March, 1st, 2nd and 9th May; 7th October, 7th and 8th November.
POLICE/FIRE/AMBULANCE: Police 9692; First-Aid from Port 503; from Town 03; Port Fire 8509, 8536, 8973; Town Fire 01.
EMERGENCY CO-ORDINATION CENTRE: Contact "Inflot" or Leningrad Radio Station on the VHF Channel 16 and 26.
STORING: See "Prelims".

1. Vessels may be stored by barge or truck.
2. No restrictions.
3. Trucks may proceed alongside.
4. Fork-lift trucks may be used.
5. No exceptions from U.S.S.R. laws.
6. As a rule riggers are available.

AUTHORITY: Port of Leningrad Authority, Mezhevoi Kanal 5, Leningrad 198035, U.S.S.R. *Tel:* 251-08-46, 216-97-61. Timber Port: 216-97-75. *Telex:* 121501-121504. *Cables:* Seaport Leningrad. *Contact:* Oleg A. Terekhov, General Manager, who may be contacted through "Inflot".
AGENT: Main Maritime Agency "Inflot".
Postal address: 10 Gapsalskaya Str., Leningrad 198035, U.S.S.R. Tel: 251-12-38; 251-27-48; 251-73-26. Telex: 121 505 A, B and C.

MEZEN: 65.50 N. 44.04 E.

GENERAL: A commercial seaport, Mezen is situated at a distance of 22 miles to the South of the mouth of the Mezen River flowing into the head of the Gulf of Mezen, in the White Sea.

The port area is bounded on the North by a line connecting the Ryabinov and the Nerpinsky points and on the South by the parallel of 65° 50′ N., Northward of the town of Mezen. The anchorage at the Kuloi river mouth is also included at the port of Mezen area.

Vessels drawing 3.9 m. – 4.2 m. are usually grounded when loading timber alongside a floating berth of the timber-mill at low water.

The port is open for navigation from the end of May until October.

Tidal streams are observed in the Mezen river. The tide is semi-diurnal with two high waters and two low waters a day.
DOCUMENTS: Refer to beginning of U.S.S.R. section.
PILOTAGE: Compulsory. A Pilot meets a vessel at an anchorage buoy, at the Mezen River bar (Lat. 66° 12′ N., Long. 44° 04′ E.), at a distance of 22 miles off the port of Mezen. In the event of bad weather a Pilot at his discretion, may board a vessel in the outer roads.

Pilotage cannot be effected at night.

A Pilot cannot board a vessel earlier than 2 hours before the high water in the Semzha River, and a vessel may be piloted into the port not later than 1 hour before the water in the river reaches its high level.

Pilots do not board vessels in rough water (if the wind is over Force 6 Beaufort scale).

In case Pilot cannot embark a vessel in the outer roads, Master should follow in the wake of pilot boat up to Tolstic Point (Lat. 66° 04′ N., Long. 44° 05′ E.) where a Pilot will board ship. After leaving the port Master should disembark Pilot on to pilot boat at Tolstic Point and then follow it up to the outer roads of the port of Mezen.
ANCHORAGES: Anchorage can be obtained in the outer roads and in certain places of the Mezen River situated between the outer roads and the Kamenka settlement.

The outer roads are situated at the Mezen River mouth. They are bounded on the South by a line connecting the Ryabinov and the Maslyany Points.

Vessels in the outer roads are subject to effects of the N.W. and N.E. winds and heavy waves caused by them. The depths in the outer roads are about 7 m. The holding ground is sand, mud and rocks. Anchorage can be obtained in the inner roads with depths at low water of up to 4.5 m. – 5 m. (length of area is 1.5 mile and width up to 150 m.).

The inner roads are situated opposite the Kamenka settlement. A good anchorage can be obtained there by two vessels simultaneously. The anchorage at Burnovsky Point with depths from 4.5 m. – 5.5 m. can be used by two loaded vessels drawing up to 4.2 m.
RESTRICTIONS: Vessels may enter port only in daytime on high water. Masters have to pay full attention to Pilot's advice as river has varying bends.
MAX. SIZE: The permitted draft for the entry to the port is announced monthly by the Port Authorities. It should not exceed 3.9 m. – 4.2 m. The maximum permitted length is 70 m.
HEALTH: As for "Archangel".
RADIO: Vessels can establish radio contact through the port radio station Mezen Radio operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time*
UZT	500	500	A1	HX
"Mezen-Radio"	2182	2182	P3E	H24
			J3E	H24
"Kamenka-2"	156.8*(16)	156.8*(16)	F3E	H24
(Port Controller)	156.45*(9)	156.45*(9)	F3E	H24
"Kamenka 5"	156.8*(16)	156.8*(16)	F3E	H24
(Harbour Master)	156.6*(12)	156.6*(12)	F3E	H24

*Frequencies given are in MHz.

Notice of Arrival: As per conditions of the "Soviet Wood" Charter Party.
BERTHING: The floating dams are used as mooring berths in the port. The depths alongside at low water are about 3.5 m. Vessels drawing 3.9 m. – 4.2 m. are usually grounded while loading at low water.

The port of Mezen specialises in timber exports but other cargoes are also handled at berths. Covered warehouses and open concrete floor sheds are available.

Tug assistance for mooring berths is not compulsory. Berthing is usually done in the daytime. Tugs, if necessary are ordered by Master according to the Pilot's instructions.

Rendering of Notice of Readiness and opening and closing of hatches are usually done in accordance with the "Soviet Wood" charter party.

Loading of timber is done by ship's winches and floating cranes with capacity 5 tons.
TIDE: The difference between two successive high waters and low waters is small but the range of the tide changes considerably. At the Kamenka settlement the mean range of the tide is 2.8 m. and the mean range of the spring tide is 3.1 m. At the Semzha River the mean range of the spring tide reaches 7.7 m. Everywhere in the Gulf of Mezen the differences in the duration of falling and of rising water are big and in some places of the Gulf of Mezen they may reach 5 hours.

Considerable changes in the water level are observed in the Spring. They are usually caused by the seasonal increase in the amount of water (due to melting snow) brought down by the rivers.
REPAIRS: Only minor repairs can be effected. There are no dry docks in the port.
FUEL: Supplies not guaranteed.
FRESH WATER: Fresh water can be supplied at the berths and by road tankers.
TIME: GMT plus 3 hours (all year round).
AUTHORITY: The Port of Mezen Authority, Morport, 164652 – Kamenka Settlement, Mezen, Archangel Region, U.S.S.R. *Tel:* 9-43-41 (Chief of the Port), 9-40-81 (Harbour Master). *Cables:* Morport Mezen.

AGENT: A branch of the Port of Archangel Main Maritime Agency "Inflot" at the Port of Mezen.

Port – "Inflot", Kamenka Settlement, 164650 – Mezen, Archangel Region, U.S.S.R. Cables: "Inflot Mezen-Kamenka". Tel: Exchange – 94391. Inflot – 94126.

MURMANSK: 69.00 N. 33.03 E. (See Plan)

GENERAL: A Barents Commercial Seaport and Fishing Port, Murmansk, is situated at the Eastern coast of the Southern elbow-shaped bend of the Gulf of Kolsky, between the Zeleny (Green) and Khaldeev Points. It is the last unfrozen port of the Northern seas route.

In very severe Winters the Southern and middle elbow-shaped bends of the Gulf get frozen over for a short period of time in February or March, during calm and frosty weather. In mild Winters drift ice is observed. The Northern part of the Gulf never gets frozen over. The port of Murmansk is open for navigation all the year round. In the event of ice conditions in the Gulf of Kolsky, ice-breaker assistance will be effected in compliance with the Harbour regulations in force.

The port area occupies nearly all Southern elbow-shaped bend of the Gulf of Kolsky. The port of Murmansk consists of 2 harbours: the Commercial and the Fishing Harbours.
DOCUMENTS: Also refer to beginning of U.S.S.R. section.

General Declaration, 5 copies (IMO Form).
Crew List, 6 copies (IMO Form).
Passenger List, 6 copies (IMO Form).
Crew Effects Declaration, 2 copies (IMO Form).
Cargo Declaration, 3 copies (IMO Form).

PILOTAGE: Compulsory. Pilot station is situated at Kislaya Gooba (position Lat. 69° 11.5′ N., Long. 33° 31.6′ E.) in Kolsky Bay, 9 miles South of the entrance. ETA to be given to Agents before arrival (see "Radio"). Since Pilots are not available at the pilot station any time, it is vital that ETA is duly given to the Agent to arrange a Pilot by indicated time. Pilot launch is distinguished by word "Pilot" in black letters on boat's superstructure. Pilots can be contacted on VHF Channel 16. Every vessel should drift whilst waiting for Pilot since depths in the Pilot station are too big to permit anchorage.

During rough sea Pilot is not able to board a ship at the Pilot station area. In this event vessel should follow the Pilot boat in the wake of it up to the Salny Island and embark a Pilot Southward of the Island at a place indicated by Pilot boat.
ANCHORAGES: At the pilot station depths are too great to permit anchorage, but there is sufficient sea room for vessel to await Pilot with engines stopped. Anchorage with depths from 20 m. – 35 m. is situated in the Southern elbow-shaped bend of the Gulf of Kolsky, Westward of the Kievarakskу leading line (the port inner roads). The holding ground is good.

Every vessel waiting for mooring berth should anchor Westward of the Kievaraskskу leading line but not obstructing other vessels' traffic.

It is strictly prohibited to lie at anchor Eastward of the Kievaraksky leading line. If, in case of emergency, a Master has to lie at anchor in the prohibited area, he should immediately report the fact to the Harbour Master of the Commercial port of Murmansk.
RESTRICTIONS: Vessels can enter the inner roads of the port at any time of day or night.

The speed of vessels navigating within the limits of the Gulf of Kolsky is restricted by the following limits:

(a) It shall not exceed 14 knots in the area bounded by the parallels of the Letinsky Point and the Northern side of the Salny Island.
(b) It shall not exceed 10 knots in the area bounded by the parallels of the Northern side of the Salny Island and Pinagory Point.
(c) It shall not exceed 6 knots in the area Southward of Pinagory Point.
(d) In case the wind is over Force 6 Beaufort Scale all movements of ships within the port basin and roads may be carried out with the Port Authorities' permission only.

MAX. SIZE: LOA 200 m., draft 12.0 m.

HEALTH: International quarantine signals to be used on arrival. No later than 6 hours before arrival at the inner area Master should radio Agents giving full details of state of health on board, and requesting Pratique which will be given on arrival.

RADIO/RADAR: Murmansk Radio operating 24 hours on 2182 kHz. Coastal radio station UMN operating 24 hours on 500 and 472 kHz. Coastal radio station UMV operating 24 hours on 13080 kHz.

Radio contact can be established through the port radio station Murmansk Radio, operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz) Working*	*Calling*	*Type of transmission*	*Time*
UMN	500	500	A1A	H24
"Murmansk Radio"	2182	2182	H3E	H24

Radar/VHF Link:

In the South circular bay, movement of all vessels is severely controlled by Coastal Radar Station (Murmansk Radio 9 – VHF Channels 12, 18 and 67). All vessels under way must make contact with it and carry out the recommendations received.

All vessels when at anchor or navigating in the Gulf of Kolsky must keep constant VHF watch on Channel 16.

The port radar station gives all possible information to any vessel navigating in the Gulf in the restricted visibility. Radar navigation is usually controlled by a Pilot on board a vessel.

Storm predictions are transmitted on Channel 16 VHF for vessels in the vicinity. Vessels at moorings are warned through the Agent "Inflot".

Notice of Arrival: Every foreign vessel on approaching the Gulf of Kolsky must ask for entry permission into the Gulf from the Toros Island signal station by exhibiting her International Code letters by day and at night her call sign should be made in Morse code by searchlight.

Advice to Agent: ETA first notice be given to "Inflot" by Shipowner 12 days prior to ship's arrival. Master has to inform Port via "Inflot" 48 hours and 12 hours before ship's arrival.

VHF: Port VHF maintains contact between ship and shore. Calling on Channel 16 working channel will be according to instructions from shore (Channels 7, 26 and 27).

TUGS: 4 tugs 1,200 h.p. – 2,300 h.p. Normally join vessel in the inner area of the port. Ship's lines as well as tug's lines can be used, the latter being supplied free of expense to vessel.

BERTHING: Main berths, depth alongside 32 ft. at low water. Average height of tide about 3.9 m. Vessels berth port or starboard side alongside at Master's and Pilot's discretion. The berths of the Commercial Harbour with depths alongside of up to 12.0 m. are equipped to handle general and bulk cargoes, metals, machinery, chemicals, foodstuff, etc.

There are enclosed mechanised warehouses for apatite including open concrete floor sheds.

Berths of the port are equipped with mobile electric cranes of up to 40 tons capacity. There are floating cranes with lifting capacity of up to 90 tons, and other cargo handling equipment and intra-port transport. Since loading/unloading is usually done by the port cranes, there are no specific requirements to vessel's cargo gear.

STEVEDORES: Arranged by Agent on basis of Master's ETA. Loading and unloading is carried on throughout 24 hours a day including holidays.

MEDICAL: Hospital and medical facilities available. Vaccination can be arranged. If doctor required on board Master should inform Agents by radio or VHF.

DENSITY: At the berth varies between 1006 and 1025.

FRESH WATER: Available from most berths, otherwise supplied by barge. To avoid delay recommended to order before arrival.

FUEL: All grades available. Delivered by barge. Advance notice required.

GANGWAY/DECK WATCHMEN: Not obligatory.

OPENING/CLOSING HATCHES: Usually performed by ship's crew.

CERTIFICATES: At first Russian port of call certificates of tonnage and those required by International Convention will be required for examination.

CUSTOMS ALLOWANCES: No restrictions on crew's consumption of tobacco and alcohol on board. It is forbidden to take these items ashore.

CONSULS: There is no local representation.

REPAIRS: All kinds of repairs can be carried out for vessels of up to 30,000 dwt.

DRY DOCKS: Large dock; length 225 m., width 45 m. Small dock; length 141 m. width 30 m.

TIDE: Changes of the water level in the Gulf are due to the tides. The tide is semi-diurnal with two high waters and two low waters a day. The difference in time of high and low water is about 6 hours. The range of the tide at mean neap is about 2.4 m. and at mean spring 4.5 m. The extreme range of water level is usually observed during the Autumn months and the lowest during Spring.

TIME: GMT plus 3 hours in Winter. GMT plus 4 hours in Summer. (April 1st – October 1st).

TELEPHONES: Ambulance, Tel: 003, 2395 and 2422; Fire service, Tel: 2252 and 2524.

DEVELOPMENTS: Reconstruction is being carried out in order to speed up loading of iron-ore and other cargoes.

AUTHORITY: The Port of Murmansk Authority, 19 the Port Passage, 183038 Murmansk, U.S.S.R. *Tel:* 2-22-60, 2-23-10, 2-55-65 (Harbour Master). *Cables:* Mortorgport Murmansk.

AGENT: The Port of Murmansk Main Shipping Agency "Inflot", 19 The Portovy Pr., 183038 Murmansk, U.S.S.R. Cables: "Inflot Murmansk". Tel: 2-56-66, 2-51-97. Telex: 126116.

NAKHODKA: 42.48 N. 132.53 E. (See Plan)

GENERAL: A commercial port, Nakhodka is situated in Nakhodka Bay, in the N.W. part of the Japan Sea.

Sometimes America Bay is covered with sludge which is frequently driven out by winds into the sea.

From the beginning of January to March the Nakhodka Bay is usually covered with thin ice which can easily be broken by vessels and driven out into the sea by favourable winds.

The port is open for navigation all the year round.

Changes of the water level in the Nakhodka Bay are of small account but the rise of the water level caused by strong Southerly winds blowing for considerable periods of time, may reach quite a high level.

The Northern part of the Nakhodka Bay from the entrance up to the line connecting the Lindgolm and Basnin Points is occupied by the Commercial port. The fishing port is situated Southward of this line.

The most dangerous wind for vessels lying in the Nakhodka Bay is the strong Southern wind of long duration caused by typhoons. The wind usually gives rise to the water level and produces waves of up to 3 m. height in the Bay.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilotage in the port of Nakhodka is compulsory for all vessels irrespective of nationality and ownership with the exception of the local coasters.

Since 1981 the following Traffic Scheme has been established in the Nakhodka Bay (Navarea XIII No. 28 04.04.81).

1. All vessels arriving at Nakhodka Bay ports from sea are requested to proceed to Nakhodka Bay lighted pivot mid channel Buoy No. 1 (Lat. 42° 43′ 31″ N., Long. 132° 56′ 26″ E.) which is the pilot boarding place.
2. Main ship channel No. 1 (740 m. wide) leads from lighted Buoy No. 1 along Nakhodka Bay entrance range axis 180° – 000°.
3. Channel No. 2 (740 m. wide) 050° – 230° leads from lighted Buoy No. 1 to Nakhodka Bay lighted pivot mid channel Buoy No. 2 (Lat. 42° 46′ 00″ N., Long. 133° 00′ 06″ E.) to Vostochny Port Channel No. 3 (250 m. wide) leads along axis of Vrangel Bay entrance range 297° – 117°.
4. Channel No. 7 (740 m. wide) leads from lighted buoy No. 2 along axis of Vrangel Bay entrance range 297° – 117° up to crossing the Main Ship Channel No. 1 to Nakhodka Bay.
5. Channel No. 4 (740 m. wide) leads from Main Ship Channel No. 1 along axis of Novitsky Bay range 089.3° – 269.3° up to crossing the Channel No. 7 to Vrangel Bay and Channel No. 5 (250 m. wide) leads to Novitsky Bay.
6. Entrance channel No. 6 (250 m. wide) leads from main ship Channel No. 1 along axis of Torgovy Port range 087.9° – 267.9° to Nakhodka Bay.
7. All vessels 50 m. and more in length are requested to proceed via above mentioned channels.

Channels No. 1, 2, 4, 7 have two-way traffic. Vessels are requested to proceed along the right side of channel axis.

Channels No. 3, 5, 6 have one-way traffic. Vessels to proceed along the channel axis, according to Traffic Centre instructions.

8. Vessels that proceed from sea are requested to contact Traffic Regulation Centre on Channel 12 call sign "Kamensky-17" not less than 2 miles before approaching Nakhodka Bay lighted pivot Buoy No. 1.

Vessels at berth or anchored within Nakhodka Bay water area are requested to seek permission of the Traffic Regulation Centre before unmooring or weighing the anchor.

Vessels anchored are requested to keep continuous watch on Channel 16.

To avoid damage to a vessel and/or any port installation, vessels should be moored/unmoored by the method of parallel mooring/ unmooring with tug assistance.

Being at 10 m. distance from a berth a vessel is allowed to use her main engine in case of emergency only.

ANCHORAGES: A safe anchorage can be obtained in Area Nos. 305, 306 and 307, with depths from 13.0 m. – 28.0 m. and in the anchorage "10" area with depths from 18.0 m. – 28.0 m. The holding ground in both anchorages is mud, sand, sand with mud, stone.

The "3" area is a quarantine anchorage which serves as the Pilots' boarding place and an anchorage for deep sea-going vessels over 3,000 d.w.t.

The "10" anchorage area is an anchorage for tankers proceeding to the oil port situated in the Novitsky Bay. Boundaries of the anchorages are shown on the chart.

To lie at anchor in the Nakhodka Bay, in the fairway and in the dredged harbours, except in emergency, is strictly prohibited.

RESTRICTIONS: Vessels can enter or leave the port at any time of day and night. There are no size restrictions for entry to the port, except for vessels having the maximum permitted draft.

Anchorage for tankers is allowed only in the "10" area.

MAX. SIZE: The permitted draft for vessels proceeding to the Commercial port is 9.10 m., the Fishing port 8.0 m. and the Passenger Terminal 8.6 m.

Vessels drawing over the permitted draft must obtain Harbour Master's permission prior to entry to the port.

HEALTH: Advise "Inflot" by radio in advance if there is any case of quarantine illness on board the ship. If vessel is arriving from a cholera area, then cholera inoculations are required.

TUGS: Tug and mooring launch assistance available. 2 tugs used. Tugs join the vessel in America Bay as directed by Master or Pilot. Ship's tow lines are used.

RADIO: Radio communication can be effected via the radio station of the Primorsk Shipping Company – "Nakhodka-Radio" some data of which is given in the table below.

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
UKI	500	500	A1A	H24
Nakhodka Radio–1	156.100*(2)	160.700*(2)	F3E	
"Novitsky-2"	157.65*(33)	157.65*(33)	F3E	H24
(Oil Harbour controller)	157.7*(34)	157.7*(34)	F3E	H24
"Kamensky-17"	156.8*(16)	156.8*(16)	F3E	H24
(Vessels' movement	156.7*(14)	156.7*(14)	F3E	H24
control post)	156.375*(67)	156.375*(67)	F3E	H24

*Frequencies are given in MHz.
0100–1300 (Moscow Time)

VTMS in operation.

BERTHING: May be effected at any time of day or night. In daytime vessel's mooring position will be marked by a flag and at night by a red lantern. These signals mark the point where the ship's bow should be at the mooring.

The berths of Cargo Handling Port Area No. 1 have depths alongside from 8.6 m. up to 10.2 m. and are equipped to handle grain, equipment, cables, wire ropes, metals, phosphorus, etc.

The berths of Cargo Handling Port Area No. 2 have depths alongside from 9.1 m. up to 10.2 m. and are equipped to handle grain, coal, cement, foodstuff and general cargoes.

The berths of Cargo Handling Port Area No. 3 have depths alongside from 8.8 m. up to 11.8 m. and are equipped to handle timber, sawn timber, 20 ft. and 40 ft. ISO containers, equipment, machinery and other cargoes.

Passenger vessels are handled at two berths with depths alongside 8.8 m. and 6.1 m.

Electric cranes of up to 41 tons capacity are operated on the quays. There are also floating cranes with lifting capacity of up to 300 tons and other cargo handling equipment, intra-port transport included.

2 grain handles available, rate 300 tonnes/hr. each.

Loading and/or unloading is usually done in accordance with conditions and rates stipulated by Charter Parties and Sales Contracts.

STEVEDORES: Arranged through "Inflot".

MEDICAL: Medical service is free. All requirements should be ordered in advance through "Inflot".

FRESH WATER: Can be supplied by barge only.

FUEL: Available.

TANKERS: Slop reception facilities are available.

OPENING/CLOSING HATCHES: Can be carried out by stevedores.

CUSTOMS ALLOWANCES: No restrictions on tobacco and alcohol on board ship. Only tobacco required for personal consumption may be taken ashore.

CONSULS: North Korea, Tel: 55310. Japan, Tel: 56360.

WIND: The most dangerous wind for vessels lying in Nakhodka Bay is the strong Southern wind of long duration caused by typhoons. The wind usually gives rise to water level and sends heavy waves of up to 4 m. height into the Bay.

REPAIRS: All kinds of repairs for vessels of up to 25,000 dwt. can be carried out.

REPATRIATION: Can be arranged during the Summer months provided passport and documentation in order. During Winter months there are no facilities for foreigners to reach nearest international airport so repatriation is only possible via infrequent passenger ships to Japan.

AIRPORT: Nearest international airport is at Khabarovsk, 1,000 kilometres away. Vladivostok is now closed to foreigners or international traffic, though sometimes used for air freight.

TIME: GMT plus 10 hours. GMT plus 11 hours in Summer.

SHORE LEAVE: Permitted subject to police control.

DEVELOPMENTS: Port under reconstruction. On completion vessels with draft of 11.6 m. will be able to berth.

SHIPMASTER'S REPORT: April, 1983.

The following is additional information received regarding this port.

Documents: 2 copies of Camera List on plain paper signed by the Master giving Make and Serial No. of cameras in possession of crew members.

Also see "Regulations".

Anchorage: All tankers must anchor, while awaiting berth, in the anchorage with the following co-ordinates:

	Lat.	Long.		Lat.	Long.
(a)	42° 45.80′ N.	132° 54.71′ E.	(b)	42° 45.80′ N.	132° 55.27′ E.
(c)	42° 55.57′ N.	132° 55.44′ E.	(d)	42° 44.37′ N.	132° 55.44′ E.
(e)	42° 44.39′ N.	132° 54.56′ E.	(f)	42° 44.73′ N.	132° 54.56′ E.
(g)	42° 45.16′ N.	132° 55.08′ E.	(h)	42° 45.39′ N.	132° 54.71′ E.

VHF: "Nakhodka Port Radio Control" maintains continuous watch on Channel 12. This station can be used for conveying messages to Agents. It is not possible to talk directly with Agents.

Medical: 10 Roubles per person for medical consultation.

Fuel: Owner must contact Morflot London (Telex No. 885371 Mrf Lnd) for supply of fuels.

Tankers: All ballast (including clean ballast) in cargo tanks must be pumped ashore. Installation can receive ballast at the rate of 300 t.p.h. to 400 t.p.h. Gas oil loading rate about 700 t.p.h. Interruptions in loading due to shortage of cargo ashore. Vessel took about seven days to load 20,700 tonnes of gas oil.

Surveyors: Soviet Register of Shipping Surveyor can carry out hull and machinery surveys on behalf of Lloyd's Register of Shipping.

Customs: All pornographic literature and films must be kept sealed during the vessel's stay in port.

Shore Leave: From 4 tanker berths, shore leave possible by boats only. Same arranged by Agents.

All seamen are welcomed in the local Seaman's Club.

Regulations: Photography strictly prohibited within port limits.

SHIPMASTER'S REPORT: May 1984.

See "Vostochny".

AUTHORITY: The Port Authority of Nakhodka, 22 Port Street, 692900 Nakhodka, Primorsky Krai, U.S.S.R. *Tel:* 5-77-02, 5-79-38, 5-78-15. *Cables:* Mortorgport Nakhodka Primorskogo.

AGENT: The Far Eastern Main Maritime Agency – "Inflot". Postal address: 692900 USSR, Primorski Kray, Nakhodka, ul Leninskaia 2. Telephone: 56155, 56233, 59773. Telex: 213826. Telegraphic address: Inflot Nakhodka.

NARYAN-MAR: 67.38 N. 53.00 E.

GENERAL: A commercial port, Naryan-Mar is situated in the S.E. part of the Barents Sea, at a distance of 70 miles from the Pechora River mouth on the right bank of the Gorodetsky Shar Creek.

The port is open for navigation for a period of 120 – 130 days in the year.

In the Pechora River Inlet first ice usually begins to form between 20th and 25th October, but sometimes appears at the beginning of the month.

The inlet becomes completely frozen over at the middle of December. Ice finally disappears at the end of June or sometimes beginning of July. Changes in the water level in the Pechora Inlet, due to melting of ice in Spring, have not been observed.

The formation of ice in the rivers flowing into the Pechora Inlet usually depends upon the time of the appearance of ice in the Inlet itself. Rivers, as a rule, become frozen over by the middle of October. The ice in the rivers usually breaks up earlier than it finally disappears in the Pechora Inlet.

The Pechora River at the Kuya settlement area becomes frozen over at the end of October, and the ice finally disappears by the end of May.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Besides information stipulated in Soviet Wood Charter Party, vessels approaching Pilot Buoy may contact Port Authorities or Pilot in first 15 minutes of any odd hour from 0700 till 2300 hrs. (Moscow time), frequency 2182 kHz. Signals for Pilot to be given in accordance with International Code. Pilot boat wooden, standard type, white painted, with word "Pilot" in black letters on wheelhouse. Pilot usually boards vessel at the Pilot Anchorage light buoy (Lat. 68° 30′ N., Long. 54° 32′ E.). In case of bad weather, and in extraordinary circumstances Pilot shall embark vessel in the Srednevskie Islands area. In this event a vessel approaching the port from seaward should follow pilot boat in the wake of it, up to the Srednevskie Islands leading line where Pilot will be able to board ship.

Master of a vessel proceeding to the Port of Naryan-Mar should order a Pilot through the Harbour Master 24 hours prior to arrival at the Pilot Anchorage light buoy and advise more precise ETA not later than 4 hours before approaching it.

Master should order Pilot not later than 2 hours prior to shifting berth and/or leaving the port.

ANCHORAGE: A recommended anchorage for foreign vessels is situated in the area with the central point Lat. 68° 30′ N., Long. 54° 33′ E. The depths in the anchorage are from 5.4 m. – 6.6 m. Also Inner Roads where anchorage will be indicated by Pilot.

An anchorage can be obtained at the right bank of the Pechora River off Urpinsky leading line No. 24. Depths are from 4 m. – 17 m. The bottom is sand and mud.

Good anchorages with depths from 5 m – 10 m. can also be obtained opposite Zakhrebetny Bay and N.E. of the town of Naryan-Mar.

All vessels arriving from abroad or leaving the port for abroad, must anchor opposite Zakhrebetny Bay for port formalities.

RESTRICTIONS: Vessels can enter or leave the port at any time of day or night.

The permitted draft for entry to the port is about 4.5 m. but it is usually advised by the Port Authorities at the beginning of navigation. The maximum permitted length of a vessel is 125 m.

The entrance to the port is by the fairway leading from the Pilot Anchorage light buoy across the Pechora River bar.

The bar itself is the extensive shoal water area extending Northward of the Bolvansky Nos. Point. Three channels are dredged across the bar: The Receiving Channel, the Bar Channel and the Povorotny Channel. The last one serves as turning-point from the Receiving Channel into the Bar Channel. Vessels drawing not more than 4.9 m. can pass across the bar only at high water level.

It is prohibited to enter or leave the port through the Bar Channel and/or Receiving Channel as well as to navigate in the port area during dense fog, heavy rain and snow falls, strong winds of over Force 6 and absence of floating marks.

With the appearance of ice in the Pechora Inlet and in the Pechora River, entry to the port is not allowed without Harbour Master's permission.

The speed of a vessel navigating from the Pilot Anchorage Light Buoy through the Receiving Bar Turning, Alekseevsky, Polovsky, Kuisky, Urpinsky and other Channels shall not exceed 6 knots, with the exception at the part of the Pechora river between the Zakhrebetny and Srednevsky Channels where it is allowed to navigate with speed not exceeding 12 knots.

When passing floating cranes nearby, lighters and vessels lying alongside the port quays, every ship should proceed at dead slow speed.

MAX. SIZE: Draft declared by Port Authorities after being checked in the beginning of the season, and is about 15 ft.

HEALTH: Vessels inspected by sanitary officer. If no diseases, vessel obtains Free Pratique. Pratique automatic when vessel arrives from another Russian port.

RADIO: Naryan-Mar Radio.

Call Sign	*Frequencies (kHz) Working*	*Calling*	*Type of trans- mission*	*Time of work*	*Remarks*
UOY	500	500	A1	HX	
Naryan-Mar Radio 1	156.8*	156.8*	F3E	H24	Operates during period of navigation only
Port Controller	156.7*	158.0*	F3E	H24	

*Frequencies are given in MHz.

Storm warnings for vessels' traffic in the Pechora Inlet area for the coming 24 hours are transmitted via both the Central Port Radio and VHF radio.

Notice of Arrival: Should be given in accordance with the "Soviet Wood" Charter Party conditions.

BERTHING: The Port of Naryan-Mar specialises in timber exports. Depths at the berths are up to 6.5 m. There are enclosed warehouses and open concrete floor sheds.

The necessary number of tugs for entering or leaving the port as well as for shifting berth shall be agreed upon between Pilot and Master.

A mooring berth is usually indicated by a Pilot. Shifting berths without having obtained Harbour Master's permission is not allowed. Ship's tow lines are usually used during towage.

Diesel portable cranes of up to 6 tons capacity are operated on the quays. There are also track-laying cranes of up to 12 tons and floating cranes with lifting capacity from 35 tons – 40 tons.

STEVEDORES: As per "Soviet Wood" Charter Party.

MEDICAL: No advance notice required. Clinic and hospital available.

DENSITY: Fresh water irrespective of tide.

FRESH WATER: Available from shore.

FUEL: Not guaranteed.

GANGWAY/DECK WATCHMEN: To be provided by vessel.

OPENING/CLOSING HATCHES: According to "Soviet Wood" Charter Party.

CERTIFICATES:
Seaworthiness.
Measurement.
Load Line.
Cargo Equipment.
Safety Equipment.
Radio Telegraphy.
Radio Telephony.
Oil Pollution Prevention.
Sewage Pollution Prevention.
Derat Certificates.

CUSTOMS ALLOWANCES: Tobacco/Wine – No quantity limits.

IDENTIFICATION CARDS: Only Seamen's Books.

CONSULS: No Consuls.

REPAIRS: Small repairs only.

DRY DOCKS: None.

SURVEYORS: State Register of Shipping.

REPATRIATION: Repatriation and crew changes require visa formalities.

AIRPORT: Airport served by regular lines and situated near town.

TIME: GMT plus 3 hours. No seasonal alterations.

TIDE: Changes in the water level in the port area depend upon tides and effects of the wind.

The tide is semi-diurnal with 2 HW and 2 LW a day. The range of the tide varies from 0.9 m. – 1.8 m. Changes in water level are caused by the effects of the wind and may reach 1 m. – 1.5 m.

HOLIDAYS: See "Archangel".

POLICE/AMBULANCE/FIRE: Police 02; Ambulance 03; Fire 01.

TELEPHONES: Can be arranged on board.

SHORE LEAVE: Each crew member properly signed in ship's Articles and having valid Seaman's Book is allowed ashore.

BANKS: None.

EMERGENCY CO-ORDINATION CENTRE: Not available.

STORING: See "Prelims".
1. By truck when alongside.
2. Vessels stored by truck only.
3. Yes.
4. No.
5. See "Archangel".
6. Normally carried out by ship's crew.

DELAYS: Caused by rains, when vessel loading cargo of sawn goods.

AUTHORITY: The Chief of The Port of Naryan-Mar, Ul. Naberezhnaya 11, 164700 Naryan-Mar, U.S.S.R. *Tel:* 26-95. *Telex:* 24211. *Cables:* Morport Naryan-Mar. *Contact:* Via VHF.

AGENT: A branch of the Port of Archangel Main Maritime Agency "Inflot" at the Port of Naryan-Mar. Pechora Timber Mill 164700, Khatanzeisky, the Port of Naryan-Mar, Archangel Region, U.S.S.R. Cable: "Inflot Naryan-Mar". Tel: "Inflot" via the timber mill switchboard 30-70, 31-05.

NEVELSK: 46.40 N. 141.51 E. (See Plan)

GENERAL: The sea fishery port of Nevelsk is situated in the Tatarsky Strait, in the Southern part of the Nevelsky Bay. The port is open for navigation all the year round.

Changes of the water level are mainly caused by in and off-going tidal floods.

The port consists of two parts. The Outer part includes a part of the Nevelsky Bay water area with the imaginary boundaries drawn by an arc of 1.5 mile radius from the light mark installed on the Southern point of the Western breakwater. The Inner port consists of the harbour of the fishing port, the Small and the Northern Scoops. The boundary of the Inner is the line connecting the points of the Southern and the Western breakwaters.

The Master of a vessel when entering the port should keep on the leading line of the green leading light marks located at a distance of 5.5 cables to the North of the Southern point of the Naga Reef. The true direction of the Leading line is 259° – 079°.

The Port of Nevelsk bearing in mind its position, size, weather and hydrological conditions is not and cannot serve as a sheltered port as it is only partially protected from the effects of the sea swell and winds blowing from South, West and N.W. directions and is not protected from S.W. winds at all. Therefore deep sea-going vessels cannot be allowed to enter the port during storm warnings. It is dangerous to stay in the port when heavy S.W. winds are expected.

PILOTAGE: Effected round the clock. The Master of a vessel should order a Pilot via the Harbour Master's office.

ANCHORAGE: Situated in the Outer port to the South of the leading line and to seaward of the 20 m. contour. The anchorage is not protected from West and North winds and waves. The bottom is sand. The anchorage in the inner area is dangerous as the ground there (stone plate) does not hold anchors well.

RESTRICTIONS: The permitted draft is determined by the Harbour Master. Vessels having draft over 5.8 m. are allowed to enter the port after having obtained the Harbour Master's permission.

TUGS: Tugs ordered by the Master for mooring and unmooring meet vessels within the boundaries of the Inner port.

RADIO: Communications can be effected through the port radio station "Nevelsk Radio-1".

Call Sign	*Frequencies (kHz) Working*	*Calling*	*Type of trans- mission*	*Time of work*
UFM-2	500	500	A1A	H24
"Nevelsk-31"	156.8*(16)	156.8*(16)	F3E	H24
(Port Controller)	156.45*(9)	156.45*(9)	F3E	H24

*Frequencies are given in MHz.

BERTHING: All vessels entering the port are moored to the berths according to instructions of a port controller.

The berths of the port with depths alongside of up to 6.5 m. are equipped to handle general, bulk liquid and other cargoes.

There are closed warehouses, open concrete floor sheds and a cold store in the port.

It is recommended to use manila mooring ropes due to insufficient protection of the port from effects of winds, waves and strong variable current with surge (the so called "tyagun").

Opening and closing of hatches is usually done by the crew. All deep draft vessels are loaded/unloaded in the roads.

The berths of the port are equipped with 5 ton portal cranes. There are other cargo handling facilities and intraport transport.

FRESH WATER: Available in limited quantities.

FUEL: Diesel oil available.

TIME: GMT plus 11 hours. Summertime (April 1st – October 1st), GMT plus 12 hours.

REPAIRS: Possible for vessels up to 4.0 m. draft.

CONSULS: None.

AUTHORITY: The Port of Nevelsk Authority, 32 Rybatskaya Street, 694740 Nevelsk, Sakhalin Island, U.S.S.R. *Tel:* 20-06 (Port Director). *Telex:* Via "Inflot", Kholmsk. *Cables:* Morport Nevelsk. *Contact:* Port Director.

AGENT: Sakhalin Main Maritime Agency, Inflot, at Kholmsk, Sakhalin Island, U.S.S.R.

NOVOROSSIYSK: (Including Sheskharis Oil Harbour) 44.43 N. 37.47 E. (See Plan)

GENERAL: In Winter, strong, gusty N.E. winds (called "Bora"), reaching hurricane force at times, blow from the coastal mountains. Due to these winds, vessels lying at anchor in Novorossiysk Bay may very quickly become covered with ice when the temperature of the air is cooled below freezing-point.

It is impossible to enter the port when "Bora" blows, therefore, all vessels are recommended to leave Novorossiysk Bay for the open sea beforehand or lay at anchor in the Yuzhnaya Ozereika Roads, at a distance of 8.5 miles Westward of the entrance to the port of Novorossiysk or in Anchorage Area No. 416, to the South of the Doob Point, until the weather improves.

The range of water level in Novorossiysk Bay caused by the effect of the winds, does not exceed 0.6 m. The changes of water level, due to variation in atmospheric pressure ("Seish" effects), are observed at times. The "Seish" may last up to several days. The maximum range of water level, due to the "Seish", observed in Novorossiysk Bay is 0.6 m.

The port consists of 2 harbours – the Dry Cargo Harbour and Sheskharis Oil Harbour.

The inner roads are situated at the head of Novorossiysk Bay are divided from the outer roads by the Western and Eastern Moles. The outer roads are situated between the moles and the Southern border of the port.

The Dry Cargo Harbour situated inside the inner roads is protected by 2 (Western and Eastern) moles.

Two passages, the Western and Eastern, divided by Penaisky Shoals lead to the inner roads through the port area. The Western passage is wider in comparison with the Eastern, and vessels may enter outer roads passing through it by one course.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

Shipmaster's Report: (1975) Notwithstanding the instructions for documentation for all U.S.S.R. ports referred to at the beginning of the section, the Novorossiysk Port Authorities require the following:

General Declaration (IMO FAL Form 1)	3 copies
Cargo Declaration (IMO FAL Form 2)	2 copies
Ship's Stores Declaration (IMO FAL Form 3)	2 copies
Crew Effects Declaration (IMO FAL Form 4)	2 copies
Crew List (IMO FAL Form 5)	6 copies
Passenger List (IMO FAL Form 6)	4 copies

PILOTAGE: Compulsory: 96 hours prior arrival cable Inflot giving ETA, name of vessel, gross tonnage, exact draft, type of engine. Flag, sound and Morse signal G. Pilot meets vessel at Lat. 44° 37′ N., Long. 37° 52′ E. Movement of vessel within inner harbour – only under Pilot guidance. If Pilot is not available vessel should anchor in Area No. 415, opposite the Kabardinka settlement, recommended as an anchorage (No. 416), and wait until Pilot arrives.

ANCHORAGES: Anchorage in the outer roads of the port is allowed almost everywhere but most convenient places for the purpose are to be considered the following 3 areas. The first one is Area No. 415 situated to the North of the Doob Point.

Depths there vary from 12 m. to 27 m., the holding ground is mud. In the event of winds blowing from seaward Masters of all vessels are recommended to leave this area for the open sea. Area No. 63 is the second anchorage place, situated 8 cable lengths Westward of the Penai Point. Depths there are from 13 m. to 27 m., the holding ground is mud and mud with shell. The third place is Area No. 51 situated 6 cable lengths South-Eastward of the port entrance. Depths there are from 20 m. to 24 m.

Vessels approaching the port of Novorossiysk with N.E. gales ("Bora") blowing, or caught by the storm whilst lying in the outer or inner roads, or after having received storm warning, should use every opportunity to proceed to sea or lay at anchor in the Yuzhnaya Ozereika Roads (Anchorage Points No. 408 and 410), having the main engines ready and keeping constant anchor watch.

Under the circumstances, every vessel should keep regular radio contact with port radio station.

Masters of vessels lying at anchor in the outer roads and/or in the port, are usually warned beforehand about the forthcoming N.E. winds. Since these winds may reach hurricane force during a very short period of time, particularly in Winter, all Masters lying at anchor in Novorossiysk Bay are recommended to pay careful attention at every change of the weather, to watch position of vessel to be able to prevent her drifting about anchor and proceed to sea in due time.

RESTRICTIONS: No restrictions on night entry into the Inner Roads. Mooring and/or unmooring, both in the Dry Cargo Harbour and the Sheskharis Oil Harbour cannot be effected during Southerly or N.E. winds over Force 7.

MAX. SIZE: The permitted length for entry into port is 250 m., draft 11 m. for dry cargo vessels.

Tankers: 250,000 d.w.t., 19 m. max. draft.

HEALTH: Free Pratique automatic for vessels coming direct from U.S.S.R. port. From other countries, usual procedure of sanitary inspection applies.

RADIO: Vessels can establish radio contact through port radio station Novorossiysk Radio operating 24 hours a day on the following frequencies:

Call Sign	*Frequencies (kHz) Working*	*Calling*	*Type of trans-mission*	*Time of work*
UDN	500	500	A1A	H24
"Novorossiysk Radio"	2182	2182	H3E	H24

"Novorossiysk Radio-3"	156.7*(14)	156.7*(14)	F3E	H24
(Main Controllers' office of the Novorossiysk Shipping Co.)	156.8*(16)	156.8*(16)	F3E	H24
"Novorossiysk-17"	156.8*(16)	156.8*(16)	F3E	H24
(Vessels' movement control post)	156.45*(9)	156.45*(9)	F3E	H24

*Frequencies are given in MHz. **CPR – Central Port Radio Station.

All vessels passing through the traffic controlled zone and/or anchored there have to keep constant VHF radio watch on Channel 16.

The port signal station is equipped with radar which gives all possible information for ensuring safe pilotage, and also helps Pilots in shifting vessels within the port inner roads.

Inflot on VHF Channel 16, working Channel 67.

TUGS: A sufficient number of tugs of between 600 h.p. and 5,000 h.p. are available in the port.

While manoeuvring ships to the Sheskharis Berths two more tugs of 150 i.h.p. are engaged regardless of the ship's size in view of the constructive features of the berths.

BERTHING: When proceeding in inner harbour vessels must keep both anchors ready to let go; ships to be moored by safe ropes which to be kept tight at all times. Also be ready to use anchor chain over bollard according to Pilot's recommendation. Strictly prohibited to work with propellers lying alongside berth. All mooring ropes must be fitted with rat-guard plates.

The quays of the Dry Cargo Harbour with depths alongside of up to 11.5 m. are equipped to handle general, 20 ft. and 40 ft. containers and bulk cargoes (coal, ore), metals, timber, sugar, grain, cement, fruit and vegetables.

Berths of the port are equipped with modern cargo handling facilities. There are portal cranes of up to 40 tons capacity, floating cranes with lifting capacity of up to 100 tons, automatic and electric cargo lifters and other equipment.

Opening and closing of hatches is usually done by ship's crew with the help of portal cranes at dry cargo berths, if ordered by Master, grain berth excluded.

Ores are loaded in compliance with the Temporary Regulations for Carrying Ores handed over to the Shipmaster by Inflot Agents during inwards clearance.

Following are the basic requirements of above Regulations to the ores being loaded *(a)* moisture contents not higher than 12% (if other percentage is not stipulated by Charter Party); *(b)* angle of repose is not less than 35°.

Grain and other bulk cargoes are to be loaded in strict conformity with the International Convention.

STEVEDORES: All necessary services including stevedoring work available under Port Authority guidance. Port cargo-handling regions where ships berth managed by Port Authority and used for stevedoring, tallymen service, storage, etc. On the matters connected with services available, foreign vessels have to apply to Port Authority through Maritime Agency "Inflot".

MEDICAL: In case of accident (emergency), medical attendance rendered at any time. Hospital facilities available. Also inoculation, vaccination, etc.

TANKERS: Bearing in mind N.E. gales, oil carriers lying alongside oil pier must have boat-ropes lowered to water and illuminate them at night. All scupper holes on main deck must be closed tightly. Master responsible for overflow of oil in the vicinity of harbour and has to bear harbour cleaning costs. No repair work can be done on tankers lying alongside oil pier. No ballast water may be pumped out, no garbage or refuse thrown overboard. Ballast water to be pumped into shore slop tank.

The Sheskharis Oil Harbour is situated in the Eastern part of the outer roads, 2.2 miles N.W. of the Penai Point. It is protected by a mole from the South and oil jetty from the North. The base of the jetty is used as a berth for fire-fighting boats.

Since it is not safe to stay alongside berths in the Sheskharis Oil Harbour during strong winds blowing from any direction, all tankers, after having received a storm warning should take urgent measures to leave for sea.

Depths at the berths of the Sheskharis Oil Harbour are from 4.5 m. up to 19.0 m.

To ensure safe loading/unloading of oil products as well as to expedite the vessel's turn around time, every tanker should be equipped with cargo manifolds capable of fitting 8 in. – 16 in. shore-loading connections.

These manifolds should allow the upward connection with shore cargo flanges of not less than 1 m. in height and located on deck at 3 m. – 5 m. length from side of vessel.

Deepwater Berth No. 1: Accepts vessels of 80,000 to 250,000 d.w.t. Arrival and departure draft not to exceed 19.0 m.

A tanker is to have a site 3.0 m.×3.0 m. on cargo deck free of pipe-lines/deck openings and other constructional elements to secure end platform of shore gangway. The centre of site to be 5.5 m. from starboard side and 12.0 m. – 13.0 m. from cargo manifold in forward direction.

To ensure normal contact with shore fenders vessel's fully loaded freeboard should not be less than 6.3 m. Cargo manifold flanges should have thickness 30 mm. – 32 mm.

DENSITY: About 1010 – 1014.

FRESH WATER: Available from shore; minimum quantity invoiced at 15 tons.

FUEL: Most grades available. Fuel for tankers can be supplied ex-shore. Bunkers for dry cargo vessels are usually delivered by lighters.

FIRE PRECAUTIONS: All operations involving open fire and sparks are prohibited on oil pier. Two fire extinguishers, thick felt and sand must be ready beside hose connection.

GANGWAY/DECK WATCHMEN: Gangway watch compulsory and carried out by crew.

OPENING/CLOSING HATCHES: Normally by crew, otherwise according Charter Party.

CUSTOMS ALLOWANCES: No quantity limits but nothing allowed to be taken ashore.

IDENTIFICATION CARDS: Crew members get shore passes.

CONSULS: No Consulates in port or its vicinities.

REPAIRS: All kinds of repairs for vessels of up to 60,000 d.w.t. can be carried out.

Cargo Superintendent's Report: 1975.

The Novorossiysk Shiprepair Yard is capable of carrying out any ship repairs, and is equipped with 3 floating docks. I was unable to obtain information on the size of these docks, but estimate they are capable of handling vessels in the 100,000 ton range.

REPATRIATION: No facilities exist for effecting crew changes. A crew member may be repatriated due to family reasons or sickness but repatriation requires visa formalities.

AIRPORT: Nearest airport (Krasnodar) served by regular internal lines is situated at 150 km. from port.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

POLICE/AMBULANCE/FIRE: Police, Tel: 02; Ambulance, Tel: 03; Fire, Tel: 01.

TELEPHONES: Can be arranged to be fitted on board.

SHIP SUPPLY SERVICE: Local consignment centre may supply marine oils and lubricants, manufactured by Mobil Oil, Castrol, Elf-Aquitaine and Esso.

Marine paints and coatings of Hempel, Sigma, Interpaints, as well as chemicals and treatments manufactured by Perolin, Unitor, Rochem.

Spares are available for Sulzer, B&W, MAN main auxiliary diesel engines, for Magnavox, Mx-1102 satellite navigator.

Address: Consignment Centre, 8 Portovaja Street, Novorossiysk 353901, USSR. Tel: 6-28-97. Telex: 27243, 412629.

HOLIDAYS: New Year's Day, 8th March (World's Women's Day); May 1st, 2nd (Labour Day); May 9th (Victory Day); October 7th (U.S.S.R. Constitution Day); November 7th, 8th (Great October Socialist Revolution Day). Cargo work can be arranged on those days.

SHORE LEAVE: Crew members are allowed ashore. Crew members of foreign vessels get shore passes which grant them permission to stay ashore till 2400 hrs. Crew members who lose their shore passes as well as those late from ashore, are not granted shore leave any longer in conformity with local regulations.

AUTHORITY: The Port of Novorossiysk Authority, 14 Port Street, 353901 – Novorossiysk, Krasnodarsky Krai, U.S.S.R. *Tel:* 6-21-31 (Chief of the Port), 6-22-41, 6-25-16, 5-46-44 (Harbour Master). *Telex:* 829. *Cables:* Morport Novorossiysk.

AGENT: Main Maritime Agency "Inflot", 13 Portovaja Str., Tel: 54014, 52260, 53086, 62678. Telex: 279114. Cables: "Inflot", Novorossiysk

ODESSA: 46.30 N. 30.46 E. (See Plan)

GENERAL: The Port of Odessa is situated on the N.W. coast of the Black Sea in the S.W. part of Odessa Bay.

The port is open for navigation all the year round, but with ice-breaker assistance in severe Winters about 30 days of the year. Ice first begins to form in the second half of December and finally disappears in February. After ice has formed it is often broken up by strong winds and stormy weather. In mild Winters ice has not been observed in Odessa Bay.

Range of water level caused by winds depends on force and periods they blow, and may reach 0.6 m. – 1.0 m.

Atmospheric pressure has also a direct influence on the water level ("Seish" effect), but is weaker than effects of the wind. The "Seish" may last from a few minutes up to several days causing change of water level up to 0.58 m.

PORT LIMITS: The Odessa port waters are bound in the South by Lat. 46° 25′ 00″ N. from the shoreline as far as its intersection with Long. 30° 54′ 00″ E.; in the East by Long. 30° 54′ 00″ E.; in the North by Lat. 46° 32′ 00″ N. to its intersection with the shoreline and on the West by the shoreline itself.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Arranged through Inflot, but vessel to give 12 days', 96, 24 hours' and 6 hours' notice through Odessa Radio. Pilot boat recognised by international pilot flag. Vessel requiring Pilot shows international flag "G". Request for Pilot to shift a vessel within the port or to Pilot her into or out of port should be made by the Master through the Inflot Agency at least 4 hours prior to service requirement.

The Pilot is brought on board and returned on shore by pilot launch 1.7 miles E.S.E. of the Vorontsovsky Lighthouse (Lat. 46° 29′ 00″ N., Long. 30° 48′ 00″ E.).

The ship's Master is responsible for the safety of the pilot launch and the Pilot when he boards and disembarks from the vessel as well as during his stay thereon.

The boarding Pilot shall be informed by the ship's Master of the vessel's draft, length, breadth and other particulars required for her safe pilotage and mooring.

Specialised vessels (LASH vessels, barge carriers, container ships, Ro/Ro vessels and the like) shall be piloted through port waters only by a Pilot authorised by the local Port Pilotage Service. The Pilot may be taken on board in advance in the swinging area in the port of Ilichevsk (Lat. 46° 10.2′ N., Long. 30° 56.2′ E.).

Pilotage for all specialised vessels is compulsory.

Masters of vessels proceeding from the port of Odessa to Kherson shall make request for a Pilot through the Inflot Agency from the Maritime Pilot Service based in Ilichevsk. Vessels approaching zone from the sea must communicate with "Odessa Port Control" on VHF, Channel 14 (156.7 MHz) and act in accordance with its instructions.

ANCHORAGES: Two anchorages are available at the Odessa Roadstead. They are Anchorage No. 355 and Anchorage No. 354.

Anchorage No. 355 is used by vessels clearing in or out of port and by those that are to take on water, supplies or fuel or are to undergo minor repairs, etc.

Anchorage No. 354 is for large-tonnage vessels as well as tankers or others carrying dangerous cargoes.

The boundaries of these anchorages are duly charted.

Vessels shall proceed to, and anchor at, Anchorage No. 354 without assistance. Upon anchoring, the vessel shall communicate to the Traffic Control Station her bearings and distance from the Vorontsovsky Lighthouse.

In case of unforeseen circumstances which may endanger navigation (sudden deterioration of visibility, failure of the main engine or steering gear, non-readiness of berth to receive vessel, etc.), vessels entering or leaving port shall, if possible, anchor at points 8 or 12 of Anchorage No. 355.

Anchoring in the Oil Harbour Channel, in the prescribed routes and harbour approaches as well as in the harbour gateway should be avoided.

RESTRICTIONS: Vessels enter only with Pilot and should have lights according to Pilot's instructions. Vessels berthed depending on kind of cargo carrying or loading.

Vessels can enter and leave the port at any time of day or night.

Medium size vessels when entering or leaving port must have keel clearance not less than 1 ft.; large vessels not less than 2 ft.

Vessels are allowed to moor at berth only after having obtained Harbour Master's permission.

The speed of a vessel shall not exceed 4 knots when passing through the channel and/or in the port water areas marked by navigational marks.

Large vessels laden with ballast water only, are allowed to moor to berth if winds do not exceed Force 6. A vessel of smaller size may be turned broadside on to a loaded vessel of a larger size, but not vice versa.

MAX. SIZE: *Inner Harbour:* LOA 240 m., beam 40 m. and draft 12 m.

HEALTH: Free Pratique given on berthing or at the anchorage. In case of suspected disease Master must inform Inflot by cable. Free Pratique cannot be granted automatically.

RADIO: Vessels can establish radio contact through the port radio station Odessa Radio operating 24 hours a day on the following frequencies:

Call Sign	*Channels and Frequencies (kHz) Working*	*Calling*	*Type of trans-mission*	*Time of work*
UDE	500/447	500/454	A1A	H24
"Odessa-Radio"	2182	2182	H3E	H24
"Odessa-1" (CPR)*	16,7,27 and 62		F3E	H24
"Odessa-Radio-5" (Harbour Master)	16,9	16,9	F3E	H24
"Odessa Pilot"	14,16	14,16	F3E	H24
"Odessa-Radio-8" (Inflot Shipping Agency)	16,13	16,13	F3E	H24
"Odessa Port Control"	16,14,31	16,14,31	F3E	H24
(Vessels' movement control post)	67,14	67,14	F3E	H24

*CPR – Central Port Radio Station.

Traffic and storm signals are given by "Odessa Port Control" on VHF Channels 14 and 16.

VHF: Traffic in the harbour is controlled by the Traffic Control Station round the clock. The Traffic Control Station and the Signal Mast are situated on the roof of a building at Berth No. 1. The station telephone number is 37-30, its VHF call signal is "Odessa Port Control", and the operating Channels are 14, 20 and 67.

All vessels proceeding to the port of Odessa shall establish VHF communication on Channel 14 (156.7 MHz) with the Traffic Control Station 20 minutes prior to entering control zone (8 miles from Vorontsovsky Lighthouse), when entering port waters and after berthing or anchoring.

The vessel shall give the following particulars to the Pilot-Operator on duty:

(a) Ship's name, owner, length, breadth, draft.

(b) Last port of call and purpose of calling at the port of Odessa.

(c) Specialised vessels (LASH vessels, barge carriers, Ro/Ro and such like) and others concerned, also indicate the number of propellers, their pitch (variable or constant), engine power, availability of thruster and its power.

Thereafter, the ship will proceed according to the instructions of the Traffic Control Station.

Prior to moving any ship within the Traffic Control Zone, her Master shall request permission from the duty Pilot-Operator of the Traffic Control Station by VHF Channel 14, by telephone (37-30) or by visual communication means.

Such permission is valid only for 30 minutes after which it is automatically cancelled.

A special watch should be posted on all vessels and other craft navigating within Traffic Control Zone to listen in on VHF Channel 14 until they are berthed or anchored. Ships underway may change their VHF Channel only on instructions from the Traffic Control Station or the Pilot Service.

All vessels sailing in port waters shall have their VHF stations in good order and shall keep them operative on one of the channels used for communication in the port.

Vessels in port waters, at berth or anchorage, are strictly prohibited to use the VHF for private communication on Channels 16, 9, 14, 20, 22 and 67.

Failure to comply with this regulation will be regarded as a violation of safety rules prescribed for sailing in the Odessa port waters and all violators will be punished accordingly.

Also see "Radio."

RADAR: When visibility is less than 2 miles in the roadstead or 0.5 miles in the port, vessels may be navigated only by shore-based radar.

The necessity for radar-assisted pilotage is determined by the Pilot-Operator on duty at the Traffic Control Station.

The decision to put a vessel into or out of port shall be taken jointly by her Master, the Port Pilot and the duty Pilot-Operator of the shore-based radar station. Ship-to-radar station communication shall be effected by the boarding Pilot.

The shore-based radar station provides:

(a) Pilotage of vessels from the limits of the Traffic Control Zone to the Karantinaya, Novaya and Kabotazhnay Harbours of the dry-cargo port through the Vorontsov Gateway.

(b) Pilotage of vessels from the limits of the Traffic Control Zone to Anchorage No. 355.

(c) Pilotage of vessels from the port through the Vorontsov Gateway and from Anchorage No. 355 to points beyond the Traffic Control Zone Limits.

(d) Remote pilotage of vessels with no Pilot on board by furnishing them with information on their position, with other data to help them orientate and to pass clear of other ships. Such information is supplied by the shore-based radar station at the Master's request.

Vessels may be brought to Anchorage No. 355 only with the assistance of shore-based radar pilotage whatever the visibility conditions may be.

Radar assisted pilotage and remote pilotage are effected throughout the 24 hours of the day, only 1 vessel being piloted at a time.

A ship to be piloted with the assistance of or by shore-based radar shall have her main engine, steering gear, anchor handling gear, communication facilities and sound signalling in good working condition and her radar shall be operative. Failure of any of above equipment is to be immediately reported by the ship's Master to the shore-based radar station through the Pilot.

In the event of failure of the shore-based radar or other means of ship-to-shore communication, the Master, whose ship is being assisted by such radar or is on remote pilotage, must take all the necessary measures to ensure the ship's safety.

The use of the shore-based radar does not relieve the Shipmaster of responsibility for ship control.

Radar assisted or remote pilotage dues are recovered according to established procedure on the basis of the extract from the log of the Odessa Port Traffic Control Station.

TUGS: A ship's tugboat requirements are made known, subsequent to the Pilot's approval, to the Traffic Manager on VHF Channel 14, call signal "Odessa Port Control", at least 2 hours prior to the ship's approaching the port gateway. Tugs are compulsory for vessels over 100 m. LOA.

BERTHING: 38 berths available with depths alongside from 8 m. up to 12.0 m.

STEVEDORES: Portal electric cranes of up to 45 tons capacity are operated on the quays by the warehouses. There are grain-loaders and floating cranes with lifting capacity of up to 100 tons, other cargo handling equipment and intraport transport.

Opening and closing of mechanised hatches is always done by the ship's crew.

Opening of hatches on arrival and closing of non-mechanical hatches after loading of cargo has been completed, is done by ship's crew.

Opening and closing of non-mechanised hatches in the course of loading or unloading is done by port workers.

MEDICAL: Advance notice for medical attendance required. Notice should be given to Inflot. Hospital facilities available in case of emergency.

TANKERS: No reducing pieces necessary. Oil slop facilities available. The Oil Harbour is situated in the Northern part of the port (the inner roads), Northward of Rabochaya Harbour which is formed by a "T"-shaped mole extending E.S.E. off-shore.

DENSITY: Average density 1012 varying with season.

FRESH WATER: Fresh water may be supplied ex-shore or ex-water barge. Minimum quantity ex-barge 15 tons.

FUEL: Bunkers can be supplied by barge, and to be ordered 72 hours before arrival.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: See "Stevedores".

CUSTOMS ALLOWANCES: Tobacco. No limits on board vessel, but when going ashore not more than 1 or 2 packs. Wine and/or spirits not to be taken ashore.

CARGO GEAR: All cargo gear must have certificates for maximum weight capacity.

IDENTIFICATION CARDS: Necessary.

CONSULS:

Bulgarian Consulate General	Tel: 66-60-92.
Indian Consulate General	Tel: 22-43-33.
Cuban Consulate General	Tel: 25-14-69.

REPAIRS: All types of deck and engine repairs can be carried out.

DRY DOCKS: Available.

REPATRIATION: Can be arranged through "Intourist".

AIRPORT: Distance to airport 10 miles. Direct airlines with several socialist countries and with the rest of the world through Moscow. Aircraft fly to Moscow 4 times a day.

TIME: GMT plus 3 hours. GMT plus 4 hour in Summer.

HOLIDAYS: Work can be arranged on below mentioned holidays through Sovfracht, Moscow, at special rates. Holidays: 1st January, 8th March, 1st and 2nd May, 9th May, 7th October, 7th and 8th November.

POLICE/AMBULANCE/FIRE: Police (Militia), 02 from town; 902 from port. Ambulance: 03 from town, 903 from port. Fire: 01 from town, 901 from port.

TELEPHONES: Telephones may be installed on board.

SERVICES: Tank-cleaning equipment available.

SHORE LEAVE: Crew members allowed to stay ashore till midnight. Master without limitation.

DELAYS: Vessels berthed in turn.

AUTHORITY: The Port of Odessa Authority, 1 Vakulenchuk Square, Odessa, U.S.S.R. *Tel:* 29-36-61. *Telex:* 232188. *Cables:* Morport Odessa.

AGENT: Odessa Inflot Shipping Agency, Postal address: 1 Vakulenchica Pl., Morskoy Port, Odessa, 270004 U.S.S.R. Cables: "Inflot Odessa". Tel: 22-39-02, 29-37-81, 29-49-03. Telex: 232824.

ONEGA: 63.54 N. 38.06 E. (See Plan)

GENERAL: The port of Onega is situated on the right bank of the Onega River (3 – 4 miles up from the mouth), flowing into Onezhsky Bay off the White Sea.

Port open for navigation for about 6 – 7 months per year, starting from May. The port is closed for foreign flag vessels from 1st of September to 31st of December annually. In Autumn, when the river is covered with ice, assistance of ice-breaker is required but may not be rendered regularly.

Opening and closing of the port for navigation as well as turn and order of entering the port is usually regulated by the Port Authorities.

Changes of water level in the river depend on tide, spring floods and effects of the wind.

The tide is semi-diurnal with two high and two low waters a day. At the Onega river mouth the range of the tide at mean springs may reach 2.7 m.

The rises of the water level are due to North-Westerly, Northern and North-Easterly winds. The falls of the water level are usually caused by South-Easterly, Southerly and South-Westerly winds.

The Onega River becomes frozen over at the beginning of November. Ice begins to form in October and usually breaks up at the end of April or early May.

A vast area of shoal waters is situated at the mouth of the Onega River.

Access into the Onega River is by the Karelsky Fairway. Vessels drawing up to 6.1 m. may pass through it at high water.

Since depths in the river vary, Masters are recommended to get in touch with the Harbour Master to make enquiries about the existing least depth in the fairway before entering the river.

The port specialises in timber exports.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. A Pilot should be ordered by the Master 24 hours prior to arrival at the Letny Orlov Pilot Station. A Pilot meets a vessel at a distance of 0.7 mile Westward of the Letny Orlov Point.

ANCHORAGES: Vessels drawing up to 2.4 m. can obtain anchorage in the Town Roadstead below the Severoles Wharf. The roadstead situated opposite Timber Mill No. 32 – 33 can be used as anchorage by vessels drawing up to 3.55 m.

During winds blowing from the N.W. vessels are recommended to anchor in the Petchak area of the Solovetskie Islands, with depths of 10 m. at 1 mile distance offshore.

During Southerly winds of Force 5-6, a safe anchorage with depths of 10 m. can be obtained in the Konyukhov Inlet, 1 mile offshore.

In case of North-Westerly storms, vessels lying on the Karelsky Roads should anchor in the Purnema area with depths from 6 m. to 10 m. where an anchorage light buoy is installed (Lat. 64° 20′ N., Long. 37° 27′ E.).

The recommended anchorages for vessels proceeding to the port of Onega along the fairway are situated in the following places:

1. On the line of the Town of Onega leading marks and on the beam line of the front mark of Pikhnemsky No. 2 leading line. Depths are from 3.7 m. – 4 m., the bottom – mud and small stone.
2. In the area of the Onega River, a short distance Northward of the town of Onega leading marks, opposite the Export quay. The least depth in the area is 4 m., its length – 700 m., the bottom is mud and small stone.
3. Southward of the Pristansky (Quays) leading line but not passing over the line of the Pristansky Sekushchy (Quays Crossing) leading marks to the Eastward of it. The depths are from 3 m. – 3.7 m., the holding ground – mud, small stone and stone.

RESTRICTIONS: Vessels having draft not more than 3 m. may enter port at any time, but with draft more than 3 m. only 1 hour before high water.

The speed of vessels having the maximum draft should not exceed 8 knots. The movement of vessels within the port area is not allowed during restricted visibility.

MAX. SIZE: The maximum permitted draft is usually announced at the beginning of the navigation season after sounding of the fairway has been accomplished. It varies from 5.1 m. – 6.4 m. Maximum permitted length is 124 m.

HEALTH: Alongside or on the Roads all vessels coming from abroad inspected by Sanitary Office representative. If no diseases, vessel obtains Free Pratique. If vessel enters directly after calling at another Russian port, Pratique automatic.

RADIO/VHF: Besides Murmansk and Archangel, Onega Radio (UZS), 500 kHz; VHF of pilot office at port of Onega (Channel 16).

Vessels can establish radio contact through the port radio station Onega Radio operating 24 hours a day on the following frequencies:

Call Sign	*Frequencies (kHz)* *Working*	 *Calling*	*Type of trans-mission*	*Time of work*	*Remarks*
UZS	500/441	500/425	A1A	H24	
"Onega-2" (Port controller)	156.8*(16)	156.8*(16)	F3E	H24	Operates during navigation
"Onega-5" (Harbour Master)	156.45*(9) 156.8*(16)	156.45*(9) 156.8*(16)	F3E F3E	H24 H24	Operates during navigation

*Frequencies are given in MHz.

The Onega Storm Signals Station is located on the roof of the Harbour Master's office. Day signals warning about forthcoming storms and strong winds in the Onega Bay area are exhibited at mast of the signal station.

TUGS: The number of tugs required for mooring/unmooring and shifting berths is determined by the Master after having consulted the Pilot. Tugs should be ordered 6 hours prior to leaving the port for sea.

BERTHING: Depths at the port berths are up to 6.5 m. There are enclosed warehouses and open concrete floor sheds. Loading of timber usually by ship's gear.

STEVEDORES: No particular ETA advices to stevedores/shippers. Loading of timber usually carried out by ship's winches at average rate of 24 stds. per hatch per working day.

MEDICAL: Doctor and hospital facilities available.

FRESH WATER: Available. Usually delivered by tug.

FUEL: Availability not guaranteed.

GANGWAY/DECK WATCHMEN: Usually by ship's crew.

OPENING/CLOSING HATCHES: In accordance with "Soviet Wood" charter-party conditions.

CUSTOMS ALLOWANCES: No restriction on quantity, but nothing to be taken ashore.

IDENTIFICATION CARDS: Only Seamen's Books required.

REPAIRS: Small repairs only.

REPATRIATION: Subject to visa formalities.

AIRPORT: Nearest at Archangel.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

HOLIDAYS: See "Archangel".

SHORE LEAVE: Allowed up to midnight.

AUTHORITY: The Port of Onega Authority, 198 Oktyabrsky Prospekt, 164880 – The Port of Onega, Archangel Region, U.S.S.R. *Tel:* 21-33 (Harbour Master); 24-91 (Port Controller); 21-51 (Chief of the Port). *Cables:* Morport Onega.

AGENT: A branch of the Port of Archangel, Main Maritime Agency "Inflot" at the port of Onega. Postal address: 164880 – The Port of Onega – Archangel Region, U.S.S.R. Cables: "Inflot Onega". Tel: Timber Mill Switchboard 33-33, "Inflot".

POTI: 42.09 N. 41.39 E. (See Plan)

GENERAL: The Port of Poti is situated 1.5 miles North of the Rioni River mouth and on the S.E. coast of the Black Sea.

Port open for navigation all the year round.

Changes of the water level in the port area are caused by the winds and usually reach 0.6 m.

The max. range of the water level observed in the river is 0.9 m.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Radio 96, 48 hours prior arrival to Port Controller and Inflot Agency advising ETA, description and quantity of cargo, location and weight of heavy lifts, if any, number of passengers, ship's length and draft, as well as any services required. Confirmation of ETA required 4 hours prior arrival. Inflot will arrange Pilot basis above information.

Pilot will board vessel in the outer roads at 5 cables length from the Poti Light Buoy. (Lat. 42° 09′ N., Long. 41° 38′ E.).

The Harbour Master will give the Master of a vessel appropriate instructions if the Pilot is not able to disembark in the outer roads due to stormy weather or heavy waves.

ANCHORAGES: In outer port which is protected by Novy Severny, Yuzhny, and Zapadny Moles, and by Zapadny Breakwater. Safe anchorage for deep drafted vessels, except in periods when "Tyagun", a strong variable current with surge, occurs, with winds from N.W., W., and S.W.

The roads are open to winds blowing from the sea. Therefore, in the event of stormy weather vessels are recommended to leave anchorage in the outer roads for sea.

Protected by the New Northern, Southern and Western moles the port ensures a good anchorage for deep-drafted vessels, except periods when N.W., West and S.W. winds form a strong, variable current with surge ("Tyagun"). Strong Westerly, S.W. and Easterly winds make the entry to the port more difficult.

A good anchorage with depths of 10 m. to 30 m. can be obtained at a distance of 1.3 miles N.W. and 1.1 mile West of the head of the Western mole, in Anchorages No. 421 and No. 422 respectively on BA. Chart No. 2263.

Vessels are prohibited from anchoring in the S.W. part of the Southern Harbour and in the centre of the Inner Basin.

RESTRICTIONS: Vessels are prohibited from entering the port when the entrance and the leading lights are covered with fog.

Vessel's speed shall not exceed 4 knots in the port areas marked by navigation marks.

There are no restrictions for night entry.

Least depth in approaches 7.0 m.

MAX. SIZE: The max. permitted draft for entry to the port is 9.4 m. and the length 190 m.

HEALTH: Free Pratique automatic for vessels from another U.S.S.R. port. Other vessels are boarded on arrival.

RADIO: Vessels can establish radio contact through the port radio station Poti Radio operating 24 hours on the following frequencies:

Call Sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
UFA	500/484	500/484	A1A	H24
"Poti-1" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24
	156.45*(9)	156.45*(9)	F3E	H24
"Poti-2"	156.8*(16)	156.8*(16)	F3E	H24
Port (Controller)	156.6*(12)	156.6*(12)	F3E	H24
(Vessels' movement control post)	156.675*(73)	156.675*(73)	F3E	H24

*Frequencies are given in MHz.

**CPR – Central Port Radio Station.

Traffic signals for vessels entering and leaving the port are exhibited at the signal mast located at the head of the Northern mole.

BERTHING: Berthing in the port can be effected with tug assistance only.

The berths of the port, with depth alongside up to 12.5 m., are equipped to handle general and bulk (ore, coal) cargoes, mineral oil products, metals, fruits, vegetables, etc., as well as passenger traffic.

Portal electric cranes of up to 16 tons capacity are operated on the quays. There are also floating cranes with lifting capacity of up to 100 tons.

MEDICAL: Qualified medical service is available free of charge, including dispensary and hospital treatment.

STEVEDORES: Arranged by Inflot.

DENSITY: About 1015, variable with season.

FRESH WATER: Fresh water supplied ex-shore to ship directly or ex-water barge in boundaries of port.

FUEL: Bunkers in small quantities are available. Fuel in quantities over 500 tons will be supplied if an order is placed not less than 5 days prior to a vessel's bunkering. Bunkers are delivered by barges.

CUSTOMS ALLOWANCES: No restriction on quantities but nothing to be taken ashore.

CONSULS: See "Odessa".

REPAIRS: Only minor repairs can be effected. There are no dry docks in the port.

AIRPORT: Nearest at Sukhumi/Batumi.

TIME: GMT plus 4 hours. GMT plus 5 hours in Summer.

HOLIDAYS: 1st January (New Year's Day); 8th March (International Women's Day); 1st, 2nd May (Workers' International Solidarity Day); 9th May (Victory Day); 7th, 8th November (Anniversary of October Revolution); 5th December (U.S.S.R. Constitution Day).

POLICE/FIRE/AMBULANCE: Police service, Tel: 02; Ambulance, Tel: 03; Fire Service, Tel: 01.

SHORE LEAVE: Crew members allowed ashore up to midnight.

AUTHORITY: The Commercial Port of Poti, 52 Lenin Street, 384691 – Port of Poti, U.S.S.R. *Cables:* Morflot Poti. *Tel:* 57201, 57204, 57205.

AGENT: Maritime Agency "Inflot". 50 Lenin Street. 384691 – Port of Poti, U.S.S.R. Cables: Inflot Poti. Tel: 57227, 51427. Telex: 212175 Inf Su.

PYARNU: 58.23 N. 24.29 E. (See Plan)

GENERAL: The Port of Pyarnu, a sea fishing port, is situated in the N.E. part of the Riga Bay, at the estuary of the Pyarnu River falling into the Pyarnu Lakht.

Vessels, with a draft of 4.0 m. can reach the port by the channel about 2.5 mile long and about 60 m. wide.

At the estuary of the Pyarnu River the channel is protected by two moles extending S.W. from the shore. Depths at the berths are up to 5 m. Changes of the water level within the port aquatorium are due to tides caused by winds.

Vessels proceeding to the port by the channel are recommended to have sufficient keel clearance bearing in mind requirements of good sea practice. The pilotage is carried out with due regard to the existing water level compared usually with the mean water level at the Kronstadt tide-gauge. Data of the exact depth of the channel can be obtained from the Harbour Master's Office. The harbour of the port is usually frozen over from November till April.

PILOTAGE: Compulsory. The Port of Pyarnu has no special Pilot service. In view of this, Pilots for entry or leaving should be ordered through maritime Agency "Inflot" at the Port of Tallinn. Pilots embark at the port of Pyarnu roadstead.

ANCHORAGES: The Port of Pyarnu roadstead occupies the whole of the middle part of the head of the Pyarnu Lakht limited by the 5 m. line.

When in the roadstead vessels may anchor on both sides of the Pyarnu-Morskoi leading line, beyond the boundaries of the fishing areas. The holding ground is good. The roadstead is sheltered from winds of all directions, except those blowing from the South and S.W.

Masters should bear in mind that there are a lot of fish nets laid in the Pyarnu Lakht. The boundaries of the fish net prohibited areas for navigation of merchant vessels are marked on the charts.

RESTRICTIONS: All traffic of vessels both in the harbour and in the approaches to the port is controlled by the Harbour Master's Office, by a Master on duty.

Navigation in the approaching channel is allowed day and night, in turn, but only in one direction at one time.

It is prohibited for vessels to pass by each other and pass by vessels keeping the leading marks of the approaching channel in line as well as to cross the channel.

The priority to navigate in the channel is given to vessels leaving the harbour. In this case vessels proceeding to the port must give way to outgoing vessel not preventing her manoeuvring. The turn of movement in the channel is stipulated by the Port Controller but the traffic of vessels itself is controlled by the Harbour Master's Office.

Vessels navigating both in the channel and in the harbour must proceed at a moderate speed to avoid the possibility of causing waves.

If winds over Force 6 Beaufort Scale entry to the port, leaving the port and shifting berths is allowed by the Harbour Master or a person in charge only.

RADIO: Radio communication can be effected through the radio stations:

Call Sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work Remarks*
RKD/F	487	500	AZJ	H24
"Pyarnu-31"	156.8*(16)	156.8*(16)	F3E	H24
Harbour Master	156.55*(11)	156.55(11)	F3E	HX
"Pyarnu-33" Port Controller	156.50*(10)	156.50*(10)	F3E	HX (Operates during navigation)

*Frequencies in MHz

Notice of arrival: All vessels proceeding to the port from the seaward should advise their ETA to the Port Controller. Masters should also advise vessels' particulars and the purpose of visit.

VHF: Vessel in the Roads or within port area can contact Harbour Master's Office on Channel 16 by radio-telephone (call sign "Pyarnu-31") all round the clock; Port Dispatcher (call sign Pyarnu-33) on Channel 10 around the clock.

TUGS: Tugs should be ordered through the Port Controller's service. Towage of vessels within the port is prohibited if wind over Force 6.

RADAR: Radar station not available.

BERTHING: Vessels having draft over 4.0 m. cannot berth. During S.W'ly and Westerly winds Force 8 and over, when in the port, the Master or his Chief Officer must be on board and have sufficient number of the crew on board in order to secure the vessel safely.

Berths of the port are equipped to handle vessels loaded with fish and fish products, salt, timber, rod metal and some other cargoes. There is a portal crane with 5 tons capacity and a closed warehouse. The Port Authority plans to build a new warehouse and an administrative building.

FRESH WATER: Available alongside.

FUEL: Available alongside and by barge.

OPENING/CLOSING HATCHES: By crew.

REPAIRS: Small repairs possible.

TIME: GMT plus 3 hours from October 1st – March 31st. GMT plus 4 hours from April 1st – September 30th.
AUTHORITY: The Port of Pyarnu Authority, 2 Kalda Street, 203600 Port of Pyarna, U.S.S.R. *Tel:* 41-893, 40-164, 40-442. *Cables:* Pyarnu Morrybport. *Contact:* Harbour Master, Tel: 40-164.

AGENT: Tallinn "Inflot" Shipping Agency. Tel: 430508. Telex: 173273. Cables: Inflot Tallinn.

RENI: 45.26 N. 28.18 E. (See Plan)

GENERAL: The Port of Reni is situated at a distance 25 miles up from the Izmail Chatal Point on the left bank of the Danube River.

The port is, on average, open for navigation for about 317 days of the year. In severe winters ice-breaker assistance is required.

The Danube River and Kilia Mouth become completely frozen over only in severe winters, at the end of December or early January. Ice finally disappears in February or early March.

Changes of the water level are due to effects of the wind and Spring floods.

Maximum rises of the water level are usually observed in April, May and June, maximum falls August, September and October.

Maximum range of the water level observed in the river is 4 m. – 6 m.
DOCUMENTS: Refer to beginning of U.S.S.R. Section.
PILOTAGE: Compulsory. All vessels proceeding from the Izmail Chatal Point up to Reni and vice versa must navigate under control of a State Commissioned Pilot.
ANCHORAGES: Vessels should anchor in the port roads with depths from 10 m. to 20 m. The holding ground is clay and mud.
RESTRICTIONS: There are no time restrictions for the entry to the port. Both draft and length of vessels are limited by depths and width of the Sulina channel.
RADIO: Vessels can establish radio contact through the port radio station Reni Radio operating 24 hours per day on the following frequencies:

Port Division	*Frequency* MHz	*Call sign*
Port Controller	156.600 (Channel 12)	Reni-Radio-2
Port Control Inspection	156.600 (Channel 12)	Reni-Radio-5
"Inflot" Agency	156.450 (Channel 9)	Reni-Radio-8
Transport fleet shipchandlers	156.450 (Channel 9)	Reni-Radio-7
Relief crew	156.450 (Channel 9)	Reni-Radio-14
Harbour Fleet Controller	156.600 (Channel 12)	Reni-Radio-6
Harbour fleet oil berth	156.600 (Channel 12)	Reni-Radio-15

Operation Frequencies, Call Signs & Schedule:

Transmission frequency	*Reception frequency*	*Operation time (Moscow)*	*Call sign*
3225 kHz	4210 kHz	0800–0900	UJN-3
4260 kHz	4210 kHz	0900–1100	UJN-3
6421.5 kHz	6275.5 kHz	1100–2000	UJN-3
3225 kHz	4210 kHz	2000–2400	UJN-3
156.800 (Channel 16)	156.800 MHz (VHF Channel 16)	Round the clock	Reni-Radio-1
161.900 (Channel 26)	157.300 MHz (VHF Channel 26)	Round the clock	Reni-Radio-1
156,100 (Channel 2)	160.700 MHz (VHF Channel 2)	Round the clock	Reni-Radio-1

VHF radio conversations not relative to official business are prohibited.
TUGS: 34 tugs, up to 2,000 h.p. Tug assistance is not compulsory. Tugs are available if requested by Master. Tugs shall be ordered by VHF at least 1 hour before required.
BERTHING: The port is accessible to large vessels. The berths with depths alongside of up to 7.5 m. are equipped to handle general and bulk cargoes, crude oil and oil products, grain and food products.

The port comprises three cargo areas.

The first area has 9 berths including 2 facilities, which can accommodate large sea-going vessels under any Danube water stage. Export and import cargoes of various trades are handled there. One of the berths specialises in transhipment of imported grain and has the capability of operating in any weather.

The second area also comprises 9 berths to handle small and medium diameter pipes and tubes, steel exports and imports, equipment, 5-ton containers, export timber and transit cargoes.

The third area has 6 berths specialised in the handling of bulk cargoes, electrical equipment, agricultural machinery and vehicles.

In December 1984 the first phase of a new transhipment facility was completed. Four berths, storage facilities, railway sidings, communications, service space and other facilities were put to use. Quayage gained more than 500 m. The new capacity made it possible to handle 800,000 tons of cargo additionally.

Berths No. 1, 2 and 28 handle steel; Nos. 3 and 4 packages and pieces; Nos. 5 and 26 equipment; No. 6 heavy lifts; Nos. 7 and 8 canned goods and vegetables; Nos. 9 and 9a grain; Nos. 15, 16, 27 and 29 general cargo; Nos. 17 and 18 exports and imports; No. 31 vehicles; No. 34 coal and Nos. 35, 36 and 37 laminate and ores.

Cranes of up to 32 tons capacity are operated on the quays. Also there are floating cranes with lifting capacity of up to 100 tons, fork lift trucks up to 10 tons capacity and other cargo handling equipment.
FUEL: Available.
FRESH WATER: Can be supplied ex-shore and by barges.
REPAIRS: Only minor hull and engine repairs can be carried out. There are no dry docking facilities.
OPENING/CLOSING HATCHES: According to the custom of the port, opening and closing of hatches is carried out by the crew. But it can be carried out by the port workers for vessel's account, if required by the Master.
CONSULS: None.
TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.
BANKS: Bank for Foreign Trade of the U.S.S.R., Moscow, Telex: 411174.
STORING: See "Prelims".

1. Vessel can be stored by barge and truck.
2. Vessel can store from barges after loading/discharging or during operations if nothing interferes with cargo handling.
3. Trucks can proceed alongside at the berth.
4. Fork lift trucks can be used on the jetty to handle stores.
5. Vessel can be stored with various stores except prohibited items.
6. Local riggers can be employed to assist with storing.

SURVEYORS:
1. Cargo Inspector of the U.S.S.R. Chamber of Commerce and Industry available.
2. U.S.S.R. Register of Shipping. Surveyor available.

POLICE/AMBULANCE/FIRE: A Fire Guard of the port provides for the safety of ships and can be summoned, via the "Inflot" Agency, to render services in order to extinguish fire or to pump water from holds.

If a fire occurs in the port territory or on board it shall be reported to the Fire Squad by telephoning 2-01, or to the fire boat "Smeliy" dialling 2-02. The fire boat can also be summoned over VHF Channel 16.
NOTICES: Masters of vessels proceeding to the Port of Reni shall, in advance but latest 24 hours prior to arrival at the port, advise Port Control and "Inflot" Agency: time of arrival, description and quantity of cargo for the port, heavy lifts, if any, their stowage and weight, number of passengers, ship's draft and length, as well as services required of the port.

Abstracts from Compulsory Rules of the Commercial Sea Port of Reni:
Article 1: Two hours prior to arrival at the Commercial Sea Port of Reni, Master shall advise accurate time of arrival to Port Control Inspection.
Article 2: Ships may call at or leave the port, round the clock, after obtaining permission of the Port Control.
Article 3: Upon anchoring in the inner or outer roads, a radio watch shall be kept on VHF Channel 12.
Article 4: Berthed ships are provided with electric power, telephone and fresh water.
Article 5: Prior to commencement of loading, ship's cargo spaces shall be completely cleaned and provided with all the necessary equipment.
Article 6: Ships may discharge oil-contaminated water, garbage and food waste at the port. Master shall take every step to prevent a spill of oil products.
Article 7: Orders for any port services are placed by Masters of foreign vessels through the "Inflot" Agency.
DEVELOPMENTS: 2 new berths recently completed.

AUTHORITY: The Port of Reni Authority, 188 Dunai Street, The Port of Reni, Odesskaya Obl., 272840, U.S.S.R. *Tel:* 2-14-84, 2-10-57. *Telex:* 23874. *Cables:* Reni Port.

AGENT: The Port of Reni Maritime Agency "Inflot". Postal address: 192 Dunai Street, The Port of Reni, U.S.S.R. Cables: "Inflot Reni". Tel: 21835, 26593. Telex: 232713.

RIGA: 56.58 N. 24.06 E. (See Plan)

GENERAL: A Baltic seaport, Riga is situated at the mouth of the Daugava (Western Dvina) River falling into the Gulf of Riga.

The water area of the port is formed by the lower part of the Daugava River from the mouth up to a bridge, thence by the Milgravis Channel and Sarcandaugava Creek.

The roadstead of the port is situated at the mouth of the Daugava River.

The port is open for navigation all the year round, but ice-breaker assistance is required about 4 months of the year.

The Gulf of Riga is frozen over for quite a long time. On the coast of the Gulf, ice first appears in December and finally disappears in April. The middle part of the Gulf gets frozen over only in severe Winters and for a short period. Usually ice in this area is mostly drift ice.

Considerable changes of the water level may be caused by strong winds and variation in atmospheric pressure ("Seish" effects).

The range of the water level caused by winds depends on the force of the wind, direction and period of time it blows.

Most sharp rises and falls of the water level are observed at the mouth of the Daugava River. They may reach at times 1.3 m. – 1.8 m. higher and 0.9 m. – 1.1 m. lower than the datum at Kronshtadt.

The level of the water in the port usually depends on the ordinary water level in the Daugava River.

The max. rise of the water level caused by winds may reach 2 m. higher and fall 1 m. lower than the mean water level observed over a period of many years.

The entrance channel is available for ships with maximum draft 12.5 m. from Light Buoy "B" to the inner road situated 3 miles from the Daugava River.
DOCUMENTS: Refer to beginning of U.S.S.R. section.
PILOTAGE: Compulsory. Inflot will arrange Pilot on receipt of ETA at Receiving Buoy "B", which is to be given 96, 48, 24 and 4 hours prior arrival. Also advise with ETA details of cargo, last port of call, passengers if any, ship's draft and length.

Pilot meets vessel at Receiving Light Buoy "B" (Lat. 57° 06′ N., Long. 23° 57′ E.). In case of bad weather, when Pilot is unable to come aboard, vessel should follow in the wake of a pilot boat, up to the mouth of the river, where Pilot will board vessel.

4 hours prior to arrival at this buoy the Master should advise his ETA by VHF, Channel 14, via CPR.

Vessels leaving the port should navigate under Pilot control to Receiving Buoy "B".

Ships going to the port of Riga may receive a Pilot for the passage of the Irben Strait at the roads of the port of Ventspils. ETA to Inflot-Riga 2 days prior to arrival at Ventspils Roads.

The order for the Pilot from Riga to Ventspils Roads must be given to Inflot-Riga 1 day prior to sailing.

Pilotage in the Irben Strait is not compulsory but it is recommended for ships with a large draft.

The Pilot assistance will be particularly useful during Winter, when navigation is effected as a rule, with an icebreaker in the convoy.

ANCHORAGE: The position in which to anchor will be advised by the Duty Officer at the Port Radar Service. The best anchorage can be obtained in the Port of Riga Roads, at a distance 7.3 miles off the Daugavgriva Lighthouse, bearing 312° (N.W.) of Light Buoy "B". Depths in the anchorage are from 32 m. to 35 m. The bottom is mud and sand. It is not recommended to come closer to the shore without a Pilot on board.

The Port of Riga Roads are situated N.W. of the entrance to the mouth of the Daugava River.

The Roads are open to winds blowing between S.W. and N.E.; therefore, in Autumn, when these winds prevail, anchorage there is unsafe.

In periods when heavy waves in the roads are caused by fresh Northerly winds, vessels are recommended to leave the roads for shelter in the port or go to the open part of the Gulf of Riga.

RESTRICTIONS: Permitted draft for the entry into port is 10.06 m. at the mean water level.

Entry to the Daugava River and the Port of Riga is accessible for vessels having drafts ensuring safe passage across the river bar.

As a rule, vessels passing along the channel are requested to have keel clearance not less than 0.45 m.

The speed of vessels navigating in the Daugava River should not exceed 6 knots.

There are no restrictions as to length of vessel and time of entry to the port.

Large vessels laid up with ballast water are not allowed to shift berth during winds Force 6 Beaufort Scale and over.

Passage of the Daugava River is prohibited for ships having anchors under water.

The speed of the Daugava water stream in a low-flow period is insignificant, but it may sharply rise at the time of discharge of water through the overflow weir of the Riga hydro-electric power station. The operational schedule of the station requires such discharges.

To avoid damages to the underwater parts of a berth while mooring or unmooring, every vessel must have the main engines going "dead slow" until her stern is not less than 15 m. from the quay.

MAX. SIZE: Max. permitted draft for vessels going to berths of the port for discharging is 10.06 m. in fresh water, if the water level is "O" datum at Kronstadt.

Vessels having draft more than 10.06 m. are discharged into barges in two inner roads which have 3 mooring buoys, each 3 miles from the mouth of the river. Max. permitted draft for vessels going to the inner road for lighterage is 12.5 m. in fresh water, if the water level is "O" datum at Kronstadt.

HEALTH: Pratique obtainable after vessel's mooring when Health Officials visit vessel with Immigration and Customs Officers. Health Inspector to be informed of any medical assistance required.

RADIO: *Notice of Arrival:* In Winter when the Irben Strait and the Gulf of Riga are completely frozen over and ice-breaker assistance is required, vessels proceeding to the port of Riga should advise Harbour Master their ETA to the edge of the ice, vessel's ice classification and estimation in days for the expenditure of fresh water and fuel available on board at the moment of approaching the edge of the ice.

Navigation of vessels to be arranged in accordance with "Regulations of Navigation in the operating area of Riga Port Vessels' Movement Control Service" published in Notices to Mariners.

Regulations of vessels' movements is carried out with assistance of Control Radar Service Post.

Port Dues in the area of vessels Movement Control Service are collected as per "Statute of Dues and Charges to the vessels served in the Sea Ports of USSR".

Vessels can establish ship-shore radio contact via the port radio station Riga Radio, operating 24 hours a day on the following frequencies:

	Frequencies (kHz)		*Type of*	
Call Sign	*Working*	*Calling*	*trans-mission*	*Time of work*
UKB	500	500	A1A	H24
"Riga-Radio"	2605	2182	H3E	H24
"Riga-Radio-1" (CPR)	156.45*(9)	156.8*(16)	F3E	H24
"Riga-Radio-5" (Harbour Master)	156.45*(9)	156.8*(16)	F3E	H24
"Riga-Radio-9" (Vessels' movement control post)	156.45*(9)	156.45*(9)	F3E	H24

*Frequencies are given in MHz.

Riga Control Radar Post (call signal: Riga Radio 9) regulates vessels' movement on VHF Channel 9 of Port Radio Station, and pilotage of vessels with assistance of Radar System is performed on VHF Channel 20. During navigation in the port area, vessel's VHF radio to be switched to VHF Channel 9.

TUGS: Use of tugs is obligatory. The number of tugs depends on length of the vessel and place of berthing.

BERTHING: Berths of the port with depths up to 10.0 m. alongside are equipped to handle general, containers and bulk (ore, coal) cargoes, metals, timber, grain, food products and passenger traffic.

Number of tugs to be ordered for entry assistance or for shifting berth is decided by Master in accordance with Pilot's recommendation.

Cranes of up to 40 tons capacity are operated on the quays and by the warehouses. Also, there are floating cranes with lifting capacity of up to 100 tons, other cargo handling equipment and intra-port transport.

SPECIALISED CARGO HANDLING FACILITIES: Berth Nos. 16 – 19 are suitable for handling of ships type Ro-12. Berth Nos. 32 – 33 are suitable for handling of ships type Ro-12, Ro-30 and Ro-60.

BRIDGES: Minimum height of electro-transmission line crossing the Daugava River is 61 m.

MEDICAL: All medical assistance available.

STEVEDORES: Master's and/or Shipowner's information of cargo details, stowage, etc. is required in advance. Information should be addressed to Inflot Agency.

DENSITY: About 1002.

FRESH WATER: Available. Delivered from shore or by barge to Inner Roads.

FUEL: Bunkers may be delivered to the Roads or supplied at berth by barges during loading/discharging of non-inflammable cargoes.

GANGWAY/DECK WATCHMEN: Recommended. These duties normally performed by crew.

OPENING/CLOSING HATCHES: Opening and closing of hatches is usually done in accordance with conditions of Charter Party.

CUSTOMS ALLOWANCES: No restriction on quantities, but nothing may be taken ashore.

IDENTIFICATION CARDS: Seaman's Book required.

CONSULS: None.

REPAIRS: Repairs possible for hull, machinery, radio and navigational equipment. Floating crane available, capacity 100 tons. All kinds of repairs for vessels up to 30,000 d.w.t. can be carried out.

REPATRIATION: Crew changes and repatriation possible.

AIRPORT: International airport not available. Internal communications between Riga and most cities of the USSR is possible.

TIME: GMT plus 3 hours. Summertime (GMT plus 4 hours.) from 1st April till 30th September.

HOLIDAYS: 1st January, 8th March, 1st and 2nd May, 9th May, 7th October, 7th and 8th November.

POLICE/FIRE/AMBULANCE: Advise Inflot.

TELEPHONES: Installation and use charged according to existing tariffs.

SHORE LEAVE: Crew allowed ashore.

AUTHORITY: The Port of Riga Authority, 6 Vilis Latsis Street, 226180-Riga, U.S.S.R. *Tel:* 32-93-54, 32-92-54, 32-92-35. *Telex:* 161117 Buhta. *Cables:* Morport Riga. *Contact:* Y. Silayev, Harbour Master.

AGENT: The Port of Riga Main Maritime Agency "Inflot". Postal address: 6 Vilis Latsis Street, 226180-Riga, U.S.S.R. Cables: "Inflot Riga". Tel: 32-00-28, 32-97-03. Telex: 161118, 161119.

SOCHI: 43.34 N. 39.43 E. (See Plan)

GENERAL: The Port of Sochi is an ice-free port, situated at the mouth of the Sochi River, S.E. of the Uch-Dere Point, in the Eastern part of the Black Sea.

The port is protected by the Caucasian chain of mountains from cold N.E. winds but it is open to winds blowing from Southerly and Westerly directions when heavy waves may roll over the port moles causing heavy swell in the harbour.

The port mostly handles passenger traffic.

There are passenger terminals, one of which serves hydrofoil ships only. About 3 million passengers visit the port yearly.

A cargo pier is equipped to handle fruit, building materials and cars. There are enclosed warehouses on the cargo pier and on one of the passenger terminals.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilot boat usually meets vessel at a distance of about 1 mile from the port. In the event of bad weather or restricted visibility, vessel should anchor or drift at a safe distance from the port until Pilot arrives.

ANCHORAGE: Deep drafted vessels may obtain anchorage in the Outer Roads Westward of the Northern mole. The depths in the roads are from 11 m. to 12 m.

Some distance Westward, in depths 20 m. – 23 m., there are mooring buoys which can be used during vessels' stay in the roads.

Anchorage can also be obtained at 1.3 – 1.5 miles distance S.S.W. of the Sochi Lighthouse. Depths there are about 29 m. The bottom is mud with sand, and small stone closer to the shore.

Anchorages are open to winds blowing from the sea.

RESTRICTIONS: There are no time restrictions for entry to the port.

In case of stormy weather entry to the port is difficult due to the swell caused by heavy waves in the approach and in the narrow entrance to the port.

In the event of heavy surf vessels must anchor in the outer roads since entry to the port is impossible.

Entry to the port is not allowed during heavy waves over Force 4 and winds over Force 6 as well as during bad visibility.

During the Autumn-Winter period the Port of Sochi cannot be used as shelter port, because lying in the port is dangerous due to the strong variable current ("Tyagun") usually caused by gales blowing between S.E. and N.W.

Under these circumstances the Port Authorities cannot guarantee safety to a vessel which, after having received a storm warning, did not make for sea, and bear no responsibility for the consequences.

MAX. SIZE: The max. permitted draft is 8 m., length 190 m. and beam 25 m.

RADIO: Vessels can establish ship-shore radio contact through the port radio station Sochi Radio, operating 24 hours a day on the following frequencies:

Call Sign	*Frequencies (kHz)* *Working*	 *Calling*	*Type of trans-mission*	*Time of work*
UZB	500	500	A1A	H24
"Sochi-Radio"	2310	2310	H3E	H24
"Smena" (Port Controller)	156.6*(12)	156.6*(12)	F3E	H24
"Sluzhba" (Harbour Master)	*156.8*(16)	156.8*(16)	F3E	H24
	156.675*(73)	156.675*(73)	F3E	H24

*Frequencies are given in MHz.

A signal station is located at the Sochi Lighthouse from which visual signals are shown.

BERTHING: A vessel intending to enter port with tug assistance should keep the Sochi mid-channel leading marks in line ahead and stop the main engines in due time to allow vessel to come to the state of "no motion" at a distance of 1 mile from the port entrance. Only under these conditions is a tug allowed to approach a vessel and receive or cast off the tow rope.

Due to a small port area and heavy water streams caused by vessels' propellers Masters of vessels of 2,000 g.r.t. and over must order 1 tug for entering and leaving the port; for vessels of 4,000 g.r.t. and over 2 tugs are required. Shifting berth is allowed during winds not exceeding force 5 Beaufort scale. Opening and closing of hatches on dry cargo vessels is carried out by the crew; on passenger vessels cargo hatches are opened and closed by the port workers.

There are 2 portal cranes of up to 20 tons lifting capacity, 10 ton caterpillar cranes, fork-lifts and other cargo handling equipment.

FUEL: Not available.

FRESH WATER: Can be supplied by pipe-lines at nearly all berths.

REPAIRS: Not available.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

AUTHORITY: The Port of Sochi Authority, 1 Voykov Street, 354000 Port of Sochi, U.S.S.R. *Tel:* 996-63-64, 996-63-63, 996-62-32. *Telex:* 128. *Cables:* Morport Sochi.

AGENT: A branch of the port of Novorossiysk Main Maritime Agency "Inflot" at the Port of Sochi. Postal address: 1 Voykov Street, Sochi 354000, U.S.S.R. Cables "Inflot Sochi". Tel: 99-05-86, 996-62-70.

All foreign vessels calling at Sochi are attended by Maritime Agency of Tuapse.

SUKHUMI: 42.57 N. 41.00 E. (See Plan)

GENERAL: A Black Sea passenger port, Sukhumi is situated at the head of the Sukhumi Bay, 2 miles E.N.E of the Sukhumi Point. The port is open for navigation all the year round. Both the port itself and the Gulf are open to winds blowing from the sea.

Several berths of the port are equipped to handle passenger traffic.

The port area is bounded by the shore line and the imaginary line connecting the Sakhumi Point and the mouth of the Kelasuri River.

The port is visited by regular and cruise passenger vessels.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: A Pilot meets vessel in the outer roads. Compulsory for foreign flag vessels.

ANCHORAGES: Anchorages are situated in the outer roads on the Northern coast of the Sukhumi Bay, opposite the mouth of the Beslet River. Depths are from 12 m. to 50 m. The bottom is mud.

RESTRICTIONS: Vessels may enter or leave the port at any time of day or night.

MAX. SIZE: The max. permitted draft is 7.6 m., length 190 m.

RADIO: Ship-shore radio contact can be established via the port radio station Sukhumi Radio operating 24 hours a day on the following frequencies:

Call Sign	*Frequencies (kHz)* *Working*	 *Calling*	*Type of trans-mission*	*Time of work*
UFF	500/450	500/454	A1A	H24
"Sukhumi Radio"	2182	2182	H3E	H24
"Sukhumi-1"	156.8*(16)	156.8*(16)	F3E	H24
(Port Controller)	156.45*(9)	156.45*.(9)	F3E	H24

*Frequencies are given in MHz.

Storm signals are exhibited at a signal mast located on the roof of the Port Authority's office.

BERTHING: Vessels of up to 190.0 m. in length are allowed to moor at the new passenger pier. The permitted draft is restricted by the depth of water (7.8 m.). Vessels are not allowed to moor to berths during dense fog and in restricted visibility when navigational lights and the current indicator on the passenger berth are not visible. In this event vessel should anchor and disembark passengers in the outer roads.

When mooring, Master should bear in mind the direction of the current and the effect on the mooring angle of vessel.

By day, the direction of the current indicated by a sparbuoy located at the head of the passenger pier, and at night, by lights exhibited from the elevation of the front leading light.

A green light shown lower than the front leading light indicates Easterly current, and a red light, current of Westerly direction.

The rate of the current is usually determined by the Master himself.

Due to the constant influence of the current, mooring is usually effected without tug assistance.

Masters of vessels moored at the port berths should keep the main engines ready bearing in mind the fact that the outer roads of the port are not protected from the effect of winds.

There are no portal cranes on the passenger pier. Handling of cargo is done by 5 ton port cranes and caterpillar crane with lifting capacity of 12 tons.

FUEL: Can be supplied by lighters.

FRESH WATER: Supplied ex-shore.

REPAIRS: Not possible.

TIME: GMT plus 4 hours. GMT plus 5 hours in Summer.

AUTHORITY: The Port of Sukhumi Authority, 66 Rustaveli Street, 384900 Port of Sukhumi, U.S.S.R. *Tel:* 2-82-02, 2-34-03, 2-34-00. *Cables:* Morport Sukhumi.

AGENT: A branch of the Port of Batumi Main Maritime Agency "Inflot" at the Port of Sukhumi. Cables: "Inflot Sukhumi".

TALLINN: 59.27 N. 24.46 E. (See Plan)

GENERAL: A Baltic seaport situated in Tallinn Bay. Year-round navigation is possible. Tallinn Bay is usually frozen over in severe Winters only. In the Winter months (1st February – 31st March) the port of Tallinn is kept open for navigation by ice-breakers. The tidal range in Tallinn Bay is of very small account. The difference of the water level in the Bay is due solely to the effects of the wind. A rise of the water about ±0.8 m. from mean water level is observed during N.W. and Westerly winds. The fall of the water is caused by S.E. and Easterly winds. It usually reaches below the mean water level.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. 24 hour Pilot service is available. Pilots board vessels at Lat. 59° 37′ 05″ N., Long. 24° 38′ E. In case of stormy weather vessels should follow pilot boat to a sheltered position where Pilot is able to embark/disembark or use the assistance of the shore radar station. Pilot should be ordered by VHF through the "Inflot" Agency not later than 2 hours prior to arrival at the Pilots' boarding place.

ANCHORAGES: The anchorage area is situated in the port of Tallinn outer roads Westward of the Tallinn lights leading line, at the Palyasaar Peninsula. Depths in the area are from 14 m. up to 22 m.

RESTRICTIONS: Vessels can enter or leave the harbour through the Northern or Southern entrances. Entry to the port through the Northern entrance can be used by vessels having draft of up to 8.5 m. The Southern entrance can be used by vessels having draft of up to 7.0 m. Depths of water in the Southern entrance area can vary due to the movement of deposits. Vessels can enter or leave the port at any time of day and night.

MAX. SIZE: LOA 155 m., width 22.0 m. and draft 8.5 m.

HEALTH: International quarantine signals to be used on arrival. No later than 6 hours before arrival at the inner area Master should radio Agents giving full details of state of health on board, and requesting Pratique which will be given on arrival.

RADIO: All vessels when approaching the Port of Tallinn should establish radio contact via Tallinn Radio port radio station which operates 24 hours a day on the following frequencies:

Call Sign	*Frequencies (kHz)* *Working*	 *Calling*	*Type of trans-mission*	*Time of work*
UNS	500	500	A1A	H24
"Tallinn-Radio"	2182	2182	H3E	H24
"Tallinn-Radio-1" (CPR)	156.8*(16)	156.8*(16)	F3E	H24
"Tallinn-Radio-5" (Harbour Master)	156.45*(9)	156.45*(9)	F3E	H24
"Tallinn-Radio-17" (Vessels' movement control post)	156.7*(14)	156.7*(14)	F3E	H24

*Frequencies are given in MHz.

The movement of vessels within the port and in the outer roads is controlled by the Traffic Control Post located at the Port of Tallinn Authority building.

TUGS: Tug's assistance available for berthing subject to Pilots advice. Tugs can be ordered through Agents. Ship's lines normally used. When tugs are ordered in advance the cost will be charged to the vessel whether tugs are used or not. For vessels with length over 120 m. or over 3,000 g.r.t. tug assistance is obligatory.

BERTHING: Vessel will not be allowed to berth unless main engines and steering mechanism are in good working order. All vessels in port are required to fly their national flags between 0800 hrs. and sunset. On holidays and special occasions vessels may be expected to dress their ships if requested by Port Authorities.

The berths of the port with depths alongside up to 9.0 m. are equipped to handle general, 40 ft. containers, bulk and liquid (chemical products) cargoes, sugar, cement, metals, foodstuff, etc., as well as passenger traffic. Covered warehouses with mechanical equipment and concrete floor sheds are available.

STEVEDORES: Arranged by Agent on basis of Master's ETA. Loading and unloading is carried on throughout 24 hours a day including holidays.

CRANES: Loading and unloading is usually done by shore portal cranes of up to 40 tons capacity, by floating cranes of up to 100 tons capacity and by other cargo handling equipment.

FRESH WATER: Supplied by pipe-lines at all berths.

FUEL: Bunkers are available and can be taken from the quays or delivered by lighters.

GANGWAY/DECK WATCHMEN: Compulsory to maintain a gangway watch by ship's crew.

OPENING/CLOSING HATCHES: Normally opened and closed by ship's crew.

CUSTOMS ALLOWANCES: No restrictions on crew's consumption of tobacco and alcohol on board. It is forbidden to take these items ashore.

CONSULS: No local representation.

REPAIRS: Only minor repairs may be effected at machine shop ashore.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

HOLIDAYS: All holidays are worked by stevedores.
TELEPHONES: Connection on board vessels can be made at berths number 5, 12 and 17.
DEVELOPMENTS: New Port of Novotallinsk under construction in the Bay of Muuga, 20 km. N.E. of Tallinn, for handling grain cargoes in vessels of 100,000 d.w.t. The Port will also handle perishable cargo and Ro-Ro vessels. Grain silo capacity 300,000 tons.
AUTHORITY: The Port of Tallinn Authority, 25 Sadama Street, 200102 – Tallinn, U.S.S.R. *Tel:* 42-58-30, 42-59-80. *Telex:* 173-106. *Cables:* Morport Tallinn.

AGENT: The Port of Tallinn Shipping Agency "Inflot". 54-a Tuukri Street, 200106 – Tallinn, U.S.S.R. Cables: "Inflot", Tallinn. Tel: 430508, 430518, 432720, 428339. Telex: 173273.

TUAPSE: 44.06 N. 39.04 E. (See Plan)

The port of Tuapse is situated between the mouths of rivers Tuapse and Pauk and the depths of 40 m. Year round navigation.
DOCUMENTS: Refer to beginning of U.S.S.R. section.
PILOTAGE: Compulsory in and out, possible at any time. Vessels await Pilot at anchorage. Pilots board and leave vessels in the Outer Roads behind the Pervomaisky Breakwater if the sea (swell) up to Force 4. When leaving harbour during bad weather Pilot leaves vessels in the Inner Roads. Communication with Pilots on VHF channel 12.
ANCHORAGES: Depths 13 m. – 22 m. Position of anchorage, bearing to the entrance red light and distance is radioed by Harbour Master through Agent to each vessel prior to arrival (unless berth available). When at anchor, vessel shall keep VHF watch on VHF Channel 16.
MAX. SIZE: See "Berthing".
HEALTH: Sanitary Officer boards on arrival or when berthed. No automatic Free Pratique. In the event of fever or any suspected epidemic disease onboard Masters shall inform the sanitary service immediately on arrival.
RADIO: Radio communication can be effected through the port radio station "Tuapse-Radio".

Call Sign	*Frequencies (kHz)*		*Type of transmission*	*Time of work*
	Working	*Calling*		
UVW	500/430	500/425	A1A	H24
"Tuapse-1" (VHF CPR)**	156.05*(1)	160.65*(1)	F3E	H24
Vessels' movement	156.8*(16)	156.8*(16)	F3E	H24
control post	156.45*(9)	160.45*(9)	F3E	H24

*Frequencies in MHz.
**Central Port Radio Station.

Arrival Advice: Masters shall send 96/72/48 and 24 hours' ETA notices to "Inflot" Agency, advising also quantity of ballast onboard and time required for deballasting ashore. Masters shall also advise quantity and grade of cargo, stowage plan, LOA and maximum draft, number of passengers, health condition of crew.
TUGS: Tugs are compulsory for berthing/unberthing or shifting, as well as when lying at inner anchorage. Tugs normally join vessels at the buoy marking the Pervomaisky breakwater. Ship's lines to be used.
BERTHING: At any time with winds up to Force 7. The port consists of 2 harbours, with 3 berths for dry-cargo ships (max. draft 12 m. (brackish water), LOA up to 220 m.) and 6 berths in the oil harbour for tankers (max. draft 12 m. (brackish water) LOA up to 235 m.). Oil harbour, shore cargo manifolds diameter 250/400 mm. All dry-cargo berths are equipped with portal cranes of 10-32 tons capacity. Loading/unloading usually by shore cranes. The port is not sheltered for vessels during strong S.E./S.W. winds. During strong gales from these directions lying in port is dangerous due to strong swell, especially the one called "tyagun". In this event vessels must leave harbour when recommended by the Port Authority. When lying in port the main engines shall not be immobilised without special permission by Harbour Master.
MEDICAL: First medical aid at any time; hospital facilities available.
DENSITY: 1011/1015.
FRESH WATER: Available from any berth, road delivery not possible.
FUEL: Fuel oil and gasoil available at oil berths or ex-lighters. Masters giving 72 hours' notice.
FIRE PRECAUTIONS: Conventional rules for oil ports.
POLLUTION: Marine pollution shall be avoided by all means, specially due to proximity of health resort area. Any pollution is subject to heavy fines.
OPENING/CLOSING HATCHES: Normally by crew.
GANGWAY/DECK WATCHMEN: Not required. Gangways shall be lighted up and protected by nets.
CUSTOMS ALLOWANCES: No restrictions. Export/import of Soviet currency is forbidden.
IDENTIFICATION CARDS: Seaman's Books are sufficient.
CONSULS: None.
REPAIRS: Emergency repairs. Floating docks subject to special arrangement.
REPATRIATION: Possible in emergency.
AIRPORT: Sochi – 120 km. Served by regular airlines.
TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.
HOLIDAYS: 1st January, 8th March, 1st, 2nd May, 9th May, 7th October, 7th and 8th November. Work during holidays can be arranged.
TELEPHONES: Available for all vessels.
SURVEYORS: Leading world classification societies are represented by the Register of the U.S.S.R..
GENERAL: Deballasting or discharge of tank-washings facilities (slops) at a rate of up to 2,000 t.p.h., craft for discharge of bilge water. Food waste and garbage, etc. shall be collected into special containers placed on board upon berthing. Laundry facilities. No boats, rafts, etc. shall be launched from vessels without special permission. All mooring ropes to be provided with rat-guards immediately upon mooring or shifting berths. Local representative of the Insurance Company of the U.S.S.R. (Ingosstrakh) Ltd., and experts of the U.S.S.R. Chamber of Commerce and Industry.
SERVICES: Compass adjusting, radar and radio repairs, gyro compass repairs, lubricants, paints and chemicals of Mobil, Castrol, Esso, Elf-Aquitaine, Rochem and Perolin Unitor also spares for Sulzer, M.A.N. and Burmeister and Wain engines also for Magnavox Satellite Navigators available from consignment centre of Novorossiysk (Tel: 62897. Telex: 279113/412629). Deliveries made with 3 days prior notice to Agent (Inflot Tuapse).
SHORE LEAVE: Crew allowed ashore until midnight. Failure to comply will bring heavy fine.
FIRE/AMBULANCE/POLICE: Telephones: Fire – 301; Fire-boat – 231; Ambulance – 003; Militia (Police) – 002. *Office Hours:* 0800 – 1600 hrs. Saturday 0800 – 1400 hrs.
DEVELOPMENTS: Reconstruction works including dredging underway.
NOTICES:
Brief Information for Masters:
ETA: ETA messages shall also contain quantity of ballast and time for deballasting ashore.
Anchorage: Anchorage position is obtained from Agent prior to arrival, if no immediate berthing is expected. No boats, rafts or other objects shall be launched from vessels. No swimming is allowed.
Bad Weather: S.W. gales develop heavy swell in harbour and vessels may be recommended to leave berth. Main engine shall not be immobilised when alongside berth without Harbour Master's permission. If permitted a tug-boat shall be hired to stand-by.
Bunkers: Small quantities of gas oil and IFO available ex-barge.
Free Pratique: Free Pratique will be granted after Custom's and other formalities are completed, which are normally carried out at all times when alongside berth, otherwise in day time at anchorage, weather permitting.
Fresh Water: Available ex-cargo berths only.
Garbage and Wastes: Any garbage, food wastes, etc. should be collected by crew into special containers placed on board each vessel by a boat upon arrival. Landing of garbage is compulsory.
Launch: Launch for crew at Master's request between 0800 hrs. and 2400 hrs., subject to availability of boats, weather permitting.
Meat Rooms: Meat rooms on board shall be sealed by the Vet Inspector during Custom's visit upon arrival in roads or upon berthing and the seal should not be removed before sailing. Meat of U.S.S.R. origin is allowed for use.
Pollution: Oil spillage must be avoided. In case of a spill, all operations must be stopped immediately and the accident reported to the Port Authority and your Agent at once. Any oil spot or slick noticed on the sea surface near your vessel should also be immediately reported to your Agent and entered in the log.

All outboard sea valves should be locked up upon arrival in U.S.S.R. territorial waters and kept securely closed until sailing. Port seals may be placed on the said valves after docking.

Oil Record Book should be kept up to date and always ready for inspection by Port Authority or Pollution Control.
Radio: Transmission on any frequency to any station except Tuapse Port Radio is not allowed within 12 mile limit. VHF Channel 16 is to be monitored continuously while in roads. This Channel shall be used for calling only. Channels 1, 3, 6, 8, 9, 12, 14, 26 and 27 shall not be used by vessels for ship-to-ship communication.
Steel Ropes: Steel ropes are not allowed when mooring in the Oil Harbour. All mooring lines shall be kept tight at all times.
Salinity: The sea water in harbour is brackish (salinity 1.011–1.014).
Sick Crew: Seamen with fever and symptoms of infectious disease should be reported to Port Sanitary Doctor on ship's arrival and without delay.
Duty Free: Shop is run by Shipchandler and is open 0800 – 1200 hrs., 1300 – 1700 hrs., Monday through Friday (Tel: 398).
Smoke: Emission of smoke from funnel in harbour is prohibited.
Smoking: No smoking is allowed on all decks when alongside at oil berth or when bunkering from a barge.
Telephone: Shore telephone set will be placed on board for fire-safety and business only when alongside a berth.
Useful Phone Nos.: "Inflot" – 322/836/288/427; "Nafta" – 357/282; Pilot – 338; Harbour Master – 323/235/223/503; Seamen's Club – 269; Shipchandler – 398; Pilot – 338.
Shore Leave: Shore leave to 2400 hrs.
Attention of Chief Officers: All mooring ropes and lines are to be equipped with *rat-guards* immediately upon completion of mooring or shifting.

Failure to comply with this regulation will incur a heavy fine by the Port Sanitary Service without further warning.
Safe Draft: Safe permissible draft alongside berths:

Berth No. 1	12.00 m.	Berth No. 7	7.40 m.
No. 2	11.20 m.	No. 8	6.20 m.
No. 3	9.75 m.	No. 9	11.00 m.
No. 4	11.50 m.	No. 10	11.00 m.
No. 5	12.00 m.	No. 11	12.00 m.
No. 6	9.75 m.	No. 11A	9.75 m.

Safe Trim and List: Vessels alongside berths should always maintain seaworthy trim and list (not exceeding 2°), and always remain afloat.
Tugs: Tugs are compulsory, ship's lines used. Masters should avoid using ship's propellers when approaching berth and should inform tugs of each manoeuvre to avoid damage. During S.E. gales vessels with a small quantity of cargo or ballast on board at Berths Nos. 1, 2, 5 and 6 are recommended to call tugs for safety.
Rat Guards: Compulsory for each rope, even tankers. Failure to comply will bring heavy fine.
Shore Leave: Officers and crew allowed ashore until midnight. Failure to comply will bring heavy fine.
Sewage: Must be discharged, whenever feasible, into a special craft before sailing.

Notice to Masters of Vessels: Additional Compulsory Regulations at the Port of Tuapse.

With the aim of preventing sea pollution following additional rules should be strictly complied with:

1. A reliable communication with shore organisations should be maintained during the whole period of vessel's stay in the port, by VHF on Channel 16, or by shore telephone placed on board when alongside berth. The use of such telephone for non-official conversations is prohibited.

2. Upon berthing all overboard valves, except those of the engine cooling systems, should be sealed by the ship's personnel.

3. Before commencement of any operations with oil products, drip pans should be placed under the manifold flanges, all scuppers and other openings on deck should be properly plugged, and all sounding pipes and air pipes checked. No oil operation shall start before all ship systems are ready and the vessel is reported to the representative of the oil harbour or the bunkering craft.

4. In case of an oil spillage, all oil operations should immediately be stopped, and the accident reported at once to the Port Authority by VHF from the roads or by telephone when alongside a berth: Telephone Nos.: Inflot – 322/836. Nafta – 357. Harbour Master's Office – 223/503. Pilot – 338.

All measures to prevent further discharge of oil overside and deck cleaning should be taken without delay.

5. Discharge of any liquids (oil products, domestic and fecal/bilge or sewage waters, etc.), garbage and wastes overboard is prohibited.

6. No ballast can be discharged overside into the sea without permission of the Hydrochemical laboratory and without their representative being present.

7. No chemicals are allowed to be used for neutralising spilled oil or oil products.

8. The administration of any vessel which has polluted the sea and the territorial waters of the U.S.S.R., and failed to undertake necessary measures to prevent a discharge of substances harmful to human health or living resources and marine life, as well as failed to report such incidents, shall be responsible in accordance with the law and regulations in force.

9. All ships should collect any garbage (food wastes, etc.) into special containers placed on board upon arrival, and see that the garbage is removed from the vessel before sailing.

Fire Fighting and Emergency Procedures:

Instructions on Fire Fighting Safety and Emergency Procedures at Oil Berths and on Tankers lying at Loading Berths at the Port:

1. Smoking in the Oil Harbour is prohibited.

Use of open fires and hot work without special permission of the Oil Harbour Fire Guard is not allowed.

2. In case of fire or emergency, inform Fire Guard (Tel. 301) immediately; at the same time start fire-fighting.
3. In case of oil spillage on the quay or on a tanker, cease all cargo operations immediately until the spilled oil is removed.
4. Stop loading during electrical storms.
5. Stop loading when another tanker is underway to an adjacent berth until her mooring is completed.
6. Connecting hoses and loading operations are prohibited when ship to shore bonding cable is missing.
7. The following fire-fighting equipment should be located near the ship's main cargo manifolds on deck:

2 fire extinguishers; a felt sheet, a container with sand and shovel; foam and water hoses with jet nozzles laid out.

8. If a fault or a condition threatens to create a fire is discovered, stop loading immediately until the hazard is eliminated.

Use of tools that may produce sparks is not allowed.

Principal Rules of Anti-Fire Safety for Tankers lying Alongside in the Oil Harbour:

In order to ensure the fire safety of the Oil Harbour and of vessels lying alongside, it is strictly forbidden:

(a) To pump out ballast and water with remains of oil products out of tanks/bilges;
(b) To carry out work with a naked flame;
(c) To throw overboard lighted cigarettes, matches, garbage, also to use signal rockets, fireworks, fire, etc.;
(d) To maintain fire in the galley, to use portable electric fire appliances, cabin ventilators and smoke on board during loading/discharging of oil cargoes. Smoking is allowed only in ship's smoking rooms;
(e) To perform steam scavenging of the smoke or exhaust pipes which may cause sparking;
(f) To use unprotected electric lights, pocket electric torches for lighting decks, tanks or ladders;
(g) To use on deck wire ropes while mooring, if the vessel is carrying 1st. category cargo;
(h) To load/discharge during thunderstorms;
(i) To use tools made of ferrous metal when connecting hoses to avoid sparking.

The vessel's administration are obliged to take all necessary measures to avoid any possible leakage of cargo from pipes and fittings onboard or pump out or spill on deck and in to the sea.

3. All scuppers on the loading/discharging deck section are to be plugged.

4. It is absolutely necessary that the vessel's hull should be connected to the shore earthing appliances if the vessel is loading/discharging a 1st. Category cargo.

5. The manholes of the cargo tanks are to be closed and the sight holes to be covered with Davy's nets.

6. Before commencing loading/discharging all the anti-fire appliances are to be ready for immediate use.

7. In case of fire on board the fire brigades should be called without delay, the vessel's Administration organising the extinguishing of fire by crew also.

8. The vessel's Administration must acquaint the crew with the above rules.

9. Master is responsible for the observance of the above rules.

AUTHORITY: The Port of Tuapse Authority, 2 Maxim Gorky Street, 352800 Tuapse, U.S.S.R. *Tel:* 7-15-15. *Cables:* Morport Tuapse. *Contact:* O. Antonov, General Manager.

AGENT: "Inflot," Shipping Agency, 25, Gagarin Str., 352800 Tuapse. Cables: Inflot. Telex: 279116 Inf Su. Tel: 7-13-22, 7-18-36, 28-1-54.

UST DUNAYSK (Ust-Dunaisk): 45.28 N. 29.42 E.

(See Plan)

LOCATION: The commercial sea port of Ust-Dunaisk is situated on the left bank of the Kilia Inlet of the Danube in the Northern part of its delta at the artificial basin and is approached by a buoyed channel 100 m. wide and 3.5 miles long.

A vessel is considered to be an "Arrived Ship" after she is piloted by a Port Pilot to Anchorage 'C' (No. 397) being a circle within a radius of 3 cables from a point with co-ordinates Lat. 45° 31.8′ N., Long. 29° 44.4′ E.

GENERAL: See "General" before first port in U.S.S.R.

PILOTAGE: Compulsory. Pilotage inward is carried out during daytime only. Pilotage outward is around-the-clock (after mutual agreement between Master's and Port Control).

Pilot waiting area (Pilot's boarding pontoon) for large sea-going vessels is within a radius of 2.5 miles from a point with co-ordinates: Lat. 45° 28′ N, Long. 30° 01′ E. (Anchorage No. 367 or A).

Pilot boat has orange hull and white superstructure and the word "Pilot" in black on the hull. The boat is used to deliver Pilots on board. Tugs of the port can be also used for delivering Pilot.

24 hours prior to arrival Master orders a Pilot via Harbour Master (indicating g.r.t./n.r.t., LOA and arrival draft).

4 hours prior to arrival at Anchorage No. 367 (A) Master has to call "Port Control" on VHF Channel 11 and correct time of arrival. At same time Master receives information about pilotage, formalities, berthing prospects, etc.

ANCHORAGE: There are 3 anchorages with good holding ground in soft mud and sand. They are:

No. 367 (A) - Circle within a radius of 2.5 miles from the point with co-ordinates Lat. 45° 28′ N., Long. 30° 01′ E.

No. 368 (B) - A square with co-ordinates:

Lat. 45° 30′ N.	Long. 29° 53.2′ E.
Lat. 45° 33.1′ N.	Long. 29° 53.6′ E.
Lat. 45° 33.1′ N.	Long. 29° 56.8′ E.
Lat. 45° 30′ N.	Long. 29° 56.8′ E.

No. 397 (C) - Within a radius of 3 cables from the point with co-ordinates: Lat. 45° 31.8′ N., Long. 29° 44.4′ E.

In good weather the Anchorage No. 397 (C) is used for effecting formalities and also for lighting of the vessels.

RESTRICTIONS/MAX. SIZE: Entry to the port is allowed in daytime only. Max. LOA 220 m. Max. arrival draft - 11.5 m. in fresh water. If vessel's arrival draft is greater than that permissible, the lightening of vessel is effected at Anchorage 'C' up to the draft of 11.5 m. Lightening is effected prior to entering the port.

When LASH-carrier vessels arrive at the Port of Ust-Dunaisk the cargo handling operations of the vessel which occupies the floating berth are to be stopped, her laytime interrupted and vessel has to proceed to the roads to Anchorage 'C' for the time the LASH-carrier's lying in the port if the other 2 berths are occupied. If LASH-carrier is in port on the floating buoys other vessels are not allowed to enter the port.

RADIO: Notice of Arrival can be sent via "Odessa-Radio" call sign UDE, calling frequencies 500/454 kHz working - 447 kHz. Address "Inflot Izmail" for "Inflot Ust-Dunaisk".

VHF communication can be effected via port radio station some details of which are given in the table below:

Call Sign	Frequencies (MHz) Working	Frequencies (MHz) Calling	Type of transmission	Time of work
Ust-Dunaisk Dispatcher	156.55 (11)	156.55 (11)	F3E	H24
Ust-Dunaisk Port-Control	156.55 (11)	156.55 (11)	F3E	H24
"Inflot" Ust-Dunaisk	156.55 (11)	156.55 (11)	F3E	H24

TUGS: Mooring and unmooring of the vessels at the port of Ust-Dunaisk is effected with tugs of total capacity not less than 5,000 h.p. (Pilot's option). Ship lines to be used for all operations with tugs.

BERTHING: All cargo handling operations are effected on 3 berths:

(a) Floating buoys where vessel lies at 2 anchors (about 8 shackles) and 3 ropes from each quarter to mooring buoys about 80 m. away;

(b) West Berth where the vessel lies to 2 anchors (about 9 shackles) and 3 ropes from each quarter to shore bollards about 150 m. – 180 m. from the vessel.

At the port of Ust-Dunaisk the transhipment of bulk cargoes is effected direct from ship-to-ship from large sea-going vessels into Danube barges. Cargo handling operations of lash-carriers is also undertaken.

For discharging/loading of bulk cargoes there are 2 floating cranes with capacity of 16 tons and max. height of 15 m. above water level and 2 well fendered floating transhippers with integral hopper/belt system and max. height of 21.5 m. above water level (cargo capacity 50 tons).

MEDICAL: Treatment effected at Izmail. In an emergency Agent can arrange medical treatment at Vilkovo.

DENSITY: Changeable, depends on wind direction. Average – 1005.

REPAIRS: No facilities.

FRESH WATER/FUEL: In first ETA Master has to order quantity of bunkers and water required. Bunkering possible during formalities or late. Bunkers and water are delivered from Izmail.
CONSULS: None.
DRY DOCKS: None.
SURVEYORS: Register of USSR, Grain Inspection, Chamber of Commerce of the USSR, Ingosstrakh.
OPENING/CLOSING HATCHES: Effected by ship's crew.
REPATRIATION: Possible, but taking into account that nearest Diplomatic Agency is too far away it takes at least one week to finish with all formalities and to effect it.
SERVICES: Supply services from Izmail in small quantities.
Additional Services: Discharge of dirty ballast and sanitary water, bunkering, supplying of fresh water, draft survey, unsealing survey, Register of USSR, Declaration of Sea Protests, all possible.
SHORE LEAVE: As there are no places to visit at the port of Ust-Dunaisk the Agent can arrange organised trips for crew members to the town of Izmail.
IDENTIFICATION CARDS: Seaman's book.
TIME: GMT plus 3 hours in Winter, GMT plus 4 hours in Summer.
GENERAL: *Chart:* Soviet Chart No. 971

SHIPMASTER'S REPORT: April 1982 (Updated 1988).
General: Situated on the Northern side of the Danube Estuary, approached by a channel about 1 mile West of the Girlo Prorva (BA. Chart 2213), with a depth of about 12 m. to a basin dredged to 12 m. – 14 m.
Documents/Entry Pocedure: As per U.S.S.R. ports.
Pilotage: Pilot boards in position Lat. 45° 32′ N., Long. 29° 47′ E., or in outer anchorage if weather permits. A tug or orange and white pilot boat is used.
Approaches: From the W.N.W. to a good anchorage at the pilot boarding station, depth 17 m., soft mud. As the buoys marking isolated dangers are unlit daylight approach is recommended.
Anchorages: As above or Harbour Authorities may recommend anchoring in position Lat. 45° 28′ N., Long. 29° 58′ E. Inner anchorage is used by river traffic.
Health: See "General" before first U.S.S.R. port.
Radio: Kooperatsia Ustj Dunajsk on Channel 11. Izmail on W/T or Channel 13.

Communications: Can only be carried out via the "Uritsky", which is an old passenger vessel and is used as the Harbour Office. All messages have to be relayed via this vessel and are either transmitted via VHF to Inflot, Izmail, or taken by river ferry to Izmail. As the Inflot Agent is the only one with a moderate command of English and is not in the office all the time, difficulties and delays occur.
Tugs: Assist in berthing and unberthing.
Berthing: See "Plan".

East Berth, 2 anchors to 9 shackles, 3 ropes from each quarter to shore bollards about 180 m. – 200 m. from vessel.

West Berth, 2 anchors to about 8 shackles, 2 ropes from each quarter to mooring buoys about 80 m. away.

Cargo Operations: Cargo worked 24 hours per day, weather permitting. All cargo worked by one floating crane, with a grab of about 3 tons. Discharging into 1,000 ton lighters, which are taken elsewhere for off-loading. As the crane also has to remove and replace the 7 covers on each lighter, considerable delays occur between finishing one lighter and starting the next. Even in most favourable conditions (16 hours in 24) discharging time seems to be the best that can be achieved. Rain and strong winds delay cargo operations. Takes about 7 days to discharge 25,000 tons.
Stevedores: Provided by port.
Density: 1004.
Fresh Water: Very difficult to obtain. Requires about 5 days' notice as has to come from Izmail, cost 2 Roubles 50 copecs per ton plus 3 Roubles 58 copecs per ton for transportation charges.
Fuel: Supplied but notice required well in advance.
Police/Ambulance/Fire: None.
Telephones: None.
Medical: Hospital and doctors in Izmail. Non-urgent cases take several days to arrange, see "Shore Leave".
Provisions: Usually only potatoes and onions available. Transport cost: 10% of bill.
Shore Leave: Permitted, can only be arranged through the Agents, Inflot. Several days' notice required, all movements of crew closely monitored by Frontier Police.

Journey to Izmail takes 3 hours by hydrofoil and it is usually necessary to spend at least 1 night in hotel at a cost of 10 Roubles, this is arranged by Agent.
Hatches: Opened and closed by ship's crew.
Repairs: No facilities.
Notice:

Extracts from the "Compulsory Regulations at the Sea Merchant Port of Ustj Dunajsk".
(For the Master of the . . . . to be informed)

1. All the mooring ropes to be supplied with rat guards.
2. In daytime to hoist anchor ball.
3. The National Flag of the U.S.S.R. should be hoisted from 0800 hrs. until sunset.
4. At night and when snowfall, rain, haze/mist anchor lights should be switched on.
5. The main gangway set for the men's movement should be equipped with handrails and life-saving net.
6. In order to prevent motor-launches fouling or colliding with the anchor chain or stern at night:
   a) Hang out 1 light in the forebody portion of the vessel – down from the stem.
   b) Hang another light down over the stern.
7. Categorically prohibited:
   a) Pumping out of all kinds of petroleum products.
   b) Pumping out of sewage.
   c) Throwing out rubbish, sweepings, refuse and other things including cargo separation.
   d) No diving or bathing.
   e) Lowering of boats and dropping of other means of flotation.
   f) Work on vessel's radio station except VHF.
   g) Use of firearms for hunting birds.
   h) Giving sound signals.
8. In stormy weather stand by on Channel 16 VHF. Radiotelephone communication with the m.v. "Uritsky" by VHF Channel 13.

Signed:
V. Stoliarov, Harbour Master.
Accepted by the Master of the . . . .

SHIPMASTER'S REPORT: May 1983 (Updated 1988).
General: Situated on the Northern arm of the Danube Delta, the port consists of a basin in the marshes, and is approached by a buoyed channel 100 m. wide, approx. 3.5 miles long, dredged to a depth of 13 m. There are berths for 3 vessels lying to two anchors and with three lines to each quarter mooring buoy. There is a strong outflow from the river, and the port is open to all winds. LASH ships appear to have preference at one berth. All business, including protests, is transacted at Izmail, some 40 miles inland, and the Inflot Agent and Port Officials are based there.
Documents: Refer to beginning of U.S.S.R. section. 4 Crew Lists and separate Money List (attached to Crew Declaration) required.
Pilotage: Compulsory, but not for departure from Inner Roads. Pilot launch with orange hull and white superstructure with the word PILOT in black on the hull. This launch is used for all transport operations in the port.
Anchorage: There are 3 anchorages marked on B.A. Chart 2213. Vessel instructed to anchor in "A", and Pilot boarded there. Vessels lightening are anchored in the Inner Roads close by the outer fairway buoys. Good holding ground in mud and sand at all anchorages.
Restrictions: Least depth in channel 11.5 m.
Radio/VHF: Pre-arrival notices to Inflot Izmail. Agent boards with Officials and Grain Inspectors either at Inner Roads Anchorage or at berths.

Pilot Channel 16; Inflot Agent Channel 11 – call "Uritsky". Use of main transmitter prohibited at Inner Roads and in the port.
Tugs: One conventional and 2 pusher tugs with adequate power assist with berthing. There is a mooring boat for running buoy lines.
Bulk Cargo Facilities: There are 2 floating cranes, well fendered and with integral hopper/belt system for loading coasters. They also carry a wheeled digger/dumper, use of which is not allowed at the anchorage. Each crane capable of about 600 t.p.h.; average about 400 t.p.h. Coasters have a capacity of 3,000 tons; lighters 1,000 tons. Lightening at anchorage carried out by 1 crane towed out by tug; operation liable to interruption with wind force 4 – 5 when crane returns to port.
Medical: In emergency Agent can arrange medical treatment at Izmail.
Density: 1013.
Surveyors: Grain Inspection: Inspectors required *all* main hatches opened and two crew to assist with sampling, even for lightening two holds.
Hatches: Opened/closed by crew.
Customs Allowances: No restrictions. Bond not sealed.
Services: None.
Shore Leave: Permitted.
Agent: Inflot Agent travels from Izmail and usually spends Monday to Friday on "Uritsky", or if traffic expected. See "Izmail".

AUTHORITY: Management of the Port of Ust-Dunaisk., 2 Pridunayskaya str., Vilkovo, USSR. *Cables:* USSR Vilkovo, Port of Ust-Dunaisk.

AGENT: "Inflot" Ust-Dunaisk, 2, Pridunayskaya str., Vilkovo, USSR. Cables: USSR "Inflot" Izmail for "Inflot" Ust-Dunaisk.

VENTSPILS: 57.24 N. 21.33 E. (See Plan)

GENERAL: A Baltic Sea port, Ventspils is situated at the mouth of the Venta River. Ventspils is ice free throughout the year.

There are periodical alterations in the water level of the Venta River, chiefly due to the effects of the wind. The rise of the water level is usually due to moderate Westerly winds, and the fall is caused by Easterly winds.

The maximum rise of the water level is observed in the Venta River at the time of Spring floods.

The port of Ventspils aquatorium includes the Avant-port and the Commercial port. A fairway, direction 323.6° – 143.6°, 130 m. wide leads to the port from seaward of Reception Buoy "Venspils-B".

The West fairway direction 289.9° – 109.9°, 130 m. wide from the "Ventspils-A" Buoy. Both fairways are suitable for all vessels. The draft of vessels passing through the fairway should not exceed 12.48 m. (FW).

Vessels can enter the port by this fairway only after having obtained the Harbour Master's permission.
DOCUMENTS: Refer to beginning of U.S.S.R. section.
PILOTAGE: Pilotage is compulsory both for entering and leaving the port.

Pilots board and leave vessels in the areas of Reception Buoys "Ventspils-A" and "Ventspils-B". Pilot service is available round the clock when entering and leaving the port.

Pilot vessel on Channel 16.

ANCHORAGES: Anchorage in the outer port road for vessels loaded with chemical cargoes is allowed in Area No. 50, co-ordinates:

Lat. 57° 29.75′ N.	Long. 21° 28.62′ E.
Lat. 57° 29.12′ N.	Long. 21° 29.90′ E.
Lat. 57° 30.82′ N.	Long. 21° 31.75′ E.
Lat. 57° 31.48′ N.	Long. 21° 30.40′ E.

Anchorage in outer port road for tankers, vessels loaded with explosive or inflammable cargoes and also for vessels holding up in quarantine is allowed in Area No. 51, co-ordinates:

Lat. 57° 29.40′ N.	Long. 21° 28.82′ E.
Lat. 57° 28.08′ N.	Long. 21° 27.15′ E.
Lat. 57° 27.90′ N.	Long. 21° 30.80′ E.
Lat. 57° 27.02′ N.	Long. 21° 28.72′ E.

Anchorage in outer port road for all the other vessels is allowed in Area No. 52, co-ordinates:

Lat. 57° 27.98′ N.	Long. 21° 26.40′ E.
Lat. 57° 26.65′ N.	Long. 21° 24.87′ E.
Lat. 57° 26.05′ N.	Long. 21° 27.10′ E.
Lat. 57° 26.21′ N.	Long. 21° 28.88′ E.

These Areas are announced by the U.S.S.R. Notices to Mariners. Depths in the anchorage are from 10 m. to 12 m. The bottom is sand; the holding ground is good.

The Master of a vessel has to inform the Port Administration through "Inflot" Agency of the exact position of the anchorage stating the bearing and the distance from the North breakwater lighthouse.

The anchorage in the outer road is not safe during strong Westerly winds therefore vessels are recommended to drift while awaiting entry to the port or to go to sheltered places situated in the areas of the Kolkasrags Point and the Gotland Islands.

MAX. SIZE: *Tankers:* Max. LOA 235 m. Beam 32.0 m. Max. draft 12.48 m. in fresh water.

Cargo vessels: Max. LOA 215 m. Max. draft 11.94 m. in fresh water. Limitations depending on type of cargo to be handled.

When proceeding along the fairway and passing through the Venta River channel, vessels should have speed not exceeding 5 knots.

HEALTH: Pratique obtainable after mooring. Sanitary Inspector visits vessel after mooring together with Immigration and Custom House Officer. If medical care required the Sanitary Inspector has to be informed.

It is strictly forbidden to throw any type of garbage materials overboard from the ship into water areas of the port (bilge water, sanitary water and other infected pollutants). There are three barges for these services; one barge is self-propelled and two are non-self-propelled.

Note: Pratique may be granted on arrival in the roads if vessel reports "Healthy" by means of radio, radio-telephone, etc.

RADIO: Radio contact should be established via the Ventspils Radio–1 Port Radio Station which operates 24 hours a day on the following frequencies:

Call Sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
UNI	500/429	500/454	A1A	H24
"Ventspils-Radio"	2182	2182	H3E	H24
"Ventspils-Radio-1" (CPR)**	156.8* (16) 161.9* (26)	156.8* (16) 157.3* (26)	H3E F3E	H24 H24
"Ventspils-Radio-5" (Harbour Master)	156.8* (16)	156.8* (16)	F3E	H24
"Ventspils-Radio-17" (Vessels movement control)	156.8* (16)	156.8* (16)	F3E	H24

*Frequencies in MHz.

**Central Port Radio Station.

Working frequencies of VHF Radio-telephone:

Channel No. 7 – 160.95 MHz
Channel No. 20 – 161.60 MHz
Channel No. 22 – 161.70 MHz
Channel No. 26 – 161.90 MHz
Channel No. 27 – 161.95 MHz

RADAR: The port has a Shore Radar Vessels' Control System.

TUGS: Use of tugs for tankers and gas tankers is compulsory. For dry-cargo vessels over 90 m. LOA use of tugs is also compulsory, otherwise subject to Pilot's/Master's decision.

Normally tugs join vessels within the port area.

BERTHING: Berthing of vessels and shifting berths is carried out round the clock. Vessels having length over 185 m. and draft over 9.5 m. (FW) when approaching the port through the Venta River Channel are allowed to enter or leave the port, moor and shift berth during the day only and when winds do not exceed Force 5.

Cargo berths with depths alongside up to 10 m. situated on the right bank of the Venta River are equipped for handling general, bulk cargoes and metals. Berths of the Avantport are equipped for handling crude oil, liquid gas chemicals and oil products. They can receive vessels with the maximum permitted draft of up to 12.48 m. (FW) (at the datum at Kronstadt). There are covered warehouses and open concrete floor sheds in the port.

There are enclosed warehouses and open concrete floor sheds. This is also a potash handling plant.

Quays are equipped with electric cranes of up to 45 tons capacity. There are floating cranes of up to 100 tons capacity, cargo handling equipment for bulk cargoes and machinery.

Opening and closing of hatches is normally done by the ship's crew. However, this will be done by stevedores at extra charge if requested by Master.

STEVEDORES: Master's and/or shipowner's information of cargo details, stowage – especially for ships with inward general cargoes – is required in proper time. Information has to be addressed to "Inflot" Agency Ventspils.

ETA notification 72, 48, 24 and 4 hours before arrival to "Inflot" Ventspils (Agents).

MEDICAL: Hospital facilities available. Advance notice desirable, however depends on kind of sickness. Master should place orders concerning inoculations, vaccination, fumigation, hospitalisation and etc., with representative of Sanitary Inspection. Veterinary Certificate is compulsory for all kinds of animals and cargoes of animal origin; phyto-certificate is compulsory for cargoes of vegetable origin.

TANKERS: All grades oil loaded by shore loading hoses in diameter of 200, 250, 280, 300 and 350 mm. Total 6 berths all fitted with deballasting installations for slops. Max. draft from 11.00 m. up to 12.48 m. (FW).

There are 2 new berths for gas/chemical carriers, max. draft Berth No. 34 – 8.2 m. and Berth No. 36 – 12.48 m. (FW). Grounding to be supplied by vessel.

DENSITY: In port about 1002.

FRESH WATER: Fresh water available, delivered from shore or by barge (capacity 450 tons).

FUEL: All grades available subject to prior inquiry. Bunkers can be taken from the oil jetty or supplied by lighters.

GANGWAY/DECK WATCHMEN: Service of watchmen recommended; however, Master's option.

CERTIFICATES: Required to be on board:

Crew List.
International Tonnage.
International Class.
Load Line.
Safety Equipment.
International Radio.
Derat Certificates.
Certificate of Financial Security in respect of civil liability for oil pollution damage, 1969.

CUSTOMS ALLOWANCES: There is no restriction for crew use and bond locker is not sealed.

IDENTIFICATION CARDS: Seaman's Book required.

CONSULS: No Consulates.

REPAIRS: Small deck and engine repairs, diving inspections can be carried out.

DRY DOCKS: None.

REPATRIATION: Repatriation of crew left behind by a vessel in hospital is arranged by other tramp-ships with Master's consent or by rail or air after the necessary documents have been arranged.

TIME: From 1st April till 1st October (Summertime) – GMT plus 4 hours. From 1st October till 1st April – GMT plus 3 hours.

HOLIDAYS: 1st January (New Year's Day); 8th March (International Women's Day); 1st and 2nd May (May Day Holidays); 9th May (Victory Day); 7th and 8th November (The Great October Socialist Revolution Day); 7th October (The U.S.S.R. Constitution Day). Cargo work never stopped on holidays.

POLICE/AMBULANCE/FIRE: If required have to be called through Maritime Agency "Inflot".

TELEPHONES: No arrangements exist for placing telephones on board.

SERVICES AVAILABLE: Tankers' deballasting installation for slops; service for radar and VHF repairs; compass adjusting; workshop for ordinary deck and engine repairs; ship chandler service; bunker, water, garbage removal, bilge cleaning, surveyors.

SHORE LEAVE: Crew members allowed ashore.

SHIPMASTER'S REPORT: 1976.

Anchorages:

Tanker: bounded by positions,

Lat. 57° 28.4′ N.	Long. 21° 27.3′ E.
Lat. 57° 29.7′ N.	Long. 21° 29.2′ E.
Lat. 57° 28.2′ N.	Long. 21° 31.2′ E.
Lat. 57° 27.2′ N.	Long. 21° 29.3′ E.

Cargo: bounded by positions,

Lat. 57° 25.3′ N.	Long. 21° 26.8′ E.
Lat. 57° 28.0′ N.	Long. 21° 26.4′ E.
Lat. 57° 26.1′ N.	Long. 21° 29.0′ E.
Lat. 57° 26.7′ N.	Long. 21° 25.8′ E.

Buoyage:

No. 2 B.W. Conical Fl. 5 sec. (Approx. position Lat. 57° 25.7′ N., Long. 21° 29.85′ E.) to be expunged.

New Buoys:

No. 2 Fl.W. 5 sec. in position Lat. 57° 25.6′ N., Long. 21° 28.3′ E.
No. 3 Fl.W. 3 sec. in position Lat. 57° 24.1′ N., Long. 21° 30.65′ N.
No. 4 Fl.R. 3 sec. in position Lat. 57° 25.16′ N., Long. 21° 30.82′ E.

In harbour, No. 4 Fl.R. Con. and Red Conical Buoy about 2 cables E × S to be expunged.

Oil Piers: 3 in number.

No. 1 pier, berths Nos. 28 and 29 – light outer end Qk. Fl.W.
No. 2 pier, berths Nos. 30 and 31 – light outer end Qk. Fl.Or.
No. 3 pier, berths Nos. 32 and 33 – light outer end Qk. Fl. Blue.

Depths alongside:	Berth 28:	10.10 m.
	Berth 29:	10.00 m.
	Berths 30/33:	12.00 m.

After dredging in channel is completed to 12.5 m., depth at Berths 32 and 33 will be 12.5 m.

Oil Pier No. 3 (Bearings, distances and positions here not confirmed). Existing dock face continued 24.5° approx. 1,100 ft. to join Northern Breakwater.

No. 3 runs 283° for 1,100 ft. from position 24.5°, 2,000 ft. from Fl. R.Lt. in Lat. 57° 01′ N., Long. 21° 33.5′ E.

Northern Breakwater: Inner extension from position Lat. 57° 24.69′ N., Long. 21° 32.2′ E. 012° for 890 ft. to join main breakwater.

Under Construction: 3 berths for Petro-chemical industry along inner face of Northern Breakwater.

Small harbour beside pilot station, Southern side, completed and in use by small craft and fishing vessels. Small repairs in operation. Depth said to be 3.5 m. – 4 m.

Port operation in foggy weather said to be controlled by radio and millimetre (aircraft) type radar installation, one scanner of which is situated on tower near root of Southern Breakwater.

Tugs: Alleged that 5 are available; 1 icebreaker type of 2,500 h.p. 2 medium size, and 2 small, 1 at least of which was propelled by Voith-Schneider gear of about 750 h.p.
Pilots: To call Pilots, use Channel 16 and call Ventspils Radio who make arrangements with Harbour Office and Agents (Inflot).

During time vessel de-ballasting and loading; any problems can be resolved by call to Agents through Ventspils Radio.
Regulations: Fire Officers demand that suitable bonding wire be fitted (supplied by ship). No shore facility available.
Facilities: No. 1 Pier has (building) tower crane for handling hoses. Nos. 2 and 3 berths are fitted with loading arms hoses and towers. Fresh water available. Bunker fuel available but not necessarily marine diesel.
Cargo Berths: There are believed to be 8 dry cargo berths, within the river port area, some with cranes, suitable for general cargo, together with storage buildings. Refrigerated/chilled cargoes have been handled regularly.
Max. Size: Pilot stated that tankers of up to 60,000 tonnes displacement were possible at present, and that after dredging it should be possible to take up to 100,000 tonnes displacement.

To contact Agents, call Ventspils Radio on Channel 27 and they make arrangements.

SHIPMASTER'S REPORT: May 1980 (Updated 1986).
Vessel: LPG carrier of 10,000 g.r.t.
Landfall/Approaches to Pilotage: Approaches clearly defined by radar, Decca coverage good. Vessels anchored in dry cargo anchorage provide a good guide. Two approach channels with tankers generally using the Southern channel. Pilot boarded close to Buoy A (Fairway Buoy for South channel).
Pilotage: ETA notification 96, 48, 24 and 4 hours before arrival to "Inflot Ventspils" (Agents), thence further communication by VHF calling Channel 16, then working Channel 9. Answered to "Ventspils Pilots" and not "Nadzor" as stated in Radio Signals Volume 6. Pilots will advise instructions, in this case, to proceed to Buoy A (Fairway Buoy for South approach channel). Pilot cutter/launch (speed 6 knots) proceeds from inner harbour. Pilot ladder on appropriate side for weather conditions rigged 1 m. above water. Pilotage time to berth approximately 40 minutes. On this visit, despite Pilot boarding at Buoy A, vessel entered using North channel.

Upon departure, Pilot arranged by Agent upon completion of documentation. Southerly channel used for departure with Pilot disembarking mid-channel.

NOTE: LPG vessels are not permitted to enter or leave port during adverse weather conditions.
Anchorage: Tanker anchorage lies to N.E. of Northerly channel.
Tugs:

a. Inbound: Tugs join vessel close to breakwater entrance. Three tugs used for berthing (standard port cost for tugs whatever the number used – five tugs available). Made fast on port bow and quarter using ship's lines with one tug pushing. Vessel berths port side alongside – strong Northerly winds (off-shore) on this visit.

b. Outbound: Tugs join vessel at berth – one tug made fast on starboard bow using ship's line. Second tug in attendance. Tugs gone and clear before clearing breakwater.
Berth: (Ammonia only – See "Plan"). Modern fendered concrete quayside with depth alongside 13 m. to 14 m. No tidal range but atmospheric conditions affect Baltic water level – density alongside 1001.

Vessel generally berths port side alongside. Berth equipped with 12 in. 150 ASA liquid and vapour Chicksans. Ship's reducer used on vapour manifold. Ship's gangway used.
Cargo: Anhydrous ammonia received at −33° Celcius. Loading rate agreed before commencing loading (in this case requested 650 t.p.h.) and increased to over 1,000 t.p.h. after officially requesting for increased rate through Inflot agency. The rate agreed prior to loading is expected to be maintained throughout loading with usual reductions for topping off as required. Average rate for 10,230 tonnes loaded was 714 t.p.h.

Vapour return line connected but not required or used – high back pressure on line. Documentation slow – cargo documentation cannot commence until ship cleared and Chicksans not connected until cargo documentation completed. Shippers "Sojuzchimexport" require quality certificate for cargo heel onboard – accepted ship's declaration of purity. Also require cargo plan showing 100% tank volume for each tank – to prevent overloading. Bill of Lading quantity = cargo as measured onboard by shore surveyor (accompanied by interpreter).
Bunkers/Water/Chandler: None required but all available.
Agents: Inflot, Ventspils. Tel. Nos. 61213, 51233, 51350. Cable address: "Inflot Ventspils". Telex No.: 122 INF VNT SU.

Efficient and friendly service. All representatives speak perfect English and very helpful in dealing with Authorities. Inflot require ship information, cable 24 hours prior to arrival with following information:

a. Ship's name, signal letters, nationality.
b. Last port.
c. Draft forward and aft, length, gross and nett tonnage.
d. Cargo requirements.
e. Owner's name and telex number.
f. Bunkers, water and provisions required.
g. Number of crew and health declaration.
h. ETA at pilot station.

If Agents are required in port, call "Ventspils Radio" on Channel 16 and ask for connection to Inflot Agency.
Authorities:

Customs: Usual Bond Declaration required but unconcerned with bonded items onboard and bond locker not sealed in port.

Currency Declaration most important. Customs are not interested in personal cash holdings but must have a "TOTAL Cash Onboard Declaration" and the currencies involved. This total to include personal cash, bar cash, safe cash, etc.

Persons going ashore MUST obtain receipts for all expenditure which are then compared with the total declaration prior to departure.

Immigration: Usual Crew Lists required plus Discharge Books or Passports of all onboard. These are taken ashore, stamped and returned onboard. Persons going ashore will then be required to exchange Discharge Book for shore pass with guard at bottom of gangway. Prior to departure, all personnel must report to Immigration onboard for an identification check.

There is a strict CURFEW after 2400 hrs. and personnel must be onboard before that time. No restrictions placed on the Master.

Port Health: Doctor boarded on arrival but formality only. Cursory inspection of storerooms only.
General: Time in port was 26 hours 48 minutes. Time loading was 14 hours 20 minutes (documentation 10 hours). Total disbursement for visit was U.S.$9,630.

SHIPMASTER'S REPORT: November 1980. (Updated 1986).
Pilotage: Pilotage is compulsory. 12 Pilots available. Pilot boards at fairway buoy at the beginning of the old entrance channel and disembarks at Buoy No. "A" in the new deep water channel. Docking and undocking without the aid of a Pilot is not allowed.
Restrictions: Vessels can enter and leave port during hours of darkness at any stage of the tide, however, vessels are not allowed to manoeuvre in fog or at times when the wind is strong. Shore radar is used at night and in fog for berthing.
Max. Draft: Vessels max. draft on sailing was 11.6 m. (FW).
Tugs: 4 tugs available.
Radio: Ventspils Radio, call sign "UNI", on 500, 2182 and VHF Channel 16.
VHF: Pilot uses Channels 9 and 13 after initial call on Channel 16. Port Authority and Agent on Channels 16 and 27.
Documents: As per "Guide to Port Entry".
Facilities: The following are available: Fresh water, fresh provisions, small repairs, small machine shop, Lloyd's Surveyor, Salvage Surveyor (Lloyd's), laundry service, bunker fuel oil, diesel oil, small stock of lubricating oils, Doctor and hospital, groceries and meats, slop tanks – there is no slop storage – slops are segregated during discharge.
Tankers: There are 6 berths at the oil terminal at 3 piers (Berth Nos. 28 – 33).

Vessel berthed at No. 31. Ballast is required when arriving or sailing in a light condition (clean ballast may be discharged into the sea with permission from shore).

The tanker terminal exports crude oil, nafta and gas oil but no petrol. Fuel oil is exported from Klaipeda, 100 miles to the South. Ship's hoses are used. 2×12 in. lines are connected direct to the ship's manifold. No shore booster pump available. Max. pressure 5 kgs.
General Cargo Facilities: There are facilities for handling bulk cargo. Large number of cranes available.

Ro-Ro facilities are not yet ready. There is a floating crane with a 100 ton capacity. There is equipment for handling 20 ft. containers only, however, there is very little storage space available for containers.
Fuel: There are 2 barges, capacity 400 tons each for fuel and diesel oil.
Fresh Water: There is 1 water barge, capacity 100 tons.

AUTHORITY: The Port of Ventspils Authority, Dzintaru 22, 229910 Ventspils, U.S.S.R. *Tel:* 68468, 68222, 68395. *Cables:* USSR Ventspils Port Authority. *Contact:* P. Nikiporov, Harbour Master. A. Rymar, Port Director.

AGENT: The Port of Ventspils Maritime Agency "Inflot". Postal address: 18 Dzintaru Street, Ventspils, U.S.S.R. Cables: "Inflot Ventspils". Tel. 61-213, 68-369, 68-233, 68-350. Telex: 161822 Infl Su.

VOSTOCHNY: 42.44 N. 133.03 E.

LOCATION: The commercial port of Vostochny is situated in the Vrangel Inlet, on the North-Western coast of the Nakhodka Bay, in the Sea of Japan. Navigation at the port continues all the year round.
DOCUMENTS: See "General" before first U.S.S.R. port.
PILOTAGE: Pilotage in the port of Vostochny is compulsory. The services rendered by Pilots are carried out round the clock. In case the Pilot is not able to board a vessel due to bad weather, Master should follow recommendation given by the Pilot from the Pilot boat.

The port is equipped with a shore automatic vessels' movement control system (radio call sign "Kamensky-17").
ANCHORAGES: Vessels are allowed to anchor in the port Inner Roads, the Vrangel Inlet, after having obtained the Harbour Master's permission only.
RESTRICTIONS: There are no entry restrictions in regard to vessel's length. Vessel's speed should not exceed 12 knots while proceeding through the main fairway and 6 knots when approaching the Vrangel Inlet. Under all circumstances Master shall choose the vessel's speed bearing in mind current navigational conditions.

The mooring of vessels having deadweight of 10,000 tonnes and over and length of more than 150 m. in ballast is not allowed during winds having velocity 10 m./sec. and over.
MAX. SIZE: The maximum draft of vessels mooring at the Coal Pier is 15 m. and 9.7 m. when mooring at other berths.
RADIO: Notice of Arrival – see "General" before first U.S.S.R. port.
VHF: Radio communication can be effected through the Port Radio Station "Vostochny-Radio", some details of which are given in the table below.

	Frequencies (MHz)		*Type of trans-*	*Time*
Call Sign	*Working*	*Calling*	*mission*	*of work*
"Vostochny-2"	156.8(16)	156.8(16)	F3E	H24
(Port controller)	157.775(95)	157.775(95)	F3E	H24

VTMS in operation.

HEALTH: A vessel having arrived in the port Outer Roads and having no contact with the shore may not need to go through the clearance formalities. Vessels, having arrived in the port Inner Roads (the Vrangel inlet) irrespective of the fact that they are to carry out cargo handling or not, shall go through all the necessary formalities for the clearance of the ship both on arrival and departure.

TUGS: 3 powerful tugs available. Masters of vessels are to use minimum of 2 tugs when mooring/unmooring and shifting berths at the port of Vostochny. The use of a third tug is compulsory during absence of a tug-pusher when mooring/unmooring bow-towed barges.

The number of tugs and their horse-power is determined by a Pilot with the Master's consent.

BERTHING/CRANES: Berths of the port with depths of up to 10 m. are equipped to handle bulk, liquid, general and timber cargoes as well as various kinds of vehicles. There are also specialised systems for the handling of coal and containers.

STEVEDORES: The official working breaks at coal terminal are:

0700 – 0800 hrs.,1200 – 1300 hrs., 1900 – 2000 hrs., 0000 – 0100 hrs.

At all the other terminals official working breaks are:

0800 – 0900 hrs., 1200 – 1300 hrs., 1700 – 1800 hrs., 0000 – 0100 hrs.

FRESH WATER: Can be taken at berths.

FUEL: Can be taken from lighters only.

REPAIRS: No facilities.

DRY DOCKS: None.

HATCHES: Opening and closing hatches is carried out by dockers.

TIME: GMT plus 10 hours in Winter; GMT plus 11 hours in Summer.

GENERAL: *Charts:* Soviet Chart No. 700.

Ship chandler's shop and restaurant available.

NOTICE:

To Masters of Foreign Vessels calling at Soviet ports:

1. On arrival of the ship the Master is to submit to the representatives of the Port Authorities the following documents (IMO Forms) duly signed by ship's administration:

General Declaration (Form I) – 5 copies

Filling in of points 8 and 11 is not compulsory.

Cargo Declaration (Form II) – 2 copies

Filling in of point 6 is not compulsory

Points 7, 8 and 9 are to be filled in only for:

(a) Cargoes for which Bills of Lading were not issued (names of Shippers and Consignees to be stated).

(b) Transit cargoes;

(c) Cargoes for other Soviet Ports;

(d) Agricultural cargoes.

Ship's Stores Declaration (Form III) – not required.

Crew's Effects Declaration (Form IV) – 2 copies.

Amount of Master's and crew members' valuables (gold, silver, platinum, jewellery, bonds, travellers' cheques, etc.), personal firearms and cartridges are to be stated in point 2.

Crew List (Form V) – 6 copies.

Passenger List (Form VI).

2. The Master of a ship is to instruct all members of the ship's crew that in accordance with the Rules in force in Soviet Ports:

Exportation and importation of Soviet currency is forbidden;

No articles are permitted to be taken ashore or brought on board the ship without permission of the Customs House Authorities;

Articles taken ashore or brought on board the ship and concealed from Customs control shall be regarded as smuggled goods, shall be confiscated and a fine shall be imposed;

Likewise, the sale of any articles of foreign origin on the territory of the USSR will be regarded as smuggling;

No rubbish shall be thrown into the water or on the quay. The discharge of oil contaminated water and/or oil residue is prohibited;

All mooring ropes must be fitted with rat-guards;

At night only one gangway must be ashore when loading or discharging is not carried out;

It is prohibited to take ashore grain, seeds, plants, plant products, soil, etc., as well as animals and birds;

Violation of the above-mentioned rules will entail penalty in accordance with the laws of the USSR.

NOTICE: *Extracts from the Obligatory Decrees of Vostochny Port:*

Port Limits: Inner roadstead-Vrangel Bay, a line drawn between Kamensky Point and Petrovsky Point.

Pilotage: Pilotage is compulsory for all craft exceeding 20 m. LOA, day and night. Request for a Pilot shall be made to "Vostochy-2" on VHF Channel 16, working on Channels 14, 9 and 6.

Navigation: Navigation in Nakhodka Bay and fairway leading to inner roads is one-way only. Max. speed is up to 8 knots if over 150 m. LOA, 10 knots up to 150 m., and 12 knots if less than 50 m. The overtaking of craft is prohibited at the inner roadstead. Navigation in the inner road by all craft exceeding 50 m. LOA must be at dead slow speed.

Mooring: Mooring must be made with not less than 2 tugs.

Draft: Permissible draft by Coal Berth is to 15.0 m. and at other berths 9.7 m.

Anchorage: Anchorage is temporily prohibited at Vrangel Bay.

Declarations: All declarations with regards to damage done to the ship while loading (unloading) or mooring shall be made by the Master through "Inflot" to Port Authorities in writing within 4 hours of the accident and in any case, before the ship leaves the port. Failing this the port shall consider no claims and shall bear no liability for any damage.

Prohibition: The following are prohibited at the port:

(a) pouring of sanitary water over board and any smoking.

(b) using of the any chemical means in order to neutralise the spilled waters alongside.

For infringement of the abovementioned Master or his Owner shall be punished (fine to 25,000 roubles or deprivation of freedom for 5 years in accordance with Soviet legislation).

Signed: Harbour Master.

SHIPMASTER'S REPORT: May 1983.

The Port of Vostochny is a relatively new port, and lies in Nakhodka Bay, at the extreme N.E. end in a smaller Bay, known as Vrangel Bay.

Documents:

On Arrival:	Prior Departure:
5 General Declarations (IMO Form)	1 Cargo Time Sheet
4 Cargo Declarations (IMO Form)	1 General Declaration
2 Stores Lists	1 Cargo Declaration
2 Crew's Personal Effects Lists	Cargo Manifests,
6 Crew Lists	(Prepared by Agent)
4 Passenger Lists	
2 Money Lists	
2 Marine Declarations of Health	
1 Vaccination List	
1 List of Ports Visited	

Port Authorities board the ship at any time to effect clearance. They use the accommodation ladder. Frequently a moderate swell runs into Nakhodka Bay from the South, making boarding from even quite large launches very difficult. Immigration Authorities inspect all Crew Seamens' Books. Process of clearance takes about 1.5 hours.

Approaches: When about 4 hours from the port call "Nakhodka Port Control", on Channel 16, Working Channel 12. Nakhodka Port Control has the whole of Nakhodka Bay (Amerika Bay on some charts) under radar surveillance. All shipping movement within the Port Limits are controlled by them. They give direct steering and sailing orders over VHF Channel 12 to vessels under way after passing No. 1 Buoy (Lat. 42° 43.3′ N., Long. 132° 56.3′ E.) inward bound, also anchor berth given with bearing and distance from Mys Shvedova Lt. Ho. usually in the Quarantine Anchorage indicated on Chart BA. 3198 and Anchorage No. 3 on Chart BA. 3041 (Nakhodka Bay). Anchorage good in clay and mud in about 19 m. of water. After anchoring, report to Nakhodka Port Control, and revert to listening watch on Channel 16.

Berthing: Vessel proceeded to the Coal Berth at Vostochny under guidance from Nakhodka Port Control. Fairways well defined on BA Chart No. 3041. Pilot meets vessel off the entrance to Vrangel Bay, just after passing No. 2 Buoy. (Lat. 42° 46.0′ N., Long. 133° 00.6′ E.). Pilot normally boards by pilot ladder or accommodation ladder, port side. 2 tugs used for berthing, which is nearly always port side to.

Berth is new and very modern (Japanese construction). Very well fendered with large rubber fenders at regular intervals. Usable length of quay is about 275 m., bollards at regular intervals all the way along the quay. Although two berths are shown on the Coal Jetty on BA Chart No. 3041 (Nos. 49 and 50) only No. 49, is in fact, used. This is because the loaders (two in number) only serve No. 49 Berth. Depth of water alongside reported as 15 m. and 14 m. guaranteed. No restriction on air draft for loaders, ample clearance for vessel of this size (Panamax).

Departure presents few problems, as plenty of room and water immediately off the berth. Two tugs used as for berthing. These tugs are small, and not really big enough for a vessel of this size, and take a long time to get the ship moving off the berth. However, when clear of berth, vessel can be turned short round with engines and also with the aid of the tugs. Immediately vessel is turned and heading outwards Pilot disembarks. Vessel proceeds outwards to fairway buoy, listening out for Nakhodka Port Control on Channel 12 until passing No. 1 Buoy.

Bulk Cargo Facilities: There are 2 large loaders on the Berth, rated at 2,000 tonnes per hour, self trimming. We loaded Soviet bituminous steam coal, SF given as 42, but no real check possible on this figure. Vessel loaded 55,000 tonnes in 32 hours., and would have been even faster, but for plant breakdowns. Shore cargo personnel helpful as possible, but somewhat limited due to language problems. Informed by them that cargo delays are common due to availability of cargo lacking. All coal brought by rail to port from some considerable distance. Draft and deadweight survey carried out by shore foreman and ship's staff. Cargo documentation and port clearance by Authorities takes about 4 hours, from time of finishing loading.

Density: Density range of water from 1025 to 1028.

Regulations: Many regulations are in force as is common with most Russian ports, below are listed some of the most important ones.

1. Soviet currrency must not be brought in or out of the country.
2. No goods may be imported or exported without permission of Customs.
3. No goods may be taken ashore and sold or brought aboard concealed from Customs Control, as this will be construed as smuggling and heavy fines will be imposed.
4. No dumping of rubbish or pollution of any kind may take place into the harbour waters.
5. All moorings to be fitted with rat guards.
6. Only one gangway to the shore. No ladders to be put out on off side, and off side to be lit by lights at night.
7. No boats to be swung out or lowered.
8. No swimming or fishing allowed whilst alongside.
9. Ship's radio station not to be used in port and VHF not to be used for other than official messages with Shore Authorities or Marine Authorities.
10. Radar must not be used alongside. If radars are to have maintenance carried out by ship's staff, Inflot should be contacted for permission to be granted by Shore Authorities.
11. No photography is allowed.
12. No persons other than the ship's crew and fare paying passengers to be on board at any time. All shore personnel coming on board must be vetted by the Authorities.

SHIPMASTER'S REPORT: March 1984 (Updated 1988).

Vessel loaded coal for Japan.

The Coal Jetty is modern with a conveyor system and 2 moving shiploaders fitted with excellent trimmers. Several delays occurred.

In addition to the coal jetty, which is numbered 49 and 50, there is a container terminal, Berths No. 6, 7 and 8 and a timber wharf, Berth Nos. 10, 11 and 12 where logs of coniferous trees are loaded. Berth No. 9 is for small passenger vessels.

Documents prepared were as follows:
Customs Lists
Money/Currency List showing each crew members balance
Money/Currency List in Master's possession
Camera List (very important)
Passenger List (if no passengers state "Nil")
List of Narcotics
Arms and Ammunition List (state "Nil" if nothing on board) and List of Vessel's Port of Calls within the last year.

The Quarantine Doctor asked for Vaccination List, but these were not available on board vessel as several vaccinations concerning the crew had already expired. No difficulties occured because of this and it seems not to be compulsory.

All Authorities and Inflot Agent came from Nakhodka, the Agent was the only English speaking person and acted as interpreter.

SHIPMASTER'S REPORT: May 1984 (Updated 1988).
Port of Nakhodka and Vostochny (English translation of Vostochny is Eastern).
Chart: B.A. Chart No. 3041.
Arrival: Prior arrival Agents will instruct vessel to proceed to position Lat. 42° 27.2′ N., Long. 132° 56.3′ E. and steer a course of 000° true, which is the Southern entrance to Separation Zone. Also Agents require state of crew health.

As vessel passes Buoy No. 1 Master must report same to Nakhodka Port Control on Channel 16 transferring to Channel 12, at which point vessel will be radar controlled to anchorage, Port Control gives vessel course to steer and anchorage position, vessel remains on Channel 12 and instructions passed to vessel regularly. Even to number of cables to anchorage position, at which time vessel is instructed to drop anchor. If berth is available vessel proceeds to Buoy No. 2 as instructed and onto Fairway No. 3 along which the Pilot will board quite close to Entrance Buoys of the Bukhta Vrangelya (Vostochny Port).

Vessel berths port side alongside assisted by 2 tugs, head inwards, pier well fendered with large hard double rubber fenders (size 1 m. long by 0.5 m. deep and high). Normal securing to berth namely 4 lines and 1 spring each end. Rat guards are required and must be fitted prior to Quarantine Clearance.

On berthing 2 guards are placed at bottom of gangway and Agent boards with 2 Quarantine Officers, 2 Customs Officers and 2 Immigration Officers.

The following papers are required and best to give Agent all documents to sort out:
5 copies General Declaration (IMO Form 1).
5 copies Crew List (IMO Form).
3 copies Passenger List ("Nil" returns required if no passengers).
2 copies Vaccination List (Cholera and/or Yellow Fever).
*2 copies Crew Effects Declaration.
*2 copies Crew and Ship's Currency Declaration.
*2 copies List of Cameras with type and serial Nos.
2 copies Drugs in Master's Safe.
1 copy Ship's Stores List (Bond, etc.).
1 copy Parcel List ("Nil" return required).
1 copy Delivery Bill of Mail ("Nil" return required).
1 copy Declaration of Arms/Ammunition List ("Nil" return required).
1 copy Maritime Declaration of Health (Japanese form accepted).
4 copies Cargo Declaration (if cargo onboard).
*One of each taken ashore, other copies stamped and retained onboard for clearance check before sailing.

Ensure crew declare all goods, watches, radios, firearms, gold, jewelry, etc.

All Discharge Books checked by Immigration, Customs have random check on cabins. Quarantine only check Derat Certificate and Vaccination List. Note *all* types of "magazines" are forbidden and must be collected and sealed up before clearance.

When all paperwork is completed and Officials leave vessel taking Discharge Books ashore and clearance is given, cargo work can commence after draft survey. Discharge Books are returned to vessel after a few hours and are required to be handed to the gangway guards when any crew go ashore, even to read the draft.

Draft Surveyor checks everything and quite thorough, even with hold cleaning. Once surveyor has completed he arranges cargo operations to commence as per ship's instructions.

Vessel loaded two grades of coal:
1. Partizensky (J-6) 40,000 tonnes.
2. Nerjungrin (SS) 15,000 tonnes.

At consignee's request cargo was loaded with 20,000 along bottom, then 15,000 of SS and complete with 20,000 J-6 on top. Reason being the 15,000 SS was very powdery and mixed would be easier to discharge. This entailed a draft survey at the end of each layer of coal. Loading rate up to 1,200 tonnes/p.h. per loader.
Details of Berth, Loader Etc.:

Berth: A pier built out from shore with length of 400 m. and width 56 m. of which only 340 m. is used for mooring. Depth of water at forward end of vessel 16 m. and at pier end about 18 m. Max. draft allowed 15 m. Cement constructed at pier of 10 cement pontoons driven into sea bed on each side, with horn bollards on top of each pontoon (2 bollards). Then double horizontal rubber fenders on face.

Loader: Two units, travelling type with elevation boom, has outreach from fender face of 28.2 m. and airdraft of 18 m. Telescopic head Spoon or Fast Belt.

Belt Conveyor: Two belts from yard to pier at 180 m. per second.

Stocks: Two yards approx. area each 730 m. by 45 m. and plenty of stockpiles.

Max. Size Allowed: 100,000 d.w.t. (LOA 300 m., beam 43 m. and draft 15 m.).

Steam Line: On quay for ice melting.

Yearly Production: 6.2 million tons per year.

Future: Increase production by 5 million tons when other side of pier is developed as presently no loaders, although pier is complete in all respects.

Stowage Factor of Coal: About 42 cu.ft. per ton.
Bunkers: Available ex-coaster.
Fresh Water: Available ex-barge from Nakhodka (very expensive).
Stores: Not available.
Shore Leave: Allowed between 0800 hrs. and 2400 hrs. (Master not restricted). There is nothing to see at Vostochny but 1 hour by car/mini bus to Nakhodka where a Seaman's Mission and export shop are located.
Time: GMT plus 10 hours. Between 1st April and 1st October GMT plus 11 hours.
Radio Station: Nakhodka Radio used. 8510 kHz call sign "UKK3" and 500/435 kHz call sign "UK1" and answered first call. Other frequencies as per Radio Station Signals Vol. 1.
Tugs: Two tugs used of about 1,000 h.p. and 2,000 h.p. (Local Regulations require any vessel berthing to use 2 tugs).
Pilot: 24 hour berthing allowed.
Agents: "Inflot" are available on demand, visit the vessel at least once a day and are very helpful.
Cargo Weights: This is done by electronic weights scale ashore and on draft surveys. Weights in each hatch are not correct, as seen from our Facts Sheet vessel same quantities each run, yet time in each hatch varied from 40 minutes to 90 minutes for same quantity. Final draft survey agreed with ship's figures which were used for Bill of Lading (ship only signs "Mate's Receipt").
Other Berths: Across bay are 3 general cargo berths and 3 container berths with a maximum draft allowed of 9.7 m. Gantries are only suitable for the smaller container vessel of about 1,000 boxes.
Departure: Once cargo completed all paper work done on vessel, Agent attends to cargo papers after which Customs and Immigration board. Immigration check each crew member with Discharge Book photograph, Customs check bond seal and break it. Apart from papers given to Master they require a Cargo Declaration (IMO Form) completed. Ship has to request a Port Clearance, otherwise none is given.
Stevedores: Continuous working of cargo with meal breaks between 0700 – 0800 hrs., 1200 – 1300 hrs., 1900 – 2100 hrs. and 2300 – 2400 hrs.
Sailing: Once vessel clear of berth vessel is swung 90° to port and lined up between Entrance Buoys at which time Pilot disembarks and vessel reports to Nakhodka Port Control who advise course to steer and watch you on radar until passing Buoy No. 1. Then vessel steers 180° until clear of separation scheme.

SHIPMASTER'S REPORT: August 1984.
Vostochny Approach.
B.A. Chart Nos. 2511, 3198, 3041.

The main port of Nakhodka handles all traffic routing inside the bay. Contact Nakhodka Traffic Control on Channel 12 not less than 2 miles prior to arrival Buoy No. 1, Control will give you anchoring position and course to steer. When approaching anchoring position Control gives you run down and distance to go for dropping anchor.

Officials board at anchorage (6 people). When vessel is cleared listen on Channels 16 and 12 for berthing instructions. When berth is free, Control informs you to heave up and proceed towards berth.

Vostochny Pilot (Channel 16) boards at Fairway Buoys off berths. 2 tugs assist berthing. Buoys have no numbers but mark the entance to Vrangelya Bay, where coal berth is situated. We berthed Berth No. 49, port side to. Depth at berth is 16.5 m., max. draft 15 m., airdraft 18.4 m. Max. ships size 260,000 d.w.t. (100,000 tonnes), beam 38 m. Loading rate 3,000 t.p.h. by 2 loading booms. This rate depends on availability of coal. Most of cargo comes from Siberia and requires 10 days passage from mines.
Vostochny Facilities: Fresh water available on jetty, use you own hose and coupling. Fuel and diesel available by barge. Ship chandler if required, also hospital and dental treatment available. Shore leave is by mini-bus or launch to Nakhodka. The mini-bus can only carry 10 people and the journey by launch takes approximately 75 minutes. An International Seaman's Club, souvenir shop and 4 restaurants are available at Nakhodka.
Documents: We made out our own forms which included:
6 copies Crew List.
2 copies Stores List.
2 copies Crew Declaration.
2 copies Currency List.
2 copies Dangerous Drugs List.
2 copies Passenger List.
2 copies Arms and Ammunition List
6 copies Notice of Readiness.
1 copy Port Health.

Any health forms will do, score out country of origin, they provide you with "Inflot" Agency Information Form.
4 copies General Declaration (IMO Form 1).
2 copies Cargo Declaration (IMO Form 2).

On completion of loading, Officials board for documentation of cargo loaded. When this is finished the Agent arranges for the Pilot via VHF. The Pilot takes vessel out of berth, using 2 tugs. Vessel proceeds, assisted by Port Control towards Buoy No. 1 off Mys. Krylova.

AUTHORITY: The Port of Vostochny Authority. Postal address: P.O. Box Vrangel-1, Port of Nakhodka Area, Primorsky Krai, 692907 USSR.
Tel: 3-71, 2-71. *Cables:* Port of Vostochny.

AGENT: See "Nakhodka".

VYBORG: 60.42 N. 28.44 E. (See Plan)

For Saimaa Canal see Index.

GENERAL: A Baltic Sea port Vyborg is situated at the head of the Gulf of Vyborg in the N.E. part of the Gulf of Finland.

The port area consists of a harbour protected from the North by the Castle bridge passing over the strait nearby the Castle of Vyborg and by the Smolyanoy point – from the West.

The port is open for navigation all year round (from December till April with icebreaker assistance). Ice in the Gulf of Vyborg begins to form normally about the middle of November. The Gulf usually becomes frozen over by the middle of December and the last ice finally disappears in April.

Whilst tidal range in the Gulf of Vyborg is of small account, considerable changes in the water level may be caused by strong winds (up to 1.6 m.), variation in atmospheric pressure (up to 1 m.), and the seasonal increase of the amount of water brought down from the land. The rise of the water level is usually caused by South, S.W. and sometimes by North winds. The maximum range of the water level in the Gulf is about 2.0 m.

The Vyborg Fairway (least depth 7.3 m.) leads from the entrance to the Gulf of Vyborg across the Transund roadstead up to the entrance of the Inner Vysotsky Roads. The Vyborg Sea Channel (least depth 6.5 m.) leads from the Inner Vysotsky Roads into the port, situated at the head of the Gulf. Both of these and the Fairway and the Channel, are open for navigation any time of day or night.

PORT LIMITS: The sea waters of the port are the fairways and anchorages to the East from 28° 23′ E. and to the North from 60° 34′ N.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilotage in the port area is carried out round the clock. It is compulsory for all types of vessels. Pilots board and disembark vessels in the following places:

1. At the port of Vyborg;
2. At the Reception Buoy, 5.1 cables Westward of the Northern point of the Mayachny Island (pilot station of the Vikhrevoy Island);
3. At the Brusnichnoe Lock berth or in the Lock itself.
4. At Kozliny Island (60° 26.7′ N., 27° 43.0′ E.) for the vessels proceeding to or from Finland only.

In the case of rough weather when safe boarding or disembarkation of a Pilot at the Reception Buoy of the Vikhrevoy Island pilot station is impossible, a vessel, with the Master's consent, may follow a pilot boat, in the wake of it from the Reception Buoy up to the Large Transund Roadstead or as the case may be, from the Large Transund Roadstead up to the Reception Buoy.

The radio communication between pilot boat and vessel is effected through VHF radio, Channel 12.

In case the Master of a vessel does not agree to follow a pilot boat, he can:

(a) When approaching the port from the seaward lie at anchor at the Reception Buoy area until the weather changes for the better;

(b) When leaving the port for sea, anchor at the Large Transund Roadstead at a place indicated by the Port Administration and wait until Pilot is able to disembark at the Reception Buoy area.

Vessels approaching the port from seaward should order a Pilot at the same time as they notify the Port Administration of the time of their arrival at the point of meeting a pilot boat.

ANCHORAGES: There are 5 anchorages at Vyborg Fairway and at Vyborg Sea Channel areas.

Two are situated at the Large Transund Roadstead area, one – at the Small Transund Roadstead, one – S.E. and one – N.W. of the channel. Anchorage positions are shown on the chart.

The holding ground in the anchorages is sand, mud, stone and clay. The depths are from 11 m. to 17 m.

RESTRICTIONS: Vessels are allowed to enter or leave the port when winds do not exceed Force 6. During daytime, when a vessel's length is not more than 125 m. and her draft does not exceed 6.5 m. (at the Kronstadt datum);

At night time, when a vessel's length is not more than 105 m. and her draft does not exceed 6.1 m. (at the Kronstadt datum).

Before entering or leaving the port Masters of vessels having length and draft exceeding those indicated above must obtain the Harbour Master's permission.

HEALTH: International code quarantine signals to be shown on arrival. Vessels placed in quarantine will be instructed where to anchor by the pilot station.

RADIO: Radio contact can be established through the Vyborg Radio port radio station operating 24 hours daily on the following frequencies:

Call Sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
UNN	500	500	A1A	H24
"Vyborg Radio"	156.8*(16)	156.8*(16)	F3E	H24
(Harbour Master)	156.6*(12)	156.6*(12)	F3E	H24
"Ostrov Vikhrevoy"	156.8*(16)	156.8*(16)	F3E	H24
(Pilot Station)	156.6*(12)	156.6*(12)	F3E	H24
"Zaliv Novinskogo"	156.8*(16)	156.8*(16)	F3E	H24
(Pilot Station)	156.6*(12)	156.6*(12)	F3E	H24
"Vyborg Inflot"	156.8*(16)	156.8*(16)	F3E	H24
(Inflot Shipping Agency)	161.8*(24)	157.2*(24)	F3E	H24

*Frequencies are given in MHz.

Every vessel whilst proceeding along the Fairways and the Channel must have VHF radio-telephone in good working order, being able to ensure a reliable radio contact with the port of Vyborg and between vessels. If a vessel is not equipped with VHF radio, a Master can hire a VHF portable radio-set from a pilot station (via Pilot) for a fixed charge.

TUGS: Available, ordered through "Inflot". Compulsory for vessels over 80 m. LOA.

BERTHING: Can only be effected with Pilot on board. Berths of the port with depths alongside of up to 7.8 m. are equipped to handle general and bulk cargoes, timber, etc., as well as passenger traffic. There are enclosed warehouses and open concrete floor sheds.

Berths are equipped with electric cranes of up to 20 tons capacity. There are floating cranes of up to 15 tons capacity and other cargo-handling equipment and machinery.

Opening and closing of hatches is usually done by the ship's crew, but if required it can be done by port labour for vessel's account.

MEDICAL: "Inflot" to be advised in advance if any medical attention required.

DENSITY: Salinity 5%.

FRESH WATER: Available. Can be supplied by pipe-lines at all berths or delivered by barges.

FUEL: Available by barge only.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Usually opened and closed by crew. Can be operated by stevedores on request.

CUSTOMS ALLOWANCES: No control on board the vessel. All items taken off vessel subject to Customs control.

REPAIRS: Minor repairs can be effected.

SURVEYORS: Surveyors and Cargo Inspectors may be ordered through "Inflot" Agency or through Cargo Receivers' Agents V/O "Soyuzvneshtrans" (telex 121 541).

TIME: GMT plus 3 hours from 1st October until 31st March, GMT plus 4 hours from 1st April until 30th September.

HOLIDAYS: Cargo operations can be carried out on all holidays.

TELEPHONE: Connection to vessels is not possible.

SHORE LEAVE: Permitted subject to police control.

BANKS: Vneshtorgbank in Leningrad.

EMERGENCY CO-ORDINATION CENTRE: Salvage Division of the Baltic Steamship Co., Leningrad. Tel: 259-03-55, 216-99-65. Telex: 121 501.

STORING: Under Customs control from trucks alongside at the berth. Bunkers from a tanker or from trucks.

DEVELOPMENTS: Three berths at Vysotsk of total length of 360 m. and draft 7.5 m. are under construction.

Dredging and deepening to take place to allow vessels of 12,000 d.w.t. to enter.

AUTHORITY: The Port of Vyborg Authority, Ulitsa Yuzhny Val 1, 188900 Vyborg, U.S.S.R. *Tel:* 24750, 99677. Harbour Master *Tel:* 20477, 99650. *Contact:* V. Abramov, Harbour Master of Vyborg Sea Port.

AGENT: The Port of Vyborg Maritime Agency "Inflot". Postal address: Inflot, P.O. Box 40, Vyborg, U.S.S.R. Cables: "Inflot Vyborg". Tel: 21400, 21735, 24818. Telex: 121521 Infl Su.

YALTA: 44.30 N. 34.12 E. (See Plan)

GENERAL: An ice-free Black Sea passenger and commercial port, Yalta is situated at the head of Yalta Bay and on the Southern coast of the Crimea Peninsula.

The port is open for navigation all the year round.

The port is formed by a harbour protected by a mole. Depths in the harbour are up to 10 m.

Yalta is a passenger port.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilot meets vessel in the Outer Roads, at a distance of 2.0 miles S.E. of Yalta Lighthouse.

ANCHORAGES: The port Outer Roads are situated in Yalta Bay:

E.S.E. 7 cables off the head of the mole with depth of about 30 m.

They are open to winds blowing between E.N.E. and S.W. At times vessels may be turned broadside to waves caused by Southerly winds.

The bottom is mud and sand.

RESTRICTIONS: Vessels may enter or leave the port at any time of day or night. Vessels entering or leaving the port must have keel clearance of not less than 0.6 m.

MAX. SIZE: Permissible draft is 8.5 m., length 215 m.

RADIO: Ship-shore radio contact can be established through the port radio station Yalta Radio operating 24 hours a day on the following frequencies:

Call Sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
UZD-9	500	500	A1	H24
"Yalta-Radio"	2182	2182	H3E	H24
"Yalta-2"	156.8* (16)	156.8* (16)	F3E	H24
(CPR)**	161.9* (26)	161.9* (26)	F3E	H24

*Frequencies are given in MHz.

**CPR – Central Port Radio Station.

TUGS: Tug assistance for mooring and unmooring is compulsory.

BERTHING: Handling of cargo at the passenger terminal is usually done by ship's cargo gear.

FUEL: Not available.

FRESH WATER: Can be supplied by pipe-lines at all berths.

REPAIRS: Not available.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

AUTHORITY: The Port of Yalta Authority, 5 President F.D. Roosevelt Street, Port of Yalta, U.S.S.R. *Tel:* 32-42-42. *Contact:* General Manager.

AGENT: Yalta Inflot Shipping Agency, at the Port of Yalta. Postal address: 5 President F. D. Roosevelt Street, 334201 Port of Yalta, U.S.S.R. Cables: "Inflot Yalta". Tel: 32-82-89. Telex: See "Odessa".

YUZHNY (Grigorevsky): 46.39 N. 30.55 E **(See Plan)**

PORT LIMITS: The water area of the port is the waters of Adzhalykskiy Liman and the sea area bounded by the arc of a circle with a radius of 2 miles from the coast radar station. (46° 36.04′ N., 31° 01.4′ E.) and anchorages No. 356, 357 and 358 on the Charts.

PILOTAGE: In order to reach the Port of Yuzhny vessel first has to proceed to position Lat. 46° 08′ N., Long. 31° 06′ E. (near port Ilyichevsk), one hour before arrival at abovementioned position Master should communicate with "Port Control Ilyichevsk, on Channel 16 or on R/T 2535 kHz and then follow the instructions of "Port Control" as further navigation is controlled by shore radar.

Gas-carriers and chemical-carriers shall follow a pilot boat when proceeding to and from the port. Master shall order a Pilot through the Port of Ilichevsk 72 hours and 24 hours before and confirm the order 12 hours prior to approaching the Port of Yuzhny.

The port is equipped by an automated Vessels' Movement Control System (VMCS).

ANCHORAGES: It is prohibited for ships to anchor in the inner roadstead.

Anchorages: No. 356 for gas carrying ships and is 3.4 miles S.S.W. and No. 357 and 358 are for other vessels, 1.7 miles South of the West entrance point of Adzhalykskiy Liman. The depth in Anchorage No. 356 is 14 m. to 21 m., and in Anchorage No. 357, 19 m. to 21 m. The seabed is sand, mud and shells.

The limits of the anchorages are shown on the charts.

RESTRICTIONS: The following vessels are allowed to enter port when conditions are as stated:

Gas and chemical carriers over 10,000 d.w.t. are not allowed to enter and leave the port in conditions of visibility of less than 0.5 miles.

Cargo vessels up to 180 m. in length – enter when conditions of visibility are not less than 3 miles, leave – not less than 2 miles.

Gas and chemical vessels having length over 180 m. – when the port's leading marks are visible from the crossing of the RR-1 and the imaginary line of the entering leading marks (bearing 013° – 193°).

MAX. SIZE: Ships up to 280 m. LOA. Draft limitation: No. 1 – 11.5 m.; No. 2 – 12.0 m.; No. 3 – 12.5 m. and Nos. 5 & 6 – 12.8 m.

HEALTH: The legislation of the USSR on protection of the surroundings and "Compulsory Rules of the port of Yuzhny" to apply.

Prior to arrival Master should send cable to INFLOT Yuzhny advising last port of call, place drinking/ballast water taken, whether vessel is equipped with sewage tanks or sewage purifying system. Any infectious diseases among the crew during the voyage.

RADIO: All cables to be sent through Odessa Radio.

VHF: Channel 16 used for calling vessels, call sign "Yuzhny Radio 17". Inflot Agency keeps watch on the same channel.

RADAR: Vessels are piloted by Shore Radio In and Out.

TUGS: The use of tugs is compulsory when mooring/unmooring. The number of tugs and their horse-power is determined by the Pilot with Master's consent, depending on weather conditions, tonnage and type of vessel. 3 tug-boats must be used during gas-carrier's mooring/unmooring if over 35,000 d.w.t.

BERTHING: On the West coast of Adzhalykskiy Liman Quay Nos. 1, 2 and 3 have been built. The general length of the quays are about 600 m. Quay No. 3 is for loading liquid ammonia and pumping superphosphorous acid.

A quay for auxiliary ships has been built on the North side of the East entrance point of the inlet. The length of the quay is 155 m. and the depth alongside it is 6.4 m.

MEDICAL: Port surgery is open round the clock for emergency cases, otherwise all medical treatment and vaccinations are done at Odessa.

FRESH WATER: Potable water available from berth and by barge.

FUEL: Delivered by barge. Longest possible notice is desirable. Stem through Bominflot in London. Telex: 23830.

REPATRIATION: Possible.

AIRPORT: At Odessa.

TIME: Local time is GMT plus 3 hours. Summertime (GMT plus 4 hours) is used from the 1st April to 30th September.

HOLIDAYS: 1st January, 8th March, 1st, 2nd, 9th May, 7th October, 7th November and 8th November.

SHORE LEAVE: Restricted for all crew members (except Master) till midnight. Shore passes are valid for port Yuzhny area only. For trips to Odessa special permission is required.

POLICE/AMBULANCE/FIRE: Through Agent.

TELEPHONES: For gas-carriers only.

GENERAL: Port Yuzhny is found in Adzhalykskiy Liman, and is 4.2 miles E.N.E. of Mys. Dofinovskiy. Berths No. 1 and 2 for Urea; Berth No. 3 for liquid ammonia and superphosphorous acid and Berths No. 5 and 6 for minerals and coal.

From seaward an approach channel, 1.6 miles long has been cut through. Leading light beacons lead along it. The least depth in the channel is 15.0 m.

The entrance to the port is protected by 2 moles: The Western about 400 m. long and the Eastern about 540 m. long. The moles are 6 m. wide.

Areas with special navigation systems: Off the coast there are areas in which navigation is temporarily prohibited; an area dangerous for navigation; Area No. 185, prohibited for anchoring and fishing, and Area No. 14 for bombing.

The limits of the areas are shown on charts.

Mys. Dofinovskiy: (Lat. 46° 34′ N., Long. 30° 55′ E.) lies 4.3 miles E.N.E. of Mys. Severnyy Odesskiy. Mys. Dofinovskiy protrudes insignificantly into the sea. Four cables West of the headland stretches the village of Novodofinovka, in which there are conspicuous white buildings.

Spoil Grounds: 1.7 and 2.5 miles East of Mys. Dofinovskiy a former spoil ground and a spoil ground are situated respectively. In these areas depths may be less than shown on charts.

A wreck with a depth 9.8 m. over it is situated 2.7 miles E.S.E. of Mys. Dofinovskiy. A light buoy marks the wreck with a depth of 9.6 m. over it.

Banks with depths of 7.6, 7.2, 8.4 and 9.4 m. are situated respectively 3.5, 3.8, 3.6, and 3.7 miles E.S.E. of Mys. Dofinovskiy. They are marked by light buoys.

A bank with a depth of 9 m. is situated 3.3 miles E.S.E. of Mys. Dofinovskiy.

Conspicuous Points: On the West coast of the entrance to the inlet in the village of Grigor'yevka is a conspicuous smoke chimney, and on the West coast of the inlet opposite the quays can be seen large metal reservoirs and towers.

Navigational Aids: The entrance to the channel and its edges are marked by light buoys. On the moles stand lights and beacons; on the East coast of the inlet there are leading light beacons.

Station: On the East entrance point to Adzhalykskiy Liman stands a coastal radar station. Radar pilotage is carried out under the direction of a Pilot. The pilotage is of a consultative nature. Responsibility for manoeuvres, fulfilling requirements of MPPSS-72 (International Regulations for Prevention of Collisions at Sea) and the navigational regulations of the port, rests with the Master of the vessel.

There is a signal post on the building of the coastal radar station.

Caution: Bearing in mind the possibility of the destruction of the edges of the approach channel, depths in it may be less than shown on charts.

Underwater Pipe-line: Runs in a S.W. direction from the village of Grigor'yevska. The position of the pipe-line is shown on charts.

Roadsteads: There are 2 roadsteads in Port Yuzhny: outer and inner. The outer roadstead is situated in the approaches to Adzhalykskiy Liman. The seaward limits of the roadstead are coincidental with the outer limits of the port. The depths in the South part of the outer roadstead are up to 22 m. The inner roadstead occupies the water area of the South part of Adzhalykskiy Liman opposite the quays.

Grigor'yevska Light Beacon: Stands 3.8 miles E.N.E. of Mys. Dofinovskiy. Appearance of the beacon: white round concrete tower on the upper part of which stands a black cylinder, the lower part of the cylinder becomes a truncated cone. Height of the beacon is 14.8 m.; height of the light is 60.1 m.

Vkhodnoy Leading Light Beacons: Stands on the East coast of Adzhalykskiy Liman and lead along the approach channel to Port Yuzhny. Its direction is 193° – 013°.

The front beacon stands 2.7 miles N.N.E. of the entrance to the inlet. Appearance of the beacon: 4-sided metal framework tower on which has been erected a black rectangular target with a white vertical stripe in the centre. The height of the beacon is 17 m.; height of the light is 47 m.

The rear beacon stands 6 cables from the front one. Appearance of the beacon: 4-sided metal framework tower, on which has been erected a black rectangular target with a white vertical stripe in the middle. The height of the beacon is 29 m.; height of the light is 69 m.

NOTICES: *Instructions for Gas and Chemical Tankers:* Vessel to proceed to position: Lat. 46° 08′ N., Long. 31° 06′ E. and from there to follow the leading pilot boat. Master to give directly to Ilyichevsk pilot station 48, 24 and 6 hours notice. One hour before arrival at the above position to contact "Port Control Ilyichevsk" by VHF or radio/telephone on 2535 kHz.

Pilotage having been accomplished, Master to cable the actual distance the vessel was piloted by the leader to Harbour Master Ilyichevsk, copy to Inflot to exclude errors in charges.

Instructions for Dry Cargo Vessels: Vessel to proceed to position: Lat. 46° 08′ N., Long. 31° 06′ E. 1 hour before arrival, vessel to contact Port Control Ilyichevsk by VHF or radio/telephone 2535 kHz and follow their instructions as they pilot by radar.

Please inform Ilyichevsk sea pilot station ETA at above position 48, 24 and 6 hours before arrival.

General requirements for ships loading bagged urea:

Max. beam 26 m.

Min. d.w.t. 5,170 tonnes. Max. d.w.t. 32,500 tonnes.

Max. distance from hatch opening to ship's side – 6.0 m.

Max. height from hold bottom to hatch covers – 17.0 m.

Min. height of cargo compartments – 3.0 m.

Min. size hatch openings – 7.0 m. × 10.0 m.

Vessel to be equipped with gear for loading spare bags and dunnage.

No cargo is loaded into deep tanks, lockers or other compartments where the loading machine cannot operate normally.

Ship's holds must be free from any obstacles such as shaft tunnels, pillars, etc.

Draft limitation – 11.5 m.

Cargo tallied automatically at the loading plant.

In the holds delivery very fast. No tallymen available.

The figures can be checked by the USSR Chamber of Commerce Messrs. Torgprompalata Moscow Telex No.: 411126. We suggest you should contact them directly.

VERY IMPORTANT:

All holds must be dry, clean and free from remnants of previous cargo.

Failure to comply with the above may cause significant losses and/or non-acceptance of the ship.

It is customary for shippers to accept Notice of Readiness retrospectively on berthing from date and time the vessel was granted Free Pratique if she has to wait at anchorage, provided she complies with the above requirements.

General requirements for ships loading bulk urea:

Min. d.w.t. 5,170 tonnes. Max. d.w.t. 32,500 tonnes.

Max. beam 26 m.

Max. distance from ship's side to hatch coamings – 20.0 m.

As there are no trimming facilities, wing tanks with the slip angle of not less than 30° relative to deck line should be available to provide self-trimming in the holds as cargo delivered in a vertical flow.

Draft limitation – 12.0 m.

Vessel must be fit for grain transportation. The stability information booklet should provide an approved cargo plan for the quantity to actually be loaded.

All holds must be dry and clean and free from rust and/or remnants of previous cargo. Failure to comply with the above may cause significant losses and/or non-acceptance of the ship.

It is customary for shippers to accept Notice of Readiness on berthing retrospectively from date/time vessel was granted Free Pratique if she has to wait at anchorage, provided the ship complies with above requirements.

IMPORTANT: To obtain Harbour Master's clearance outwards, all maximum estimated expenses of a seaworthy ship should be prepaid and further reimbursed when the accounts are fixed after ship's departure, hence it is essential that sufficient funds be received by the Agent as soon as possible and imperative prior to completion.

REGULATIONS: The following are some of the port regulations. The numerals have no significant meaning.

1. Gas carrying ships proceed into port and leave it in company with a fire tug, which goes ahead of the gas carrying ship at 8 – 10 cables and will notify on VHF radio all ships of the necessary measures and precautions to be taken.

2. In the port there is a control office for regulating ship movements. Ships entering the port, request permission for entry 2 hours before, and ships leaving the port, 30 minutes before.

3. Pilotage for all ships is obligatory.

4. Pilotage for ships into Port Yuzhny begins at position: Lat. 46° 31′ N., Long. 30° 57′ E.

5. When a gas carrying ship is entering or leaving the port the entry or exit of other ships is prohibited.

The mooring of any kind of floating object to the side of a gas carrier while it is at Quay No. 3 is prohibited.

6. The max. draft for ships proceeding into Port Yuzhny is 14.2 m.

7. The max. speed for ships in the channel is 6 knots, but in the inner roadstead it is 4 knots.

8. The movement of ships in the channel is only in one direction.

9. The mooring of gas carrying vessels and vessels carrying chemicals is carried out with the aid of not less than 3 tugs, the power of 2 of which must be 882 kV (1,200 l.s.) and one 1,692 kV (2,300 l.s.). Leaving the mooring is carried out with the aid of not less than 2 tugs of which one has a power of 1,692 kV (2,300 l.s.) and the other 882 kV (1,200 l.s.) The wind speed when mooring and leaving moorings must not exceed 7.0 m./sec.

The mooring of gas carriers of more than 20,000 d.w.t. is carried out with the aid of 3 tugs; the power of each of them must not be less than 882 kV (1,200 l.s.). Unberthing will be carried out with not less than 3 tugs with the same power. The speed of the wind during mooring and leaving moorings must not exceed 10.0 m./sec.

10. Communication between tugs and ships will be carried out on VHF radio on Channel 6.

11. Communication with ships is carried out on VHF radio on Channel 11, call on Channel 16. The VHF call sign for Port Yuzhny is Port Control.

12. During the mooring and un-mooring of gas carriers from the quays, a representative of the Odessa Port Factory, military guard, office of the Harbour Master and also an inspector of the port will be present.

13. Mooring at the quay, moving on a quay or leaving the quay are to be carried out under the directions of a Pilot.

14. When the speed of the wind is above 12 m./sec., the moving of gas carriers along the quay is prohibited.

15. Navigation of ships along the channel, of not more than 20,000 tons displacement is permitted without tugs when the wind speed is less than 12 m./sec. and the cross current has a speed not more than 0.5 m./sec.

Entry to the channel when visibility is less than 0.5 miles is prohibited.

When there is a strong cross current or current along the channel, tugs will lead ships into the approach channel.

The mooring of ships at the quay will be carried out in the following manner, after the tugs have turned the bows towards the exit and parallel to the quay at a distance of 80 m. – 100 m. from the quay, the tugs, maintained the plane of the ship parallel to the quay, and will move the ship towards the quay. The speed of approach must not exceed 10 cm./sec.

The ship moorings will be carried ashore by launches. From the bows and stern 2 nylon mooring ropes of not less than 200 mm. (8 in. circumference) are to be used.

16. The main engines of gas carriers must be in constant readiness to move the ship during the whole period in the port.

When gas carriers are entering the port and also when leaving it, all other ships must observe precautions and not hinder its movement or its chosen route. These ships must not close a gas carrier within a distance of 10 cables.

The fire fighting tug on duty keeps a round the clock watch on VHF radio Channel 16.

The use of steel moorings on gas carriers is prohibited.

The Harbour Master of Port Yuzhny has the right to depart from the present position on questions connected with the safety of mariners.

Lack of knowledge of the requirements of the present temporary obligatory regulations established for the port will not absolve the Master of a vessel from responsibility for non-observance of these regulations.

SHIPMASTER'S REPORT: September 1979 (Updated 1988).

Vessel: 32,000 g.r.t. LPG Carrier.

General: This port is situated on the Western bank of what was once Lake Ajalik, about 0.5 miles from the entrance to the bay. The port has been created by dredging the barrier that separated the lake from Odessa Bay. On BA. chart 2212 this entrance is situated about Lat. 46° 35.6′ N., Long. 31° 00.4′ E. Breakwaters of prefabricated concrete sections extend about 500 m. into the bay, and the approach channel is marked by conical buoys and pillar buoys for a distance of about 2.5 miles beyond this. The approach channel lies on an axis of about 010°T – 190°T. Depth in this channel were not less than 16 m. by ship's echo sounder, both on entering and leaving.

The small town of Grigor'yevska is marked on BA. 2212. Lake Ajalik is not marked on this chart.

The port has been created to serve the massive and newly constructed chemical plant on the Western shore of the lake. At the time of this visit it consisted of dry bulk handling berths of about 700 m. in length, and a liquid handling facility for the discharge of superphosphoric acid and the export of anhydrous ammonia. The liquid handling berth lies to the North of the dry berths, about 0.8 miles from the breakwaters.

There are plans to create dry cargo berths on the Eastern shores of the lake, immediately inside the entrance. Some work is already in progress.

Vessels of up to 12 m. draft can be handled and there are 3 medium sized tugs available.

The chemical plant is not yet fully completed, a second stage has only been operating since the beginning of this year. In 1980 there are plans to export 2 million tons of ammonia.

Agents: "Inflot" may be reached on Channel 16, with a working Channel 8 available.

Berthing: Vessel berthed starboard side alongside, swinging immediately South of the berth with the aid of 2 tugs (the third was late in arriving) moored fore and aft, port side.

The berth itself consists of a concrete jetty projecting from the main jetty, some 110 m. in length and about 40 m. proud of the main jetty.

There are 5 Chicksans, 2 for the discharge of acid, and a group of 3, 2 liquid 1 vapour return, for the loading of ammonia. The Chicksans have hydraulic couplings and appear to be of an awkward size, about 325 to 330 mm.

On this visit there was only 1 liquid line available for use together with the vapour return line. Claimed loading rate is said to be some 2,000 tonnes p.h. With the 2 liquid lines in use, this would indeed be possible. Our overall load rate was 1,115 t.p.h., including initial and final slow rates. During loading hourly rates in excess of 1,500 t.p.h. were maintained.

Communications with the plant operators was quite good but obviously hampered by language. There were no problems with slowing down for topping off.

Samples: Were taken on arrival and at several times throughout the loading, sample cock on Chicksans.

Fresh Water: Available from the jetty.

Fuel: May be supplied and arrives by barge. Bunkering cannot be undertaken whilst loading cargo and on this call the bunkering had to be completed before being allowed to load, despite this leading to a big delay.

Moorings: Three lines, 2 breast and 2 springs, fore and aft. Ratguards must be fitted. Mooring boat in attendance.

No problems with landing gangway on the quay and it may be turned out quite safely before arrival alongside.

Guards: On the quay, 1 at the gangway (Discharge Books required before being allowed to read drafts, etc.) and 1 each end. At night there was a 'guard' boat lying off our port side.

Officials: Polite and quite firm.

Documents required:

5 Copies General Declaration. (ship's particulars, etc.).
4 Copies Cargo Declaration.
2 Copies Crew Effects.
4 Copies Crew Lists.
4 Copies Passenger List.
2 Copies Crew Currency Declaration.
1 Copy 'Clean' Ballast Declaration.
1 Copy Sanitary Declaration.
No certificates were sighted.

Shore Leave: Granted until 2400 hrs. Masters allowed unlimited shore leave.

Toilets/Pollution: Vessels not fitted with sewage treatment plants must seal their toilets and use the shore facilities at the end of the quay. A statement to this effect must be signed.

A very strict control of pollution of all types is maintained and this includes ALL drainings from the maindeck. Scuppers must remain plugged right up to the moment of departure. Hoses used to de-ice the liquid line must NOT be allowed to drain overside.

Papers: Allow at least 3 hours for paperwork before and after working cargo.

Cargo Lines: Were blown through by the shore plant on completion of loading. Vapour return lines was used throughout and there is no charge for its use, vapour apparently being returned to the shore tanks.

Cargo loaded was at about −32°C.

SHIPMASTER'S REPORT: October 1980 (Updated 1988).

The following is an update of the September 1979 report above.

General: The port has been developed East of Odessa to handle overspill from Odessa and to develop bulk handling facilities.

In about 10 years in terms of tonnage handled, it is expected to be the largest in the Southern U.S.S.R. open to overseas vessels.

It has been in operation for 2 years and is 0.6 miles East of Grigoryeko light.

The port has been constructed from a fresh water lake. West Breakwater Head is in position Lat. 46° 35.80′ N., Long. 31° 00.70′ E. East breakwater head is in position Lat. 46° 35.80′ N., Long. 31° 01.03′ E. The port extends at present to the bulk liquid ammonia berth in position Lat. 46° 37.08′ N., Long. 31° 00.80′ E.

Port regulations are at present in Russian only, and English text should be available shortly (October 1980).

Approaching the Russian coast soundings once the 100 fathom bank has been crossed tend to be flat and give little indication of position.

The outer separation scheme buoy was observed on radar at 9 miles and visually at 7 miles.

The coast is identifiable on radar at 30 miles.

D/F beacons are generally reliable and as ALRS, out of 12 checked in September 1980 3 were not operating on the West coast of the Black Sea.

Notice:

	72 hours	*48 hours*	*24 hours*	*6 hours*
Agents:	Inflot Yuzhny	*	*	
Shippers:	Vneshtrans Yuzhny	*	*	
Charter:	Sovchart Moscow	*	*	
"	Sovchart Paris	*	*	
Pilot:	*	Inflot Ilyichevsk	*	*
"		Ilyichevsk Seapilot Station	*	*
Port:			*	*

Note: All through Odessa Radio.
*Denotes repeat message where indicated.
"Vneshtrans" is cable address for 'Sojuznestrans' shippers.

Pilot: Order Sea Pilot Ilyichevsk as notices.

Contact by VHF Channels 16 and 14 about 15 miles away from turning buoy.

Pilotage compulsory from port. Pilot speaks reasonable English and requires about 13 knots.

If anchoring at Yuzhny anchorage, he positions vessel under control from Yuzhny Radar Station position Lat. 46° 36.05′ N., Long. 31° 01.3′ E.

On departure the Harbour Pilot leaves the vessel in the anchorage area and the sea pilot cutter 'Bravvy' guides vessel down channel to 'Ilyichevsk' turning buoy, his speed is 11 knots.

Anchorage: For large LPG ships Anchorage No. 356 is used, centred on Lat. 46° 32.5′ N., Long. 30° 58.25′ E. with a radius of approximately 0.6 mile.

Depth 20 m., bottom mud and sand. Density 1024.

All anchoring is under control of Yuzhny Radar Station which gives the Pilot directions.

Berthing: There is no night berthing or unberthing, for gas carriers although the buoyage and leading lights are lighted, this seems to be for dredgers working. It would seem the hours are 0800 to 1700 hrs. (with possible extension in Summer months) with no vessels in the harbour or channel underway before or after these times. (We made it outwards in 12 minutes (Oct. 80)).

Visibility must be over 4 miles before berthing or unberthing operations take place. It may seem clear out at the anchorage but the weather in the harbour can be very different. This has been borne out from observations. We noted a temperature rise of 8° Celsius in 1 hour whilst moving out of port to anchorage.

Channel: The channel width is 118 m. and least depth of 14 m. (Checked by echo sounder). Pilots advise that there is a patch of 13.5 m. but this was not found. Bottom sand and mud. The shape is in the form of a 'V' so it is necessary to keep to centre of channel.

Buoys commencing seawards at Nos. 13 (starboard) and 14 (port) terminate in the harbour itself at Nos. 3 and 2.

The leading line is 013° to 193°.

Buoys (entering), black to starboard and red to port with Fl. W. & R. lights respectively. Channel length 1.3 miles from breakwater heads.

South of the channel are two shoals one 1.6 miles S.S.W. marked by 2 white pillar buoys Fl. W. and isolated by 1 white pillar buoy about 1.5 miles S.W.

Confused cross currents from wind and the rivers emptying out nearby are apparent. Generally the surface current is Westward and sub-surface Eastward. Apart from causing navigation problems these currents cause much silting up.

Vessels enter the channel from the anchorage between the 2 shoal areas on an approximate course of 080° then turn hard to port when in line with the channel to bring leading lights in line before entering channel. On leaving much the same is done, except a more Easterly course is resulted.

In the harbour itself in calm conditions there is a noticeable Southerly current of 0.5 knots.

The dredged channel at present terminates just astern of the ammonia berth marked by 2 buoys.

Leading marks, white and orange in colour are situated on raised ground N.E. of the harbour, and at night exhibit fixed white lights under which are neon-like strip green lights.

Vessel is swung short round to port off ammonia berth, berthing starboard side to head out. On fertiliser berths there seems to be no accepted side to.

The breakwaters consist of concrete blocks piled haphazardly on top of one another. Immediately to the East are the ruins of 2 other small breakwaters. At the foot of the Eastern breakwater there is a large concrete radar and Port Radio Control Tower. This is conspicuous in good visibility but would benefit from being painted white or orange to assist identification in conditions of haze which seem to be prevalent.

Just below this tower on the harbour side is a small boat pier for use of Port Authority craft.

The harbour offices themselves are in a large concrete building at the Southern end of the fertiliser quay where Customs, Agents, police, doctor, chandler, etc., reside.

Tugs: Four tugs are available. All ship's lines. 2 of 5,000 h.p., 1 of 2,500 h.p. (Tigris) and 1 of 1,200 h.p.

All tugs have icebreaking capability.

It is essential that the larger tugs have double lines. They use the lines out of the centre lead bow and stern with the 1,200 h.p. tugs pushing.

Outwards (October 1980) we dispensed with 4,500 h.p. tug's services and used 1,200 h.p. tug to tow us.

Tugs accompany vessel down channel to anchorage area.

Berths: Gangway can be turned out beforehand.

The ammonia berth is 125 m. long and 43 m. (measured) proud of the main dock face, it leads in a 171° – 351° direction. The other berths are offset and leading in approximate 005° – 185° direction.

The fendering is excellent with long rubber tubes and corners well protected on all berths.

Bollards are plentiful.

Moorings: Ammonia berth 3, 2, 2, each end with bow/stern and breast lines leading to main dock face and springs to 'T' section.

Springs first out and last in.

As usual aft have to compromise. We put breast lines from main deck and springs from aft, both to 'T' section. Mooring boat in attendance, bow first docking and undocking.

Unberthing, vessel pulled laterally clear of berth, about 100 m., by tugs before moving ahead down harbour.

Loading: Ammonia: 2 loading and 1 Vapour Chicksan. Max. rate about 2,000 t.p.h. total (2×1,000 t.p.h.).

No charge for Vapour Return Line (VRL).

Shore personnel connect and disconnect.

Hydraulic couplings.

VRL ships 8 – 12 to shore 12 – 12 150ASA/300ASA.

Liquid shore spools 150ASA/300ASA.

No emergency stop except by watchmen in hut under Chicksans, who speaks little to no English. Essential whistle signal agreed.

On visit (Sept./Oct.) 1980 shore tanks were low on product with max. rate at 700 t.p.h. Sometimes down to 200 t.p.h.

Samples frequently taken from cock on Chicksan.

Temperature warm at −32° Celcius on all visits. Note protest.

Loading programme to be agreed before commencement.

Surveyor with interpreter, takes about 2 hours for figures. Plant has to be off whilst readings taken.

Acid: Forward (South) of ammonia Chicksans – 2 arms.

Shippers: 'Sojuznestrans'.

Statement of fact is compiled by the Master during loading on official form which is an advantage.

Tank atmosphere tested prior to commencement.

Purging or cooling alongside.

Plant: Total storage capacity 100,000 tonnes with about 18 tanks of 5,500 tonnes each. Four tanks can be seen from the ship, the remainder are behind.

The anhydrous ammonia plant was built by the Pullman Kellog company of U.S.A. and fertiliser section by PHB of Germany.

The tank pumps 'Carter' lose suction with 1,000 tonnes heel in tank. Approx. 2,000 tons per day of ammonia is produced at the plant with about 7,000 tons per day being pumped in by pipe-line from the Volga Region.

Pollution: VERY strict. Be VERY careful.

Scuppers to be plugged. Make sure decks washed down prior to arrival and that no lube oil is washed overside.

Make sure ballast and pumps clean.

Ships not fitted with sanitary tank system must have their toilets locked up and all crew use toilets astern of vessel. The sanitary system is checked.

No pumping of ballast in anchorage or in harbour without Port Authority permission. (A Greek ship was fined for pumping ballast at anchor).

Do not have fire hoses draining overside, we had them draining into ballast tanks.

Be very careful when disconnecting that no hose water drains overside.

Agent: State Agent 'Inflot'. Yuzhny office telephone 59-38-75. Yuzhny office has been in operation for about a year. Telex: 232 722.

Main office in Odessa.

Office is in port building at end (South) of fertiliser quay. Good English and very co-operative.

Night staff, 2000 hrs. – 0800 hrs., good.

Can be contacted by VHF at anchorage or alongside by Channel 16 and then talk direct on Channel 8.

Order money (which all unused must be handed back on departure) 24 hours beforehand. If shorter notice given Agent will give you what he has in office safe.

Accepts Notes of Protest on behalf of receiver.

Cable address: 'Inflot Yuzhny'.

Medical: Through Agent.

Every day except Sunday a doctor attends the clinic in the port building, 0900 hrs. to 1300 hrs. We had 1 crew member with a fractured hand who was checked by doctor and taken immediately to Odessa for X-Ray, then brought back to the ship plastered up, all in 3 hours, with full English report.

Outside these hours a nurse is on duty.

Water: Fresh water available from quay. Agent will send waterman. Metered. Ship hoses international connection flange.

Chandler: Two. Technical and produce.

Some local produce available, basically vegetables. No salads.

The produce chandler in port building deals in curios, champagne, vodka and caviar. Payment can be made by the Agent.

We obtained from Technical chandler a Russian chart of Odessa – 2 days' wait.

Suggest any requirements ordered well in advance.

Films: Walport films can be changed with suitable ships in port. Agent very co-operative in this respect, finding out for us if a Greek ship had Walport films which she did and like ourselves wanted a change. Agents and customs officer with one of our seamen changed the boxes – no difficulties encountered.

Fuel: In short supply and long waits. By barge to Odessa waiting anchorage. October 1980 – 3 day wait for diesel at $358 per tonne.

Repairs: Very difficult.

Radar/Wireless: Not sealed or checked. Bridge and radio room not inspected. Radar use seems to depend on Pilot and guards. From anchor to berth we had to turn off radar. On last visit guards made ship turn off before sailing.

This visit no problem, radars tested prior to sailing and left on.

There is a tug anchored off vessel at all times but this is for fire duties.

Formalities: Very good and quick, as long as procedure followed. Everyone has to muster in front of Immigration Officer on arrival and departure, and is checked against Discharge Book.

Required:

1 Copy Personal Effects Declaration Form (very strict on this, require all jewellery to be declared).
1 Copy Currency List – crew. (Again very strict and check up frequently in port on amount drawn by individuals).
2 Copies Health Form.
2 Copies Vaccination List.
6 Copies Crew List.
5 Copies General Declaration (IMO Standard Form).
2 Copies List of Drugs in Master's care.
1 Copy Clean Ballast Declaration and request to pump in port.
3 Copies Loading Instructions.
2 Copies Cargo Requirements.
1 Copy Statement to Port Captain, all Safety Equipment in good order.
1 Copy Statement of type of Sanitary System and in use.

No Stores List required.

Bond not sealed.

Port Captain boards vessel soon after arrival and fills in long safety questionnaire with Master. If certificates dates in doubt will want to sight.

Agent says Port Captain will allow ship to sail with Safety Certificate up to 2 days before expiry with clearance for Bosphorus.

Allow 2 hours for papers before cargo commences and after completion.

Seamen's Facilities: A seamen's club has been established just outside main gate. Roubles only taken.

AUTHORITY: The Port of Yuzhny Authority, 1 Grigoryevka, Port of Yuzhny, Kominternovskiy Rajon, Odessa Region, U.S.S.R. *Tel:* 55-10-27. *Local Exchange:* 5-50, 5-52. *Telex:* 232722. *Cables:* Morflot Yuzhny.

AGENT: Yuzhny "Inflot" Shipping Agency, Grigorievka-1, Kominternovsky Rayon, Odesskaya Obl., Port Yuzhny, U.S.S.R.: Tel: 593780, 593777, 593875. Telex: 232722. Cables: "Inflot Yuzhny".

ZHDANOV: 47.06 N. 37.35 E. (See Plan)

GENERAL: A sea port in the Azov Sea, Zhdanov is situated 14 miles Northward of the entry into the Taganrog Gulf, at the Western end of it and at the mouth of the Kalmius River.

All-year round navigation is possible but during 30 – 90 days period of ice conditions with ice-breaker assistance for ice-strengthened vessels only.

Ice usually begins to form at the end of November or the beginning of December, and 3 – 4 weeks later the Gulf becomes completely frozen over. The increase of fast ice usually lasts up to the first half of February. As a rule the ice usually breaks up in the middle of March. It finally disappears at the end of March or, as an exception, in the first half of April.

The port of Zhdanov consists of the Outer and Inner Roads, the Ugolnaya (or the Coal) Harbour, the Grain Harbour, the Ship-repairing Basin, the Schmidt Harbour at the mouth of the Kalmius River, and the port of Azovstal situated Eastward of the mouth of the river.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Inform Kerch Harbour Master ETA 24 hours and 6 hours, off Kerch Strait. On arrival Kerch Pilot Buoy No. 21 (Lat. 45° 13′ N., Long. 36° 27′ E.), drop anchor and await Pilot; also keep continuous radio watch.

Not later than 4 hours prior to arrival at the mouth of the Coal Harbour Approach Channel, Buoy No. 1, a Master should order a Harbour Pilot.

ANCHORAGES: A good anchorage can be obtained in the Outer Roads of the port of Zhdanov situated opposite the port entrance. The depths in the roads are from 5 m. – 8 m. the holding ground is mud mixed with sand and shell.

RESTRICTIONS: Vessels can enter or leave the port at any time of day and night. All vessels entering or leaving the port should have keel clearance not less than 0.5 ft. (15 cm.).

The max. allowed speed in the approach channels is 8 knots and in the part of the Coal Harbour Approach Channel, protected by a wooden dam, only 3 knots.

The speed of a vessel may be increased in case of necessity to keep her course along the leading line or prevent her drifting off the channel due to the effect of current or wind.

MAX. SIZE: Draft 8 m., length/breadth no restrictions.

HEALTH: After presenting Vaccination Certificates, Free Pratique obtained. After proceeding from one port of U.S.S.R. to another, Free Pratique obtained automatically.

RADIO: Vessels approaching the port of Zhdanov should establish radio contact through Zhdanov Radio port radio station operating 24 hours daily on the following frequencies:

	Frequencies (kHz)		Type of	
			trans-	Time of
Call Sign	Working	Calling	mission	work
UDC	500/473	500/416	A1A	H24
"Zhdanov-Radio"	2182	2182	N3E	H24
"Zhdanov Radio-1"	156.8*(16)	156.8*(16)	F3E	H24
(Port Controller)	156.7*(14)	156.7*(14)		
"Zhdanov Radio-5"	156.45*(9)	156.45*(9)	F3E	H24
(Harbour Master)				

*Frequencies are given in MHz.

RADAR: The port of Zhdanov radar station gives all possible information to any vessel navigating along the Coal Harbour approach channels in the restricted visibility and during the absence of the floating navigation marks.

Radar navigation is controlled by a Pilot in charge.

Storm signals are exhibited at a signal mast located at the Dividing Pier.

TUGS: Available. Use ship's lines. Tug assistance for shifting berths is compulsory. Number of tugs to be ordered shall be advised by Pilot.

BERTHING: The berths of the port with depths of up to 10 m. are equipped to handle general, containers, bulk and liquid cargoes, timber, metals, food stuff, fruit, vegetables, etc., and passenger shipping as well. There are enclosed warehouses, open concrete floor sheds and a grain elevator.

On the quays there are electric cranes of up to 32 tons capacity, coal and grain loaders. There are floating cranes with lifting capacity of up to 100 tons and other cargo handling equipment.

The Grain Harbour is bounded by two piers – by the Dividing Pier from S.W. and by the Eastern Pier from N.E.

It is protected from S.E. winds by the Inner Roads Breakwater. There are numerous piles and dolphins along the Eastern Pier. The depths in the central part of the Grain Harbour are from 8.7 m. to 9.1 m.

The Schmidt Harbour is situated at the right bank of the mouth of the Kalmius River, at the S.E. outskirts of the town of Zhdanov. It is used by small vessels. The access to the Schmidt Harbour is by an approach channel dredged in the coastal shoal water. Navigation along the channel is ensured by leading lights.

Storm signals are shown at the station situated Southward of the entry to the Schmidt Harbour.

When proceeding to the Inner Roads through the shoal water vessels should use approaching channels leading to the Coal Harbour and the Avant-port.

The Coal Harbour approach channel is the main fairway for entry to the port of Zhdanov. It passes through a coastal shoal then enters the Southern part of the Coal Harbour.

Navigation along the Avant-port and the Coal Harbour approach channels is also ensured by leading lights, light buoys and spar buoys.

The access to the port of Azovstal is by a channel branching off N.E. of the Coal Harbour approach channel.

MEDICAL: Masters to advise by radio prior arrival of medical attendance required on board. Hospital facilities available. Vaccination Certificates to be presented.

DENSITY: About 1005.

WEATHER: The changes in the water level is mainly caused by effects of the wind observed here all the year round. The fall of the water level is usually caused by Northerly and N.E'ly winds but rises of the water level are due to S.W'ly winds.

The range of the water level observed in the Gulf is about 1 m.

Changes of the water level can also be caused by variation in the atmospheric pressure, so called "Seish" effect. The "Seish" usually starts during calm weather and can last, on average, for about 24 hours.

The maximum range of the water level due to the "Seish" effect observed in August is about 0.6 m.

FRESH WATER: Delivered at berth. Also delivered by lighters.

FUEL: Delivered by lighters.

OPENING/CLOSING HATCHES: Crew allowed open and close, stevedores placing beams.

CERTIFICATES: Registered Tonnage Certificates required.

CUSTOMS ALLOWANCES: No quantity restrictions. Nothing to be taken ashore.

IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS: The ship-repairing Basin is situated in the Northern part of the Inner Roads. It is bounded on the S.W. by the Eastern Pier and on the East by the Eastern Dam. The entrance to the Basin is situated between the heads of the Eastern Pier and the Eastern Dam. The depths in the Basin are from 6.1 m. to 6.5 m.

All kinds of repairs for vessels of up to 9,000 d.w.t. can be carried out.

DRY DOCKS: 15,000 and 5,000 tons.

REPATRIATION: All facilities for repatriation subject to visa formalities.

AIRPORT: 15 km. from port with regular airlines.

TIME: Local time GMT plus 3 hours, GMT plus 4 hours in Summer.

HOLIDAYS: 1st January; 8th March; 1st, 2nd, 9th May; 7th October; 7th, 8th November.

AMBULANCE/FIRE: Ambulance 003; Fire 01.

TELEPHONES: Can be placed on board.

AUTHORITY: The Port of Zhdanov Authority, 99 Admiral Lunin Prospect, 344000 Port of Zhdanov, Donetsk Region, U.S.S.R. *Tel:* 592-234. *Cables:* Morport Zhdanov.

AGENT: Zhdanov Main Maritime Agency "Inflot", 89 Admiral Lunin Prospect, 341010 Zhdanov, Donetsk Region, U.S.S.R. Tel: 592415, 58198, 58579. Cables: Inflot Zhdanov. Telex: 115124.

United Arab Emirates

GENERAL:

EMIRATES RADIO: The Emirates Telecommunications Corporation operate a Coastal Radio Telephone Service (Etisalat) to provide connections via a manual operator between ships at sea and the public telephone network. The service is available continuously 24 hours a day.

There are 8 shore stations set up around the coast of the U.A.E. These transmit and receive on the VHF channels shown in the table below. The control and operation of all shore stations is at a central point in Dubai.

	Frequencies		
Channel	*Ship Transmitter* (MHz)	*Ship Receiver* (MHz)	*Used For*
16	156.800	156.800	Simplex for distress and safety for all areas
1	156.050	160.650	Duplex working channel for Ras al Khaimah area
2	156.100	160.700	Duplex working, first channel for Jebel Ali area
3	156.150	160.750	Duplex working, first channel for Khor Fakkan area
4	156.200	160.800	Duplex working, first channel for Abu Dhabi area
5	156.250	160.850	Duplex working, first channel for Umm al Quwain area
7	156.350	160.950	Duplex working, second channel for Jebel Ali and Khor Fakkan areas
28	157.400	162.000	Duplex calling channel for all areas
60	156.025	160.625	Duplex working, first channel for Jebel Dhanna area
62	156.125	160.725	Duplex working, first channel for Fujairah and Zirku areas
63	156.175	160.775	Duplex working, third channel for Jebel Ali area
66	156.325	160.925	Duplex working, second channel for Abu Dhabi area
83	157.175	161.775	Duplex working, third channel for Abu Dhabi area and second channel for Fujairah area
84	157.225	161.825	Duplex working, second channel for Umm al Quwain area
85	157.275	161.875	Duplex working, fourth channel for Jebel Ali area
86	157.325	161.925	Duplex working, second channel for Jebel Dhanna area
87	157.375	161.975	Duplex working, second channel for Ras al Khaimah area

For all areas a common calling frequency on Channel 28 is used both for ship-to-shore calls and for shore-to-ship. After contact is established the Etisalat Coast Station Operator will assign a working channel taking into account the ship's position and existing calls in progress.

To establish a ship-to-shore call the ship should switch the equipment to Channel 28, ensure the channel is not already in use by listening and then call "Emirates Radio", identify itself and give the coastal area in which it is sailing e.g. "off Jebel Dhanna". The Coast Station Operator will then assign a working channel e.g. in the case of Jebel Dhanna area working will be established normally on Channel 86. After recontacting on the working channel the called number and calling ship details will be established and the call connected. If there is traffic congestion the Operator may assign a free working channel from another area.

For calls to the ship, the Operator will set up the called ship's code number which will be sent on Channel 28. This will operate an alarm on the equipment. In the case of there being no selective calling equipment installed or contact cannot be established by this means the Operator will also call the ship by voice using its call sign and name on Channel 28. Following establishment of contact the ship will give the area it is in and the operator will then assign a working channel. On re-establishment on the working channel the call will be connected.

It follows therefore that all ships must keep one of their receivers switched to Channel 28 when idle in order to be able to receive a shore-based call.

Traffic lists, that is calls on hand for ships in the area, will be broadcast at 0603, 0803, 1203, 1403, 1603 and 1803 hrs. GMT on Channel 28. This is in addition to calls made on first receipt of the call booking. Ships should avoid using Channel 28 to call during the broadcast of traffic lists.

Distress and Safety: Simplex Channel 16 (156.8 MHz) is received continuously by the Coast Station and is monitored by the Border Guard in Abu Dhabi who will handle all matters relating to distress, urgency and Safety of Life at Sea (SOLAS).

Ship-to-Ship Traffic: Ship-to-ship calling and working frequencies are different from those used by the Coast Station. Such calls are not normally the concern of the Coast Station and should be conducted in accordance with international and local regulations.

Exceptionally however if a ship desires to call another ship out of direct range the Coast Station facilities may be used in which case the procedure and use of calling channels is the same as for calling a shore number.

Shore-Based Subscribers: Subscribers wishing to contact a ship should dial number 158, from any location within the Emirates in order to contact the Coast Station Operator.

They should give the Operator their town location and telephone number, the name of the ship, if known its call sign and code number and the name of the person to whom they wish to speak. The Operator will call the shore-based party back after the call with the ship is established.

Categories of Calls Available: Paid calls only are accepted. Collect calls are not admitted from or to ships.

The following categories are accepted:

- Calls from ships within range to parties anywhere within the United Arab Emirates.
- Calls from any party within the U.A.E. to any ship within range.
- Calls from ships within range to parties in any country in the international telephone network.
- Calls from any party in the international telephone network to any ship within range. These will only be accepted via the operator in the network of origin.
- Calls from any ship within range of the Coast Station to any other ship within range.

All calls to ships are treated as personal calls. Calls from ships are station calls at the normal charge. Personal calls are available subject to an additional personal call charge.

U.A.E. ships or boats using this service must ensure that:

1. They have a valid licence which is issued by the Ministry of Communications who will also issue a call sign and, where applicable, a code number.
2. The vessel is equipped with a Maritime Mobile Radio Telephone which conforms with international requirements and any supplementary regulations issued by the Ministry of Communications.
3. That proper operating procedures are followed.

Technical Characteristics for Maritime Mobile Radio Telephone (VHF): The technical characteristics should be in accordance with CCIR Recommendation 489-1 except for transmitter power which must not exceed 10 watts (U.A.E. regulation).

The recommendations as modified in the U.A.E. are summarised below:

General Characteristics:

1. The frequency band is 156 – 174 MHz.
2. The Channel spacing is at 25 kHz intervals.
3. The class of emission is F3 (frequency modulation telephony).
4. The bandwidth is 16 kHz.
5. Frequency modulation has a pre-emphasis of 6 db/octave.
6. Apart from specially designated Simplex Channel, for SOLAS, only ships with full duplex facilities can work with the public telecommunications system. Ships with only semi-duplex cannot work with the public telecommunications system.
7. It must be possible to make changes between Channels within 5 seconds.
8. The emission is vertically polarised.
9. The selective calling system is as per CCIR Recommendation 257-2.

The tone frequencies for this system are as follows:

Figure:	1	2	3	4	5	6	7
Audio Frequency:	1124	1197	1275	1358	1446	1540	1640
Figure:	8	9	0	Figure Repetition			
Audio Frequency:	1747	1860	1981	2110			

Transmitter:

1. The transmitter carrier power shall not exceed 10W and shall incorporate facilities to readily reduce this to 1W or less for use at short ranges. (Note: The normal 25W power permissible internationally is reduced to 10W in the U.A.E.).
2. The frequency deviation should not exceed ±5 kHz.
3. Frequency tolerance should not exceed 10 parts per million.
4. Spurious emissions should not exceed 25 μW or 40 db below normal power whichever is the lower.
5. The upper limit of the audio band should not exceed 3 kHz.
6. Cabinet radiated power should not exceed 25 microwatts.

Receiver:

1. Sensitivity should be equal or less than 2 microvolts e.m.f. for a given reference signal to noise ratio at the output.
2. Adjacent Channel selectivity should be at least 70 db.
3. Spurious response rejection should be at least 70 db.
4. Radio frequency intermodulation rejection ratio should be at least 65 db.
5. The power of any conducted spurious emission measured at the antenna terminal should not exceed 2 nanowatts.
6. The effective radiated power of any cabinet radiated spurious emission on any frequency up to 70 MHz should not exceed 10 nanowatts. Above 70 MHz, the spurious emissions should not exceed 10 nanowatts by more than 6 db/octave in frequency up to 1000 MHz.

General Guide to Operating Procedure:

Ships wishing to make a call via the Emirates Coast Station should use the following procedure:

1. Switch their receiver to Channel 28.
2. Listen to establish there is no traffic on the channel.
3. Transmit the following call: Emirates Radio this is . . . (call sign, ships name or other identification). Location . . . (nearest Emirates main coastal town).

In the case of difficult conditions this procedure can be modified as follows: Emirates Radio (repeated not more than 3 times) this is . . . (call sign, ships name or other identification, repeated not more than 3 times). Location . . . (nearest Emirates main coastal town).

If the Coast Station does not reply to the first call the call may be repeated at 3 minute intervals. However, before renewing the call, the calling station must first ascertain that further calling is unlikely to cause interference to other communications in progress and that the station called is not in communication with another station.

For replying to a call from the Coast Station a similar procedure is followed; the following is transmitted on Channel 28: Emirates Radio (repeated not more than 3 times) this is . . . (call sign, ships name or other identification, repeated not more than 3 times). Location . . . (nearest Emirates main coastal town).

After contact has been established on Channel 28, the Coast Station will assign a working channel. Coast and ship stations then change to the working Channel and proceed with the call.

Example: A Ship the 'Al Said' located off Jebel Dhanna wishes to make a telephone call. This is the procedure:

1. The 'Al Said' listens on Channel 28 to ensure there is no communication it may interfere with.
2. Transmits the following call on Channel 28: Emirates Radio, this is . . . (call sign) . . . 'Al Said' off Jebel Dhanna.
3. The Coast Station will reply: (Call sign) . . . 'Al Said', This is Emirates Radio, Channel 86.
4. 'Al Said' now switches to Channel 86 and calls: Emirates Radio, this is 'Al Said', how are you receiving me?
5. The Coast Station replies: 'Al Said', this is Emirates Radio, receiving you well, go ahead with your traffic.
6. The ship then gives details of the telephone call required.

Inmarsat Service:

Scope of Service: This service provides for the exchange of telephone/telex calls between suitably equipped ships in the U.A.E. coastal waters or in international waters, and any subscriber connected to Etisalat's telephone network.

The declared purpose of the INMARSAT System is to establish and operate a worldwide satellite communications system to provide improved maritime communications that will lead to greater efficiencies in the management and operation of ships at sea as well as contribute to improvements in distress and safety of life at sea.

Inmarsat Network – Global Coverage: The Inmarsat network consists of satellite circuits and their associated control systems providing national telecommunication carriers of member countries access to ships at sea via the maritime coast stations owned and operated by those countries who choose to provide such facility. Global coverage of accessing ships in each ocean area.

The implications of this network are that such access to ships having suitably equipped terminals, and located anywhere in the world can be had via extremely reliable and high quality circuits at reasonable costs.

In the operation of the service, Etisalat has the freedom to route its maritime telecommunications traffic via any of several coast earth stations having coverage to that particular ocean area. Etisalat has established telephone routing arrangements to Atlantic Ocean via Umm-Al-Aish Coast Earth Station in Kuwait, to Pacific Ocean via Singapore Coast Earth Station, and to Indian Ocean via Eik Coast Earth Station in Norway.

Facilities Offered: Telephone: In the direction of shore-to-ship, service is available on demand via the Etisalat International Telephone Operator, in the semi-automatic mode of operation, with the operator dialling directly to the vessel. Calls to ships can be either station-to-station or person-to-person, subject to a personal surcharge in the latter case.

When booking a call, callers in the U.A.E. should give the operator the ship telephone number and the position of the ship in the ocean region at the time the call is booked.

In the direction of ship-to-shore, calls will be received on an automatic basis, but if necessary such calls will also be connected via the operator in the coast earth station country.

Telex: U.A.E. subscribers have the facility to dial telex calls in the shore-to-ship direction, and to receive calls from ships on a fully automatic basis. However, if necessary the Etisalat Operator or the operator in the coast earth station country will be able to establish telex calls.

Automatic telex calls can be made by keying the destination code and the ship telex number.

Area	*Destination Code*
Atlantic Ocean	0581
Indian Ocean	0583
Pacific Ocean	0582

Collection Charges: Telephone calls from shore-to-ship via Etisalat are charged on the basis of 3 minute minimum plus each additional minute. For person-to-person calls a surcharge equivalent to a 1 minutes charge will apply. The charges applicable are:

First 3 minutes via operator	Dh.150
Each additional minute	Dh. 50
Personal surcharge	Dh. 18
Per minute telex call from shore-to-ship via Etisalat is	Dh. 30

Telex calls are charged on the basis of 1+1 charging, i.e. the minimum charge is for 1 minute with the additional time charged per minute, with fractions of a minute charged as a full minute.

Accounting Services for Inmarsat/Radio Maritime Communications: Etisalat also provides accounting service to ocean going and mobile vessels registered by the Federal Ministry of Communications, U.A.E., in accordance with the international telecommunications rules (CCITT) and International Maritime Laws. Under the terms of this service, Etisalat will provide such accounting and settlement facilities for the ships thus registered in U.A.E. for all their radio communication traffic via Inmarsat and other communication channels anywhere in the world.

Charges payable to Etisalat by the mobile station operator are:

(i) Deposit: A refundable security deposit of Dh 5,000/– is payable at the time of application for service. The deposit will be returned at the time of termination of the service, subject to the satisfactory settlement of all outstanding matters, including the payment of all charges and dues payable to the Corporation.

(ii) Service Fee: An annual service fee of Dh 2,000/– is payable in advance for calculation and verification of charges, allocation of charges to interested parties, adjustment and payment of accounts received from Administrations and other accounting authorities and related incidental correspondence. This charge will accrue day to day from the date of commencement of service.

Etisalat branch offices in Abu Dhabi and Dubai will provide on request details of terms and conditions governing this service to interested mobile station operators. Applications for such service should also be made to the appropriate Etisalat branch office.

Other Marine Services: If ships are outside U.A.E. coastal waters, calls may be made via marine communication facilities available in other countries.

These are: Ship/shore telephone/telex/telegram services via radio (VHF, MF or HF).

Charges for ship/shore services by radio consist of the appropriate international rate to the country in which the coast station is situated plus the coast station and ship station charges.

OPERATOR: The Emirates Telecommunications Corporation Ltd., P.O.Box 3838, Abu Dhabi, U.A.E. *Tel:* 283333. *Telex:* 22135 Etcho Em. *Contact:* Manager Operations.

ABU AL BU KHOOSH: 25.26 N. 53.08 E. (See Plan)

LOCATION: The terminal is bounded by the following co-ordinates South of Sassan Oil Field.

(a) Lat. 25° 31′ N., Long. 53° 05′ E.
(b) Lat. 25° 29′ N., Long. 53° 12′ E.
(c) Lat. 25° 26′ N., Long. 53° 12′ E.
(d) Lat. 25° 26′ N., Long. 53° 05′ E.

Anchoring is prohibited within this area.

DOCUMENTS:

Early Departure Procedure: At the Master's option, he may, in order to expedite the turn-round of vessels and avoid undue delays caused by weather or other circumstances, use the Early Departure Procedure. In this case Masters are requested to sign blank cargo documents.

Normally completed cargo documents required by the Master will be placed on board prior to sailing. If this is not possible without incurring delays of undue nature, the relevant documents will be airmailed to the Master to await the vessel's arrival at discharge port.

The official cargo, quantity loaded, will be transmitted by radio whilst unmooring. In the event of a dispute, the receipt of a letter of protest will be acknowledged by the Mooring Master.

Any protests by the Master concerning the quality of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

Outward Clearance: A tanker will be considered clear to depart Total ABK Terminal when the crude oil loading documents have been delivered to the Master, or in the case of E.D.P., clearance will be given through the Mooring Master.

Mail: Official ship's mail and the crew's personal mail will be handled by Total ABK and shipowners debited accordingly.

PILOTAGE: Compulsory within the Terminal limits. Vessels to be moored at Total ABK Terminal will be boarded by a Total ABK Mooring Master in the Anchorage Area. The Mooring Master will advise the ship's Master on approaches to the storage tanker, mooring and unmooring, connecting and disconnecting hoses and all other operations within the Terminal area including all manoeuvring of the vessel. A qualified Deck Officer must be on watch at all times while the vessel is alongside the storage tanker.

MAX. SIZE: Max. 270,000 d.w.t. Max. draft 22.5 m. Depth of water 27 m.

RADIO: Initial communication between vessels and Total ABK should be via Bahrain Radio (call sign "A9M") which operates on a 24 hour basis. ETA in GMT to be sent 72, 48 and 24 hours prior arrival, through Bahrain Radio.

Communications within 60 Miles of Terminal: Once ships are within 60 miles of ABK Terminal, communication may be established by radio telephone on International Marine VHF Channel 15. This frequency is monitored continuously.

Once contact has been made on Channel 15, further conversation should be conducted on either Channel 14 (156.7 MHz), Channel 12 (156.60 MHz) or Channel 15 or 17.

Communications after Total ABK Mooring Master has Boarded: A Total ABK Mooring Master will board incoming tankers in the Anchorage Area and will bring with him portable VHF radio telephone units. From that time onwards, all and any communications between ship and the storage vessel will be conducted by the Mooring Master.

Radio Transmissions for Advice of Tanker Arrivals: Telegram to be sent by the storage tanker to the export tanker about 80 hours before her arrival:

Quote

Please advise your ETA in GMT 72, 48 and 24 hours before arrival to Total ABK Abu Dhabi, Telex AH 22347, via Bahrain Radio stop Cargo requirements stop Deballasting time if any stop Maximum loading rate acceptable stop Distance in metres from bow to manifold stop Flange dimensions of vessel's manifold connection stop 50 miles before arrival please contact terminal by VHF Channel 15 to receive berthing instructions stop Total ABK.

Unquote

Mooring Instructions: If vessels are obliged or instructed to anchor, they should do so in the recommended area about 3 nautical miles from the storage vessel.

ANCHORAGES: An area immediately South of Terminal limits is designated as the Anchorage Area, centred on position: Lat. 25° 26′ N., Long. 53° 08′ E. This co-ordinate represents the centre of a circle with a radius of 0.5 miles which must be used by vessels requiring to wait at anchor. Anchoring within the Terminal limits is strictly prohibited.

(c) RADIO BEACON/FOG SIGNALS

Radio Beacon	Bridge PP LP-Flare	Aeronautical	Code R.P. 248 kHz – 25 W.

TUGS: Two tugs, each with 100 tons bollard pull are employed by the export tanker when berthing alongside the storage tanker.

READINESS: After arrival at the Anchorage Area and when the tanker is ready in every respect to load, the Master may tender his Notice of Readiness.

Notices of Readiness will be received provided one or other of the following events shall have transpired: (a) the Master shall have received the Mooring Master on board, or (b) the Master shall have dropped anchor in the Anchorage Area.

Port Closed: Notices of Readiness will not be accepted during periods when the port is closed. The port is closed when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with the ABK Terminal Superintendent or his deputy.

MOORING: Weather permitting, Total Abu Al Bu Khoosh Terminal operates only from sunrise to sunset, 7 days a week. Vessels moor port side to the storage tanker "World Trader" equipped with 5 Yokohama fenders on her starboard side, which is moored to the S.P.M. Launch may assist in berthing vessels under the direct control and supervision of the Mooring Master.

Preparation for Mooring: Vessels are requested to have, on their starboard side, a pilot ladder and/or accommodation ladder safely and securely rigged for immediate use and long enough to reach the Mooring Master's launch. Vessel's platform is not more than 10 ft. from the water level and a short pilot ladder, rigged to cover the access to the platform. Tankers are requested to have ready on the forecastle, 2 head lines, polypropylene if possible.

Hoses: The hoses are hoisted by flow boom system, connection by storage tanker crew. The Mooring Master will advise the ship's Officer in charge concerning lifting techniques.

MEDICAL: Medical and dental services are not available at the Terminal. In emergencies requiring hospitalisation, the patient will be flown by helicopter to Dubai or Abu Dhabi.

LOADING: All communications relative to the loading of the vessel shal be routed through the Mooring Master who will remain in contact with the storage tanker constantly via portable VHF units. In case of temporary breakdown of the portable VHF circuit, contact may be continued on International Marine Channels 15 or 17.

Failure of Communications: Should all communications with the storage tanker fail, loading will cease immediately.

Emergency Shut Down: An emergency cessation of loading may be effected by use of the ship's VHF Channel 15.

Loading Rates: Maximum loading rate will be 9,000 m.t.p.h.

Gases: ABK crude oil contains H_2S (hydrogen sulphide). This gas quickly deadens the sense of smell so that a dangerous concentration cannot be detected by odour. During loading, gas should be vented off through the tanker's normal venting system. Personnel engaged in ullaging tanks should keep to windward and avoid breathing fumes as much as possible. Resuscitators, breathing apparatus and life-lines should be readily available.

Valve Closure Against High-Speed Loading: No valve which will stop or seriously impair or reduce the flow rate of oil from the storage tanker are to be operated without prior agreement with the Mooring Master. The practice of throttling back on the ship's cargo valves is to be avoided. If a lower rate is required, the storage tanker is to be advised and the pumping rate will be reduced to the required level. The Master will be held liable for any damage arising from the sudden cessation of flow caused by default of the ship. It cannot be over emphasised that to do so can be extremely dangerous and cause extensive damage to equipment.

BALLAST: Due to the exposed location of the crude oil loading berth, vessels are required to carry 40% of their deadweight in ballast for safe handling, having due regard to existing weather and sea conditions. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Clean Ballast: As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipe-lines, pumps and strainers have been flushed out prior to arriving. The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he thinks would cause pollution of the sea area, in which case vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its Notice of Readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Inspection During Loading: At night the sea around the vessel shall be adequately lit, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution whatsoever will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be re-accepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

FRESH WATER, FUEL, ETC.: Bunkers, fresh water, stores, boats for hire, repair facilities, facilities for changing ship's crew are not available at the Terminal.

SHORE LEAVE: Not possible.

GENERAL:

Radio Equipment: Radio, radar or other electric equipment must not be energised while the vessel is alongside the storage tanker except VHF radios, telephone and communications equipment approved by the Terminal.

Repairs: While berthed at the Terminal, the ship's boilers, main engine steering machinery and other equipment essential for manoeuvring shal be maintained in a condition to permit the ship to move away from storage vessel at short notice. Repairs or other work which may immobilise the ship should not be undertaken without prior arrangement with the Terminal.

Port Charges: Every vessel loading in the Abu Dhabi areas has to pay Abu Dhabi Government Port Dues. These are calculated according to Abu Dhabi Law.

Agency: Total ABK do not act as Agents. Vessels must have an Agent in Abu Dhabi in case of injuries or illness.

SHIPMASTER'S REPORT: 1977: The following information may be o value to other Masters:

(a) The holding ground in the anchorage is very bad, this vessel dragged her anchor (10 shackles out) in a Force 5 from the N.W

(b) Only documents supplied on departure were Bills of Lading no port clearance documents supplied.

(c) No Customs or Immigration Officials at terminal therefore no documents required.

SHIPMASTER'S REPORT: 1978: The storage tanker is 320 m. long Centre of the manifold to bow is 140 m. We berthed with our bows level which meant our stern overhung the other vessel and we were not able to use our first ropes ashore leading from the after end of the poop.

Forward: (SV=Storage Vessel). 2 headlines to SV. 1 spring to SV. 1 rope from SV with end to be turned up on own vessel's bits forecastle head. 2 more headlines to SV and 1 spring from SV.

Aft: 2 sternlines to SV. 1 backspring to SV. 1 backspring from SV, eye o bitts. 2 more stern lines to SV.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd. P.O.Box 377, Abu Dhabi, U.A.E. Cables: "Confidence", Abu Dhabi. Telex: 2224 ("Gacauh Em"). Fax: 339350. Tel: 334300 (10 lines). After office hours Tel: 326083, 216613. Radio: Marine VHF radio, stand-by on Channel 16 (156.8 MHz). Call sign "Confidence, Abu Dhabi".

AJMAN, Ajman: 25.25 N. 55.28 E.

PILOTAGE: Not available.

RESTRICTIONS: Dredging is taking place between the breakwaters. Work will commence at the S.E. corner of the Eastern Breakwater and proceed to the outer end Roundheads. The dredger will then move to the Western side. The 100 m. cut will then be completed to a depth of 7.2 m. below Chart Datum.

The following restrictions are imposed during operations:

(a) The port will be closed to all navigation during the hours of darkness – sunset to 30 minutes before sunrise.
(b) Transit priority will be given to vessels sailing outward from the port up to 0630 hrs. local time.
(c) Between 0630 hrs. and 0730 hrs. local time, priority will be given to incoming vessels.
(d) At all other times during daylight hours, vessels may arrive or sail as required but all must exercise extreme caution while passing the dredger.

The dredger will carry lights and shapes as prescribed for vessels of this class.

MAX. SIZE: Max. draft available 5 m. Approach Channel width 100 m.

BERTHING: Minimum 48 hours' notice required.

Total quay space 5,000 m.

4 transit sheds of 60 m. × 120 m. available alongside.

Before sailing, all vessels must obtain a Port Clearance Certificate issued by the Department of Port and Customs.

REPAIRS: A "gas-free" and "hot-work" certificate is required from vessels undergoing repairs to oil-tanks within port limits.

A surcharge may be imposed on vessels undergoing repairs or modifications where welding equipment, compressors, etc., are operated from the wharf. Permission to commence this work must be obtained beforehand from the Port Authority.

GENERAL: *Charts:* BA 2887, 3711. USHO 62390.

AUTHORITY: Department of Port and Customs.

AGENT: See "Sharjah".

ARZANNAH ISLAND: 24.47 N. 52.33 E.

SBM: 24.46 N. 52.31 E. **(See Plan)**

PORT LIMITS: *Port Area:* Contained within the following co-ordinates:

"A"	Lat. 24° 50′ 12″ N.,	Long. 52° 29′ 24″ E.
"B"	Lat. 24° 50′ 12″ N.,	Long. 52° 37′ 12″ E.
"C"	Lat. 24° 43′ 48″ N.,	Long. 52° 37′ 12″ E.
"D"	Lat. 24° 36′ 48″ N.,	Long. 52° 34′ 36″ E.
"E"	Lat. 24° 37′ 00″ N.,	Long. 52° 29′ 24″ E.

LOCATION:

Port Area and Terminal: Arzannah Island is located at Lat. 24° 47′ N., Long. 52° 33′ E. and is the base for export of crude oil. The Port of Arzannah is the area defined above.

A tanker terminal and another berth on Arzannah Island for vessels destined to other than the tanker terminal, are located within the port area.

PILOTAGE: Conduct and movement of vessels within the port area are controlled by the Harbour Master. A Company designated Mooring Master is required for the berthing and unberthing of vessels at the Storage Tanker.

Mooring Master: Pilotage is compulsory within the "Port Area" and no vessel may enter or depart the port area, berth or unberth at the Storage Tanker or conduct any other manoeuvres of the vessel without prior notification to the Harbour Master and without the assistance of a Company designated Mooring Master unless otherwise ordered by the Harbour Master. The Company designated Mooring Master for vessels bound for the Storage Tanker will board the vessel at Khor Fakkan (Lat. 25° 22′ N., Long. 56° 22′ E.) or Jebel Dhanna Pilot Station as directed by Lamnalco Pilots Khor Fakkan. The Company designated Mooring Master for vessels bound for the Shore Berth will board the vessel at Khor Fakkan or such other location approved by the Harbour Master upon request of the vessel made in the first notification. (See "Radio").

The Mooring Master's function will be to advise the Master of the vessel for the above stated purposes. The Master of the vessel always remains responsible on behalf of the vessel's owner for the safety and proper navigation of the vessel. The vessel must remain at Khor Fakkan or such other location approved by the Harbour Master until the Mooring Master is aboard. Mooring Master stays onboard and leaves at Khor Fakkan outward bound.

ANCHORAGES: Anchoring of vessels is prohibited within the port area and terminal area. An area 3.5 miles West of the Storage Tanker in the vicinity of Lat. 24° 46′ N., Long. 52° 27′ E. is designated as the anchorage area.

RESTRICTIONS: See "Berthing".

MAX. SIZE: *S.B.M.:* Max. d.w.t. 280,000 (export tanker). Max. draft 43 ft. Depth of water at SBM 107 ft. Least depth in approaches 48 ft.

Sailing Draft: The draft of loaded vessels leaving the Storage Tanker is controlled by the water depth between Dalma Light Float and the No. 1 buoy in the outer channel. Minimum under keel clearances recommended by the Mooring Master are as follows:

D.W.T.	*Minimum Keel Clearance*
Up to 100,000	3 ft.
100,000 to 220,000	4 ft.
220,000 and over	5 ft.

Sailing drafts should always be agreed upon with the Mooring Master prior to starting to load.

RADIO: The Company cable address is "Amerhess – Abu Dhabi" and telex number is 949 – 22275. The Company also maintains radio watch on International Marine VHF Channels 16 and 67.

Notice of Arrival:

A. Vessels bound for the *STORAGE TANKER* must advise the Company as follows:

72 HOURS: Not less than 72 hours prior to arrival at Khor Fakkan vessels will send a cable or telex to the Company and cable to "Lamnalco Khor Fakkan" or telex to "Lamnalco" (telex number 89034 Pilotkf) providing the following information:

(a) Estimated time of arrival at Khor Fakkan.
(b) Estimated fore and aft draft upon arrival at the port area.
(c) Quantity of oil to be loaded.
(d) Distance from the bow to the cargo manifolds.
(e) Size, number and type of cargo connections.

48 HOURS: Not less than 48 hours prior to arrival at Khor Fakkan vessels will send a cable or telex to the Company and to Lamnalco reconfirming or giving any changes in the 72 hour notice.

24 HOURS: Not less than 24 hours prior to arrival at Khor Fakkan vessels will send a cable or telex to the Company and a cable or telex to Lamnalco reconfirming or giving any changes in the 48 hour notice. The 24 hour notice must be as accurate as possible and thereafter should there be any change in the ETA by more than 2 hours notice of such change must be given promptly to the Company and Lamnalco.

Not less than 24 hours prior to the vessel's ETA at Khor Fakkan the vessel must maintain a radio watch on R/T frequency 2182 kHz and at least 12 hours prior to arrival at Khor Fakkan must maintain a radio watch on VHF Channel 16.

Other frequencies available are:
HF: 2638, 2738, 3270, 3710, 4136.3 kHz.
VHF: Channels 1 to 28, 60 to 74 and 77 to 88.
Call sign for Lamnalco base is "Gulf Pilot Khor Fakkan".

B. Vessels bound for the *SHORE BERTH* must advise the Company as follows:

48 HOURS: Not less than 48 hours prior to arrival at Khor Fakkan or such other location at which permission is requested of the Harbour Master for the Mooring Master to be on board, vessels will send a cable or telex to the Company and a cable to "Lamnalco Khor Fakkan" or telex to Lamnalco (telex number 89034 Pilotkf), providing the following information:

(a) Estimated time of arrival at Khor Fakkan or such other location where it is requested the Mooring Master board.
(b) Estimated fore and aft draft upon arrival at the port area.
(c) Cargo to be loaded or unloaded.
(d) Request for permission for Mooring Master to board at other than Khor Fakkan (if applicable).

24 HOURS: Not less than 24 hours prior to arrival at Khor Fakkan or such other approved location, vessels will send a cable or telex to the Company and a cable or telex to Lamnalco reconfirming or giving any changes in the 48 hour notice. The 24 hour notice must be as accurate as possible and thereafter should there be any change in the ETA by more than 2 hours, notice of such change must be given promptly to the Company and Lamnalco.

Not less than 24 hours prior to the vessel's ETA at Khor Fakkan the vessel must maintain a radio watch on R/T frequency 2182 kHz and at least 12 hours prior to arrival at Khor Fakkan must maintain a radio watch on VHF Channel 16.

Other frequencies available are:
HF: 2638, 2738, 3270, 3710, 4136.3 kHz.
VHF: Channels 1 to 28, 60 to 74 and 77 to 88.
Call sign for Lamnalco base is "Gulf Pilot Khor Fakkan".

TUGS: *Tugs and Launches:* The Company will have available a tug (3,600 h.p.) for berthing or unberthing and for standing by a vessel at the Storage Tanker as may be required by the Master of the vessel or the Mooring Master for which a charge will be made by the Company, whether or not used. Should the Master of a vessel require more than 1 tug for the above purposes such must be separately arranged by the Master sufficiently in advance of the vessel's arrival at the port area to avoid delay in the berthing or unberthing of the vessel and any delay occasioned thereby will be charged to the vessel.

A line handling boat under the direct control and supervision of the Mooring Master will assist in berthing or unberthing of vessels.

BERTHS: The tanker terminal in the port area consists of the VLCC "Tropical Lion" ("Storage Tanker") connected to a single buoy mooring system located at Lat. 24° 46′ N., Long. 52° 31′ E., 1.25 miles West of Arzannah Island.

The berth at Arzannah Island ("Shore Berth") consists of a 700 ft. long earth filled pier with facilities required to load and unload diesel oil and desalinated water. Fire protection facilities on the pier include a firewater line and firewater monitors.

BERTHING:

Berthing-Unberthing: Berthing will normally take place only during daylight hours, weather permitting. Unberthing will take place at anytime (day or night), weather permitting. Manoeuvring power must be available on the main engine during berthing and unberthing operations. Mooring Masters will not berth vessels if not properly equipped with satisfactory mooring lines, or if deck equipment is inoperable or if steering gear, telegraphs or whistles are not in efficient condition or if insufficiently or improperly ballasted in the opinion of the Mooring Master. The vessel's Master is required to advise the Mooring Master if any such defects exist or of any peculiarities of the vessel. The vessel will be responsible for the handling of lines and the connection and disconnection of the loading arms with the vessel's crew.

Mooring: Mooring arrangements shall be to the satisfaction of the Mooring Master. Vessels must at all times remain properly secured alongside the Storage Tanker or the Shore Berth. Moorings must at all times be attended by the vessel's crew, avoiding slack lines or varying tensions on the lines. The use of constant tension winches for automatic self-tensioning to attend mooring lines is prohibited. The Harbour Master may suspend loading or unloading should there be any failure by the vessel's crew to attend mooring lines as above stated.

Ballast Drafts: Vessels destined for the Storage Tanker should arrive with propeller completely submerged and 8 ft. to 10 ft. trim by the stern. The Mooring Master may refuse to permit berthing of vessels not in compliance with this requirement until the vessel takes on sufficient ballast or changes ballast to meet the requirement.

BALLAST: There are no facilities available for the off-loading of dirty ballast. Only clean or segregated ballast will be permitted to be discharged overboard. The vessel must keep a constant watch on the side of the vessel from which clean or segregated ballast is being discharged. Discharge of ballast must be immediately suspended should there be any indication of discoloration or sheen and immediately reported to the Harbour Master. An investigation shall be carried out by the vessel and the findings immediately reported to the Harbour Master. Deballasting shall not recommence without the permission of the Harbour Master.

LOADING: *Crude Oil Cargo Loading:* Loading operations cannot commence until permission has been granted by the Harbour Master. All operations after such permission is granted in connection with the starting of loading, switching of tanks and topping off on the vessel will be the responsibility of the vessel. At all times while the vessel is alongside the Storage Tanker there shall be a responsible licenced deck officer of the vessel on deck in charge of all operations on deck.

Prior to loading a pre-transfer conference will be conducted by the Harbour Master and a responsible deck officer of the vessel who will be in charge of the loading of the vessel. The purpose of the pre-transfer conference is to formulate a transfer plan and ensure that the Storage Tanker and the vessel are ready for safe transfer and handling of the cargo.

The Harbour Master may suspend cargo operations if any of the applicable laws and safety regulations set forth herein are not complied with, the pre-transfer plan is not complied with or if the Harbour Master believes or becomes aware of the existence of any other danger which in his opinion requires suspension of loading.

The vessel's crew will be responsible for handling the loading arms on board the vessel, furnishing and making adaptor connections, removing blind flanges and guiding the loading arms (Chicksans) to the appropriate manifold connections. As a convenience to the vessel the Harbour Master will furnish advice and guidance in connecting the loading arms to the ship's manifolds.

Crude Oil Cargo: The crude oil to be loaded contains hydrogen sulphide. Breathing the vapours vented from this cargo could be hazardous. Vessel's crew should review the instructions issued by the vessel's Owner regarding this subject. The Company assumes no liability, with respect to loading crude oil bearing hydrogen sulphide.

Pumping Rate: Max. pumping rate using 2 arms. 60,000 b.p.h. Average pumping rate 55,000 b.p.h.

Storage tanker capacity: 1,400,000 bbls. Cargo Arzannah Stabilized Crude, API 43.0. Specific Gravity 0.8109. Reducers: In limited supply.

General Cargo Loading–Unloading: Loading or unloading operations cannot commence until permission has been granted by the Harbour Master. All operations after such permission is granted in connection with the loading and unloading of the vessel will be the responsibility of the vessel. At all times while the vessel is alongside the Shore Berth there shall be a responsible licenced deck officer of the vessel on deck in charge of all operations on deck.

POLLUTION: The Petroleum Ports Law prohibits the discharge into the water of oily water, garbage, waste or other objectionable materials. The Petroleum Ports Law also requires immediate reporting to the Harbour Master of any leakage or spillage by the vessel. The Law is strictly enforced and violators may be subject to fine and imprisonment.

The vessel's Master is responsible that no oil is pumped or spilled overboard from his vessel in the vicinity of the Port Area. In the event of any spillage or loss of oil from the vessel as the result of any act or omission of the vessel, such as, but not limited to, the pumping of oily water overside from ballast or bilges, or oil spilt during loading. The vessel shall be responsible for all costs and expenses of clean up, and for any damages to property or injury to persons resulting from such spillage or oil loss.

The Company reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea, but only as a contractor acting on behalf of the vessel or its owner, and will charge the vessel for all costs and expenses incurred thereby.

SAFETY REGULATIONS:

Safety: The Petroleum Ports Law, recommendations contained in the I.C.S. International Safety Guide for Oil Tankers and Terminals covering the loading and discharging of tankers and the safety regulations set forth herein will be strictly enforced while the vessel is in the Port area.

Smoking: Smoking is strictly prohibited on the vessel or the Storage Tanker and Shore Berth except in places specified by the Master which shall not be outside of any of the accommodation areas. The Master is responsible for ensuring that all on board are informed of the selected areas for smoking and for posting suitable notices. Matches and lighters for personal use shall not be carried while outside designated smoking areas and personnel shall be so instructed.

Fire Fighting Equipment: The vessel's fire fighting equipment must be ready for instant use while the vessel is moored. Fire hoses of sufficient length to reach all parts of the vessel must be strung out and connected to hydrants. If the vessel's fire fighting equipment is rendered inoperative for any reason this must be reported to the Harbour Master immediately.

Fires: The only open flames allowed while the vessel is moored at the Storage Tanker or the Shore Berth are those in the vessel's boilers and galley equipment. All other open flames are prohibited. Sufficient fire extinguishers must always be provided near the galley.

Engine Room/Boiler Room Precautions:
a) Combustion equipment – burners, tubes, uptakes, exhaust manifolds, and spark arresters shall be maintained in good working order and kept clean.
b) Blowing tubes – funnel uptakes and boiler tubes will not be blown while a vessel is moored at the Storage Tanker.
c) Cleaning solvents – highly volatile cleaning solvents shall not be used in the engine room for any purpose whatsoever.

Doors, Ports: All doors and ports opening on to decks must be kept closed while the vessel is moored. Any doors open for access other than the pumproom doors must be closed immediately after use.

Cargo Tank Openings: All cargo tank hatch covers and ullage port covers are to be kept closed. If tanks must be hand sampled or ullaged the ullage openings must be kept closed except while sampling or ullaging cargo.

Sea Valves: All sea and overboard discharge valves are to be closed and sealed shut prior to the start of any cargo loading operation.

Inerting Tanker Cargo Tanks: All empty cargo tanks or tanks carrying cargo must be pressured and fully inerted with gas having an oxygen content of less than 8% prior to the commencement of loading. The oxygen content of the tank blanket will be checked throughout the loading and loading will be stopped anytime the oxygen level rises above 8%.

Insurance (Towing) Wires: Towing wires of at least 50 m. long are to be secured to mooring fittings and run out at the bow and stern on the vessel's outboard side and held in place on short stoppers with the eye about 1.5 m. above the water so they are readily available to a tug in an emergency.

Bonding Cable: The bonding cable from the Storage Tanker or the Shore Berth must be attached to the vessel before the loading arms are connected and removed only after the loading arms are disconnected from the vessel.

Electrical Storms: All cargo or ballasting operations shall be suspended during electrical storms in the vicinity of the vessel.

Engine Status: The vessel's main engine, steering machinery and other essential manoeuvring equipment must be kept in readiness at all times to permit the vessel to unberth on short notice. No engine or propulsion machinery repairs may be carried out while the vessel is moored alongside the Storage Tanker. At all times while the vessel is alongside the Storage Tanker there shall be a responsible licensed engineer of the vessel on duty in charge of all operations in the engine room.

Radio-Radar: The vessel's main radio and radar equipment must not be energised while the vessel is handling cargo or ballast alongside the Storage Tanker or the Shore Berth. The use of intrinsically safe VHF radios for cargo handling and safety operations is permitted.

Scuppers and Drains: All main deck scuppers must be sealed shut and adequate drip pans provided where necessary on deck prior to the start of any cargo operations.

Tug and Small Craft: No tug or small craft are permitted to be alongside the vessel during cargo or ballasting operations without the express permission of the Harbour Master.

Portable Lamps Electrical Equipment: The use of portable lamps, naked lights or electrical equipment on extension cords is prohibited. Only approved intrinsically safe self-contained flash lights are permitted on deck.

Communications and Deck Watch: A deck watch under the direction of a responsible deck officer equipped with a VHF radio is to be on duty at the cargo manifold of the vessel at all times during the cargo and deballasting operations.

Fire and Emergency Signal: In case of fire or emergency on the Storage Tanker or the Shore Berth or the vessel, the vessel shall immediately suspend all cargo operations and blow a series of short, rapid blasts on the ship's whistle until aid arrives.

Rat Guards: Rat guards are required only if a vessel is coming from a plague infected area.

Safety Check List: A safety check list shall be completed and signed by the Master or Senior Deck Officer on duty on both the vessel and the Storage Tanker or the Shore Berth before deballasting and starting the transfer of cargo.

Responsibility for Safe Operations: While a vessel is berthed at the Storage Tanker the Master will ensure and be responsible for adherence to all safety regulations generally followed in the Marine Industry as well as those contained herein. It is the responsibility of the Master to maintain safe and efficient conditions aboard his vessel and to ensure that there is at all times on duty an adequate and proper crew under the supervision of licenced officers for the safe and effective operation of the vessel and compliance with these instructions and regulations.

FACILITIES: There are no facilities at Arzannah Island or the Storage Tanker for receiving or storing supplies for vessels, bunker or fresh water supply, launch service, etc., excepting vessels servicing the Company's operations in the port area.

TIME: GMT plus 4 hours.

GENERAL: *Regulations:* Shipping operations at Arzannah are governed by the Abu Dhabi Petroleum Ports Law No. 12 of 1973 (Petroleum Ports Law).

Agency: The Company does not provide any ship agency services and there are no ship agencies within the port area. Such services must be separately arranged for by the vessel.

AUTHORITY: Amerada Hess Oil Corporation of Abu Dhabi, P.O.Box 2046, Abu Dhabi, U.A.E. *Tel:* 829500. *Telex:* 22275 Amhess Em. *Cables:* Amerhess. *Contact:* R. F. Pool, General Manager. Captain D. Walker, Harbour Master.

AGENT: See "Mina Zayed".

DAS ISLAND, Abu Dhabi: 25.09 N. 52.52 E. (See Plan)

Conduct and movement of vessels within the port are controlled by the Port Officer, Das Island.

DESCRIPTION: Das Island lies some 100 miles N.W. of Abu Dhabi City, in the State of Abu Dhabi, largest of the United Arab Emirates. The Island is the base for the export of crude oil by Abu Dhabi Marine Operating Company (ADMA-OPCO), and liquefied gas and by-products by Abu Dhabi Gas Liquefaction Company Ltd. (ADGAS).

PORT LIMITS: The area of authority is encompassed by a line joining the following positions:

From (a) Lat. 25° 14.0′ N., Long. 52° 48′ E., due East
to (b) Lat. 25° 14.0′ N., Long. 52° 57′ E., then due South
to (c) Lat. 25° 07.7′ N., Long. 52° 57′ E., then S.E.
to (d) Lat. 25° 07.2′ N., Long. 52° 58.8′ E., then due South
to (e) Lat. 25° 04.5′ N., Long. 52° 58.8′ E., then due West
to (f) Lat. 25° 04.5′ N., Long. 52° 48′ E., then finally due North to position (a).

All marine orientated activities within this area, all waters, installations, facilities and structures which are, or may be, erected therein are governed by ADNOC – Petroleum Ports Authority (ADNOC – P.P.A.).

DOCUMENTS:

Bills of Health for Ports visited on voyage.
3 Crew Lists.
3 Manifests (1 original and 2 copies).
1 International Maritime Declaration of Health.

Documents and Specimen Forms: Before the P.P.A. appointed Berthing Master commences any berthing operations certain initial documents must be tendered duly signed, timed and dated as applicable, by the Master. The Berthing Master will acknowledge receipt as necessary. These initial documents are in a booklet form and contain:

1. Clean Ballast Declaration.
2. Ship's Particulars.
3. Conditions of Use of Terminal facilities.
4. Safety requirements.

019-MAR-4 Pre-Berthing Declaration.
Additionally vessels loading Condensate Blend Cargoes:
019-MAR-19 H_2S Content in Condensate Cargo.

A supply of these initial documents will be provided at the vessel's first visit to Das Island. On second and subsequent visits the Berthing Master will receive the documents, duly completed, on boarding thereby avoiding any delays to the vessel.

Also see "General".

FLARE COMPLEX: A series of 6 flares are located in an arc approximately 4,500 ft. (1,370 m.) North of Das Island. The unlit flares may be brought into service without warning. The Northern perimeter of the Flare Zone is marked by a green conical light buoy, Fl. G. 5 secs., in position: Lat. 25° 11.5′ N., Long. 52° 52.2′ E.

An additional flare is situated on a small jetty extending approximately 400 ft. (120 m.) from shore approximately 2,500 ft. (760 m.) from LNG/LPG Berth No. 4.

Numerous flares are situated onshore on the North and N.W. coasts of Das Island.

All of the flares previously referred to are situated within the Restricted Area No. 1.

PIPE-LINE MARKER BUOY: A yellow can buoy fitted with flash (U) 12 secs. amber light, is situated between Berth No. 2 and Berth No. 4. This buoy marks the Southern extremity of pipe-lines running between the two berths. Approximate position of buoy: Lat. 25° 09.1′ N., Long. 52° 53.2′ E.

DAS ISLAND RADIO MAST: See "VHF".

APPROACHES: *Entering and Navigation within the Port:* Navigation/movement within the port area is permitted subject to prior permission being granted by the Port Officer. Vessels visiting the port area must have on board a sufficient range of current hydrographic charts relevant to the area. These charts must be kept up-to-date with regard to Notices to Mariners and other notices promulgated for the area.

CAUTION:

The Umm Shaif Oil Field is approximately 20 miles East of Das Island.
The Zakum Oil Field is approximately 48 miles S.E. of Das Island.
The Bunduq Oil Field is approximately 15 miles West of Das Island.
The Fields, together with their associated submarine oil and gas pipe-lines to Das Island are marked upon hydrographic charts pertaining to the area.

It is essential that vessels/craft approaching Das Island do not enter the Oil Field areas or anchor in the vicinity of submarine pipe-lines.

NOTE: Masters of vessels/craft are advised that actual depths over submarine pipe-lines are generally less than those charted and vessels passing over these pipe-lines may have the under-keel clearance substantially reduced.

Use of anchors in the vicinity of these pipe-lines is strictly prohibited. (See Note: "Pipe-lines" on BA and USHO Charts.)

Approaches to Das Island: Vessels approaching Das Island must navigate with due caution on account of numerous oil platforms and associated submarine pipe-lines within the waters of Abu Dhabi and neighbouring states. (See Cautions on BA and USHO Charts.)

Vessels passing to the East of Das Island must not pass closer than 2 miles from the Island, and then only with prior permission of the Port Officer and giving due care and attention to vessel movements within the port.

SOUTHERN ROUTE:

Vessels approaching from the South must pass not closer than 3 miles South of oil installations etc., in the Umm Shaif Field, thence towards the pilot/anchorage areas S.E. of Das Island (See "Pilotage" and "Anchorage").

Special attention shall be paid to the traffic routing system which passes between the Umm Shaif and Zakum Oil Fields, and vessels/craft shall navigate in accordance with the requirements of the International Rules and Regulations for the Prevention of Collisions at Sea.

NORTHERN ROUTE:

Vessels approaching from the North should normally pass down the West side of Das Island and keep at least 4 miles to the West and at least 5 miles to the South of the Island. However, vessels may pass to the East of Das Island with permission of the Port Officer but see note above.

DEEP DRAFT VESSELS:

Deep drafted vessels may approach the port via the Deep Water Buoyed Channel (See "Navigation Aids"). The channel is intended primarily for the use of deep drafted vessels sailing from Das Island, but vessels intending to enter the port via this channel should advise 'Das Marine' by radio, of their intentions. Masters are advised that this channel is not for the exclusive use of Das Island traffic and are cautioned to proceed accordingly.

PILOTAGE: P.P.A.-appointed Berthing Masters are the designated representatives of the Port Authority and, as such, are responsible to the Port Authority for the observance and implementation of Standing Instructions for Marine Operations.

The Berthing Master will normally board the vessel approximately 2 miles E.S.E. from Tanker Berth No. 2. The pilot station is at Lat. 25° 08′ N., Long. 52° 55.4′ E.

For vessels entering from the North the Berthing Master may board in a different location. If so, he will advise the Master accordingly via VHF radio.

The Berthing Master will undertake the pilotage, berthing and unberthing of the vessel save that the Master of the vessel shall remain solely responsible on behalf of the Owners for the safety and safe navigation of the vessel at all times.

Tankers and Gas Carriers: Tankers and gas carriers are not permitted to berth at or unberth from any of the 6 berths in Das Island without a P.P.A.-appointed Berthing Master on board.

General Cargo Vessels: General cargo vessels are required to employ a Berthing Master. Vessels are required to use the anchorage area designated for cargo operations (See "Anchorage"), but may anchor in the main anchorage while awaiting weather conditions to improve, availability of lighters or if the designated anchorage is congested.

Small Craft: Craft entering the boat harbour are not required to hire pilotage services, but may do so by prior application to the Port Authority.

Movements of all craft into, within or out of the boat harbour is at the discretion of the Port Officer. Allocation of berths is the sole responsibility of the Port Officer. No craft are allowed to enter, manoeuvre within or sail from the boat harbour during the hours of darkness without the prior permission of the Port Officer.

ANCHORAGES: Designated anchorages are established for use by vessels/craft visiting the Port of Das Island. The use of anchors outside these areas must only be undertaken after obtaining permission from the Port Authority.

Main Anchorage Area: This anchorage area lies to the S.E. of Das Island and is for tankers, gas carriers and other large vessels. The area is encompassed by lines joining the following positions:
(a) Lat. 25° 08.0′ N., Long. 52° 55.4′ E. to
(b) Lat. 25° 07.2′ N., Long. 52° 58.8′ E. to
(c) Lat. 25° 04.5′ N., Long. 52° 58.8′ E. to
(d) Lat. 25° 04.5′ N., Long. 52° 55.4′ E. and finally to (a).

Optional Anchorage Area: An optional anchorage for deep draft vessels is located approximately 1 mile to 1.5 miles N.W. from No. 12 Deep Water Channel Buoy.

General Cargo Vessels: The offloading anchorage for general cargo vessels is situated approximately 6 cables South of Tanker Berth No. 2 in an area encompassed by a line joining the following positions:
(a) Lat. 25° 07.5′ N., Long. 52° 53.00′ E. to
(b) Lat. 25° 08.0′ N., Long. 52° 53.00′ E. to
(c) Lat. 25° 08.0′ N., Long. 52° 53.41′ E. to
(d) Lat. 25° 07.5′ N., Long. 52° 53.63′ E. and finally to (a).

Small Craft and Barges: This anchorage lies to the S.W. of Tanker Berth No. 2, in an area encompassed by a line joining the following positions:
(a) Lat. 25° 08.0′ N., Long. 52° 53.00′ E. to
(b) Lat. 25° 08.4′ N., Long. 52° 53.00′ E. to
(c) Lat. 25° 08.4′ N., Long. 52° 53.23′ E. to
(d) Lat. 25° 08.0′ N., Long. 52° 53.41′ E. and finally to (a).

CAUTION:

(a) Pipe-lines connecting the tanker berths to the shore lie close to the Northern boundary of this anchorage.

(b) Within the small craft anchorage area are mooring buoys, installed by the Company for their own usage. The number of buoys installed and their position are liable to be changed without promulgation of any notices.

The use of these buoys by any craft is subject to permission being granted by the Port Authority. Unauthorised occupancy of these buoys could result in strong action being taken against the craft, and any consequential damage/loss of earnings/incidental expenses etc. incurred by the Company will be for the account of the offending craft.

Holding Ground (Sea Bed): The sea bed around Das Island is rock, covered by a few inches of loose sand. Holding is poor and vessels are urged to exercise due care and pay out extra chain.

Wind and Tide: Prevailing winds are from the N.W. Rise of tide can be up to 2 m. but the usual variation is 1 m.

Also see "VHF".

PROHIBITED ANCHORAGES: Prohibited anchorage areas have been established at Das Island. The use of anchors within these areas is strictly prohibited.

Prohibited Anchorage – South of Das Island: A prohibited anchorage area is established to the South of Das Island in an area encompassed by a line joining the following position:
(a) Lat. 25° 08.38′ N., Long. 52° 52.50′ E. to
(b) Lat. 25° 08.00′ N., Long. 52° 52.50′ E. to
(c) Lat. 25° 08.00′ N., Long. 52° 53.00′ E. to
(d) Lat. 25° 08.50′ N., Long. 52° 53.00′ E. then to shore in
(e) Lat. 25° 08.50′ N., Long. 52° 52.78′ E.

Prohibited Anchorage – Tanker Berth No. 3: A prohibited anchorage area exists within a circular area of radius 1,500 ft. (460 m.) centred on Tanker Berth No. 3 in Lat. 25° 08′ 53″ N., Long. 52° 54′ 07″ E. This is also a RESTRICTED AREA.

RESTRICTED AREAS: Restricted areas have been established at Das Island. Vessels/craft are only allowed to enter these areas for duly authorised operational purposes.

Restricted Area No. 1: Enclosed by a line joining the following positions:
(a) Lat. 25° 09.35′ N., Long. 52° 52.77′ E. on shore to
(b) Lat. 25° 09.30′ N., Long. 52° 53.05′ E. to
(c) Lat. 25° 09.16′ N., Long. 52° 53.10′ E. to
(d) Lat. 25° 09.20′ N., Long. 52° 53.30′ E. to
(e) Lat. 25° 09.55′ N., Long. 52° 53.20′ E. to
(f) Lat. 25° 09.55′ N., Long. 52° 53.00′ E. to
(g) Lat. 25° 10.54′ N., Long. 52° 53.00′ E. to
(h) Lat. 25° 10.54′ N., Long. 52° 52.20′ E. to
(i) Lat. 25° 09.80′ N., Long. 52° 52.20′ E. to
(j) Lat. 25° 09.80′ N., Long. 52° 51.85′ E. to
(k) Lat. 25° 09.00′ N., Long. 52° 51.85′ E. then East to shore.

Restricted Area No. 2: Enclosing Tanker Berth by a line joining the following positions:
(a) Lat. 25° 08.80′ N., Long. 52° 53.10′ E. on shore to
(b) Lat. 25° 08.86′ N., Long. 52° 53.30′ E. to
(c) Lat. 25° 08.30′ N., Long. 52° 53.50′ E. to
(d) Lat. 25° 08.25′ N., Long. 52° 53.30′ E. then finally to (a).

Restricted Area No. 3: A circular area of radius 1,500 ft. (460 m.) centred on Tanker Berth No. 3 in position: Lat. 25° 08′ 53″ N., Long. 52° 54′ 07″ E. This is also a prohibited anchorage area.

MAX. SIZE: See "Berthing".

HEALTH: Vessels arriving at Das must carry the usual Bills of Health for ports visited on the voyage. Masters of vessels are required to inform the Company if there is any sick person on board or if there has been sickness on board within the week prior to arrival. Pratique is granted by the Port Medical Officer normally through the Berthing Master.

Health Certificate with valid cholera inoculation (if coming from cholera-infected areas) is compulsory.

RADIO: *Arrival Messages:*

(a) All vessels calling at Das Island Petroleum Port must adopt the following ETA procedures:

1. ETA and updates are to be sent 72 hrs., 48 hrs. and 24 hrs. before arrival at Das. Telexes to be directed to Port Officer, Das.

2. The initial ETA message should normally contain, in addition to the ETA Das Island:
a) Vessels name, port of registry, g.r.t., n.r.t., s.d.w.t. and arrival displacement.
b) Drafts on arrival and sailing Das Island.
c) Cargo requirements – loading/discharging plus fuel requirements.
d) Ballast on board arrival and deballasting time required prior to loading.
e) Whether IGS is operational and that vessel will be inerted on arrival.
f) Validity of all applicable certification.
g) Last port, next port and destination.
h) Masters name.

In order to expedite Pilot attendance Masters should endeavour to confirm their final ETA to Das Island Port Control on VHF Radio Channel 12 six hours prior to arrival at the anchorage.

(b) The Agent shall also provide the Port Health Officer, Customs and Immigration, the requisite ship information 48 hours prior to arrival.

Also see "Berthing" – Tanker Berth No. 3.

VHF: Das Marine maintains a 24 hour listening watch on VHF Channels 12 and 16 and works Channels 12 and 74.

All communications other than Terminal VHF should be sent through "Bahrain Radio" (A9M).

Das Island radio mast is installed in position: Lat. 25° 08′ 30.396″ N., Long. 52° 52′ 43.903″ E. Red lights visible all round the horizon are established at the top of the mast, 81.8 m. above chart datum.

Vessels Anchoring: Vessels anchoring to await berthing instructions must advise "Das Marine" via VHF Radio of:
(a) Anchoring time (Local Time is GMT plus 4 hours)
(b) Anchoring position (bearing and distance from Tanker Berth No. 2)

All vessels at anchor must keep a listening watch on VHF Channels 12 and 16.

When a vessel leaves the anchorage it must advise "Das Marine" via VHF Radio of:
(a) Time departed anchorage.
(b) Reason for departing.

RADAR: Not available.

TUGS: *Tugs and Mooring Launches:* Three Fire Fighting, Pollution Control and Salvage Tugs are generally available at Das Island to assist in berthing/unberthing vessels at the bulk petroleum and LNG/LPG facilities.

Minimum of 2 tugs used for berthing.

NOTE: Only tug's towing equipment shall be used for these operations and only in an emergency situation and in order to avert a potential disaster may ship's equipment be considered for use.

Mooring launches are available for berthing/unberthing operations and for the transportation of personnel.

BERTHING: Tanker Berth No. 1:

Platform position: Lat. 25° 08′ 24″ N., Long. 52° 53′ 19″ E.

Berth not in use. Structure and lights temporarily remain.

Tanker Berth No. 2:

Platform position: Lat. 25° 08′ 39″ N., Long. 52° 53′ 14″ E.

General: This is a fixed platform berth situated approx. 2,400 ft. (750 m.) East of Das Island. Vessels berth alongside 4 flexible dolphins, and 6 mooring dolphins are provided to receive moorings.

Berthing limitations: Capable of accepting vessels of between 16,000 and 265,000 L/T S.D.W. subject to the following limitations as to berthing:

(a) Ballasted or partially loaded tankers up to a maximum of 165,000 L/T displacement.

(b) Fully loaded tankers up to 130,000 L/T S.D.W. provided the displacement does not exceed 165,000 L/T.

(c) Vessels with a max. draft not exceeding 56 ft. (17 m.).

Minimum depth of water alongside is 67 ft. (20.4 m.) at datum.

Moorings: A minimum of 8 mooring lines must be available at each end of the vessel.

General mooring pattern for vessels up to 130,000 L/T S.D.W.:
Forward: 3 headlines, 2 breastlines, 1 spring.
Aft: 3 sternlines, 2 breastlines, 1 spring.

General mooring pattern for vessels in excess of 130,000 L/T S.D.W.:
Forward: 3 headlines, 3 breastlines, 1 spring.
Aft: 3 sternlines, 2 breastlines, 2 springs.

Loading/Discharge Rates: Maximum cargo loading rate is 32,000 bbls./hr. per 16 in. hose (4,200 t.p.h.), 4×16 in. hoses are available. Maximum fuel oil loading rate is 5,000 bbls./hr. per 10 in. hose (750 t.p.h.), 2×10 in. hoses are available. For fuel oil discharge the maximum pressure is 100 p.s.i. at ship's manifold (7.03 kg/sq.cm.).

Control of Loading /Discharge & Safety: Loading/discharge must proceed to a pre-declared plan. Co-ordination of loading/discharge will be undertaken by the Duty Berthing Master, who will also conduct the necessary safety checks at frequent intervals.

Tanker Berth No. 3 (SPM):

Buoy position: Lat. 25° 08′ 53″ N., Long. 52° 54′ 07″ E.

Additional pre-arrival message: The following message will be transmitted to vessels which are nominated to berth at Tanker Berth No. 3.

Quote:

Present indications that vessel will berth at No. 3 SPM. Ship's derrick crane should be rigged on port side.

Ship's manifold suitable for connection of up to 2×16 in. crude and 1×10 in. bunker hoses. Mooring and hose connection by ship's crew. Mooring and hose connection equipment shipped on board after Berthing Masters board. Request accommodation be provided for 2 Berthing Masters whilst on board. Please confirm soonest SWL of hose handling crane/derrick and that suitable forward panama/fairlead aperture is minimum 24 in. horizontally and 18 in. vertically.

Unquote.

General: Tanker Berth No. 3 is a Single Point Mooring (SPM) situated approx. 7,500 ft. (2,285 m.) East of Das Island. The buoy is moored in 94 ft. (28.65 m.) of water at datum, and is served by a 48 in. crude oil submarine pipe-line and a 22 in. fuel oil (bunker) submarine pipe-line.

Vessels will be required to be fitted with a hose handling crane/derrick capable of plumbing at least 2 ft. outboard of the ship's side over the entire length of the portside manifold (including the bunker connection). Minimum SWL of the crane/derrick to be in accordance with the following requirements.

Less than 100,000 L/T S.D.W. 8 tons.
100,000 – 300,000 L/T S.D.W. 10 tons.
Over 300,000 L/T S.D.W. 12 tons.

Berthing Limitations: Capable of accepting vessels up to 410,000 L/T S.D.W. subject to the following limitations: Maximum berthing draft of 72 ft. (22 m.). Maximum sailing draft of 79 ft. (24 m.).

(See "Approaches" "Cautions" – Note: Actual depths over submarine pipe-lines).

Mooring at SPM: The fixed mooring at Tanker Berth No. 3 is a 21 in. circumference nylon braidline rope, 160 ft. (50 m.) long, terminating in a 3 in. diameter stud link chafing chain.

The vessel must have a suitable bow fairlead (24 in. × 18 in.) to permit direct connection of the 3 in. diameter stud link chafing chain to a Smit or similar bracket. If no bracket is available the Company will supply a 15 in. circumference nylon snotter and a 300 ton shackle for connection to the chafing chain. The Company will also supply a special pear shaped link to aid connection to Schmit bracket or when using the nylon snotter.

Loading Rates: The crude oil loading installation comprises 2×10 in. floating hose strings each terminating in 16 in. tail hoses. The fuel oil (bunker) loading installation consists of 1×16 in. floating hose string terminating in a 10 in. tail hose. Flanges are to BS 1560.

Various reducers/spool pieces are available, with prior knowledge of vessel connections if different from shore fittings. Adequate ship crew and tools must be provided for the safe and efficient connection of hoses. There is no shore assistance for connecting/disconnecting of hoses.

Maximum cargo loading rate is 46,000 bbls./hr. per 16 in. hose (6,000 t.p.h.), 2×16 in. hoses are available. Maximum fuel oil loading rate is 7,000 bbls./hr. per 10 in. hose (1,000 t.p.h.), 1×10 in. hose available.

Control of Loading and Safety: Loading must proceed to a pre-declared plan. Co-ordination of loading will be undertaken by the Duty Berthing Master, who will also conduct the necessary safety checks at frequent intervals.

LNG/LPG Berth No. 4:

Platform position: Lat. 25° 09′ 22″ N., Long. 52° 53′ 08″ E.

General: This is an ADGAS installation for the transfer of LNG/LPG and related products. Movement of vessels to and from the berth are governed by the Port Authority.

The berth is a fixed platform type and is situated approx. 4,300 ft. (1,300 m.) N.N.W. from Tanker Berth No. 2 Platform. Vessels berth alongside flexible dolphins and 7 mooring dolphins are provided to receive moorings.

Berthing Limitations: Capable of accepting vessels up to 100,000 L/T displacement subject to a maximum draft alongside of 46 ft. (14 m.). Minimum depth of water alongside is 49 ft. (14.95 m.) at datum.

Moorings: A minimum of 8 mooring lines must be available at each end of the vessel.

General Mooring pattern is:
Forward: 3 headlines, 3 breastlines, 2 springs.
Aft: 3 sternlines, 3 breastlines, 2 springs.

Loading Rates: Loading LNG/LPG and associated products is the responsibility of ADGAS. Maximum LNG loading rate is 10,500 cu.m.p.h. Maximum LPG loading rate is 4,000 cu.m.p.h. Maximum Pentane Plus loading rate is 10,000 bbls./hr. (1,200 t.p.h.). Maximum fuel oil loading rate is 4,500 bbls./hr. per 8 in. flexible hose (650 t.p.h.).

Vessels must have crane/derrick rigged on port side to assist with connection of Fuel Oil (bunker) hose.

Control of Loading: Co-ordination of loading is the responsibility of ADGAS. Fuel Oil (Bunker) loading will be co-ordinated by ADGAS. After the initial safety check by the Berthing Master, ADGAS Representative will conduct the necessary safety checks at frequent intervals. Please note however that the Master can request the services of the Berthing Master in an emergency to take his vessel off the berth.

Small Boat Harbour : Das Island Small Boat Harbour is situated at the South of Das Island. There are a total of 14 berths available at this time, usage of which is governed by the Port Authority.

Eastern Extension: Consists of 2 berths (No. 1 and 2) which are reserved for use by ADMA – OPCO and direct hire deep sea tugs, also for the importation of petroleum products. Maximum draft permitted is 15.5 ft. (4.7 m.).

Inner Harbour: Consists of 12 berths (No. 3 through No. 14). The facilities are reserved for ADMA – OPCO small craft, Government craft and contracted craft for the loading/discharge of materials and supplies.

GENERAL CARGO OPERATIONS: No loading/unloading facilities exist in the port area for cargo vessels and such vessels must provide all equipment and machinery to facilitate transfer of cargo to/from barges, lighters etc., at the designated anchorage area.

Cargo Manifests: One original and two copies of General Cargo Manifests are required to be supplied by the vessel.

Discharging/Loading: Vessels should arrive with all derricks etc., rigged and ready for cargo handling. Barges and associated craft must satisfy the mandatory requirements of the Port Authority, the Consignee being responsible for the provision and control of barges and associated craft. Cargo transfer will normally be carried out continuously dependent on weather conditions.

Dangerous Cargo: The Port Authority must be informed of any dangerous cargo carried in any vessel arriving within the port area whether it is intended for discharge at Das Island or not. Masters of vessels are requested to confirm that any dangerous cargo being carried is stored in accordance with the "Recommendations for the Carriage of Dangerous Goods in Ships" by the United Kingdom Department of Transport or other recognised authority.

CRUDE OIL LOADING: 2 grades of crude are available on each berth. Zakum Crude average API 40° (approx.), and Umm Shaif Crude of 37° (approx.).

Associated product available at this time is Condensate Blend of API 60° (approx.).

All tankers of 70,000 long tons s.d.w.t. must comply with the IMO 1978 protocol and must employ inert gas system.

Masters of vessels arriving to load Condensate Blend cargoes must sign a Declaration (019-MAR-19) to signify that they realise they are loading a highly volatile cargo which contains dangerous quantities of Hydrogen Sulphide (H_2S) in the gas evolved from the cargo.

DENSITY: 1025.

BALLAST: There are no facilities for receiving vessel's ballast ashore for treatment. All vessels must have clean ballast for over-board discharge.

Masters of vessels arriving at Das Island will make a pre-berthing declaration regarding ballast (019-MAR-3).

MEDICAL: A Company Medical Officer and small hospital are available, subject to the Company's discretion, to vessel's crews. Charges for attention, treatment and associated facilities are for the vessel's account.

Masters of vessels must take precautions against heat exhaustion and heat stroke.

Requests for medical attention must be made to the Agency, or through the Duty Berthing Master.

Personnel allowed ashore for medical attention must carry with them Passports/Seaman's card and Health Documents and, if necessary, be accompanied by an interpreter (English or Arabic). An Agency representative will accompany them to the Hospital, but they will not be permitted to visit other Das Island facilities.

FRESH WATER: Not available.

FUEL: Fuel oil bunkers are available at all tanker and liquid gas berths. Type: Interfuel/1500 secs./180 CSD/Redwood. Enquiries should be directed to: ADNOC, P.O.Box 898, Abu Dhabi, U.A.E. Cables: ADNOC, Abu Dhabi. Telex: EM 22215.

Local enquiries for bunkers should be made to the above company through ADMA-OPCO.

NOTE: There are no facilities available for the supply of diesel oil through the tanker/liquid gas berths.

Small craft on charter to ADMA-OPCO are able to obtain limited supplies of diesel oil, the facility is only available through prior contractual agreement and must be loaded at the small boat harbour.

FIRE PRECAUTIONS: Three fire-fighting tugs available.

GANGWAYS: Shore gangways are provided at Berth Nos. 2 and 4, vessel to provide access steps from gangway at ship's rail. At Berth No. 3 vessel must provide accommodation ladder on both sides of the vessel for access.

CUSTOMS ALLOWANCES: No restrictions for tobacco or liquor onboard. Conveyance of alcoholic liquor from any vessel to the shore or from the shore to any vessel, or from one vessel to another, is prohibited.

REPAIRS: No repair facilities are available at Das Island. No repairs are permitted within port limits without prior permission of the Port Authority.

DRY DOCKS: None.

SURVEYORS: Not available.

TELEPHONES: No onboard facilities – fixed berths are linked to Island telephone system. On LNG/LPG Berth No. 4 a ship/shore telephone connection is available.

BANKS: National Bank of Abu Dhabi, Das Island, Abu Dhabi, U.A.E.

STORING: Not available.

REGULATIONS: No cameras allowed on the Island – high security area.

REPATRIATION: There are no facilities for crews of visiting vessels to join or leave vessels at Das Island. Repatriation for medical reasons may be arranged at Master's request with the consent of the Das Island Resident Medical Officer, and the Chief of Police.

AIRPORT: ADMA operate a private airport.

TIME: GMT plus 4 hours.

POLICE/AMBULANCE/FIRE: All emergencies: No. 2 Tanker Berth, Tel: 3333. No. 4 LNG/LPG Berth, Tel: 2222.

SHORE LEAVE: No shore leave is permitted at Das Island. Any crew member who comes ashore unauthorised will be considered as having entered the UAE illegally and as such will be liable to a heavy fine and/or imprisonment.

GENERAL: All vessels entering the port of Das Island must comply with the International Agreement on Safety of Life at Sea (SOLAS) and its amendments and all tankers with the IMO 1978 Protocol.

The Masters of tankers/gas carriers must comply with the following:

Pre-Berthing Declaration and Inspection: All vessels arriving at the Port of Das Island must be suitably ballasted and/or trimmed for berthing with regard to weather and existing circumstances.

All vessel's personnel must be familiar with the Das Island Safety Requirements and other applicable Standing Instructions.

Safe and adequate access to the vessel must be provided for the Berthing Master. If the Berthing Master considers the means of access unsafe or unsuitable, the vessel will be delayed until such time as proper access is provided. Any loss will be to the vessel's account.

The requisite initial documents must be completed in full, signed and handed to the Berthing Master prior to commencement of berthing operations.

Permission to berth will not be granted unless the Berthing Master is satisfied that the vessel can safely complete all parts of the operation, including but not limited to, berthing, ballasting, deballasting, cargo transfer and sailing. If for any reason it is deemed necessary to refuse permission to berth, the Port Authority will be informed and a detailed inspection of the vessel will be undertaken. Shortcomings, etc. will be noted and the Master informed of them. If the vessel is unable to rectify the identified faults, it will be removed from the Port Area. Owners/Charterers will be notified accordingly.

Fire Wires (Emergency Towing Wires): Emergency towing/fire wires of sufficient strength and construction are to be provided and secured forward and aft, on the offshore side of the vessel, with the towing eye maintained at 6 ft. (2 m.) above the water level.

Access to Vessel: While at the loading berths all vessels must provide an accommodation/pilot ladder suitably positioned and maintained at 6 ft. (2 m.) above the water level on the offshore side of the vessel.

M.E.N.A.S.: ADMA-OPCO Agency Section is a collection agency for Middle East Navigation Aids Service (M.E.N.A.S.) dues and, on the authority of the Master, dues payable to M.E.N.A.S. are collected and remitted on behalf of the vessel.

Courtesy Flag: The correct courtesy flag for vessels visiting Das Island is the flag of the United Arab Emirates. This flag may be obtained from the Agents.

Notice of Readiness: Prior to commencement of any transfer operation within the Port of Das Island, the Master shall tender, to the Company, a written Notice of Readiness to load/discharge, duly timed, dated and signed by the Master. Receipt of such notice does not necessarily imply acceptance.

Early Departure Procedure: E.D.P. is available to all tankers at Das Island. Tankers not accepting E.D.P. are generally unberthed after completion of transfer and must proceed to the Anchorage Area to complete documentation.

Note: Vessels loading fuel oil (bunkers) are required to accept E.D.P. to minimise delays to other vessels.

OIL POLLUTION: Any incident of pollution from a vessel within the Port of Das Island is a contravention of Part VI of the Abu Dhabi Petroleum Ports Law No. 12 of 1973.

In the event of the escape of oil or oily water from any source, operations must be suspended immediately, and every effort made to identify, stop, contain and clean up the pollution. The Port Authority must be informed via the Duty Berthing Master, in order that the Pollution Contingency Plan can be initiated.

Transfer operations will not be resumed until such time as the Berthing Master and the Port Authority are satisfied that the cause of pollution no longer exists and that the affected area is sufficiently cleaned and safe. Oil Pollution incidents that occur within the Port of Das Island will be fully documented and the necessary documents (019-MAR-41) signed by the Master before transfer is resumed.

Masters of vessels/craft are warned that any breach of the provisions of Part VI of the Abu Dhabi Petroleum Ports Law No. 12 of 1973 will render themselves liable to prosecution.

Pollution: The dumping of waste, dangerous, toxic or other hazardous material within the Port of Das Island is strictly prohibited.

AUTHORITY: Abu Dhabi National Oil Company – Petroleum Ports Authority (ADNOC – P.P.A.) Das Island, Abu Dhabi, U.A.E. *Tel:* Direct 057-31012 or 826600 (Das Ext. 3368). *Telex:* 22284 Adma EM. *Cables:* Admarine Das, Abu Dhabi. *Contact:* Captain I. I. Kazi, Port Officer, Das.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., see "Mina Zayed".

DUBAI (Including Khor Dubai and Hamriya Port): 25.16 N. 55.18 E.

ALSO SEE "PORT RASHID".

COURTESY FLAG: UAE and Dubai.

PROHIBITED AREA: All shipping is warned to keep clear of an area contained within a line drawn from Port Rashid Main Light (Lat. 25°16.0′ N., Long. 55° 16.2′ E.) to a position (Lat. 25° 16.2′ N., Long. 55° 15.1′ E.) i.e. 272° – 1,850 m. from this light thence to the shore line on a Bearing of 180°. This has been declared a prohibited area.

Small craft, dredgers and hopper barges will be operating within this area. The main breakwater will consist initially of an island with the breakwater extending both seawards and shorewards from it.

White flashing beacons will be positioned at 400 m. intervals along the breakwater and in addition various construction lights will be exhibited.

Legal steps will be taken against any negligence whatsoever from Masters.

DOCUMENTS: Following should be airmailed to Agent prior ship's arrival: 2 copies Dangerous Cargo List, Stowage Plan in duplicate, Hatch List in duplicate, 7 copies of Cargo Manifests, 1 copy of each Bill of Lading. On arrival, 4 Crew Lists required.

Immigration: Vessels of less than 3.0 m. draft are expected to berth and report at the Immigration Station on the Customs Wharf to report In and Out. Larger and deeper draft vessels are cleared In and Out by Agents.

APPROACHES: Dubai Beacon Fl. 3 Sec. Port Rashid Lee Breakwater 25° 16.77′ N., 55° E., thence by 5.5 metre channel parallel to the breakwater, entry dolphins lit. Channel depth maintained centre line though opening spans of Al Maktoum and Al Garhud Bridges beyond Al Jadaf Ship Lift in Khor Dubai Lagoon.

ANCHORAGE: Marked by lightbuoy in position 310°, 1.06 miles from Nayif Tower. Recommended anchor to N.E. of lightbuoy in approx. position Lat. 25° 17′ 4″ N., Long. 55° 16′ 16″ E. Depth 36 ft. to 40 ft., holding ground considered poor, bottom sand and coral. The closer ships are able to anchor to the buoy, the faster turn-around on barges will be attained. *Warning:* Occasional strong N.W. winds, known as "Shamal" will make discharging impossible and *it is very important* that ships have engines on "stand-by" during such times. Ships allowed enter and leave anchorage at any time of day or night. Launch service through Agent's ship to shore from anchorage, and ship's own boats can also be used without Authorities' permission.

PILOTAGE: No organised Pilot service, but Pilot can be arranged by Agents.

RESTRICTIONS: All cargo discharged into barges at anchorage. Coasters with drafts of 11 ft. 6 in. or less can enter creek and discharge alongside. Such vessels usually require a tug boat to pilot them into the creek. Tugs available through Agent. Importation of artificial pearls is prohibited. Purchase of liquor forbidden except by permit.

HEALTH: Prior arrival, Masters are required to send a cable to the Port Health Dept. addressed "Quarantine-Municipality-Dubai" on the following lines:

(Vessel's name). . . ETA . . . Hour . . . Date . . .
Crew all healthy request Free Pratique
Master

Normally all vessels declared healthy by the Master are automatically allowed to berth immediately on arrival, and Health Dept. personnel will board vessels after berthing.

Arrival: Ships boarded immediately upon arrival weather permitting, and Masters then have to complete a short Arrival Report. No formalities of any kind with Port Authorities and ships allowed to arrive/sail at any time.

Departure: No port clearance is issued in Dubai. A letter will be issued by Agent which may be produced at next port of call instead of usual departure clearance.

RADIO: "Khor Dubai" R/T (VHF MF/SSB) near entrance, 24 hour watch on 2182 kHz (MF/SSB), Channel 16/14 VHF. Controls movements and berthing, broadcasting navigation warnings and weather forecasts.

TUGS: Required, on basis of overall length, for Northern reaches and bridges, details available from Khor Dubai Radio and Agents.

DISCHARGE TURN: Priority of discharge given to ships carrying mail and/or passengers for Dubai. Ships carrying less than 100 weight or measurement tons have priority and are supplied with one barge for discharge of cargo immediately on arrival, whether turn is in force or not. Should there be congestion, Agents require Stowage Plan showing clearly that all Dubai cargo is freely available and Master's signature on a request for discharge turn. Based on this, vessels will be registered for turn. Registration can only be performed during office hours.

After confirmed registration, at which will be given a deadline for turn, ships may proceed to other ports for discharge, but must return Dubai prior time and date given, otherwise turn is lost. Particular cargoes for H.H. The Ruler have priority, This should be evidenced by Manifests which will be produced to Customs Authorities in Dubai for approval. The cargoes must be accessible for immediate discharge, which should be verified by stowage plan.

BERTHING:

Khor Dubai: 2,300 m. of unnumbered berthing exists on the West Bank of the Khor and 3,300 m. on the East Bank. Depth between 3.0 m. and 5.5 m. Details from "Khor Dubai" Radio. Whereabouts of vessel to be reported on berthing.

Hamriya Port: Main Breakwater Light 25° 18′ N., 55° 20′ E.

Flag: UAE and Dubai.

Documents: The following should be airmailed to Agent prior to ship's arrival.

2 Dangerous Cargo Lists.
2 Stowage Plans.
2 Hatch Lists.
2 Freight Manifests.
7 Cargo Manifests.
1 Copy of Bill of Lading.
4 Crew Lists required (on arrival).

Approaches: Approach channel and entrance dredged to 6.0 m. Breakwaters are lit.

Pilotage: No organised Pilot Service, but Pilots can be arranged by Agents.

Restrictions: Vessels will not be allowed to remain alongside the quay when not working cargo if other vessels are waiting.

Draft at Berths: There are no berth numbers. However, there are 3 quays. One measuring 450 m. in length with a draft of 4.5 m. 1 – 160 m. and 1 – 900 m., the last 2 with draft of 6 m.

Tugs: Required on basis overall length as instructed by "Khor Dubai" Radio and arranged by Agents.

Radio: "Khor Dubai" Radio (VHF MF/SSB) near Khor mouth, the station controls movements, etc. in Mina Hamriya. 24 hours watch on 2182 kHz and Channels 16 and 14. Navigation Warnings, weather forecasts, etc are also broadcast.

The Port Signal Station (call sign: "Khor Dubai") equipped with VHF and M/F SSB is situated near the entry to Dubai Creek. Vessels should contact the station by VHF Channel 16 or 12 or on RT 2182 kHz. Signal station is manned 24 hours.

Pratique: Not applicable.

Berthing: Berthing is reported to Khor Dubai Report Station.

Fresh Water: Presently available at one point only. The supply is made by Port & Customs Office and vessels may directly order their requirement or through Agents.

Fuel: E.G.P.C. supply fuel at bunker point opposite entrance.

Cargo Handling: Port is not involved in the cargo discharge operation.

There is no equipment available in the port such as cranes, forklifts etc. and if required, to be arranged by Agent.

Neither shed nor yard is available and therefore cargo is accepted on direct delivery basis only.

Stevedores: No stevedoring company in the port, labour is arranged by Agent.

Telephones: No connections at the quays. However, there are telephones in the adjacent Customs Office.

Lighterage: Available.

Shore Pass: After berthing, all passports and Seaman's Books should be surrendered to the Customs Office situated in the port area with 3 copies of Crew List against which shore passes issued. Before sailing of the vessel, a clearance should be obtained from the Port & Customs Office (Launch Section) and produced to the Customs Office for releasing the Seaman's Books/Passports.

Lay-By/Laying-Up Berth: 16 bollards available on Lee Breakwater for Mediterranean Moor of Lay-by/Lay-up vessels.

Port Authority: Department of Ports & Customs, Government of Dubai

STEVEDORES: Loading/Discharging Rates: Stevedores, tally clerks, supervisors, etc., will be supplied from shore at the same time as ships are supplied with barges. These people working under vessels' supervision and responsibility.

First Shift: from 0800 hrs. to 1800 hrs. Second shift: from 1800 hrs. to 2400 hrs. Third Shift: from 0000 hrs. to 0800 hrs. Very difficult to get stevedores to work third shift unless ship will complete within a reasonable time into the third shift. First 2 shifts always worked.

Drinking water must be supplied by ship free of charge to all men from shore but food only to supervisors, tally clerks, watchmen and foremen.

Expected outturn working three hooks:

Bagged cargo	400 – 500 tons
Cased cargo	150 – 200 tons
Timber on deck	300 – 350 tons
Timber in hatches	200 – 250 tons

Usually 5 ships can work at one time.

MEDICAL: Qualified doctors available ashore and also a hospital. Most medicines available at fairly low prices. Dentist also available. Walking cases should be brought ashore *in the morning* for treatment, but in emergency, a doctor will board the ship.

TANKERS: See "Port Rashid".

FRESH WATER: Supplied at the Bunker Berth, otherwise supply is by road tanker.

FUEL: 3 small vessel bunker berths by Al Shindaga Fish market, otherwise refuelling carried out by road tanker.

FIRE FIGHTING: No facilities available at anchorage.

CUSTOMS ALLOWANCES: *Tobacco:* 1,000 cigarettes or 200 cigars or 1 kilo of tobacco. *Perfumes:* 1 litre of toilet water (Eau de Cologne) and not more than 150 grams of perfume. *Currency:* Unlimited.

CONSULS:

Egypt
Great Britain
India
Iran
Iraq
Italy
Kuwait
Netherlands
Norway
Pakistan
Qatar
Saudi Arabia
Sweden
Switzerland
USA

Additional Embassies/Consulates in Abu Dhabi.

REPAIRS: Fully equipped engineering workshops, radar and radio technicians capable of carrying out extensive repairs available. Underwater cleaning, repairs and other works connected with this also available. See also Dubai Dry Dock under "Port Rashid".

DRY DOCK: Two ship-lifts of 450 tons and 2,850 tons (Nominal lift) respectively, plus adjacent berthing, side travellers, etc., are installed at Al Jadaf in Khor Dubai Lagoon on the North West Bank. Over five ship and engine repair companies have workshops in this compound. *Bridge transits* through opening span regulated by time and tide, are arranged with Police/Ship Docking Yard by Agents.

SURVEYORS: Lloyd's.

REPATRIATION: Visa is required for non-UAE citizens visiting Dubai for a period exceeding 7 days. Agent can assist provided complete passport details given well in advance. Excepted are British Subjects with right of abode in the UK who are permitted to remain in UAE without visas for a period of 1 month. For temporary visitors of other nationalities the Agent can arrange under its sponsorship transit visa valid for 7 days provided the person holds a ticket showing a confirmed flight out of UAE. However, person must leave UAE via airport through which he entered.

When advise arrival flight details also advise seaman's book number and nationality.

Seven days' transit visa:

From 1st February, 1985 a new form will be used by the Immigration Authorities in Dubai for persons entering Dubai on Transit Visa.

As the form has to be typed out in both English and Arabic it is essential that full details of arriving persons are in hand at least 48 hours prior to arrival.

The information required is as follows:

1. I, the undersigned wish to sponsor the undermentioned who wishes to enter the country for ....
2. Name of the sponsored .... Father's Name ....
3. Nationality .... Passport No. ....
Category: Normal/Diplomatic Service.
4. Place and Date of Issue .... Expiry Date ....
5. Place and Date of Birth .... Profession ....

AIRPORT: Regular international scheduled flights. Also domestic flights within Gulf area.

TIME: GMT plus 4 hours.

HOLIDAYS: 1st January; 10th February; 23rd June*; 6th August*; 25th August*; End of Ramadan 3 – 5 days holidays, End August. 1st November*; 21st November*; 2nd December; 25th December.
*Not fixed.

SHORE LEAVE: Officers and crew may come ashore during daylight hours for shopping and recreation. They shall then carry a valid passport, ID-card or Seaman Book, which will be placed at the Immigration Office when landing. The passport, ID-card or Seaman Book will be returned upon returning to ship. No alcoholic beverages allowed to be brought ashore.

LAUNDRY: Available but about 2 – 3 days required.

PROVISIONS: Fresh vegetables, frozen stuff, bonded stores, etc., available. Requirements should be given immediately on arrival. (The liquor and beer prices are high.).

GENERAL: Dunnage – not available. Heavy lifts – not available at anchorage. Shore cranes have lifting capacity up to 30 tons.

Weather: Summer months in the 40's Centigrade and humid. Winter months in the 20's Centigrade and dry.

Alcoholic Beverages: Allowed to be stored and consumed on board also in port, while sale of this and pornographic materials is strictly forbidden.

Accommodation: Construction of many hotels completed and rooms in all price ranges are now readily available in Dubai on both the Deira and Dubai side.

Business Office Hours: Normally 0800 to 1300 hrs. 1600 to 1800 hrs. Government offices: 0800 – 1200 hrs. Banks: 0800 – 1200 hrs.

Ship Spares in Transit: Agents in Dubai advise that spares arriving in Dubai even with valid invoice, certificates of origin and packing lists attached are now opened by the Dubai Airport Customs. All Owners and operators are thus warned not to include any items which are banned in boxes containing spare parts as if detected they will be confiscated.

Further to the above, Agents give below a list of prohibited articles:

(a) All pornographic literature, videos, films, pictures.
(b) Alcohol.
(c) Narcotic drugs.
(d) Wireless transmitters.
(e) Firearms and ammunition.
(f) Products of Israeli – blacklisted manufacturers.
(g) Exposed cinematographic (movie) films.
(h) Political and religious literature.

– need prior approval from the Ministry of Information. The Customs are particularly sensitive about video tapes and when found in luggage they are subject to check. The checking is taking time and passengers are kept waiting sometimes for hours. To avoid trouble and irritation strongly recommend that crew arriving Dubai should be advised by principals not to carry any video tapes.

AUTHORITY: Government of Dubai, Department of Ports and Customs, Marine Adviser's Office, P.O.Box 2001, Dubai, United Arab Emirates. *Tel:* 457772. *Telex:* 49787 Khord Em. *FAX:* 00971-4-450810. *Contact:* Captain W. Nelson, Marine Adviser.

AGENT: Gulf Agency Co. (Dubai) Pvt. Ltd., P.O.B. 2404, Dubai, U.A.E. Cables: "Confidence", Dubai. Tel: 457555 (12 lines, 24 hour service). After office hours: 480424, 440193, 582857. Telex: 45448, 45809 ("Gacdb EM"). Radio: Marine VHF radio, stand-by on Channel 16 (156.8 MHz) Callsign "Confidence, Dubai". Fax: 457202.

Operators of ship-servicing and supply organisation: Crew-changes, mail spares and/or delivery of provisions undertaken at sea without deviation to serviced vessel.

Owners and Masters should contact G.A.C. Dubai by cable or telex regarding servicing requirements. Rendezvous positions are selected by Shipmaster as follows: Off Dubai, at any Latitude along meridian 55° East, or off Fujairah at any Longitude along parallel 25° 10′ North.

FATEH TERMINAL (offshore Dubai): 25.35 N. 54.25 E.

(See Plan)

Oil Loading Terminal of the Dubai Petroleum Company (DPC).

Note: All tankers loading Fateh Terminal cleared by Dubai Petroleum Company, taking care of all necessary documentation concerning cargo. DPC does not charge owners/operators for this service (at the present time). However, for all other agency services DPC refers owners/operators to regular shipping Agents in Dubai.

According present oil company regulations vessels not allowed receive any deliveries or any launch alongside while loading at Terminal. Deliveries of mail, spare parts and performance of crew changes will, therefore, take place at Terminal anchorage, Dubai anchorage, or at a rendezvous point.

Weather permitting, Fateh Terminal operates 24 hours a day, 7 days a week and provided berth not occupied, tankers will be berthed upon arrival, day or night.

LOCATION: Fateh Terminal consists of the crude oil production and export facilities of the Fateh, S.W. Fateh, Falah and Rashid Fields. The terminal limits are bounded by the following co-ordinates:

(i)	Lat. 25° 38′ 00″ N.	Long. 54° 05′ 16″ E.
(ii)	Lat. 25° 40′ 00″ N.	Long. 54° 30′ 00″ E.
(iii)	Lat. 25° 15′ 00″ N.	Long. 54° 30′ 00″ E.

Within this area the anchoring of vessels is prohibited and the Terminal Safety Regulations have effect.

NAVIGATIONAL AIDS: All platforms, structures, SBMs and floating storage vessels are fitted with a white light Fl. "U" ev. 30 secs. vis. 5 miles and horn every 30 secs. sounding "U" in Morse.

Numerous working lights are also fitted on platforms, etc.

Six flares in position:

(1)	Lat. 25° 35′ 50″ N.	Long. 54° 25′ 50″ E.
(2)	Lat. 25° 35′ 56″ N.	Long. 54° 25′ 20″ E.
(3)	Lat. 25° 35′ 48″ N.	Long. 54° 25′ 18″ E.
(4)	Lat. 25° 29′ 44″ N.	Long. 54° 18′ 29″ E.
(5)	Lat. 25° 33′ 30″ N.	Long. 54° 11′ 30″ E.
(6)	Lat. 25° 21′ 00″ N.	Long. 54° 29′ 00″ E.

The flares give an orange light which may be visible from the Terminal, depending on atmospheric conditions, in addition the flare structures show a white light flashing "U" in Morse every 30 seconds visible for 5 miles.

Numerous small unlit buoys for the use of working craft may be encountered within the Terminal area.

APPROACHES: On approaching Terminal, Masters of incoming tankers should head for Anchorage Area (see "Anchorage") where, under normal conditions, their vessel will be boarded by a DPC Mooring Master.

ANCHORAGE: An area immediately East of Terminal Limits is designated as the Anchorage Area, centred on position as follows:

Lat. 25° 36′ N. Long. 54° 31′ E.

This co-ordinate represents the centre of a circle with a radius of approximately 1 mile which must be used by vessels requiring to wait at anchor. Anchoring within the Terminal limits is strictly prohibited. For reference purposes, the anchorage area bearing from Dubai Trade Centre Light is 298° true, distance 47.8 miles and from Jazirat Sirri Light 185.5° true, distance 18.2 miles.

If a tanker is not scheduled to berth on arrival (e.g. another vessel is in the berth, or the port is closed on account of adverse weather conditions, etc.) Masters will be advised by radio and requested to anchor.

FACILITIES: For the export of crude oil 2 single point mooring buoys have been installed in positions:

SBM No. 1 Lat. 25° 34′ 37″ N. Long. 54° 28′ 18″ E.
Bearing 242° true 2.83 miles from anchorage.
SBM No. 2 Lat. 25° 35′ 12.6″ N. Long. 54° 24′ 36.6″ E.
Bearing 262° true, 5.85 miles from anchorage.

READINESS: After arrival at the Anchorage Area and when the tanker is ready in every respect to load, the Master may tender his Notice of Readiness.

Notices of Readiness will be accepted provided one or other of the following events shall have transpired:

(a) The Master shall have received the Mooring Master on board or;
(b) The Master shall have dropped the anchor in the Anchorage Area.

Port Closed: Notices of Readiness will not be accepted during periods when the port is closed. The port is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with the Fateh Terminal Superintendent or his Deputy.

Order of Berthing: Vessels will normally berth in order of arrival.

DOCUMENTATION: *Documentation and Ship's Agency:* In the normal course of events, DPC acts as tanker Agent and prepares all crude oil loading documents. For these services no charge is made.

Early Departure Procedure: At the Master's discretion. In order to expedite turn-round of vessels in this port and avoid undue delays caused by weather or other circumstances, Masters of vessels on arrival are requested to sign blank cargo documents.

Normally, completed cargo documents required by the Master will be placed on board prior to sailing. If this is not possible without incurring undue delays, the relevant documents will be airmailed to the Master to await the vessel's arrival at her discharge port.

The official cargo, i.e. quantity loaded, will be transmitted by radio whilst unmooring. In the event of a dispute, the receipt of a Letter of Protest will be acknowledged by the Mooring Master. Any protests by the Master concerning the quality of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

Outward Clearance: A tanker will be considered clear to depart Fateh Terminal when the crude oil loading documents have been delivered to the Master, or in the case of early departure, clearance will be given through the Mooring Master.

Mail: Official ship's mail and crew's personal mail will be handled and shipowners debited accordingly.

PILOTAGE: Pilotage is compulsory within the Terminal limits. Vessels to be moored at Fateh Terminal will be boarded by a DPC Mooring Master in the Anchorage Area. The Mooring Master will advise the ship's Master on approaches to the SBM, mooring and unmooring, connecting and disconnecting hoses and all other operations within the Terminal area including all manoeuvring of the vessel. The Master or one of his qualified deck officers must be on the bridge at all times while the tanker is being manoeuvred.

The services of a Mooring Master are provided without charge, upon the express understanding and condition that when any Mooring Master furnished by DPC goes aboard a vessel for the purpose of assisting such a vessel, he becomes for such purposes the servant of the owners of the vessel and DPC shall not be liable for any damage or injury resulting from the advice or assistance given or made by such Mooring Master while aboard or in the vicinity of the assisted vessel.

MAX. SIZE: SBM No. 1. and No. 2: Max. displacement 350,000 tons. Max. draft, no restriction. Depth of water 150 ft.

RADIO: *Communications with DPC:* Cable Address: Dupetco, Dubai. Telex: 45557 or 45423 DPC EM.

Initial Communication: Initial communication between ships and DPC should be via Bahrain Radio (call sign "A9M") which operates on a 24 hour basis.

Communications Within 60 miles of Terminal: Once ships are within about 60 miles of Fateh Terminal communication may be established by radio telephone on International Marine VHF Channel 16 (156.8 MHz). This frequency is monitored continuously. Once contact has been made on Channel 16, further conversation should be conducted on either Channel 14 (156.7 MHz) or Channel 9 (156.45 MHz).

Communications after DPC Mooring Master has Boarded: A DPC Mooring Master will board incoming tankers in the anchorage area and will bring with him portable UHF radio telephone units. From that time onwards all communications between ship and platform will be conducted by the Mooring Master via the portable UHF units, unless owing to failure of portables it is necessary to revert to mains VHF Channels.

Advice of Tanker Arrivals:

Initial Estimated Time of Arrival (ETA): When a tanker bound for Fateh Terminal is within 72 hours of arrival at Fateh Terminal, the Master should notify DPC by cable via Bahrain Radio giving the following information:

(a) Name of tanker.
(b) ETA in GMT (Dubai time is GMT plus 4 throughout the year).
(c) Quantity of cargo required.
(d) Maximum loading rate.
(e) If the ship's hose connections are different from 16 in. or 12 in. standard ASA 150 lb. type, the size should be stated.
(f) Deballasting time (if any).
(g) If vessel proceeding to any port(s) prior to Fateh, and if so, any anticipated delays.
(h) If AKD stopper or SMIT towing bracket is fitted, and if so, distance from centre bow fairlead.
(i) Confirm inert gas system is in use and operational.
(j) Indicate if vessel is in possession of an International Oil Pollution Prevention (I.O.P.P.) Certificate.
(k) Sailing draft and corresponding sea water displacement tonnage.

Subsequent ETAs: Sections *(a)* and *(b)* of the above message should be repeated via Bahrain Radio when the tanker is within 24 hours and again when within 12 hours of arrival at the Fateh Terminal.

Unreasonably insufficient or inaccurate ETA messages may alter the order of berthing of ships to the disadvantage of those ships giving sufficient and accurate ETA messages.

Radio Telephone Communication when Approaching Fateh Terminal: When about 60 miles off the Terminal contact may be made by radio telephone on International Marine VHF Channel 16, and communications should continue via this method until a DPC Mooring Master boards.

MOORING: *Preparation for Mooring:* Vessels are requested to have pilot ladder, hoist and/or accommodation ladder safely and securely rigged for immediate use and long enough to meet the Mooring Master's launch. Vessels will provide a lee for the Mooring Master on the port side both when boarding and leaving.

For vessels with a freeboard of 40 ft. or more, the accommodation ladder shall be rigged and lowered down so the platform is not more than 10 ft. from the water and a short pilot ladder rigged to facilitate access to the platform.

Tankers are requested to have ready on the forecastle head the following:

(a) 2 towing ropes, polypropylene or other man-made fibre.
(b) 2 messenger ropes, minimum lengths of 300 ft.
(c) Selection of shackles, wirestrops and tools.

When the approach to the terminal commences, the berthing tug will be available to assist in berthing. The method and position in which the tug will be utilised will be dependent upon the weather and tidal conditions prevailing. At this time, the mooring launch will prepare the mooring and standby at the SBM.

Approach to the SBMs necessarily involves passing, in close proximity, various platforms and other structures. It is therefore imperative that all measures are taken to ensure that there is no loss of power or steering during these manoeuvres.

The mooring launch will be situated about 600 ft. from the SBM with a 10 in. circumference polypropylene pick-up rope secured to the main mooring, which consists of 2×18 in. circumference nylon ropes, connected to a standard O.C.I.M.F. chafing chain and a 40 ft.×3.5 in. circumference pick-up wire rope.

During the approach of the tanker towards the SBM, ship's crew, with the advice of the Mooring Masters Assistant (MMA) will prepare the forecastle for the mooring operation. This will include passing a messenger rope through the centre bow fairlead (or other fairlead designated by the MMA) taking the end to the after port corner of the forecastle and, from this point, lowering the end to the waters edge. The mooring attachment will also be prepared, and will be, in order of preference:

(a) Bow stopper (AKD). (c) Bitts.
(b) Towing bracket or futtoch (Smit).

Vessels which, in the Mooring Master's opinion, do not have a suitable method of attaching the mooring, will be refused permission to berth. Should bitts have to be utilised, or should the towing bracket be located at a substantial distance from the fairlead, wire snotters of 2 in. diameter and various lengths are available from the berthing tug.

Upon the close approach of the tankers bow, the mooring launch will manoeuvre alongside the port shoulder and attach the mooring pick-up rope to the ship's messenger line. The tanker will then heave up the messenger and pick-up rope, carefully picking up the slack as the tanker approaches the SBM. The mooring launch will now be stationed at the end of the floating hose string in order to tow the hoses clear of the ship's side should this become necessary.

The pick-up rope should be continually hove in as the tanker nears the SBM. The distance between the bow and the SBM will be continuously relayed to the Mooring Master on the bridge by the MMA from the forecastle and by the berthing tug. When the pick-up wire has been brought inboard through the fairlead, it may be necessary to adjust the direction of pull and assist the chain through the fairlead. Action required by the tanker's crew in this respect will be advised by the Mooring Masters Assistant.

When the chain is inboard, depending upon the method of attachment available, the connection will be made. It should be noted that should a Smit bracket or bitts be utilised, the first triangular plate on the chain must only be connected on tankers of less than 100,000 d.w.t. and on vessels of greater size, the chain must be hove in and the connection made on the second, larger, triangular plate.

After the connection to the mooring is made, it may be necessary to run the engines astern to ensure the tanker does not contact the SBM. The Mooring Master will then advise "Finished with Engines", but at no time during the tankers stay in port shall the engines be immobilised.

Shortly after the mooring operation is completed, the berthing tug will be secured from the stern of the tanker on a long ships rope, polypropylene if possible.

LOADING: *Lifting Hoses:*

SBM 1: Two 16 in. diameter hoses will be lifted by ship's gear on the port side. Each lift is 9 tons.

SBM 2: Two 16 in. diameter hoses will be lifted by ship's gear on the port side. Each lift will be 9 tons.

The hoses shall be hoisted and connected by ship's crew. The Mooring Master will advise the ship's officer in charge concerning lifting techniques.

Sundry Hose Connecting Equipment: Tankers shall be equipped with the necessary blocks, tackle, wrenches, gaskets, bolts, nuts, etc., to efficiently effect the hose connection.

Flange Sizes: 16 in. – 12 in. reducers will come on board the tanker with the mooring gear thus enabling tankers with either 16 in. or 12 in. ASA 150 lb. flanges to connect directly to the Terminal hoses. Flange size 16 in. – 12 in., 16 in. – 10 in. reducers with ASA 150 lb. flanges are available if required to enable tankers with 12 in. – 10 in. manifold connections to connect to the Terminal hoses.

Communications During Loading: (See "Radio"). All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with the Production Platform constantly via portable UHF units. In case of temporary breakdown of the portable UHF circuit, contact may be continued on International Marine Channels 16, 14 or 9 if the vessel is so fitted.

Failure of Communications: Should communication with the Production Platform fail, loading will cease.

Emergency Shut-Down: An emergency cessation of loading may be effected by the ship's VHF Channel 16.

Cargo: Oil loaded at Fateh is Dubai Stabilised Crude with an average API of 31.0. Loading temperature varies between 90°F in the Winter to 100°F in the Summer months. The oil is relatively free of sediment and low in wax and asphaltenes.

Loading Rate: At SBM No. 1 the maximum loading rate is 60,000 bbls.p.h. At SBM No. 2 the maximum loading rate is 70,000 bbls.p.h.

BALLAST: *Precautions Regarding Pollution:* It is the responsibility of the ship's Master to see that no crude (or bunkers', diesel or bilge) oil or dirty ballast is pumped or spilled overboard from his ship whilst in the area. Drip pans should be used, especially when disconnecting hoses in order to prevent spillage overboard.

Scuppers to be Plugged: Before loading commences, all overside scuppers shall be made oil-tight.

No facilities for Receiving Dirty Ballast: At Fateh Terminal there are no slop tanks or facilities for receiving dirty ballast. Tankers must arrive with clean ballast. In the event a tanker does have dirty ballast it will not be allowed to be pumped overboard. The dirty ballast will be collected into one tank, measured and left aboard.

Discharging Ballast at Night: During the discharge of ballast in darkness, the sea shall be adequately lighted in the area of discharge.

MEDICAL: At Fateh Terminal medical and dental services are not available. In emergencies requiring hospitalisation, the patient will be taken by boat from the tanker to the Production Platform, hoisted to the upper deck of the platform and flown by helicopter to Dubai. The shipowner will be charged for all expenses incurred.

FUEL: Bunker supply not available at Fateh.

Fuel oil (IFO 180 cSt) can be arranged at Mina Jebel Ali. Gas oil can also be arranged.

DENSITY: 1030.

GENERAL: The following are not available at Fateh Terminal: fresh water, stores, boats for hire; repair facilities; facilities for changing ship's crew.

There is no shore leave.

Charts: Charts covering the approach to and the area of Fateh Marine Terminal are:

British Admiralty Nos. 2837, 2887, 2888, 2889.
U.S. Hydrographic Office No. 3647.

AUTHORITY: Dubai Petroleum Company, P.O.Box 2222, Dubai, U.A.E. *Tel:* Dubai 442990. *Telex:* 45423 or 45557 Dpc EM. *Cables:* Dupetco, Dubai. *Contact:* Captain A. V. Carrington, Marine Superintendent.

AGENT: Gulf Agency Co. (Dubai) Pvt. Ltd., P.O.B.2404, Dubai, U.A.E. Cables: "Confidence", Dubai. Tel: 457555 (12 lines, 24 hours service). Telex: 45448, 45809 ("Gacdb EM"). Fax: 457202.

VHF Radio: standing by on Channel 16 (156.8 MHz) communicating on Channels 14, 12 or 6, call sign "Confidence Dubai".

SSB Radio: standing by on 6910 kHz lower side band, communicating on frequencies 3539, 6910 and 7010 kHz. Call sign "Confidence Dubai".

FUJAIRAH: 25.10 N. 56.21 E. (See Plan)

LOCATION: Lat. 25° 10.5′ N., 56° 21′ E., 3 km. North of Fujairah town and 20 km. South of Khor Fakkan.

PORT LIMITS: Within area bounded by a line drawn:–

Lat. 25° 09′ 35″ N., Long. 56° 21′ 00″ E. due North to Lat. 25° 10′ 05″ N., 56° 21′ 00″ E., thence due West for 65 m. to the West side of the old road and following the West side of the old road to Lat. 25° 11′ 30″ N., thence due East to Lat. 25° 11′ 30″ N., Long. 56° 22′ 30″ E., thence South to Lat. 25° 09′ 00″ N., Long. 56° 22′ 30″ E., thence due West to Lat. 25° 09′ 00″ N., Long. 56° 21′ 30″ E, thence due West to Lat. 25° 09′ 00″ N., Long. 56° 21′ 00″ E. and include all waters, land and installations contained within that area.

DOCUMENTS: The provisional requirements are:–

Immigration:	Crew List	3 copies
	Passenger List	3 copies
Customs:	Crew List	2 copies
	Passenger List	2 copies
	Cargo Manifests	2 copies
	Alcoholic Beverages/ Bonded Stores List	2 copies
Port Operations:	Cargo Manifests	2 copies
	Stow Plan/Hatch List	2 copies
	Dangerous Cargo List	2 copies
	Transhipment Cargo	2 copies
	Heavy Lift List	2 copies
	Ro/Ro Discharge List	2 copies
For Inspection:	Last Port Clearance, Ship's Log.	
Certificates:	Safety Equipment, Construction, Load Line, Radio, Oil Record Book.	

All documents relating to cargo should be forwarded prior to vessels' arrival.

PILOTAGE: Compulsory, except for 'Country Craft' and M.E.N.A.S. tender.

Notice of ETA and request for a Pilot must be made not less than 24 hours before ETA at Fairway Buoy via vessels' Agents. Pilot launch will keep listening watch on VHF Channel 16, 2 hours prior to ETA.

The Pilot boarding point is 1 mile S.E. of the Fairway Buoy. Pilot boarding arrangements must be according to IMO rules. Vessels awaiting a Pilot must anchor East of Long. 56° 25′ E. approx. 3 miles offshore. There is good holding ground in 40 m. to 59 m. of water.

ANCHORAGE: Vessels wishing to anchor offshore must not anchor West of Long. 56° 25′ E. or South of Lat. 25° 10′ N. They should report their position to either the Harbour Master on VHF Channel 16 or through Agent on VHF Channel 16.

Also see "Pilotage".

RESTRICTIONS: *Draft Restrictions – Main Quay:*

1. Vessels with a draft of less than 11.5 m. can be moved at any state of the tide.
2. Vessels with a draft of between 11.5 m. and 12.0 m. can only be moved from 5 hours before to 4 hours after predicted HW.
3. Vessels with a draft in excess of 12.0 m. can be moved only at a time agreed by the Harbour Master.

Any variances to the above restrictions will be agreed by the Harbour Master, Port of Fujairah.

MAX. SIZE: Ships up to 275 m. LOA and 12.5 m. draft can be accepted.

HEALTH: Normal quarantine regulations apply. Radio Pratique can be obtained, via the vessel's Agent, providing the Master can state that no serious illness has occurred on board during the preceding 30 days.

RADIO: *Notice of Arrival:* Vessels should advise their ETA, Fujairah, at least 72 hours prior to arrival, giving draft, LOA and details of cargo operations. Agents should re-confirm 24 hours prior to vessels' arrival.

Also see "Health".

VHF: Fujairah Port Authorities, call sign "Fujairah Port Control" equipped with Marine Band VHF Radio Telephone Transceiver maintains continuous watch on Channel 16.

Vessels should establish radio contact with Fujairah Port Control Station if they intend anchoring in Fujairah Waters or are proceeding to Fujairah Port.

Following Channels are used by the Fujairah Port Authorities:

Station	*Hours of Watch*	*Channel*	*Function*
Fujairah Port Control	24	16	Distress, Safety and Calling Frequency
Fujairah Port Operations	24	09	Pilot Services
Tugs	24	08	Berthing/Unberthing
Working Channels	24	10&11	

Vessels in the Fujairah area are reminded not to use the above Channels except for the purposes specified.

RADAR: Port Control is equipped with radar. The pilot launch is equipped. However, fog is almost unknown though visibility is restricted by dust mainly – July and August.

TUGS: The use of tugs will be compulsory except at discretion of the Harbour Master. 2 tugs of 16 tonnes bollard pull are in operation fitted with foam monitors. A third tug of 36 tonnes bollard pull is also in service.

BERTHING: There are 4 berths on the Main Quay 780 m. long with a least depth of 12.5 m. for 600 m. and 11.0 m. for 180 m. This is a concrete capped and concrete blockwork constructed quay with rubber fendering.

There is a further 290 m. of quay with a least depth of 7 m. suitable for country craft and shallow draft vessels. This is a concrete capped sheet piled quay with continuous timber fendering.

There are 2 jetties for rock and aggregate cargoes.

There is a transit shed with 12,000 sq.m. of floor space with LCL facility.

PORT EQUIPMENT: 2×40 ton IHI gantry cranes (with a third on order) with an outreach of 34.5 m. per crane.

4 rubber tyred gantries (with a further 2 on order) each 6 containers across and 4 high.

2×40 ton top loaders.

2×24 ton Jones cranes. In addition to this, yard hustlers, trailers and forklift trucks have been added to complete a comprehensive range of support vehicles.

Reefer Storage: 120 points × 200 volts. 48 points × 38 volts.

Open Storage (container or general cargo): 54,000 sq.m. paved storage area.

STEVEDORES: The port will work on a 24 hour 7 day week basis. Requirements for port labour must be submitted to Operations Department by 1200 hrs. prior to to day required.

MEDICAL: Hospital facilities are available.

FRESH WATER: Good potable water is available and supplied by road tanker or water barge by prior arrangement through agents.

FUEL: Gas oil available ex-jetty. Fuel oil by prior arrangement through local Agent – supplied by bunker barge.

REPAIRS: Routine maintenance of medium engineering type is available. Offshore hull cleaning and repairs available.

SURVEYORS: Classification Societies and Surveyors can be brought from Dubai at short notice.

HATCHES: Rigging ship's gear, opening and closing of hatches, are the responsibility of the vessel.

REPATRIATION: This is permissible via Dubai and Sharjah International Airports, about 1.5 hours by road. Valid seaman's book and passport required.

AIRPORT: Fujairah International Airport is a few minutes drive from City Centre. Gulf Air operate a flight on Thursday to and from Bahrain.

DRY DOCKS: None.

TIME: GMT plus 4 hours permanent.

SHORE LEAVE: Shore leave is permitted.

HOLIDAYS: 1st day Id Al Fitr, 1st day Id Al Adha.

TELEPHONES: This service will be available aboard ships at the quay by prior arrangement through Agents.

SHIP SERVICING: Gulf Agency Co. operate ship servicing along Lat. 25° 10′ N.

Barwil Shipping Services, Fujairah. Tel: 24800/24801. Telex: 89040.

Fujairah Maritime & Mercantile International, Tel: 23238/23239. Telex: 89017 Gray Fu Em.

Fujairah National Shipping Agency. Tel: 24151. Telex: 89081 Fnsa Em.

BANKS: British Bank of the Middle East, P.O.Box 21, Fujairah, U.A.E. Tel: 22221.

Fujairah National Bank, P.O.Box 887, Fujairah, U.A.E. Tel: 24518.

National Bank of Abu Dhabi, P.O.Box 79, Fujairah, U.A.E. Tel: 22633.

GENERAL: Garbage disposal services will be provided and will be compulsory. Derat Exemption Inspectors are available.

Ship Chandlers: Complete chandlering facilities will be available.

SHIPMASTER'S REPORT: March 1985.

Called for bunkers (ex-barge) also crew changes.

Anchorage: Instructed by bunker barge to anchor 3 miles East of breakwater entrance in 25 fathoms of water, good holding ground, 6 shackles of cable used.

Stores: Fresh provisions are available by prior arrangement with Agent.

Repatriation: Any crew joining/leaving are landed by fast launch and then taken by minibus to/from Dubai (about 2 hours drive).

Time: GMT plus 4 hours – permanent.

VHF: Agency (Gulf Agency), Port Control and bunker barge all have VHF, contact initially Channel 16 then shift to working frequency.

AUTHORITY: Port of Fujairah, P.O.Box 787, Fujairah, U.A.E. *Tel:* Fujairah 24231. *Telex:* 89085 Fport Em. *Fax:* 24240. *Contact:* Captain R. M. Saunders, General Manager. Captain R. G Turnbull, Harbour Master.

AGENT: Gulf Agency Co. (Fujairah) Ltd., P.O.Box 590, Fujairah, U.A.E. Cables: "Confidence", Fujairah. Telex: 89046 ("Gacfuj EM"). Tel: 23300, 23301. After hours 22597. Fax: 26269.

Operators of ship-servicing and supply organisation: Crew changes, mail, spares and/or delivery of provisions undertaken at sea without deviation to serviced vessel.

Owners and Masters should contact G.A.C. Dubai by cable or telex regarding servicing requirements. Rendezvous positions are selected by Shipmaster as follows: Off Dubai, at any Latitude along meridian 55° East, or off Fujairah at any Longitude along parallel 25° 10′ North.

HAMRIYAH, Sharjah: 25.35 N. 55.24 E. (See Plan)

LOCATION: Hamriyah Oil Terminal is located in the Emirate of Sharjah, United Arab Emirates, and consists of a shore tank with related onshore facilities, an offshore loading berth composed primarily of one single point mooring buoy and a 30 in. submarine pipe-line which runs from the shore tank to the loading berth. The shore tank is located outside the village of Hamriyah on the coastline between Umm Al Qaiwain and Ajman in approximate position Lat. 25° 29.5′ N., Long. 55° 30.7′ E. The loading berth is located in 71 ft. of water and is situated in an open and unsheltered roadstead approximately 7.6 miles offshore on a bearing of approximately 308° (T) from the shore tank and in approximate position Lat. 25° 34′ 31.68″ N., Long. 55° 24′ 5.8″ E.

Hamriyah Oil Terminal is owned by Amoco Sharjah Oil Company and is operated 24 hours a day, 7 days a week, weather and other circumstances permitting. Vessels are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, weather and other circumstances permitting.

Company's Facilities: The Company's administrative offices are located in the town of Sharjah and the Company's terminal offices, storage tank and laboratory for testing stock are located onshore near the village of Hamriyah.

FLAG: Vessels are required to fly the flag of the United Arab Emirates on the foremast during daylight hours while in Sharjah waters. The Sharjah territorial waters extend 12 nautical miles seaward from the Sharjah coastline.

DOCUMENTS: The following documents are required when calling at Hamriyah Oil Terminal:

Health Declaration.

Crew List.

PILOTAGE: *Mooring Master:* Vessels to be moored at the loading berth will be boarded by a Mooring Master about 3 miles due North of the loading berth in approximate position Lat. 25° 37.5′ N., Long. 55° 24.1′ E. The Mooring Master will be provided by the Company and vessels will not be allowed to approach or depart from the loading berth without the Company designated Mooring Master being on board. The Mooring Master will advise vessel personnel on the approaches to the loading berth; the operations of mooring and unmooring; the raising, connecting, disconnecting and lowering of the floating cargo hose and in all other operations within the loading berth area. All manoeuvring of vessels within the loading berth area shall be performed by vessel personnel as directed by the vessel's Officer in charge and in accordance with the procedure advised by the Mooring Master.

Vessels are required to have a clean and efficient pilot ladder fitted with spreaders and manropes, safely and securely rigged, ready for the Mooring Master to immediately embark and disembark on the port side of the vessel and of sufficient length to reach the Mooring Master's launch. At night, adequate lighting must be rigged overside for the Mooring Master to approach or depart from the port side of the vessel and to use the pilot ladder safely. A lifebuoy with safety line and self-igniting light together with a rope messenger for the Mooring Master's bag shall also be available at the pilot ladder head. Vessels shall afford a "Good Weather Lee" and shall reduce speed as directed by the Mooring Master in order to effect the safe embarking or disembarking of the Mooring Master.

Whenever, as in the case of large vessels in light condition, the height of the deck above the water exceeds 30 ft., the accommodation ladder shall also be used in conjunction with the pilot ladder and shall be lowered to about 12 ft. above the water with the pilot ladder rigged immediately adjacent to the bottom platform of the accommodation ladder. A mechanical hoist of an approved pattern shall be considered an acceptable alternative to a conventional pilot ladder for use in conjunction with the accommodation ladder, but a mechanical hoist whose operation relies upon a single wire shall not be considered of an approved pattern. The rigging of the pilot ladder for the embarkation and disembarkation of the Mooring Master shall be supervised by a responsible vessel Officer and shall be effected so that the ladder is well clear of any overboard discharge and so that each step of the ladder rests securely against the vessel's side. If, in the opinion of the Mooring Master, the pilot ladder is not safe, the Mooring Master may refuse to board the vessel and any delay caused by such refusal shall be for the vessel's account.

Vessels shall provide food for the Mooring Master while on board the vessel and shall accommodate the Mooring Master in the Pilot's Cabin. Should vessels not be equipped with a Pilot Cabin, the Mooring Master shall be accommodated in a cabin equivalent to that required for an officer on the vessel. The Mooring Master shall have access to the bridge and/or central area of the vessel and such areas shall not be locked or otherwise arranged to prevent immediate entry at any time by the Mooring Master.

ANCHORAGES: The customary anchorage area for vessels awaiting the loading berth at Hamriyah Oil Terminal is a circle 0.5 miles in diameter and with its centre located 3 miles due North of the loading berth in approximate position Lat. 25° 37.5′ N., Long. 55° 24.1′ E. Anchorage within 3 miles of the loading berth or of the 30 in. submarine pipe-line which runs from the shore tank to the loading berth is prohibited unless otherwise designated by the Company or the Mooring Master.

HEALTH: The rules governing the quarantine of vessels are the same as those found in other parts of the world.

MAX. SIZE: Max. draft 55 ft. Max. size 80,000 d.w.t.

Also see "Berthing".

RADIO/VHF: *Initial Radio Communications:* The radio station at Bahrain will handle the initial radio communications between vessels and the Company. The station call sign is "A9M" and the station operates on a 24 hour basis.

Advice of Arrival: It is important that vessels establish radio contact with the Company and with Lamnalco (Sharjah) Ltd. when 3 days distant from Hamriyah Oil Terminal and maintain such contact until just prior to arrival at Hamriyah Oil Terminal. Vessels should send an ETA telex to the Company (Telex: 68685 Amcosh EM) and Lamnalco (Sharjah) Ltd. (Telex: 68433 Lamshj EM) not less than 72 hours prior to arrival at Hamriyah Oil Terminal, providing the following information:

1. The ETA;
2. The estimated draft, fore and aft, upon arrival;
3. The quantity of crude oil to be loaded and the grade of such;
4. The estimated sailing draft;
5. The last port of call;
6. Whether the vessel has a clean Bill of Health;
7. The distance from the bow to the centre of the vessel's manifold;
8. Confirm vessels ability to load/deballast concurrently or alternatively to deballast after loading.

This first ETA message should also include a definite statement of the details of any equipment required from shore for connecting the floating cargo hose to the vessel's manifold. Further ETA telexes should be sent to the Company and Lamnalco (Sharjah) Ltd. when the vessel is 48 hours and 24 hours distant from Hamriyah Oil Terminal confirming or giving notice of any change in the 72 hour ETA and at any other time after the 24 hour ETA telex when a change by more than 2 hours occurs in the ETA. The 24 hour ETA telex should include a positive statement regarding the vessel's readiness to load on arrival and the number of hours that will be required by the vessel to discharge clean ballast. Local time is GMT plus 4 hours and Daylight Saving Time (Summer time) is not applicable.

Ship-To-Shore Communications: The Company and Lamnalco (Sharjah) Ltd. are equipped with VHF radiotelephone using international frequencies and maintain a radio watch on the international VHF Marine Channel 16 and on Channel 74. Not less than 12 hours prior to the vessel's ETA at Hamriyah Oil Terminal, the vessel is required to maintain a radio watch on R/T frequency 2182 kHz and on VHF Channel 16. Masters are recommended to use this facility as soon as the vessel is within range since such communications are the best means of avoiding delay in the mooring of the vessel. While a vessel is at the loading berth the Mooring Master will be in direct charge of the portable VHF ship-to-shore radiotelephone and all ship-to-shore communications will be by portable VHF radiotelephone. The Mooring Master will advise the Master and Officers regarding the emergency whistle signals set up for use in the event the VHF radiotelephone units become inoperative. The use of the vessel's radio station and/or battery charging equipment is prohibited during cargo loading operations.

Radio Watches: While at the anchorage awaiting the loading berth vessels should maintain a listening watch on R/T frequency 2182 kHz and on VHF Channel 16 with the Company and Lamnalco (Sharjah) Ltd.

TUGS: *Mooring Launch:* The Company will provide a mooring launch which is owned by Lamnalco (Sharjah) Ltd. to assist in the mooring and unmooring of the vessel. The mooring launch will be harboured in the town of Sharjah at the boat pier used by Lamnalco (Sharjah) Ltd. and will operate under the direct control of the Mooring Master.

READINESS: *Loading Readiness and Arrival Time:* Upon arrival of the vessel at the customary anchorage for the loading berth, the Master or his Agent shall give the Company notice by letter, telegraph, wireless, or telephone that the vessel is ready to load. Laytime shall commence upon the expiration of 6 hours following the acceptance of such notice by the Company provided that the vessel has been nominated to load cargo and the terminal holds such cargo nomination and further provided that the Mooring Master has deemed the vessel to be in all respects ready to moor and load. The Notice of Readiness will be accepted only between the hours of 0600 and 1800 but will not be accepted at any time when Hamriyah Oil Terminal is closed or on a public holiday or a Friday (the Moslem Sabbath). If, however, the vessel is moved to the loading berth without delay after having arrived at any time and the vessel is in all respects ready to moor and load in the opinion of the Mooring Master, the Notice of Readiness will be accepted at the time the Mooring Master boards the vessel. Laytime shall continue until the floating cargo hose has been disconnected from the vessel's manifold.

BERTHING: Tenders to load crude oil will normally be accepted and the loading berth will be assigned to a vessel in the order of its arrival, provided the vessel has a nomination for crude oil valid at the time and is in all respects equipped and ready to moor. In the event that mooring is delayed on account of weather, the vessel will keep its position in line. Should the vessel be required to leave the area on account of weather, the vessel should keep in radio contact with Hamriyah Oil Terminal in order to make the vessel available as soon as the weather moderates. The Company reserves the right to load vessels "out of turn" following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other vessels in line. For example, should weather make it necessary for a specific vessel waiting at the loading berth or at the anchorage to vacate the area, the Company may load another vessel which arrived at the anchorage after the specific vessel but before the return of the specific vessel which was waiting in line ahead of the the other vessel.

When the vessel proceeds to within a reasonable distance from the loading berth and upon advice from the Mooring Master, the mooring lines of the vessel will be carried by the launch to the floating buoy lines, secured thereto, and brought on board the vessel. On the vessel's end of the mooring lines there is a steel chafing chain which can be observed when the floating buoy lines come out of the water. This chafing chain will be secured to the vessel's bitts by way of Company-supplied mooring strops in such a manner that the floating buoy lines shall remain outside the vessel thereby allowing the chafing effect at the fairleads to be taken by the chafing chain. All mooring details and the sequence of movements shall be directed by the vessel's Officer in charge following consultation with the Mooring Master. When the mooring operations have been completed, fire wires of at least 150 ft. in length will be secured to the vessel's bitts and run out at the bow and stern of the vessel's starboard side and held in place on short stoppers with the eyes approximately 6 ft. above the surface of the water so that they can be readily available to a tug in case of an emergency.

Loading Berth: Vessels are loaded by means of a 30 in. submarine pipeline which runs from the shore tank to the loading berth and by means of a floating cargo hose which runs from the loading berth to the moored vessel. The maximum draft allowed for vessels at the loading berth is 55 ft.

Mooring Facilities: The Single Point Mooring Buoy moors vessels from the bow and consists primarily of a cylindrical buoy which is secured to the seabed by 6 catenary anchor legs each of which are tethered to the seabed by a heavy duty anchor system. The cylindrical buoy is 5.3 m. in height, fitted with a skirt 16 m. in diameter, and equipped with a radar reflector and a racon beacon coded "Zulu", frequency 48 seconds. The cylindrical buoy will be able to accept vessels up to 80,000 d.w.t. and is also equipped with a navigational light, white flashing code "U", which has a range of 5.7 miles with transmission factor of 0.85 and is visible through 360°. The Mooring Master may allow vessels in excess of 80,000 d.w.t. to moor at the cylindrical buoy provided the vessel has first obtained the written permission of the Company to moor at the facility.

Vessel's Alertness: The loading berth is on an open and unsheltered roadstead; therefore, from the time the Mooring Master boards the vessel until the vessel has loaded her cargo and the Mooring Master has disembarked, full power must be available at all times on all deck winches and windlass and other gear of the vessel and the vessel's engines, steering machinery and other efficient manoeuvring equipment must likewise be maintained in constant readiness with full power for immediate use so as to allow the vessel to depart from the loading berth at any time following a request by the Mooring Master or the Company to do so.

The vessel's personnel should be at their stations and alert at all times during mooring, unmooring, hose handling and cargo loading operations. Where vessels are equipped with an electric clutch control to the propeller shaft, such vessels must disconnect the electrical clutch control and the manual clutch control so that there will be no possibility of the engine engaging the propeller shaft while the vessel is moored. Constant observation in the engine room, control room and deck control room shall be provided at all times while vessels are at or in the vicinity of the loading berth.

Whilst a vessel is moored to the SBM a crew member must be stationed on the forecastle at all times (24 hours) and will report immediately to the officer in charge if the vessel approaches within 10 m. of the buoy.

LOADING: *Vessel's Gear:* Prior to the arrival of any vessel at the Mooring Master Boarding Area, the port derrick of the vessel should be up and ready to lift the mooring and hose connection gear on board the vessel from the mooring launch, and the vessel must be equipped on the forecastle head with at least 4 good quality mooring lines, each not less than 120 fathoms in length and of buoyant material if possible, together with an adequate supply of lashing ropes and shackles. The mooring lines should be laid out free for running adjacent to bitts and warping winches. The warping winches or windlass should be in good working order and must be adequate to handle mooring lines under heavy strain and efficient stoppers must be readily available to "hang off" the mooring lines and transfer same from the winch to the bitts.

On the port side, adjacent to the vessel's manifold, there must be equipment capable of lifting the floating cargo hose, a 7.5 ton lift, safely and efficiently from the sea surface over the port rail to the vessel's manifold. Vessels must also have an adequate supply of nuts, bolts, gaskets and wrenches to connect the floating cargo hose, 3 chain blocks will also be required for positioning of the cargo hose. If, in the opinion of the Mooring Master, the vessel is not equipped with adequate mooring or loading facilities or lines or gear, the Mooring Master must so inform the vessel's Master and in such event the vessel will not be brought into the loading berth until the facilities or lines or gear are deemed satisfactory by the Mooring Master.

Connecting Hose: After the vessel has been securely moored, the floating cargo hose will be hoisted to the vessel's port side rail amidship by vessel's equipment. The floating cargo hose is a 20 in. (reducing to 16 in.) diameter floating hose, 920 ft. in length, fitted with a 150 ASA flat face flange for connection to the vessel's manifold. The vessel should have adapters and fittings on board so as to enable such floating cargo hose to be connected to the vessel's manifold. The raising, connecting, disconnecting and lowering of the floating cargo hose will be performed by the vessel's crew as directed by the vessel's Officer in charge who must be present at all times during such operation and in accordance with the procedure advised by the Mooring Master, who will remain on board the entire time the vessel is at the loading berth. Particular care should be taken during all such hose operations to avoid damage to the floating cargo hose and its fittings.

Rate of Loading: The crude oil flow is by pump and the maximum crude oil loading rate for vessels using one 16 in. deck hose and 150 p.s.i. at vessel's rail is approximately 23,000 barrels per hour. In order to save vessel time and make the loading berth available for other vessels, it is requested that ballast be pumped as fast as possible and that vessels receive oil as fast as it can be delivered, with both operations having due regard for safety. It is requested that any impediment (such as "Y's", strainers or mud boxes) to the flow of crude oil into the vessel, be removed before the arrival of the vessel at the loading berth.

Responsibility: Prior to the commencement of any cargo loading operation, the Mooring Master and the Officer in charge of the loading operations for the vessel shall engage in a pre-loading conference to formulate a loading plan and to ensure that the vessel is in all respects ready to load. No cargo loading shall take place without the permission of the Mooring Master whose permission shall not be given until the pre-loading conference has been completed. The vessel's Master shall remain responsible for the safety of the vessel and all operations on board the vessel at all times. The Mooring Master will advise the Officer in charge of the loading operations for the vessel with respect to the loading pressures and hazards but the Mooring Master will not direct any aspect of the loading except as may be necessary to protect the loading berth and related facilities and equipment. The manipulation of the vessel's valves is the direct responsibility of vessel's personnel. The Mooring Master shall have the right to suspend cargo loading operations or to require the vessel to unmoor and depart from the loading berth at any time when the mooring plan, pre-loading plan or the safety requirements and regulations set forth herein are not being followed by the vessel, or at anytime the Mooring Master believes or becomes aware of the existence of any other reason which in his opinion shall require the suspension of the mooring or the loading of the vessel.

Oil Valve Control: The incoming oil stream is controlled onshore and the vessel's valves must not be closed against the incoming oil stream. Such a procedure creates an excessive pressure which may damage the hose or other terminal facilities and could result in a pollution incident. Vessels will be held legally responsible for any damage resulting from the vessel's failure to observe this precaution. Frequent checks of the cargo loading must be made by vessel personnel during the loading operation so that a reduction in the loading rate, before topping of the final tank or tanks, may be arranged through the Mooring Master by the Officer in charge of the loading operations for the vessel. A normal standby warning should be given about 15 minutes before the shutdown of the loading operations. Upon the request from a vessel to shut down the loading operations, a minimum of 5 minutes will be normally required to stop the flow of crude oil. Vessel's personnel shall be responsible for the call to stop the loading of the vessel. When cargo has ceased to flow, the valves on the shore will be closed and the vessel's manifold valves may then be closed.

Emergency Signal: Should normal ship-to-shore communications fail, the emergency whistle signal will be a continuous blast on the vessel's whistle. Steam or air should never be shut off from the whistle during loading. Whenever the emergency whistle signal is used, all loading operations will be shut down until communications can be established with the vessel giving the signal. For this reason, it is requested that vessels in the area refrain from using their whistles for other than essential purposes and that the use of the "continuous blast" whistle signal be reserved for emergency purposes only. All crew members who stand a deck watch during the transfer of crude oil are expected to know the emergency shutdown signal.

Code Flag: During all cargo loading operations, the International Code Flag "B" shall be displayed from a topmast signal halyard during daylight hours and a red light shall be displayed during the hours of darkness. The red light should be of a character as to be visible at a distance of at least 1 mile and show an unbroken light around the horizon.

Shore Stops: Request for the terminal to stop the flow of crude oil at a predetermined tonnage must be made in writing to the Company and will be deemed to include the statement and understanding that the Company will not be responsible for (1) any errors, costs or claims arising from such request and (2) any crude oil loaded in excess of that requested will not be pumped back ashore. Some delays in stopping the flow of crude oil are always incurred when such a shore stop request is made.

BALLAST: There are no facilities for the offloading of dirty ballast but clean oil-free ballast may be discharged overboard from the vessel. It is the Master's responsibility to see that no oil (crude, bunker, diesel, bunker C, or oily bilge water) is pumped or spilled overboard from the vessel. All deck scuppers must be plugged tight and adequate drip pans and sand must be provided where necessary on deck for use at all times, especially when disconnecting hoses, in order to prevent any such loss of oil overboard. The waters in and adjacent to the loading berth must not be polluted and only clean oil-free ballast may be discharged inside of a line running 50 miles from and parallel to the coastline of the United Arab Emirates.

The discharge of oil mixtures from vessels while en-route to Hamriyah Oil Terminal is prohibited except when the following conditions are all satisfied:

1. The instantaneous rate of discharge of oil content of the oily mixture does not exceed 60 litres per mile.
2. The total quality of oil discharged on the ballast voyage does not exceed 1/15,000 of the total cargo carrying capacity of the vessel, and
3. The vessel is more than 50 miles from the nearest point on the coastline of the United Arab Emirates.

Masters are warned that when disposing of dirty ballast or bilge water, (50 miles or more from the coastline of the United Arab Emirates), all pipe-lines, sea suctions, strainers and pumps which are later to be used to discharge clean ballast, must be flushed clean, so that there will be no chance of even a small amount of pollution when the clean ballast is pumped overboard.

Vessels must have sufficient ballast for safe manoeuvring and, where practicable, should arrive at the loading berth with the propeller completely submerged and trimmed 8 ft. to 10 ft. by the stern. The Mooring Master may refuse to permit the mooring of any vessel not in compliance with these requirements until the vessel takes on sufficient ballast and/or alters her trim to meet these requirements.

As soon as practicable after arrival, vessel tanks will be inspected for evidence of oil in ballast and during the discharge of ballast a similar inspection will take place. If evidence of oil appears at either of these inspections, the vessel must return to a point not less than 50 miles from the coastline of the United Arab Emirates and discharge such dirty ballast.

Any vessel required to return to a position at least 50 miles offshore, for the purpose of discharging dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered and at the same time loses any priority held for loading. Vessels must tender a new Notice of Readiness upon their return and the vessel will be entered for loading upon the Company's acceptance of the new Notice of Readiness.

Vessels must keep a constant watch on the side of the vessel from which clean ballast is being discharged for any indication of water discolouration or oil sheen. Discharge of ballast must be immediately suspended should there be any indication of discolouration or sheen and the Mooring Master shall be immediately informed of such. An investigation of any such discolouration or sheen shall be carried out by the vessel and the findings reported to the Mooring Master. Discharging shall not resume without permission of the Mooring Master.

If, during any inspection or during the process of loading, it is revealed that a vessel's tank is not oil-tight, the vessel will be rejected by the Mooring Master and refused further loading until satisfactory evidence of effective repairs is submitted and the vessel is duly certified by Lloyd's Register of Shipping, American Bureau of Shipping or another similarly recognised classification society.

In addition to the lights usually displayed, vessels are required to illuminate the vessel and the waters around the vessel with all available and suitable searchlights and floodlights during the discharge of clean ballast and the loading of crude oil during the hours of darkness. Such illumination must be to the satisfaction of the Mooring Master and must be undertaken so as to assist in the loading operations and in order that any oil on the surface of the sea may be readily detected and appropriate action taken. Vessels unable to illuminate the sea satisfactorily may not discharge ballast or engage in the loading of crude oil during the hours of darkness and any such delay shall be for the account of the vessel.

MEDICAL: Vessels requiring emergency medical assistance should contact Hamriyah Oil Terminal by VHF radio and supply the necessary pertinent information which will be passed on to the vessel's Agent. Neither medical or hospital facilities are available at Hamriyah Terminal, but private doctors and hospital facilities are available in the town of Sharjah.

CONSULS: There are no consulates in the village of Hamriyah; however, consular or diplomatic representatives for many nations maintain offices in the cities of Abu Dhabi and Dubai.

REPAIRS: The Masters of vessels loading at the loading berth are advised that the loading berth is considered an "open and unsheltered roadstead" and under no circumstances may engines be shut down for repairs while the vessel is at the loading berth. There are no facilities for making vessel repairs at Hamriyah Oil Terminal and no repairs will be allowed at the loading berth. However, arrangements can be made through the vessel's agent to utilise the repair facilities at other ports.

SURVEYORS: No cargo inspectors or marine surveyors are based at the village of Hamriyah but inspectors and surveyors who reside at other ports can be arranged through the vessel's Agent.

SHORE LEAVE/REPATRIATION: Vessel personnel (other than medical emergency cases) are not allowed to embark or disembark from the vessel at the loading berth. There are no facilities for crew change at the loading berth.

WEATHER: *Climate:* The climate along the coastline of Sharjah is characterised by cool Winters and very hot Summers. The annual mean rainfall is 4.2 in. and the relative humidity varies considerably according to the time of day with the highest relative humidity generally in the early morning and the lowest relative humidity generally in the early afternoon. The air temperature is generally moderate in the Winter, but is high in the Summer and can be extremely high in the interior on Summer afternoons.

Weather Data Summary:

Annual mean rainfall	4.2 in.
Lowest mean daily minimum air temperature	55°F.
Highest mean daily maximum air temperature	102°F.
Lowest average monthly sea surface temperature	72°F.
Highest average monthly sea surface temperature	90°F.

Winds: The winds in the Southern part of the Gulf are usually light and generally blow from the Western quadrant most of the year but are occasionally interrupted by winds from varying directions. The visibility along the Sharjah coastline is generally good but from June to September the Shamal blows over the Gulf area and frequently produces rough seas and stirs up dust clouds which can affect visibility at sea. The cold fronts which move down the Gulf from November to April frequently cause a North or N.W. wind of 20 knots or more along the Sharjah coastline with accompanying swells.

Tides: The tide for Sharjah can be predicted with reasonable accuracy through use of the tide tables for Shatt Al Arab with the appropriate correction factor for Sharjah applied.

Currents: The current along the Sharjah coastline has a predominantly counter-clockwise circulation throughout the year and is not generally strong. The strongest current is usually during the month of January (0.46 to 0.8 knots) and during the month of April (0.6 to 1.7 knots).

Seas: High waves generally do not occur along the Sharjah coastline since the winds are usually light in the vicinity of the coastline. On those occasions when the wind does become strong, the wave heights generally remain somewhat limited since the distance over which the wind can blow to generate waves is somewhat short from most directions due to the bend in the Gulf which tends to reduce the fetch of North winds at Sharjah (e.g., waves over 8 ft. occur 0.2 per cent of the time).

SAFETY: The vessel's personnel are responsible for the safety of the vessel and themselves and shall take all necessary precautions, whether or not so advised by the Company or the Mooring Master, having in mind the hazards of the loading operation, the cargo being handled, the weather condition and any other circumstances requiring special care or caution. The vessel's personnel shall also adhere to all safety precautions generally followed in the marine industry as well as all requirements and regulations imposed by the Company. Any safety precautions, requirements and regulations imposed by the Company and disregarded by the vessel's Master, Officers or crew will be considered a just cause for rejection of the vessel and all expenses related thereto shall be for the vessel's account. While the vessel is moored or within the vicinity of the loading berth, the vessel's personnel and the vessel's operations must comply or be in accordance with the following safety requirements:

(a) All ports opening onto the decks of the vessel are to be kept closed during cargo loading operations and all doors opened for access other than the pumproom doors must be closed immediately after use.

(b) Smoking is strictly prohibited on board the vessel and on the loading berth except in those areas designated by the Master as smoking areas. No areas outside of the accommodation areas shall be so designated. The Master is responsible for ensuring that all vessel personnel are informed of the designated smoking areas and shall post suitable notices regarding same. The Mooring Master may request the Master to further limit the vessel's "No Smoking" areas as conditions warrant. Matches and lighters for personal use shall not be carried while outside the designated smoking areas and personnel shall be so instructed. The Master shall instruct the Officers and crew of the vessel not to throw lighted cigars or cigarettes overside or out of port holes. There may be occasions when smoking will be entirely prohibited.

(c) The use of portable lamps, naked lights or electrical equipment on extension cords is prohibited and only approved intrinsically safe self-contained flashlights are permitted on deck.

(d) Ventilators must be so trimmed as to exclude flammable gases entering the area and if this cannot be done the ventilators must be completely closed.

(e) The vessel's engines, steering gear and other essential manoeuvring equipment and deck machinery must remain ready with full power for immediate use to permit the vessel to clear the area upon instruction from the Company or the Mooring Master to do so.

(f) Window type air conditioners must be disconnected from their power source and not used unless a certificate can be produced from a recognised authority to show that the unit is safe to operate in flammable gas areas.

(g) The vessel's main radio and radar equipment must not be energised while the vessel is handling cargo or ballast. The use of intrinsically safe VHF radios for cargo handling and safety operations are permitted.

(h) A continuous and efficient fire watch must be maintained on deck and in the engine room at all times. The vessel's fire fighting equipment shall be ready for instant use at all times throughout the vessel. Fire hoses of sufficient length to reach all parts of the vessel must be laid out and connected to hydrants and there must be full pressure on the deck line.

(i) Recommendations contained in the I.C.S. International Safety Guide for oil tankers and terminals covering the loading and discharge of tankers shall be strictly followed at all times.

(j) The only open flames allowed while the vessel is at the loading berth are those in the vessel's boilers and galley equipment. Sufficient fire extinguishers must always be provided near the galley and boilers.

(k) Burners, tubes, uptakes, exhaust manifolds and spark arrestors shall be maintained in good working order and kept clean. Funnel uptakes and boiler tubes shall not be blown while the vessel is at the loading berth. Highly volatile cleaning solvents shall not be used in the engine room for any purpose whatsoever while the vessel is at the loading berth.

(l) In the event of fire breaking out on any part of the vessel, however minor the fire may be, the fire alarm must be given immediately. The fire alarm will consist of a succession of long blasts on the vessel's whistle together with a rapid and continuous ringing of the vessel's bell.

(m) Not less than 1 deck Officer and 3 seamen shall be on duty, alert, available and in charge of the operations on deck at all times while the vessel is at the loading berth.

(n) Not less than 1 engineer shall be on duty, alert, available and in charge of the engine room at all times while the vessel is at the loading berth.

(o) A member of the vessel's crew, not one involved in any way with the loading operation, must be stationed on the bow of the vessel while the vessel is at the loading berth and a constant watch must be maintained on the moorings.

(p) During the discharge of clean ballast and the loading of crude oil, the vessel and the waters around the vessel must be illuminated during the hours of darkness with all available and suitable searchlights and floodlights.

(q) Before the floating cargo hose is brought on board the vessel, all deck scuppers must be plugged tight and adequate drip pans and sand must be provided where necessary on deck for use at all times. The deck scuppers must remain plugged until the floating cargo hose has been disconnected. All other materials necessary to clean up any oil spillage on deck must be on hand for immediate use.

(r) All unused bunker connections, cargo connections and vessel manifolds must be fitted with blank flanges including the stern discharge line if fitted.

(s) All cargo tank hatch covers and ullage port covers are to be kept closed except where tanks are to be hand sampled or hand ullaged in which case the ullage openings may be opened to sample or ullage the cargo.

(t) All cargo and ballasting operations shall be suspended during electrical storms in the vicinity of the vessel.

(u) Prior to the commencement of any loading operations, all empty vessel cargo tanks and tanks carrying cargo must be under positive pressure and fully inerted with gas having an oxygen content of less than 8 per cent.

(v) THE COMPANY DOES NOT HAVE A TUG OR VESSEL IN THE AREA EQUIPPED WITH FIRE FIGHTING APPARATUS.

GENERAL: *Government Officials:* Sharjah Officials such as the Customs Officer, Quarantine Officer, Immigration Officer, Captain of the Port and Police, are stationed in the town of Sharjah. Should Customs Guards be stationed on board the vessel while at the loading berth, it is expected that the vessel will provide food for these guards and other Sharjah Officials. Vessels calling at the loading berth must provide an accommodation ladder rigged on the port side for such Sharjah Officials.
Visitors: Visitors are not allowed to embark or disembark from the vessel at the loading berth.
Supplies: Commissary supplies, steward's stores, laundry services, fresh water, marine lubricants and bunkers are not available through the Company and may not be loaded at the loading berth. Any questions concerning the availability of such items from other sources and the loading of such items elsewhere should be handled through the vessel's Agent.
Contraband: The Company prohibits unauthorised craft from coming alongside vessels while at the loading berth without the permission of the Mooring Master. To avoid the possibility of undesirable items getting aboard vessels, it is recommended that Masters discourage any such craft from coming alongside while vessels are at or in the vicinity of the loading berth.
Garbage: The dumping of garbage and refuse overside is prohibited.
Agency: The Company does not perform any vessel Agency functions. Vessels calling at Hamriyah must arrange for their own Agents.

SHIPMASTER'S REPORT: July 1983 (updated 1986).
Location: Hamriyah Oil Terminal is owned by Amoco Sharjah Oil Company. The terminal is located in the Emirate of Sharjah, United Arab Emirates. A 30 in. pipe-line runs from the shore tank to a S.P.M. located in position Lat. 25° 34′ 31.68″ N., Long.55° 24′ 05.8″ E. and is operated by Lamnalco.
Documents: Health Declaration and Crew Lists. Customs, Immigration and Quarantine Officers have an office in Sharjah but usually do not come on board.
Pilotage: A pilot ladder to be prepared on vessel's Port side and lowered to about 12 ft. above the waterline. If the height of the deck exceeds 30 ft. a pilot ladder in conjunction with the accommodation ladder must be rigged.
Anchorages: The customary anchorage for vessels awaiting the loading berth of Hamriyah Oil Terminal is 3 miles North of the S.P.M. Anchorage within 3 miles is strictly prohibited unless instructed by the Mooring Master.
Max. Size: Vessels up to 250,000 tons have been accepted, subject to weather conditions.
Health: Rules are the same as found all over the world.
Radio/VHF: Amoco Sharjah and Lamnalco should be contacted by radio 3 days prior arrival via Bahrain Radio and maintain contact until prior arrival.

Telex addresses: 68685 Amcosh EM and 68433 Lamshj EM.

Following information is required by both parties:
1. ETA.
2. Arrival Draft.
3. Quantity to be loaded.
4. Estimated sailing draft.
5. Last port of call.
6. Whether vessel has clean bill of health.
7. Distance bow to manifold.
8. Confirm vessels ability to load/deballast concurrently or alternatively to deballast after loading.

Both companies keep watch on international VHF Marine Channel 16.
Berthing: This cylindrical buoy is equipped with a navigational white flashing light code "U", range 5.7 miles, a radar reflector and a racon beacon coded "Zulu".

On forecastle, vessel should have 4 good quality mooring lines, minimum length of 120 fathoms and preferably of the floating type. Vessel's lines to be used to pick up the mooring lines of the buoy. The end of the buoy's mooring line consists of a steel chafing chain and will be secured onto vessel's bitts by mooring strops supplied by Lamnalco.

Port derrick should be up and ready for lifting moorings and cargo hose connecting gear and capable of lifting 7.5 tons safely.

Mooring Master and Cargo Oil Surveyor stay on board while vessel is on the berth and both to be accommodated in an officer's cabin and meals served in officer's messroom.
Notice of Readiness: Will only be accepted between 0600 and 1800 hrs. but will not be accepted at times when the Hamriyah Oil Terminal is closed on a public holiday or Friday (Moslem Sabbath). However, if the vessel is moved to the berth without delay after having arrived at any time and vessel is ready for mooring and loading the Mooring Master will accept the N.O.R. at the boarding time. Laytime shall commence upon expiration of 6 hours after accepting the N.O.R. and shall continue until hose has been disconnected from vessel's manifold.
Loading: The floating hose is 20 in. diameter with a 16 in. hose for connecting to the vessel's manifold. Loading rate approximately 23,000 bbls.p.h. Only one type of oil available, being crude oil condensate approximate API 50/60° and loading temperature approximately 95°F.
Ballast: There are no dirty ballast reception facilities and all vessels must arrive with sufficient clean ballast for manoeuvring with the propeller submerged and a trim of 8 – 10 ft. by the stern. Non-permanent clean ballast to be discharged prior to commencing of loading.
Medical: Neither medical nor hospital facilities are available at Hamriyah Oil Terminal. Requests for emergency medical assistance should be passed to Hamriyah Oil Terminal by VHF and the information will be passed to vessel's Agent. Private doctors and hospital are available in the town of Sharjah.
Supplies: Stores, fresh water, laundry services, bunkers and lubricant not available via Amoco and may not be loaded at the berth. Availability of items should be handled through vessel's Agent and loading carried out elsewhere.
Consuls: No consulates in Sharjah; however, many nations have consular or diplomatic representatives in Abu Dhabi and Dubai.
Repatriation/Shore Leave: Not permitted while at loading berth.
Currents: Predominantly counter-clockwise circulation throughout the year along the Sharjah coastline and is generally not strong. Strongest in January (0.4 – 0.8 knots) and in April (0.6 – 1.7 knots).
Weather: Winds are usually light from Western quadrant, except during June to September when the Shamal blows and from November to April during passing of cold fronts with winds up to 20 knots producing rough seas.

AUTHORITY: *Operator:* Amoco Sharjah Oil Company, P.O.Box 1191, Sharjah, United Arab Emirates. *Tel:* (9716) 355100. *Telex:* 68685 Amcosh EM. *Contact:* R. W. Rausch, General Manager.
AGENT: See "Sharjah".

HAMRIYAH LPG TERMINAL: 25.28 N. 55.29 E.

(See Plan)

LOCATION: The Terminal is located in position Lat. 25° 27′ 37.3″ N., Long. 55° 29′ 12″ E. outside the village of Hamriyah on the coastline between Umm Al Qaiwain and Ajman.

The Hamriyah LPG Terminal is owned by Sharjah LPG Company Limited ("Shalco") and operated by Amoco Sharjah Oil Company and is operated 24 hours a day, 7 days a week, weather and other circumstances permitting.

The Terminal consists of 2 storage tanks for propane and butane, and a marine loading facility capable of loading vessels ranging in size from 30,000 cu.m. to 83,000 cu.m. 2 liquid loading lines and 2 vapour return lines are mounted on the trestle connecting the breakwater and the loading platform.

DOCUMENTS: The following documents are required when calling at the Hamriyah LPG Terminal:

Health Declaration.
Crew List.
Clearance from last port of call.

Officials: No immigration, Customs or Health Officials stationed at the Terminal.

PILOTAGE: Pilotage is compulsory from the seaward entrance of the dredged channel. The Pilot will board at or near the designated anchorage. The Pilot will be provided by the Operator and vessels will not be allowed to approach or depart from the port without the Operator's designated Pilot being on board. The Pilot will advise vessel's personnel on the approach through the channel to the jetty and all operations of mooring and unmooring. All manoeuvring of vessels within the loading berth area shall be performed by vessel's personnel as directed by the vessel's Master in accordance with the procedure advised by the Pilot. The vessel's Master must be on the bridge at all times while the vessel is manoeuvring.

Vessels shall provide food for the Pilot while on board the vessels and shall accommodate the Pilot in suitable accommodation equipped with private toilet facilities. The Pilot shall have access to the bridge and/or central area of the vessel and such areas shall not be locked or otherwise arranged to prevent immediate entry at any time by the Pilot.

Vessels are required to have a clean and efficient pilot ladder, fitted with spreaders and manropes, safely and securely rigged ready for the Pilot to immediately embark and disembark and of sufficient length to reach the Pilot's launch. A lifebuoy with safety line and self-igniting light together with a rope messenger for the Pilot's bag shall also be available at the pilot ladder head. Vessels shall afford a "Good Weather Lee" and shall reduce speed as directed by the Pilot in order to effect the safe embarking or disembarking of the Pilot.

Whenever, as in the case of large vessels in light condition, the height of the deck above the water exceeds 30 ft., the accommodation ladder shall also be used in conjunction with the pilot ladder and shall be lowered to about 12 ft. above the water with the pilot ladder rigged immediately adjacent to the bottom platform of the accommodation ladder. The rigging of the pilot ladder for the embarkation and disembarkation of the Pilot shall be supervised by a responsible officer and shall be positioned so that the ladder is well clear of any overboard discharge and such that each step of the ladder rests securely against the vessel's side.

If, in the sole opinion of the Pilot, the pilot ladder is not safe, the Pilot may refuse to board the vessel and any delay caused by such refusal shall be for the vessel's account.

Pilotage Radio Contact: Pilot/Vessel contact will be maintained on VHF Channel 16 or other frequency as mutually agreed by Operator's Marine Representative and vessel's Master.

Arrival at Anchorage/Pilot Boarding Area: Means of access to the vessel by the Pilot shall be provided by the vessel in accordance with the requirements of SOLAS. At night, the access area shall be adequately illuminated to provide a safe approach and boarding by the Pilot, Government Officials and Terminal Representatives.

The Conditions of Use of Shalco's Terminal Facilities will be presented to the Master for acceptance and signature on behalf of himself and the Owners prior to departures from the Anchorage/Pilot Boarding Area.

ANCHORAGE: The customary anchorage area for vessels awaiting loading at the Hamriyah LPG Terminal is a circle 1 mile in diameter with its centre in an approximate position of Lat. 25° 30′ N., Long. 55° 25′ E. There is an existing SBM located at approximately Lat. 25° 34′ N., Long. 55° 24′ E. for the Hamriyah Oil Terminal. the SBM is fitted with a flashing light and racon. This existing SBM may be used as a reference to the LPG Terminal anchorage which is 3 miles W.S.W. of the LPG entrance channel.

When within VHF communication range, Masters of vessels should ascertain berthing prospects from the terminal. In all cases where tankers are instructed to anchor, Masters should obtain clearance for their intended anchorage position from the Operator.

Radio Watches: While at the anchorage awaiting the loading berth, vessels should maintain a listening watch on VHF Channel 16 with the Terminal Operator.

Caution: Masters are cautioned that a 30 in. submarine pipe-line runs 7.6 miles from the Hamriyah Oil Terminal to an offshore SBM facility.

APPROACHES: *Approach Channel:* The approach channel's entrance is located in an approximate position of Lat. 25° 30′ 45″ N., Long. 55° 27′ 23″ E. The Fairway Buoy (Fl. "A" ev. 15 sec.) is located in position Lat. 25° 32′ 05″ N., Long. 55° 25′ 59″ E. The channel's length is 4,000 m. The width is 180 m. in the seaward channel, 250 m. in the intermediate channel and 180 m. in the near harbour channel. the channel depth has been dredged to 15 m.

Buoys:

Location	Nominal Range (nautical miles)	Light Colour
Fairway	5	White
Channel Marker	3	Red
Channel Marker	3	Green
Channel Marker	3	Red
Channel Marker	3	Green
Channel Marker	3	Red
Channel Marker	3	Green
Channel Marker	3	Red
Channel Marker	3	Green
Channel Marker	3	Red
Channel Marker	3	Green
Basin Limit Marker	2	Yellow
Basin Limit Marker	2	Yellow
Basin Limit Marker	2	Yellow

Beacons:

Location	Nominal Range (nautical miles)	Light Colour
Main Breakwater	13	Green
Lee Breakwater	5	Red
Leading Light	(White) 5	Green 2° Sectored White 1° Red 2°
Northern Training Wall	5	Red
Southern Training Wall	5	Green

RESTRICTIONS: Vessel will be moored in daylight only but unmooring and loading will be performed at any hour, weather and other circumstances permitting.

MAX. SIZE: The harbour has been dredged to a depth of 14 m. Maximum draft for vessels calling at the Hamriyah LPG Terminal is 12.6 m.

Max. Size: 83,000 cu.m. Max. LOA 230 m.
Minimum LOA 186 m. Minimum flat side 80 m.

HEALTH: No officials stationed at the terminal.

RADIO: *Initial Radio Communications:* The radio station at Bahrain will handle the initial radio communications between vessels and the Operator. The station call sign is "A9M" and the station operates on a 24 hour basis.

Advice of Arrival: It is important that vessels establish radio contact with the Operator and with the Operator's designated marine service when 3 days distant from Hamriyah LPG Terminal and maintain such contact until just prior to arrival at Hamriyah LPG Terminal. Vessels should send an ETA telex to the Operator (Telex No. 68685 a/b Amcosh EM) and to the Operator's designated marine service (Telex: 68433, a/b Lamshi EM) not less than 72 hours prior to arrival at Hamriyah LPG Terminal, providing the following information:

1. ETA.
2. Estimated arrival draft, fore and aft.
3. Estimated sailing draft, fore and aft.
4. Whether part-loaded or in ballast. If part-loaded, nature and quantity of cargo.
5. Last port of call.
6. Any repairs that would be required which could delay cargo loading.
7. Pressure and temperature of the tanks that are to be loaded.
8. Last 3 cargoes carried.
9. Size and class of the connecting flange.
10. Distance of mainfold from bow.
11. Height above uppermost continuous deck.
12. Distance of manifold from ship's side.
13. Height above water line when loaded.
14. Height above water line when light.
15. Distance from presentation flange to support.
16. Manifold layout (LVVL or LVLV).

Further ETA telexes should be sent to the Operator and the Operator's designated marine service when the vessel is 48 hours and 24 hours distant from Hamriyah LPG Terminal confirming or giving notice of any change in the 72 hour ETA and at any other time after the 24 hour ETA telex when a change by more than 2 hours occurs in the ETA. The 24 hour ETA telex should include a positive statement regarding the vessel's Readiness to Load on arrival and the manner and the number of hours that will be required by the vessel to discharge clean ballast. Local time is Greenwich Mean Time plus 4 hours and Daylight Saving Time (Summer time) is not applicable.

VHF: *Ship-to-Shore Communications:* The company and its designated agents are equipped with VHF radios using international frequencies and maintain a radio watch on the international VHF marine Channel 16.

On approach to Hamriyah LPG Terminal, the vessel is required to maintain a radio watch on VHF Channel 16. Masters are recommended to use this facility as soon as the vessel is within range since such communications are the best means of avoiding delay in the mooring of the vessel. While a vessel is at the loading berth, the Mooring Master will be in direct charge of the portable VHF ship-to-shore radio and all ship-to-shore communications will be by portable VHF radio. The Mooring Master will advise the Master and officers regarding the emergency whistle signals set up for use in the event the VHF radio units become inoperative. The use of the vessel's radio station and/or battery charging equipment is prohibited during cargo loading operations.

TUGS: Tugs will be provided by the Terminal Operator. Due to the infrequency of LPG liftings, tugs will vary as to individual specifications. However, 2 tugs will normally attend each lifting and each will have a minimum of 1,500 h.p. and a bollard pull of 15 tons.

BERTHING: The fenders and fendering structure are designed to absorb, at normal working stress levels, the energy imparted by vessels approaching the jetty at a maximum velocity of 15 cm./sec. and at an angle of approach of up to 10° from the berthing line. Design is based on a 57,000 d.w.t. LPG vessel. Vessels always berth port side alongside. *Mooring:* Dredged depth alongside the jetty face is 14.8 m. Mean Lowest Low Water level and the jetty extends a minimum of 16 m. in each direction from the centre of the loading platform. Vessels ranging from 30,000 cu.m. to 83,000 cu.m. may berth at the jetty. The vessel turning diameter in the harbour is 600 m.

The berth is equipped with 2 breasting dolphins (BD-1 and BD-2) which have 2 quick-release hooks along with powered capstans. The mooring dolphins (MD-1, MD-2, MD-3 and MD-4) are equipped with 3 quick-release hooks. All quick-relese hook units are provided with attached powered capstans. All quick-release hooks have a capacity of 60 tonnes and can be manually operated. The capstan capacity is 2 tonnes with a rope speed of 30 m. per minute. Electrical motor capacity is 11 kW. Bollards, bitts, and cleats are also provided.

Ships should remain adequately secured in their moorings. Ranging of the ship is to be prevented by the vessel's personnel keeping all mooring lines taut. Attention is to be given by vessel's personnel to the movement caused by passing ships, wind, currents, tides, and the cargo operation in progress. Adequate mooring of the vessel is the Master's responsibility and the vessel and its Owner shall be responsible for all damage to the loading berth and related facilities in any way attributable to the failure of the vessel's personnel to keep all mooring lines taut. Operator may suspend cargo operations and have the vessel put off the berth for any failure to comply with this provision with all resulting delay to be for the account of the vessel.

Vessel's personnel should be at their duty stations and alert at all times during mooring, unmooring, hose handling and cargo operations. Ships fitted with automatic tension winches should not use such winches in the automatic mode as they may not always hold the vessel in position at the berth.

LOADING: *Berth Details:* There is one dedicated LPG berth at the New Hamriyah LPG Terminal. This berth is capable of loading refrigerated LPG vessels up to a maximum of 83,000 cu.m. The maximum loading rates for propane and butane are 1,900 cu.m.p.h. Propane will be loaded at a temperature of approximately−46.3°F. Butane will be loaded through arm L-4802B at a temperature of approximately 20.0° F. The order of the loading arms is V, L, L, V. It is emphasised that venting of vapour to atmosphere is not allowed. Vapour should be returned to the Terminal via the vapour return lines provided or reliquified and returned to the cargo tanks.

Tanker Manifold Connections: The propane and butane loading arms are 12 in. in diameter. The return vapour arms are 8 in. in diameter. Each arm is fitted with a hydraulic coupler which can be adapted to fit different sizes. The loading arms can be adapted to fit 16 in., 12 in. and 10 in. standard 150 lbs ANSI flanges. The vapour return lines can be adapted to fit 10 in. and 8 in. standard 150 lbs ANSI flanges.

Any other flange size or ratings other than the above stated will require special fabricated spool pieces to meet the foregoing flange specification. Spool pieces must be furnished and installed by the vessel. Terminal personnel will connect the hydraulic couplers to the proper ship's flange.

All time lost due to the furnishing and installation of such spool pieces by the vessel shall be for the account of the vessel.

Ship's manifold connections must meet loading arm envelope configuration and must provide space and support on which to place loading arm support legs.

Distance of ship's manifold from ship's side:

	Min.	*Max.*
12 in. Loading Arm	2.0 m.	6.0 m.
Distance centre to centre for 12 in. ship's manifold	1.5 m.	3.5 m.
Height of centre point of manifold above deck	0.85 m.	2.1 m.

Jetty Emergency Shutdown Systems and Purge Systems: The jetty is equipped with an Emergency Shutdown (ESD) system to stop loading operations. The system is activated by pushing an electronic stop button in the jetty control room or on the pendant which will be placed on board the vessel. The pendant with the ESD button placed aboard the vessel is to be used only in an emergency, and is used in preference to the ship's systems. On activating the ESD system, all loading pumps and loading arms will be shut down.

The valves, etc., have been designed and set to close in a minimum time for safety and still avoid damaging surge pressures. For this reason, the ESD pendant is placed aboard the vessel and request made for the vessel to use the Terminal shutdown system in an emergency.

Recognising the tremendous damage surge pressures can cause, a careful check of the ship's emergency shutdown system will be made. If a suitable record is not available of valve closure times, the Master will be asked to operate the system to enable timing of the valves. The Terminal loading systems have been carefully calculated to provide charts for each product system, giving the allowable loading rates viz. effective valve closure times to remain below damaging surge pressure in the event of an ESD. (Note: effective valve closure time is a small percentage of total closing time and depends on valve style and valve actuator). It is desirable that the vessel furnish effective closure times from the manufacturer's data; if not, charts are available to estimate effective time once the total closing time is obtained. Using the individual system charts, the maximum loading rate is determined based on the minimum effective closing time of the ship's valves. If this rate is not acceptable to the vessel, arrangements will have to be made to change settings on valve actuators or temporarily lock-off the ship's loading ESD system and use the Terminal ESD pendant. The Terminal will not load at a rate in excess of that shown as being safe. Excess loading times caused by restricted loading rates due to the ship's ESD system will cause additional laytime to be allowed. The vessel may be requested to have valves adjusted before returning to Terminal for loading.

The following is a list showing minimum allowable effective valve closure times at *maximum* Safe Terminal pumping rates:

Product	*State*	*Pumping Rate cu.m/p.h.*	*Eff. Valve Closure Time – Secs.*
Propane	Refrigerated	1,900	7.5 Sec.
Butane	Refrigerated	1,900	7.5 Sec.

Before any cargo operation commences, the Master must ensure that all parts of the vessel's cargo system have been thoroughly tested and all safety checks are completed. The Terminal Representative and the Master, or officer in charge of the vessel's loading operations, should conduct and record a detailed loading plan. The Ship/Shore Safety Check List must be completed to the satisfaction of both the Terminal Representative and vessel's Master. Should any infringement of the Safety Check List be observed during loading operations it will be brought immediately to the attention of the vesssel's Master and if not rectified at once, the loading operation shall be terminated until remedial action has been implemented. All such time lost shall be for the account of the vessel. The vessel's Master shall remain responsible for the safety of the vessel and all operations on board the vessel at all times.

After completion of loading operations the vessel shall be ullaged. A Bill of Lading, Cargo Manifest, Ullage Report, Time Sheet, Certificate of Quality, Certificate of Quantity and Certificate of Origin will be completed. All such documents will be signed by the Master of the vessel prior to the vessel's departure. If required or requested by the Master of the vessel, the Agent of the vessel may sign the documents on behalf of the vessel's Master. The official quantity of the LPG delivered to the vessel shall be determined by the use of vessel gauges applied to vessel strappings and cargo tank volume calibrations. Tests for quality determinations shall be carried out by the Licensed Inspector.

Cargo Information: The vessel's Master will be informed of the approximate gravity and loading temperature of the LPG prior to commencement of loading. An official and final figure for specific gravity will be provided as soon as practical after completion of loading.

BALLAST: There are no facilities for off-loading ballast at Hamriyah LPG Terminal. Oil-free ballast suitable for pumping directly to the sea may be discharged overboard from the vessel. Export vessels arriving with ballast unsuitable for pumping to the sea may be rejected for loading, or made to keep such unsuitable ballast segregated on board. It is strictly against the law to pollute the waters of the United Arab Emirates, and any Master, his vessel and Owners, shall be subject to prosecution by the United Arab Emirates authorities if such pollution does occur.

FIRE PRECAUTIONS: The vessel's fire fighting appliances, including its main and emergency fire pumps shall be kept on standby and ready for immediate use. Before berthing operations comence, fire hoses shall be uncoiled and connected to the fire main which should be kept pressurised. Fire monitors should be elevated and maintained for immediate use. The water spray system of the vessel must be tested and maintained ready for use. The dry powder system or portable units shall be ready for use and in close proximity to the vessel's manifold.

The vessel is solely responsible for, and presumed capable of, fighting any fire on the vessel without assistance from terminal sources.

Should fire break out on either the vessel or the berth, the vessel's Master or deputy must immediately report the fire by the quickest means possible (VHF/UHF/telephone contact, sounding ship's siren, etc.) to the Terminal. The vessel's Master or deputy must also notify the Jetty Supervisor by means of VHF Channel 16. All cargo and ballast operations will be stopped immediately and then all valves closed. As the vessel's Master or deputy assisted by the crew is responsible for fighting the fire on board the vessel, he should stand-by to disconnect hoses or metal arms.

The jetty supervisor will be responsible for initiating the terminal fire alarm system and actuating the terminal emergency plan. He shall contact the senior deck officer on board the vessel to ascertain what assistance can be rendered by Terminal equipment and personnel.

In the event of an emergency, an alarm signal (continuous siren) will be sounded.

The loading platform fire fighting system has one main motor driven fire water pump and one stand-by diesel engine driven fire water pump. Both pumps are capable of handling 1,500 g.p.m. at 150 p.s.i.g. pressure, and are located on the jetty trestle.

The vessel's Master or his deputy will alert ship's personnel to stand-by for special instructions from the Terminal Supervisor. These instructions may require immediate departure of the vessel from the berth.

MEDICAL: Vessels requiring emergency medical assistance should contact Hamriyah LPG by VHF radio and supply the necessary, pertinent information which will be passed on to the vessel's Agent. Neither medical nor hospital facilities are available at Hamriyah LPG Terminal, but private doctors and hospital facilities are available in the town of Sharjah.

DENSITY: 1029.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: There are no Consulates in the village of Hamriyah; however, the Consular or Diplomatic Representatives for many nations maintain offices in the towns of Abu Dhabi and Dubai.

REPAIRS: There are no facilities for making vessel repairs at Hamriyah LPG Terminal and no repairs will be allowed at the jetty. However, arrangements can be made through the vessel's Agent to utilise the repair facilities at other ports.

SURVEYORS: No Cargo Inspectors or Marine Surveyors are based at the village of Hamriyah but inspectors and surveyors who reside at other ports can be arranged through the vessel's Agent.

CUSTOMS: Masters are advised that drinking or sale of alcoholic beverages is strictly forbidden to U.A.E. national citizens and is controlled for other nationals. Masters are warned of the serious consequences of offering such drinks to the Terminal staff or other officials who may board the vessel.

REPATRIATION: Not possible as no officials based at the terminal.

POLICE/AMBULANCE/FIRE: Contact terminal operator.

WEATHER/TIDES: *General:* The Company can advise of the following general environmental characteristics for the Sharjah coastline area but the navigator is referred to the published sailing instructions and directions for the area for more detailed information on the climate, weather, wind, tide, current and sea.

Climate: The climate along the coastline of Sharjah is characterised by cool Winters and very hot Summers. The annual mean rainfall is 4.2 in. and the relative humidity varies considerably according to the time of day with the highest relative humidity generally in the early morning and the lowest relative humidity generally in the early afternoon. The air temperature is generally moderate in the Winter, but is high in the Summer and can be extremely high in the interior on Summer afternoons.

Weather:

Annual mean rainfall	4.2 in.
Lowest mean daily minimum air temperature	55° F.
Highest mean daily maximum air temperature	102° F.
Lowest average monthly sea surface temperature	72° F.
Highest average monthly sea surface temperature	90° F.

Winds: The winds in the Southern part of the Gulf are usually light and generally blow from the Western quadrant most of the year but are occasionally interrupted by winds from varying directions. The visibility along the Sharjah coastline is generally good but from June to September the Shamal blows over the Gulf area and frequently produces rough seas and stirs up dust clouds which can affect visibility at sea. The cold fronts which move down the Gulf from November to April frequently cause a North or N.W. wind of 20 knots or more along the Sharjah coastline with accompanying swells.

Tides: The tide for Sharjah can be predicted with reasonable accuracy through use of the tide tables for Shatt Al Arab with the appropriate correction factor for Sharjah applied.

Currents: The current along the Sharjah coastline has a predominantly counter-clockwise circulation throughout the year and is not generally strong. The strongest current is usually during the month of January (0.46 to 0.8 knots) and during the month of April (0.6 to 1.7 knots).

Seas: High waves generally do not occur along the Sharjah coastline since the winds are usually light in the vicinity of the coastline. On those occasions when the wind does become strong, the wave heights generally remain somewhat limited since the distance over which the wind can blow to generate waves is somewhat short from most directions due to the bend in the Gulf which tends to reduce the fetch of North winds at Sharjah (e.g. waves over 8 ft. occur 0.2 per cent of the time).

GENERAL: *Flag:* Vessels are required to fly the flag of the United Arab Emirates on the foremast during daylight hours while in Sharjah waters. The Sharjah territorial waters extend 12 nautical miles seaward from the Sharjah coastline.

Government Officials: Sharjah officials such as the Customs Officer, Quarantine Officer, Immigration Officer, Port Authorities and Police are stationed in the town of Sharjah. Should Customs Guards be stationed on board the vessel while at the jetty it is expected that the vessel will provide food for these Guards and other Sharjah officials.

Quarantine Regulations: The rules governing the quarantine of vessels are the same as those found in other parts of the world.

Contraband: During loading it is prohibited for any unauthorised craft to come alongside vessels while at the LPG Terminal.

Garbage: The dumping of garbage and refuse overside is prohibited.

Shore Leave and Crew Changes: Vessel's personnel (other than medical emergency cases) are not allowed to embark or disembark from the vessel at the jetty. There are no facilities for crew changes at the jetty.

Visitors: Visitors are not allowed to embark or disembark from the vessel at the jetty.

Supplies: Commissary supplies, stewards stores, laundry services, fresh water, marine lubricants and bunkers are not available through the Operator and may not be loaded at the jetty. Any questions concerning the availability of such items from other sources and the loading of such items elsewhere should be handled through the vessel's Agent.

Readiness: As no berthing may be undertaken during hours of darkness, the Notice of Readiness will be accepted by the Terminal only between the hours of 0600 and 1800 provided that the vessel is apparently in all respects ready to moor and receive the cargo. Notice of Readiness will not be accepted during a period when the port is closed on account of adverse weather or when the vessel arrives prior to the date upon which it is nominated to load.

The foregoing paragraph notwithstanding, in no event shall a Notice of Readiness, whether previously accepted or not, be valid or binding on the Terminal unless and until such time as the vessel, her tanks and equipment, are, in fact, in every respect whatsoever in the proper condition and operation to receive the cargo.

Agency: The Operator does not perform any vessel agency functions. Vessels calling at Hamriyah LPG Terminal must arrange for their own Agents.

AUTHORITY: *Owner:* Shalco (Sharjah LPG Co.) P.O.Box 787, Sharjah, United Arab Emirates. *Tel:* 543666. *Telex:* 68799.

Operator: Amoco Sharjah Oil Company, P.O Box 1191, Sharjah, United Arab Emirates. *Tel:* 355100. *Telex:* 68685. *Contact:* R. W. Rausch, General Manager.

LPG Terminal, Hamriyah, Sharjah, United Arab Emirates. *Tel:* 542744. *Contact:* Captain H. Dietze.

AGENT: See "Sharjah".

HULAYLAH TERMINAL, Ras Al Khaimah:
25.58 N. 55.56 E.

LOCATION: The geographical location of the Hulaylah Terminal SPM is: Lat. 25° 58′ 26″ N., Long. 55° 56′ 11″ E.

Hulaylah Terminal is the export crude oil facility operated by Ras Al Khaimah Offshore Petroleum Limited (RAKOPET), located approximately 6 miles offshore from Mina Saqr, Ras Al Khaimah, United Arab Emirates.

Crude oil from the Saleh Offshore Field is transferred to shore tanks located in approximate position 25° 58′ 26″ N., 55° 56′ 17″ E. from where it is transferred to the SPM by pipe-line.

Saleh Field production facilities are located at the following positions:

	Latitude	*Longitude*
Saleh 1 and Production Platform	26° 11′ 31″ N.	55° 42′ 27″ E.
Saleh 1 Flare	26° 11′ 44″ N.	55° 42′ 35″ E.
Saleh 2 Platform	26° 10′ 43″ N.	55° 42′ 16″ E.
Saleh 3 Platform	26° 10′ 11″ N.	55° 41′ 47″ E.
Saleh 4 Platform	26° 10′ 27″ N.	55° 45′ 37″ E.
Saleh 5 Platform	26° 09′ 51″ N.	55° 45′ 11″ E.
Saleh 6 Platform	25° 11′ 00″ N.	55° 43′ 29″ E.

DOCUMENTS: None required.

PILOTAGE: The Mooring Master Boarding Area for the Hulaylah Terminal is 3 miles Westward of the SPM, or boarding will be at the anchorage as appropriate.

The RAKOPET Mooring Master will remain on board throughout the export vessel's stay on the berth to co-ordinate the petroleum transfer operation; therefore, suitable and adequate accommodation shall be provided for him on board the export vessel.

Arrival at Pilot Station/Anchorage: Means of access to the vessel by the RAKOPET Mooring Master shall be provided in accordance with the requirements of SOLAS, and early advice will be given by RAKOPET as to the side of the vessel that access should be provided.

At night the access area shall be adequately illuminated to provide for the approach and boarding of the RAKOPET Mooring Master, Government Officials and for RAKOPET Representatives.

The Conditions of Entry into and Use of Hulaylah Terminal and Agreement for the Hiring of Tugs will be presented to the Master of the export tanker and shall be signed by him on behalf of himself, the vessel and its Owners prior to departure from the pilot station/anchorage and commencement of berthing operations.

The Notice of Readiness will be accepted only between the hours of 0600 and 1800 provided the RAKOPET Mooring Master is satisfied that the export vessel is apparently in all respects ready to moor and load. Notice of Readiness will not be accepted during a period when the port is closed on account of adverse weather, or when an export vessel arrives prior to the date upon which it is nominated to load.

The foregoing paragraph notwithstanding, in no event shall a Notice of Readiness, whether previously accepted or not, be valid or binding on the Terminal unless and until such time as the export vessel, her tanks and equipment, are, in fact, in every respect whatsoever in the proper condition and operation to receive the cargo.

ANCHORAGES: Should it be necessary to anchor, then vessel should proceed to the recommended Tanker Anchorage Area which is within a circle 0.5 miles in diameter and with its centre located in position Lat. 25° 58′ N., Long. 55° 53′ E.

MAX. SIZE: Max. deadweight 300,000 tons. Larger vessels require prior clearance by the terminal.

HEALTH: No health clearance requirements currently in force.

RADIO: Following receipt of a nomination of an export vessel to load at the Hulaylah Terminal, RAKOPET will cable to that vessel via Bahrain Radio (A9M) details of nomination, loading API and temperature, and berthing prospects.

On receipt of this cable, and in any case not later than 72 hours prior to arrival time at Hulaylah Terminal, the export vessel is required to cable to RAKOPET via Bahrain Radio the following information:

(a) Name of vessel.
(b) ETA in GMT (U.A.E. time is GMT plus 4 hours throughout the year).
(c) Name of Master.
(d) Estimated arrival draft, fore and aft, and displacement.
(e) Time for discharging clean ballast, if any.
(f) If vessel proceeding to any port(s) prior to Hulaylah, and if so, any delays anticipated.

Sections (a) and (b) of above message should be repeated via Bahrain Radio 48 hours, 24 hours and again 12 hours prior to the export vessel's arrival at the Hulaylah Terminal and at any other time when ETA changes more than 1 hour.

When approaching the Terminal, an export vessel should contact the Terminal on VHF Channel 16 (156.8 MHz), establishing a working channel and confirm ETA.

VHF: *Export Tanker:* When the export tanker is berthed at the SPM, communication between the Terminal and the export tanker will be established on VHF Channel 16 or on a mutually agreed VHF channel.

In those cases where the VHF equipment on board the export tanker is not compatible with the Terminal equipment, the RAKOPET Mooring Master will arrange for the availability of compatible VHF sets for use during the transfer operation. These sets shall be returned to the RAKOPET Mooring Master prior to his departure from the export tanker.

Approach to the Anchorage/Mooring Master Boarding Area: When within VHF communication range, Masters of export tankers should ascertain berthing prospects from the Terminal.

TUGS: Suitable tugs and line boats are chartered for each lifting and are for export tanker's account.

BERTHING: *Mooring/Unmooring Arrangements:* The export tanker will be moored to the SPM according to a mooring plan to be agreed between the RAKOPET Mooring Master and the Master of the export tanker.

MEDICAL: Doctors and dentists available.
DENSITY: 1030.
FRESH WATER: Not available.
FUEL: It is not permitted to load bunkers while berthed at the SPM. Bunkers can be arranged at anchorage by vessels' local Agents.
CONSULS: At Dubai.
REPAIRS: Repair facilities are not readily available.

Repairs will not be permitted when the export vessel is berthed at the SPM.

LOADING: *Transfer Operations:* The RAKOPET Mooring Master will remain aboard the export tanker throughout the petroleum transfer operation and will co-ordinate all activities on board the export tanker with the Terminal.

The maximum loading rate available for the transfer operation will be about 9,000 bbls.p.h.

At all times during the transfer operation, a responsible deck officer shall be in charge of operations, either on deck or in the control room. On vessels with a central control room from which all operations are controlled, a deck watch in contact with the control room is required to continuously patrol the cargo deck, and monitor the manifold area of the export vessel. A crew member shall be kept on watch on the bow.

When the responsible export tanker officer has declared the export tanker ready to load with all necessary valves open, the Mooring Master will instruct the Terminal to commence the transfer.

At any time during the transfer operation, the rate can be reduced as requested by the Master or responsible officer of the export tanker.

The RAKOPET Mooring Master shall be given advance notice by the Master or responsible officer on the export tanker when a reduction of loading rate is required preparatory to completion of transfer.

After completion of loading, the vessel will be ullaged. A Bill of Lading, Cargo Manifest, Ullage Report, Certificate of Quantity, Certificate of Quality, Certificate of Origin, and Port Time Log will be completed. All such documents shall be signed by the Master of the export tanker prior to that vessel's departure. If required or requested by the Master of the export tanker, the Agent for the export tanker may sign the cargo documents on behalf of the export tanker's Master. The official quantity and quality of the crude oil delivered to the export tanker shall be determined by RAKOPET and shall be final and binding on the export tanker and her Owners and Charterers.

Hose Handling: The storage vessel will present a single 16 in., 150 ASA connection, hose will be connected on the port side. Hose connection/disconnection will be carried out by the export tanker's crew who are required to be at all times under the control of a responsible deck officer and undertake hose handling operations in co-operation with procedures advised by the RAKOPET Mooring Master.

The export tanker will be required to have ready a derrick at the port manifold area for the handling of the flexible hose.

Minimum Derrick Capacity:

Vessel size	*Derrick capacity*
up to 70,000 d.w.t.	7.5 tons
70,000 – 150,000 d.w.t	10.0 tons
over 150,000 d.w.t.	15.0 tons

Cargo Information: Oil loaded at the Hulaylah Terminal is Saleh Crude with an average API gravity of approximately 58°. The loading temperature will vary from 73°F in the winter to 85°F in the summer months. Some H_2S may be present in the crude oil.

Hydrogen Sulphide: Vessels nominated to load at the Hulaylah Terminal SPM should be advised that Saleh crude may contain H_2S. Continued exposure over long periods to even small concentrations of hydrogen sulphide can cause headache and nausea. Exposure to high concentration may be dangerous and even fatal. Masters should ensure that personnel involved in the loading operation take the appropriate precautions as recommended by their Owners for handling cargo containing H_2S.

Deballasting Operations: Export vessels are required to arrive with sufficient ballast or cargo and be adequately trimmed for safe manoeuvring.

Hulaylah Terminal has no ballast reception or slop disposal facilities, and therefore, export vessels are required to arrive with sufficient clean ballast suitable for pumping directly to the sea. Export vessels arriving with ballast unsuitable for pumping to the sea may be rejected for loading, or will be required to keep that portion of their ballast unsuitable for discharge to the sea segregated on board. RAKOPET will not accept any claims for vessels unable to meet such requirements.

It is strictly against the law to pollute the waters of the United Arab Emirates, and any Master, his vessel and Owners, may be subject to prosecution by the United Arab Emirates Authorities if such pollution does occur.

Simultaneous Deballasting and Loading of Cargo Tanks: Under certain weather/sea conditions this practice may be necessary. In such circumstances, simultaneous deballasting and loading may be requested by the RAKOPET Mooring Master.

If such operations are found necessary, it shall be done at the sole risk of the export vessel, its Master and Owners, and the most stringent care and attention shall be taken by the export tanker. The Owners, shall remain fully responsible for, and indemnify and hold RAKOPET, its parent companies, subsidiaries, and affiliates, harmless from, any and all claims, demands, damages, liabilities, costs, fines, and expenses, of every kind whatsoever, arising out of, on account of, or in any way connected with the simultaneous deballasting and loading of the export tanker.

Inert Gas Systems: All crude tankers of 20,000 d.w.t. or greater nominated to load shall arrive with cargo tanks inerted to 8% oxygen or less by volume and pressurised as required by the SOLAS Convention. Normally cargo tanks under pressure will not be inspected by the Terminal Representative provided a declaration is signed by the Master prior to commencement of loading confirming that all compartments of the vessel have been prepared in all respects as required for the cargo to be loaded.

(a) Tank Inspection, Gauging, Sampling, Water Dips and Temperatures: Should it be necessary for tanks to be inspected, then it should only be done on a tank-by-tank basis. The system shall be maintained at about 200 mm. water gauge pressure except for the individual tank to be opened which, if possible, is to be isolated from the system and the sighting port opened with care. On completion of inspection the tank shall be secured and re-pressurised. The next tank is not to be isolated and opened until the preceding tank is secured and open to the IG system. All gauging, sampling, water dips and temperatures will be taken either through special fittings provided; or if it is necessary to open up tanks for this purpose, then this will be done one tank at a time as described above.

(b) Failure of IGS: If at any time the IGS is not maintaining the prescribed conditions, the RAKOPET Mooring Master shall order a suspension of transfer operations. The cost of any delays will be for the export vessel's account.

SURVEYORS: At Dubai.
CUSTOMS ALLOWANCES: Most crew transit through Dubai where import allowances are:

1. 1,000 cigarettes or 200 cigars or 1 kilo of tobacco.
2. One litre toilet water and 150 gms. perfume.
3. No alcohol of more than 2% permitted without an import licence.
4. There are no restrictions outbound.

REPATRIATION: Launch service available.
AIRPORT: Ras Al Khaimah has an international airport but Dubai airport has greater frequency of flights.
SHORE LEAVE: Permitted.
GENERAL: *Operating Procedures:* Procedures for cargo and ballast operations shall be agreed in writing between the RAKOPET Mooring Master and the export tanker's Master and Chief Officer.

Flags: The national flags of the United Arab Emirates and Ras Al Khaimah shall be permanently displayed by vessels at the Hulaylah Terminal.

Alcohol: Masters are advised that drinking or sale of alcoholic beverages is strictly forbidden to U.A.E. National Citizens and are warned of the serious consequences of offering such drinks to the Terminal staff who may board the vessel.

Storing: It is not permitted to load stores while berthed at the SPM.

Agency: RAKOPET does not perform any vessel Agency functions. Vessels calling at the Hulaylah Terminal are required to arrange their own Agency representation from an Agency operating in Ras Al Khaimah.

WEATHER: The winds in the Southern part of the Gulf are usually light and generally blow from the Western quadrant most of the year but are occasionally interrupted by winds from varying directions. The visibility along the Ras Al Khaimah coastline is generally good, but from June to September the Shamal blows over the Gulf area and frequently produces rough seas and stirs up dust clouds which can affect visibility at sea. The cold fronts which move down the Gulf from November to April frequently cause a North or N.W. wind of 20 knots or more along the Ras Al Khaimah coastline with accompanying swells.

High waves generally do not occur along the Ras Al Khaimah coastline since the winds are usually light in this area. On those occasions when the wind does become strong, the wave heights generally remain limited since the distance over which the wind can blow to generate waves is relatively short from most directions. This is due to the bend in the Gulf which tends to reduce the fetch of North winds (e.g. waves over 8 ft. occur 0.2% of the time).

Currents are omnidirectional and variable in strength. During the month of January 1984, currents in excess of 1 knot were recorded.

SAFETY: *Safety Requirements:* Masters will be given the RAKOPET Safety Requirement Letter by the RAKOPET Mooring Master prior to commencement of berthing operations, and a signed acknowledgement will be required.

Safety Check List: On completion of berthing and prior to the commencement of deballasting or cargo loading, the Ship Safety Check List will be completed following a joint inspection by the RAKOPET Mooring Master and a responsible export tanker's officer. The RAKOPET Safety Check List is based on the recommendations of the "International Safety Guide for Oil Tankers and Terminals" (ISGOTT).

AUTHORITY: Ras Al Khaimah Offshore Petroleum Limited (RAKOPET), P.O.Box 540, Ras Al Khaimah, United Arab Emirates. *Telex:* 99255 Rakopet Em. *FAX:* 22702. *Contact:* Mr. A. A. Renner, General Manager. Tel: 22755.

AGENT: See "Mina Saqr".

JEBEL ALI, Dubai: 25.08 N., 54.55 E. **(See Plan)**

FLAG: U.A.E. and Dubai Emirate.
LOCATION: The Port of Jebel Ali is a major port situated some 35 km. S.W. of the city of Dubai.

The Port Control Tower is situated in position Lat. 24° 59.4′ N., Long. 55° 02.9′ E.

The Jebel Ali approach channel commences 17 km. off shore, the entrance to the channel being marked by a fairway buoy. The buoy is situated in Lat. 25° 06′ 54″ N., Long. 54° 56′ 33″ E.

The approach channel with a depth of 15.5 m. is buoyed and runs in a direction 315°T – 135°T towards the port. After 12.5 km. the channel takes a 25° bend and becomes the entrance channel which leads into the port on an alignment of 340°T – 160°T.

The approach channel has a width of 280 m. reducing to 235 m. In the bend the channel widens to 300 m. and in the entrance channel to 340 m.

The Outer Basin is 2.3 km. long and 600 m. wide with depth of 14 m. and the Inner Basin is 3.7 km. long and 425 m. wide with a depth of 11.5 m. The main axis of both basins is 340° – 160°.

All channel, basin and docks' bottoms are sandstone.

Tankers and LPG ships will use the dual purpose berth situated in the Outer Basin and will generally be berthed starboard side alongside.

A second tanker berth is situated at Berth No. 2 in the 14 m. basin for the import of products. Vessels normally berth starboard side to.

In all other berths ships can secure port or starboard side to.

DOCUMENTS: The following documentation should be forwarded to the ship's Agent, for delivery to the Cargo Handling Manager, at least 48 hours prior to vessel's arrival.

(a) Discharging Vessels
- 3 copies Cargo Stowage Plans
- 7 copies Cargo Manifests
- 3 copies Hazardous and Dangerous Cargo Declaration
- 3 copies Hatch List
- 3 copies Arrival/Cargo Advice
- 1 copy Each Bill of Lading/Packing List.

(b) Loading Vessels:
- 3 copies Cargo Stowage Plans
- 3 copies Cargo Loading List
- 3 copies Hazardous and Dangerous Cargo Declaration
- On completion of loading 3 copies of the Vessel Manifest endorsed by Customs must be provided

Immigration: Three Crew Lists are required on arrival.

Immigration Offices are established in the port. The service is available 24 hours a day. However, Masters should advise their Agent that the ship may leave outside normal office hours and that the Agent should check that Immigration Officials will be available to clear the vessel outward. This also applies to public holidays.

Masters are advised that "Immigration Clearance" must be on board and sighted by the Pilot before he can take the vessel to sea.

MINIMUM REQUIREMENTS:

In the interest of avoiding delays, all vessels programmed for Jebel Ali should comply with the following minima and be fitted with:

(i) Fully operational Radar.
(ii) Fully operational VHF Radio with Channels 11, 14, 16, 67, 69.
(iii) Sufficient crew to handle tugs' lines and moorings efficiently.
(iv) Efficient propulsion and deck machinery.
(v) Efficient and adequate moorings to secure vessel safely.
(vi) Efficient signalling equipment.
(vii) Fully operational Tachometer, Rudder and Helm indicators.
(viii) Efficient mooring stations communications systems.
(ix) An efficient anchor windlass and anchors.

If any of the above requirements cannot be complied with, the Harbour Master should be advised prior to arrival via "Jebel Ali Port Control".

APPROACHES: Ships should make for "Mina Jebel Ali" light float in position 25° 10′ 30″ N., 54° 52′ 15″ E. (Gp. Fl.3 every 15 secs. 15 miles). This float lies on the axis of the channel leading into Jebel Ali Port i.e. from this float vessel should steer 135° to approach Pilot Boarding Area.

Vessel should await Pilot in the area North of the seaward end of the buoyed channel, marked by a fairway buoy. This buoy is a safe water mark painted red and white vertical stripes. Light character is Fl. 10 sec. The centre of this waiting area, with a radius of 1 mile, is Lat. 25° 09′ N. and Long. 54° 54′ E.

PILOTAGE: Pilots are available on a 24-hour/day basis. Ships requiring a Pilot should call "Jebel Ali Port control" on VHF Channel 16 at least 2 hours before arrival at Pilot Boarding Area.

All ships other than excepted ships, navigating whether by entry, leaving or moving within Mina Jebel Ali shall be under the charge of a pilot.

The following ships will be excepted ships:

(i) Ships of War.
(ii) Pleasure Craft.
(iii) Ships of less than 150 n.r.t.
(iv) Tugs, dredgers, barges or similar vessels whose ordinary course of navigation does not exceed beyond the Arabian Gulf.
(v) Tenders of M.E.N.A.S.
(vi) Country Craft.

Pilots board from fast pilot launches, equipped with VHF, watch kept on Channel 16. Jebel Ali Port Control listens on Channel 16 and the working frequency is Channel 69. Additional Channels are also available. Vessels requiring a Pilot should give at least 2 hours notice of arrival in the Pilot Boarding Area.

Outbound ships should request Pilot at least one hour prior to departure. Masters should obtain "Master's Report" from the Inward Pilot and return it completed to the Outward Pilot.

Pilot Boarding Areas: The Pilot boarding area is located North of the channel entrance. The centre of this area is in position Lat. 25° 09′ N., Long. 54° 54′ E. with a radius of 1 mile.

Pilots will normally meet and embark incoming vessels at the above mentioned Pilot boarding area.

Masters are reminded to provide a safe lee.

Pilot Ladder Requirements: The following points are stressed:

(i) The rigging of pilot ladders and the embarkation and disembarkation of Pilots thereby shall be supervised by a responsible officer of the ship.
(ii) Every pilot ladder shall be secured in a position clear of any possible discharges from the ship, and so that each step rests firmly against the ship's side.
(iii) Every pilot ladder shall be secured in a positon where the Pilot can gain convenient access to the ship after climbing not less than 5 ft. and not more than 30 ft..
(iv) Whenever the distance from the water to the point of access to the ship exceeds 30 ft., access from the pilot ladder to the ship shall be by means of an accommodation ladder or equally safe and convenient means.
(v) A light shall be provided at night so that the pilot ladder overside and also the position where the Pilot boards the ship shall be adequately lit.
(vi) Lifebuoy and heaving line should be available at the ladder.
(vii) When a pilot hoist is provided as the method of access, it must be of an "approved" type, complying with the recommendations of the "European Maritime Pilots Association".

ANCHORAGE: The holding ground is poor, ships are recommended to use more chain than usual.

The anchorage is an area enclosed by the following four positions:

1.	Lat. 25° 11′ 20″ N.	Long. 54° 49′ 45″ E.
2.	Lat. 25° 08′ 12″ N.	Long. 54° 53′ 12″ E.
3.	Lat. 25° 05′ 18″ N.	Long. 54° 49′ 45″ E.
4.	Lat. 25° 08′ 20″ N.	Long. 54° 46′ 12″ E.

Ships will anchor here in a depth of approximately 16 m. – 20 m. (9 – 11 fathoms).

Pipe-line: All ships are warned that an untrenched pipe-line lies East of the channel. This line comes ashore in position 25° 01′ N., 55° 04′ 30″ E. From this position it lies in a direction of 345° for approximately 10 miles, thence assumes a direction of 313° towards the "Fatah Field" i.e. it is from 2 to 5 miles East of the buoyed entrance channel. Ships should **not** anchor near this pipe-line, nor should they approach the area with anchors walked back or trailing.

MAX. SIZE: No limit on LOA except Tanker Berth. Max. LOA Tanker Berth 270 m.

Max. draft – 14 m. to Tanker Berth, 13.5 m. Outer Basin, 11.0 m. at other berths.

RADIO: *ETA requirements:* (Also see "Tankers").

Vessels arriving at the Port of Jebel Ali are required to provide the Harbour Authority with the following estimated times of arrival:

(i) At least 48 hours prior to arrival or on leaving the last port, whichever is later, via Bahrain Radio or via Jebel Ali SSB radio, listening on 2182 kHz.
(ii) Confirm the vessel's estimated time of arrival at least 24 hours before arrival at the designated pilotage area and thereafter notify any significant change in excess of 1 hour.
(iii) On coming within VHF range of "Jebel Ali Port Control" establish VHF contact for the purpose of updating the estimated time of arrival and at least 2 hours' notice of arrival in the Pilot Boarding Area. VHF watch is kept on Channel 16.

Communications: The Port radio station maintains continuous listening watch on VHF Channel 16. The Port Emergency Channel is 18A. On coming within VHF range of "Jebel Ali Port Control", vessels should establish VHF contact for the purpose of updating the estimated time of arrival, and at least 2 hours' notice of arrival in the Boarding Area should be given.

Continuous watch is maintained on radio frequency 2182 kHz.

Vessels are warned that VHF Channels are monitored and taperecorded and any misuse of VHF Channels will be reported to the proper Authorities.

Notice of Arrival: Agents should arrange berthing and stevedoring with the Cargo Handling Manager at least 48 hours prior to the vessel's arrival (Cargo Handling Manager Tel. 56578).

Pre-Arrival Information: Prior to arrival, all vessels regardless of tonnage calling at the Port of Jebel Ali should provide "Jebel Ali Port Control" with the following information:

(i) Name of vessel
(ii) Port of Registry
(iii) Name of Master
(iv) Gross Tonnage
(v) LOA
(vi) Draft
(vii) Cargo to discharge or load
(viii) Pilot boarding arrangements
(ix) Number of crew, indicating the number of deck crew available for manoeuvring
(x) Health information
(xi) Last port of call.

VHF: See "Radio" and "Pilotage".

RADAR: VTS harbour radar in Port Control Tower in position 29° 59.4′ N., 55° 02.9′ E.

The Control Tower is equipped with a Sperry Radar Vessel Traffic System C.A.S. II. This equipment consists of a dual radar system combined with a data processor and computer. Traffic movements are monitored, and recorded within the Port limits and approaches. The Tower is continually manned by qualified Radar/Radio Operators.

TUGS: Two tugs with bollard pull of approximately 30 tons and one tug with bollard pull 40 tons are available in the port at all times, watch maintained on VHF Channel 16. Extra tugs can be made available if needed.

Mooring boats: Two mooring boats, the "Dina" and the "Wafa" are available at all times. These boats are also equipped with towing hooks and VHF.

BERTHING:

Berth Nos. 1 – 17: Depth 14.0 m.
Berth Nos. 18 – 66: Depth 11.5 m.
Tanker/LPG Berth No. 1: Depth 15 m.
Tanker Berth No.2: Depth 14 m.

Moorings: Bollards on the various quays and wharves are of capacity and spacing as listed below.

Quay/Wharf	*Capacity (Tonnes)*	*Spacing (m.)*
1, 2, 3	100	27
4A, 4B	70	30
5, 6, 7	70	30
8, 8 Basin	30	30
9 West	70	30
9 East, 10	70	20
West Wharf	15	14.4
East Wharf	15	14.4
Bitumen Wharf	30	20

It is essential that whilst alongside quays, moorings are tended carefully and regularly and conform with recommended mooring patterns for ship sizes. The average rise and fall is 1.14 m.

There are special 250 tonne bollards on Berth Nos. 7, 10, 11, 12, 13, 18, 19, 20, 21, 22, 23 and 52 for vessels over 300 m. in length. These berths can cater for laid-up VLCCs and are fitted with electric points and shore telephone points. All berths can be connected to shore fire mains and fresh water points. Enquiries for further information and conditions to the Harbour Master.

General Cargo Areas: These are located on Quay Nos. 6 and 10 with 21 m. wide concrete aprons, covered and open storage, truck delivery and receiving docks.

Prior arrangements must be made with the Cargo Handling Manager for the discharge of obnoxious and hazardous cargo.

Storage: Six transit warehouses provide more than 48,000 sq. m. of covered storage. Over 175,000 sq. m. paved open storage areas are provided.

Equipment: A full supply of supporting cargo handling equipment to complement general cargo operations is available. This includes a 35 ton fixed jib derrick for barge or shallow draft ship loading, two mobile cranes (40 ton and 20 ton) and a comprehensive selection of materials handling equipment.

Ro-Ro Terminal: The Ro-Ro Terminal is situated at Berths 32-34, with two ramps specially designed for stern discharging vessels, and a water depth of 11.5 m.

An 8,000 sq. m. warehouse provides covered storage while 105,000 sq. m. of paved open storage is available. Equipment includes 3 Douglas Tugmasters.

Cold Store: The Cold Store is situated at Berth 31 and has a capacity of approximately 7,000 tons. Temperature can be separately controlled in each of eight rooms in the range of −29°C. to 13°C.

CONTAINER FACILITIES: The Container Terminal is situated at Berths 15-17, totalling 900 m., with 60 m. wide concrete aprons and a water depth of 14 m.

Storage: The Container Yard can accommodate over 8,000 T.E.U's.

The Container Freight Station provides 10,000 sq. m. of covered storage.

The 4,000 sq. m. temperature-controlled warehouse provides cool storage at low humidity.

Equipment: Three third generation 41 ton Mitsubishi electric Gantry cranes, with telescopic spreaders to handle 20 ft., 35 ft. and 40 ft. containers, and appropriate fittings for over height and flat rack units.

Crane Specifications:

S.W.L. under the spreader 30.5 tons.
S.W.L. under cargo hook beam 34 tons.
Distance from face or rubber fender to centre line of container at maximum outreach 34 m. (112 ft.)
Top of container at miximum lift above quay level 26 m. (85 ft. 4 in.)
Top of container at lowest position below quay level 16.5 m. (54 ft. 6 in.)
Quay level above highest tide 2 m. (6 ft. 6 in.)
Quay level above lowest tide 4 m. (13 ft. 1 in.)
Container crane travel 900 m.
Container crane reach behind back rail 15 m. (49 ft.)
Maximum weight of 20 ft., 35 ft., 40 ft. container handled by spreader 30,504 kg. (67,250 lbs.)
Maximum heavy lift with spreader removed. 41,007 kg. (90,405 lbs.)

7 top-lift container handling vehicles with a 31 ton capacity, and one with a 20 ton capacity.

141 × 380 volt Kheops and 75 × 380 volt Crouse Hinds refrigerated container plugs with 24-hour monitoring service.

Flat bed trailers, low bed trailers, tractor units, mafis, goosenecks and an assortment of trucks.

Truck scale with a capacity of 50 tons.

A container cleaning service is available.

STEVEDORES: By Port Authority of Jebel Ali.

Normal Working Hours:

0700 – 1200 hrs, 1300 – 1600 hrs. 24 hour working can be arranged.

DENSITY: 1032.

MEDICAL: There are medical facilities provided in Dubai Hospitals – arrangements can be made through the Agent. In any emergency, medical services are available in Jebel Ali village, telephone No. 56489.

FRESH WATER: Supplied by Dubai Water Services (Tel: 39236/56749). Order through Agents. Water laid on at all berths.

FUEL: A Bunkering Barge is stationed in Mina Jebel Ali operated by "E.B.B. Co.". Arrangements for bunkers are to be made through vessels' Agents. Barge can deliver diesel oil and/or fuel oil. Delivery by road tanker also available. Tel: 56759.

Lubricating Oils: Available, transported by road.

TANKERS: *Tanker/LPG Berth No. 1:* This berth provides facilities for product tankers as well as LPG and condensate carriers. 4 loading arms are available to handle Product tankers through 10 in. connections with reducers available. On the LPG half of the jetty, there are 3 loading arms with 16 in. connections. Two vapour return lines are also fitted, 1 for propane and 1 for butane with 14 in. connections. Various reducers and straight pieces are also available. The depth of water in the berth is 15 m. but the controlling depth in the approach channel is 14.5 m.

This berth is equipped with mooring hooks of 100 tons strength, each fitted with electric capstan. The hooks are tripped manually.

Tankers will generally be berthed starboard side to the Berth.

Tanker Berth No. 2: This berth provides facilities for product tankers, using 10 in. Chicksan arms and/or flexible connections. Various reducers are available.

Chemical Tanker Berth: A designated Chemical Tanker berth is operational at Berth No. 51. Depth of water at the berth is 11.5 m.

Vessels are warned that no dirty ballast discharge will be allowed within the limits of Mina Jebel Ali. There are no shore ballast reception facilities.

Also see "General".

Vessel Requirements: Below, are details of information required by the terminal operators for accepting vessels for LPG, LNG and Condensate loading and Port Authority of Jebel Ali's requirements and regulations for a tanker in berth.

Port Authority of Jebel Ali-Tanker Berth: Uniform mooring system is advisable, ie, all synthetic or all wire for all moorings except backsprings. P.A.J.A. does not allow the use of nylon tails on wire moorings. Backsprings must be of wire.

Concerning deballasting requirements P.A.J.A. allows the discharge of permanent segregated clean ballast in the harbour. Clean tank ballast can only be discharged if a surveyor appointed by Agents at Owner's/Charterer's expense, certifies that the tank ballast is clean, that all cargo pumps and lines are clean and the surveyor remains on board to witness and if necessary stop the discharging of cargo tank ballast if it proves to be unclean.

It is also recommended that all efforts be made to cut down time taken by ships for documentation purposes after completion.

Bunkers may not be taken during cargo operations.

On all occasions, P.A.J.A. would berth all ships starboard-side-to on the tanker berth unless some particular "one off" technical reason prevents this.

LPG – Vessel Particulars: The following items shall be submitted with each vessel nomination. In the event that all the data is not available, the nominated vessel acceptance shall be tentative and subject to the approval of "Seller" Dubai Natural Gas Company Limited.

1. Vessel name and flag.
2. Vessel Master's name.
3. Vessel ETA at Jebel Ali.
4. Vessel communication channel.
5. Vessel description (weight, length, dimensions, etc.).
6. Loading connection: (a) Size. (b) Rating. (c) System – ASA/Metric/British, etc.
7. Height of the loading connection from the centre line of the flange to the first obstacle downward below each flange.
8. Distance from the loading flange face to ship's rail.
9. Distance between loading and vapour return connection centres.
10. Distance from the loading flange to the first obstacle toward the manifold.
11. Height of the ship's rail in front of the loading manifold.
12. Previous cargo and its origin.
13. Manifold sequence of the loading and vapour return connection.
14. Loading rate per product for this particular lifting.
15. Cargo tanks temperature per product upon vessel arrival at the loading port.
16. Can propane and butane be loaded simultaneously?
17. Cargo on board, its origin and specification per tank upon vessel arrival for loading.
18. Vessel meets Government, P.A.J.A. and seller regulation, or specify which regulation the vessel meets.
19. Vessel in possession of reducers, their type, size and rating.
20. Demurrage rate and conditions, if any.
21. Specify if vessel will install any mesh screens in their manifold during this lifting.
22. Amount to be loaded.
23. Vessel has nylon mooring lines.
24. Buyer or Agent to notify Dugas of the vessel location, quantity to be loaded and its ETA 72, 48 and 24 hours before the first day of the vessel's scheduled ETA.
25. Can propane and butane be purged and/or cooled simultaneously? (If applicable.)

LNG – Vessel Particulars: The following items shall be submitted with each vessel nomination. In the event that all the data is not available, the nominated vessel acceptance shall be tentative and subject to the approval of "Seller" Dubai Natural Gas Company Limited.

1. Vessel name and flag.
2. Vessel Master's name.
3. Vessel ETA at Jebel Ali.
4. Vessel communication channel.
5. Vessel description (weight, length, dimensions, etc.).
6. Loading connection:
   (a) Size.
   (b) Rating.
   (c) System – ASA/Metric/British, etc.
7. Height of the loading connection from the centre line of the flange to the first obstacle downward below each flange.
8. Distance from the loading flange face to ship's rail.
9. Distance between loading connection centres.
10. Distance from the loading flange to the first obstacle toward the manifold.
11. Height of the ship's rail in front of the loading manifold.
12. Previous cargo and its origin.
13. Vessel gas vapour venting system.
14. Loading rate for this particular lifting, per single loading arm connection.
15. Ballast on board condition (clean, dirty, etc.).
16. Deballasting estimated time required after berthing.
17. Cargo on board, its origin and specification per tank upon vessel arrival for loading.
18. Vessel meets Government, P.A.J.A. and seller regulation, or specify which regulation the vessel meets.
19. Vessel in possession of reducers, their type, size and rating.
20. Demurrage rate and conditions, if any.
21. Specify if vessel will install any mesh screen in their manifold during this lifting.
22. Amount to be loaded.
23. Vessel has nylon mooring lines.
24. Buyer or Agent to notify Dugas of the vessel location, quantity to be loaded and its ETA 72, 48 and 24 hours before the first day of the vessel's scheduled ETA.

Condensate – Vessel Particulars: The following items shall be submitted with each vessel nomination. In the event that all the data is not available, the nominated vessel acceptance shall be tentative and subject to the approval of "Seller" Arco Dubai.

1. Vessel name and flag.
2. Vessel Master's name.
3. Vessel ETA at Jebel Ali.
4. Vessel communication channel.
5. Vessel description (weight, length, dimensions, arrival draft fore and aft, estimated departure draft, etc.).
6. Loading connection:
   (a) Size.
   (b) Rating.
   (c) System – ASA/Metric/British, etc.
   (d) Is manifold located centre line of LOA.
7. Height of the loading connection from the centre line of the flange to the first obstacle downward below each flange.
8. Distance from the loading flange face to ship's rail.
9. Distance between loading connection centres.
10. Flange thickness. Maximum acceptable: 37 mm.
11. Clearance behind connecting flange for coupling claws. Minimum requirement: 240 mm.
12. Height of the ship's rail in front of the loading manifold.
13. Previous cargo and its origin.
14. Loading rate for this particular lifting. Minimum requirement 25,000 bbls p.h. per single loading arm connection.
15. Specify quantity of permanent and cargo tank ballast on board. Only permanent segregated ballast discharge allowed at Jebel Ali port. Repeat only permanent segregated ballast discharge allowed.
16. Estimated deballasting time required after berthing. Specify if simultaneous with loading.
17. Cargo on board, its origin and specification per tank upon vessel arrival for loading.
18. Vessel in possession of reducers, their type, size and rating.
19. Please confirm agreement release inert gas pressure in all tanks for inspection by Arco surveyor.
20. Buyer or Agent to notify Arco of the vessel location, quantity to be loaded and its ETA 72, 48 and 24 hours before the first day of the vessel's scheduled ETA.
21. Arco Dubai advise starboard side alongside.
22. Arco Dubai advise loading arm size nominal 16 in. with provision for 16, 14 and 12 in. connection by hydraulic coupler.
23. Quantity to be loaded, in barrels. Arco Dubai advise
    API:– Temp.:–

REPAIRS: Berths are available for afloat repairs to be done by local contractors.

Lay-up Berths for long and short periods can be arranged for vessels up to 550,000 d.w.t. with draft up to 13.5 m. Special bollards are installed to provide 8 berths for ULCC class vessels.

Marine engineering firms with specialised workshops in Dubai, undertake engineering repairs. Agents will make necessary arrangements.

Repairs to radar, radio, echo sounders and other electronic navigational and communication aids are available by major manufacturers' Agents, (i.e. Marconi, Decca, Kelvin-Hughes, Telefunken, etc.), being represented in Dubai and sets serviced by trained engineers. Agents will advise.

A Port Authority diver can be arranged through vessel's Agent.

SURVEYORS: Lloyd's, B.V., A.B.S., N.V., N.K. and the Salvage Association as well as other private qualified cargo, hull and engine surveyors and consultants are available.

Gas free certificates and hot work permits can be obtained through independent qualified surveyors.

Surveys: The following surveys and certification can be carried out in Jebel Ali: Loadline, Safety Equipment, Safety Construction, Radio.

CONSULS: Embassies and Consulates in Dubai.

Embassies:

Federal Republic of Germany	Tel: 231013/214352
United Kingdom	Tel: 531070

Consulates:

Bangladesh	Tel: 236676.	Malaysia	Tel: 285695
Belgium	Tel: 226206	Netherlands	Tel: 225156
China	Tel: 227411	Norway	Tel: 233152
Egypt	Tel: 434417	Oman	Tel: 223692
France	Tel: 232442/237252	Pakistan	Tel: 531412
India	Tel: 220201/2	Panama	Tel: 285340
Iran	Tel: 531150/531915	Qatar	Tel: 221216
Iraq	Tel: 660822	Saudi Arabia	Tel: 222163
Italy	Tel: 377167	Sweden	Tel: 375542
Jordan	Tel: 667097	Switzerland	Tel: 375542
Kuwait	Tel: 221900	Syria	Tel: 663354
Lebanon	Tel: 451351	U.S.A.	Tel: 371115

The foregoing are Embassies and Consulates situated in Dubai. Most countries maintain diplomatic missions/embassies, etc., in Abu Dhabi – some 120 km. from Mina Jebel Ali.

TELEPHONES: Ship board telephones available by arrangement.

Important Telephone Numbers at Jebel Ali:

Port Control	35326
Harbour Master & Port Control	35251
Police	56111
Port Health	56892
Customs	56374/5
Immigration	56844/56334
Ambulance and Fire Service	56222 (24 hours)
Security	56846/56578 ext. 218, 232, 233

SHORE LEAVE: The following is the standard procedure for shore leave as dictated by the Port Immigration Department.

Crew members wishing to go ashore are to report to the Port Immigration Office (Agent to arrange) and collect a "Marine Landing Permit" which should be carried at all times. On returning to the ship, the permit should be handed back to the Port Police. The process is to be repeated on every subsequent shore leave.

WEATHER: *Weather and Currents:* Cross currents of up to 1.75 knots may be experienced in the Approach Channel. These currents are wind and tide induced.

Fresh winds are frequently experienced at Mina Jebel Ali. However, during evening, night and morning hours, light Southeasterly winds prevail, veering to N.W. by noon and freshening to Force 4-5.

On occasions, especially during November-March, fog may be prevalent during early morning.

GENERAL: *Dirty Ballast and Refuse:* All vessels are warned that no dirty ballast, bilges, etc., should be pumped out in the vicinity of the Port of Jebel Ali. Offenders will be prosecuted and the U.A.E. and Dubai Police maintain maritime and helicopter patrols to ensure no dirty ballast is discharged and no refuse is thrown overboard.

These rules apply while vessels are alongside and the Harbour Master may instruct offending vessels to leave or bar them from returning to Mina Jebel Ali.

Rubbish skips supplied by the Port Authority at a charge and are compulsory.

Ballast Requirements: For the purpose of safe manoeuvring, the Harbour Master requires all vessels to maintain an acceptable ballasted condition.

Vessels should carry sufficient ballast so that the propellor can have maximum immersion whilst maintaining an acceptable stern trim.

Masters are reminded that no dirty ballast will be allowed to be discharged in Mina Jebel Ali.

Tanker Ballast Discharge Rules:

1. Clean water ballast from tankers segregated ballast tanks may be discharged overside.

2. Clean water ballast from dedicated clean ballast tanks as defined in Marpol 73/78 may also be discharged in the port. However, if no separate ballast pumping system exists then such discharge must be monitored by an independent surveyor and the ballast discharged must be certified clean. This discharge operation may take place during daylight hours only.

3. Ships in the "C.O.W." mode may not discharge ballast from cargo tanks, unless such tanks have been thoroughly cleaned and have reverted to the status of C.B.T. since last carrying oil.

4. "Clean" ballast means ballast containing less than 15 parts per million of Hydro Carbons.

5. Not withstanding all the above, if any visible signs of pollution are seen on or below the surface around the ship discharging ballast, the ballast discharge will be stopped and no further discharge will be permitted.

Fumigation: Fumigation can be carried out by specialist firms.

Ships' Chandlers, Ship Supplies: All types of provisions – fresh and dry, and all types of fresh and frozen meat are available ex-Dubai. Arrangements through Agent and/or through direct VHF contacts with ship chandlers and provision merchants. Paints, ropes, etc., available as well as charts. Laundry services are also available.

Visitors Port Passes: Any Person entering the Port is required to have either a permanent or visitors temporary/day pass. Passes can be obtained from the Pass Office situated at the Main Entrance. The Pass Office operates daily from 0700 hours to 1900 hours.

Permanent passes cost Dhs. 25 each and are valid for 12 calendar months from date of issue. Applicants are required to produce a Sponsor's letter and complete an application for Pass Form. Documents such as Passports and Photographs are not required.

Temporary or Day passes which are free of charge are only issued to irregular visitors who have a confirmed appointment to visit the Port.

No more than one of these passes a month will be issued to any individual. Day Passes can be obtained from the Pass Office or any Terminal Checkpoint.

Shops: A small supermarket is open in the port. Hours of work are: 0800 – 1300 hrs. Saturday to Thursday inclusive.

Bank: The National Bank of Dubai maintains a branch in the port. Hours of work are: 0800 – 1200 hrs. Saturday to Thursday inclusive for counter staff.

Seamen's Recreational Facilities in Dubai:

International Seamen's Club (Tel: 435551)
Norwegian Seamen's Mission (Tel: 470561/3)

Jebel Ali International Seamen's Centre: Situated on Quay No. 10. Tel: 35297/35296. Hours: 1600-2359 daily and 1100-2359 on Fridays and public holidays. Facilities: Bus service to and from berths; international telephones; post box and stamps; small shop for tobacco, toiletries, writing materials, etc.; money changing; pool and darts; T.V. and video; library; snacks and full bar service.

Transport: Arrangements for taxis can only be made through the Agent.

JEBEL DHANNA – RUWAIS: 24.11 N. 52.37 E.

(See Plan)

(A) GENERAL
(B) JEBEL DHANNA – SEA BERTHS TERMINAL
(C) RUWAIS – REFINERY TERMINAL
(D) RUWAIS – NGL TERMINAL
(E) RUWAIS FERTILISER INDUSTRIES (FERTIL)
(F) ADNOC RUWAIS SULPHUR HANDLING TERMINAL

(A) GENERAL

AUTHORITY: Abu Dhabi Petroleum Ports Operating Company (ADPPOC), the Governing Authority for the petroleum ports in the Emirate of Abu Dhabi.

ADPPOC, P.O.Box 61, Abu Dhabi, U.A.E. *Tel:* 336700. *Telex:* 22209. *Contact:* Captain Al Jaran, Operations Manager.

ADPPOC – Ruwais/Jebel Dhanna, P.O.Box 61, Abu Dhabi, U.A.E. *Telex:* 52207. *Contact:* Captain M. Cooper, Station Manager.

PORT LIMITS: All waters Southward of Lat. 24° 26′ 48″ N., to the coast up to Spring High Water Mark, between meridians of Long. 52° 33′ 36″ E. and Long. 52° 46′ 36″ E., (that is, with reference to Chart 3780 B.A. & USHO, the whole waters of that Chart) and shall include all jetties, wharves, structures, sea-berths, reefs, rocks, sand-bars and islands, excluding Sir Bani Yas Island, within the said area.

PILOTAGE: Pilotage is compulsory for all ships navigating within port limits other than exempted ships (See "General"). Ships may, however, drop anchor or sail from Gasha Anchorage without a Pilot. This rule is not applicable to U.A.E. Naval, Coast Guard vessels or country craft who may, having ascertained channel clearance from Port Control, proceed without the service of a Pilot.

Pilot Station: Pilots will board and disembark at the main Gasha Pilot Station as delineated on B.A. Chart No. 3780.

Use of North Channel: Masters of Exempted ships of suitable draft should use the North Channel and East Yabr Relief Channel when entering or leaving the port.

Pilotage Exemption Certificate: Port Pilotage Exemption Certificate may be granted to Masters of regular trading vessels of less than 3,000 n.r.t., upon the Port Officer's satisfaction of their competency. Such certificates shall be renewed annually.

Berthing and Unberthing at Oil and Gas Berths: Notwithstanding anything contained in these Rules berthing or unberthing at oil and gas berths at Jebel Dhanna or Ruwais shall be under the control of a Pilot.

N.B.: Berthing and unberthing of a small ship at the ADNOC Berth in position Lat. 24° 11′ 55″ N., Long. 52° 38′ 59″ E., may be undertaken without a Pilot provided that the Master has Pilotage Exemption Certificate.

Pilot Ladder: A clean and efficient pilot ladder fitted with spreaders and manropes shall be made available for the Pilot to embark or disembark and at night the ladder shall be illuminated with an efficient and safe light.

Accommodation Ladder and Pilot Ladder: Whenever as in the case of large vessels, the height of the deck above the water exceeds 30 ft., the accommodation ladder shall also be used in conjunction with the pilot ladder, and shall be lowered to about 22 ft. (7.0 m.) above the water with the pilot ladder immediately adjacent to the bottom platform of the accommodation ladder.

Mechanical Hoist: A mechanical hoist of an approved pattern shall be considered an acceptable alternative to a conventional pilot ladder to be used in conjunction with the accommodation ladder.

NOTE: Mechanical hoists whose operation relies upon a single wire are not of approved pattern under these rules.

Supervision of Pilot Ladders: The rigging of the pilot ladders for the embarkation and disembarkation of Pilots shall be supervised by a responsible ship's officer, and shall be so effected that the ladder is well clear of any overboard discharge and so that each step of the ladder rests securely against the side of the ship.

Safe embarkation and disembarkation: A Master of any ship navigating in the port, shall afford such suitable "weather lee" and speed reductions as may be directed by the assigned Authority Pilot in order to provide a safe embarkation or disembarkation operation.

Pilot to Advise Course and Speed: Vessels navigating within Port Limits shall proceed on such a course and at such speed as the Pilot advises.

Provided that when passing through the inner anchorage areas every vessel whether under Pilotage charge, or navigated by her Master with an Exemption Certificate, shall proceed with caution and at a moderate speed duly considering other vessels and cargo operations in the area.

Small High Speed Vessels: High speed vessels as of "Crew Boat" type shall proceed at a moderate speed to reduce the wave making wash in the vicinity of vessels, working cargo, dredging or construction works, diving operations, etc., until past and clear of these vessels or operations.

Anchors Ready for Use: Every ship prior to any movement within the port shall have both Bower Anchors (if two fitted) prepared for immediate emergency use. Masters shall, however, consult with the assigned Pilot (if any) before lowering an anchor to the sea surface.

Any Damage to Ship to be Notified: Before entry the Master shall inform the Port Authority of any damage to the vessel or any projection from the hull above or below water which may affect the vessel's draft, ship-handling qualities or berthing capability.

NOTE:
To ensure greater safety in the Jebel Dhanna Channel, in consultation with Messrs ADPPOC and executive manager of Petroleum Ports Authority, it has been decided to minimise the amount of paperwork the Pilot is expected to complete while in transit from Gasha beacon to inner anchorage area.

Therefore a vessel arriving at Gasha while tendering her "Notice of Readiness" will henceforth be required to pass to Jebel Dhanna:

1. Name of vessel.
2. Tonnage required.
3. Her maximum loading rate, always assuming 2×16 in. hoses.
4. Number of hours ballast.
5. Any health hazard infectious diseases/or none.
6. Draft outwardbound.
7. Any other pertinent information.

The Pilot is to obtain signature on "acceptance of port regulations" booklet prior to entering channel. All other documentation can be completed after vessel is made fast in the berth. This will ensure no distractions while in transit in the channel and further enhance the exemplary safety standards.

All parties are kindly requested to comply with the slight change in Jebel Dhanna/Ruwais documentation procedures to enhance safety requirements.

TIDAL STREAMS: In the outer approaches to Jebel Dhanna-Ruwais, tidal streams would appear to attain a maximum of 1 knot while 1.7 knots may be encountered in the channel N.E. of Jazirat Sir Bani Yas.

Tidal currents in the area of the berths seldom exceed 0.4 knots.

The tides are generally diurnal, winds from N.E. and N.W. may cause an increase up to 0.6 m. in the height of the tide.

The highest average, spring high tide is 2.0 m. above chart datum.

The highest average, neap high tide is 1.0 m. above chart datum.

AIDS TO NAVIGATION: Approaches to Jebel Dhanna-Ruwais (See Admiralty Chart Nos. 3778, 3779 and 3780).

The outer channel for deep drafted vessels between Jazirat Zarakhuh (Zirku) and Gasha Anchorage is marked by 6 buoys and 2 light floats as follows:

Name/No.	*Description*	*Characteristic*	*Position*
Outer Fairway	Safe Water Mark	Iso 10 secs.	24° 45′ 48″ N. 52° 53′ 12″ E.
O1	Conical Green	Fl.G. 5 secs.	24° 46′ 20″ N. 52° 49′ 30″ E.
Creagh Shoal	Light Float	Fl. 10 secs. 14 M Racon "C" 72 secs.	24° 43′ 00″ N. 52° 42′ 15″ E.
Patch	Conical Green	Fl.G. 3 secs.	24° 40′ 00″ N. 52° 41′ 32″ E.
O5		Qk.Fl.(2) G. 10 secs.	24° 37′ 43″ N. 52° 38′ 13″ E.
Dalma	Light Float	Qk.Fl.(9) 15 secs. Racon "D" 72 secs.	24° 32′ 24″ N. 52° 27′ 48″ E.
O7	Conical Green	Gp.Fl.(3) G. 10 secs.	24° 29′ 27″ N. 52° 29′ 24″ E.
Gasha	West Cardinal	Qk.Fl.(9) 15 secs.	24° 25′ 46″ N. 52° 34′ 25″ E.

A relief route known as North Channel passes from the outer fairway buoy S.E. of Creagh Shoal and enters the port East of Gasha Island. It is marked by:

Obstruction	Isolated Danger Mark	Gp.Fl.(2) 10 secs.	24° 37′ 50″ N. 52° 47′ 17″ E.
North Channel	Safe Water Mark	Iso. 10 secs.	24° 30′ 00″ N. 52° 41′ 36″ E.
West Kurkum	West Cardinal	Qk.Fl.(9) 15 secs.	24° 23′ 51″ N. 52° 41′ 31″ E.
East Gasha	Green Conical	Fl.G. 5 secs.	24° 23′ 54″ N. 52° 41′ 15″ E.

The least depth in this channel 7.5 m. (1980) occurs about 0.8 nautical miles North of the Gasha/Kurkum entrance.

A Beacon was established at Price Shoal (1980) consisting of a pile with a bottle chamber at the top and a gas lantern.

Price Shoal	Red Pile Structure	Fl. 5 secs. 12 m. 14 miles Racon "P" 48 secs.	24° 17′ 24″ N. 52° 42′ 09″ E.

ANCHORAGES: The main anchorage positions are defined on Chart No. 3780, and are identified by the letters of the alphabet.

Explosives Anchorage: Anchorage bounded by the following points:

(i) Lat. 24° 13′ 30″ N., Long. 52° 44′ 55″ E.
(ii) Lat. 24° 12′ 46″ N., Long. 52° 45′ 48″ E.
(iii) Lat. 24° 13′ 18″ N., Long. 52° 46′ 18″ E.
(iv) Lat. 24° 14′ 00″ N., Long. 52° 45′ 27″ E.

Explosives Buoy: Mooring buoy in position Lat. 24° 09′ 36″ N., Long. 52° 46′ 18″ E., for the purpose of temporary mooring of barges or pontoons carrying explosives.

CHANNELS:

Deep Water Channel: The channel marked at its outer end by:

Gasha Buoy in position Lat. 24° 25′ 46″ N., Long. 52° 34′ 25″ E.

marked on the West side by:

Buoy No. 1 in	Lat. 24° 24′ 28″ N.	Long. 52° 36′ 26″ E.
No. 3	Lat. 24° 23′ 50″ N.	Long. 52° 37′ 18″ E.
No. 5	Lat. 24° 23′ 02″ N.	Long. 52° 38′ 37″ E.
No. 7	Lat. 24° 21′ 33″ N.	Long. 52° 40′ 14″ E.
No. 9	Lat. 24° 20′ 33″ N.	Long. 52° 41′ 22″ E.
No. 11	Lat. 24° 19′ 49″ N.	Long. 52° 41′ 52″ E.
No. 13	Lat. 24° 17′ 42″ N.	Long. 52° 40′ 34″ E.
No. 15	Lat. 24° 14′ 55″ N.	Long. 52° 39′ 26″ E.
No. 17	Lat. 24° 11′ 41″ N.	Long. 52° 41′ 42″ E.

and marked on the East side by:

Buoy No. 2 in	Lat. 24° 25′ 18″ N.	Long. 52° 35′ 40″ E.
No. 4	Lat. 24° 24′ 18″ N.	Long. 52° 37′ 07″ E.
No. 6	Lat. 24° 23′ 57″ N.	Long. 52° 37′ 34″ E.
No. 8	Lat. 24° 22′ 46″ N.	Long. 52° 39′ 06″ E.
No. 10	Lat. 24° 21′ 37″ N.	Long. 52° 40′ 21″ E.
No. 12	Lat. 24° 20′ 58″ N.	Long. 52° 41′ 08″ E.
No. 14	Lat. 24° 20′ 29″ N.	Long. 52° 41′ 42″ E.
No. 16	Lat. 24° 19′ 49″ N.	Long. 52° 42′ 18″ E.
No. 18	Lat. 24° 18′ 42″ N.	Long. 52° 41′ 48″ E.
No. 20	Lat. 24° 17′ 45″ N.	Long. 52° 41′ 28″ E.

North Channel: The inward/outward route marked at its southern end by:

East Gasha Buoy	in	Lat. 24° 23′ 54″ N.	Long. 52° 41′ 15″ E.
West Kurkum Buoy	in	Lat. 24° 23′ 51″ N.	Long. 52° 41′ 31″ E.

Yabr Channel: The route East of Jazirat Yabr marked by:

North Yabr Buoy	in	Lat. 24° 20′ 54″ N.	Long. 52° 43′ 18″ E.
Yabr Channel	in	Lat. 24° 18′ 55″ N.	Long. 52° 45′ 11″ E.
S.E. Yabr	in	Lat. 24° 18′ 20″ N.	Long. 52° 44′ 24″ E.
South Yabr Channel	in	Lat. 24° 15′ 46″ N.	Long. 53° 43′ 24″ E.

Halat Al Alaq Island is now marked by:

North Alaq	in	Lat. 24° 15′ 20″ N.	Long. 52° 40′ 54″ E.
West Alaq	in	Lat. 24° 14′ 27″ N.	Long. 52° 40′ 27″ E.
N.W. Alaq	in	Lat. 24° 15′ 06″ N.	Long. 52° 40′ 21″ E.
South Alaq	in	Lat. 24° 13′ 48″ N.	Long. 52° 41′ 30″ E.
East Alaq	in	Lat. 24° 14′ 23″ N.	Long. 52° 41′ 38″ E.

Ruwais Approach: The channel to N.E. of Ruwais middle marked by:

(i) Buoy No. 22	in	Lat. 24° 13′ 38″ N.	Long. 52° 42′ 12″ E.
(ii) Buoy No. 24	in	Lat. 24° 12′ 24″ N.	Long. 52° 44′ 42″ E.
(iii) Buoy North Middle	in	Lat. 24° 12′ 42″ N.	Long. 52° 43′ 41″ E.
(iv) Buoy East Middle	in	Lat. 24° 12′ 08″ N.	Long. 52° 44′ 26″ E.
(v) Buoy South Middle	in	Lat. 24° 11′ 07″ N.	Long. 52° 43′ 46″ E.
(vi) Buoy West Middle	in	Lat. 24° 11′ 39″ N.	Long. 52° 42′ 29″ E.
(vii) Buoy No. 26	in	Lat. 24° 12′ 17″ N.	Long. 52° 45′ 48″ E.
(viii) Buoy No. 28	in	Lat. 24° 11′ 17″ N.	Long. 52° 45′ 19″ E.
(ix) Buoy No. 30	in	Lat. 24° 10′ 10″ N.	Long. 52° 45′ 24″ E.
(x) Buoy No. 32	in	Lat. 24° 10′ 15″ N.	Long. 52° 45′ 45″ E.

Bulk Cargo Terminal (BCT): Turning basin marked by buoys:

(i) BCT 1	in	Lat. 24° 09′ 29″ N.	Long. 52° 43′ 54″ E.
(ii) BCT 2	in	Lat. 24° 09′ 24″ N.	Long. 52° 44′ 12″ E.
(iii) BCT 4	in	Lat. 24° 09′ 07″ N.	Long. 52° 44′ 16″ E.
(iv) BCT 6	in	Lat. 24° 08′ 57″ N.	Long. 54° 44′ 14″ E.

A relief channel East of Sir Bani Yas Island is marked by:

(i) N.E. Yas	in	Lat. 24° 21′ 58″ N.	Long. 52° 39′ 21″ E.
(ii) Stewart	in	Lat. 24° 20′ 09″ N.	Long. 52° 40′ 05″ E.

The entrance to the Construction Wharf is marked by:

CW1	in	Lat. 24° 19′ 12″ N.	Long. 52° 40′ 20″ E.
CW2	in	Lat. 24° 09′ 10″ N.	Long. 52° 45′ 07″ E.
CW3	in	Lat. 24° 09′ 09″ N.	Long. 52° 45′ 04″ E.
CW4	in	Lat. 24° 08′ 34″ N.	Long. 52° 45′ 08″ E.

PROHIBITED AREAS: Prohibited Areas exist for a distance of 2 cables (1,200 ft. – 365 m.) around any berth at which any ship is engaged in loading or discharging any petroleum cargo of whatever description including crude oils and refined products whether in bulk or containers, LNG or LPG and no vessels or craft may enter such restricted areas without instructions from the Port Authority or Oil Company.

RESTRICTED AREAS:

Sea Berths: A restricted area exists around ADCO's sea-berths within an area bounded by a line from:

(a) Jebel Dhanna Jetty Light in Lat. 24° 11′ 20″ N., Long. 52° 37′ 51″ E., thence 359° to

(b) Light Beacon "T.13" in Lat. 24° 13′ 06″ N., Long. 52° 37′ 49″ E., thence 060° to

(c) in Lat. 24° 14′ 00″ N., Long. 52° 39′ 30″ E., thence to 139° to

(d) Buoy No. 17 in Lat. 24° 11′ 41″ N., Long. 52° 41′ 42″ E., thence 255.5° to the coast to

(e) in Lat. 24° 10′ 48″ N., Long. 52° 37′ 57″ E.

Navigation and anchorage within this area is strictly prohibited to all unauthorised vessels and those not under the control of a Pilot.

Refinery/GASCO/FERTIL: A restricted area exists around the Refinery, GASCO Jetties and FERTIL Jetties at Ruwais within an area bounded by a line from:

(a) in Lat. 24° 08′ 36″ N., Long. 52° 42′ 12″ E., thence 000° to
(b) in Lat. 24° 10′ 24″ N., Long. 52° 42′ 12″ E., thence 035.75° to
(c) in Lat. 24° 10′ 48″ N., Long. 52° 42′ 30″ E., thence 103.5° to
(d) in Lat. 24° 10′ 18″ N., Long. 52° 44′ 42″ E., thence 119.5° to
(e) in Lat. 24° 09′ 57″ N., Long. 52° 45′ 24″ E., thence 195° to
(f) Construction harbour jetty head in Lat. 24° 08′ 12″ N., Long. 52° 44′ 54″ E.

Navigation and anchorage is prohibited to all unauthorised vessels not under control of a Pilot. Within this area no vessel or craft may secure or make fast to the Petroleum Jetty without instruction from the Pilot, Port Officer or the Oil Company.

RESTRICTIONS:

Times of Entry or Leaving: Subject to limitations upon draft, under keel clearance and extreme adverse weather conditions, vessels may enter or leave at any time during the day or night.

Minimum Under Keel Clearance: To ensure safe channel passage, a minimum under keel clearance is required for all ships entering or leaving the port when deep loaded, as follows:

(a) 3 ft. (0.91 m.) for ships of less than 100,000 Summer d.w.t.

(b) 4 ft. (1.22 m.) for ships between 100,000 and 250,000 Summer d.w.t.

(c) 5 ft. (1.52 m.) for ships of over 250,000 Summer d.w.t.

And such under keel clearance may be increased at any time at the Port Authority's discretion having due regard to weather conditions.

NOTE: While observing the safety requirements of under keel clearance, tidal delays may be experienced as follows:

(a) Ships drawing 44 ft. (13.4 m.) may sail at any time.
(b) Ships drawing 45 ft. (13.7 m.) will rarely have to wait for the tide.
(c) Ships drawing 46 ft. (14.0 m.) will usually have to wait for the tide.
(d) Ships drawing 47 ft. (14.3 m.) will always have to wait for the tide.
(e) Ships drawing 48 ft. (14.6 m.) will occasionally be neaped.
(f) Ships drawing 49 ft. (14.9 m.) will be neaped ±294 days per year.

The best months are June, July and August.

Meteorological conditions may reduce the height of the tide by up to 1 ft. (0.305 m.)

Movements Within the Port Limits: No vessel may enter, leave or move within the confines of the port unless permission for moving is first obtained from the Port Control Office.

Outward Priority: When one ship is ready to leave and another to enter simultaneously, a deep loaded outward bound ship which requires to transit the "Deep Water Channel" on account of draft in excess of 30 ft. (9.14 m.) shall have priority subject to the provisions of Rules mentioned above.

HEALTH: *Quarantine and Medical Clearance:* The standard International Declaration of Health is required upon arrival. Free Pratique is obtained by radio.

There are no facilities for derat at Ruwais.

If Free Pratique has not been granted prior to the vessel's arrival, the Master may contact Port Control for advice/instruction as per Port Health instructions.

Every vessel within the port shall display the appropriate quarantine signals as prescribed in the International Code of Signals.

ARRIVAL/DEPARTURE NOTICES: *Notice of Arrival:* The Master or Agent shall inform the Port Officer 72 hours prior to the vessel's arrival, giving the following details:

1. Name of vessel.
2. Flag.
3. G.r.t., n.r.t. and Summer Deadweight.
4. Arrival draft.
5. Nature of cargo and amount to be discharged or loaded if known.
6. ETA and subsequent amendments.
7. Deballasting time, type and quantity of ballast to be discharged.
8. Inerting time.
9. Date of expiry of the following certificates:
   (a) Load Line.
   (b) Ship Safety Construction Certificate.
   (c) Ship Safety Equipment Certificate.
   (d) Ship Safety Radio-Telegraphy – as appropriate.
   (e) Ship Safety Radio-Telephony – as appropriate.
   (f) Oil Liability Certificate (TOVALOP).
   (g) International Oil Pollution Liability (CLC).
   (h) Derat/Exemption Certificate.
   (i) Any other service required.

And shall confirm or amend such information at 48 hours and 24 hours before arrival.

Vessels should also advise:

1. The date and final port and country of her last loading at an Arabian Gulf or Omani port.

2. A list of ports and countries at which the vessel has called between 1. above and her arrival at Jebel Dhanna.

3. Should the tanker not have loaded in the Gulf or an Omani port since building, then a list of ports and countries at which the vessel has called from the date of building to her arrival at Jebel Dhanna.

In order to expedite Pilot attendance, Masters should endeavour to confirm their final ETA to "Port Control" Jebel Dhanna/Ruwais on VHF radio, Channel 9, 6 hours and 2 hours prior to arrival at anchorage.

Notice by Agent: The Agent shall also supply the Port Health Officer, Customs and Immigration, the requisite ship information 48 hours prior to arrival.

Notice of Departure: The Master or Agent of any ship within the port shall inform Port Control giving at least 12 hours' notice of departure and shall further confirm the time of departure 2 hours before being ready to sail.

BERTHING FACILITIES: The Port of Jebel Dhanna-Ruwais consists of two main oil terminals, one petroleum gas terminal, one bulk cargo terminal, a sulphur handling jetty and a small cargo harbour (see Admiralty Chart No. 3780).

The Crude Oil Terminal at Jebel Dhanna is operated by the Abu Dhabi Company for Onshore Oil Operations (ADCO) and consists of 4 C.B.M. Berths capable of accepting tankers up to 330,000 d.w.t. and 1,215 ft., (370.3 m.) in length. Minimum depths at the berths are:

No. 1 Berth: 51 ft. (15.54 m.) max. length of ship 950 ft. (289.6 m.).
No. 2 Berth: 52 ft. (15.85 m.) max. length of ship 1,100 ft. (335.3 m.).
No. 3 Berth: 55 ft. (16.76 m.) max. length of ship 1,200 ft. (365.76 m.).
No. 4 Berth: 55 ft. (16.76 m.) max. length of ship 1,215 ft. (370.3 m.).

Also see "Section B".

The Refinery Terminal at Ruwais about 2.5 miles S.E. of the Jebel Dhanna Terminal Berths is owned and operated by the Abu Dhabi National Oil Company Ruwais Refinery and consists of a 3 km. jetty with 2 deep water berths and 4 coastal tanker berths for the exportation of refined petroleum products and importation of crude oil.

Also see "Section C".

The Abu Dhabi Gas Industries Ltd. (GASCO) Terminal consisting of a 2.6 km. trestle jetty and one berth lies about half a mile East of the Refinery Jetty and can accept LPG carriers in the range 28,000 cu.m. to 125,000 cu.m. There is a minimum depth alongside of 17.0 m.

Also see "Section D".

The Ruwais Fertiliser Industries (FERTIL) Jetty is designed for berthing combinations of vessels up to 2 fully laden 200 m. long, 25,000 d.w.t. bulk cargo vessels along its Eastern side. Provision is made at the Northern end of the jetty for the loading of liquid ammonia.

Also see "Section E".

A bulk sulphur export jetty with 6 berthing face piles capable of handling cargo vessels up to 25,000 tons d.w.t. with a depth of 36 ft. alongside completed in 1984. Loading via a single gantry.

Also see "Section F".

RUWAIS CARGO HANDLING SERVICE CONSTRUCTION JETTY: *General Information:* ADPPOC, as the Port Operator, provides cargo handling service for the prime purpose of serving the construction and commissioning of the ADNOC and GASCO Refineries and Petroleum Export Terminals.

This undertaking is provided on an independent basis as an additional port facility and may be utilised by any importer who wishes to route cargo through the port to destinations in the Western region of Abu Dhabi.

A harbour, known as the Construction Jetty, consisting of 4 small cargo ship berths and 1 Ro-Ro Berth, is situated to the East of the Ruwais Petroleum complex. Vessels and barges with a draft of less than 4.2 m. may enter and lie safely alongside to discharge cargo. Larger cargo ships with a draft in excess of 4.2 m. will anchor in the cargo ship anchorages located N.N.W. 2 miles (approximately) from the Construction Jetty and discharge onto barges.

There are full Customs and Clearance facilities available.

Extent of Service: Cargo will be worked in the cargo anchorages, weather permitting, during daylight hours only. The target minimum rate for discharge of general cargo will be 700 freight tons per day. In special circumstances these limitations may be modified to suit the dispatch and turn-round of the discharging freighter.

Weight Limitations: Normal discharge to barges will be to the maximum of ship's own lifting equipment. The heavy lift barge (reinforced deck) can receive a single weight to a maximum of 700 tons. The shore cranes can plumb to a distance of 3.2 m. from the quayside to lift 80 tons.

To discharge heavy lifts by a floating crane, the maximum possible notice is required. Similar notice is required for heavy lift cranage for parcels in excess of 80 tons over quayside and heavy lifts in excess of 55 tons which require special trailer transport.

Procedure:

1. Consignee or his Agent must sign a Cargo Handling Indemnity form before discharge and vessel's Manager must sign Port's Conditions of Use receipt before entering port and berthing.

2. All Customs cargo documentation and clearance of vessels is the responsibility of the Shipping Agent/Consignee. Tally receipts will be supplied by the ADPPOC Cargo Representative on site.

3. The ship will normally be charged for port dues only as per 1984 Regulations and Tariff, except that, for working overstowed cargo, a charge per gang hour will be levied to the ship.

4. The consignee will normally pay the full handling charge per freight ton. The charge covers ship stevedoring, barge and towage, and either barge discharge to landed on quay, direct to trailer, or delivered to Custom's Pound.

5. Agents and/or consignees should advise their requirements, vessel ETAs and supply cargo manifests and stowage plans to: The Port Officer, Jebel Dhanna-Ruwais Port, ADPPOC, Ruwais, P.O.Box 61, Abu Dhabi. Tel: Ruwais 72018 daytime or Port Control Ruwais 75700, ext. 5762 (24 hours). Telex: 52207 Apocru EM.

PORT EQUIPMENT/CRAFT: The following craft and equipment are available in the port and subject to utilisation may be chartered or hired on application to the Station Manager who will advise the current rates.

Vessels:

2×3,200 h.p. twin screw shiphandling tugs with a bollard pull of 40 tons.

Equipped for fire fighting and oil dispersant spraying, fitted with 2 centrifugal pumps producing 680 cu.m. water/foam per hour to a height of 120 m. through a horizontal distance of 85 m.

Each tug carries 45 metric tons of foam and 11 metric tons oil concentrate dispersant.

2×15 m. twin screw mooring launches, 480 h.p. with 2 live-on-board crew.

5×15 m. single screw mooring launches, 360 h.p. each, no accommodation.

1×16 m. twin screw pilot-cum-ambulance vessel 20 knots with live-on-board accommodation.

1×32 m. self-propelled maintenance barge with 30 ton hydraulic 'Pettibone' crane.

1 twin screw diving tender vessel.

1×12 m. single screw general purpose workboat.

1 barge with reinforced deck for heavy lifts and tank divided for oil pollution slops, 1,200 tons.

Shore Equipment:

1×150 ton Manitowoc mobile crane with 30 m. boom.

1×80 ton Grove Rough Terrain mobile crane with hydraulic extending booms, maximum normal extension 35 m.

1×10 ton fork lift.

2×5 ton fork lifts.

2×3 ton fork lifts for crane hold work.

Miscellaneous:

- Fully equipped marine workshops for repairs, overhauls to tugs, launches, vehicles, mooring buoys, etc.

One double lock 2 man decompression diving chamber in air conditioned module.

MEDICAL: If any person suffers a serious injury or sickness within the port limits and immediate medical attention becomes necessary the Master of the vessel concerned or the person in charge of the location shall notify the emergency to the Port Control on VHF Channel 9.

N.B. The Port "Casevac" system for such emergencies will be put into immediate effect by the Port Control.

Masters of all vessels are hereby advised that a brief but concise description of the injury or sickness must be stated at the time of reporting. In the event a crew member has to be landed for hospitalisation the following items should accompany the casualty:

(a) Passport and/or Seaman's Discharge Book
(b) Vaccination Certificates
(c) Address of next of kin
(d) Brief report (if necessary pinned to an unconscious person) comprising:
  1. Time and cause of accident/sickness
  2. Time and description of medication administered, if any
  3. Further details of First Aid given, and/or symptoms noticed.
(e) Masters of vessels which are not berthed alongside the Ruwais jetties should prepare invalid cases for landing in a fast launch or picking up by helicopter e.g. Niel Robertson stretcher; and afford a weather lee (if possible) in adverse weather conditions.

Medical/Police Assistance: The Master of any vessel within the Port for which Medical or Police assistance is required shall make request for such assistance through the Agent.

FRESH WATER: Fresh water is obtainable at the refinery berths and should be arranged through the ship's Agent.

FUEL: Bunkers are obtained at the refinery berths and should be arranged through the ship's Agent.

The following bunker fuels are available:

A. Marine Diesel Oil

Test and Spec. Limits	*Method*	*ASTM*
1. Viscosity Kin. at 33°C, CS, Max.	1.4	D445
2. Carbon Residue Conradson Wt. Pct. Max.	1.5	D189
3. Flash Point °C, Min.	66	D93
4. Water Cont. Pct. Vol. Max.	0.25	D95
5. Sediment Pct. Wt. Max.	0.02	D473
6. Ash Pct. Wt. Max.	0.02	D482
7. Sulphur Pct. Wt. Max.	1.80	D129
8. Pour Point °C Max.	12	D97

B. Marine Fuel Oil

1. Kin. Viscosity at 50°C. Max.	180	D445
2. Flash Point, °C. Min.	60	D93
3. Water Cont. Vol. Pct. Max.	1.0	D95
4. Sediment Pct. Wt. Max.	0.25	D478

7. Pour Point °C. Max.	24	D97
8. Sp. Gravity at 60/60° F. Max.	0.990	D1298

CUSTOMS: Customs Officials will board upon arrival and seal the bond.

Alcoholic Liquor: No alcoholic liquor of any description may be carried to or from any vessel or oil terminal within the port. This rule shall not apply in the case of a vessel taking in or landing such liquors as cargo or ship's stores under the supervision of Customs Officials.

Masters are reminded and warned that public consumption of alcoholic drinks is strictly prohibited in the U.A.E. and its territorial waters. Crew members must not be allowed to offer alcohol to any Moslem for any reason whatsoever.

The penalties imposed by the civil authorities for non-compliance of the above are heavy and include possible imprisonment.

CLIMATE: The cool winter season extends over November to February with mean daily maximum temperatures of 25° C. to 30° C. and night temperatures of 10° C. to 15° C. The lowest recorded temperature being 4° C. Ground frost can occur inland.

The hot summer season extends over May to September with maximum day temperatures between 40° C. to 45° C.: the highest recorded being 48° night temperatures are about 20° C. to 25° C.

Relative humidity is high throughout the year averaging between 50 and 60 per cent by day and 75 to 80 per cent by night. Heavy dew may be experienced throughout the year.

Rainfall is usually associated with thunderstorms which are prevalent from November to May giving a total annual rainfall of 10 mm. to 50 mm. Rain is rare during the remaining months while in some years there is none at all.

Throughout the year the prevailing winds are from the West to North North-East sector. They are strongest during November to April when they occasionally reach gale force. Gusts of up to 50 knots have been recorded (April) and a 24-hours mean wind speed of 32 knots from the North-West is on record (January) the Shamal or strong North-West wind may blow for periods up to three days and raise a rough sea with waves up to 4.5 m. off Gasha buoy and up to 2 m. at the berths in Jebel Dhanna. 'Land and Sea' breezes are experienced throughout the year.

Visibility is 10 nautical miles for 70% of the time and less than 2 nautical miles up to 5% of occasions due to dust haze or radiation fog. Fog can occur during any month of the year but is most frequent in Winter: normally it develops during the night and early morning and clears by 1000 hrs. Usually the fog banks drift to seaward towards Sir Bani Yas Island.

Sea temperatures at 3 m. depth range from 20° C. (Winter) to 32° C. (Summer). During the Summer the 15 m. depth temperature is only a degree or so lower than that at the surface.

GENERAL:

Stores: Emergency stores may be obtained by giving 48 hours' notice to the Ship's Agent. These stores are not permitted to be loaded at an oil or gas berth and must be taken on board in the anchorage.

Agency: Agency work is carried out by registered Shipping Agents who are appointed by the vessel's owners, Charterers or Master.

In no instance will ADPPOC or any of the Oil Companies undertake the agency of a ship.

M.E.N.A.S. Light Dues: Masters are advised that the "M.E.N.A.S." Light Dues for the Arabian Gulf navigation aids, when applicable, are collected by the vessel's Agents for payment direct to "M.E.N.A.S.", Bahrain.

Flag: Every vessel within the port shall fly her own national flag and the flag of the United Arab Emirates from sunrise to sunset.

Inward Clearance: No person other than the Pilot, Police, Customs, Immigration and Port Health Officers shall be allowed on board any vessel before Inward Clearance has been granted by such officials.

Port Clearance: The Owner, Master or Agent of every vessel wishing to leave the Port shall obtain a Port Clearance.

Port Clearance may be withheld from any ship by the Port Authority for non-payment of dues or for any legal cause or restraint which has been duly ordered by the Court in Abu Dhabi.

Exempted Ship: To mean ships exempted from pilotage whose Master has been granted a Pilotage Exemption Certificate by the Harbour Master.

Excepted Ship: To mean vessels excepted from paying Port Dues. Excepted ships shall include the following vessels:–

(a) Vessels of the U.A.E. Defence Forces.

(b) Vessels belonging to U.A.E. Customs, Medical and Police Services.

(c) Dredgers, Survey Vessels and special ancillary non-cargo craft, on contract to the Port Authority, ADNOC.

(d) Light tenders belonging to or on contract to M.E.N.A.S.

(e) Vessels and Ships excepted from such charges by order of H.E. the Ruler.

Port Control: The officers currently situated at Ruwais Construction Wharf are responsible for all vessel traffic movements within the port limits and the implementation of the Port Officer's instructions pertaining to the management of the port.

N.B. – Vessels should communicate with the Port Control via VHF radio.

Heavy Lift: Any piece of cargo inclusive of transportation cradle whose deadweight is in excess of 35 long tons (35.56 tonnes).

Country Craft: Mechanically propelled vessels less than 100 n.r.t. engaged in the coastal trade which may also rely upon sails for motive power.

Rat Guards: Rat guards must be fitted to all mooring ropes and wires immediately a vessel is secured alongside a berth on a jetty or wharf.

Mooring Launches: All ships berthing or unberthing at a main sea berth, oil jetty or cargo wharf will be provided with a suitable Port Authority mooring launch (if required) to assist with the running of moorings and the lifting of submarine loading pipe-lines in the case of ADCO's sea berths.

Main Engine Readiness: Every vessel berthed at an Oil Terminal or cargo wharf shall maintain her engines in a state of constant readiness to move at all times. No repairs which may immobilise the vessel shall be permitted to be carried out while vessels are in the berths.

A Master of any Ship securely anchored in an assigned anchorage area, may request permission from the Port Control to carry out routine engine repairs or overhaul. The granting of such permission will be subject to the respective Terminal approval that the berthing time factor is sufficient.

Sufficient Crew Onboard: Every vessel within the Port shall retain on board at all times a sufficient number of crew as may be necessary to perform any duties concerned with the safety and movement of the vessel.

Fire Wires: All Ships berthed at the GASCO and Refinery Terminals shall provide 2 Tug Fire Wires, 1 forward and 1 aft, throughout the period of occupying such berth. The wires shall be robust, with one end fitted with a spliced eye, which shall be maintained at a height of 2 ft. above the sea surface on the outboard side of the ship, (i.e. opposite side from jetty). The inboard end of the wire shall be made fast securely on deck.

Craft Alongside: No Craft shall attempt to make fast to or go alongside a ship manoeuvring in the port before such ship has anchored unless specially permitted by the Master and if there is a Pilot on board, the Pilot.

Dirty Ballast: Whenever a ship enters port with ballast which it is necessary to discharge before or during loading, such ballast, in the case of water ballast, shall be clean and not liable to cause pollution of the sea and a certificate to that effect shall be handed to the Port Authority's representative before deballasting commences.

Pollution: Ashes, oils, chemicals, bilge water and other refuse shall not be discharged to the sea or thrown overboard within Port Limits.

The discharge to the sea of any substance whether liquid or solid, other than clean water ballast shall be deemed to cause pollution to the harbour.

The Master of any vessel, the Person in charge of a Terminal or construction operation contravening this rule so as to cause pollution shall be charged with an offence against these Rules and upon conviction be liable to a fine and shall also pay any expenses which may be incurred in the removal of such pollution.

Diving/Swimming: No person shall swim or dive from or near any vessel, jetty, quay or pier for the purposes of trading, recreation or sport.

Diving: No person shall engage in diving with the assistance of breathing apparatus within the Restricted Areas mentioned in Section 4 of these Rules without the written permission or instruction from the Port Authority.

Commercial Diving: Notwithstanding anything contained above, any person or company wishing to operate a Diver for commercial reasons within the Port, shall inform the Harbour Master giving full information of the Diving Operations, and shall conform with such precautions as he may direct in Permission to Dive.

Use of Ship's Radio: The use of the ship's radio within Port Limits is prohibited for the transmission of private messages.

When a ship is secured to an oil or gas loading berth the use of the ship's main radio equipment is totally prohibited. Intrinsically safe VHF radio equipment may be used for necessary port communications.

Ship's Dangerous Stores: Ship's stores of an inflammable or explosive nature, including pyrotechnic distress signals carried in accordance with the Convention for the Safety of Life at Sea shall be kept in a safe place securely closed and sealed while the vessel is moored in a berth. This Rule shall also apply to the vessel's paint locker.

Explosives: No person may bring explosives or dangerous goods into the Port without the written permission of the Port Authority. Vessels importing "explosives" or dangerous goods of an inflammable or corrosive nature will normally be assigned the "Explosives" anchorage on arrival. A Port Authority Representative will inspect the cargo and consult with the Master and Agent before discharge.

The unauthorised handling and detonating of any explosive or pyrotechnic device within the Port Limits is strictly prohibited. Where explosives are required for construction purposes the Contractor concerned must apply to the Harbour Master for written permission. Blasting for commercial purposes shall be under the strict control of the Port Authority.

Pollution Emergency: In the event that pollution of the Port waters occurs, regardless of cause the Person in charge or responsible for the operation, works or location where the pollution was initiated should immediately report the incident to the Port Control.

Where the pollution is serious, particularly oily pollution, the incident must be treated as a full emergency situation, and the call for assistance to the Port Control should be prefixed by the words "MAYDAY, MAYDAY" in order to gain immediate attention.

The Master of the vessel concerned or the Person in charge, shall also take such steps as may stop further pollution and contain or clean up any spillage of oil, etc., on the vessel's deck or jetty surfaces to remove the fire hazard potential.

N.B. – All port Users and Operators are advised that failure to report a pollution incident is an offence against these Rules and Persons found contravening this requirement will be prosecuted in the Abu Dhabi Courts and liable to heavy fines.

Ship's Lifeboats: The lowering of ship's lifeboats within the Port, except in the course of a regulation Lifeboat Drill duly authorised by the Port Authority, is strictly prohibited and during such drill the lifeboats shall not land on any part of the shore.

The use of any boat carried on any vessel solely for the purpose of recreation, pleasure or fishing shall be allowed only at the discretion of the Port Authority subject to the current Security Regulations in force at any time.

Inert Gas System: As the Government of Abu Dhabi have now ratified the Solas Convention, with effect from 1st January, 1984, no tanker will be accepted for loading in this port unless an Inert Gas System has been fitted.

Cargo Discharge Certificates: Abu Dhabi National Oil Company require documentation for cargoes of Refined Products loaded at Ruwais as follows:

1. Discharge Certificate showing:
   - (a) Port of discharge.
   - (b) Discharge quantity in tonnes.
   - (c) Date(s) of discharge.
   - (d) Name and nationality of vessel.
   - (e) Name of Master.
2. Copy of Bill of Lading.

Both documents must be signed by receiver and countersigned by Port Authorities and returned to:

A.D.N.O.C. Marketing Rpd SI,
Post Box 898,
Abu Dhabi,
U.A.E.

In the event that cargoes of Refined Products are loaded at Umm al Nar the same procedure should be followed.

(B) JEBEL DHANNA – SEA BERTHS TERMINAL

24.11 N. 52.38 E.

OPERATOR: Abu Dhabi Company for Onshore Oil Operations (ADCO).

APPROACHES: *(Inward Passage).*

Outer Route between Jazirat az Zarqa and Ghasha Tower Beacon marked by 2 light floats and 4 buoys. The 2 light floats are both port hand marks, and the buoys starboard hand, as indicated by shape, colour and light characteristics.

Inner Channel, from Ghasha Buoy to berths at Jebel Dhanna marked by 21 light buoys. Least depth in this channel is 46 ft. and min. width of 800 ft. between Buoys No. 7 and 10.

(Outward Passage)

After clearing berth an outward bound vessel should steer to pass midway between Buoys No. 13 and 20, leaving Alaq Island to starboard. From Buoys No. 13 and 20 the same track is followed as for inward passage.

Navigation in shallow waters: The navigation of deep drafted vessels at high speeds in shallow waters introduces certain hazards. Masters of ships should be guided by the following:

Due consideration should be given to the effect of squat at speed on vessel's draft in shallow water, bearing in mind vessel's trim.

If possible, confirm actual height of tide against predictions and if not, bear in mind that after strong winds the actual height of tide may be reduced and extra caution must be exercised for a few days during and after bad weather.

Ensure accuracy of vessel's draft reading, including the midship draft, having in mind the tendency of vessels to sag and the adverse effect of a small list.

Reduce to minimum safe speed to pass over and near shoal areas.

Reduce to a minimum safe speed when negotiating turns in order to reduce heel under helm.

Note that list can mean an appreciable increase in draft.

When strong tidal streams are running across a channel, extra vigilance is required, and allowance made for set, particularly at reduced speed, to ensure vessel proceeds along mid channel.

DOCUMENTS:

2 Crew Lists.

2 Passenger Lists.

2 Manifests.

1 International Maritime Declaration of Health.

READINESS TO LOAD: If an accepted Tankship arrives at the Port of Jebel Dhanna and tenders Notice of Readiness to Load:

(i) Within its Set Range then running hours shall commence, berth or no berth, either six hours after such Notice of Readiness or at the time of connection of cargo loading hoses, whichever is the earlier.

(ii) Prior to the commencement of its Set Range then running hours shall commence at 1400 hrs. on the first day of its Set Range, berth or no berth, notwithstanding the fact that loading may have commenced for any reason prior to 1400 hrs. on the first day of its Set Range; or

(iii) After expiry of the Set Range, then running hours shall commence at the time of connection of cargo hoses.

Running hours shall finish at the time of disconnection of cargo loading hoses.

The Company will make every effort to load the tanker on arrival provided a berth is available and weather permitting.

EARLY DEPARTURE PROCEDURE: Early Departure Procedure is not available.

ANCHORAGES: If berth not available, or if ships cannot sail immediately after loading, they can anchor in an area South of Buoys Nos. 13 and 20 and North of Berths. This area marked by Buoy No. 15 to West, Buoy No. 22 to East and by berths to South. Alaq Island lies in the middle of this area and is marked by 2 buoys No. 17 and N. Alaq and by S. Alaq Beacon.

MAX. SIZE: (Also see "Berthing"). Vessels up to 330,000 d.w.t. and max. LOA 1,215 ft. can berth at Jebel Dhanna.

Also see Section "A" – "Restrictions".

EQUIPMENT: Port and Starboard anchors to be fitted with anchor buoys and sufficient line to facilitate recovery of anchor in the event of loss.

4 good mooring lines of not less that 120 fathoms each and of a suitable size for the vessel. 2 additional 120 fathoms lines securely tailed to the first lines for occasions where 120 fathoms may not reach the stern buoys initially.

For vessels of 50,000 d.w.t. and larger, power mooring winches with 200 fathoms wire mooring rope are recommended.

Suitable new rope stoppers to be available forward and aft.

2 good stoppers for use on 40 mm. diameter wires. Preferably patent carpenter's stoppers.

2 good boat ropes 4.5 in. circumference of at least 200 ft. long.

A clean, safe pilot ladder of adequate length battened so as to prevent turning. A suitable line to be ready for hauling gear on board, such as hose clamps, reducers and elbows. A lifebuoy should be placed handy to this ladder.

Tankers of 40,000 d.w.t. and over should have rigged, when in ballast, an accommodation ladder lowered to about 12 ft. above water. This can be adjusted to suit the conditions. A pilot ladder should be rigged immediately adjacent to the accommodation ladder platform, to within 2 ft. of the water. This will enable the Pilot and others when the vessel is moored to ascend the pilot ladder clear of the launch and then step on to the lower platform of the accommodation ladder.

Deck machinery must be available at all times.

Whistle or siren must be available at all times.

Adequate deck lighting should be provided for night-time operations, with special emphasis on the following areas:

1. Overside at boarding position for Pilot.
2. Overside abreast of manifold, for hose lifting.
3. Working area around manifold.
4. Poop working area, for handling mooring ropes and wires.

Note: "Aldis" type signalling lamp to be available when mooring.

BERTHING: Berthing is by mooring to 2 anchors and stern buoys. Arrangements in advance by contacting Jebel Dhanna Pilots on Channels 9 and 16.

Berths are approached on W.S.W. course passing S.E. of Alaq Island. Leading lights have been established which will lead ships on the line of the 2 anchors when in berth. A small marker buoy has been established to assist the Mooring Master in placing starboard anchor in correct position. Vessels berth heading N.W. Holding ground good. Bottom consists of clayey silt.

Sea Line Loading Berths. 4 Sea-Line Berths No. 1, 2, 3 and 4. Nos. 1 and 2 supplied by single 36-in. lines, and Nos. 3 and 4 supplied by 42 in. lines, each terminating in a header which passes under vessel in berth.

Berth	*Draft Accept-able* (ft.)	*Approx d.w.t.* accept-able*	*Max loading rate* (t.p.h.)	*Strings of flexible hoses*	*Length of sea line* (ft.)
No. 1	45	83,000	6,000	2×16 in.	16,269
No. 2	46	85,000	6,000	2×16 in.	16,427
No. 3	49	90,000	8,500	2×16 in.	19,000
No. 4	49	90,000	9,500	2×16 in.	17,200

*Deadweights shown for vessels loading full cargoes. Part cargoes may be greater. Berths No. 2, 3 and 4 can accommodate VLCCs but Berth No. 2 is restricted to vessels having a max. LOA of 1,100 ft.

Least depth of water available in berth, and swinging circle, after deducting 6 ft. for height above sea bed of sea line cradle is as follows: Berth No. 1, 51 ft.; Berth No. 2, 52 ft.; Berths No. 3 & 4, 55 ft.

Swinging circle defined as one and a half ship's lengths from dropping position of ship's inshore anchor.

The approximate draft limits quoted above are based on an underkeel clearance in the berths of 6 ft., rising tides permit deeper loading in berths.

Seawards ends of pipe-lines, terminate in 16 in. flexible hoses. Hoses are lifted on the port side of the vessel.

Additional information obtainable from Jebel Dhanna Pilots on Channel 16 prior to vessel's arrival.

HOSES: Derricks or cranes must be capable of lifting a string of hoses from the sea-bed to a height of 30 ft. above the deck. For lifting 16 in. diameter hoses, the lifting gear should have a SWL of not less than 10 tons.

Gear should be rigged on port side of the vessel in order to lift hoses.

It may be convenient to handle blank flanges, reducers, etc., with the derrick or crane. Reducers or adaptors should be bolted to the ship's flanges, so as to take 16 in. hoses.

Note: Where a vessel has 2 or more loading connections, those used should not be less than 7 ft. apart.

Hose Hang off bitts are required at about 10 ft. from the ship's rail at the loading manifold to secure the submarine hoses on both sides.

LOADING: *Flash Point:* The flash point of Murban Crude is below 32° F.

Crude Oil Temperatures: While every effort will be made to keep the loading temperatures of export crude below 150° F., there may be times when this temperature is exceeded.

Whenever possible Masters will be advised when this temperature increase is likely to occur, but in Jebel Dhanna the temperature ashore varies according to loading rate, production rate, changes in production pattern from the field, tank levels, etc., and the temperature difference between shore and ship varies according to loading rate, quantity of cargo taken, berth occupied and when last used, etc., thus the ship's temperature obtained on a previous voyage may be substantially different to that obtained on the current voyage and the previous vessel's temperature can be taken as an approximate guide only.

ADCO will not accept any responsibility for the failure by the Master of any tanker loading at Jebel Dhanna to take appropriate action to receive hot oil, prevent any damage to his vessel and/or injury to his crew.

H_2S Content: Murban Crude contains concentrations of H_2S (Hydrogen Sulphide). Hydrogen sulphide has a disagreeable odour characteristic of rotten eggs which quickly deadens the sense of smell so that a dangerous concentration may be present which cannot be detected by odour. It is, therefore, important that when the presence of the gas is detected the area or compartment concerned should be left with all possible despatch until adequate ventilation can be carried out. The combustible gas indicator may not detect this type of gas. The foregoing must be dealt with in the light of experience where large quantities of crudes of this type have been carried without accident and we do not wish to exaggerate the dangers. However, the under-noted precautions have been evolved as necessary to provide against a possible accident and should be strictly observed.

During loading gas should only be allowed to escape via the agreed venting arrangements.

When ullaging or sampling, personnel should stand facing at right angles to the wind direction and so avoid inhaling gas. If H_2S is inadvertently inhaled the man should leave the area and not return until his sense of smell has been restored which means that at least two people should attend the operation.

No one should enter any pump room or any compartment where gas could collect unless another person is standing by.

Life lines, breathing apparatus and resuscitator should be readily available.

As a precautionary measure, the gas ejector for pump room should be put into operation at any time entry is made into this space whilst the possibility of H_2S gas entering pump room from cargo or empty tanks exist.

Loading Operations: The advice from the vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as possible after such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading. The Mooring Master will not transmit any loading instructions to the shore until the officer-in-charge of the deck has satisfied him that the hoses are connected correctly and that all valves have been set for receiving cargo.

While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repairs are to be carried out while in berth which would immobilise the ship or impair her fire-fighting efficiency.

The Mooring Master will instruct the Master of the Ship as to any signals needed for local requirements.

The Mooring Master will bring a portable radio to the ship.

The radio may not be used for private conversation. Use of the ship's radio while at the loading berth is strictly prohibited.

When loading, the cargo being received shall be frequently measured, thereby preventing loss of oil through a leaking hose. This particularly applies at night, as seepage of oil is practically invisible on the water during darkness.

Caution: The oil loading rates to ships are controlled on shore and an extremely dangerous situation can arise if a ship's valves are closed against the flow of oil.

Particular care must be exercised by ship's personnel to ensure that the Terminal is given timely advice should any reduction be required in the loading rate and adequate "Stand-by" notice must be given before the Final "Stop". At all times the Terminal must be advised when an increase in the loading pressure can be expected due to switching tanks, topping up, etc. To prevent excessive pressure from surge on ship/shore connections, ship's valves should be closed slowly.

The Terminal facilities at Jebel Dhanna have been designed so that tankers can be loaded by turbine driven loading pumps at max. rates up to 6,000 t.p.h. in Berths 1 and 2, 8,500 t.p.h. in Berth 3, and 9,500 t.p.h. in berth 4. Availability of max. loading rates is dependent on the number of berths occupied and operational circumstances.

If vessel is unable to accept the max. loading rate available, then ADCO will be grateful if you will give a brief explanation of the reason for the limitation and we suggest some of the reasons which may govern your restrictions:

(a) Inadequate venting system.
(b) Condition of ship's lines and valves.
(c) Inexperience of crew.

and there may be other reasons.

We are anxious to obtain this information in order to assist in formulating plans for future development.

The quantity of cargo received on board is the responsibility of the ship and no overage may be sent back ashore.

When loading is completed, hoses will be disconnected and lowered to the sea bed, under the supervision of the Mooring Master.

Ships will then proceed to an anchorage allocated by the Port Authority or direct to sea.

BALLAST: No facilities for disposal of slops or dirty ballast.

When a vessel enters port waters in ballast, the ballast water for overside discharge must be clean and a declaration signed by the Master and delivered to the representative of the Terminal to this effect. Ashes, oil, oily water or other refuse must not be discharged overboard in port waters. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in port waters.

It is essential that vessel is adequately ballasted to ensure safe handling and manoeuvring. Please comply with the Mooring Master's requests as to ballast quantity and disposition.

Jebel Dhanna is an open roadstead and subject to sudden changes in weather. On occasions it is of great advantage to commence loading whilst discharging ballast or prior to completely deballasting to avoid having the vessel in a flying light condition.

There must be no cleaning of boiler tubes whilst ship is in port.

DENSITY: 1031.

FRESH WATER: Not available.

FIRE PRECAUTIONS: As laid down in the Abu Dhabi (Petroleum Ports) Law No. 12 of 1973 and ISGOTT Safety Guide.

GANGWAY/DECK WATCHMEN: Not necessary.

CUSTOMS ALLOWANCES: Tobacco: No restrictions in quantity on board but must not be conveyed ashore or from one vessel to another without appropriate written permit from Customs Authorities and Port Officer. Wine and/or Spirit: Conveyance of alcoholic liquor from any vessel to the shore or from the shore to any vessel, or from one vessel to another, prohibited without appropriate written permits from Port Officer.

Shipmaster's Report: 1978

All alcoholic liquor must be under bond and sealed.

IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS/DRY DOCKS: No facilities.

REPATRIATION: With sufficient notice Agents will assist in any repatriation. Landing permit is required for all sign on/sign off personnel for which Agent requires Full Name/nationality/Seaman's Book/Passport Number and also 4 to 5 working days to process same. However, facilities are limited and if possible crew changes should be made at other ports.

Shipmaster's Report: 1978.

Immigration Authorities require at least 4 days' notice and preferably 7 days' notice via Agent.

AIRPORT: One mile distant, air strip owned by ADCO for private use. Nearest International Airport is Abu Dhabi the capital of the State.

TIME: Local time GMT plus 4 hours. No alterations to clocks during year.

MEDICAL: A hospital run by the Abu Dhabi National Oil Company (ADNOC) is situated adjacent to the Ruwais Industrial Complex. Ambulance facilities are available.

POLICE/AMBULANCE/FIRE: The Abu Dhabi Defence Force, Oilfield Security Section maintains a police post at Jebel Dhanna and Ruwais and is responsible to act in case of accident or other emergency, whether ashore or in territorial waters.

TELEPHONES: Jebel Dhanna is connected to the international telephone system.

SERVICES: None.

SHORE LEAVE: Crews not allowed ashore.

SHIPMASTER'S REPORT: December 1979.

Anchorage: Ghasha Anchorage apparently has good holding ground, bottom is sand with a little clay.

VHF: Call on Channel 16 or 9 (continuous watch). All operations carried out on Channel 9.

Medical: Any injury requiring treatment ashore necessitates having the following documents ready before the injured seaman can be transported to Ruwais hospital.

1. Extract of Ship's log.
2. Master's report of the incident.
3. Two eye witness reports (if possible).
4. Pilot's report.
5. Letter from Master accepting responsibility for the injured man.

He must also take his Seaman's Book/Passport with him and all the above documents must be signed and ship's stamped by Master.

Gangway: Accommodation ladder usually port side but best to wait until vessel is nearly moored in order to determine best lee side.

Customs Allowances: Customs can be very strict. All alcohol must be locked up before arrival and they will then give an issue.

(C) RUWAIS – REFINERY TERMINAL

OPERATOR: Abu Dhabi National Oil Co., (ADNOC).

GENERAL: The ADNOC Ruwais Refinery Terminal is situated about 2.5 miles SE of the Jebel Dhanna Sea Berths and consists of a trestle jetty 3 km. in length with 2 deep water berths and 4 coastal tanker berths. Vessels will berth port or starboard side at the discretion of the Pilot having regard for the tide and weather conditions.

RADIO: *Format for information required from vessels prior to berthing at Ruwais Refinery Terminal:*

A. Firm ETA Ruwais 72, 48, 36, 24 and 12 hours prior to arrival.
B. Cargo(es) (with quantity in M.tons) to be loaded and acceptable loading rate per hour per line. Number of lines for each cargo.
C. Cargo(es) on board on arrival (if any), with tanks and last port loaded.
D. Will cargo(es) ex-Ruwais be commingled with cargo on board. If so, indicate details.
E. Stowage of clean ballast to be discharged overboard. Indicate under ballast details below if discharge will take place during or prior to loading, as applicable.
    1. Quantity of clean ballast in tanks No.....
       nominated for Cargo loading at Ruwais......M.tons
    2. In segregated ballast tanks.....M.tons
    3. In permanent ballast tanks.....M.tons
    4. Total time required for ballast discharging, prior to loading.....Hours

Note: Clean ballast oil content must be below 15 p.p.m. and samples will be drawn for tests to ensure compliance.

F. Quantity of dirty ballast (if any) to be discharged to the Refinery dirty ballast system and time required for discharging. This is subject to acceptance by the Refinery. Dirty ballast must be free of lead and/or chemical washings.
G. Last three cargoes handled by vessel in the following sequence:
    (i) The very last Cargo(es)/Stowage arrangements.
    (ii) The 2nd last Cargo(es)/Stowage arrangements.
    (iii) The 3rd last Cargo(es)/Stowage Rrangements.
H. Full details of tanks washing and cleaning carried out since the discharge of the last Cargo(es).
I. Draft on arrival and maximum expected draft on sailing.
J. Maximum freeboard on arrival after discharging ballast prior to loading and expected freeboard on sailing (including height from deck to connections at manifold) in metres.
K. Distance from vessel's rails to manifold connection and height of rails from deck.
L. Distance between manifold connections centre to centre in metres.
M. Displacement on arrival and expected displacement on sailing.
N. Bunkers/Water requirements.
O. Any other requirements.
P. SOLAS Protocols with latest revisions are strictly applied in this port and vessels should fully comply with all relevant regulations while in the port area.
   Accordingly, please advise if tanks are inerted per SOLAS requirements and condition of inert gas system fitted in vessel.

Please note vessels should arrive with all tanks properly inerted as applicable under SOLAS Protocol, unless otherwise advised by Ruwais Refinery to arrive in gas free condition to enable internal inspection at inner cabotage by Third Party Inspectors, prior to loading. In this case please advise time required to inert vessel's tanks after completion of inspection.

The above information should be made available 72 hours prior to arrival at Ruwais and is additional to the requirements of the Ruwais Port Officer.

VHF: The Refinery Terminal maintains VHF watch on Channel 16 and Channel 9 for ship/shore communications and once berthed, the vessel will be connected to the terminal by land line telephone.

The Pilot will bring on board UHF Hand Set for manoeuvring purposes only.

Arrival Telegram Ship/Shore: After the Pilot boards the Ship/Shore Arrival Telegram will be passed by VHF Radio Channel 16/9 as follows:

(1) Name of Vessel.
(2) Nationality and Port of Registry.
(3) a – Gross Registered Tonnage.
    b – Net Registered Tonnage.
    c – Summer Deadweight.
(4) Size of manifold.
(5) Are reducers to 12 in., 10 in. and 8 in. available on board?
(6) Are adequate nuts and bolts and gaskets available on board?
(7) Number of hours required to de-ballast and quantity.

(8) Vessel's maximum loading rate.
(9) Quantity and type of cargo.
a –
b –
c
(10) Last Port.
(11) Next Port.
(12) Master's Name.
(13) Date and time of arrival.
(14) Date and time of Pilot on Board.
(15) ETA at Berth.
(16) Arrival Draft.
(17) Estimated Departure Draft.
(18) Bunkers requirements (quantity and type).
(19) Drinking Water requirement quantity.
(20) Is the ballast lead free?

BERTHING:

Berth "B"

Berth "B" is designed to accommodate tankers in the range 9,100 to 104,000 tons displacement. Length of ship 118.5 m. to 280 m. The minimum depth alongside the berth is 12.7 m.

The berth consists of the Loading Platform, four mooring dolphins and four breasting dolphins connected by walkways.

On the Loading Platform a bank of six cargo Chicksan arms serve to load or discharge ships, namely:

2×12 in. dia. Each arm is provided for Fuel Oil loading and ballast unloading.
2×12 in. dia. Each arm is provided for Gasoline (Premium and Regular), Kerosene, Jet Fuel and Diesel Oil.
1×10 in. dia. For Bunker 'C' and Marine Diesel Oil loading.
1×12 in. dia. For Naphtha loading.
One 3 in. hose for drinking water is provided.

Products available for loading are Naphtha, Fuel Oil, Gasoline, Kerosene/Jet Fuel, Diesel Oil, Marine Diesel and Bunker 'C'.

Flow rates are as follows:

Naphtha	1,400 cu.m./h.
Reg. Gasoline	1,400 cu.m./h.
Prem. Gasoline	1,400 cu.m./h.
Kerosene	2,500 cu.m./h.
Diesel Oil	3,000 cu.m./h.
Fuel Oil	3,200 cu.m./h.
Crude Oil	6,000 cu.m./h.
Bunker 'C'	1,000 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Drinking Water	100/300 cu.m./h.
Ballast	1,500 cu.m./h.

The loading arms are provided with:
(i) Hydraulic quick coupling.
(ii) Automatic drain system (emergency condition).
(iii) Electro hydraulic operation.
(iv) Range control system.
(v) Remote Control.
(vi) Connecting flange mating device.
(vii) Vacuum Breaker.

Berth "C"

Berth "C" is designed to accommodate vessels with range 26,000 to 130,000 tons displacement. Length of ship 180 m. to 295 m. The minimum depth alongside the berth is 16.8 m.

The berth consists of the Loading Platform, six mooring dolphins and four breasting dolphins connected by walkways.

On the Loading Platform a bank of seven cargo Chicksan arms serve to load or discharge the ship, namely:

3×12 in. dia. Each arm is provided for Crude Oil, ballast unloading and Fuel Oil loading.
2×12 in. dia. Each is provided for Gasoline, Kerosene, Diesel Oil loading.
1×10 in. dia. For Bunker 'C' and Marine Diesel Oil loading.
1×12 in. dia. For Naphtha loading.
One 3 in. hose for drinking water is provided.

Products available for loading are Naphtha, Gasoline, Kerosene/Jet Fuel, Diesel Oil, Fuel Oil, Marine Diesel and Bunker 'C'.

Flow rates are as follows:

Naphtha	1,400 cu.m./h.
Reg. Gasoline	1,400 cu.m./h.
Prem. Gasoline	1,400 cu.m./h.
Kerosene	2,500 cu.m./h.
Diesel Oil	3,000 cu.m./h.
Fuel Oil	3,200 cu.m./h.
Crude Oil	6,000 cu.m./h.
Bunker 'C'	1,000 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Drinking Water	100/300 cu.m./h.
Ballast	1,500 cu.m./h.

The loading arms are provided with:
(i) Hydraulic quick coupling.
(ii) Automatic drain system (emergency condition).
(iii) Electro hydraulic operation.
(iv) Range control system.
(v) Remote control.
(vi) Connecting flange mating device.
(vii) Vacuum Breaker.

Coastal Berth 1

Coastal Berth 1 is the Inner Berth on the North side of the Cabotage Jetty. The Berth consists of the loading platform, four mooring dolphins and four breasting dolphins. Length of ship 70 m. to 118.5 m. The loading platform has a bank of five Chicksan loading arms with 8 in. diameter connections. The minimum depth alongside the berth is 9.1 m. Vessel size 2,600 to 9,100 tons displacement.

Products available are: Fuel Oil, Diesel, Kerosene/Jet Fuel, Gasoline, Bunker 'C' and Marine Diesel Oil. Ballast will be pumped ashore.

Flow rates are as follows:

Reg. Gasoline	1,000 cu.m./h.
Prem. Gasoline	1,000 cu.m./h.
Kerosene	900 cu.m./h.
Diesel Oil	900 cu.m./h.
Fuel Oil	800 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Bunker 'C'	900 cu.m./h.
Ballast	400 cu.m./h.
Drinking Water	100/300 cu.m./h.

One 3 in. flanged connection for fresh water.

The loading arms are provided with:
(i) Electro hydraulic operation.
(ii) Manual quick coupling and hydraulic emergency release.
(iii) Range control system.
(iv) Vacuum breaker.
(v) Remote control system.
(vi) Connecting flange mating device.

Coastal Berth 2

Coastal Berth 2 is the Inner Berth on the South side of the Cabotage Jetty and consists of the loading platform; four mooring dolphins and four breasting dolphins. Length of ship 70 m. to 118.5 m., size 2,600 to 9,100 tons displacement. The minimum depth alongside the berth is 8.7 m. The loading platform has a bank of two 8 in. diameter loading arms.

vis. 1×8 in. to discharge ballast.
1×8 in. to load Bunker 'C', Marine Diesel or Fuel Oil. TEL unloading facilities are available.

Flow rates are as follows:

Reg. Gasoline	1,000 cu.m./h.
Prem. Gasoline	1,000 cu.m./h.
Kerosene	900 cu.m./h.
Diesel Oil	900 cu.m./h.
Fuel Oil	800 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Bunker 'C'	900 cu.m./h.
Ballast	400 cu.m./h.
Drinking Water	100/300 cu.m./h.

One 3 in. flanged connection for fresh water.

The loading arms are provided with:
(i) Electro hydraulic operation.
(ii) Manual quick coupling and hydraulic emergency release.
(iii) Range control system.
(iv) Vacuum breaker.
(v) Remote control system.
(vi) Connecting flange mating device.

Coastal Berths 3 & 4

The Outer Berth North and South side of the Cabotage Jetty each consist of four breasting dolphins and three mooring dolphins with a fourth common mooring dolphin with berths 1 & 2. Length of ship 70 m. to 118.5 m., size 2,600 to 9,100 tons displacement.

The minimum depth alongside the berth is 9.4 m. (No. 3) and 9.2 m. (No. 4). The berths are equipped with four 8 in. loading arms and a 3 in. water connection.

Products available are: Diesel Oil, Kerosene/Jet Fuel, Gasoline, Marine Diesel Oil, Bunker 'C'.

Ballast water will be pumped ashore.

Flow rates are as follows:

Reg. Gasoline	1,000 cu.m./h.
Prem. Gasoline	1,000 cu.m./h.
Kerosene	900 cu.m./h.
Diesel Oil	900 cu.m./h.
Fuel Oil	800 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Bunker 'C'	900 cu.m./h.
Ballast	400 cu.m./h.
Drinking Water	100/300 cu.m./h.

The loading arms are provided with:
(i) Electro hydraulic operation.
(ii) Manual quick coupling and hydraulic emergency release.
(iii) Vacuum breaker.
(iv) Remote control system.
(v) Range control system.
(vi) Connecting flange mating device.

BERTHING AIDS:

Berths 'B' and 'C' are equipped with a radar operated safety berthing system indicating by means of coloured lights the forward and aft berthing velocity of the ship.

Two groups of coloured lights one forward and one aft indicate the safe/acceptable/dangerous lateral approach of the ship from a distance of 50 m. off the berth.

BALLASTING/DEBALLASTING: Ruwais Refinery has dirty ballast water treatment equipment and all dirty ballast shall be discharged ashore for treatment. (No dirty ballast may be discharged into the sea and pollution of the waters of the port is an offence against the Port Regulation and the laws of Abu Dhabi).

Accepting dirty ballast into the refinery storage is subject to approval by refinery, a sample of the dirty ballast may be required for analysis, a letter from Master requesting permission to discharge is to be made (letter is provided for Master's signature).

During loading/unloading all deck scuppers must be plugged. All precautions shall be taken to prevent oil or oily waters escaping into the sea during connection and disconnection of loading arms.

Normally the terminal Control Room will give a 10 minutes warning before deballasting may commence. Deballasting shall commence at slow speed to check systems and back pressure.

Simultaneous deballasting with loading of cargo is permitted only in the case of cargo of Bunker 'C'.

While encouraging quick turn around and the use of minimum ballast upon arrival, sufficient ballast must be retained on board for the safe manoeuvring of the vessel at the Pilot's discretion.

LOADING AND UNLOADING:

(i) The Master should give the terminal a 'STAND BY' warning 10 minutes before ready to commence loading or discharging.

(ii) Upon 'COMMENCE LOADING' from the Master only one pump will be used to ensure a slow flow rate until it is established that all systems are operating correctly and pressures are constant. Full loading rate may then be ordered.

(iii) The vessel's cargo tanks shall be inspected prior to and during loading and should it be found that the tanks are not tight all loading shall cease, the vessel be rejected and further loading refused. The vessel will not be accepted later until satisfactory evidence of repair is produced duly certified by ABS, Lloyd's or other officially accredited classification society or surveyor.

(iv) During the hours of darkness vessels loading products or discharging crude oil or ballast shall rig overside lights to illuminate the surface of the sea around the ship to the Terminal Operators satisfaction to ensure that any oily products on the surface may be detected quickly and early action taken as appropriate.

DERAT: There are no facilities for Derat at Ruwais.

FUEL: Bunkers are obtainable at Refinery berths and should be arranged through the ship's Agent.

FRESH WATER: Fresh water is obtainable at Refinery berths and should be arranged through the ship's Agent.

STORES/PROVISIONS: Stores and provisions are not permitted to be loaded at Refinery berths and must be taken on board in the anchorage.

(D) RUWAIS – NGL TERMINAL: 24° 09′ 49″ N. 52° 43′ 16″ E.

OPERATOR: Abu Dhabi Gas Industries (GASCO).

GENERAL INFORMATION: The Terminal Regulations are issued for the information and guidance of Masters of vessels loading at the GASCO Jetty at Ruwais. After receipt of the first ETA advice from a gas carrier GASCO will cable the Master of the vessel instructions to carry out following tests and checks 24 hours prior to arrival:

1. Check condition (oxygen content) of atmosphere in void spaces around cargo tanks.
2. Check all reliquefaction units fully operational.
3. Check settings of cargo tank safety relief valves.
4. Test ESD (Emergency Shut Down) of cargo valves/pumps/boosters from all activating stations.
5. Check gas detecting unit with suitable spangas and have unit working continuously.
6. Test waterspray system deck area, flush all lines and check nozzles for proper operation and coverage.
7. Check ventilation of control room and compressor room and have ducts set for LPG.
8. Check over-pressurising and motor-trip system of motor room.
9. Check navigation equipment and steering gear fully operational.

The results of above tests should be cabled to GASCO not less than 18 hours prior to arrival.

On arrival at the terminal, the Terminal Representative will discuss with the Master the safety requirements. Attention is drawn to the International Safety Guide for Oil Tankers and Terminals (ISGOTT) and the Safety Inspection Guildelines and Terminal Safety Check List for gas carriers as published by the International Chamber of Shipping and Oil Companies International Marine Forum (OCIMF). For efficient loading it is essential that the ship should be fitted with adequate equipment. Improvisations made after the ship has arrived alongside the jetty are not sound practice and result in delays and possible damage to the loading arms and other equipment.

Abu Dhabi Gas Industries Ltd. (GASCO) have equipped their terminal with loading machinery and mooring arrangements which will ensure tankers and gas carriers receiving their cargoes at a reasonable rate, thereby extending to the ship the benefit of a rapid turnaround.

Mooring, loading and unmooring are carried out by night as well as by day. Co-operation between the Ship's Officers and Terminal Representatives is essential to secure the full benefit of the facilities provided.

MAX. SIZE: *Gas Carriers:* 28,000 cu.m. – 125,000 cu.m.

Tankers: Minimum Size – 15,000 tonnes S.D.W.T. Max displacement on arrival 95,000 tonnes. Max. LOA 320 m.

TUGS: Twin screw tugs (35 tons bollard pull) are used for both berthing and unberthing of vessels. The number of tugs to be used is to the discretion of the Pilot but will normally be two for berthing and one for unberthing. The tugs will use their own ropes and/or wires. The tugs are fitted with foam/water monitors, including one at approximately 19 m. above sea level, to assist in fire-fighting. Also fitted are spray booms to apply dispersants in case of oil spills.

BERTHING: *The Jetty:* The centreline of the GASCO-NGL Jetty Loading Platform is situated in 15 m. of water in position Lat. 24° 09′ 49″ N., Long. 52° 43′ 16″ E. with the berthing line in direction 305°/125°. Vessels are normally berthed heading 305°. A piping trestle and road, approximately 2,650 m. long, leads to the shore where the processing plant and storage tanks are located.

The jetty head comprises a loading platform (10 m. above chart datum), a utilities building, 4 breasting dolphins and 6 mooring dolphins. The dolphins are inter-connected by walkways. The distance between the 2 outermost dolphins is 340 m., between the 2 innermost breasting dolphins 42 m. and between the two outermost breasting dolphins 97 m.

On the loading platform there are 2×12 in. loading arms for loading Pentane Plus and discharge of dirty ballast/slops, 4×12 in. loading arms for loading/vapour return of Propane and Butane and 1×8 in. loading arm for bunkering (Rate – MFO 400 cu.m.p.h. and MDO 300 cu.m.p.h.). (For distance and disposition of loading arms see schematic layout). The LPG loading arms are fitted with an Emergency Release System (ERS). All loading arms except the bunker arms are fitted with an Emergency Shutdown System (ESD). Both ERS and ESD can be actuated automatically or manually. For detailed information about these systems you are referred to the separate letter on ESD/ERS handed over to you by the Terminal Representative. The Master is to ensure that the personnel responsible for cargo operations are fully familiar with these systems.

On the Western end of the loading platform is a gangway tower with a 1.5 ton crane forming a integral part of this tower. On the Eastern end of the platform there is a tower mounted firewater and foam monitor. This monitor can be controlled manually or remotely from the jetty head or from the foot of the jetty aided by a television monitor.

An additional manually controlled firewater monitor is situated on each of the 2 inner breasting dolphins. In addition to this, water spray deluge systems are covering the loading arms area, the gangway, the surge drum area and the utilities building. Gas detection equipment is strategically placed near the loading arms and will give alarm in case of inadvertent gas escape. The loading arms area and tanker manifold area are monitored by closed circuit television from the control room situated in the utilities building on the jetty and from the main control room.

On the Eastern side of the loading platform is a boat landing stage where the mooring boats can tie-up.

Draft: The minimum water depth alongside the jetty is 15 m. (49.2 ft.) below chart datum (C.D.). However, the Deep Water Channel imposes draft limitations on vessels departing from and entering the Port of Jebel Dhanna – Ruwais:

Also see Section "A" – "Restrictions".

Moorings: When at berth, vessels must be moored to the entire satisfaction of the Pilot. Vessels will normally berth port side alongside on a heading of 305°. The breasting dolphins are each equipped with 1,250 KN double quick release hooks and a power operated capstan. The mooring dolphins are each equipped with 1,250 KN triple quick release hooks and power operated capstan.

Vessels must be ready at all times to put out extra moorings as requested by Terminal Personnel or dictated by weather changes. It is the Master's responsibility to ensure that vessel's mooring lines are checked frequently to prevent excessive movement of the vessel in berth, which could activate the ESD/ERS systems and/or cause severe damage to the loading arms and other terminal equipment.

Experience has shown that wholly synthetic moorings have too much elasticity and allow the vessel to range or drift away from the berth during periods of adverse weather.

Therefore the moorings should preferably be all steel wires without use of nylon tails.

As it is recognised that some vessels are not fitted out with complete steel wire moorings, such vessels may use synthetic moorings for head or stern ropes, but breasting and spring moorings are to be steel wires. However, mooring lines leading to the same mooring dolphin should either be all steel wire or all synthetic fibre.

NOTE: (October 1982). With immediate effect all vessels calling at the GASCO NGL Jetty are to be fitted with wires, for spring lines. Vessels unable to comply will be subjected to an inspection of mooring ropes by the Pilot on arrival and will be berthed only if Pilot is satisfied with the mooring lines available. Pilot inspection of mooring lines will be carried out only during daylight hours.

The breasting dolphin's fender design criteria are based on providing for berthing energies acting in the horizontal plane for maximum displacement of 95,000 tonnes with an approach angle to the berthing line of 7° at a contact velocity of 15 cm. per second.

Yokohama Fenders protrude approximately 2.9 m. from the face of the loading deck, they provide for 100% contact of fenders on the vessel's perpendicular mid-body at light and loaded drafts, for the full range of vessel sizes.

Tension Winches: Vessels equipped with automatic tension winches should not use the automatic device and set the manual brake on these winches.

BALLAST: The jetty is equipped with dirty ballast/slops reception facilities. Tankers discharging dirty ballast/slops ashore will use the Pentane plus loading arms from where a 24 in. pipe-line runs to tanks in the Refinery adjacent to the LPG plant. The maximum ballast reception rate is 1,500 cu.m./hr. Prior to arrival the Master is to advise GASCO how much dirty ballast/slops he expects to discharge to the shore facilities.

When the vessel arrives with clean ballast for overside discharge, the ballast water must be clean and a declaration to this effect needs to be signed by the Master and delivered to the Terminal Representative. There is a danger of violating pollution regulation if ballast taken on in polluted water is discharged in port. If it is necessary to take on ballast in polluted areas, this should be discharged during passage and replaced by cleaner ballast.

Ashes, oil, oily water, garbage or other refuse must not be discharged overboard in port waters. Scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in Port waters.

It is essential that the vessel is adequately ballasted to ensure safe handling and manoeuvring. Please comply with the Pilot's requests as to ballast quantity and disposition.

There must be no cleaning of boiler tubes whilst the ship is in port.

POLLUTION: Abu Dhabi Gas Industries Ltd. (GASCO) follows a clean seas policy and in this respect the Harbour Master is authorised by the Port Authority to inspect the vessel's "Oil Record Book" referred to in the International Convention for the Prevention of Pollution from Ships 1973. Any vessel, the Master of which does not allow inspection of the "Oil Record Book," will be refused the use of the Company facilities at Ruwais.

If it is found that the information entered in the "Oil Record Book" is not in accordance with the requirements of the Convention the matter will be reported to the appropriate authority.

It is an offence to discharge dirty ballast, pump bilges or discharge refuse within the Port limits.

The Harbour Master, or his nominee, is authorised to take samples, in accordance with an approved procedure, of ballast water to be discharged, or being discharged at Ruwais. Should test carried out on these samples indicate an average oil in water content of more than 15 p.p.m. then this may be used in evidence in any proceedings against you brought by the Port Authority in accordance with the Law.

In the event of your vessel discharging dirty ballast or spilling oil, cost for cleaning the pollution, third party claims and other expenses and fines shall be borne by the vessel.

COOLDOWN OF GAS CARRIERS: Vessels, when presenting themselves to load at GASCO terminal should in all cases be ready to load in all respects. For a gas carrier this means that the cargo tank atmosphere should be compatible with the product to be loaded and the cargo tank temperature close to the temperature of the product to be loaded (Propane −45°C, Butane −8°C).

Notwithstanding the above and providing notice is given well in advance, GASCO may, in exceptional cases, accept gas carriers not fully cooled-down. Each occasion will be considered separately giving due regard to the shipping programme and any other circumstances or restrictions.

GASCO will not accept any responsibility for the failure by the Master of any gas carrier loading at Ruwais to take appropriate action to receive cold liquefied gas, prevent any damage to his vessel and jetty installation and/or injury to his crew or Terminal personnel.

VENTING: During the loading of Pentane plus, vessels should only allow vapours to escape via the agreed venting arrangement. If there is little wind movement, vapour may persist on deck. When there is a wind, it may, in crossing a deck house or structure, create a low pressure on the lee side thereby causing vapour to be carried towards the house or structure.

Either of these wind conditions may result in high local vapour concentration and, if so, it may be necessary to stop loading while the conditions persist.

Gas carriers are not allowed to have any vapours escape to atmosphere. During loading the pressure in the cargo tanks should be controlled by the use of their reliquefaction plant or by the use of the vapour return line to the shore. The control room should be notified prior to returning vapour ashore via the vapour return line and before stopping the return of vapour ashore.

Your attention is drawn to the information, as provided to you by the Terminal, on the properties and dangers of the cargo to be loaded on board your vessel, together with the actions required in case of an accident.

LOADING: *Loading Arms:* The LPG and Pentane Plus loading arms presentation flanges are 12 in. ANSI – 150 – flat face spiral groove.

For centre to centre distances and disposition of the loading arms, see schematic layout. The LPG arms operating envelope parameters are as follows:

Vertical plane	: From 7.7 m. to 24.0 m. above chart datum.
Horizontal plane	: From 4.1 m. to 8.7 m. off the jetty face over the full vertical plane.
Safety Provision	: Horizontal plane drift of 4.6 m. on either side of the centre line. Lateral plane drift of 4.6 m. outside the normal operating box envelope.

All four LPG loading arms can be connected to ships' manifold with a centre to centre spacing range of 1.6 m. to 3.5 m. for the full envelope including the outer drift envelope box.

The Pentane Plus loading arms operating envelopes are as follows:

Vertical plane	: From 2.3 m. to 20.75 m. above chart datum.
Horizontal plane	: From 6.4 m. to 9.3 m. off the jetty face over the full vertical plane.
Safety Provision	: Horizontal plane drift of 4.6 m. on either side of the centre line. Lateral plane drift of 4.6 m. outside the normal operating box envelope.

The Pentane Plus loading arms can be connected to ships' manifolds with a centre to centre spacing range of 0.6 m. to 2.1 m. for the full envelope including the outer drift envelope box.

Notwithstanding the above, the loading arms are fitted with ESD systems and additionally the LPG arms with ERS which is actuated before the loading arms reach the outer limits of their envelopes.

The LPG loading arms are linked to the shore system which provides the following flexibility:

Loading arms are numbered from the gangway tower to East.
No. 1 – Propane or Vapour return
No. 2 – Propane – Butane or Vapour Return
No. 3 – Propane – Butane or Vapour Return
No. 4 – Butane or Vapour Return

After berthing you are required to remove the blind flanges from the manifold connections to be used for loading and to indicate which product is to be loaded through them and which connections are to be used for the Vapour Return lines, if required. The connection/disconnection of the 12 in. ANSI 150 loading arms and 8 inch ANSI 150 bunker arm will be carried out by Terminal personnel. If your manifold sizes do not correspond with the loading/bunker arms, you are requested to provide and fit the appropriate reduction pieces accordingly. Masters of gas carriers are to ensure that the reduction pieces and gaskets used are suitable for loading of cryogenic cargoes.

Communications: To maintain necessary communications permanently during cargo operations and also in emergencies, you will be provided with a handie-talkie and a telephone.

We require that the handie-talkie is at all times attended to by the officer responsible for cargo operations. The handie-talkie enables the officer to communicate directly with the main control room and the jetty control room.

Furthermore, a telephone will be placed on your vessel. It is advisable that this telephone is located in such a way that it is guarded most of the time. Additionally a console for activating the ESD and ERS will be put on board.

A ship's crew member, able to converse in English, must be present near the ship's manifold at all times. The loading arm and ship's manifold area are covered by closed circuit televisions from the jetty control room and main control room.

Emergency Procedures: In case of an **emergency on board** your vessel, we require you to take the following action:

Raise the appropriate alarm and take the required action
Inform the Terminal via handie-talkie, telephone and jetty attendant or by activating the ESD or ERS system (see cautions on ESD/ERS information letter).
Cease all cargo operations immediately and shut-down cargo system completely.
Prepare to vacate the berth.

In case of an **emergency ashore,** we require you to take the following action:

Cease cargo operations immediately and shut-down cargo systems completely.
Stand-by on handie-talkie and telephone and keep contact with jetty attendant.
Stand-by to give any assistance.
Prepare to vacate the berth.

NOTE: The shore installation has been equipped with a range of safety devices and emergency shutdown systems, these could be activated automatically or manually from the jetty or on board the vessel as the situation will call. All shutdowns are preceded or accompanied by an alarm.

Loading Operations: The maximum loading rates for each product are as follows:

Product	*Tons/hr.*	*cu.m./hr.*
Propane	1,760	3,000
Butane	1,800	3,000
Pentane Plus	2,910	4,270

Propane and Butane can be loaded simultaneously. Loading rates can be adjusted either by stopping/starting one or more pumps or by opening/closing of the recirculation valves on the loading platform.

After berthing the terminal representative will discuss with you the loading operations and emergency procedures. You are reminded that the responsibility as to the quantity of cargo to be loaded, rests with you as Master of the vessel and no overage may be sent back ashore.

Whilst alongside the jetty, ships should be ready to move under their own power in the event of their breaking adrift, catching fire or emergencies. No repairs are to be carried out whilst alongside which would immobilise the ship or impair her fire-fighting efficiency.

CAUTION: The loading rates are controlled on shore and due to the long pipe-lines from the shore product tanks to the jetty head, and the high loading rates, an extremely dangerous situation can arise if ship's valves are closed against the flow of liquids, which could lead to pressure surges liable to cause the blowing out of pipe-line gaskets and/or severe damage to the loading arms.

Loading rates, loading rate reductions and stopping of cargo procedures will be discussed with you prior to commencement of loading.

While alongside the jetty, no craft are allowed alongside the vessel. The lowering of lifeboats whilst alongside the jetty is strictly prohibited except in emergencies.

Immediately after completion of loading the loading arms will be disconnected and the vessel must be ready to proceed to sea or anchorage as directed.

STORES: The taking-on and/or landing of stores and ship's spares over the jetty is not allowed.

SHORE LEAVE: Crew members are not permitted shore leave.

SIGNALS: Vessels, whilst alongside the GASCO NGL-jetty, shall, in addition to those described in the port regulations, display the following signals: by day: a red flag, by night: a red light visible from all directions.

SHIP OPERATOR'S REPORT: February 1982

The following criteria for gas carriers programmed to load propane/butane at Ruwais Terminal.

1. Tanks' atmosphere compatible with product to be loaded.
2. Tanks' temperature close to temperature of product to be loaded (Propane – 42°C, Butane – 6°C).
3. Distance between ship's side and 12 in. manifold connections between 4.1 m. and 8.7 m.
4. Height of manifold above chart datum between 7.7 m. and 24.0 m.
5. Maximum height of railing i.w.c. manifold above chart datum 21.8 m.
6. Centre to centre distances between manifold connections between 1.1 m. and 3.5 m. if manifold connections centre to centre distances are between 1.1 m. and 1.6 m. only one grade can be loaded at the same time.
7. Vessel not to have carried ammonia on previous two voyages.
8. Vessel to inform GASCO Ruwais not less than 48 hours prior to arrival of disposition of manifold connections from bow to stern indicating which connections to be used for propane, butane, vapour and liquid and also the centre distances between them.

also

9. Master should confirm ETA at 72, 48 and 24 hours prior to arrival to Gasha Tower by telex/cable.
10. Master to call Jebel Dhanna Pilot and Agent Jebel Dhanna on VHF radio Channel 9 or 16 four hours prior to arrival. Gasha buoy is in position Lat. 24° 25′ 46″ N., Long. 52° 34′ 26″ E.
11. Please advise Agents vessel's call sign or telex no., d.w.t. in long tons, g.r.t., n.r.t., arrival draft, loading rate, etc.

SHIPMASTER'S REPORT: December 1981 (Vessel loading propane/butane, g.r.t. 45,000, d.w.t. 56,000, draft 13.1 m., capacity 79,970 cu.m.).

Ruwais lies in the same general port area that encompasses Jebel Dhanna and at the moment consists of a petroleum products jetty and another to the S.E. which handles Pentanes and LPG.

Further again to the S.E. there is more port development for an ammonia/fertiliser berth and dry-cargo berths.

Ruwais is administered by ADPPOC, Abu Dhabi Petroleum Ports Operating Company, while the LPG berth comes under the immediate control of GASCO, Abu Dhabi Gas Industries Ltd.

The LPG loading platform is situated in position: Lat. 24° 09.8′ N., Long. 52° 43.3′ E., the trend of the platform and mooring dolphins being about 305° True, more or less in line with the current flow.

Approach: The vessel should have BA Charts 3778, 3779, 3780 and the recommended track on these should be followed for arrival and departure since it provides adequate water for a vessel of this size and draft. The route is well marked with large buoys and light floats which show up well visually and on the radar. An approach in poor visibility should thus be possible and made with confidence.

See Pilot Books and "Guide to Port Entry".

A waiting anchorage is provided off Ghasha buoy.

Pilotage: Pilots board off 'Ghasha' Buoy from launch of about 12/16 m. length; at the moment two launches are in commission.

Pilot ladder required about 1 m. above the water.

The length of pilotage to the first line ashore is about 3.5 hours.

Communications: Through Bahrain Radio. There is considerable evidence pointing to huge delays in cables between this radio station and the eventual recipient.

Before arrival the Agents sent a comprehensive questionnaire requesting safety checks and ship information. This is a standard cable and originates from GASCO.

VHF contact originally made on Channel 16 with the Pilots and Port Control, but their usual working frequency is Channel 9.

On boarding the Pilot issues a copy of the Port Regulations which should be studied prior to berthing.

Berth: This consists of the loading platform and mooring dolphins at the end of a 3 km. trestle. Minimum reported depth alongside is 15 m. and this was borne out by echo sounder on arrival and departure.

The jetty head consists of the loading platform, 42 m. long with two breasting dolphins at each end. Beyond these are the mooring dolphins, three forward and aft, the total length of the mooring system being 340 m., thus providing adequate moorings for most vessels.

The loading platform carries seven Chicksans, two for Pentane, one for bunkers (yet to be commissioned) and four for LPG. There is a control building on the berth together with closed circuit TV, gas detecting equipment and fire fighting monitors.

The loading arms are all 12 in. 150 ASA although shore personnel boarded and fitted special pieces between our manifold/reducers and the Chicksan. All Chicksans are fitted with automatic quick release and this will operate if the vessel surges more than 4 m. (two for'd and two metres aft) from her moored position. An automatic shutdown system is also fitted and the vessel is provided with a control box for these together with comprehensive instructions. A time of 10 secs. is quoted from operation to complete shutdown and emergency release.

There is provision for two vapour return lines and two loading lines within the four Chicksan configuration and these are interchangeable to a degree.

Ship/shore communication is provided by the terminal who place on board a Stornophone for that purpose.

Mooring: Wires only are recommended but there were no objections to our all polypropylene supply. The normal 3.2.2 was recommended and there is a large mooring boat to assist. Dolphins are fitted with quick release hooks.

Springs must be on mooring winches and the use of self tensioning winches is not allowed.

There are powerful tugs (3,300 h.p.) available for berthing.

Cooldown: There exist rather loose requirements for cooling down but it was no problem to explain to the Superintendent that this vessel could load into 'warm' tanks. If a vessel were to arrive under inerted tanks the situation may be rather different and it appears that the vessel would then leave the berth to cooldown.

Gangway: Ship's gangway should be turned in for berthing, a shore gangway is provided.

N.O.R.: Agent advised me to tender Notice of Readiness at the time of passing the Ghasha buoy.

E.D.P.: There is no Early Departure Procedure, the Master must sign Bills of Lading before sailing. Allow three to four hours after completion of loading to complete all paperwork.

Load Rates: Invariably quoted in cu.m.p.h. Maximum for each product being quoted as Propane 3,000 cu.m.p.h., Butane 3,000 cu.m.p.h. The plant were able to supply at a very low initial rate at the commencement of loading.

Note: The Propane loaded at this call was very warm, −38°/−39.5°C. The Loading Superintendents did not find this amiss and the reported temperature in the shore tanks is about −40°C. There was a slight drop in temperature at the manifold after sunset.

Butane loading temperature was about 0°/−1°C.

Cargo Survey: Watson Gray attended on behalf of Charterers to gauge ship's tanks and their figures agreed closely with our own. However, there was a huge discrepancy (618 tonnes) between our figures and those from ullaging and flow meter readings ashore (Propane). Ship was in excess of the shore tonnage. Ship was under shore figures for Butane by about 35 tonnes.

Protest noted over cargo temperature and quantities. Vessel was given outward clearance only on issuing Agents with a letter of Authority to Sign Bills of Lading.

Density: Water density 1031.

General:

Stores: Not available.

Shore Leave: Definitely not allowed under any circumstances other than extreme medical urgency.

Relief/Repatriation: Not possible.

Lloyd's Surveyor: A minimum of seven days' notice required.

Repairs: There are no repair facilities available. Whilst alongside main engines must be kept in immediate readiness.

Lifeboats: Permission *must* be sought from Port Authorities to carry out lifeboat drills.

Bonded Stores: No restrictions on tobacco. All alcohol should be collected and sealed. The Customs may allow a token issue (six cases of beer for the ship) but this is not to be relied upon. All cameras have to be collected and placed under seal.

Medical: Unless in cases of extreme urgency, totally unavailable.

Rat Guards: Must be fitted to all moorings.

Fresh Water: Not available.

Walport Films: Exchanges readily available with usual notice.

Entering Inwards: After the vessel's cargo nomination has been accepted she is allowed an "acceptance period" of three days in which to arrive at the port. Apparently this runs from 24 hours, BEFORE the day of acceptance to 48 hours afterwards. Thus we arrived 7 hours 30 mins after the expiration of our acceptance period and a vessel arriving 20 hours later received priority. This should be brought to the notice of Owners or Charterers, before arrival.

Papers: 1 copy Crew Declaration.
1 copy Bonded Stores List.
2 copies Crew List and Maritime Declaration of Health.

Bonded stores' seal checked on sailing. Customs checked both bars.

Note: Abu Dhabi operates a boycott against Israel, South Africa and Egypt. Suez Canal Transit is excepted.

The Master has to sign an undertaking to the effect that the cargo will not be discharged at a port under boycott and is given a form to be posted to Abu Dhabi from the discharge port as proof.

(E) RUWAIS FERTILISER INDUSTRIES (FERTIL)

The bulk cargo terminal (FERTIL) at Ruwais comprises a 512 m. long jetty with in line berths to suit the export of bulk/bagged Urea and Liquid Ammonia. Three mooring dolphins at the seaward end of the jetty serve a Liquid Ammonia berth. Max. draft is 11 m., a 500 m. turning circle is provided off the jetty and vessels will normally be berthed port side alongside with ship providing its own access. Mooring lines should preferably be all steel wires. If this is not possible ropes and wires are not to be led to the same dolphin. A shore deballasting system is provided.

Provision has been made along the jetty for bag and bulk conveyors to load vessels with urea from a fertiliser plant 1 km. inshore.

The loading of ammonia is carried out from a loading arm at the North end of the jetty where vessels can berth using 3×100 ton capacity mooring dolphins.

LOCATION: The jetty alignment and conveyor main setting out line is 10° West of North. The seaward limit of the jetty works are defined by the Northernmost mooring dolphin.

The terminal is located in 12 m. of water, due East of the NGL Jetty, and West of the Construction Wharf and is approached from a deep water channel serving other Ruwais jetties.

A turning basin is located N.E. of the jetty and is of 500 m. diameter and has a minimum dredged depth of 12 m. below chart datum.

Vessels will normally be berthed against fender piles alongside the jetty on a heading of 350°.

NOTICE: *Ship's Arrival Advice:* It is strongly requested that full details of the vessel including the number of crew and their nationalities should be advised to us. This information is required by the oil installations protection unit. In the absence of this information the protection unit would refuse permission for berthing of the ship. Therefore, you must ensure timely availability of this information so that it can be forwarded to the authorities. Any delay caused in berthing due to non-availability of information shall be to your account.

Further, please note that the above information should be made available as soon as the ship is nominated but not later than 24 hours after the nomination is confirmed. *Signed*: Plant Manager, Fertil.

BERTHING: *Jetty:* The jetty is designed for berthing combinations of vessels up to 2 fully laden 200 m. long (25,000 d.w.t.) bulk cargo vessels along its Eastern side. Provision is made at the Northern end of the jetty for the loading of liquid ammonia.

The jetty deck is of concrete construction and is supported by vertical 1 m. diameter tubular steel pipes.

Two turnround areas for jetty traffic are provided, one mid-way along the jetty, the other at the Northern end.

The jetty is designed to support up to 3 ship loaders with a backing conveyor system and up to 3×300 mm. diameter liquid ammonia lines.

The 3 mooring dolphins at the Northern end of the jetty serve the Ammonia Berth and each has a bollard capacity of 100 tonnes and is connected to the jetty by a system of concrete walkways.

The jetty and dolphins have a deck level 7.4 m. above Jebel Dhanna Chart Datum.

The minimum dredged depth at the berth is 12 m. below Chart Datum.

Fenders: The fender system has a design capacity of 55 tonne metres per fender pile and the recommended berthing angle is 5°. The fender system absorbs energy by deflection of single 1,300 mm. diameter tubular steel cantilever piles and twin Bridgestone Cell units which have a frontal frame 4.2 m. high by 1.7 m. wide.

The fender face is set 4 m. seaward of the jetty deck edge.

The fender spacing is generally 15 m. along the main length of jetty and this extends to 31 m. for the Northern fenders located East of the mooring dolphins.

The fenders are suitable for vessels between 5,000 d.w.t. and 25,000 d.w.t.

Mooring: Ship lines will be taken to 100 ton "Bean Type" mooring bollards located along the cope edge of the jetty. The general bollard spacing is 15 m. whilst at the shore end this extends to 30 m.

100 ton "Bean Type" bollards are positioned on the 3 mooring dolphins located at the seaward end of the jetty. Ships' lines may be taken to the dolphins by boat or via the concrete walkways provided from the jetty deck.

Landing Stage: A landing stage for small harbour craft is located adjacent to the jetty near Pile Bent 55, some 600 m. South of the outermost dolphin.

Access Ladders: Access ladders to water level are provided on the fender piles at a spacing of 60 m. All mooring dolphins are provided with access ladders.

Services: Provision has been made for future electrical and mechanical services in the jetty by ducts cast into the concrete deck or provision for hanger supports beneath the deck.

Loader Rails: A flat bottom loader rail having a gauge of 11 m. is secured to the concrete deck by Molyneaux Clips. Buffer stops are provided at both the inshore and offshore limit of the rail. Provision has been made for the future extension shorewards of the loader rail.

Approach From Shore: The approach to the jetty is via a dual carriageway off the Corniche Road. The access road leading to the jetty is 600 m. long and 8 m. wide and bounded on one side by the export conveyor housing.

Breakwaters: Rubble mound breakwaters protect the cooling water intake channel located West of the jetty.

Rubble mound reclamation bunds built just landward of the reef define the land area.

A rock armoured cooling water outfall channel is located within the reclamation and located mid-way between the jetty and construction wharf.

LOADING: *Urea Loading Operation Procedure:* Firstly, the Jetty Supervisor, after the arrival of the vessel, and after getting Clearance Certificate, will discuss the necessary loading sequence for keeping the vessel trim with ship's Cargo Officer.

When the sequence of operation has been agreed, the Jetty Supervisor will inform operational group in Bagging Control Room and shiploaders of the sequence required.

On receipt of this information, Bagging Control Operators will pre-set the bag counters or scales and line up other conveyors and machines depending upon the method of shipping required (i.e. bagged or bulk product) to the quantity agreed with the ship Cargo Master. Meanwhile, the Shiploader Operator will have positioned his machine ready for loading into the appropriate cargo hold defined by the sequence of operation.

Jetty Supervisor/Shiploader Operator will then give signal as "Shiploader in Loading Position" and Bagging Control Room Operator will start sending bag or bulk urea to jetty.

The pre-set bag counters or belt weighers will trip the conveyor system (excluding the jetty conveyors) when the pre-set capacity has been realised. The signal to start again will be given by the "Shiploader Running" signal. On receipt of this signal in the Bagging Control Room, the shiploader will have traversed to its new loading position and will be ready for the next batch of product.

Photocells are provided at the end of telescopic conveyor to indicate actual quantity of the bags loaded in ship hold. A cumulative reading (in numbers) is recorded in ship-loader operator's cabin.

For bulk urea loading, urea going to jetty conveyor is measured by weighing scales inside the Bagging Building. The weighing scale has load cells and belt speed detector for measuring the flow rate. The feed rate is indicated and also totalised cumulatively at Bagging Control Room, and also at the local control panel of weighing scale.

Normal operational shut-down shall be sequential and initiated from Bagging Control Room.

(F) ADNOC RUWAIS SULPHUR HANDLING TERMINAL

The ADNOC Ruwais Sulphur Handling Terminal is situated at the East of the existing Fertil's Bulk Cargo Terminal at Ruwais and consists of an overall water length of 350 m., which lies in a S.E. direction at the existing jetty. This facility will accommodate at the present, the export of only granulated sulphur in bulk into bulk cargo vessels between the range of 5,000 d.w.t. to 25,000 d.w.t.

The overall berthing arrangement includes 3 mooring dolphins and six breasting piles. The 2 centre breasting piles are equipped with quick release hooks for receiving vessels spring lines.

The loading of bulk sulphur is carried out by the telescopic boom of the quadrant shiploader which has 123 m. long travelling arc, having a design loading capacity of 3,000 tonnes per day.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., Jebel Dhanna, United Arab Emirates. Tel: 72214. Cables: "Confidence", Abu Dhabi. Telex: Abu Dhabi 22248 ("Gacauh EM"). Fax: 339350.

KHOR FAKKAN, Sharjah: 25.22 N. 56.22 E. **(See Plan)**

PORT LIMITS: See Plan of Khor Fakkan on B.A. Chart No. 3518.

DOCUMENTS: The following documents must be in the possession of the ship's Master on arrival, or must be forwarded to ship's Agent prior to arrival:

Immigration: board on arrival

Crew Lists (2 copies)
Passenger Lists (2 copies)
Passports/Seaman's Identity Cards

Customs:

Crew Lists (2 copies)
Passenger Lists (2 copies)
Cargo Manifests (2 copies)
List of Alcoholic Beverages (2 copies)

Port Operator:

Certificate of Registry (1 copy) on request
Classification Certificates (1 copy) on request

The following documents should be handed to the Port Operator by the ship's Agent at least 24 hours prior to the vessel's arrival.

Cargo Plan (1 copy)
Discharge List (1 copy)
Transhipment List (1 copy)
Dangerous Cargo Manifest (1 copy)
Refrigerated Container Manifest (1copy)

PILOTAGE: Pilotage is compulsory for all ships proceeding beyond the Fairway Buoy. Port Khor Fakkan operates a 24 hour, 7 day a week pilotage service. Vessels approaching the Port should await Pilot to seaward of the Fairway Buoy. The extremity of the breakwater (Lat. 25° 21′ 28″ N., Long. 56° 22′ 43″ E.) is marked by a white occulting light visible 10 miles.

"Gulf Pilot Khor Fakkan" on VHF Channel 16. Also on 2182, 2638, 2738, 3270, 3710 and 4136.3 kHz.

ANCHORAGE: A limited number of vessels may anchor in Khor Fakkan Bay to the North of the fairway with the prior approval of the Port Operator. Otherwise, anchoring not permitted within 12 miles of Khor Fakkan as the area is a prime tourist area.

MAX. SIZE: Max. draft entering and leaving is 39 ft., range max. 3.0 m., height of wharf at HW 1.8 m.

No restrictions on LOA.

HEALTH: Normal quarantine regulations apply. Radio Pratique will be granted on receipt of radio message from Master via his Agent, stating that no serious illness has occurred during the preceding 30 days.

All crew members must be in possession of valid cholera certificate. The Health Officer will board when the vessel is alongside.

RADIO: Bahrain Radio A9M.

Notice of Arrival: Vessel should advise its Agent ETA Port Khor Fakkan, giving draft, LOA and intended cargo operations to be performed at least 72 hours prior to arrival and confirm 48 hours and 24 hours prior to arrival.

Agents should arrange berthing and labour with the Port Operator. Vessel should contact Port Khor Fakkan signal station on VHF Channel 16 when within range.

VHF: Khor Fakkan Harbour Office can be contacted on Channel 16. All movement in and out of the harbour shall be notified to the control and permission to proceed obtained for each movement.

TUGS: 2 tugs of 2,100 h.p. each

BERTHING: Length of berth 430 m. Depth alongside 12.0 m. at LW. Mooring gangs and berthing launches are provided.

Port Equipment: 2×40 ton Mitsubishi gantry cranes; 4×40 ton electric transtainers; yard tractors and trailers. Additional equipment such as forklifts, mobile cranes, pallets and barges available on request from the Port Operator.

Storage Facilities: The terminal comprises an area of 100,000 sq. m. and is capable of handling 150,000 t.e.u.s per year.

Container Freight Station: A container freight station is available at Port Khalid, Sharjah close to the main highway linking Sharjah with its West coast neighbours.

Priority: Given to Container and Ro-Ro vessels.

STEVEDORES: *Working Hours:* The port will work on a 24 hour, 7 day a week basis ashore and afloat. Additional charges will apply outside normal working hours which are defined as follows:

Saturday to Thursday except Public Holidays (0600 – 2200 hrs.).

Normal working hours are subject to change during Ramadan when working hours will be at the discretion of the Port Operator. Requirements for port labour must be submitted by ship's Agent to the Port Operator by 1600 hrs. previous day.

MEDICAL: Upon application to ship's Agent, medical examination of crew members can be arranged. Personnel will either be sent to private doctor or to Public Health Department as circumstances dictate. Serious cases will be referred to Government Hospital Doctor.

FRESH WATER: Fresh water is obtainable. Agents must notify the tonnage required 48 hours prior to ship's arrival.

FUEL: Limited gas oil facilities only at present.

REPAIRS: Marine engineering workshops capable of handling most repairs are available.

SURVEYORS: Services are available upon request.

REPATRIATION: Proximity of the new Sharjah International Airport will permit efficient crew changes and repatriation. Offshore crew change facilities can be arranged.

Transit visas are not required for crew changes. Ship's passengers require a valid visa for transit or temporary stay.

AIRPORT: Sharjah and Dubai.

TIME: GMT plus 4 hours. Permanent.

SHORE LEAVE: Shore leave is permitted.

STORING: At anchorage – by off-shore crew change boats. Alongside – by truck alongside ship. Fork lift trucks and local labour available if required.

BANKS: British Bank of the Middle East, P.O.Box 10030, Khor Fakkan, U.A.E. *Telex*: 89011 Bbmefj EM (stating for KFK.)

Grindlays Bank Ltd., P.O. Box 10149, Khor Fakkan, U.A.E. *Telex*: 89025 Grnly EM.

GENERAL: Pollution: The provisions of the Khor Fakkan Maritime Law shall apply with respect to the operation of vessels in Khor Fakkan coastal waters.

Garbage disposal services are provided by the Port Operator and are compulsory.

Ships' Chandlers: Complete chandlering facilities are available, handling provisions, laundry and bonded stores.

Water for Labour: A supply of potable water is to be made available to port labour working on board a vessel.

DEVELOPMENTS: Additional storage space to be provided 1988/89 by shifting Port Control point.

SHIPMASTER'S REPORT: January 1986

If vessel calling for bunkers only Port Control insist that vessel anchors at least 4 miles off the Fairway Buoy. No Agent or port entry papers required in this case. If however, stores are taken or any crew members changed, an Agent must be appointed and port entry papers completed.

AUTHORITY: Sharjah Ports Authority, Port Khor Fakkan, P.O.Box 10542, Khor Fakkan, U.A.E. *Tel:* Khor Fakkan 85324/85027. *Telex:* 89023 SEAGUL EM. *Cables:* Mina Khor Fakkan. *Contact:* Captain Abdul Razik El Sharif, Harbour Master.

Port Operator: Khor Fakkan Container Terminal Ltd., (A division of Gulftainer), P.O.Box 10326, Khor Fakkan, U.A.E. *Tel:* 85604/5. *Telex:* 89064 Servic EM. *Contact:* N. Anderson, Terminal Manager.

AGENT: See "Sharjah".

MINA SAQR, Ras Al Khaimah: 25.59 N. 56.03 E.

(See Plan)

PORT LIMITS: "Mina Saqr" and its limits include all waters, installations and the creek of Hanna bounded within 3 mile radius to seaward from the main breakwater light in position Lat. 25° 58′ 48.35″ N., Long. 56° 02′ 43.7″ E.

LOCATION: The Port of Mina Saqr is situated 15 miles by sea and 22 km. by road North of Ras Al Khaimah. On Chart BA. 2888 it is 1 km. North of Hanna Creek in Lat. 25° 58′ N., Long. 56° 03.5′ E. Jubail Al Harim (6,843 ft.) overlooks the port, and is 10 miles East. The port is bounded by main and lee breakwater.

DOCUMENTS: Following documents to be forwarded to the Agents at least 7 days prior to the vessel's arrival:

3 copies Dangerous Cargo List.
2 copies Stowage Plans.
2 copies Hatch List.
6 copies Cargo Manifests.
1 copy each of Bills of Lading.

On vessels arrival, 4 copies of Crew Lists, 4 copies of Vaccination Lists, Crew Health Certificates, Ship's Certificates, etc. to be kept ready for inspection by the Officers.

PILOTAGE: Pilotage is compulsory. Pilot may board from launch or by tug at Approach Buoy (B and W pillar buoy Int. Qk. Fl.) in position Lat. 26° 00′ N., Long. 56° 02′ E. and in all cases a pilot ladder should be provided and a lee given. Pilot boards during daylight hours only.

Master to contact "Ras Al Khaimah Port Control" on VHF Channel 16 at least 2 hours prior to arrival. ETA cables to be sent to the "Harbour Master MINASAQR Ras Al Khaimah" and also to Agents. Vessels to keep listening watch on VHF Channel 16 and await instructions from port.

ANCHORAGE: The area bounded by the port limits and to seaward of the main breakwater has been reputed as an area with good holding ground. The co-ordinates of the anchorage on Chart B.A. 3737 are:

1 Lat. 25° 58′ 36″ N., Long. 56° 01′ 48″ E.
2 Lat. 25° 59′ 24″ N., Long. 55° 59′ 02″ E.
3 Lat. 26° 01′ 12″ N., Long. 56° 02′ 11″ E.

Depths are from 20 m. to 28 m.

RESTRICTIONS: Vessels may enter or leave the port during daylight hours with the permission of the Harbour Master. No restrictions on entering during tides.

MAX. SIZE: No restrictions on breadth of a vessel but length not to exceed 244 m. for easy berthing. Permissible draft in all the berths is 11.5 m. Range of tide is maximum 1.6 m.

HEALTH: Normal quarantine regulations apply and Pratique is granted subject to Port Health Authorities' approval. The Health Officer boards the ship only when vessel alongside. Suspected disease or fever on board vessel to be reported to Harbour Master by cable prior arrival and await instructions.

RADIO: All cables to be routed through Bahrain Radio. Vessels should cable their Agent, at least 72 hours prior to arrival, the ETA, LOA, expected draft on arrival, cargo and hatchwise stowage.

VHF: Port equipped with VHF Radio standby Channel 16 with other working Channels, port working Channel 67. Port Signal Station is manned 24 hours a day and should be contacted at least 2 hours prior to vessel's arrival. Vessels should report the ETA, LOA, draft, details of cargo to be discharged, stowage, etc.

RADAR: Port not equipped with radar.

TUGS: Tugs join the vessel at anchorage, the practice being to secure alongside, using ship's lines. Derricks should be swung in and gangways hoisted. Tugs are fitted with VHF.

BERTHING: The harbour and entrance channel is 12.2 m. MLWST. A draft limit is imposed of 11.5 m. The harbour provides 165 acres of sheltered water and is enclosed by main and lee breakwaters. Deep water quays totalling 1,690 m. in length will provide berthing facilities for 8 ships. Included in this are 2 Ro/Ro ramps. Plans are now being developed for the installation of a container crane and supporting equipment.

The small boat harbour and fishing harbour provide a further 725 m. of quay, and offer a dredged depth of 4.5 m.

All the 8 berths, including 2 Ro/Ro berths are now in operation.

Distance between quay and water level maximum 3.8 m. at LW and 2.2 m. at HW.

Discharging to be carried out using ship's gear. All berths are general cargo berths. Berth Nos. 3 and 5 have ramps for Ro/Ro vessels.

CRANES: No shore cranes available at berths therefore vessels calling should be self-sustaining. Mobile cranes of various capacities available locally for hire if required. No floating cranes available at present.

BULK CARGO FACILITIES: No special berth allocated for discharge of bulk cargo. Bulk cargoes handled at present are iron ore, gypsum, bauxite, clinker and aggregates, and vessels with these cargoes are allotted any of the general cargo berths subject to availability. No conveyor system or special equipment exist at present and as such cargo is discharged using vessel's derricks.

SPECIALISED CARGO HANDLING FACILITIES: 2 berths, Nos. 3 and 5 with ramps to accommodate Ro/Ro vessels. There is also one berth for bulk cement loading (Berth No.7). Length 180 m. Max. draft 11.5 m., rate of loading cement with hoses is 600 t.p.h. maximum.

An automatic moving shiploader for aggregate and limestone has been installed on Berth No. 5, length 200 m. Max. draft 11.5 m. alongside. The shiploader maximum loading rate is 2,000 t.p.h.

STEVEDORES: Advance ETA cable to be sent by Master to the vessels' Agents to order required gangs to work on board vessels. Labour gangs are supplied by local contractors, (who can be contacted via the Signal Station) and the gangs work on board the vessel directly under the supervision of the vessel's Officers with the stevedoring companies accepting no responsibility whatsoever for any damage either to the vessel or its cargo.

Working Hours: 0700 – 1400 hrs. and 1500 – 2100 hrs.

MEDICAL: Advisable for Agents to receive at least 24 hours' advance notice of required medical attention but can also attend to this at short notice. Hospital facilities are available. Officers/Crew should have valid Cholera and Yellow Fever Certificates.

TANKERS: No tanker berth in port. Tankers will discharge at Berths No. 1, 2 and 3 through bunker line – this will be fuel and diesel oils only. Fuel line 12 in., diesel line 8 in. and 6 in. hose. SBM offshore for loading crude oil (see "Hulaylah Terminal").

DENSITY: 1024 – 1028.

FRESH WATER: Fresh water available in Berth Nos. 1 to 6 with 2 points to service tanks fore and aft as required on a 24 hour basis. Cost of water will be Dh. 7/– per ton.

FUEL: Fuel oil, marine diesel oil, and gas oil can be supplied through RAK Refuelling (Shell) or E.G.P.C. Telephone and telex numbers are available through the Port Signal Station. All sizes of reducers are available and pumping rates are fuel oil 200 t.p.h. and gas oil 250 t.p.h. – 300 t.p.h., subject to vessel's receiving capacity. Presently there are 6 bunker points in Berth Nos. 1, 2 and 3.

Marine lubricants of all brands can also be supplied provided nomination through the suppliers is received sufficiently in advance.

FIRE PRECAUTIONS: The port has its own auxiliary fire brigade and, when required, the services of the Ras Al Khaimah Fire Brigade are available.

CONSULS: None at this port but most of the consulates can be contacted at Abu Dhabi or Dubai.

REPAIRS: Small repairs can be carried out in the port, but major work can only be carried out by companies in Dubai.

DRY DOCK: No drydock in Mina Saqr. The nearest drydocks are at Ajman and Dubai.

SURVEYORS: Draft, on-off hire and Bunker surveys are arranged through the Port Authority. All Classification Societies, Salvage Associations and cargo inspection companies are available in Dubai and Sharjah.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

HATCHES: Opening/closing of the hatches to be carried out by the crew with the assistance of the stevedores, if necessary.

CUSTOMS ALLOWANCES: Normally, bonded stores are not sealed by the Customs Authorities. However, only limited stock should be left with the Officers/crew for their consumption on board vessel and the rest should be kept locked under the custody of the Master. Sale of bonded stores is strictly prohibited and persons indulging in this will be punished according to local custom.

REPATRIATION: Efficient crew changes and repatriation can be carried out on receipt of advance information.

AIRPORT: Ras Al Khaimah International Airport, situated about 45 km. South of Mina Saqr, operate daily flights to various destinations.

TIME: Local time is GMT plus 4 hours.

HOLIDAYS: Normal Muslim holidays during which time port working hours will be restricted. Fridays are the weekly holidays.

POLICE/AMBULANCE/FIRE: All police, fire and ambulance emergencies should be notified on 999. General telephone numbers are: 29351 for Police, 26668 for Ambulance and 21212 for Fire.

TELEPHONES: No telephones available for placing on board vessels. However, a telephone is available in the Port Signal Station 24 hours a day.

For international calls, Agent's offices situated outside port area should be used. Ras Al Khaimah has excellent communication to most countries as it has its own earth satellite station.

SERVICES: Ship chandlers, laundry, exchange of films, etc. available in Ras Al Khaimah. Radio/radar repairs, tank cleaning equipment, scamping (underwater cleaning) facilities, etc. can be arranged. Garbage reception facilities available.

BANKS: National Bank of Ras Al Khaimah, Bank of Melli Iran, United Arab Bank, National Bank of Abu Dhabi, Bank of Baroda, Bank of Oman, Bank of Credit & Commerce, British Bank of Middle East, Bank du Caire, Commercial Bank of Dubai, Bank of Arab Coast, Middle East Bank and Bank Libanaise pour le Commerce.

STORING: See "Prelims".

1. By truck or barge.
2. No restrictions.
3. Yes.
4. Yes.
5. None.
6. Yes.

SHORE LEAVE: Can be granted and for this purpose the Agents should hand over a crew list to the Immigration Department who will issue shore passes in exchange for Seaman's Book or Passport. Prior to vessel's departure, Master to ensure that all shore passes are handed over to the Agents who will surrender them to the Immigration Department, Seaman's Books/Passports will then be returned. Agents should advise Immigration Department by letter if any crew changes to be effected.

REGULATIONS: None.

DELAYS: No berthing delays.

AUTHORITY: Ras Al Khaimah Port Services, P.O.Box 5130, Ras Al Khaimah, U.A.E. *Tel:* 66444 (4 lines), Cargo Section Tel. 66904. *Telex:* 99280 EM. *Cables:* Minasaqr. *Contact:* Captain Hazem Raouf Assaad, Port Manager.

AGENT: International Shipping Agencies Co. (Ras Al Khaimah) Pvt. Ltd., P.O.Box 5162, Ras Al Khaimah, U.A.E. Cables: "Isaship", Ras Al Khaimah. Telex: 99226 ("Isarak EM"). Tel: 21266, 21966. After office hours 52449.

Operators of ship-servicing and supply organisation: Crew changes, mail, spares and/or delivery of provisions undertaken at sea without deviation to serviced vessel.

Owners and Masters should contact G.A.C. Dubai by cable or telex regarding servicing requirements. Rendezvous positions are selected by Shipmaster as follows: Off Dubai, at any Latitude along meridian 55° East, or off Fujairah at any Longitude along parallel 25° 10′ North.

MINA ZAYED, Abu Dhabi: 24.32 N. 54.23 E. (See Plan)

COURTESY FLAG: Vessels calling at ports in the Emirate of Abu Dhabi should fly the flag of the United Arab Emirates as a courtesy flag.

DOCUMENTS: 10 copies of Cargo Manifest are required, with full cargo particulars, such as Bill of Lading number, marks/numbers, description, weight and measurement and IMO Class if any. It is essential that all this information against consignee/notify parties name, full contact address is given on the Manifest for each consignment. The Manifests should reach the Agent prior to arrival of vessel in order to be submitted to the Port Authorities 48 hours before the ship's arrival.

Also stowage particulars should be submitted with the Manifest in order that the Agent may advise the Port Authority of the equipment and labour required for efficient handling of the vessel.

Customs Require:
1 Copy Crew List.
1 Copy Stores List.

Immigration Require:
2 Copies Crew List.
2 Copies Passenger List, if any.

Quarantine Require:
Crew List
International Health Certificate.
Vaccination List.

PILOTAGE: Pilotage is compulsory for all vessels entering/leaving Mina Zayed. Pilotage 24 hours. Pilot will board incoming vessels within a radius of 1 nautical mile seaward of the Fairway Buoy (Lat. 24° 26′ N., Long. 54° 18.4′ E.). Ships should wait for Pilot in the area stated above and not enter the channel unless instructions to the contrary are given.

ANCHORAGE: Recommended anchorage for ships over draft of 9.45 m. is approximately 1 mile N.E. of Abu Dhabi Racon and for ships up to 9.45 m. draft approximately 0.9 miles S.W. of Alpha Buoy in position Lat. 24° 35.5′ N., Long. 54° 18.93′ E.

Also see "Shipmaster's Report".

MAX. SIZE: Largest vessel upto draft 13.0 m. at general cargo berths, 13.0 m. at Container Terminal, no restriction on beam or length.

Max. rise and fall of tide is 2.0 m.

RADIO: Vessels are to give their ETAs by cable through Muscat or Bahrain Radio, addressed to "Port Authorities – Port Zayed, Harbour Office" at least 72 hours prior arrival. Port Control Tower equipped with HF transceiver operating on 2 frequencies and continuous watch on 2182 kHz.

VHF: Port Control Tower on VHF Channels 16, 12, 11, 9 and 6.

TUGS: 4 harbour tugs available, 2×2,400 h.p. and 2×1,250 h.p. Tugs fitted with VHF.

BERTHING: 21 deep water berths with a total quay length of 4,300 m. Berths No. 1, 2, 3 and 4 Container Terminal with depth 10.5 m. to 13.0 m.; Berths No. 5, 6, 7, 8 and 9 with depth 9.5 m.; Berths No. 10, 11, 12 and 13 with depth 6.0 m.; Berths No. 14, 15, 16, 17, 18 and 19 with depth 11.5 m.; Berths No. 20 and 21 with depth 10.5 m.

Storage: The Port has 13 closed storage sheds over an area of 102,300 sq.m. There are also 9 open sheds with a total area of 45,000 sq.m. and an open area (paved) of 1,104,000 sq.m. for the stacking or storage of various types of cargo such as timber, steel, construction materials and cars.

CRANES: Cranes for discharging available. Mobile cranes from 5 – 150 tons available. Berths No. 4 – 6 have 6 electric cranes 5 – 10 tons. 3 container cranes 40 tons, fork-lift trucks and trailers, 2×40 tons straddle carriers.

CONTAINER HANDLING FACILITIES: *Container and Ro/Ro Facilities:* Container Terminal has 4 berths with a total length of 800 m. Two berths have a depth of 13.0 m. and 2 berths have a depth of 10.5 m. The berths are equipped with 3 Krupp modern container cranes of 40 tons capacity with an outreach of 39 m. 2×40 ton rail-mounted yard cranes, 2×40 tons, 2×15 tons, 2×8 tons Forklift trucks, 2×40 ton straddle carriers, 25 HK stacking containers, which accommodate 15,000 TEU's and there is a large LCL Terminal and a large area set aside for Ro/Ro equipment. 64 reefer plugs (480 volt, 32 amp), workshop for maintenance and repair of cranes and other equipment. Computer equipped control tower, radio network linking cranes, other equipment and offices and sheds.

BULK HANDLING FACILITIES: Bulk grain silo at Berth No. 19 has a storage capacity of 60,000 tons with discharge rate of 240 t.p.h.

STEVEDORES: Skilled manpower available for all kinds of cargo operations.

Working Hours: Working hours for stevedoring from 0700-2100 hrs. plus overtime on request.

Cargo is also handled on Fridays.

Container Terminal works 24 hours, 7 days a week.

MEDICAL: Fully equipped Government hospital, most medicines available. Private clinics available.

TANKERS: See "Das Island", "Umm Al Nar" and "Jebel Dhanna – Ruwais".

FRESH WATER: Available at all berths, or by barges.

FUEL: Diesel oil and gas oil is available by barges.

FIRE PRECAUTIONS: Port Zayed Fire Brigade is available 24 hours a day. The harbour tugs are fitted with fire-fighting equipment.

SURVEYORS: Lloyd's Agents: Abu Dhabi Maritime & Mercantile International, P.O.Box 247, Abu Dhabi, Tel: (2) 323131. Telex: 22245.

LAUNDRY: Reasonably good laundries available.

PROVISIONS: Can be arranged through ship's Agent.

AIRPORT: Abu Dhabi International Airport is 40 km. There are daily flights to all Gulf State Countries.

TIME: GMT plus 4 hours.

HOLIDAYS: Friday is weekly holiday. Cargo movement generally not affected by holidays.

SHORE LEAVE: Permitted. A permit can be obtained from Immigration Department. Absolutely necessary that every crew member be in possession of valid Seaman's Book.

GENERAL: *Vessels discharging cargo at anchorage:* Anchorage ETA required: The Port Authority should like to draw the attention of all shipping agencies in Abu Dhabi, to supply the Traffic Department with the date of arrival of ships which are going to discharge their cargo at anchor.

To enable the Traffic Department to take the necessary action and to render the required facilities, it is necessary that manifests, documents relating to cargo and the date of arrival should be forwarded 48 hours before the actual arrival of ships.

DEVELOPMENTS: Fishing harbour under construction South of the Dhow Harbour.

~~**SHIPMASTER'S REPORT:** February 1984~~

~~A navigational change has taken place in the Port of Abu Dhabi. There is danger while approaching Abu Dhabi port, due to the fact that they have recently changed the position of Abu Dhabi light vessel. The change took place in January 1984, so the last edition of British Amiralty charts are not corrected.~~

~~We loaded in Europe for Abu Dhabi, Karachi and Bombay. During our stay in Europe we were provided with last edition British Admiralty charts for discharging ports including BA. Chart No.3752 titled "Jazirat Sir Abu Nu'Ayr to Abu Zabi". We arrived in Abu Dhabi on February 9th, 1984. The above chart had the following small corrections for 1982 -897-1315-1896-2555-2681 and for 1983 -1214-(5-5)-1684-1686-3049. The position of the Abu Dhabi Racon equipped light vessel on the chart was, Lat. 24° 43.5′ N. and Long. 54° 16.2′ E. From that charted position they have shifted the light vessel 4 miles in S.W.'ly direction, thus the new valid position is as follws: Lat. 24° 40.0′ N. and Long. 54° 12.2 E.~~

~~Our Agent did not advise us of change, though Port Control does advise incoming vessels.~~

~~The land is very low and no position can be established by radar, the Racon equipped Abu Dhabi light vessel is the only reliable target. Therefore incoming vessels are exposed to the risk of grounding, because of shallow waters and vessels with draft of 30 ft. and over can be berthed only by HW.~~

AUTHORITY: Abu Dhabi Sea Port Authority, P.O.Box 422, Abu Dhabi, U.A.E., *Tel:* 725600. *Telex:* 22731 Prtex EM.

Officials: H.E. Hadef Mohd Houfan Al-Mansouri, Under Secretary.
Mr. Abdulla Majid Al-Mansouri, Director General.
Captain Said Darwish Al-Rumeithy, Harbour Master.
Mr. Brayek Awad Amer Al-Mehri, Deputy Container Terminal Manager.
Mr. Salem Sultan Al-Meheirbi, Deputy Traffic Manager.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., P.O.B. 377, Abu Dhabi, U.A.E. Cables: "Confidence", Abu Dhabi. Tel. 334300 (10 lines). After office hours Tel: 326083, 216613. Fax: 339350. Radio: Marine VHF radio, stand-by on Channel 16 (156.8 MHz), Call sign "Confidence, Abu Dhabi". Telex: 22248 ("Gacauh EM").

MUBAREK TERMINAL, Sharjah: 25.49 N. 55.11 E.

(See Plan)

LOCATION: The Mubarek Oil Terminal is situated off the island of Abu Musa, and is under the jurisdiction of the Emirate of Sharjah and operated by the Crescent Petroleum Company.

DOCUMENTS: One Crew List and valid Health Certificate.

EARLY DEPARTURE PROCEDURE: In force. Vessel's Agent signs all documents on behalf of the Master including Bills of Lading.

PILOTAGE: Vessels to be moored, anchored or manoeuvred at Mubarek Oil Terminal will be boarded by Company Mooring Master in the close vicinity of the suggested anchorage area. Vessels must not enter the restricted limits of the terminal unless a Company Mooring Master is on board.

Ships are requested to have a pilot ladder safely and securely rigged and ready for immediate use and long enough to reach the Company Mooring Master's launch. A combination of pilot ladder and ship's accommodation ladder so arranged that personnel can first use pilot ladder until part way up the vessel's side and then transfer to the accommodation ladder is recommended, especially on very large ships. There should be adequate lighting at night. Vessels will provide a lee for the Company Mooring Master's launch when boarding and leaving.

The Company Mooring Master may require the vessel to anchor at any time he deems it necessary for the safety of the vessel or moorings or both or for infringement of the terminal regulations.

The Company Mooring Master shall be the sole authority as to when the terminal is open or closed for normal working due to weather conditions.

NAVIGATION AIDS: A floating oil storage vessel *York Marine* (110,000 d.w.t.) is used for storage of crude oil and for accommodation and headquarters of terminal personnel lies permanently moored to the SPM in position 25° 49′ N., 55° 10′ E. The *York Marine* is equipped with normal navigational warning lights and aids as required by convention.

A fixed oil production platform, incorporating crude oil treating facilities, rises approximately 50 ft. above water at Lat. 25° 50′ 43″ N., Long. 55° 11′ 49″ E. Said structures are equipped with 1 clear light and a fog horn, each with characteristics Mo(U) 30 secs. A permanently fixed flare structure (tripod) rises 150 ft. (flare tip) above water at Lat. 25° 50′ 56″ N., Long. 55° 12′ 00″ E., approximately 037°, 1,716 ft. from the oil production platform. In addition, there are numerous oil well head structures within the restricted area described below. All structures have standard navigation aids with characteristics the same as mentioned above.

READINESS: Notice of Readiness will not be accepted at time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered the time the Company Mooring Master boards the vessel, or the time the vessel is within the approved anchorage area, whichever occurs first. Notice of Readiness is to be in English.

ANCHORAGE: An anchorage area diameter 6,000 ft. has been established with the centre in position Lat. 25° 46′ 45″ N., Long. 55° 13′ 13″ E.

RESTRICTED AREA: A restricted area of approx. 38 sq. miles has been established with a boundary formed by an imaginary line from:

(a) 25° 54′ 26″ N., 55° 13′ 49″ E. in a W.S.W. direction to
(b) 25° 15′ 14″ N., 55° 07′ 19″ E. thence in a S.S.E. direction to
(c) 25° 46′ 33″ N., 55° 09′ 37″ E. thence in a E.N.E. direction to
(d) 25° 49′ 44″ N., 55° 16′ 08″ E. thence in a N.N.W. direction to the position above.

RESTRICTIONS: Max. distance bow to manifold 580 ft.

MAX. SIZE: 250,000 d.w.t.

HEALTH: When arriving fly "Q" flag by day, and red over white light at night for quarantine service.

RADIO: Initial communication by radio between ship and Crescent Petroleum Company should be via Bahrain Radio, call sign "A9M", operating on a 24 hour basis or directly by telex to 68015 CRESPT EM.

Company Mooring Master will have sole control of radio installations during the period a vessel is manoeuvring or moored, and no radio transmissions will be permitted on board ship except by the express permission of the Mooring Master in each case, only the Mooring Master may transmit on Channels 71 and 17 during the period he is on board. He will have a VHF radio telephone with him.

Mubarek Oil Terminal Radio Station call sign "Crescent – 2" particulars are as follows:

Operated by Crescent Petroleum Company, Sharjah, position: Lat. 25° 49′ N., Long. 55° 10′ E.

Frequencies: Channels 71 and 17 on VHF.

Hours of operation: 24 hours per day.

Mubarek Oil Terminal Control Centre keeps continuous watch on VHF radio telephone Channel 71. Vessel approaching the terminal not having Channel 71 will be contacted on Channel 16 when the terminal will request her to switch to an alternate channel.

Channel 17 is reserved for communications between ships in moorings and Mubarek Oil Terminal Movements Control Centre. This is a safety measure since oil flow to ships is controlled through Channel 17, which therefore must be clear at all times in case of need to stop oil flow for any cause.

Channel 16 is for calling and safety use only.

It is most important that ships establish communications with the terminal not less than 72 hours prior to arrival at the terminal giving ETA. Further ETA signals should be sent when the vessel is 24 hours, 12 hours and 4 hours distant, or any time a change of 1 hour in original ETA occurs. These messages should state specifically whether ETA is given in GMT or Local Time. The 72 hour signal should include the following:

ETA.
Last Port of Call.
If any Sickness on Board.
If vessel has Clean Bill of Health.
Cargo quantity and Grades expected to be lifted in long tons.

The 12 hour signal should include definite indication as to whether the vessel is ready to load or not and should also include information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when the ship is 4 hours distant from the terminal.

Unreasonable insufficiency or inaccuracy in ETA messages may alter the order of berthing of ships to the advantage of those ships giving sufficient and accurate ETA messages. Acceptance of Notice of Readiness will also be affected by such insufficiency or inaccuracy.

On receipt of first signal from a vessel, terminal will transmit a message to her giving preliminary requirements of terminal. Masters are urged to comply with this in all details in order to facilitate vessel turnaround and government formalities.

TUGS: The Company maintains launches to assist in mooring and unmooring vessels. These are under the direct supervision and control of the Company Mooring Master.

BERTHING: Vessels to load crude oil cargo will be normally accepted and berthed in chronological order of arrival provided such vessels have current nomination for cargo valid at the time of tender, carry clean ballast if any, and have cargo tanks in a fit condition to receive cargo. Also, they must be in all respects properly equipped and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

Vessels required to leave the terminal area on account of bad weather should keep in contact with the terminal via the Company radio station at Mubarek Oil Terminal, call sign Crescent-2, in order that they may be available when the weather is fit for resumption of operations. The Company reserves the right to load vessels out of turn following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other vessels in line. Further the Company reserves the right to decline to moor a specific vessel if its condition or facilities are unsafe for mooring or loading even though the terminal may be open to other vessels.

The Company Terminal Superintendent's decision on this will be final.

Mooring: Mooring is by the "Tandem" method, with the bow of the export tanker moored to the stern of the storage tanker *York Marine*. Manoeuvring to the berth is effected with the aid of 2 tugs. The mooring rope is a standard 21 in. circumference × 200 ft. nylon SPM rope, fitted with a 3 in. OCIMF chafe chain.

After mooring, a tug will be made fast to the stern of the export tanker, and tension will be maintained in the "Tandem" mooring at all times.

Average loading rate is 16,000 b.p.h.

EQUIPMENT: Vessels must have suitable winches or capstans in good operating condition on the forecastle deck.

All vessels should have ready messenger lines on forecastle head for bringing the mooring line aboard from single point mooring.

Mooring winches on forecastle head for handling 1×12 in. circumference synthetic fibre floating pick-up line.

Adequate mooring bitts to secure mooring line. A bow stopper or Smit type connection is preferable.

Hose lifting winch, derrick and gear rigged for 7.5 tons.

HOSES: After the vessel is securely moored the cargo hose will be hoisted on the starboard side. The hose is lifted by ship's gear and crew, and all connecting of the hose will be done by them. The lifting derrick equipment tackle, etc., should be topped off and ready on arrival. Terminal loading hose is fitted with ASA 150 pound flat face 12 in. "Camlock" coupling and ships should have adapters and fittings to enable this hose to be connected to the ship's manifold. The Company Mooring Master advises the ship's personnel in hose lifting and connecting procedure; however, a deck officer must be present and must direct the ship's crew in all handling. The Company Mooring Master may reject a ship for unsatisfactory hose handling.

Do not close valves against crude flow.

Emergency flow stop signal if all communications fail will be a continuous sounding of the ship's whistle from either export tanker or *York Marine*.

CARGO SPECIFICATIONS: *Approx. Mubarek crude specifications:*

Gravity	44° A.P.I. (approx.)
Sulphur	0.6%.
B.S.&W.	Two tenths of one per cent or less by volume.
Metals	Not in excess of trace (100 PPM).
Viscosity	52 SSU at 120°F.
Flash Point	Below ambient temperature.
Pourpoint	30°F.
H_2S	Present.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Various consulates are located in Abu Dhabi and Dubai.

REPAIRS: No repairs, painting, etc., are to be made while berthing, unberthing or in the berth.

CUSTOMS: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition and possibly other items have to be locked up under Customs seal from time of arrival of ship until time of leaving territorial waters.

TIME: Local time is GMT plus 4 hours throughout the year.

SERVICES: No supplies of any kind and no medical services (except in case of emergency and subject to a doctor being available), or other services are available at Mubarek Oil Terminal.

SHORE LEAVE: Not permitted.

GENERAL: *Light Dues:* The Middle East Navigation Aids Service (MENAS) charges light dues according to the size of the vessel and the number of visits to the Gulf during the year.

Positively no provision is made for dirty ballast: Any ship arriving with dirty ballast will be rejected and all costs accruing therefrom will be to the ship's account. Notice of Readiness shall not be accepted until vessel returns with clean ballast and tanks fit to receive cargo. She will on second arrival tender a new notice of readiness to load.

Fire towing wires required fore and aft.

No swimming permitted whilst vessel in berth.

No fishing permitted at the berth or within the restricted navigation area.

SHIPMASTER'S REPORT: December 1979 (Updated 1988).
Pilotage: Pilot flies out from Sharjah by helicopter and he carries out all entry procedures. He will also take mail ashore for delivery to vessel's Agents. Mail must be placed in one envelope, addressed to Agents and marked ship's mail.
Tankers: Loading rate commences at 1,000 t.p.h. and when everything satisfactory increased to max. 2,000 t.p.h. Normal parcel is 500,000 bbls. ±0.0%. If vessel requires a plus % then give a Note of Protest to the Pilot.

AUTHORITY: Crescent Petroleum Company, P.O.Box 211, Sharjah, U.A.E. *Tel:* Sharjah 543000. *Telex:* 68015 Crespt EM. *Cables:* "Crespt Sharjah". *Contact:* Captain M. B. Harvey, Port Captain.

AGENT: Gulf Agency Co. (Sharjah) W.L.L., P.O.B. 435, Sharjah, U.A.E. Cables "Confidence", Sharjah. Telex 68019 ("Gacshj EM"). Telephone: 544446. After office hours 354249.

MUBARRAS ISLAND, Abu Dhabi: 24.26. N. 53.32 E (HALAT AL MUBARRAS) (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
2 Manifests.
1 International Maritime Declaration of Health.

FLAG: All vessels calling at Mubarras are required to fly the national flag of U.A.E. which are available from ship's Agent.

LOCATION: Mubarras Island is located approximately Lat. 24° 28′ N., Long. 53° 22′ E., some 55 miles West of Port of Abu Dhabi.

The island constitutes export terminal of crude oil produced by Abu Dhabi Oil Company Limited (Japan). Crude oil produced from the Company's Mubarras oilfield is transported to Central Facilities Platform (CFP) situated approximately 19 miles E.N.E. of Mubarras Island by 4 in. to 14 in. flowlines, thence relayed by a 18 in. transmission line to the Island. The Company has tank storage for 2,238,000 barrels of crude oil on the island.

Tanker loading is accomplished by means of a single-buoy-mooring (SBM) system installed about 8 miles offshore East of the Island.

Average API Gravity of crude oil to be located is 36.5° and flash point is below 35° Fahrenheit.

PORT LIMITS: The port area of Mubarras and its approaches cover the area bounded by straight lines connecting the following points:
(a) Lat. 24° 30.0′ N., Long. 53° 36.0′ E.
(b) Lat. 24° 24.0′ N., Long. 53° 36.0′ E.
(c) Lat. 24° 24.0′ N., Long. 53° 27.0′ E.
(d) Lat. 24° 26.7′ N., Long. 53° 21.7′ E.
(e) Lat. 24° 30.0′ N., Long. 53° 21.7′ E.

Masters of all vessels entering the Port must follow instruction from the Company's Port Master as to approaches, anchoring, berthing and unberthing.

APPROACHES: *Approaches to Mubarras:* Japanese Charts No. 3173 and No. 3174 cover the approaches to Mubarras. For tankers arriving at Mubarras without necessary charts full information shall be given by telegram if a request is sent to "Confidence" Abu Dhabi via "A9M" Bahrain Radio a few days before arrival.

Alternatively, if the vessel has VHF, the buoy positions shall be given to her upon request to "Mubarras Terminal" as she approaches but prior notice of requiring this service should be given in the vessel's arrival message.

Charts: The following charts are recommended for use in Abu Dhabi waters:

Japanese Chart Nos. 3173 and 3174
British Admiralty Chart Nos. 3733, 3734, 2889 and 3716.

Approaches to Mubarras – Navigational Aids:

Buoy Nos.	*Latitude North*	*Longitude East*	*Colour*	*Light Character*
Mubarras Approach	24° 57.00′	53° 18.39′	Red	Fl. R.ev. 5 sec.
Mubarras Entry	24° 52.34′	53° 18.42′	Red	Fl. R.ev. 10 sec.
1	24° 49.44′	53° 17.29′	Green	Fl. G.ev. 10 sec.
3	24° 43.89′	53° 21.60′	Green	Fl. G.ev. 5 sec.

8	24° 26.20′	53° 36.40′		
			261	3.10
9	24° 25.70′	53° 33.05′		
			Total Distance:	46.25

Anchorage Position	Lat. 24° 26.80′ N.	Long. 53° 34.00′ E.
S.B.M. Position	Lat. 24° 25.98′ N.	Long. 53° 31.54′ E.

Navigation in Shallow Waters: There are some shoals with depth of 14.9 m. (49 ft.) in the area between Buoys No. 14 and No. 15. Masters of outgoing vessels should pay due consideration to the effect of squat at speed on vessel's draft in the shallow water, bearing in mind vessel's trim.

Conspicuous Marks: Quick flash white navigation lights (visibility range 5 miles) are fixed on following platforms and the flare stacks adjacent to each platform are visible from distance:

MR-6 Platform	Lat. 24° 35′ 44″ N.	Long. 53° 43′ 53″ E.
CFP	Lat. 24° 30′ 09″ N.	Long. 53° 42′ 09″ E.
AA Platform	Lat. 24° 26′ 10″ N.	Long. 53° 39′ 55″ E.

PILOTAGE: Pilot is provided by the Oil Company at the request of the vessel's Master based on express understanding and condition that he is aboard the vessel for the purpose of assisting the Master and becomes, for such purpose, the servant of the owners of the vessel.

It is recommended that the Master of the vessel calling at Mubarras for the first time requests Pilot to go aboard the vessel for both inward and outward passage of the channel. The Pilot will normally board the vessel in the vicinity of Buoy No. 5 and will advise the Master on approaches to the berth and he will remain on board to act as Mooring Master and direct loading operations.

Mooring Master: The Mooring Master provided by the Company will undertake pilotage, mooring and unmooring of the tankers.

The Mooring Master shall board vessels to be moored at SBM in the anchorage area or in the vicinity of Buoy No. 17. The Mooring Master will advise the Master of vessel on approaches to the SBM, mooring, unmooring, connecting and disconnecting hoses and all other operations within the port area. All manoeuvring of vessels within the port area shall be done only in accordance with the advice of the Mooring Master, subject to the understanding that in all cases and circumstances the Master of the vessel shall remain solely responsible for the safety and proper manoeuvring of the tanker. Master or one of his qualified deck officers must be on the bridge at all times while the vessel is being manoeuvred.

ANCHORAGE: The tanker anchorage is within 0.5 miles radius of Lat. 24° 26.8′ N., Long. 53° 34′ E. Depth of water varies from 15.5 to 18 m. (50 ft.to 59 ft.) The sea bed all around the anchorage is coral with approximately 6 ft. of loose sand. Holding is poor and a vessel is advised to pay out at least six shackles of chain.

Vessels will be advised by radio of a suitable anchorage if both anchorage and the berth are not immediately available. Vessels should under no circumstances anchor or wait at the South area of Lat. 24° 57′ N. without obtaining prior approval of the Port Master.

Anchorage for Dry-cargo Ships: Anchorage for dry-cargo ships is directed by Port Master by VHF radio.

Prohibited Area for Navigation and Anchorage: The area within 1.15 miles radius from CFP is prohibited for navigation and anchorage. No vessels shall anchor within the range of 1.5 miles from submarine pipe-lines.

MAX. SIZE: See "Approaches" – depth over shoal areas; also see "Tides".

HEALTH: Vessels arriving at Mubarras Terminal must carry the usual Bills of Health for ports visited on the voyage. Masters of vessels are requested to inform the Company if there is any person ill on board or if there has been sickness within the week prior to arrival.

Pratique is usually granted by Port Medical Officer through the Mooring Master or Agency Clerk.

RADIO: *Notice of Arrival:* Vessels should advise their ETA Mubarras at least 72 hours and again 24 hours before arrival through normal radio service. As an alternative to the route through Bahrain Radio Station (A9M) vessels may send their first message through Singapore or Bombay.

Confirmation of ETA should be made a few hours before arrival at "Approach Buoy" by calling "Mubarras Terminal" on Channel 16 VHF. After anchoring, vessels should advise their time of anchoring through VHF and thereafter maintain a continuous listening watch on Channel 16 until the Company's Mooring Master boards.

Tankers bound for Mubarras should advise their ETA and other information 72, 48 and 24 hours before arrival.

Vessels may find it helpful to route their first message through Singapore, Bombay or Bahrain Radio Station. All cables should be addressed to the Company through ship's Agent.

The first message should be sent according to the following form, but any items which are the same with a recent previous voyage to this port may be omitted.

(1) ETA Mubarras.
(2) Last Port.
(3) Next Port.
(4) Deballasting time.
(5) Quantity of cargo required.
(6) Maximum loading rate.
(7) Diameter of cargo manifold.
(8) Distance from manifold to ship's side.
(9) Derrick capacity.
(10) Diameter of fairlead.
(11) Name of Master.
(12) Number of crew.
(13) Whether Pilot is required or not.

Radio Station in Mubarras Terminal Office.

Short-range communication to Mubarras Terminal Office can be made by calling "Mubarras Terminal" on VHF radio telephone. Vessels should inform the office with their ETA preferably when they pass the Strait of Hormuz. After anchoring, vessels should advise anchoring time and maintain a listening watch on Channel 16 until Mooring Master boards.

Call Sign: "Mubarras Terminal".

Frequency:	*Reception*	*Transmission*
F3	Channel 16	Channel 10, 12, 14

Operating Periods: Round the clock.

BALLAST: All vessels arriving at this port are required to have on board sufficient clean ballast to give a safe draft for manoeuvring purposes. Vessels arriving with insufficient ballast may be required to increase the quantity, should the Mooring Master consider that it would not be safe to berth the vessel for loading. As a general rule, vessels shall not start discharging ballast until mooring is completed.

Upon completion of deballasting the Mooring Master will inspect the tanks. If the tanks are not satisfactory, he may require further pumping until such time as they meet the required standard.

It is strictly prohibited to discharge oil, oily water or other refuse that may result in pollution of the sea. International oil pollution regulations must be strictly observed by all vessels. *The terminal does not have facilities to receive oily ballast.*

TUGS: One tug/workboat is always available for use for marine operations at this port and one mooring boat is available during loading.

BERTH: *Position of Buoy:* Lat. 24° 25.98′ N., Long. 53° 31.54′ E.
Depth of Water: 15.5 m. (50.85 ft.).

The berth is a single-buoy-mooring system consisting of a buoy 44.32 ft. (13.5 m.) in diameter, moored to 6 pendant legs of 3 in. high strength chain shackled to anchor piles at a radius of 855 ft. (260 m.), and having a rotating deck carrying the pipe-line and mooring connections.

One 32 in. crude oil line has been laid approximately 52,500 ft. (16 km.) from the shore to a position close under the buoy. From the underwater manifold the crude oil goes to the buoy through a 20 in. underwater hose. The connection between turntable piping of SBM and tanker manifold consists of 1 hose string composed of 24 in. and 20 in. (Length 770 ft.) floating hoses and 2 hose strings composed of 16 in. (Length 120 ft.) tail hoses.

LOADING: The maximum loading rate of crude oil is 32,700 bbls./hr. or 5,200 kl./hr.

Notice of Readiness: The Master of each vessel should present a Notice of Readiness to load to the Company's Mooring Master who will sign it on behalf of the Company.

The Notice of Readiness should be tendered at the time of the vessel's arrival at the tanker anchorage area, which is, in principle, understood to be either the time of dropping the anchor in the anchorage, or, if the vessel does not anchor, the time that the Mooring Master boards to commence berthing.

The vessel, however, is prohibited from berthing unless she reaches Buoy No. 5 at least 5 hours before the sunset, and Notice of Readiness will not be accepted until the next sunrise even if the vessel has already anchored in the tanker anchorage area.

Notice of Readiness will not be accepted during periods when the port is closed. The port is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with Port Master.

When the vessel is ready in all respects for loading the ship's officer must inform the Mooring Master who will transmit the necessary messages to the control room on shore. Mooring Master is authorised to control all the loading operations.

All cargo documents and shore figures are usually prepared on board and the Mooring Master will sign the documents on behalf of the company

MOORING: The Company reserves the right to refuse to accept for berthing or loading any vessels considered unsuitable by reason of inadequate or unsatisfactory mooring equipment, insufficient derrick capacity, unusual manifold connection, inability to comply with the Safety Regulations, or any circumstances which would create unusual risk to the Company's berth, facilities, personnel and equipment whatsoever.

Preparation: Before Mooring Master boards, vessels should have ready the following:

(a) Jacob's Ladder on lee side.
(b) Hawser 1 each at fore and aft deck, polypropylene if possible.
(c) 1 steel crowbar.
(d) Port derrick with double wire rigged for minimum lift 5 tons.

After vessel is anchored, the Company's mooring and hose connection crew will board and pick up mooring and hose connection materials from tug/workboat. Vessel is requested to provide windlass and winch operators.

Mooring at Berth: Unless pilotage is required the Mooring Master will board the arriving vessels in the anchorage area. Vessels are requested to have pilot ladder safely and securely rigged ready for immediate use and long enough to meet the Mooring Master's launch. Vessels should have their crew standing by ready to receive mooring and hose connection materials and should maintain a lee until this is completed. Mooring Master will instruct the crew in the setting up of the forward mooring.

2 bollard ropes are made fast round the port bitts with their attached shackles about 5 ft. inboard from the fairleads as far forward as possible. The size of the fairlead opening should be at least 300 mm. (12 in.) to prevent chain from jamming in the fairleads.

Attached to the mooring connections on the buoy are two 18 in. nylon ropes (144 mm. dia., breaking strain 250 tons). These ropes are 50 m. long, and have at their free end a length of stud link chain which includes enlarged end link for receiving the shackles used on the deck of the tanker. From the outer end of this chain there are connected 2 mooring lines consisting of pick-up wires, pick-up ropes and a towing rope (port side only). The nylon rope is supported by "doughnut" floats and the chain is hung by large plastic buoys 5 ft. in diameter and coloured red and yellow.

Hose Connection: After completion of mooring the boat which has been holding the hoses clear during berthing will bring the floating hose to the ship's side and connect the derrick runner to the balance buoy. These are lifted aboard one by one and connected by distance piece which was already connected to vessel's manifold by hose connection crew during mooring operation.

Unmooring: After the hose disconnection is completed, mooring ropes are slacked off and then dropped into the water. Tug/work-boat will come alongside either before or after the vessel backs off the berth, whichever is convenient, and will receive mooring and hose connection materials.

TIDES: The maximum tidal range in this area is 6 ft., the average tidal range at the Spring tide 3 ft. and the Chart Datum is 0.7 ft. below ISLW. Tidal stream is variable according to the place and the lay of the land. But the flowing tide usually runs South-Eastwards and ebbing tide North-Westwards. Speed of a current is around 2 knots at the highest.

"Tide and Current Table" is published annually by the Company, applicable to Mubarras and the surrounding area, and will be obtained on application to the Company.

WEATHER: Local weather at Mubarras is almost similar to that of Jebel Dhanna and Abu Dhabi City, being extremely hot and humid in Summer. Temperature sometimes soars as high as 50° Centigrade with almost 100 per cent humidity in July and August.

MEDICAL: The Company operates a small clinic at Mubarras. Master may obtain medical attention for ship's personnel from the ship's Agent who may in the case of serious illness or injury recommend treatment at the Abu Dhabi government hospital. The ship owner will be charged for all expenses incurred.

FRESH WATER: Not available at Mubarras except in case of extreme emergency.

FUEL: Not available.

CONSULS: No consular business is available at Mubarras. However, various countries have representations in Abu Dhabi.

REPAIRS: There are no repair facilities at Mubarras. However, radar and electronics repairs are available in Abu Dhabi and technicians can be sent to Mubarras for repairs through notifying the ship's Agent.

SURVEYORS: Lloyd's, ABS, Veritas Surveyors are available in Abu Dhabi and they can be brought in if ample notice is given to ship's Agent.

CUSTOMS: Under normal circumstances Customs Officers do not board tankers at this port but upon arrival the Master is required to submit to the Customs through the ship's Agent a manifest of any cargo to be landed at Mubarras.

After loading is completed the Mooring Master will sign on behalf of Customs an outward manifest and issue the port clearance. These will be handed to the Master by the Agent.

REPATRIATION: Not possible.

TIME: Local standard time at Abu Dhabi is GMT plus 4 hours throughout year.

FIRE-FIGHTING: Tug/workboat stationed at Mubarras Island is equipped for fire fighting and is usually on emergency stand-by during tanker loading operations.

GENERAL: *Engine:* The main engines and all gear must be in an operable condition and in a state of immediate readiness whilst the vessel is on the berth.

Stores: Provisions and deck stores not available.

Divers: The services of the Company diver may be available to vessels where it is essential that a diver's services are required to enable a vessel to sail. All requests for such services should be routed through the ship's Agent to the Port Master.

Currency: All currencies approved except Israeli.

Mail: Mail can be received and sent through ship's Agent.

Dry Cargo Discharge: A "T" shaped jetty at Mubarras Island can accommodate a vessel with maximum 12 ft. draft. Discharge of dry cargo must be arranged well in advance through ship's Agent in Abu Dhabi who will supply labour and barges from Abu Dhabi. No gear whatsoever is available at Mubarras.

SAFETY:

No Smoking: Smoking on board the ship is strictly prohibited except in the smoking room situated in the aft accommodation and which has been jointly agreed between the Mooring Master and the Master.

The responsibility for the strict observance of the safety of these rooms rests with the ship, and the Company reserves the right to prohibit smoking in these rooms also should situation require at any time.

Accommodation: All accommodation doors, port holes and ventilators must be closed during loading operations, and doors and openings to machinery spaces in vicinity of ship's tanks are also to be closed.

Galley and Boiler Fires: As a general rule, the use of galley and boiler is not permitted. However, those appropriately equipped are considered safe for use, and their use will be mutually agreed between the Master and the Mooring Master.

Radio Equipment: Radio. radar or other electronic equipment must not be energized while the ship is on the berth.

Air-conditioning Units: For safety, it is preferable that these units recirculate the air within the accommodation but their use when drawing air from outside the accommodation may be permitted provided that the Master and the Mooring Master agree that no danger exists. Should any gas be detected within the accommodation or should there be any danger of gas within the accommodation these units must be stopped and the intakes closed. Window-type air-conditioners are forbidden at all times.

Ship's Fire-fighting Equipment: This equipment must be in constant readiness at all times with sufficient people on board for its efficient operation.

Fire Watches: While the vessel is within the port area a continuous and efficient fire watch shall be maintained on deck and in the engine room by the ship's crew. Fire-fighting equipment shall be in instant readiness throughout the vessel and additional extinguishers must be available at the loading manifold while hoses are being connected and disconnected. Water should be available on deck service lines at all times and fire hoses connected at all fire stations for immediate use.

Swimming: No swimming in the sea berth area is permitted while vessels are on berth.

AUTHORITY: Abu Dhabi Oil Co. Ltd. (Japan), P.O.Box 630, Abu Dhabi, United Arab Emirates. *Tel:* Abu Dhabi 661100. *Telex:* 22260 Adoco EM. *Cables:* "Oiljapan Abu Dhabi". *Contact:* Mr. A. Yamashiro, Manager – Marine & Transport.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd. are appointed by Abu Dhabi Oil Co. Ltd. (Japan) as exclusive shipping Agents for all vessels calling at Halat Al Mubarras Terminal. The address particulars are as follows:

National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., P.O.B. 377, Abu Dhabi, United Arab Emirates, Cables: "Confidence", Abu Dhabi. Telex: 22248 ("Gacauh EM"). Tel.: 334300 (10 lines). Fax: 339350. After office hours 326083.

ETA messages shall be sent to National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., cable address: "Confidence", Abu Dhabi, via Dammam Radio.

Under favourable weather and transmitting conditions communication can also be performed over the VHF radio on the following frequencies: standing by on Channel 16 (156.8 MHz) and transmitting on Channel 10, call sign "Confidence", Abu Dhabi.

PORT RASHID, Dubai: 25.16 N. 55.16 E. (See Plan)

FLAG: U.A.E.

DOCUMENTS: The following should be airmailed to Agent prior to ship's arrival.

8 Dangerous Cargo Lists.
3 Stowage Plans.
3 Hatch Lists.
8 Cargo Manifests.
1 each Bill of Lading.
3 Crew Lists.

APPROACHES: Black and white Pillar Buoy, flashing every 10 secs. in position Lat. 25° 21′ N., Long. 55° 14′ E. Marked "Dubai Approach".

Main light in position Lat. 25° 13.5′ N., Long. 55° 17.3′ E. (Situated on top of the Dubai Trade Centre) Gp. Fl. (2) white every 30 secs. 157 m. above MHWST. Visible 30 miles. Also Racon Beacon with signal "TC".

Main leading lights on main breakwater front Position Lat. 25° 16.3′ N., Long. 55° 16.0′ E. Qk. Fl. every 0.5 secs. Rear Lat. 25° 15.5′ N., Long. 55° 16.0′ E. Occ. every 2 secs. Breakwater Entrance. Lee light Fl. (R) every 2.5 secs. Main light Gp. Fl. (2) green every 30 secs.

PILOTAGE: Compulsory. Pilot will board 24 hours a day, from a launch and a regulation pilot ladder must be provided, with manropes, and a lee given. Large vessels calling should provide an accommodation ladder with its lower platform within about 12 ft. above the waterline and a pilot ladder rigged on ship's side adjacent to the accommodation ladder platform.

The Master must sign the indemnity form provided by the Pilot before entering the harbour.

ANCHORAGE: Vessels should contact Dubai Port Control VHF, Channel 16 shifting to a working Channel as instructed. Failing instructions they should anchor approximately 2 miles from the port entrance. Holding ground – Generally poor.

RESTRICTIONS: Minimum depth in channel 13 m. Max. rise and fall 2.0 m.

Vessels not working cargo immediately may enter port at the discretion of the Port Authority. Vessels may leave at any time.

MAX. SIZE: Depth alongside at Port Rashid Container Terminal is 13 m. and the tide is not expected to go as low as zero height on average more than 55 days in any one year. Therefore, Port Rashid Authority are prepared to berth vessels up to 42 ft. draft, at minimum speed at all times, provided vessels can discharge in such a manner as not to trim so as to cause an increase in maximum draft.

Maximum draft at general cargo berths is 37.7 ft. Depths of water at general cargo berths varies from 30.5 ft. – 37.7 ft.

Vessels in excess of 850 ft. length overall will be berthed at the Harbour Master's discretion.

Port Rashid Authority consider that keel clearance is at the Master's discretion, and are prepared to berth vessels with minimum keel clearance of six inches.

TUGS: Three tugs of 2,400 h.p. are available with fire-fighting, pollution and salvage facilities, the practice being to secure alongside with 2 tug ropes therefore, gangway and derricks should be secured in-board.

Tugs are fitted with VHF. Contact should be made via Dubai Port Control or the Harbour Master.

RADIO: The Port Signal Station (call sign "Dubai Port Control") is fully equipped with VHF radio and watch is maintained 24 hours per day on Channel 16, switching to Channel 12 for port operations.

The Signal Station is situated at the seaward end of Berth No. 1 at a height of 57 ft. above sea level.

Vessels should contact the signal station by VHF Channel 16 and request berthing instructions.

Vessels should advise their Agents the arrival time, LOA, draft and position of bunkering points should bunkers be required. Amended ETA should be advised by VHF. Vessels Agents will in turn pass on the above information to the Port Authority.

HEALTH: Normal quarantine regulations apply and Pratique can be given by the Pilot on cargo vessels, always subject to the Health Authorities approval. Health Authorities only board when the vessel is alongside, except in the case of a suspected ship.

BERTHING: Vessels should advise the port of their ETA, length overall and draft as early as possible. The port should also be advised of any explosives or hazardous cargo on board to determine if it should be offloaded before berthing or otherwise.

Berth Information: A restricted number of vessels may anchor within the harbour breakwaters under instructions from the Harbour Master if so required and may discharge/load ex-lighters.

Berth Nos.	*Length*	*Depth of Water (MLWS)*
1-4	4×573 ft. (2,294 ft.)	No. 1 33 ft. No. 2 32 ft.
3-4		30 ft. 6 in.
5	600 ft.	30 ft. 6 in.
6-10	5×601 ft. (3,008 ft.)	No. 6-8 30 ft. 6 in. No. 9-10 35 ft.
11-15	5×599 ft. (2,996 ft.)	30 ft. 6 in.
16	700 ft.	37.7 ft.
17-24	8×600 ft. (4,864 ft.)	37.7 ft.
25	490 ft.	37.7 ft.
26-27	2×515 ft. (1,031 ft.)	37.7 ft.
28-30	3×597 ft. (1,792 ft.)	37.7 ft.
31-32	2×717 ft. (1,434 ft.)	No. 31 37.7 ft. No. 32 42 ft.
33-35	3×993 ft. (2,981 ft.)	42 ft.
S.O.T.		37.7 ft.
Depth over pipeline		37.7 ft.

General Cargo: 30 deep water berths with 17 storage sheds (each 120 m. × 60 m.) adjacent are available plus a coastal berth for small craft and vessels with less than 6.10 m. (20 ft.) draft. All berths are backed by extensive hard surface yard storage area.

Container Terminal: Comprising of Berths 31-35 with quay length of 1,350 m. served by 2×Tango 80 gantry and 2×Mitsubishi gantry cranes of 35 ton capacity and 2×Mitsubishi gantry cranes of 50 tons capacity. Storage area of 45 hectares with 6×CFS sheds on terminal of 400×200 ft. each.

Depth alongside: 13 m.

Working hours: 0700 to 1830 and 1830 to 0700 daily.

16 straddle carriers radio linked to controller 24 terminal/Ro-Ro tractors.

3×25 ton forklifts (2 Ro-Ro masted)

120×roll trailers

Bunkers and water available alongside.

Computer controlled stacking areas and container tracking available to Agents/Owners.

FRESH WATER: Available at all berths. Rate 20 t.p.h. per hose.

FUEL: Shell Bunker Fuels are available at Berths Nos. 1 to 4, 6 to 9 and 17 to 38 in addition to Tanker Berth and include fuel oil, thin fuel oils, diesel and gasoil, pumping rate 300 t.p.h.: 48 hours' notice should be given to local Agents or Shell Markets (M.E.) Ltd., P.O.Box 307, Dubai. Tel: 450451; Telex: 5478 DB; Cables: Shell Dubai. Marine Lubricants and chemicals are available for delivery to the ship.

Delivery of fuel oil and gas oil at the Petroleum Jetty via 12 in. loading line at up to 500 long t.p.h.

TANKERS: Berth operated by Shell Markets (M.E.) Ltd. Capable of taking vessels up to 260 m. long. Max. draft 11.3 m., vessels of 11.3 m. but not over 11.6 m. draft may be berthed by arrangement with the Harbour Master at HW.

Slop barge with capacity 2,500 tons available.

CARGO HANDLING: *General Cargo Working hours:* Saturday – Thursday, 1st shift: 0700 – 1400 hrs. Special shift: 1400 – 1600 hrs.; 2nd shift: 1830 – 0030 hrs. Special shift: 0030 – 0530 hrs.

Container Terminal: Shift arrangement. 0700-1830, 1830-0700 seven days a week, 365 days a year.

Working hours are at the discretion of the Port Operations Manager.

Cargo is handled on Fridays and most Public Holidays. The Port Operations Manager may require full night work or special shifts in the interest of the Port.

Refrigerated cargoes should be stowed consignment by consignment, to facilitate discharge and Direct Delivery to consignees.

Each general cargo berth is provided with fork-lift trucks and tractor units and trailers.

Pallets are provided free of charge to assist cargo handling.

Cargo is discharged direct to sheds or to storage areas where mobile cranes varying from 5 to 25 tons lift and F.L.T.'s of 3-7 tons capacity operate.

STEVEDORES: Ship's gangs are available for distribution to vessels through Agents, vessels should advise their requirements before arrival. The gangs board and operate under the supervision of ship's officers. No quay cranes are provided, so ship's derricks/cranes must be used, together with cargo handling equipment. A close liaison should be maintained with the Cargo Superintendent or shed supervisor at all times.

Lighterage: When berths are fully occupied, vessels may discharge/load ex-lighters at anchorage.

MEDICAL: A comprehensive range of medical and dental services are available at Dubai.

AIRPORT: International airport, 3.2 km.

SURVEYORS: Lloyd's Agents, Lloyd's Register of Shipping, American Bureau of Shipping, Germanischer Lloyd, N.K.K., Caleb Brett and Salvage Association.

DRY DOCK: *Dubai Dry Dock:* A complete ship repair facility East of Port Rashid. Vessels up to 1,000,000 d.w.t. can be docked. Approach areas dredged to 11.5 m. enclosed by breakwater.

Dock No. 1	370 m. × 66 m.	(350,000 tonnes)
No. 2	525 m. × 100 m.	(1,000,000 tonnes)
No. 3	415 m. × 80 m.	(500,000 tonnes)

Dockside Cranes:

2 × 120 tonnes Safe working load at 65.5 m. radius.
1 × 25 tonnes Safe working load at 80.0 m. radius.
2 × 15 tonnes Safe working load at 70.0 m. radius.

Tank Cleaning: Facilities available.

REPAIRS: Galadari Engineering; P.O.Box 355, Dubai; Tel: 660803, Telex: Gabros DB 5443; Al Nasr Engineering Co. P.O.Box 1106, Dubai; Tel: 223624; Telex: 5638 DB; Cables: Alnasr – Dubai, and the services of the large Dry Dock Complex capable of accepting vessels up to 1,000,000 d.w.t. offer round the clock service which ranges from major boiler repairs to repair of main diesel engines and auxiliaries, underwater welding, shot blasting hull cleaning and diving services. Gulf Lux Marine Services Ltd., offer a wide range of in-water service including scraping, blasting and recoating. Technical Engineering and Marine Services (TEAMS) have 1 slipway which can accommodate vessels up to 1,000 tons. They are also able to handle all kinds of engine and hull repairs.

Container repair yard located near container terminal.

JOINING/REPATRIATION: Arriving crew holding valid Seaman's Book can be cleared from the airport and placed on board on the strength of a guarantee letter from the Agent to the Immigration Office.

According to the Immigration Regulation in force Agent is required to furnish the following passport particulars to the Authorities for arranging the Transit Visa:

Full Name.
Father's Name.
Passport Number.
Place and Date of Issue.
Date of Expiry.
Place and Date of Birth.
Profession shown in the Passport.

At times Agent receives incomplete details and there were instances when Agent had to collect the full details from the transit passenger himself to process the application prior to his clearance.

It is absolutely essential that wives wishing to join their husbands onboard vessels off Dubai or Fujairah must carry a photocopy of their husband's Seaman's Book.

This is essential as if a photocopy of the husband's Seaman's Book cannot be shown to the Immigration Authorities, the wife will be repatriated immediately.

Repatriating crew can be brought ashore with a similar guarantee tendering the air ticket to the Port Immigration Office. They must be picked up from the ship 24 hours prior to departure.

Persons with South African entry stamps on their travel documents will not be allowed to enter the United Arab Emirates.

TELEPHONES: Situated in sheds, no connection made to vessels.

SHORE LEAVE: Agents collect all passports on vessel's arrival, together with 3 copies of Crew List. Temporary shore leave passes are issued by the Immigration Office against passports and Crew Lists.

EMERGENCY CO-ORDINATION CENTRE: Coastguard located adjacent port. Tel: 450520.

SHIP SUPPLY SERVICE: Crew changes, delivery of ship's mail, stores, spares, etc., can be effected by service boats off Dubai or Fujairah. This service is carried out by Gulf Agency Co. (Dubai) Pvt. Ltd. See "Agent".

STORING: Complete shipchandling facilities available at short notice (via Agent).

DEVELOPMENTS: Expansion of the Container Terminal Yard to incorporate areas of land presently outside the Terminal.

AUTHORITY: Port Rashid Authority, P.O. Box 2149, Dubai, U.A.E. *Tel:* 451545 (PABX all depts.) *Telex:* 47530 ("Pra Em"). *FAX:* 450934. *Contact:* J. Arundell, General Manager.

AGENT: Gulf Agency Co. (Dubai) Pvt. Ltd. P.O.B. 2404, Dubai, U.A.E. Cables: "Confidence", Dubai. Tel: (971-4) 457555 (12 lines – 24 hour service). After office hours 480424, 440193, 582859. Telex: 45448, 45809 ("Gacdb Em"). Fax: 457202. Radio: Marine VHF radio, stand-by on Channel 16 (156.8 MHz) and SSB 2182 kHz, Call sign "Confidence, Dubai".

Operators of ship-servicing and supply organisation: Crew changes, mail, spares and/or delivery of provisions undertaken at sea without deviation to serviced vessel.

Owners and Masters should contact G.A.C. Dubai by cable or telex regarding servicing requirements. Rendezvous positions are selected by Shipmaster.

RAS AL-KHAIMAH: 25.45 N. 56.01 E.

There is a jetty, length 100 m., suitable for berthing smaller vessels, which is protected by a breakwater, and dredged to a depth of 3 m.

This is a small port for very small vessels only. *All* cargo vessels with cargo for Ras Al-Khaimah should assume discharge/loading will be carried out in Mina Saqr. For all other information, see entry for Mina Saqr.

Also see "Mina Saqr".

AUTHORITY: Ras Al-Khaimah Port Services, P.O.Box 5130, Ras Al-Khaimah, U.A.E. *Tel:* 66444. *Telex:* 99280. *Cables:* Minasaqr. *Contact:* Captain Hazem Raouf Assaad, Port Manager.

AGENT: See "Mina Saqr".

SHARJAH (Mina Khalid): 25.22 N. 55.24 E. (See Plan)

DOCUMENTS: The following documents must be in the possession of the ship's Master on arrival or must be forwarded to ship's Agent prior to ship's arrival:

Immigration: The U.A.E. Immigration Department's office in Port Khalid, Sharjah operates 24 hours, 7 days per week. Master to submit Crew List, photographs of each crew member (photos not returned) and Passports/C.D.C. to Immigration Office on arrival. Passport/C.D.C. will be returned to vessel before sailing. Joining/leaving crew must report to the Immigration Office before proceeding to vessel/airport.

Customs:

2 Crew Lists.
2 Passenger Lists.
2 List of Alcoholic Beverages.
2 Cargo Manifests.

Port Operations:

2 Cargo Manifests.
2 Dangerous Goods List.
2 Stowage Plans.
Certificate of Registration.
Classification Certificates.

The original of all the ship's Certificates shall be produced to any Port Official on demand. Where a ship is more than 15 years old, a valid Certificate of Condition issued by a recognised Surveyor shall be on board.

Where Certificates are found to be invalid, the ship may be removed from the Port Area, at ship's expense and re-entry permitted only after validity has been established.

Failure to produce any Certificate to a Port Official when demanded renders the Master liable to a fine of up to DH. 5000, and the removal of the ship from the Port Area.

PILOTAGE: Pilotage is compulsory for all ships entering and leaving the deep water harbour. On entry, Pilots will board to seaward of the Fairway Buoy; a pilot ladder should be provided. Port Khalid operates a 24 hour, 7 day week pilotage service. Notice is required before 2200 hrs. for pilotage requirements between 2400 hrs. and 0600 hrs.

ANCHORAGE: The Fairway Buoy in position Lat. 25° 22.9′ N. Long. 55° 22.9′ E. is a red and white pillar, Isophase every 6 secs. Vessels approaching should await Pilot to seaward of Fairway Buoy, anchoring if necessary.

Protected Anchorage: A limited number of vessels may anchor at moorings within the deep water harbour with prior approval of the Port Operator.

MAX. SIZE: Approach channel dredged to 12.0 m. MLLW. Max. draft 11.5 m.

HEALTH: Normal Quarantine Regulations apply.

Radio Pratique will be granted on receipt of radio message from Master, via his Agent, stating that no serious illness has occured during the preceding 30 days. All crew members must be in possession of valid cholera certificates. The Health Officer will only board when the vessel is alongside.

RADIO: *Notice of Arrival:*

Vessels should advise their Agent ETA Port Khalid, giving draft, LOA, and intended cargo operations to be performed, at least 72 hours prior to arrival.

Agents should arrange berthing and labour with the Port Operator.

VHF: Vessels should contact Port signal station on VHF Channel 16 (call sign "Sharjah Port Control") when within range. Working Channels 6, 12, 13, 74 and 67.

TUGS: Tug services are available for all ships entering the deep water harbour. At the discretion of the Port Operator ships may be obliged to use the services of a tug or tugs.

Tugs are fitted with VHF.

The harbour tugs are fitted with fire fighting hoses and monitors and foam tanks.

BERTHING: Arrangements made with Harbour Master by ship's Agent for necessary berthing as required.

Berth No.	*Depth at MLLW*	*Usage*
1A	11.5 m.	Containers
1	10.5 m.	Containers
2	10.5 m.	Containers
3	8.5 m.	General Cargo
4	8.5 m.	General Cargo
5	9.5 m.	General Cargo/Ro-Ro
6	9.5 m.	General Cargo/Ro-Ro
7	9.5 m.	General Cargo/Ro-Ro
8	8.5 m.	Reefer
9	8.5 m.	General Cargo/Reefer
10	8.5 m.	General Cargo
11	9.5 m.	General Cargo

Total length Berths No. 1A, 1 and 2 – 575 m. Total length Berths No. 3, 4, 5, and 6 – 725 m. Deep water Berth No. 6 – 274 m. Berth No. 7 – 220 m.

Total length Berths No. 8 and 9 – 360 m. Berth No. 10 – 210 m. Berth No. 11 – 195 m.

Equipment: The Sharjah Container Terminal (SCT) which comprises Berths No. 1A, 1 & 2 in the deep water harbour is equipped with 2 Liebherr T115 35 tonne gantry cranes; 2 Valmet 30 tons SWL transtainers. SISU TV10 tugmaster tractor units for Ro-Ro top lift container handlers and forklifts; LCL facilities available; 44 reefer points for containers. These berths are also equipped with specialised equipment to handle containers in the storage area. Each berth is provided with fork lift trucks, trailers and yard hustlers to facilitate the movement of cargo. Pallets are available to assist cargo handling. 2 heavy lift mobile cranes of 40 tons and 90 tons capacity are available on request from the Port Operator. Other equipment, including cranes, trailers, etc., will be made available upon request to the Port Operator with 24 hours' notice.

Lighterage; Lighterage services are available.

Storage Facilities: Storage facilities consists of 11 sheds (2 of which are located in the Container Terminal area) having an area under roof of 28,000 sq.m. In addition, hard surfaced yards and Sharjah Container Terminal Stacking/Packing area provide extensive storage capacity.

Cold Store: A 5,000 ton capacity cold store (frozen and chilled) is located at Berth No. 8 with mechanical handling from ship's hold to store. Second cold store of 3,500 tons capacity also available.

STEVEDORES: The port will operate on a 24 hour, 7 day week basis ashore and afloat. Additional charges will apply outside normal working hours which are defined as follows:

Saturday to Thursday except public holidays.

First shift	0600 to 1400 hrs.
Second shift	1400 to 2200 hrs.
Third shift	2200 to 0600 hrs.

Overtime Rate Applicable:

General Cargo/Container Vessels: 3rd shift, Fridays and holidays.
Reefer Cargo Vessels: Fridays and holidays.
Car Carriers: Nil.

Normal working hours are subject to change during Ramadan, when working hours will be at the discretion of the Port Operator.

Requirements for port labour must be submitted by ship's Agent to the Port Operator by 1600 hrs. for work during the first shift on the following day and by 1100 hrs. on the same day for work during the second and third shifts.

MEDICAL: Upon application to ship's Agent, medical examination of crew members can be arranged. Personnel will either be sent to private Doctor or to Public Health Department, as circumstances dictate. Serious cases will be referred to Government Hospital Doctor. Distance to Al Qassemi Hospital in Sharjah is 8 km.

TANKERS: Tanker jetty situated in harbour on main breakwater. Max. size 60,000 d.w.t. Max. draft 9.5 m. Limited bunkering facilities.

DENSITY: 1025/1028.

FUEL: Deliveries of fuel oil, gas oil or blends may be arranged through vessel's Agents. Marine lubricants will be delivered to ship's side. Both services require 48 hours' notice.

FRESH WATER: Fresh water is obtainable at all berths.

REPAIRS: Good facilities for repairs. Divers available. Largest vessel for repairs 220,000 d.w.t.

DRY DOCKS: None.

SURVEYORS: Services are available upon request.

REPATRIATION: Proximity of Sharjah International Airport will permit efficient crew changes and repatriation. Off-shore crew changes facilities can be arranged.

Transit visas are not required for crew changes. Ship's passengers require a valid visa for transit or temporary stay.

AIRPORT: Dubai and Sharjah. Distance to Sharjah International Airport is 15 km.

HOLIDAYS: The following are days that will be observed as public holidays. Premium tariff rates will apply on these days.

1st January	New Year's Day
*16th March	Ascension of the Prophet Night
*17th May	
*18th May	Eid al Fitr
*19th May	
23rd July	Arafat Day
*24th July	
*25th July	Eid al Adha
*26th July	
*6th August	Ascension Day
*14th August	Hiriji New Year
25th October	Prophet's Birthday (Eid al Mawled)
2nd & 3rd December	U.A.E. National Day

*Dates are subject to change from year to year.

TIME: GMT plus 4 hours. Permanent.

SHORE LEAVE: Shore leave is permitted for crew members (0800 hrs. - 2000 hrs.) provided identification card or seaman's papers are deposited with Immigration office situated in the port and collected upon return. Also see "Documents."

GENERAL: *Pollution:* The provisions of the Sharjah Maritime Law shall apply with respect to the operation of vessels in Sharjah Coastal Waters. Garbage disposal services are provided by the Port Operator and are compulsory.

Ship's Chandlers: Complete ship chandlering facilities are available, handling provisions, laundry and bonded stores.

Chart: B.A. Chart No. 3714.

National Restrictions: No alcoholic beverages, explosives, firearms or contaminated food.

AUTHORITY: Sharjah Port Authority, P.O.Box 510, Sharjah, U.A.E. *Tel:* (06) 541666. *Telex:* Seagul EM 68138. *Cables:* Seagul. *Contact:* Sheikh Saud Bin Khalid Al Qasimi, Chairman of Ports and Customs. Sheikh Abdul Rehman Bin Salem Al Qasimi, Deputy Chairman of Ports and Customs. Abdul Aziz Suleiman Al Sarkal, Director General of Ports. Mr A. Ashcroft, Port Engineer. Captain Mohammed Saleh – Port Operations Manager. Captain Maghdad Al Suwedy, Harbour Master. Mr. Simon Keen – Marketing Manager.

AGENT: Gulf Agency Co. (Sharjah) W.L.L., P.O.B. 435, Sharjah, U.A.E. Cables: "Confidence" Sharjah. Tel.: 544446. After office hours 354249. Telex: 68019 ("Gacshj EM"). Radio: Marine VHF radio, stand-by on Channel 16 (156.8 MHz). Call sign: "Confidence" Sharjah.

Air-freighted spare parts and ships' mail to Sharjah should be addressed to GAC Sharjah, but sent to Sharjah International Airport or Dubai Airport marked "Ship's Stores In Transit for M/S . . ." Certificates of Origin should follow the airwaybill or in cases of emergency be sent to GAC Sharjah, soonest after shipment. Cable "Confidence" Sharjah, of flight details and airwaybill number.

TYPE.

UMM AL NAR, Abu Dhabi: 24.27 N. 54.29 E.

(See Plan)

LOCATION: The Umm Al Nar Petroleum Port is situated at the South Eastern tip of Abu Dhabi Island and consists of 2 island type berths connected to the shore through a causeway. Vessels will use Mina Zayed and Khawer Al-Bhagi navigation channels to the Port. The total length of both channels is 16 nautical miles. Vessels will berth port or starboard side to, at the discretion of the Pilot.

APPROACHES: *Water Depths:*

The channel depths are as follows:

(a) 13.0 m. for Mina Zayed navigation channel.
(b) 11.0 m. for Khawer Al Bhagi navigation channel keeping in mind that all levels are relative to C.D.

MAX. SIZE: The 2 jetties have been equipped with marine facilities to accommodate vessels having the following characteristics:

Max. size of vessel	30,000 d.w.t.
Min. Size of vessel	5,000 d.w.t.
Length overall	170 m.
Beam (max.)	26.50 m.
Draft (max.)	9.25 m.

HEALTH: Masters will be required to produce the standard International Bill of Health.

RADIO: *Arrival Telegram Ship/Shore:* On ship's arrival at the pilot station, a telegram shall be passed to the refinery through the ship's Agent with the following information:

ETA at berth.
Arrival draft.
Estimated departure draft.
Quantity and type of Cargo/Cargoes.
Vessel's maximum loading/discharging rate.
Quantity of dirty ballast and discharging rate.
Quantity of clean ballast to be discharged overboard and time required.
Size of manifold.
Are reducers to 6 in., 8 in. and 10 in. available on board?
Any vessel's requirements.
Master's Name.

BERTHING: Umm Al Nar Refinery Jetty consists of 2 berths, each of which accommodates vessels in the range of 5,000 d.w.t. to 30,000 d.w.t. and is provided with the following facilities:

(a) Loading platform.
(b) 4 mooring dolphins.
(c) 5 breasting dolphins (with 2.16 m. berthing line).
(d) 4 × 60 ton quick release hooks with capstan.
(e) 2 × 30 ton bollards.
(f) Hydraulically operated gangway.
(g) 2 fire-fighting monitor towers.

Each platform is provided with 6 loading arms having the following flexibility:

*No.**	*Size of Flanges inches*	*Cargo Flexibility*	*Max. Rate cu.m./hr.*
1	6	Lub. oil	400
2	8	A.T.K.	1,000
3	6	Straight Run Residue	500
4	8	Mogas	1,000
5	10	Gas oil/Naphtha	1,500
6	10	Straight Run Residue/Ballast	1,000
7	3	Fresh water	13

*The loading arm numbers are from the gangway side.

Berthing Aids: Umm Al Nar Refinery Jetties are equipped with navigational aids to allow safe navigation during day and night, namely:

(a) 2 white coloured leading lights to affix navigation for channel's centre line, placed ashore at 5.0 m. and 11.0 m. above the ground level.
(b) 6 navigation lights with radar reflectors to define basin limits.
(c) Each jetty is provided with 4 red coloured lanterns, 2 at each end, at 5.0 m. above deck level. This is in addition to the operational flood lights.
(d) Each mooring dolphin is provided with flood lighting.

Moorings: When at berth, vessels must be moored to the entire satisfaction of the Pilot. The breasting dolphins are each equipped with 60 ton quick release hooks and a power operated capstan. the mooring dolphins are each equipped with 60 ton quick release hook and a power operated capstan.

Vessels must be ready at all times to put out extra moorings as requested by terminal personnel, or as dictated by weather changes. It is the Master's responsibility to ensure that vessel's mooring lines are checked frequently to prevent excessive movement of the vessel in berth, which could activate the ESD/ERS systems and/or cause severe damage to the loading arms and other terminal equipment.

LOADING/UNLOADING: Also see "Berthing."

(i) The Master must give the Terminal a "Stand By" warning 10 minutes before being ready to commence loading or discharging.

(ii) Upon "Commence Loading" from the Master or his deputy only 1 pump will be used to ensure a slow flow rate until it is established that all systems are operating correctly and pressures are constant. Full loading rate may then be ordered.

(iii) The vessel's cargo tanks shall be inspected prior to and during loading and should it be found that tanks are not tight all loading shall cease, the vessel be rejected and further loading refused. The vessel will not be accepted later until satisfactory evidence of repair is produced duly certified by ABS, Lloyd's or other officially accredited classification society or surveyor.

(iv) During the hours of darkness vessels loading/discharging products, lub. oil or ballast shall rig overside lights to illuminate the surface of the sea around the ship to the Terminal Operators satisfaction to ensure that any oily products on the surface may be detected quickly and early action taken as appropriate.

Deballasting: The jetties are equipped with dirty ballast/slops receiving facilities. Vessel discharging dirty ballasts/slops ashore will use the deballasting arm. The maximum ballast reception rate is 1,000 cu.m./hr. Prior to arrival the Master is to advise Umm Al Nar Refinery (through the arrival telegram) how much dirty ballast/slops on board to be discharged to the shore facilities. (A "Declaration Letter" is provided for Master's signature) accepting clean ballast for overside discharge is subject to a declaration signed by the Master and delivered to the terminal representative.

Communications: To maintain the necessary continuous communications between refinery, vessels and shore control rooms during cargo operations and also in emergencies, the vessel will be provided with a walkie-talkie set. It is required that this set must remain at all times with the officer responsible for the cargo operation.

FRESH WATER: Fresh water is obtainable at Refinery berths and should be arranged through the Ship's Agent.

FUEL: No Bunker facilities in Umm Al Nar Refinery Terminal.

GENERAL: *Customs:* Custom's officers will board the ship on arrival and prior to sailing for necessary port clearance.

Stores and Provisions: Stores and provisions are not permitted to be loaded at Refinery berths and must be taken on board in the anchorage.

South Basin: The South Basin has been closed for shipping recently due to its proximity to the intakes of the Power Station.

AUTHORITY: Petroleum Ports Authority – ADNOC, P.O.Box 898, Abu Dhabi, U.A.E. *Tel:* 666029 and 562600 (ext. 6386) at Umm Al Nar. *Telex:* 22215 ADNOC EM. *Cables:* ADNOC. *Contact:* Captain H. Masri, PPA – Manager. Captain A. M. Massoud, Port Officer.

AGENT: See "Mina Zayed".

UMM AL QAIWAIN: 25.35 N. 55.35 E. (See Plan)

LOCATION: Approx. 20 miles North of Sharjah.

PILOTAGE: Service not available at the present time.

RESTRICTIONS: Depth of channel is presently 10 m., width 100 m., tidal range +0.2 m. to +1.7 m.

MAX. SIZE:

Details of shipping able to berth at individual wharves:

Ship	Size	Draft (m.)	Length (m.)
Town Wharf:			
Passenger ship	500 gross tons	4.0	50
Freighter	700 d.w.t.	3.6	52
Freighter*	1,000 d.w.t.	4.1	60
Tanker	700 d.w.t.	3.8	54
Tanker*	1,000 d.w.t.	4.2	61
Deep Water Wharves No. 3 and No. 4:			
Passenger ship	30,000 gross tons	9.5	210
Freighters	17,000 d.w.t.	9.8	173
Container	16,900 d.w.t.	9.8	200
Tanker	20,000 d.w.t.	9.5	164
Ore Carrier	25,000 d.w.t.	9.8	176

*Dependent on state of tide.

BERTHING: *Town Wharf:* This wharf is 800 m. long providing berthing facilities for ships with a max. draft of 4 m. A guide to the size of ships able to berth at this wharf is given under "Max. Size". Bollards are located at 12 m. intervals and timber fenders and rubbing strips have been incorporated. The capping beam level is +2.66 m. above Admiralty Chart Datum and the minimum dredged level adjacent to the wharf is −4.0 m. Steps have been incorporated at the Western end of the wharf to enable loading of small local boats. The allowable surcharge loading adjacent to the wharf is 2.0 tonnes/sq.m.

The channel in front of the wharf is 100 m. wide and is dredged to a minimum depth of 4 m. The channel extends from the Eastern end of the wharf along its full length and for a distance of approximately 3 km. along the Western shore of the creek. At the Western end of the wharf the channel has been widened to form a turning circle. The channel has been marked with standard buoys and beacons in accordance with International Regulations.

The area behind the wharf is a minimum of 50 m. wide, the boundaries being the wharf and the existing road. This area has been reclaimed using dredged fill and surfaced with local materials. Other reclaimed areas exist along the Western bank of the channel and opposite the existing fish market. Both these areas have been reclaimed to a surface level of +3.0 m.

Deep Water Wharf:

This wharf is divided into four sections:

Wharf No. 1	130 m. long	Dredged depth – 5.5 m.
Wharf No. 2	115 m. long	Dredged depth – 7.5 m.
Wharf No. 3	200 m. long	Dredged depth – 9.5 m.
Wharf No. 4	400 m. long	Dredged depth – 10.0 m.

Wharves No. 1 and No. 2 are similar to the Town Wharf previously described but with increased dredged depths. Wharves No. 3 and No. 4 provide berthing facilities for ships with a max. draft of 9.5 m. and 10.0 m. respectively and a max. length of 200 m.

A guide to the size of ships able to berth at these wharves is given under "Max. Size". Bollards are located at 22.4 m. intervals and rubber "V" type fenders have been incorporated on Wharf No. 4. The capping beam level is +2.66 m. and the allowable surcharge adjacent to the wharf is 2.0 tonnes/sq.m.

A 30 m. wide concrete hard standing is provided behind all 4 wharves and the entire wharf area is lit by 400 watt H.P.S. High Mast Lighting. Potable water facilities have been installed together with provision for future fuel bunkering and connection to the local telephone exchange.

The entrance channel to Umm Al Qaiwain Port is a minimum of 100 m. wide increasing to 160 m. wide at the Northern end of Wharf No. 4 and connects with a 500 m. diameter turning circle at the Southern end of Wharf No. 3. The channel and turning circle are both dredged to a minimum depth of 10.0 m. and are marked with standard buoys and beacons in accordance with International Regulations.

Navigational information for entering the Port of Umm Al Qaiwain can be found on BA. Chart No. 3714.

AUTHORITY: Umm Al Qaiwain Municipality, P.O.Box 12, Umm Al Qaiwain, U.A.E. *Tel:* 9716-666144/5. *Contact:* Director General.

Ahmed Bin Rashid Port, P.O. Box 225, Umm Al Qiwain, U.A.E. *Telex:* 69711 Mualla Em. *Contact:* Port Manager.

AGENT: See "Dubai".

ZIRKU ISLAND, Jazttzarakku Island, Abu Dhabi: 24.52 N. 53.04 E. (See Plan)

LOCATION: Zirku Island is located at 24° 52′ N., 53° 04′ E. approximately 75 nautical miles W.N.W. of Abu Dhabi.

It is 5 km. long and 2.5 km. wide.

A zone of very rugged hills with ridges is located in the N.N.W. with an elevated point of 163 m. and a low flat sandy and dusty zone in the S.S.E. where the airport lies.

(A) SERVICE HARBOUR
(B) OIL TERMINAL

(A) SERVICE HARBOUR

PORT LIMITS:

(a) Lat. 25° 03.0′ N., Long. 52° 53.3′ E.
(b) Lat. 25° 00.0′ N., Long. 52° 53.3′ E.
(c) Lat. 24° 48.9′ N., Long. 53° 04.8′ E.
(d) Lat. 24° 48.9′ N., Long. 53° 11.0′ E.
(e) Lat. 24° 56.8′ N., Long. 53° 11.0′ E.
(f) Lat. 25° 03.0′ N., Long. 53° 04.4′ E.

Refer to British Admiralty Chart 3778.

NAVIGATION: *Manoeuvring and Navigation:* All vessels should manoeuvre and navigate within the port in accordance with the International Regulations for the Prevention of Collision at Sea.

Lights and Shapes: All vessels should exhibit such lights and/or daytime marks as defined by International Regulations for the Prevention of Collisions at Sea.

Special attention should be paid by vessels, barges or tugs moored or anchored in the vicinity of the jetties which should show at night the lights defined in these regulations.

High Tide Manoeuvres: Deep draft vessels and barges will be berthed at high tide only.

Shallow Water: While proceeding to the jetties, Masters should pay sharp attention to navigation due to the presence of shallow water existing in the vicinity.

Caution: Masters should consider the possibility of having less water than predicted by tide tables after a long period of bad weather.

Harbour Facilities: No tugs or mooring launches are presently available accordingly, vessels calling at Zirku harbour should have very good manoeuvrability.

Navigation Aids:

1. Flashing lighthouse (Zirku, Zarakuh or Zarqa) located at the top of the pylon on the hill.
   Height =200.86 m.
   Lat. 24° 53.0′ N. Long. 53° 04.1′ E.
   One flash every 10 seconds.
2. Flashing lighthouse at the end of the sea water intake.
   Lat. 24° 53.0′ N. Long. 53° 05.3′ E.
   Height=9 m.
   V.Q. (3) 5 secs.
3. Flashing lighthouse at the end of the main jetty.
   Lat. 24° 52.3′ N. Long. 53° 05.5′ E.
   Flash=Fixed and flashing (1) 10 secs.
   Height=11 m.
   Colour=Green.
   Obscured approximately 70° – 150° (80°).

4. *Aero Lights* (occasional).
   Located on the airport control tower (green).
   Lat. 24° 51.6′ N.   Long. 53° 04.6′ E.
   Located on the hill (red).
   Lat. 24° 52.5′ N.   Long. 53° 04.1′ E.
   Height=67 m.
5. *Two Flares:*
   Lat. 24° 52.5′ N.   Long. 53° 04.3′ E.
   Height=145 m.
   Fixed red lights.
6. *Pylon on the hill top.*
   Height=200 m.
   Fixed red lights.
7. *Anchorage Buoy.*
   Lat. 24° 51.3′ N.   Long. 53° 06.9′ E.
   Yellow cylindrical.
   Flashing yellow (1) 5 secs.
8. *Zirku Flare Platform "ZFP".*
   Lat. 24° 51.5′ N.   Long. 53° 02.6′ E.
   Height=85 m.
   Mo "U" every 15 sec.
   Range=15 miles.

ANCHORAGE:

Waiting Anchorage: Small vessels and barges waiting for a berth alongside the main jetty can anchor beyond 0.5 mile in the S.S.E. of the end of existing jetty in approximately 7 m. of water depth.

Three fixed mooring buoys without lights have been installed at around 0.7 mile in the South and S.E. of the main jetty.

Sharp lookout must be kept when navigating in these areas.

An anchoring buoy (yellow Fl. (1) 5 secs.) has been installed in position: Lat. 24° 51.3′ N., Long. 53° 07.0′ E. marking the N.E. corner of the waiting anchorage area (see Admiralty Chart 3778).

Prohibited Anchorage Areas: To avoid the underwater oil pipe-lines being damaged, prohibited anchorage areas are defined as follows:

0.5 nautical miles on each side of the M.O.L. (Main Oil Line) input line.

0.5 nautical miles on each side of the loading lines.

0.5 nautical miles on each side of the SATAH lines.

M.O.L. input line from Zakum field comes ashore on the middle of the East Coast.

Loading lines to the oil terminal SPMs leave the Island from the N.N.W. point of the Island.

Anchorage Berths and Moorings: All vessels or barges entering the port should occupy such anchorage berth or mooring as may be directed by the Port Supervisor and shall move to any other anchorage, berth or mooring as and when required by this authority.

No vessel or barge shall shift or change the anchorage, berth or mooring allotted without Port Supervisor authorisation except if instructed to do so.

No claim will be accepted by Company for berthing or mooring due to arrival priority.

RADIO: International VHF Channels 6, 62, 64, 68 and 69 have been allotted to "Zirku Island Traffic". Permanent watch maintained by "Zirku Island" on Channel 62, semi-duplex for vessels to Zirku Island & vice versa.

When contact established, change to Channel 64.

Channel 68 is to be used for ship to ship calling and conversation.

ARRIVAL ADVICE: *Notice of Arrival:* Vessels and barges calling at Zirku harbour should advise their ETA at least 48 hours before their arrival by telex to Zirku Marine.

In case of change of the scheduled ETA by more than 6 hours Zirku Marine should be informed by the same way.

Confirmation of ETA should be sent a few hours before arrival at Zirku as soon as a radio link can be set up on VHF Channel 62 or 68 with "Zirku Island" radio room.

Berthing prospects will be given to incoming ships by "Zirku Marine" at this time. If the vessel is instructed to anchor, she must keep a permanent watch on VHF Channel 16, 62 or 68.

During berthing operations contact will be set up with "Zirku Marine" on VHF Channel 68 or 69.

Arrival Message: The first message should be sent according to the following form but any items which are the same as a recent previous voyage to this port may be omitted.

Name of vessel (tug or barge):
ETA Zirku.
Type of vessel.
Length.
Width.
Max. draft on arrival.
Cargo loaded (briefly).
Contractor charterer.
Name of Master.
Coming from and ETD.

BERTHING: Zirku Island Harbour is a private port, hence only vessels and barges chartered by the Company Zadco (Zakum Development Company), acting on behalf of ADNOC (Abu Dhabi National Oil Company) and its contractors are allowed to moor alongside the jetties.

Jetties: The main jetty located on the East coast of the Island is allotted to the general supplying of the Island and the transit of equipment for the Company.

Temporary jetty "A" (on the South of the Island) is now completely silted up.

Temporary jetty "B" (on the West of the Island) is now deteriorating and no longer in use.

Vessels: Contractors shall charter tugs, barges, landing crafts, supply boats, etc. whose dimensions, weight and draft are suitable to the existing jetty.

Emergency use: Other craft may use this harbour only in emergency and must immediately report their arrival to the Port Supervisor.

All craft using the harbour are subject to the control of the port operating company representative. (Zirku Marine Superintendent or his deputy) and the Port Petroleum Authority (Port Officer)

Berth Occupancy: The Port Supervisor will define the allocation of berth in accordance with the Company's requirements of priority upon Manager's recommendations.

Contractors should start discharging as soon as vessel or barge is berthed and should unload until all the cargo has been discharged.

Contractors should not store their cargo on the jetty. They must remove it as unloading proceeds.

Vessels and barges should leave as soon as the handling of cargo is completed in order to free the quays. The Port Supervisor can order vessels and barges to leave the quay at any time (even though not completely unloaded), so they must be able to move, therefore barge shall keep a tug alongside during the whole time of unloading.

BERTHING FACILITIES: *Main Jetty:* The main jetty located on the East coast of the island is approximately 1,200 m. long and orientated N.W./S.E.

The quay at the end of the main jetty has a water depth of 2 m. and is 12.5 m. long (41 ft.) at the inward end; 2.3 m.×40.5 m. long (132 ft.) in the centre and 3 m.×57 m. long (187 ft.) at the seaward end (water depth is calculated under chart datum C.D.)

The quay is fitted with 8×30 ton bollards, 12 pairs of rubber fenders from a level of 1.50 below C.D. to top of quay level and 3 steel ladders running from a level of 1.50 m. below C.D. to the top of quay level.

The quay available for berthing is 110 m. long (360 ft.) orientated N.W./S.E. as is the main jetty breakwater.

At the inward end a 20 m. long quay orientated S.W./N.E. is available for small launches though badly equipped with mooring points.

The Port Supervisor Office and Police ward room are located on the top part of the jetty. The jetty working area has been asphalted.

CRANES: *Fixed Crane:* There is no fixed crane on the jetty since the big derrick installed for the construction has been removed.

Contractors have to supply the Island with their own mobile equipment to discharge vessels and barges, if not previously arranged with Company.

As soon as the unloading is completed users should remove their mobile equipment to keep the jetty area clear.

Location of Cranes: The main quay can bear anywhere a 30 ton crane (up to 45 tons for exceptional cases). For heavy loads two locations are defined as follows:

100 tons crane: one rectangle of which axle is situated at 15 m. from the inward end of the quay.

300 tons crane: the centre of the crane must be situated at 15 m. from the edges of the jetty seaward end.

MEDICAL: A medical officer is resident on the Island for emergency cases only. The Company maintains a small hospital.

FRESH WATER/FUEL:

Water and Fuel Loading and Unloading Critical Area:

Connection pipes are located on the inward and outward ends of the quay.

Inward end of the quay is fitted with 3 in. and 1 in. diesel oil connections and with 3 in. fresh water connection.

The outward end of the quay is fitted with 3 in. connections for fresh water and diesel oil and 8 in. line for fresh water. The Ship's Master should apply the safety rules and inform Zirku Marine about any unsafe conditions.

Ships coming for diesel oil or fresh water should be fitted with sufficient length of hoses to be connected to the Island fixed pipe.

A safety ball valve is required on shore and diesel oil hose.

SAFETY: *Reporting of emergency:* Should any vessel be in danger through fire, explosion, collision or whatsoever cause, the Master should immediately report the fact to the Port Supervisor and Port Officer (Petroleum Port Authority) by VHF Channel 62 or 68.

When alongside the main jetty they can report through the shore telephone system located on the jetty. Grey for Island Network, Red for Safety.

Phone Numbers:
Day and Night: Safety 6333
Radio Room 6666/6403
Clinic 6222.
Day: Marine Superintendent 6400.
Port Officer (PPA) 6471

Fire fighting equipment: There are 2 monitors and 3 hydrants supplied by a 12 in. pipe able to reach any point of the main jetty on emergency call.

Ship's fire fighting equipment: This equipment must be in constant readiness at all times with sufficient skillful personnel on board for its efficient operation.

Particular safety requirements for vessels unloading inflammable products:

All cargo/bunker tank lids must be closed.

A fire fighting hose must be ready for use and supplied with water near the piping and connection on the deck.

In the same way extinguishers must be disposed on the deck.

Cargo/bunker hoses must be properly rigged without leakage.

Cargo tanks being discharged and open to atmosphere must be fitted with an agreed venting system.

Foam and/or dry powder monitors, if fitted, shall be ready for use.

Portable fire extinguishers, shall be conveniently placed for use near the ship's hoses' connection.

A checking will be performed by the Safety Supervisor jointly with the Port Supervisor and the vessel's Master, and a form will be signed by the same, after which offloading of said hazardous cargo will be authorized.

EMERGENCY: *Emergency moving of vessels:* In case of accident vessels shall be able to move quickly, so no repairs to engines are allowed when alongside for self propelled vessels. Barges shall keep a tug alongside during the whole time of unloading.

WEATHER: *Winds:* Four kinds of winds on the Island: The most frequent (54% of the time) are named Shamals they blow from W.N.W. to N. principally in Winter. From N.N.E. to E.N.E. some 20% of the time the Noshi. Local effects of Monsoon, the Kaus blows from E. to S. 17% of the time.

Finally, during the Winter only, and 9% of the time blows from W.S.W. to W. the Suhaili.

Tides: Around Zirku Island the tide is of mixed type with small diurnal predominance, however this semi diurnal effect is not of great significance and for all practical purposes it can be taken that there is only one high water and one low water per day.

The mean spring tide range is approximately 1.2 m. The maximal range would be of about 1.4 m. The mean usual range would be 0.9 m.

Zirku Island tide prediction supplied by operating company, copy can be obtained from Marine Zirku.

There is a tide recorder on the main jetty. Tidal information also available from Zirku Marine on VHF, Channel 68.

Tidal Currents: At Zirku Island tidal currents are semi diurnal roughly flow runs from West to East and Ebb runs from East to West. Eddies are created at vicinity of any obstacle, (breakwater, jetties etc.) especially close to the South sandy end of the island. Currents can reach a speed of 2 knots. It is expected that these data are profoundly changed by winds, especially Shamal.

SHORE LEAVE: No person may go on shore without authorisation from the Zirku Police Authority and only if handed a shore leave or permanent authorisation card.

GENERAL: *Marks:* Name or number and draft marks should be readable from the jetties.

Unsuitable Vessels: The Port Officer reserves the right to refuse berthing and unloading of any vessels considered unsuitable by reason of inadequate or unsatisfactory mooring equipment, insufficient derrick capacity, insufficient fender protection, overloading, inability to comply with the safety regulations or any circumstances which would create unusual risk to the Company's jetties, quays, facilities, personnel and equipment whatsoever.

Prevention of Sea Pollution: It is strictly prohibited to discharge or throw overboard oil, oily water, chemicals, ashes, bilge water or other refuse within the port limits that may result in pollution of the sea.

International oil pollution conventions must be strictly observed by all vessels or crafts.

The Master of any vessel contravening this rule so as to cause pollution shall be charged with an offence against these rules and upon conviction be liable to a fine and shall be incurred in the removal of such pollution.

The harbour users, Contractors and all vessel Masters, before leaving and/or sailing should make sure that jetty area is clean and all their refuse has been removed.

National Courtesy Flag: All vessels calling at Zirku are required to fly their national flag and the national flag of Abu Dhabi.

Swimming & Diving: No person shall swim or dive from or near any vessel or alongside quay or berth.

No person shall engage in diving with the assistance of breathing apparatus within the above mentioned areas without the permission or instruction from the Port Authority.

(B) OIL TERMINAL

PORT LIMITS: The port area of Zirku Petroleum Port covers the area bounded by straight lines connecting the following points:

A:	Lat. 25° 03′ N. Long. 52° 53.3′ E.	B:	Lat. 25° 00′ N. Long. 52° 53.3′ E.
C:	Lat. 24° 48.9′ N. Long. 53° 04.8′ E.	D:	Lat. 24° 48.9′ N. Long. 53° 11′ E.
E:	Lat. 24° 56.8′ N. Long. 53° 11′ E.	F:	Lat. 25° 03′ N. Long. 53° 04.4′ E.

Masters of all vessels entering the port must follow instructions given by the Company's Marine Superintendent as to approach, anchoring, berthing and unberthing.

DOCUMENTS: On arrival the tanker should prepare the following documents to be handed over to the different authorities coming on board:

Tanker Enquiry Form (ZADCO Form).
Navigation Aids Dues Certificate (M.E.N.A.S. Form).
Notice of Readiness.
Crew List.
Certificate of Registry.
Load Line Certificate.
Safety Certificate (Equipment).
Oil Liability TOVALOP/CLC.
Derat Certificate.
Radio Certificate.
International Oil Pollution Prevention Certificate.
Suez Canal Tonnage Certificate.
Panama Canal Tonnage Certificate.

PILOTAGE:

1. *General:* On arrival and on departure the pilotage is compulsory within the Port Limits. The Company reserves the right to render the pilotage compulsory through the departure route for any reason. Nevertheless, upon Masters request Zirku Pilots could assist any tanker on Zirku Departure Route to and from Buoy No. 6 (Lat. 25° 13′ N., Long. 52° 59′ E.). Within Port Limits and on Zirku Departure Route the speed *shall not exceed 8 knots.*

2. *Direct Berthing:* Instructions for berthing having been received by voice communication the tanker should proceed to the agreed Pilot boarding point.

3. *Waiting:* In case of a berth not being available, the approaching tanker will be instructed to proceed to an anchorage area and anchor at the agreed location. The tanker will wait at this allotted location until further instructions.

4. *On Departure:* A Pilot will assist loaded tanker as stipulated in No. 1 above.

5. *Pilot Access:* The Pilot access should be in good condition, safe, clean and ready. Pilot ladders constructed of light material such as aluminium will not be accepted. Where the freeboard exceeds 10 m. the vessel should have a combination of accommodation ladder and pilot ladder rigged. The bottom of the accommodation ladder shall be at least 7 m. above the water line.

6. *Pilot Embarkation:* To embark the Pilot safely the incoming tanker should reduce speed (no more than 5 knots), make a good lee to minimise adverse weather conditions and take the way off. On the tanker's deck the boarding of the Mooring/Loading Master should be attended by at least one officer and one A.B.

7. *Pilot Boat:*

Name	Jarada
Engine	2×955 h.p.
Speed	20 knots
Marked	Zirku Pilot
Fibre Glass Hull	

NAVIGATION AIDS:

Separation Scheme: A traffic separation scheme between Zakum Field and Umm Shaif Field crosses the port area.

This scheme includes:
(a) A separation zone, 0.75 nautical miles wide.
(b) A traffic lane for Westbound traffic, 1.25 nautical miles wide.
(c) A traffic lane for Eastbound traffic, 1.25 nautical miles wide.

The main traffic directions are: 050° – 230°
072° – 252°

This scheme is marked by the following two light buoys.

1. Zakum Middle
   Lat. 25° 59.15′ N. Long. 53° 08.50′ E.
   R.W.V.S. Pillar L.Fl. 10 sec.
2. Zakum West
   Lat. 24° 56.60′ N. Long. 52° 59.85′ E.
   R.W.V.S. ISO 6 sec.

Reference Charts: British Admiralty 3733, 3952, 2889, 3778.

Zirku Island:

Zirku, Zarakuh or Zarqa beacon:
Lat. 24° 53.0′ N. Long. 53° 04.2′ E.
Fl. 10 sec. 22 miles Height 200 m.

Main Jetty:
Lat. 24° 52.2′ N. Long. 53° 05.4′ E.
Fixed Green 7 miles and Flash 10 sec. Height 11 m. 9 M.

Sea Water Intake:
Lat. 24° 53′ N. Long. 53° 05.3′ E.
3 Fl. W. 5 sec. Height 9 m.

Radio Tower:
Lat. 24° 53′ N. Long. 53° 04.1′ E.
Fixed Red light – Height 198 m.

Zirku Flare Platform 'ZFP":
Lat. 24° 51.5′ N. Long. 53° 02.6′ E.
Flashing White light, morse "U" every 15 sec. Range 15 miles.

Flares:
Lat. 24° 52.5′ N. Long. 53° 04.3′ E.
Fixed Red light – Height 145 m.

Repeater Platform:
Lat. 25° 01.7′ N. Long. 52° 55.7′ E.
2 White flashing lights Morse "U" 15 sec. at level +18 m.
2 Red lights at level +34 m.
2 Red lights at level +51 m.
Horn Morse "U" every 30 sec.

Isolated Danger Mark:
Capped well-head.
Lat. 24° 59.8′ N. Long. 52° 57.1′ E.
Black-Red-Black – Pillar Fl. 2.5 sec.

Navigation Warning within Port Limits:

All vessels transiting through the Zarakkuh Port Limits are to follow the following procedures:

1. Vessels transiting along the Separation Zone may do so as normal.
2. Vessels intending to cross the Separation Zone Northwards must inform Zarakkuh Radio on Channels 16 or 62 of their intention and follow the instructions given.
3. Vessels Southbound, intending to cross the Northern Port Limits, must inform Zarakkuh Radio of their intention on Channels 16 or 62 and follow the instructions given.
4. No vessel is to pass between Buoy No. 1 (Lat. 25° 02′ N., Long. 53° 00.8′ E.) and the oil loading terminal or enter the no unauthorised entry limts around the oil loading terminal or the Repeater Tower (Lat. 25° 01′ 42″ N., Long. 52° 55′ 40″ E.), or "ZFP" (Lat. 24° 51.5′ N. Long. 53° 02.6′ E.).

MAX. SIZE: The SPMs are suitable for berthing tankers from 30,000 d.w.t. up to 350,000 d.w.t. loaded at 80% of their capacity.

The max. draft allowed for departure is 21 m.

ANCHORAGES: *Small Vessels Anchorage:* Located close to Zirku Main Jetty is designated for small vessels to service harbour.

1 Yellow buoy Fl. 5 sec. in N.E. corner (Lat. 24° 51.3′ N., Long. 53° 06.9′ E.).

Limits:	Lat. 24° 51.3′ N.	Lat. 24° 50.0′ N.
	Long. 53° 07.0′ E.	Long. 53° 07.0′ E.
and		
	Lat. 24° 51.3′ N.	Lat. 24° 50.0′ N.
	Long. 53° 05.4′ E.	Long. 53° 05.4′ E.

Tankers East Anchorage:

Limits:	Lat. 24° 56.8′ N.	Lat. 24° 54.8′ N.
	Long. 53° 11′ E.	Long. 53° 11′ E.
and		
	Lat. 24° 56.8′ N.	Lat. 24° 54.8′ N.
	Long. 53° 07.8′ E.	Long. 53° 07.8′ E.

Tankers North Anchorage:

Limits:	Lat. 25° 03′ N.	Lat. 25° 00′ N.
	Long. 53° 02.2′ E.	Long. 53° 02.2′ E.
and		
	Lat. 25° 03′ N.	Lat. 25° 00′ N.
	Long. 53° 04.4′ E.	Long. 53° 04.4′ E.

where 2 buoys are installed at Eastern corners. Colour yellow – Flash yellow 5 sec.

This area is designated for incoming and outgoing deep draft tankers.

Prohibited Anchorage Area: Anchorage within Port Limits, outside waiting anchorage areas is prohibited. Exceptional authorisation may be given by the Port Officer.

Sea-bed: The sea-bed in the Terminal area is rock, covered by a few inches of loose sand. Some patches of coral can be found. Holding is poor and vessels are advised to pay out more cable than usual.

RADIO: Messages can be sent to the Company by the following means:

Telex or Telegram through Bahrain Radio addressed to ZADCO Marine. Telex No.: 22948 ZDCAUH EM. Cable: ZIR Marine.

Voice communication to "Zirku Marine" by SSB. Operation Mode A3J Upper Side Band within a range of approximately 250 km.

Permanent watch on carrier frequency: 2036.4 kHz.

Talking on standard Marine Duplex HF Channel: 405, 605, 828

Notice of Arrival: Arrival Message shall be sent to ZADCO Marine 96 hours before arrival at the Port Limits.

Confirmation shall be given 72 hours, 48 hours, 24 hours, and 6 hours from ETA.

Voice contact shall be made with "Zirku Marine" by SSB or VHF 6 hours prior to arrival.

Arrival Message: Arrival Message should contain the following:

Vessel's name and Master's Name/Abu Dhabi Agent's Name/Port of Registry/n.r.t.
ETA Port Limits
Arrival drafts/Departure draft F & A
Quantity of ballast
Estimated deballasting time
Possibility of simultaneous operation/permanent ballast
Cargo required
Maximum loading rate & IGS operative.
Part cargo and slops/to comingle
Derrick capacity/No. and size of manifolds/mooring brackets
Last Port of call and next Port/EDP accepted
Direction of approach

VHF: Voice communication to "Zirku Marine" by VHF Channels: 16, 62 and 68. Channel 64 is used by the Pilots.

Permanent simultaneous watch maintained on these Channels.

Arrival: VHF contact should be made with Zirku Marine requesting instructions.

Once contact has been established through Channel 16 further conversation should be conducted on either Channel 64 or 62 upon operator's instructions.

Pilot/Loading Master on board: Although he will bring on board his own VHF communication units with private frequencies, the tanker VHF should remain operational at all times.

At Anchorage: Permanent watch should be kept on Channel 16 and on other Channels (62 or 64) as requested by the Zirku Marine operator.

Traffic Separation: North-bound vessels intending to cross the Separation Traffic Scheme, and South-bound vessels intending to cross the North port limit, should report their intention on Channels 16 or 62 and follow instructions.

TUGS: A tug of 2×1,500 h.p. and a mooring launch of 2×275 h.p. will assist the berthing.

SPMs: The terminal of Zirku Petroleum Port is located about 8 nautical miles N.N.W. of Zirku Island and consists of two single Point Mooring buoys whose exact coordinates are as follows:

SPM "Alpha"	Lat. 25° 00′ 32″ N.	Long. 52° 59′ 02″ E.
SPM "Bravo"	Lat. 25° 01′ 36″ N.	Long. 52° 59′ 30″ E.

A small mooring buoy for small craft is in position: 0.3 miles West of No. 1 channel buoy.

SPM Description: Both buoys are identical.

Buoy Body: The buoy is a circular steel structure with a diameter of approximately 12.5 m. It has a rotating assembly. The colour is orange.

Hoses: The buoy is equipped with 2×20 in. floating hoses with a 16 in. tail end hose connection. The outer hose string is 296 m. and the inner one 285 m. Each string is equipped with winker lights.

Hawser: The mooring systems consist of a single 18 in. circumference grommet hawser of double braided nylon, with an overall length of 53.4 m., ended by a short length of 76 mm. diameter chafe chain.

Light: The buoy is fitted with a navigation light emitting a Morse "U" flashing signal every 15 seconds visual on 360° up to a 5 nautical miles range.

Fog Horn: Fitted on the buoy, emits a Morse "U" blast every 30 seconds and is activated when necessary by a remote control system.

Radar Reflector: A radar reflector is installed on the buoy structure.

Water Depth: The minimum water depth in the vicinity of the SPM Buoys is 27 m. above chart datum.

MOORING: All vessels arriving at this port are required to have adequate draft and trim for safe manoeuvring purposes. The propeller should be completely immersed. The recommended trim for manoeuvring in ballast is 3.0 m. List will not be tolerated.

Tanker Material Equipment: The tanker must have the port side derrick rigged for lifting the shore equipment on board, the minimum derrick capacity shall be 10 tons.

A good messenger line of approximately 4 in. circumference nylon line to be ready on the forecastle.

The forecastle should be fitted with Smit or Chain Stopper type brackets, strong mooring bitts and Panama Leads.

Terminal Material Equipment: One basket will be lifted on board with hose connection equipment and tanker mooring equipment if necessary.

Procedure: Full power must be available on tankers' main engine.

Once the optimum approach route has been selected the tug will pull away the hose strings and the tanker will proceed toward the buoy at a suitable speed.

When approximately 300 m. from the buoy the mooring launch will be instructed to bend on the messenger line from the Panama Lead to the mooring hawser pick up line.

The tanker will be brought to a dead stop at 60 m. from the buoy. The chafe chain will then be winched aboard and secured.

Once the tanker is secured, the tug will pass its towline to the tanker's stern and then maintain tension on the towline throughout, to avoid any buoy kissing.

Emergency Fire Wire: All ships shall have a fire wire hanging from the bow and the stern to enable tugs to immediately connect in case of emergency – Circumference of wire to be at least 6 in.

Weather Limits: Mooring operation can be carried out in up to 25 knots wind speed and significant waves up to 5 ft.

HOSE CONNECTION: *Terminal Connection Team:* After mooring is completed, the hose connection team will board, to assist the crew.

Tanker Connection Team: An officer should attend the hoses with at least 3 deck hands and 1 boatswain. In addition one skilful winchman will be required.

Tanker Material Required: Miscellaneous tools, shackles, wires, ropes plus fire hose and extinguisher should be ready close to the manifold. The area around the manifold should remain free of all equipment to enable safe hose handling.

Terminal Material Supplied: 16 in. to 16 in. Spool pieces. Chain hoists, tirfors, gaskets, wrenches, flange bolt sets, butterfly valve handles, set of miscellaneous chains, ropes, slings, etc.

Flange size: The tail end hose flange size is a 16 in. camlock coupling. Before berthing the tanker manifold should be ready for direct connection, blind flange removed, and 16 in. to 16 in. spool piece fitted.

The two tanker manifold connections should be chosen in such a way that access to both flanges is possible.

Procedure: Having completed the mooring operation, the mooring launch will proceed to the end of the floating hoses to tow them to a position beneath the tanker's derrick hook.

The inner (or shorter) of the hoses will be lifted above deck level and the end swung inboard.

The hose will be lifted by such length to match the distance between the rail and the tanker manifold, then held with snubbing chains and the hose end lowered and connected to the manifold flanges.

The same operation will be performed on the outer (or longer) one.

LOADING: *Rate:* The maximum loading rate will be 12,500 cu.m.p.h. using both hoses.

Care will be taken not to exceed the rated working pressure to be supported by the hoses which is 15.5 bars (225 p.s.i.).

Procedure: Once the hoses have been connected and checked, the butterfly valves opened and the tanker pipe network set up, the Loading Master can give the go-ahead upon request from the Chief Officer and pumping will commence at slow speed at the beginning (by gravity), approximately 7,000 bbls./p.h., then the rate increased up to the rate requested by the Chief Officer.

An inspection of the floating hose strings and the buoy, including waters around the terminal, should also be made during the first few minutes of cargo transfer to ensure there is no leakage.

Once reached, the flow rate will be maintained until further instruction is given by the Chief Officer to the Mooring/Loading Master.

Valve Closure: No valves which will stop or seriously impair or reduce the flow rate of oil from the shore pumps are to be operated without prior agreement with the shore control room (ZCC) through the Loading Master.

10 minutes' notice should be given to the Loading Master for reducing the loading rate or stopping.

The practice of throttling back on the ship's cargo valves is to be avoided. If a lower rate is required, the shore is to be advised and the pumping rate will be reduced to the required level.

The Master will be held liable for any damage arising from the sudden cessation of flow caused by default of the ship.

It cannot be over-emphasised that to do so can be extremely dangerous and cause extensive damage to equipment in addition to possible oil pollution.

Failure of Communication: In case of failure of communications between the Loading Master and Zirku Control Room (ZCC), the loading will be automatically stopped.

Accommodation: Cabins: Two single cabins on board the tanker must be allotted to the Mooring/Loading Master and his Assistant.

Terminal Team: A rest room must be allotted to the hose connection team (3/4 people) should they be required to stay on board by the Mooring/Loading Master. This will only be the case in adverse weather conditions.

Working Location: The working location of the Mooring/Loading Master is the cargo control room.

A portable unit of around 25 kgs. will be installed in this room and operate from either a 110/115 v. or 220/240 v., 50/60 kHz. supply, such a socket must be available in the cargo control room.

Terminal Personnel: As long as the tanker is secured to the Buoy a permanent watch will be performed by the Mooring/Loading Master and/or his assistant in the cargo control room with the portable unit.

Contact will be permanently kept with the Zirku Control Room (ZCC) private VHF Channel.

Tanker Personnel: A tanker officer speaking English should be permanently on duty with the Mooring/Loading Master. The Chief Officer must be available at any time during the deballasting and loading operations (room and telephone number).

In addition to the tanker officer at least two crew members will be in contact with control room through adequate W.T. and must be on duty permanently on the deck keeping watch on the tanker and terminal equipment.

Accommodation ladder will be continuously adjusted by the crewmen with regard to the sea state and tanker draft to provide safe access to the deck at any time of the operations.

Ullages: Ullage measurements shoud be taken by remote gauge while loading.

Opening the tank ullage lids should be avoided.

When necessity involves opening the lids the Mooring/Loading Master's approval must first be obtained.

The Mooring/Loading Master will check and approve the ullage report according to ullage measurements.

Characteristics:

API: around 34
S.G.: around 0.85
Temperature 20°C. to 35°C.

More accurate characteristics will be transmitted to the tanker on arrival.

BALLAST: *Quantity:* Tankers arriving at Zirku Petroleum Port for berthing should keep onboard at least 30% of their d.w.t. as ballast until further instructions received from the Mooring/Loading Master.

Tankers capable of deballasting and loading simultaneously should have on board a total of not less than the 30% d.w.t. requested for berthing so that in normal circumstances they will not be flying light whilst moored at the buoy.

Vessels arriving with insufficient ballast may be required to increase the quantity, should the Mooring/Loading Master consider it necessary.

Quality: Vessels arriving with ballast on board to be discharged into the sea must ensure that the ballast, lines and pumps are clean and free from oil before commencing discharge. If necessary the initial quantity and the drainings should be pumped into the slop-tank. A permanent deck watch shall be kept during this operation with overside lights displayed at night on both sides of the vessel at the discharge points.

Deballasting Facilities: There are no deballasting facilities at Zirku Terminal for receiving dirty ballast.

UNMOORING/DEPARTURE: As soon as the loading operation is completed, the vessel will vacate the berth.

The tanker's cargo manifold valves and butterfly valves at the hose end will be closed. The hoses once disconnected will be swung outboard and lowered to the water with the derrick and released.

The tanker will leave the terminal by slipping the mooring. Once the mooring is slipped, the tanker will put the engines astern, drop back until clear of the floating hose, and then steam clear of the terminal.

The mooring launch will be positioned to tow the floating hoses clear, where necessary. The tug will help the tanker to clear the terminal if so required by the Mooring/Loading Master. The mooring connection team will disembark at this stage and the terminal equipment be lowered into the tug. It will be necessary to make a lee to perform these operations safely.

Waiting Area: In the case of no "Early Departure Procedure" arrangements having been made, the tanker will be anchored in one of the anchorage areas waiting for cargo, documents which will be sent by the pilot boat as soon as possible.

In case of the tanker being delayed from sailing for any reason (engine repairs, waiting order, etc) the Mooring/Loading Master will disembark once securely anchored.

When the tanker is ready to sail through the North Departure Route, 2 hours' notice will be given to the Mooring/Loading Master.

Departure Route: Any deep draft tanker leaving Zirku Petroleum Port will proceed through the following departure route at a speed not exceeding 8 knots.

Buoy No. 1	Lat. 25° 02′ N. Long. 53° 00.8′ E.
East Mark	BYB VQ(3)5s.
Buoy No. 2	Lat. 25° 04.4′ N. Long. 53° 02.4′ E.
Safe Water	RW Occ 15s.
Buoy No. 3	Lat. 25° 06.4′ N. Long.53° 03.0′ E.
Safe Water	RW LFI 10s.
	Crossing Pipe 30 in.
Buoy No. 4	Lat. 25° 09.8′ N. Long. 53° 02.6′ E.
Safe Water	RW Occ 8s.
	Crossing 3 pipes 18 in. & 30 in.
Buoy No. 5	Lat. 25° 11.2′ N. Long 53° 00.2′ E.
Safe Water	RW MO(A) 10 s.
Buoy No. 6	Lat. 25° 13.0′ N. Long 52° 58.9′ E.
West Mark	YBY VQ(9) 10s.

To Das Channel Buoy No. 10. Leave to starboard.

MEDICAL: Although a medical officer is resident on Zirku Island, consultations will be possible only on an emergency basis.

DENSITY: The salinities are high as a result of the high rate of evaporation.

At the terminal, the water density depending on the sea temperature ranges from 1030 to 1035.

SERVICES: Following services are NOT available at Zirku Petroleum Port:

Bunkers.
Fresh Water.
Food.
Engine Repairs.
Deratisation.
Shore leave for the crew.
Crew changes.

WEATHER: *Seasons:* Two principal seasons can be distinguished in the Gulf. The cool "Winter" season extends from mid November to mid March and the hot "Summer" season from mid May to mid September. The two intermediate periods are transitional and the weather experienced may have either Summer or Winter characteristics.

Winds: The most frequent (54% of the time) is named 'Shamaal' and blows from W.N.W. to N. principally in Winter. The 'Noshi' blows from N.N.E. to E.N.E. for 20% of the time.

Local effects of Monsoon, called the 'Kaus', blows from E. to S. 17% of the time.

Finally, during Winter only, the 'Suhaili', blows for 9% of the time from W.S.W. to W.

The strength of these winds is approximately proportional to their probability of occurrence but at their strongest they can give rise to sandstorms and rough seas for several consecutive days.

Temperature: The extreme monthly mean values of air temperature are 20°C in February and 34°C in August with a lowest minimum of 9°C and a highest maximum of 44°C during the same months.

Tides: Around Zirku Island the tide is variable with small diurnal predominance. However this semi diurnal effect is not of great significance and for all practical purposes it can be said that there is only one high water and one low water per day.

The maximum range is about 1.5 m.

The mean usual range is 1.0 m.

Currents: At the terminal tidal currents are semi diurnal.

The current speed reaches 1 knot regularly at each tide.

Roughly the flood runs S.W. and the ebb N.E. but the turn of tide is very slow when the current directions are variable.

Predictions may be found to be considerably influenced by strong winds, especially the 'Shamaal'.

GENERAL: *Navigation Aids Dues:* The light dues for the Gulf navigational aids will be levied for the account of M.E.N.A.S.

These dues will be paid once per voyage at the first port of call in the Gulf.

Masters are requested to keep the receipt as a voucher if requested by any other Port authority within the Gulf.

Agency: Ship-owners must have their own representative Agency in Abu Dhabi.

Zadco will be acting as a sub-Agency to liaise with the main Agency in Abu Dhabi for all queries regarding mail, telexes, medical assistance, letters of Protest etc.

AUTHORITY: Petroleum Ports Authority – ADNOC, P.O.Box 898, Abu Dhabi, U.A.E. *Tel:* Abu Dhabi 666029 or 667400 (ext. 6471) at Zirku. *Telex:* 22215 ADNOC. *Contact:* Captain H. Masri, PPA – Manager. Captain H. Al Holli and Captain M. Abu Shahba, Zirku – Port Officers.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., P.O.Box 377, Abu Dhabi, U.A.E. Cables: "Confidence" Abu Dhabi. Telex: 22248 ("Gacauh Em"). Tel: 334300. Fax: 339350.

United Kingdom

HEALTH – ALL PORTS:

PORT HEALTH (The Public Health (Ships) Regulations)

1. Simpler procedures for health clearance of ships arriving in the United Kingdom came into operation with effect from 1st April 1978.

2. Under these new rules the Master of a ship arriving from a foreign port must report to the Port Health Authority†

(1) The occurrence on board during the voyage* of
  (a) death, other than by accident,
  (b) Illness where the person or persons concerned
    (i) has or had a temperature of 38°C or greater which was accompanied by a rash, glandular swelling or jaundice, or persisting for more than 48 hours;
    (ii) has or had diarrhoea severe enough to interfere with work or normal activities, or
(2) the presence on board of
  (a) a person suffering from an infectious disease or who has symptoms which may indicate the presence of infectious disease
  (b) any animal or captive bird of any species including rodents and poultry, or mortality or illness among such animals or birds.
(3) any other circumstances which are likely to cause the spread of infectious disease.

If there is nothing to report under any of these headings the Master has no need to obtain health clearance unless an authorised officer otherwise directs. A proportion of ships will be boarded and checked. If any of the conditions in (1)a (1)b and (2)a or (3) have occurred permission (Free Pratique) from an authorised officer will be necessary before disembarkation or commencing operation.

3. If the Master has something to report under 2 above he must:

(1) send a radio message not more than 12 hours and where practicable not less than 4 hours before arrival, giving the relevant information, to the Port Health Authority
or, if the ship is not equipped with a radio transmitter, notify the Port Health Authority, wherever practicable before arrival and otherwise immediately on arrival;
(2) show or give the appropriate day or night signal when the ship enters the jurisdiction of the Port Health Authority (the codes are set out below);
(3) Until "Free Pratique" for health purposes has been given see to it that no person, other than Pilot, Customs officers, Immigration officer or authorised officer boards or leaves the ship without the permission of the medical officer;
(4) complete a Maritime Declaration of Health and arrange for it to be handed to the authorised officer.

In relation to the presence or illness of animals on board, etc., the requirements at (2), (3) and (4) do not apply but where plague has occurred or is suspected amongst rats or mice or there has been abnormal mortality among them, a Maritime Declaration of Health should be completed.

The requirement at 3(4) above does not apply to a ship which has come directly from a port in the expected area of the Council of Europe i.e., Belgium, Denmark, France, Germany F.R., Greece, the Irish Republic, Italy, Netherlands, Norway, Portugal, Spain and the United Kingdom.

4. Where it is necessary to obtain "Free Pratique" for health purposes the Master should have already to hand the authorised officer, a list of passengers and crew leaving the ship together with the addresses they are going to in the United Kingdom.

5. An authorised officer may, in circumstances other than those set out above, direct that the Master shall complete a Maritime Declaration of Health and that the Master shall apply restrictions on boarding or leaving the ship.

6. The Master of a ship that has met another ship, which has proceeded from a foreign port, or has met an off-shore installation, is required to comply with the rules in paragraphs 2-3 (but if the ship has proceeded from an excepted port a Maritime Declaration of Health need not be completed).

7. If the Port Health Authority† is satisfied that the Master of a ship was aware, or should have been aware, of conditions and failed to report them then action may be taken under the Public Health legislation which may result, on summary conviction, to a maximum fine of £100 plus £50 per day.

† Or the local Authority responsible for Port Health Control.

* If more than 4 weeks have elapsed since the voyage began it will suffice to give particulars for the last 4 weeks.

INTERNATIONAL CODE OF SIGNALS
PRATIQUE MESSAGES

ZS	My vessel is "healthy" and I request Free Pratique	Q
	*I require Health Clearance	QQ
ZT	My Maritime Declaration of Health has negative answers to the six health questions.	
ZU	My Maritime Declaration of Health has a positive answer to question(s)..........(indicated by appropriate number(s)).	
ZV	I believe I have been in an infected area during the last thirty days.	
ZW	I require Port Medical Officer.	
	ZW1 Port Medical Officer will be available at (time indicated).	
ZX	You should make the appropriate Pratique signal.	
ZY	You have Pratique.	
ZZ	You should proceed to anchorage for Health Clearance (at place indicated).	
	ZZ1 Where is the anchorage for Health Clearance?	
	I have a doctor on board.	AL
	Have you a doctor?	AM

*By night, a red light over a white light may be shown, where it can best be seen, by vessels requiring Health Clearance. These lights should *only* be about 2 m. (6 ft.) apart, should be exhibited within the precincts of a port, and should be visible all round the horizon *as nearly as possible*.

Health Clearance may be given in three ways:
a) Wholly in plain language.
b) Partly in the above signal code, remainder in plain language.
c) Wholly in the above signal code.

Issued by the Health Departments of the United Kingdom.

GENERAL:

Regulations for tankers entering or leaving ports in the United Kingdom:

Application of the Regulations: The British Government have issued the following regulations, which came into force on 15th October, 1981, applicable to tankers of 1,600 g.r.t. and over of any nationality which:

Have a cargo of chemicals, gas or oil in bulk, or;
Have not been declared gas free after having carried such a cargo.

Reports: Before entering the limits of any harbour a report must be made to the Harbour Master of that harbour giving the following information:

(a) Name and call sign.
(b) Country of register.
(c) Length, draft and beam.
(d) Destination. (This may not be the same as the harbour through which the tanker is passing).
(e) ETA at pilot station or harbour limits.
(f) Brief description of cargo and quantity in tonnes.
(g) Is vessel fitted with inert gas system?
(h) If inert gas system is fitted, is it operational?
(i) Have cargo tanks been rendered non-inflammable?
(j) Has a certificate been issued that the vessel complies with the IMO Codes for the Construction and Equipment of Ships carrying:
  (i) Dangerous chemicals in bulk, or;
  (ii) Liquefied gases in bulk?
(k) Any defect in the hull, machinery, or equipment which may:
  (i) affect the safe manoeuvrability of the tanker or;
  (ii) affect the safety of other vessels in the vicinity of the harbour, or;
  (iii) constitute a hazard to the marine environment, or;
  (iv) constitute a hazard to persons or property in the vicinity of the harbour.

Any changes to the above which occur before entering the harbour limits or while within those limits must be notified to the Harbour Master.

Check List: A Check List is required by the Pilot and the Harbour Master giving the following information:

Details and classification of the vessel.
State of machinery, anchor, fire-fighting, navigational and radio equipment.
State of Safety Certificates and other documents.
Details of officers' Certificates of Competence.

Check List Forms can be obtained from Department of Transport Marine Offices at the following ports: Aberdeen, Avonmouth, Belfast, Cardiff, Dover, Falmouth, Glasgow, Great Yarmouth, Greenock, Hull, Leith, Liverpool, London, Middlesbrough, Milford Haven, Newcastle, Plymouth, Shetland (Mossbank), Swansea.

SHIP MOVEMENT REPORTING: Notice to Mariners No. 631/1986.

Ship Movement Reporting in the English Channel and Dover Strait.

From 1st July, 1986, a revised message format is to be used in the voluntary ship movement reporting system for the English Channel and Dover Strait (MAREP). The changes will bring the MAREP system into agreement with the General Principles for Ship Reporting Systems adopted by the International Maritime Organisation (IMO).

This Notice gives the new message format and also includes amendments to the description of the MAREP system which was given in former Notice No. 1520/81.

Ship Movement Reporting (MAREP):

Introduction:

(1) The objective of the MAREP scheme is to assist the Mariner, to improve safety of navigation in the English Channel and Dover Strait, and to reduce the risk of pollution of the coasts of the United Kingdom and France in this area. Participation in the scheme is voluntary and the International Maritime Organisation (IMO), through its Maritime Safety Committee, has recommended that ships to which the scheme applies should participate. The transmission of reports is free of charge.

(2) The MAREP scheme provides for certain categories of ships to report-in to a number of designated shore stations in the area of the Traffic Separation Schemes and associated Inshore Traffic Zones off Ushant, off Casquets and in the Dover Strait. Broadcasts will be made by shore stations on a regular basis and as required and will include information on any known situations which could affect the safe navigation of ships in these Traffic Separation Schemes or associated Inshore Traffic Zones.

(3) Ships with certain defects and ships in other categories are also invited to report when elsewhere in the English Channel.

Participation:

(4) Ships of the following categories intending to enter the areas described in paragraph 5 below are invited to participate:

(a) All loaded oil and chemical tankers and loaded gas carriers of 1,600 g.r.t. and over.
(b) Any ship "not under command" or at anchor in a traffic sparation scheme or associated inshore zone.
(c) Any ship "restricted in her ability to manoeuvre", ships engaged in towing, deep draft ships, or ships with a defect in their propulsion or steering.
(d) Any ship with a defect in those navigational aids which could adversely affect her navigation under prevailing conditions.

When to Report:

(5) Ships mentioned above are invited to report to the designated shore stations (paragraph 8 below) when intending to enter:

(a) The Traffic Separation Schemes off Ushant and off Casquets, or their associated inshore traffic zones:
  (i) Reports should be made at a distance of 10 nautical miles before entering the area described in (a) above.

(b) The Traffic Separation Scheme in the Dover Strait or the associated inshore traffic zones:
  (i) On proceeding Eastward into this Scheme or its associated inshore traffic zones when arriving within 2 nautical miles of a line joining the Royal Sovereign Light Tower and Bassurelle Light Buoy and extended to the French coast.
  (ii) When proceeding Southwestward, when arriving within 2 nautical miles of a line from North Foreland extended through the Falls Light Vessel to the Belgian coast.
  (iii) When departing from a port within the associated inshore traffic zones.

(6) The phrase "entering a Traffic Separation Scheme" covers ships intending to use the traffic separation lanes, joining them from the side, or crossing the Schemes as described in Rule 10(b) and (c) of the International Regulations for Preventing Collisions at Sea, 1972.

(7) Any ship not under command or any ship of the categories described in paragraph 4(c) and (d) above wherever it is in the English Channel area (East of a line joining Ushant S.W. Buoy and Bishop Rock Lighthouse and West of the line described in paragraph 5(b) (ii) above) is invited to report to a shore station. These ships may be asked to make subsequent pre-arranged reports to shore stations.

Reports and Shore Stations:

(8) Ships with no defects should make a Position Report (POSREP). Ships with defects, i.e. when not under command, with a defect in propulsion or steering or as described in paragraph 4(d) above should make a Defect Report (DEFREP). Where appropriate a subsequent Change Report (CHANGEREP) should be made. Reports in the English language should be transmitted by VHF using the format at the Appendix and using for guidance the IMO Standard Marine Navigational Vocabulary and the International Code. The reports should be made to the following designated shore stations:

	Traffic Separation Zone	*MAREP Receiving Station*	*VHF Frequency*
(a)	Ushant	Ouessant Traffic	16 – 11
(b)	Casquets	Jobourg Traffic	16 – 11
		Portland Coastguard	16 – 69

Channel 11 should be used for calling and working Ouessant and Jobourg Traffic, but these stations should be called outside the times set for broadcasts in paragraph 10.

Channel 69 should be used for calling and working Portland Coastguard.

(c)	Dover Strait	Gris Nez Traffic	16 – 69
		Dover Coastguard	16 – 69

Channel 69 should be used for calling and working these stations.

(d) Ships requiring further information or assistance may be transferred by the Centres at Ushant, Jobourg and Gris Nez Traffic to Channel 79 and by Dover Coastguard to Channel 80.

(9) Ships referred to in paragraph 7 should make their report to the nearest designated station. If unable to make contact with any of these stations the report should be made through a Coast Radio Station and addressed to one of the designated stations.

Information Broadcasts:

(10) Routine broadcasts will be made by the Centres at Ushant, Jobourg, Gris Nez and Dover on VHF Channel 11 with additional routine broadcasts in restricted visibility at the following times:

	Clear Weather	*Restricted Visibility*
Ushant Traffic	H+10	H+25
	H+40	H+55
Jobourg Traffic	H+20	H+05
	H+50	H+35
Gris Nez Traffic	H+10	H+25
Dover Coastguard	H+40	H+55

(11) Urgent broadcasts will be transmitted as necessary at any time.

(12) All broadcasts will be preceded by a forewarning on VHF Channel 16.

(13) Broadcasts will cover navigational and traffic information of immediate interest and information on movements of ships which appear to be navigating within a traffic separation scheme contrary to the requirements of Rule 10 of the International Collision Regulations.

Ship's Radio Watch:

(14) In order to derive the fullest benefit from the MAREP scheme a continuous watch should be maintained between routine broadcasts on VHF Channel 16 (and on Channel 11 where two channel reception is available).

Caution

(15) It is emphasised that the MAREP scheme does not absolve the Master from his sole responsibility for the safe conduct of his ship.

APPENDIX:

Ship Reporting System:

System Identifier	MAREP	
Type of Report	POSREP	(Position Report) or
	DEFREP	(Defect Report) or
	CHANGEREP	(Change Report)

Heading	*Text*	*Explanation or Example*
Identification of message	MAREP	
Type of message		POSREP
Identity of ship	ALFA+name of ship plus call sign	
Group date/hour	BRAVO+6 figure (Zulu)	Date of month: 2 figures. Hours and minutes: 4 figures
Position	CHARLIE+Latitude and Longitude	Latitude: 4 figures followed by N or S Longitude: 5 figures followed by E or W
	or CHARLIE+name of port of departure	If the vessel is sailing from a port in the coastal zone
	or DELTA+bearing – distance in relation to a sea mark	Bearing: 3 figures in degrees. Distance: 2 figures in miles from land/sea mark indicated
True Course	ECHO+true course	3 figures in degrees from North
Speed	FOXTROT+speed in knots and tenths of knots	3 figures
Destination	INDIA+name of port of destination and probable time of arrival	
Radio-Communications	MIKE+VHF Channel number	Give number of VHF Channel monitored and if applicable number of second Channel monitored
Draft	OSCAR+maximum present draft	4 figures in metres and centimetres
Cargo	PAPA+industrial name of product or IMDG Code No.+quantity	Nature of cargo. Quantity expressed in tonnes
Navigational Restrictions	QUEBEC+brief description in clear	Stopped, moored, hampered by draft; generally any restriction on manoeuvrability
Additional Comments	X-RAY+brief particulars	Any other information which may be useful.

Note: The headings QUEBEC and X-RAY can be omitted when there is nothing to report.

ABERDEEN: 57.09 N. 02.03 W. (See Plan)

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Light Certificate.
1 Port Dues Certificate.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British ships only.
Load-line Certificate.
Safety Equipment Certificate.
Lloyd's Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Aberdeen has a compulsory pilotage district and there are 10 licensed Pilots. Boatage service, although not compulsory, is available. There are 10 licensed boatmen.

There is a Navigation Control Service equipped with harbour surveillance radar which is operated by Navigation Control Officers who operate on a 24 hour basis.

RESTRICTIONS: Navigation Channel: Max. designed width 33.5 m., max. designed depth at HWOST 10.25 m. Traffic signals regulate the movement of vessels in the Navigation Channel.

Entrance to Victoria Dock, depth at MLWS 6.6 m., clear width at entrance 43 m.

MAX. SIZE: Assuming no siltation the port can accommodate vessels up to 160 m. in length, 24.4 m. beam and drawing up to 9.3 m. at MHWS or 8.3 at MHWN. Larger vessels may be accepted after consultation with the Harbour Master. A vessel 166 m. in length has ben handled.

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a port doctor or an Officer of H.M. Customs depending on where the ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (N. European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board the Port Health Authority must be informed preferably not more than 12 hours and not less than 3 hours before arrival.

Also see "Health – All Ports" before first UK port.

VHF: There is a VHF radio communications system which operates on Channels 6, 11, 12 and 16.

BERTHING: Tidal:

	Length	Depth MHWS
Tidal Harbour	732 m.	9.3 – 10.3 m.
Albert Basin	1,806 m.	8.7 – 13.6 m.
River Dee (Navigable)	913 m.	8.4 – 10.8 m.
River Dee Dock	417 m.	9.3 – 10.8 m.
Upper Dock	463 m.	9.0 – 10.3 m.
Victoria Dock	1,532 m.	10.3 – 13.6 m.

Deep-Water Berths:

No. 1 Atlantic Wharf: This is 146 m. long with 9.3 m. at MLWS. Two-storey transit shed. Excellent road and rail connection.

No. 2 Pacific Wharf: This is 160 m. long with 9.9 m. at MLWS. Open quay. 2×6 ton and 1×50 ton electric Portal cranes capable of handling heavy lifts and containers. 1×3,000 t.p.d. grain conveyor (Private), outreach of boom 27 m.

No. 3 Waterloo Quay: This is 180 m. long with 9.9 m. at MLWS. 2×20 ton cranes at Waterloo Quay West. Ro-Ro service operated by P&O to Shetland.

No. 4 Regent Quay East: This is 228 m. long with 9.9 m. at MLWS. Two transit sheds. 2×8 ton level luffing electric portal cranes capable of handling 11 tons at 25 m. radius. Excellent road connections. Forest products terminal in operation.

FRESH WATER: This service is provided by the Grampian Region Water Services and is available at all quays.

REPAIRS: Ship repairing facilities and shipping supplies are offered by a number of private firms and individuals with premises beside the harbour.

DRY DOCKS: (Pontoon Docks).

	Overall Length (m.)	*Breadth at Entrance* (m.)	*Depth on Blocks* (m.)	*Lifting Capacity*
No. 1	55	8.8	4.9	700 tonnes
No. 4	64	11.6	5.5	1,000 tonnes

There is also 1 privately owned slipway and 1 drydock.

SURVEYORS: Lloyd's and Det Norske Veritas.

MEDICAL: Doctors and hospitals facilities available. Agents should be advised in advance of any medical attention required.

CUSTOMS ALLOWANCES: At the discretion of Local Customs Inspector. Normal allowances are equivalent to 8 oz. of tobacco per man and equivalent to 1 bottle of wine per man. Allowances may be halved for home trade vessels. Vessels in port for more than 3 or 4 days may receive extra allowances.

CONSULS:

Belgium	G. D. G. Mackinnon, 23 Market Street
Denmark	R. P. H. Pirie, 62 Marischal Street
Finland	D. G. R. Stroud, 62 Marischal Street
France	G. D. G. Mackinnon, 23 Market Street
Germany F.R.	A. H. S. Lewis, 186 Albert Quay
Iceland	D. G. R. Stroud, 62 Marischal Street
Netherlands	D. M. Grant, 21 Golden Square
Norway	D. G. R. Stroud, 62 Marischal Street
Spain	D. G. R. Stroud, 62 Marischal Street
Sweden	R. P. H. Pirie, 62 Marischal Street

AIRPORT: International airport nearby at Dyce. There are frequent daily jet services to London operated by British Airways, and in addition British Airways also operate services to Edinburgh, Glasgow, Prestwick, Wick, Orkney and Shetland. There are also services to Manchester and Birmingham.

Air U.K. operate direct services from Aberdeen to Amsterdam, Bergen, Copenhagen, London (Stansted), Stavanger, Edinburgh, Jersey, Leeds/Bradford, Humberside, Newcastle, Norwich, Isle of Man and Teesside.

TIME: BST is GMT plus 1 hour. GMT during Winter months.

HOLIDAYS: 1st and 2nd January; Spring Holiday (variable date); Summer Holiday (variable date); September Holiday (variable date); Christmas Day (25th December).

POLICE/AMBULANCE/FIRE: Dial 999 from any telephone and ask for service required.

TELEPHONES: There are berths at which GPO telephone service can be made available to vessels. All operational posts are linked by telephone network.

AUTHORITY: Aberdeen Harbour Board, 16 Regent Quay, Aberdeen AB9 1SS, United Kingdom. *Tel:* (0224) 592571. *Telex:* 73324. *FAX:* (0224) 571507. *Contact:* J. R. Turner, General Manager. Captain B. Atkinson, Harbour Master.

AMLWCH: 53.27 N. 04.20 W.

S.B.M. DISCHARGE FACILITY CEASED OPERATIONS IN 1988. BUOY REMOVED.

ARBROATH: 56.33 N. 02.35 W.

APPROACHES: Arbroath, situated between Dundee and Montrose, has been recently downgraded from a commercial port to a fishing harbour.

There is a bar 400 m. S.E. of the Piers, depth 0.609 m. LWS, which is dangerous in heavy Easterly weather.

MAX. SIZE: Largest vessel, 65 m. length, 4 m. draft.

BERTHING: Outer harbour has an area of 1.5 ha., depth of 4.57 m. at HWST. Length of quayage 451 m.

Between the outer harbour and entrance jetty is a Wet Dock with a patent slipway (122 m. long).

FRESH WATER: Available.

FUEL: Diesel available.

AIRPORT: Dundee, 29 km.

REPAIRS: Can be carried out at repair yard.

DRY DOCKS: None. Patent Slipway 122 m. long. Length of cradle 32.6 m. Lifting power 150 tonnes.

POLICE/AMBULANCE/FIRE: Dial 999.

Arbroath Harbour is a station for a R.N.L.I. Lifeboat "Shoreline" and an inshore inflatable boat.

AUTHORITY: Tayside Regional Council, Harbour Office, Arbroath Harbour, Tayside. *Tel:* Arbroath 72166. *Contact:* Captain G.D. Easton, Harbour Supervisor.

ARDROSSAN: 55.38 N. 04.49 W. (See Plan)

DOCUMENTS: Normal documents required:

Customs Documents.
Health Documents.
Crew List.
Passenger List.
Ship's Papers, etc.

PILOTAGE: Pilotage compulsory for vessels over 750 g.r.t. operated by Clyde Pilotage Authority. Pilot boards off Little Cumbrae Island. Pilot boat on VHF Channels 16 and 14.

24 hours notice required and amendment if ETA changes.

ANCHORAGE: In 12 to 15 fathoms 1 mile S.W. of breakwater.

RESTRICTIONS: 3 red lights vertically day and night above Port Control Tower (see "Plan") indicates "Port Closed".

MAX. SIZE: Eglinton Dock approx. 420 ft. by 57 ft. by 16 ft./18 ft. (depending on tide). North Montgomerie Pier Tanker Berth – max. length 575 ft., max. draft, up to 70 ft. beam, 23 ft./26 ft.; over 70 ft. beam, 22 ft./25 ft.

HEALTH: All vessels requiring attention of Medical Officer shall show flag signal ZW by day, or between sunset and sunrise, either morse signal ZW by lamp, or a red light over a white light, not more than 6 ft. apart. Other vessels shall show flag signal "Q" by day, or between sunset and sunrise either morse signal Q by lamp or a red over a white light, not more than 6 ft. apart.

Certificate of Pratique will be issued by Customs Boarding Officer on receiving a satisfactory and fully completed Maritime Declaration of Health. No further formalities required at subsequent ports of call in the U.K.

Also see "Health – All Ports" before first U.K. port.

RADIO: VHF Channels 12, 14, and 16. Radio telephone via Portpatrick.

TUGS: On application to Clyde Tug Owners.

BERTHING: No special requirements except with draft over 16 ft. when vessel may be delayed waiting for tide.

STEVEDORES: Orders to be given by 1130 hrs. previous day.

MEDICAL: No advance notice required unless medical attention is necessary immediately on vessel's arrival. No hospital facilities in Ardrossan, nearest hospital being at Irvine, 6 miles and Kilmarnock 16 miles.

TANKERS: Hoses 8 in. Berths (1) Up to 3,000 d.w.t. (2) Up to approximately 20,000 d.w.t. Max. draft 22 ft./26 ft. depending on beam and tide.

DENSITY: 1025.

FRESH WATER: Available continually at all berths.

FUEL: Marine oils available by road tanker.

FIRE PRECAUTIONS: Patrolman required for hazardous cargoes.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: Opened and closed by crew.
CERTIFICATES: Following Certificates are requested: Load Line, Safety Radio, Safety Equipment, Safety Construction, Derat, and Current Trinity House Light Bills.
CUSTOMS ALLOWANCES: Standard U.K. allowances.
IDENTIFICATION CARDS: Not required.
CONSULS: Norwegian Vice Consulate, Danish Vice Consulate: C.A. Mair (Shipping) Ltd., Winton Buildings, Ardrossan. Tel. Ardrossan 605284.
REPAIRS: Limited repair facilities.
REPATRIATION: Customs Boarding Officer acts for Immigration Dept. and arrangements for repatriation can be arranged in conjunction with ship's Agent.
AIRPORTS: Prestwick 18 miles. Glasgow 25 miles.
TIME: BST, that is GMT plus 1 hour. GMT in Winter months.
HOLIDAYS: 1st and 2nd January; Easter Monday; May Day, First Monday in May; Third Monday in July; First Monday in October; Christmas Day and Boxing Day. Cargo work may be available on certain holidays by special arrangement.
POLICE/AMBULANCE/FIRE: Police tel. Saltcoats 63966; Ambulance, Fire: Ask telephone operator.
SHORE LEAVE: No restriction.
DEVELOPMENTS: Roll-on/Roll-off berth for specialised traffic.
AUTHORITY: Ardrossan Harbour Company Limited, Harbour Office, Ardrossan, Ayrshire, KA22 8DB, United Kingdom. *Tel:* (0294) 63972-4. *Telex:* 777954. *Contact:* Captain D. Gillespie, Managing Director and Harbour Master.

AYR: 55.28 N. 04.38 W. (See Plan)
TROON: 55.33 N. 04.40 W. (See Plan)

LOCATION: *Ayr:* On the West coast of Scotland, at the mouth of the River Ayr.
Troon: 14.5 km. (9 miles) North along the coast from Ayr.
DOCUMENTS:
Customs Require:
- 2 copies Form XS1.
- Ship's Register.
- Load-line Certificate.
- Safety Radio Certificate.
- Passenger List.
- Crew List.

Port Health Require:
- Derat Certificate.

Agents Require:
- 1 copy Form XS4.
- Bills of Lading.
- 2 copies Manifest.

PILOTAGE: Compulsory for vessels over 1,600 g.r.t. Pilot boards off Bar Light Buoy. 24 hours' notice of ETA required for Pilot via Agent or Dock Authority. Ayr Pilots listen on Channel 16 and work on Channel 14 VHF. VHF watch hours: Monday-Thursday 0800-2400. Friday 0800-2300.
ANCHORAGE: To Pilot's advice. Easterly winds Ayr Bay, Westerly gales anchor East side of Arran Island.
RESTRICTIONS: Draft restriction at LW. Enter on Pilot's advice.
MAX. SIZE: Dock: Length 95 m. Max. draft 6.00 m. River (Ayr): Length depending on berth. Max. draft 6.20 m. Max. length for turning 110 m.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Local station, call sign GPK on 2381 kHz. VHF radio only, operating on Channel 14 and listening on Channel 16.
TUGS: 1 tug of 5 tonnes bollard pull.
RADAR: No radar station.
BERTHING:

Dock	Quay Length (Total) (m.)	Depth of Water (m.)	Maximum Size of Vessel Length (m.)	Beam (m.)	Draft (m.)
Ayr:					
Tidal	610	6.0	95	18.0	5.8
River (North)	549	6.4	No restriction	—	6.2
River (South)	488				
Troon:					
Tidal	366	6.0	55	12.2	—
Outer	1,372	7.5	146	No restriction	7.3

Storage and Warehousing Facilities: Open storage space totalling 2.7 hectares.
Cranage and Mechanical Handling: 1 mobile crane 1.5 tonnes, 2 mobile cranes 3 tonnes; 2 mobile cranes 35 tonnes, 1 mobile crane 40 tons, 1 mobile crane 70 tons, 8 mechanical shovels from 0.5 to 5.0 cu.m. capacity. 2 conveyors loading speed 300 – 650 tonnes/p.h. There is also a fixed coaling appliance capable of loading 600 tonnes/p.h. 2 forklifts 2.7 tonnes, 1 forklift 8.2 tonnes, 2 forklifts 5 tonnes, 1 forklift 4 tonnes.
STEVEDORES: 24 hours notice of ETA should be given to stevedores.
Port Working Hours: Monday-Thursday 0800 – 1700 hrs., Friday 0800 – 1600 hrs. Overtime 0600 – 0800 hrs., 1700 – 2100 hrs.
Saturday 0600 – 1200 hrs. Sunday 0800 – 1700 hrs. Any other hours by arrangement.
MEDICAL: Hospital facilities nearby in town.
DENSITY: Varies according to weather.
FRESH WATER: Available at all berths.
FUEL: All grades available, 24 hours notice.
GANGWAY/DECK WATCHMEN: Deck watchman required; may be supplied by arrangement with stevedores.
OPENING/CLOSING HATCHES: Performed by ship's crew.
CUSTOMS ALLOWANCES: 0.25 lb. of tobacco or equivalent cigarettes, and one-sixth of a gallon wine/spirits per man.
IDENTIFICATION CARDS: Seamen's identity cards should be carried.
REPAIRS: Most engine and deck repairs available.
DRY DOCKS: Two at Troon, Ailsa–Perth Ltd.
No. 1 Dock: 85.3 m. long, 11 m. wide, 3.5 m. depth over sill.
No. 2 Dock: 140.4 m. long, 17 m. wide, 4.7 m. depth over sill.
AIRPORT: Nearest at Prestwick, 7 miles away, mostly International flights.

Air UK flights from Edinburgh to Aberdeen, Amsterdam, Esbjerg, Humberside, Leeds/Bradford, London (Stansted), Norwich and Paris.
TIME: GMT plus 1 hour, reverting to GMT in Winter months.
HOLIDAYS: Christmas Day and Boxing Day.
POLICE/AMBULANCE/FIRE: Dial 999, and ask for service required.
TELEPHONES: No connection on board vessel.
SERVICES: Special arrangements can be made for tank washing and compass adjusting through Glasgow.
SHORE LEAVE: No restrictions on shore leave.
AUTHORITY: Associated British Ports – Ayr & Troon, Port Office, Ayr KA8 8AH, United Kingdom. *Tel:* (0292) 281687. *Telex:* 778853 Kenny G. *FAX:* (0292) 287787. *Cables:* Dainnex Ayr. *Contact:* T. L. Kenny, Port Manager.

BANGOR: 54.39 N. 05.40 W. (See Plan)

PORT LIMITS: A line drawn from Wilson's Point to Luke's Point.
DOCUMENTS: Standard U.K. documentation.
PILOTAGE: Not compulsory but advisable if unfamiliar with the area. Pilot may be obtained from the pilot station at Carrickfergus after call on VHF Channel 16.
ANCHORAGES: 2 cables off North Breakwater or in Ballyholme Bay with offshore winds.
RESTRICTIONS: Due to limited amount of berthing facilities, permission should be sought from the Harbour Master before entering the Harbour.
MAX. SIZE: LOA 70 m. Draft 4.0 m. at HWOST. In 1990 it is intended that vessels of up to 75 m. in length will be able to berth at the New Centre Pier, which will be a steel piled structure with a depth alongside of 2.9 m. at LW.
Also see "Berthing."
HEALTH: Standard regulations apply. Vessels should inform Port Health Officer Belfast of any sickness on board.
VHF: A listening watch is kept on VHF Channel 16 from about 1 hour before HW till HW when vessels are expected. Working frequency is Channel 11.
TUGS: Can be ordered from Belfast if required.
BERTHING: Commercial traffic into Bangor has been suspended until approximately April/May 1989, due to the construction of the new Pickie Breakwater and the extension of the Centre Commercial Pier.
BRIDGES: None.
STEVEDORES: None locally.
MEDICAL: Full hospital facilities available.
FRESH WATER: Available on Central Pier.
FUEL: Available by tank wagon.
TANKERS: No facilities.
CONSULS: Nearest at Belfast.
REPAIRS: Minor repairs only.
SURVEYORS: Available from Belfast.
GANGWAY/DECK WATCHMEN: Not usually available.
HATCHES: Opening/closing done by ship's crew.
CUSTOMS ALLOWANCES: U.K. Regulations apply.
CARGO GEAR: The harbour's 5 tonne crawler crane has been removed, and in future vessels will have to use their own cargo gear, or hire one of the available mobile road cranes in the district.
REPATRIATION: Can be arranged by Agent.
AIRPORT: Aldergrove Airport.
TIME: GMT plus 1 hour from late March – late October. GMT for rest of year.
POLICE/AMBULANCE/FIRE: Dial 999.
TELEPHONES: Cannot be placed on board. Several in vicinity of berth.
SHORE LEAVE: No restrictions.
DELAYS: There should be no delays in berthing when the Centre Pier is in use again. Berthing times will depend on the arrival drafts.
DEVELOPMENTS: The new North Breakwater runs in a Northwesterly direction with seaward side built of S.H.E.D. units, and the sheltered S.W. side of corrugated steel piling, where safe berthing is available over a distance of 95 m. with a minimum depth of 3.7 m. at LW.

A 600 berth marina is to be constructed in the inner harbour, where the minimum depth will be approximately 2.0 m. at LW.
AUTHORITY: North Down Borough Council, Town Hall, Castle Grounds, Bangor, Co. Down, Northern Ireland BT20 4BT. *Tel:* (0247) 270371. *Contact:* Captain W. O. Burns, Harbour Master, Tel: (0247) 270371, ext. 255.

BARROW-IN-FURNESS: 54.07 N. 03.14 W. (See Plan)

PORT LIMITS: The seaward boundaries of the port are a line joining Westfield Point (Lat. 54° 05′ 33″ N., Long. 03° 11′ 10″ W.) with Scar End Point on Walney Island (Lat. 54° 03′ 31″ N., Long. 3° 12′ 17″ W.).

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
Health Declaration.
Ship's Certificates and Cargo Documents.

PILOTAGE: Pilot boards at Lune buoy, using Pilot cutter, usually 2 or 3 hours before high water.

The Heysham Lake Pilot vessel listens on 2182 kHz (MF) and is also equipped with VHF listening continuously on Channel 16. The working frequencies are 2241 kHz and 2246 kHz and Channels 6, 12 and 14 respectively. Ships which are suitably equipped should pass their ETA through any United Kingdom Post Office Coast Station to their Agent 24 hours before arrival.

ANCHORAGE: At Lightning Knoll Buoy, depth of 10 m. at LW. In adverse weather conditions vessels proceed to Ramsey Bay, 16 km. away, for shelter.

RESTRICTIONS: No docking after HW. Tidal range 7.1 m. MHWN, 9.2 m. MHWS. Deduct 0.5 m. from height of high water to allow for invert at dock entrance. Access to the port, which is protected from the prevailing Westerly winds by Walney Island, is gained from the Irish Sea through the harbour along the well-defined Walney Channel. The depth of water on the Ramsden Dock entrance sill can range from 10.06 m. at high water springs to 6.4 m. at high water neaps.

MAX. SIZE: Length 183 m. Beam 23 m. Draft according to tide.

HEALTH: Vessels arriving from abroad are given Pratique by Customs Boarding Officers. In case of suspected disease or fever on board notify Agent prior arrival. Agent will advise Port Health Authorities.

Also see "Health – All Ports" before first U.K. port.

RADIO: Local stations: Anglesey Radio, and/or Port Patrick Radio.

VHF: Port VHF service. Call sign 'Ramsden Dock Radio'. Channel 16 (156.8 MHz) Calling and Safety. Channel 12 (156.6 MHz) Port Operations.

TUGS: Liverpool tugs available on request. Notice required.

BERTHING:

Docks	*Water area in Hectares*	*Width of entrance*
Ramsden	22.5	30.48 m.
Buccleuch	13.0	30.48 m.
Devonshire	5.0	24.4 m.

Walney Channel Deep-water Berth: 259.10 m.×30.48 m.×10.06 m. depth.

Ramsden includes: Ramsden Dock Basin with 3 berths with a total quayage of 378 m., taking vessels of up to 9.15 m. draft, and Anchor Line Basin with three berths 256 m., 152.4 m., and 274.3 m., long respectively, taking vessels of up to 7.3 m. draft. Anchor Line berth equipped for Ro/Ro traffic.

DENSITY: 1015 to 1025.

FRESH WATER: Available from quayside hydrants.

FUEL: Can be obtained from bunkering facility at No. 3 Berth, Ramsden Dock Basin.

GANGWAY/DECK WATCHMEN: Compulsory.

OPENING/CLOSING HATCHES: Handled by ship's crew.

IDENTIFICATION CARDS: Seaman's Book or Passport required by non-British crew.

CONSULS: Netherlands, Portugal, Spain (Vice-Consul) represented by James Fisher & Sons PLC. Tel. Barrow-in-Furness 22323.

AIRPORT: Regular scheduled flights to Manchester and the Isle of Man from Walney Airport, located 4 miles from the docks. Contact Air Furness Ltd. Tel. Barrow–in–Furness 42442.

TIME: As for other UK ports.

HOLIDAYS: As for other ports in England.

POLICE/AMBULANCE/FIRE: In emergency Tel. 999; for enquiries and other calls – Police: Barrow 24532; Ambulance: Carlisle (0228) 20345; Fire Service: Barrow 21363.

SHORE LEAVE: No restrictions.

AUTHORITY: Associated British Ports – Barrow and Silloth, Port Office, Ramsden Dock Road, Barrow-in-Furness, Cumbria, LA14 3NB. *Tel:* (0229) 22911. *FAX:* (0229) 35822. *Contact:* Captain J.W. Green, Port Manager and Harbour Master.

BARRY: 51.24 N. 03.16 W. (See Plan)

DOCUMENTS: Required for arrival:

C.142	2 Copies	Crew Declaration
C.14	3 Copies	Stores Declaration
C.13	2 Copies	General Declaration (completed by Agent)
C.16	2 Copies	Cargo Inward Declaration
C.74	1 Copy	Master's Authority (Agent's complete)
C.1320	2 Copies	Cargo in un-registered spaces.

These documents are to be completed and presented with copies of manifests and ship's documents at the time of report.

PILOTAGE: Telegraphic address of pilot station: S.E.W.P.A. Pilots, Pier Head, Barry Docks. Amount of advance notice of ETA required: 24 hours. Final confirmation to be given by VHF or R/T when within 2 hours of pilot station. VHF channel or frequency to be used when contacting pilot boat or pilot station: VHF Channel 16 thence working Channels 6, 8, 10, 11, 22.

Pilot boat: Motor launch black hull with "S.E.W.P.A. Pilot" in white on same. White superstructure. Light or sound signals to be made by vessels requiring a Pilot: flag "G" over numeral "6" flown by day, or "6" sounded on whistle or siren; flashed by lamp at night.

Exact area where pilot boat is located normally between Nash Point and Breaksea Lanby Buoy. Smaller vessels may be boarded in Barry Roads.

ANCHORAGE: Barry Roads, 10 fathoms, safe anchorage. Large vessels should anchor West of Breaksea Lanby Buoy. Small vessels 0.75 mile S.E. of Barry Dock Entrance.

RESTRICTIONS: Entrance only 4 hours before HW to 4 hours after HW.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Barry Docks Radio, Channels 10 and 11.

VHF: Channels 16, 10, 11 and 22.

TUGS: Join vessel at Barry Roads. Tug's or ship's lines utilised.

BERTHING:

Dock	*Quay Length (Total)* (m.)	*Normal Depth of Water* (m.)	*Max. Size of Vessel Length* (m.)	*Beam* (m.)	*Draft* (m.)	*Max.* d.w.t.
No. 1 Dock	2,894	9.8	178	23	9.1	23,000
No. 2 Dock	(9,490 ft.)	9.8	178	23	9.1	23,000
No. 3 Dock Basin		Semi-tidal	178	23	9.1	23,000

Vessels up to 22.9 m. beam can be accepted on favourable tides. Max. 23,000 d.w.t. with draft of 9.1 m.

Storage and Warehousing Facilities: 3,700 sq.m. transit shed and 1,860 sq.m. temperature controlled holding store within dock basin. No. 2 Dock provides a further 2 transit sheds totalling 7,413 sq.m. Additional covered storage within the port area comprises 4 sheds totalling 7,686 sq.m. (82,650 sq. ft.). Ample open storage space is also available.

Cranage and Mechanical Handling: Basin: 4 × 6 tonne. No. 2 dock, South Side: 4 × 6 tonne and 2 × 5 tonne. Berth No. 31: 5 × 10/11.5 tonne grabbing cranes.

Forklift Trucks: 32 of varying capacities up to 25 tonnes.

Pallet Trucks: 41 × 2 ton capacity.

Specialised Facilities:

i) One of the largest tank storage facilities in Britain with tank capacity of more than 260,000 tonnes suitable for oil, chemicals, and natural gas.

ii) 2 fixed Ro/Ro berths, located in No. 2 Dock and No. 3 Dock Basin. These are backed by 4 hectares (10 acres) of land for marshalling and storage of vehicles.

iii) The port is licensed to handle explosives both in dock and at specially approved anchorages.

iv) A bulk loading conveyor installed at No. 2 Dock is capable of handling coal and coke at a speed of 450 tonnes per hour and is served by road and rail, with stocking areas.

v) Windward Terminal: Banana Terminal used by Geest Industries. 6,400 sq.m. of storage area (temperature controlled). 4 × 6 ton quay cranes. Terminal can accommodate vessels of 10,000 d.w.t.

BRIDGES: Bridge swung to vessel's requirements.

STEVEDORES: An early ETA essential. Enables planning to be effected in conjunction with other work in port.

Port Working Hours: Monday – Thursday: 0700 – 1630 hrs. Friday 0700 – 1530 hrs.

Daily and weekend overtime available and shiftwork can also be arranged on request.

MEDICAL: Hospital facilities available. Advance notice desirable.

TANKERS: 6 tanker berths, maximum draft 28 ft.

DENSITY: Density 1020.

FRESH WATER: 15/20 t.p.h. per hose.

FUEL: By barge or road transport.

GANGWAY/DECK WATCHMEN: The services of watchmen provided at discretion of Shipowner or Agent.

OPENING/CLOSING HATCHES: Work normally undertaken by ship's crew but the port will, if requested, provide a crane to assist in this work on completion of a "Hatch beam form". Riggers may be employed on this work at request of shipowner.

CUSTOMS ALLOWANCES: Refer to Customs. Tel: Cardiff 488088.

IDENTIFICATION CARDS: Not needed by Port Authority.

CONSULS: None. Many located at Cardiff 8 miles East of Barry.

REPAIRS: All types of repair undertaken by private ship repairers.

DRY DOCKS: One dry dock, length 286.5 m. and width 23.9 m. – not in use.

REPATRIATION: All facilities available.

AIRPORT: Cardiff (Wales) Airport, 4 miles, served by regular airlines.

TIME: GMT, except late March – late October when British Summertime (GMT plus 1 hour) is in operation.

HOLIDAYS: Bank Holidays. Arrangements made to work if essential.

POLICE/AMBULANCE/FIRE: Call operator by dialling 999.

TELEPHONES: At main berths.

SHIP SUPPLY SERVICE: A Ship Supply Service could be provided by Cory Ship Towage with their tugs at Cardiff if required. Address: Cory Ship Towage Ltd., S.E. Wales Office, Alexandra Dock, Newport, Gwent. NP9 2NP. Tel: Newport 56835/6.

AUTHORITY: Associated British Ports, Pierhead Building, Bute Docks, Cardiff, South Glamorgan CF1 5TH. *Tel:* (0222) 471311. *Telex:* 498542. *FAX:* (0222) 471100. *Contact:* Mr. B. J. Harding, Port Manager, Cardiff and Barry. N.S.H. Palmer, Operations Manager. Captain R.S. Grubb, Harbour Master.

BELFAST: 54.36 N. 05.56 W. (See Plan)

DOCUMENTS:

1 Passenger and Crew List for Immigration.
1 Crew Declaration C142 (for H.M. Customs).
1 List of Ship's Stores (for H.M. Customs).
1 Maritime Declaration of Health.
1 Cargo Manifest.

PILOTAGE: Pilot station is situated on end of East Pier at Carrickfergus. It is manned continuously. Vessels requiring a Pilot should give as much advance notice as possible of ETA, but in any case not less than 2 hours. Pilots may be ordered through:

(i) Pilot Station Carrickfergus, tel. Carrickfergus 62329. VHF Channels 16, 9 and 12.
(ii) Port Operations Station, tel. Belfast 234422 Ext. 234, or Belfast 238506.
(iii) Belfast Harbour Office, tel. Belfast 234422 Ext. 231, 0900 – 1700 hrs. Monday-Friday.

There are two motor launches servicing Pilots. "Pilot Boat I" is 33 ft. long and "Mabel Helen" is 46 ft. 8 in. long. Both vessels are painted black with word Pilot in white letters on each side.

Pilot launches may be contacted on VHF Channel 16 and working frequency Channel 6, 8 and 12.

Usual international signals should be made for a Pilot. Pilots board from 1.5 to 2 miles S.E. of Carrickfergus. In poor visibility the pilot launch makes a sound signal of 4 short blasts. Vessels may be led into calm water before boarding.

ANCHORAGES: Safe anchorages, according to draft and size of vessel are available through Belfast Lough East of a line from Carrickfergus to Grey Point.

RESTRICTIONS:

Intended depths in the entrance channels: Victoria Channel, sea to Refinery berths – 30 ft. below datum. Refinery to Thomson Wharf – 26 ft. below datum.

Musgrave Channel, 24 ft. below datum.

Herdman Channel, 21 ft. below datum.

MAX. SIZE: Vessels' size is restricted only by depth of water available. See "Restrictions", "Berthing" and "Tankers".

HEALTH: Use International Code quarantine signals. Master of a ship approaching a port in Northern Ireland from a foreign port other than an excepted port must ascertain state of health of all persons on board, and must fill in and sign Declaration of Health. It should be completed and ready to deliver to the Customs Officer, or authorised officer of the Port Health Authority, whichever first boards the ship.

If any suspected diseases on board, Free Pratique will not be granted by Her Majesty's Customs until the ship has been visited by the Port Medical Officer. Therefore in these cases notify "Portelth Belfast" by radio in advance.

Also see "Health – All Ports" before first U.K. port.

RADIO: The best station for messages, cables, etc., is Port Patrick call signal GPK.

VHF: Belfast Port Operation and Information service is situated in the main harbour office building. A continuous watch is maintained on VHF on Channel 16. Working Channel is 12. Call sign is Belfast Harbour Radio.

TUGS: Tugs are owned by Cory Ship Towage Ltd., Tel. Belfast 743278. They are fitted with VHF Channels 16, 14, 12, 8 and 6. Tugs normally meet inward bound vessels in vicinity of No. 20 beacon. Use of tugs' lines is optional. Charge for use of each tug line is £15.

BERTHING: The following berths are equipped for handling containers or drive-on, drive-off traffic:

Berth	*Max. draft (ft.)*
Donegall Quay 2 (1×35 tonne Scotch derrick)	18
Donegall Quay 4 (2×7.5 tonne portal crane) also Ro/Ro	18
Donegall Quay 5 (No cranes)	18
Donegall Quay 6 (No cranes)	18
Ballast Quay (1×25 tonne derrick crane) also Ro/Ro and 600 ton heavy Ro/Ro pad	18
York Dock A (No cranes)	24
York Dock 1 (New self-contained container terminal, 1×30 ton transporter crane)	24
Herdman Channel West (2×30 tonne transporter cranes)	18
Gotto Wharf (2×30 tonne transporter cranes)	21
Stormont Wharf 2 (200 tonne cantilever crane)	28
Pollock Dock 7 (1×35 tonne derrick crane)	18 – 34

Numerous general cargo berths and cranage from 3 – 15 tonnes.

Unitank Storage Co. Ltd. have constructed a bulk liquid terminal for the storage of petroleum, chemical products, etc. Special tankers ship liquid gas to the storage installation of Calor Kosangas (Northern Ireland) Ltd. at Musgrave Channel.

MEDICAL: All kinds of medical treatment are available. Agent should be given as much notice as possible for arrangements to be made.

TANKERS: Tankers have to observe (i) Belfast Harbour Commissioners By-Laws for loading, discharging, etc., of petroleum spirit. (ii) Chamber of Shipping Tanker Safety Code. (iii) The Merchant Shipping (Tankers) (EEC requirements) Regulations 1981.

6,000 tons of tank washings can be processed at B.P. Refinery.

Tanker Berths: Oil Berth No. 4 – 35 ft. Oil Berth No. 1 – 28 ft. Oil Berth No. 2 – 28 ft. Oil Berth No. 3 – 28 ft.

STEVEDORES: Two schooling times per day for stevedoring gangs – 0800 and 1300 hrs. Gangs for all week-end work are schooled at 1300 hrs. on Fridays.

DENSITY: Average density of water in Inner Harbour is about 1012, and Outer Harbour is about 1024.

FRESH WATER: Available at almost all berths. Delivery is by hose at a rate of approx. 30 t.p.h. Arrangements can be made through Dept. of Environment (Water Services Division). Tel. 746581.

FUEL: All grades of fuel oil are available by road tanker only. 48 hours' advance notice of requirements should be given.

FIRE PRECAUTIONS: Special precautions for vessels carrying petroleum, explosives, calcium carbide and dangerous goods are set out in the appropriate by-laws. A copy of general port fire notice, delivered to all ships on arrival.

Also see "Tankers".

GANGWAY/DECK WATCHMEN: Normally, a member of ship's company acts as watchman. Shore watchmen may be obtained through Agent.

OPENING/CLOSING HATCHES: Conventional beams and hatches and slab hatches are opened and closed by stevedores. McGregor or patent steel hatches are worked by ship's personnel. Ship's personnel required to work all types of hatches at grain silos.

CERTIFICATES:

Register. Radio Certificate. Load Line Certificate. Safety Equipment Certificate. Safety Construction Certificate. Light Bills. Passenger Certificate if applicable. Chain Register. Derat Certificate.

CUSTOMS ALLOWANCES: Tobacco: 8 oz. tobacco are permitted per man and issues are made at 8 day intervals. Wine and/or Spirits: Wine, beer and spirit issues are made, in moderation, at 4 day intervals.

IDENTIFICATION CARDS: Seamen's identity cards required.

CONSULS:

Belgium	Hillsborough 682671
Denmark	Belfast 230581
Dominican Republic	Belfast 230321
France	Belfast 660325
Germany F.R.	Ballymena 41412
Italy	Belfast 778353
Netherlands	Belfast 243126
Norway	Belfast 242242
Spain	Belfast 227571
Sweden	Belfast 230581
Switzerland	Carrickfergus 61195
U.S.A.	Belfast 228239

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCKS: Belfast Dry Dock, length of floor 1,100 ft. breadth of floor 167 ft., breadth of entrance 165 ft., level of sill 26 ft. 6 in. below datum.

Harland and Wolff Building Dock, length of floor 1,825 ft., breadth of floor and entrance 305 ft., level of sill 16 ft. 10 in. below datum.

Two other dry docks available.

REPATRIATIONS: Crew may be changed and repatriations arranged. Immigration must be informed.

AIRPORT: Aldergrove Airport is approximately 17 miles from Belfast. There are daily flights to all parts of United Kingdom. Belfast Harbour Airport has daily flights to several U.K. cities.

Air UK flights to Aberdeen, Amsterdam, Copenhagen, London (Stansted) and Leeds/Bradford.

TIME: British Standard Time is kept, that is GMT plus 1 hour. Reverting to GMT in Winter months.

HOLIDAYS: Stevedore holidays are 1st January, 17th March, Easter Monday and Easter Tuesday, 12th and 13th July and 25th and 26th December.

POLICE/AMBULANCE/FIRE: All can be contacted by telephoning 999 and ask for services required. Additionally: Fire Brigade Belfast 222222; Ambulance Belfast 241212; Harbour Police Belfast 232235; *or* through Belfast Harbour Radio on VHF Channels 16 and 12.

TELEPHONE: Telephone can be placed on board at certain berths.

SERVICES: All principal makes of radio, radar and gyro equipment can be serviced. Compass adjusting and D/F calibration can be carried out.

SHORE LEAVE: Normally no restrictions on shore leave.

DEVELOPMENTS: A new Ro/Ro berth is under construction and is due for opening in 1989.

AUTHORITY: Belfast Harbour Commissioners, Corporation Square, Belfast BT1 3AL. *Tel:* (0232) 234422. *Telex:* 74204. *FAX:* (0232) 242663. *Contact:* Captain Hugh O'Byrne, Harbour Master. Mr. G. Irwin, General Manager. Mr. J. F. McNamee, Chief Engineer.

BLYTH: 55.08 N. 01.30 W. (See Plan)

DOCUMENTS:

Certificate of Registry.
Load Line Certificate.
Wireless Telegraphy and/or Safety Radio Certificate.
Safety Equipment.
Ship Construction.
Light Dues Payments.
Bills of Lading, Manifest and Stowage Plan usually sent in advance of vessel.
List of Members of Crew (of ship arriving in U.K.) who are aliens or were engaged outside U.K. (Home Office Form I.B.6A). Passenger form to be completed when reporting vessel's arrival from foreign ports.

PILOTAGE: Call by R/T when within 50 miles of port, and VHF (Channels 16, 6, 8 and 10) when approx. 1 hour off port. Pilot boats black hull with words "Pilot" on hull or superstructure. Letters in white. Fly International Pilot Flag at masthead and at night show International Light Signals for pilot boat on station.

Vessel requiring Pilot sounds 2 short and 3 long blasts or exhibits International Code Flag "G". By night flashes International Code Signal "G" or "PT". Pilot boats operate and will board within radius of 2 miles of East Pier Lighthouse, or further, weather permitting. Pilots board at Pier end area during adverse weather.

ANCHORAGES: No anchorages within harbour – in good weather vessels can anchor off port East of Fairway Buoy.

RESTRICTIONS: No night restrictions. Entry according to draft. Channel dredged to 7.6 m. LAT and approaches 8.5 m. LAT. Upper River and South Harbour 6.7 m. LAT. Rise of tide 4.3 m. Springs, 2.1 m. Neaps.

MAX. SIZE: Bulk carriers up to 22,500 d.w.t. discharge at Alcan (U.K.) Limited Terminal. Max. draft 9.8 m. LOA 190 m.

For other berths max. length 190 m., draft 8.5 m.

HEALTH: International quarantine signals to be used. Pratique will be granted by Customs or Port Health Officer if Maritime Health Declaration is clean. If suspected diseases on board radio "Portelth Blyth" in advance advising details.

Also see "Health – All Ports" before first U.K. port.

RADIO: Cullercoats Radio.

VHF: Details of movements within port given over VHF from Port Control Office (Tel: (0670)-352678). Calling Channel 16, working Channel 12.

TUGS: Normally join vessel at harbour entrance. Extra charge for use of tugs lines.

BERTHING: Alcan Bulk Alumina Terminal, dredged depth alongside 10.4 m. LAT. Alcan is offering the use of its ship unloading terminal at Blyth Harbour to other firms requiring bulk cargo unloading facilities.

North Quay, South Harbour, depth alongside 8.5 m. LAT.

Coal-loading berths and waiting berths, 5.2 m. to 8.5 m. LAT. West Quay, dredged depth 7.0 m. LAT (Sto-Ro/Ro-Ro Terminal "Blyth Progress"). South Side Berths, dredged depth 8.6 m. LAT, Wimbourne Quay (Sto-Ro Terminal – "Link Blyth" – Pontoon) dredged depth 6.7 m. LAT.

STEVEDORES: Blyth Harbour Commission, Traffic Department, South Harbour, Blyth. Tel. (0670) 352066. ETA requested day before arrival.

MEDICAL: Notice not necessary but advisable. Hospital facilities available. Inoculation, vaccinations and/or certificates not specifically required.

DENSITY: Sea water. Fresh water effect negligible.

FRESH WATER: Obtainable from shore hydrants. Rate of delivery varies from 10 t.p.h. – 50 t.p.h. according to location.

FUEL: BHC operate a bunkering Agency on behalf of Shell UK Ltd. 24 hours notice usually required. Grade – gas oil.

GANGWAY/DECK WATCHMEN: Not usually employed as these duties are carried out by the crews.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco: 50/250 grammes. Wine/Spirit: Wine up to 0.75 litres. Spirits up to 0.375 litres.

IDENTIFICATION CARDS: Seaman's Book or Passport desirable.

CONSULS: Denmark, Norway, Netherlands.

REPAIRS: All types of deck and engine repairs possible.

REPATRIATION: Can be arranged by H.M. Immigration Office, Blyth.

AIRPORT: 24 km. Served by regular airlines.

TIME: BST is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: Christmas Day; New Year's Day; Good Friday; Easter Monday; May Day (first Monday in May); Spring Bank Holiday (last Monday in May) and Late Summer Holiday. Cargo work can be arranged on these days by request.

POLICE/AMBULANCE/FIRE: Tel: 999.

TELEPHONES: Can be fixed aboard by arrangement.

AUTHORITY: Blyth Harbour Commission, 79 Bridge Street, Blyth, Northumberland NE24 2AW, United Kingdom. *Tel:* (0670) 352066. *Telex:* 537567. *FAX:* (0670) 368540. *Contact:* P. J. Camp, General Manager.

BOSTON: 52.58 N. 00.02 W.

DOCUMENTS: Usual U.K. requirements.

PILOTAGE: Compulsory for all vessels greater than 50 g.r.t. Pilot boards from launch in the approaches to River Witham. Pilot Office Tel: 0205-62114.

ANCHORAGES: Vessels awaiting tide anchor to South of No. 9 Buoy in depths of 7.3 m.

Anchorages available in Boston Deeps, depths 5.5 m. to 9.1 m.

RESTRICTIONS: Entrance to dock normally restricted to 2.5 hours before and 1.5 hours after HW.

Lock Dimensions: Length 91.4 m., width 13.7 m., depth on sill 5.4 m. MHWN; 7.5 m. MHWS.

Sill clearance of 1.5 m. normally required.

MAX. SIZE: Dock: Length 100 m. Riverside quays: Length 90 m.

HEALTH: Normal U.K. procedure. Port Health Officer, Tel: 0205-62114.

VHF: Port radio station maintains VHF watch (Channels 16 and 12) during office hours and from 3 hours before till 2 hours after HW.

TUGS: 1 tug available, 7 tons bollard pull.

BERTHING: *Boston Dock:*

North Quay: Length 253 m.
South Quay: Length 256 m. Transit shed 2,787 sq.m.
West Quay: Length 137 m. Transit shed 2,160 sq.m.
Two Ro/Ro ramps.

Riverside Quay: Length 750 m. Transit shed 1,765 sq.m. Berths dry out at LW.

CRANES: At Boston Dock:

4×6 tonnes electric portal cranes.
2×3 tonnes electric portal cranes.
1×25 tonnes Scotch Derrick.
8 mobile cranes.

At Riverside Quay: 1×7.5 tonnes electric portal crane.

Forklifts available at both Boston Dock and Riverside Quay.

BULK CARGO FACILITIES: Two silos for grain, each capable of storing 5,000 tonnes.

(i) King's Lynn Silos at Riverside Quay, with 2 loading towers.
(ii) Witham Wharf, opposite Riverside Quay. Privately owned.

Lingrain Silos: There is a 46,000 tonne grain silo adjacent to Dock and connected to North Quay. 2×500 t.p.h. mobile shiploaders available.

SPECIALISED CARGO-HANDLING FACILITIES: Containers are discharged at South Quay, using a 25 tonne Scotch Derrick and by a 35 ton container gantry on the North Quay. 20 ft. and 40 ft. containers are handled.

Container handling yard (1.2 ha.) with 30 tonne top lift truck available.

BRIDGES: A power cable with 150 ft. vertical clearance exists to East of lock.

STEVEDORES: Several local companies can supply stevedores.

MEDICAL: Doctors, dentists and hospital available locally.

FRESH WATER: Available.

FUEL: Available from road tankers. Contact Agents to make arrangements.

CONSULS: Denmark, Vice-Consul; Netherlands, Vice-Consul; and Norway, Vice-Consul.

REPAIRS: Can be undertaken by local companies. Divers available.

CUSTOMS ALLOWANCES: Usual U.K. regulations. H.M. Customs, Tel: 0205-63070.

TIME: GMT; Summertime kept from late March – late October (GMT plus 1 hour).

POLICE/AMBULANCE/FIRE: Dial 999 for emergency service.

AUTHORITY: Port of Boston Authority, Dock Office, Boston PE21 6BN. *Tel:* 0205-65571. *Telex:* 378114 Bosdock G. *FAX:* 0205–310126. *Cables:* Neptune, Boston. *Contact:* Captain G. Hulland, Harbour Master. Tel: 0205-62328.

BRAEFOOT BAY: 56.02 N. 03.19 W. (See Plan)

Braefoot Bay Marine Terminal is a facility shared between Essochem Olefins Inc. and Shell U.K. Exploration and Production as the shipping point for the products of the Mossmorran gas fractionation complex situated approximately 7 km. inshore from the Terminal. The Terminal is located on the Fife Shore of the River Forth between the communities of Dalgety Bay and Aberdour and separated from the main shipping fairway by the Island of Inchcolm.

The Eastern jetty is operated by Essochem Olefins and exports ethylene in ships between 2,400 cu.m. and 12,000 cu.m. capacity.

The Western jetty is operated by Shell U.K. Exploration and Production for the export of propane, butane, and natural gasoline in ships of up to approximately 60,000 cu.m.

Each jetty carries out loading operations independently, while the co-ordination and administration of marine activities is the responsibility of the Terminal Supervisor who is the local senior representative for Braefoot Bay Marine Terminal appointed by Shell U.K. Exploration and Production and acting on behalf of itself and Essochem Olefins Inc. with direct responsibility for the Management of all ship related activities at Braefoot Bay.

DOCUMENTS: See "Leith".

PILOTAGE: Pilotage is compulsory for all vessels calling at or sailing from Braefoot Bay Marine Terminal.

Pilots are licensed by the Forth Pilotage Authority and must be ordered for both inward and outward passages.

Vessels bound for the Forth must confirm their ETA 2 hours before arrival at pilot station.

Pilots may be contacted by calling "Forth Pilots" on VHF Channel 16 and working on VHF Channel 14.

ANCHORAGE: Vessels requiring anchorage in the Forth Estuary (other than in emergency) should apply to the Forth Navigation Service (Harbour Master) for direction to a designated anchorage.

APPROACHES: "General Directions for Navigation in the River and Firth of Forth" are published by the Forth Ports Authority and administered by the Forth Navigation Service. Vessels entering or navigating the Forth must notify Forth Navigation Service 24 hours before entering and 1 hour before leaving a berth, of their proposed intentions and obtain subsequent clearance to carry out such intentions. Forth Navigation Service can be contacted on VHF Channels 16 and 12.

RESTRICTIONS:

(a) All movements are subject to the directions of the Forth Navigation Service.

Pilotage is compulsory for all ships arriving at, or departing from Braefoot Bay Marine Terminal.

(b) Vessels will not be accepted for berthing at Braefoot Bay, and departures will not be authorised unless visibility is at least 0.5 nautical miles at Braefoot Bay jetties, that is to say that by day, the Haystack Rock shall be visible; by night No. 3 or No. 4 buoys shall be visible from the jetties.

(c) (i) Tankers of or greater than 145 m. length (approx. 12,000 cu.m. capacity) shall berth port side to the jetties on slack water or flood tide only. It is a requirement of Shell Expro and the Forth Ports Authority that such tankers shall only approach the Terminal through the Western channel of Mortimer's Deep.

(ii) Tankers bound for the Eastern (Ethylene) jetty of less than 145 m. overall length may (at the discretion of the Terminal Supervisor) be allowed to berth starboard side to the jetty on slack water or ebb tide only. It is agreed with the Forth Ports Authority that tankers of less than 145 m. berthing in this manner may approach the Terminal through the Eastern channel of Mortimer's Deep.

(iii) It is a requirement of the Forth Ports Authority that all tankers departing from the Terminal shall do so through the Eastern channel from Mortimer's Deep. Vessels which have berthed as in (ii) above will therefore be required to "swing" on departure and may only do so provided that they are assisted by at least 2 tugs unless the vessels can satisfy the Ports Authority and the Terminal Supervisor that in the particular circumstances 1 tug would be sufficient.

Also see "Regulations".

MAX. SIZE: Western jetty: Depth 15.0 m. Eastern jetty: Depth 10.0 m. Eastern exit channel bar depth (Hawkcraig Point leading line) – least depth by sounding 9.5 m., swept depth 8.5 m. below chart datum.

HEALTH: See "Health – All Ports" before first U.K. Port.

RADIO: *Pre-arrival information:*

Masters must send ETAs at least 72 hours in advance of arrival and thereafter advise of any variation of more than 12 hours.

Confirmation ETA should be sent at least 24 hours in advance of arrival and thereafter advise of any variation of more than 4 hours. (When voyage duration is less than 72 hours, Masters should send ETA as soon as possible.)

A standard pre-arrival message will be sent to each gas carrier requesting the following information/confirmation. A similar message (excluding items (a) to (g)) will be sent to Natural Gasoline Tankers.

Quote:

(a) Remotely operated valves: through a complete open/closed cycle, ensure proper functioning and ascertain valve type (ball, gate, etc.) and actual valve closing times.

Remote valves must close within 30 seconds of operation but so that the final 20% of closure takes at least 6 seconds.

(b) Gas detection system operational and set (high or low sensors) and calibrated for the cargo to be loaded.

(c) Cargo transfer emergency stops tested from all locations to ensure correct operations of valves, alarms and interlocks.

(d) Ensure operation of the tank high level and pressure alarms and interlocks.

(e) Where adjustable setting safety valves are installed, confirm they are set for the cargo to be received.

(f) Confirm fire fighting equipment including water spray system fully operational and tested.

(g) Manifold Configuration and presentation (forward to aft) e.g. LVVL. It is most important that the specific duty (ethylene, propane, etc., liquid or vapour return) of each presentation flange is known to the terminal at least 24 hours prior to the ship's arrival. Delays consequential on non compliance with this requirement will be for ship's account.

(h) Advice that only clean sea water ballast can be discharged at this terminal.

(i) *For first time callers – manifold configuration:*

(i) Size rating and standard of connecting flanges, e.g. 12 in. Ansi 150/8 in. Ansi 300/6 in. Ansi 300
(ii) Distance of manifold centre line from bow
(iii) Height above uppermost continuous deck
(iv) Distance of manifold from ship's side
(v) Maximum loaded draft
(vi) Minimum draft while at berth
(vii) Distance from face to support (max. acceptable is 1,200 mm.)
(viii) Height of manifold above keel
(ix) Distance between manifold flange centres.

(j) Details of ANY DEFECTS IN VESSEL OR EQUIPMENT affecting cargo operations or manoeuverability or confirmation that there are no known defects.

Unquote.

Note: The foregoing information is required in addition to the pre-arrival information requirements of the Forth Ports Authority – SI.1077 Merchant Shipping (Tankers) (EEC Requirement) 1981 refers.

Telex: A telex machine is sited in the Braefoot Bay control room for incoming messages only, the number is 728245 Moship G, and is operable 24 hours per day. This telex number may be used to receive urgent information concerning ship movements and cargoes. Messages should normally be transmitted through the ship's agent.

VHF: "Braefoot Terminal" maintains a listening watch on VHF from at least 2 hours before vessel's ETA on Channel 16 and may work on Channels 15, 44, 48, 69 or 73. (Channel 69 is normally reserved for jetty mooring towing operations.)

RADAR: Port and Estuary Radar Service operated by Forth Navigation Service. (See "Leith".)

TUGS: Only tugs licensed by the Forth Ports Authority to do so, may operate at Braefoot Bay Marine Terminal.

Availability of tugs is assured by Forth Estuary Towage Ltd., provided at least 24 hours' notice of requirements is given in accordance with the agreed ordering and call out procedures set out in the published Tariff. Tug orders may be placed through ships' Agents, the terminal or direct to Forth Estuary Towage Ltd., Leith. 24 hours' notice of towage requirements is necessary for programming tug commitments and obtaining priority for service. In the event of ship delays within the 24 hours' notice period, cancellation or ETA adjustment for service previously ordered will not be subject to charge, provided that adjustment notice is received during normal working hours and that the tugs have not left their normal berths to attend on the vessel's original order.

The tugs available are as follows:

2×12 tonne bollard pull Voith Schneider.
2×19 tonne bollard pull Voith Schneider.
1×27 tonne bollard pull Voith Schneider.

As a guide to ordering in advance and to avoid delays it is strongly recommended that the following table is regarded as minimum requirements for tug assistance:

Size of Ship	*Tugs (tonnes-bollard pull)*
40-60,000 cu.m. berthing	1×27 tbp+2×19 tbp
40-60,000 cu.m. sailing	1×27 tbp+1×19 tbp
20-40,000 cu.m. berthing/sailing	2×19 tbp
6-20,000 cu.m. berthing/sailing	2×12 tbp

Masters of smaller vessels who do not anticipate requiring tug assistance for berthing/unberthing may order an escort/standby tug.

Tugs attending vessels will normally rendezvous with arriving ships in the area Inchkeith Island to Burntisland Roads and also escort departing ships to that area.

Out of hours and in emergency tugs may be contacted through the Forth Navigation Service Duty Officer on VHF Channel 16.

Boatmen: Only Boatmen approved by the Companies and licensed by the Forth Ports Authority to do so, may operate at Braefoot Bay Marine Terminal.

Availability of mooring boats is assured by C. & R. Briggs Ltd., providing at least 24 hours' notice is given, through ships' Agents, the terminal or direct to C. & R. Briggs, Burntisland. Telex: 727377 Crbcom G.

Pre-ordered mooring boats will be in attendance at the terminal 30 minutes in advance of the arranged berthing/departure time and can be contacted on VHF radio. In the event of the ship delay within the 24 hours' notice period, cancellation or adjustment for services previously ordered will be without charge provided that adjustment notice is received between 0900 hrs. and 1630 hrs. Monday to Friday and that the mooring boats have not left their base to attend on the vessel's original order.

MOORING:

(a) Vessels unable to make fast alongside the Braefoot Bay Terminal jetties with an all wires, or wires with synthetic rope tails mooring system may be required to provide additional restraint by doubling or using both ends of certain mooring lines.

A minimum of 2 spring lines of the same material (preferably wire) shall be used at each end of the vessel.

(b) Mooring lines used in any particular direction of service (head/stern lines, breast lines, springs) shall be of similar breaking strength and material. Under no circumstances will a mixture of wire and synthetic ropes in the same direction of service and to the same dolphin be acceptable except where a synthetic rope has been used as "first line ashore" for positioning purposes, then this may be excluded in the consideration of the final mooring plan.

(c) If conditions as in (a) cannot be complied with, the loading arms will not be connected until alternative arrangements have been agreed with the Terminal Supervisor.

(d) Once moored, ships' winches must be secured with the brakes hardened up. Winches must not be left on Automatic Tension.

(e) Masters of vessels are responsible for ensuring that:

(i) their vessels are safely secured in accordance with the preceding paragraphs.
(ii) a strict watch is kept on their vessel's moorings and that they are tended as required to prevent slack or overtaut lines and undue movement of the vessel.
(iii) their vessel's mooring ropes or wires are secured only to the proper fixtures provided for that purpose.

BERTHING: *Pre-Operations Meeting and Inspection:*

Before any operations commence a meeting will take place between the Terminal Supervision and the Ship's Master (or his authorised deputy). They will:

(a) Complete/carry out the ship/shore Safety Check Lists and Safety Inspection in accordance with the O.C.I.M.F. Standards if required.

(b) Discuss any deficiencies shown up by (a) above and agree any additional precautions required. The terminal reserves the right to refuse to load or discharge a vessel if the required standards are not met.

(c) Complete a loading/discharge plan that includes:

Connecting/disconnecting procedures
Quantities and grades of cargo to be loaded/discharged
Loading/discharge rates (see "Loading" – Pressure Surges)
Deballasting procedure (see "Ballast")
Vapour return procedure
Cool down procedure (if required)
Maximum permitted pressure at ship's rail
Location of Emergency Stop Buttons/use of Umbilical Cord
Ensure that ship has on board data sheets for product being handled
Emergency Procedures (see "Safety").

(d) Check the previous cargo record (last 3 cargoes) and agree that ships' tanks are ready to receive product.

The Companies reserve the right to:

(i) Sample and analyse the condition of ships' tanks or quality of cargo and ballast tanks before commencing to load or discharge.
(ii) Instruct a third party independent surveyor for the sampling and measurement of cargo and/or tanks, the costs for which will be for the account of the Jetty Operating Company.
(iii) Place approved portable equipment on board as required for sampling, testing or communication purposes during loading/discharging operations.
(iv) Refuse to load product and/or accept return vapour when ships' tanks are not within specification for product to be loaded.

Reasonable Notice of these requirements will be given.

BERTHING FACILITIES: Western Jetty:

Jetty Operating Company: Shell U.K. Exploration & Production.

Manifold Limitations: B.F.O. 8 in. and LPG/Gasoline 12 in. 150 ASA flanged presentations arms.

	Max.	*Min.*
Manifold height above water line	19.65 m.	5.15 m.
Manifold set back from ship side	9.6 m.	3.00 m.

For multiple 12 in. arm connections the minimum centre to centre adjacent connection distance is 1.3 m.

L.P.G. 8 in. 300 ASA flanged presentation arms.

	Max.	*Min.*
Manifold height from water line	11.15 m.	1.95 m.
Manifold set back from ship side	8.6 m.	2.00 m.

For connection of 2×8 in. arms the minimum centre to centre adjacent connection distance is 0.75 m.

N.B. For connection to any arm: Distance between ship's outboard presentation flange and first ship's manifold piping support must not exceed 1,200 mm. to prevent cantilever overstressing of ship's piping.

Product/Vapour Return: LPG: Vapour return arm will be connected before loading operations commence to enable vessels to return vapour to storage tanks or to flare.

Vapour return may go to flare subject to the quality being acceptable to Shell Expro but always provided the oxygen content of such vapour return to flare does not exceed 4.0% vol. max. as may be established under the pre-operations meeting/inspection. (See "Berthing" (d)).

Shell Expro at its sole discretion may accept vapour return to storage always subject to the quality being acceptable to Shell Expro and normally provided the previous 3 cargoes were LPG and also that such vapour does not contain more than:

(i) 0.3% vol. oxygen
(ii) 0.5% vol. non condensible gas
(iii) 0.5% vol. propylene
(iv) 0.1% vol. butadiene
(v) 10 ppm ammonia
(vi) 10 ppm VCM
(vii) 5 ppm water vapour

However, Shell Expro at its sole discretion may accept vapour from any vessel to shore storage provided that the quality of such vapour is acceptable to Shell Expro. When appropriate ships returning vapour to shore storage will be automatically credited for such returns.

LPG Loading/Vapour return rates available to ships via each pair of loading arms are:

via 12 in. loading arms, up to 3,000 cu.m./hr. per product
8 in. loading arms, up to 1,100 cu.m./hr.

Simultaneous loading of propane and butane is available on 12 in. arms only.

NOTE: Propane/Butane is delivered to ships in fully refrigerated state, i.e. approx. −42°C/−5°C as appropriate. There are no cargo heating facilities at this terminal.

Natural Gasoline: Natural gasoline loading is via No. 4 12 in. loading arm with rate of up to 2,000 cu.m./hr. available.

Bunker Fuel Oil (when available): Bunker fuel oil is loaded/discharged through No. 7 (8 in.) flanged loading arm only at a rate of up to 350 cu.m./hr.

Marine Diesel (when available): Marine diesel is handled through a 3 in. flexible hose only, at a rate of up to 30 cu.m./hr.

Eastern Jetty:

Jetty Operating Company: Essochem Olefins Incorporated.

Manifold Limitations: Ethylene 6 in. 300 ASA flanged presentation arms.

	Max.	*Min.*
Manifold height above water line	11.2 m.	2.75 m.
Manifold set back from ship side	4.6 m.	0.85 m.

For connection of 2 arms the minimum centre to centre adjacent connection distance is 0.75 m. The maximum distance is 1.5 m.

Ethylene: Vapour return arm will be connected before loading operations commence to enable vessels to return vapour to storage tanks or flare. Vapour return may go to flare always provided the oxygen content of such vapour to flare does not exceed 4.0% vol. max. as may be established under the pre-operations meeting/inspection. (See "Berthing" (d)).

Essochem Olefins Inc. at its sole discretion may accept vapour return to storage always subject to the quality being acceptable to Essochem Olefins Inc. and provided that the last cargo was ethylene or that vessel has been purged with ethylene vapour to the satisfaction of Essochem Olefins Inc.

A loading rate of up to 250 tonnes/p.h. is available to vessels.

LOADING:

Marine Loading Arms: All products (with the exception of marine diesel) are delivered to ships via marine loading 'hard arm' units which are individually fitted with Emergency Release Systems (ERS).

The emergency release systems consist of two ball valves located above the presentation flange. Only after closure of the ball valves, the hydraulic clamp between the ball valve opens, leaving one ball valve closing off the ship's manifold and the other closing off the loading arm. The loading arm then returns to the parking position.

On hearing 'ERS' alarm (a flashing red beacon with oscillating tone) all staff should vacate the vicinity of the manifold/loading arms. The emergency release system will be manually initiated from onshore or AUTOMATICALLY in the case of over extension of the loading arms, e.g. if ship drifting outside the loading arm envelope.

Pressure Surge Precautions: Non-routine closing of the loading systems, automatic intervention or 'fail-safe' closure of shipboard Emergency Shut Down (ESD) valves can generate dangerous surge pressures. A careful check of ship's ESD system will be made prior to loading. The Master (or his deputy) will be asked to operate the system to enable timing of the valves and may be requested to have valves adjusted according to the provisions of the IMO Codes for Ships Carrying Liquified Gases in Bulk. The Terminal Operating Companies reserve the right to restrict loading rates if valve closing times are not compatible with rates otherwise agreed. Excess loading times caused by such a restriction will be charged to the ship if port time/lay time is exceeded.

The shore system is designed to withstand the high surge pressures which can be generated and safe emergency shut down will be accomplished by using the shore ESD pendant control provided to vessels.

In the event of an emergency the pendant 'ESD' must be activated which will immediately result in:

1. Shore pumps close
2. On shore delivery valves close.

ONLY THEN MAY THE VESSEL MANUALLY ACTIVATE ITS OWN ESD SHIPS MUST NEVER CLOSE VALVES AGAINST THE SHORE LOADING PUMPS

Masters are referred to ICS Safety Guide (Liquified Gas) paras, 1.8.2 and 4.5.2 and the International Safety Guide for Oil Tankers and Terminals para 7.3

Operational Procedures: The Loading/Discharge Plan and operation must comply with the following procedures:

(a) The Company will be responsible for connecting/disconnecting loading arms/hoses to the agreed ship's presentation flanges as indicated by the responsible ship's officer.

(b) The Loading Arms are normally purged and remain under Nitrogen between loading operations. Vessels must, therefore, be prepared to receive a small volume of Nitrogen vapour at the commencement of loading operations. (0.5 cu.m. at the Eastern jetty, 10 cu.m. at the Western jetty.)

(c) The responsible terminal representative and ship's officer will agree that systems are correctly lined up before transfer operations begin.

The terminal staff will pressurise the loading arm with Nitrogen against the ship's manifold valve and the loading arm connection will be tested for leaks. When manifold has been proven 'tight' the loading arm will be depressurised and transfer commenced at the agreed starting rate.

Loading must be commenced slowly to avoid rapid pressure build up. When liquid flow is established the terminal will increase rate as requested by the ship up to the agreed maximum bulk rate.

(d) During transfer operations ship will confirm with the shore at suitable intervals that they are in agreement with the quantity of product actually transferred and the quantity/time estimated to complete the operation.

(e) EXCEPT IN EMERGENCY VENTING OF LPG OR ETHYLENE VAPOURS TO ATMOSPHERE IS PROHIBITED AT BRAEFOOT BAY. All such displaced vapour must be reliquified on board by ship's systems or returned to shore via the vapour line.

During loading of liquified gas carriers the jetty operator must be advised of and log the ship's tank pressure every half hour.

The LPG/ethylene return vapour line will in any case be connected and available for pressure relief.

Displaced Natural Gasoline vapour shall only be vented to atmosphere via the ship's elevated or collective fixed vent system, as agreed in the ship/shore check list.

(f) During transfer operations

(i) An Operator/Technician will remain on the jetty at all times.
(ii) A responsible English speaking ship's officer equipped with an approved portable UHF radio tuned to the agreed ship/shore communication channel shall be on duty at all times.
(iii) A responsible member of the ship's crew capable of understanding and relaying the jetty Operator/Technician's communications to the Responsible Ship's Officer shall be stationed on deck so that he can:
    (a) observe the manifold connections
    (b) observe the gangway
    (c) exchange visual/vocal signals with the jetty Operator/Technician.
(iv) The ship must inform the terminal and the terminal must advise the ship of any deviation from the agreed Loading/Discharge Plan.

(g) At least 15 minutes' notice must be given of transfer rate changes (including "topping off") being required except in emergency when the requirements of "Pressure Surge Precautions" (see above) must be observed.

(h) If for any reason there is an unusual evolution or accumulation of gas, loading shall be stopped or the loading rate into a particular tank reduced at the discretion of either the Terminal Supervision or responsible Ship's Officer.

(i) The vessel must by day fly Flag 'B' of the International Code, and by night exhibit an all round red light.

(j) Prior to, and on completion of loading/discharging an Operating Company representative will witness ship's dips/ullages and obtain from the Master the quantity loaded according to ship's figures.

(k) Operations shall be stopped during electrical storms in the vicinity of the ship and all cargo valves shall be closed. During periods of high winds (gusting to 40 knots or over), and/or on the instruction of either the Harbour Master or Terminal Supervision, operations shall be stopped and the loading arms disconnected. For ships with a presentation flange of 4 in. this will be 27 knot gusts and for 6 in. and above 40 knot gusts as maximum limits but which may be reduced according to prevailing circumstances.

At suitable intervals with regard to the estimated duration of cargo transfer the responsible Terminal Representative and Ship's Officer will carry out a repetitive check and confirm that:

The Safety Check List remains valid
Operational procedures are satisfactory
Jetty Regulations are not being contravened.

BALLAST: *Avoidance of Pollution:*

(a) No oil or mixture containing oil shall be discharged or allowed to escape from a vessel while at the terminal, the approaches or in the River and Firth of Forth.

No garbage, or other materials, either liquid or solid shall be discharged overboard from a vessel, but shall be retained in suitable receptacles on board or arrangements made for disposal ashore.

(b) Discharge overboard of the clean ballast contained in the cargo tanks of clean petroleum product tankers is permitted, but only after inspection has been carried out by the Terminal Supervisor, who shall also obtain the approval of the Harbour Master prior to commencement of such ballast discharge. Discharge of clean segregated ballast water overboard is permitted subject to approval and/or inspection by the Terminal Supervisor.

The Forth Ports Authority Harbour Master will be informed if inspection either before or during discharge shows ballast water is contaminated and such discharge shall immediately cease.

Except as herein specified, all ballast water other than that contained in segregated ballast tanks shall be retained on board.

DIRTY BALLAST CANNOT BE DISCHARGED AT THIS TERMINAL

(c) By arrangement with the Terminal Supervisor oily residues and bilge slops may be discharged ashore via flexible hose provided that such discharge is not concurrent with product transfer via hard arms and that delays so incurred are for ship's own account if port time/laytime is exceeded.

The onshore oily slops reception tank has a limited handling capacity and in no case will slops quantities in excess of 100 tonnes be accepted from any one vessel. Slops transfer to this facility for ships at the Eastern jetty is via a 20 cu.m. holding tank and transfer rates limited to 5 tonnes per hour.

(d) Prior to Oil (including Natural Gasoline) or slops transfer the Anti-Pollution Check List must be completed and no leakage or spillage shall be swept or allowed to leak overboard. Swabs or sawdust used for mopping up spillages must be brought ashore for destruction.

Any leakage or spillage must be reported immediately to the Terminal Supervisor and operations suspended until the leakage or spillage has been cleaned up to the satisfaction of the Terminal Supervisor and the Harbour Master. The Terminal Supervisor may mobilise resources to assist in the containment and cleaning of pollution caused by a ship, without the authority of the Master but in such action he shall be considered to be acting on behalf of the Master and with his approval.

It is statutory requirement that any pollution be immediately reported to the Harbour Master.

MEDICAL: Doctors and Hospitals in Kirkcaldy and Inverkeithing.

DENSITY: 1015 – 1025 (depending on rainfall).

FRESH WATER: Potable fresh water is normally available from hydrants at each jetty. Ships requiring water are responsible for supplying and connecting their own hoses to the jetty hydrant as indicated available by the jetty operator. A nominal charge may be made for water in which case a ship's officer may witness shore meter readings as the Master will be required to authorise water bill for payment of charges by the ship's Agent.

FUEL: B.F.O. and Marine Gas Oil (if and when available) can only be supplied to ships loading at the Western (LPG) jetty. Requests for bunkers must be notified as early as possible and confirmed in the ETA notices through ship's Agent.

CONSULS: See "Leith".

REPAIRS/DRYDOCKS: See "Grangemouth".

AIRPORT: Edinburgh Airport 30 miles.

POLICE/AMBULANCE/FIRE: Control have a direct line.

TELEPHONES: A public pay telephone is located at the jetty trestleway root.

Smoking is expressly prohibited in the telephone kiosk, infringements by individuals of this regulation will necessitate withdrawal of the facility.

STORING: *General cargo, bunkering and stores handling:*

(a) No general cargo including petroleum in drums or other containers, or liquified gas in cylinders shall be handled during:

- (i) Loading or transfer of LPG, Ethylene or Natural Gasoline
- (ii) Gas freeing, purging or tank cleaning

Note: Bunker services are not available to ships calling at the Eastern Jetty.

(b) The handling of ship's stores and bunkers (if available) may be permitted during operations but only with the permission of both the Terminal Supervisor and the Master of the Vessel and provided that:

- (i) the cargo operations remain adequately supervised.
- (ii) any cargo operation which may allow vapours to escape on deck should be stopped whilst stores are being handled e.g. pumping of strippings to an after tank or sampling/ullaging gasoline tanks or disconnection of loading arms, etc.
- (iii) Drums of oil paint, steel plates and any other heavy metal parts which may cause a spark, should be landed on rubber or other suitable matting and not directly onto vessel's steel deck. These items may not be dragged or rolled along the deck.

(c) Gas cylinders must not be rolled along the deck of a vessel or jetty.

(d) The jetty cranes are for hose-handling and other jetty purposes. They may only be operated by Terminal Staff and may only assist in loading items of ship stores provided that Terminal Staff are available to operate a crane without detriment to their other duties.

(e) Under no circumstances will stores delivery vehicles be allowed on the jetty head or approach beyond the designated points for setting down of ship stores. One vehicle only at a time is permitted to visit a vessel. Other vehicles scheduled to deliver stores must queue outside the main gate until given permission to enter. Waiting vehicles will park in such a manner that no obstruction for emergency vehicle entry through the main gate will result.

The size and weight of ship stores delivered by road vehicle are to be such as they can always be physically *manhandled* and carted between the set down point and ship by delivery staff or ship's crew. Larger deliveries of stores and heavy items of equipment may be loaded from a barge by an arrangement with Agents or chandlers and subject to safety regulations.

These services are readily available in the area, though of course, delays due to storing or bunkering are for vessel's own account where laytime/port time is exceeded.

Note: Vessels at anchor may be stored by barge/boatmen of their own choice but vessels alongside must be stored by licensed boatmen (C & R Briggs Ltd.) See "Tugs".

SAFETY: *Emergency Signals:*

(a) Fire and onshore emergency alarm.

1. At the Western Jetty: Intermittent siren.
2. At the Eastern Jetty: Continuous warble.

In the event of siren failure alarm will be sounded by air horns.

(b) Onshore emergency (other than fire).

1. At the Western Jetty: Air Horns.
2. At the Eastern Jetty: Air Horns.

(c) Shipboard emergency (or reported from ship): At least 6 blasts, each of not less than 10 seconds duration.

NOTE: Onshore, alarm may be raised by activating one of the "Break Glass" fire alarms situated at numerous points throughout the terminal – this will also automatically activate the jetty spray systems.

Actions in Event of Emergency:

Ashore: Sound alarm signal.

Terminal staff will communicate with you via:

1. The UHF portable radio (supplied on arrival).
2. The jetty operator.
3. The jetty loudspeaker system.
4. The Marine VHF Channel 16.

In any emergency terminal staff will shut down loading operations, may activate fixed water spray system and implement the Terminal Emergency Plan as appropriate to the incident:

Aboard: Sound alarm signal.

Inform terminal by communications systems as listed above.

You must be prepared to:

1. Cease all cargo operations.
2. Close all cargo valves.
3. Disconnect ship to shore pipe-lines (shore hard loading arms may be emergency disconnected by terminal staff).
4. Move your ship (engines to immediate readiness) subject to the overriding control of the Harbour Master.

Emergency Towing Wires: Emergency towing wires of adequate strength and condition must be positioned on both the offshore bow and quarter of the ship with the towing eyes maintained just above water level.

They must be properly made fast on the ship's bollards while having sufficient slack flaked out on deck for effective towing, the slack being secured from running free by rope yarns or other easily broken means.

Emergency Precautions: In order to meet emergencies ships must:

(a) Retain sufficient suitable crew members on board at all times to man emergency services and to move the ship if so directed by Terminal or Port Authority personnel.

(b) Have adequate emergency equipment and fire fighting appliances, including main emergency fire pumps, ready for immediate use with pressure maintained on the fire main while alongside. The appliances will include at least:

- (i) Two fire hoses, fitted with jet/fog nozzles, uncoiled and connected to the fire main on the main deck.
- (ii) Portable fire extinguishers, of the dry chemical type, conveniently placed near the ship's fire manifold.
- (iii) An International Ship/Shore Connection available at an agreed position on the ship's fire main for ready connection to the shore main.
- (iv) Where a vessel is equipped with a fixed dry powder system, hoses should be run out and control boxes open for access.
- (v) The ship's offshore lifeboat shall be rigged ready for lowering and use as an emergency escape.

A pilot ladder or accommodation ladder shall be rigged or positioned on the outboard side of the vessel ready for immediate lowering as a means of escape in the event of an emergency.

In the event of an emergency the Master must proceed as agreed in the "Pre-operations Meeting and Inspection".

State of Readiness and Engine Immobilisation:

(a) The ship must be able to move under its own power at short notice.

(b) Repairs or other work which may immobilise the vessel shall not be commenced without the prior approval in writing of the Terminal Supervisor who shall also obtain the approval of the Harbour Master.

Such approvals will not be granted except where unavoidable repair breakdown occurs and may be conditional on the Master hiring sufficient standby tugs to move the vessel if so required.

(c) Should immobilisation as in (b) above occur and prior approval having been impossible, the respective jetty Operating Companies reserve the right to order tug or tugs as above on the Master's behalf.

Vehicle and Personnel Access and Security:

(a) Only authorised persons or those with entry permits issued by the Terminal Management will be allowed through the terminal security gates.

Ship's personnel must have a temporary pass signed by the Master or his deputy for clearance with the security guard at the entrance gate.

Masters will be provided with a supply of suitable pass forms by the Terminal Supervision. The Master or ship's Agent are required to furnish a list of chandlers, services, new crew and authorised visitors expected during the ship's stay at the terminal.

Persons who have not been authorised or notified as above will be refused entry to the terminal until the Security Guard has been given clearance from the Terminal Supervision.

(b) As pedestrians (other than plant employees and authorised personnel) are not normally allowed passage through the terminal, a limited fixed schedule transport service may be provided between the shore end of the jetty trestleways and a local destination after consultation and agreement between the Terminal Supervision and the Ship's Master. Extra journeys by the approved transport service must be ordered by direct arrangement with the contractor and the Terminal Supervision advised accordingly.

(c) Visiting vehicles are not normally allowed beyond the gatehouse parking area and must not proceed onto the jetty trestleways without the express permission of the Terminal Supervisor. No vehicle may proceed past any "NO ENTRY" sign indicating that Class A petroleum is being handled or that petroleum vapour may be present.

Vehicles and their contents which are permitted to enter the Marine Terminal do so at the owners' risk and drivers must obey all traffic signs, plant traffic regulations, or directions given by Terminal Staff. Such vehicles shall not be parked in position obstructing fire hydrants, roadside alarms or other traffic. If parked, keys will be left in ignition, the ignition switched off and the doors unlocked. If required, any unattended vehicle may be moved by Terminal Staff.

(d) In the interests of Safety and Security any vehicle or person entering or leaving the terminal is liable to be searched for contraband material or unauthorised persons. Acceptance of this requirement is a condition of entry. Persons who appear to be intoxicated will not be allowed access to or from ships at the terminal unless escorted by a responsible Ship's Officer.

Personnel Access to/from Ships:

(a) When available, access between jetty and vessel will be provided by the Company by means of a gangway tower structure. The operation of such gangway will be the responsibility of the jetty Operating Company, but Masters shall ensure that personnel can safely transfer between the ship's main deck and the gangway. When, for any reason, the gangway tower is not available, Masters of vessels shall provide a means of safe access between jetty and ship, which shall when necessary include an upper platform and bulwark ladder to provide safe access to the ship's deck. The means of access shall be provided with stanchions, guard ropes, securing lines and safety netting, shall be adequately illuminated and shall be maintained in a clean and well tended condition.

A lifebuoy with at least 25 m. of lifeline attached shall be positioned on the vessel near the gangway.

(b) No person other than H.M. Customs and Excise, Port Health Authorities, Pilots or other H.M. Customs Authorised personnel is allowed to board or disembark from a vessel berthing at the Marine Terminal from a foreign port until Clearance and the Master's permission has been obtained.

(c) Boarding and disembarking shall be by gangway only except in emergency.

Scuppers and Drip Trays: During transfer of bunker fuels, gas oil or natural gasoline, deck scuppers and drain holes must be suitably plugged and accumulated water drained off as required. Scuppers should otherwise remain open during LPG or ethylene loading operations.

Drip trays must be placed under connections and likewise drained of accumulated water.

Prior to transfer of any oil product the ANTI-POLLUTION CHECK LIST MUST BE COMPLETED.

Portable R/T Sets, Hand Lamps and Electrical Equipment: Portable R/T sets, lamps and hand lamps, electric or otherwise shall not be used unless of an approved type (e.g. B.A.S.E.E.F.A.).

The use of portable electric lamps and equipment on wandering electric cables is prohibited in any cargo or adjacent ballast space, pumproom, cofferdam, bunker compartment, hold or anywhere over the cargo tanks.

Portable domestic radios, photographic flash equipment, electronic calculators, tape recorders or any other battery powered equipment of non-approved type shall not be used on the main deck nor in any other place where petroleum gases may be encountered.

Ship's Radio and Radar Equipment: Except for VHF telephone equipment, ship's main radio station transmission equipment, including emergency transmitters, shall not be used while the ship is within 400 m. of the terminal. While berthed at the terminal, the transmitting aerials shall be disconnected and earthed.

Ship's radar installation having a peak pulse in excess of 60 kW shall not be operated while the vessel is within 300 m. of the terminal and no radar installation shall be operated during cargo or ballast transfer operations while alongside the terminal berths, except as may be permitted under "Repair Work", see "Safety".

Repair Work: Repair work involving either hot or cold work or the use of naked lights is prohibited unless the permission of the Terminal Supervisor has been requested and granted in writing and the conditions and precautions required by the Terminal Supervisor are rigidly observed.

Repair work includes but is not restricted to boiler tube clearing, chipping and scraping, hull painting, testing or servicing of electrical equipment (including radar and radio installations).

If permission is granted a list of shore workmen employed on the vessel must be given to the Terminal Supervisor before work commences.

(The Harbour Master's permission is also required in the case of hot work and certain repair work including test transmissions of radio or radar equipment.)

Tank Cleaning/Gas Freeing: Tank cleaning, inerting, purging or gas freeing may not be carried out at this terminal except under specific circumstances when approval in writing is granted in advance or under a repair work permit as in "Repair Work" above.

Movements of Tugs and Other Craft: During berthing, unberthing and cargo handling operations no vessel or small craft shall be allowed alongside the vessel unless authorised by the Terminal Supervisor and agreed by the Master.

When tugs or authorised craft are alongside or assisting a vessel, all cargo system openings must be closed unless tanks are gas free.

GENERAL:

Forth Ports Authority/Dockyard Port of Rosyth: The Forth Ports Authority is the controlling body for the waters of the Firth of Forth in conjunction with the Ministry of Defence through the Queen's Harbour Master Rosyth.

The Rules as to Navigating in the dockyard Port of Rosyth are published under the Dockyard Port of Rosyth Order 1975 and are summarised as a note to the "River of Firth of Forth Byelaws". As general information, the Rules impose a speed limit of 12 knots on vessels exceeding 120 m. in length and 15 knots on vessels less than 120 m. in length.

The Rules also detail the signals for prohibition of movement in the "Protected Channel" (being approximately the Main Fairway in a Westerly direction from Buoy No. 13, passing South of Inchcolm Island) to Rosyth Dockyard and the signals (3 red lights in a vertical line or black cylinder by day) denoting one of Her Majesty's vessels underway, and from which, other vessels shall keep clear (within the Dockyard Port).

Copies of the "River and Firth of Forth Byelaws" and "Directions for Navigation" may be obtained from the Forth Ports Authority, Shipping Agents or on request to the Terminal Supervision.

Tides: The predicted tides in the Forth Estuary may be significantly affected by weather conditions, e.g. strong winds from N.N.E. through E. to E.S.E., or heavy rainfall.

The range for Spring Tides is 5.0 m., the range for Neap Tides is 2.5 m.

The Highest Astronomical Tide is 6.3 m. The Lowest Astronomical Tide is 0.0 m.

The breasting line of the jetties at Braefoot Bay is 075°/255° and the direction of tidal flow is approximately 260° on the Flood and 066° on the Ebb with maximum rates of 2.6 knots (Springs) and 1.3 knots (Neaps).

Shipping Agents: Masters are requested to confirm their Agents' name in any direct communication to the Terminal.

Communications:

UHF Radio: The terminal will supply an approved UHF hand set radio to the vessel Master or his deputy for use during the loading operation. The radio will be used for contact with the Terminal Staff during normal loading operation and for notification of an emergency condition.

The hand set radio must be returned to the Terminal representative at the time the departure documents are delivered on board.

Acknowledgement of the return of the hand set radio will be noted on the vessel's copy of the "Master's Receipt for Shipping Documents".

Klaxon: Each jetty is equipped with air horns for audible alarm of fire, and an oscillating tone siren for imminent E.R.S. activation. One short blast may be sounded if required to gain attention of ship's deck personnel if there is an urgent need for communication.

REGULATIONS: *Rules for the Movement of Tankers using Braefoot LPG Terminal:*

1. Every tanker destined for the terminal shall regulate its approach so as not to arrive before the agreed berthing time.
2. When a tanker is turning from the channel for deep draft vessels into Mortimer's Deep to approach the terminal from S.W., no other vessel shall enter that section of the channel between No. 15 light-buoy and a line joining Hound Point and Hopeward Point; or when turning into Mortimer's Deep to approach the terminal from the East, no other vessel shall enter that section of the channel between Nos. 7 and 11 light-buoys.
3. When any tanker is leaving the terminal it shall do so, except in an emergency, in an Easterly direction.
4. When a tanker having left the terminal is entering the channel for deep draft vessels from Mortimer's Deep in an Easterly direction, no other vessel shall enter that section of the channel between Nos. 7 and 11 lightbuoys. In addition if such a tanker is loaded with liquified gas and is more than 145 m. in length, no other vessel, whether navigating within or without the channel for deep draft vessels, shall approach within 1 mile of the tanker while it is within that section of the channel between No. 13 light buoy and Fairway light buoy at 3° W.
5. When tankers are navigating within or without the channel for deep draft vessels between Fairway light buoy and a line joining Hound Point and Hopeward Point it may be necessary to hold or slow down other vessels. Inward bound vessels may be directed to a holding area North of No. 3 light buoy until an outward bound tanker is sufficiently far downstream.
6. No vessel shall enter Mortimer's Deep when the terminal is occupied or when a tanker is manoeuvring in the area, except that a second tanker may enter and berth when the first tanker is securely berthed.
7. Radio transmissions and the operation of radar are prohibited in the vicinity of the terminal, except that a vessel's normal equipment may be tested provided that a source of ignition is not present and that the Chief Harbour Master's permission has been obtained.

Ship's radar equipment having a peak pulse of less than 60 kW. may be operated for berthing and unberthing and at times when cargo operations are not taking place.

SHIPMASTER'S REPORT: November 1984 (updated 1988).

Vessel called at Braefoot Bay Marine Terminal for the purpose of loading LPG (Butane).

The terminal is operated by Shell Expro and Essochem Olefins, and is located 3 miles East of the Forth Railway Bridge on the North side of the Firth.

Port Limits: Within the area of the Firth of Forth Navigation Authority.

Documents:

Register and Light dues.
All Safety Certificates.
Derat Certificate.
Health Declaration.
Cargo Documents.
Last Port Clearance or Coastwise Documents.
2 copies C.13 Customs General Declaration.
3 copies C.14 Customs Stores Declaration.
2 copies C.142 Customs Crew Declaration.
6 copies Crew Lists.
2 copies Ship's Store Lists.

Pilotage: Compulsory in the Firth of Forth. Pilot boards at Fairway Buoy in position 56° 03.5' N., 03° 00' W. VHF Channel 16. 24 hours' advance notice required.

Anchorage: Allocated by Forth Navigation Service, usually Aberlady Bay.

Restrictions: Vessels enter Mortimer's Deep from the West, leave to the East, in what is called clockwise navigation.

Therefore berthing is done on the start of the flood, turning off No. 17 buoy, ensuring, especially in a Westerly wind, that the tide has really started to flood.

Sail an hour before high water to cross the bar at about the top of the flood.

The Esso jetty may, however, allow berthing/entry from the East for smaller vessels.

Max. Size: Shell Jetty 60,000 cu.m. Esso Jetty 12,000 cu.m.

Health: See 'Health – All Ports' before first UK port.

Radio: Wick GKR.

VHF: Forth Navigation Service Channel 71 (working on Channel 20) controls traffic and reporting in points.

Braefoot Terminal: Channels 69 and 73.

Tugs: Channel 69.

Public Channels: Forth Radio Channels 16 and 24.

Radar: Forth Navigation Service locates vessels at Port Limits, and checks identity by VHF.

Ships Radars are to be switched off within 300 m. of the terminal and must not be switched on whilst alongside, except for pre-sailing checks provided loading operations have been completed.

Tugs: Join the vessel off Inchkeith and make fast (tugs lines) before Oxcar. 5 tugs are available, 1×27 tonne, 2×19 tonne and 2×12 tonnes bollard pull. Larger vessels use 3 tugs for berthing (1×27 tonne, 2×19 tonnes) and 2 tugs for sailing (1×27 tonne, 1×19 tonne).

In an emergency tugs take 1.5 hours to reach the vessel.

Berth: Rate of loading Butane, 1,900 cu.m./p.h.

Shore gangway used.

Medical: Good facilities nearby at Dunfermline and Kirkcaldy.

Density: 1025.

Fresh Water: Available ex-mains for nominal fee.

Fuel: M.D.O. available (max. loading rate 40 cu.m./p.h.), only at the Shell jetty.

Fire Precautions: Normal for LPG – 3 allocated onboard smoking areas.

Consuls: Numerous in Edinburgh. If vessel bound for USA then Consulate requires 48 hours to visa 2 Crew Lists, thus these should be left behind with the Agent who will arrange for express delivery to the discharge port.

Gangway/Deck Watchmen: Not necessary.

Customs Allowances: Normal U.K. Regulations apply.

Repatriation/Airport: Edinburgh Airport nearby has shuttle flights at one to two hour intervals to London Heathrow.

Time: GMT plus 1 hour (BST) in Summer months.

Police/Ambulance/Fire: Telephone 999.

Emergency Co-ordination Centre: VHF Channel 16, Forth Navigation Service and/or Forth Coastguard.

Telephones: None onboard, Public Pay phone at jetty root.

Storing: Stores have to be manhandled/hand trucked along 200 m. of jetty before lifting onboard with jetty crane. Alternatively they can be delivered by barge, but not concurrent with cargo and liable to weather delays.

Only Diesel engined stores lorries are permitted in the terminal and Ship Chandlers and Laundries should be made well aware of this.

Shore Leave: Permitted, but personnel are not allowed to walk through the installation and so rely very much on the Marine Officer on duty for a lift to the gatehouse.

Identification Cards: Shore passes are issued.

If visitors for the ship's complement are expected, it is wise to leave a list with Security at the terminal gate, to expedite their boarding.

Regulations: 72 hours in advance of arrival send to Agents, asking them to relay same, questionnaire replies to Harbour Master Forth Ports and also to Braefoot Terminal. (See "Radio" – pre-arrival information and "General" before first UK port.)

General: Laundry facilities are available, good quality.

AUTHORITY: Shell U.K. Exploration and Production, P.O.Box 16, Mossmorran, Cowdenbeath, Fife. *Tel:* (0383) 892000. *Telex:* 728244 Moshell G. Shipping Department 728245 Moship G. *Contact:* Captain R. D. Izatt, Terminal Supervisor.

BRIDLINGTON: 54.05 N. 00.12 W.

DOCUMENTS:

Crew List.
Passengers List.
Ship's Register.
Customs Documents.
Manifests.
Bills of Lading.
Ship's papers.

PILOTAGE: Vessels approach within 0.25 mile, flying "G" Flag. Local fishermen act as Pilots and board approx. 1 hour prior to berthing time.

ANCHORAGES: For small vessels of not more than 12 ft. draft, 1 mile S.E. of harbour. Deeper-drafted vessels 3 miles East of Harbour. Good holding grounds except in heavy weather from East to South.

RESTRICTIONS: In accordance with state of tide and draft restrictions.

HEALTH: Pratique required from all vessels other than from a British port. "Q" Flag to be flown.

Also see "Health – All Ports" before first U.K. port.

RADIO: Humber Radio Station is the best for a vessel to route ETA, etc.

VHF: Call sign "Bridlington Harbour". Call on Channel 16. Working 12 and 14.

TUGS: None available.

BERTHING: No cargo vessels. Fishing harbour handles fishing vessels and yachts.

MEDICAL: Agents require advance notice of required medical attention. Hospital facilities available. Relevant medical information, i.e. fever, etc., required.

DENSITY: Sea water.

FRESH WATER: Unlimited quantity available. Delivery from shore pipeline at the rate of 3 t.p.h.

FUEL: All grades available. Delivery by road tankers.

IDENTIFICATION CARDS: Not required.

CONSULS: No local Consuls. Nearest port of availability, Hull, Yorks.

REPAIRS: Limited engine and deck repairs.

REPATRIATION: No facilities exist for crew change.

AIRPORT: Yeadon, 45 miles, served by regular airlines.

HOLIDAYS: Normal Bank Holidays. Fish landings can be worked on these days.

POLICE/AMBULANCE/FIRE: Police Bridlington 672222; Ambulance 0482 – 881198; Fire 73585.

TELEPHONES: No arrangements exist for placing telephones aboard.

SHORE LEAVE: Crew members allowed ashore.

AUTHORITY: Bridlington Piers and Harbour Commissioners, Harbour Office, Harbour Road, Bridlington, Yorkshire YO15 2NR, United Kingdom. *Tel:* (0262) 670148/9. *Contact:* G. W. Wallis, Harbour Master.

BRISTOL (Avonmouth): 51.30 N. 02.42 W. (See Plan)

DOCUMENTS:

1 Maritime Declaration of Health.
1 Vaccination Certificate.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form I.B.6.
1 Stores List.
1 Certificate of Deck Cargo tonnage.
Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each passenger.
Ship's Certificate of Registry.
Derat or Derat Exemption Certificate.
Mercantile Marine Office Certificate (British ships only).

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Compulsory. Telegraphic address, "Brispilot Avonmouth". Notice required, at least 12 hours prior to arrival at Breaksea Lightfloat. Pilots can also be embarked off Ilfracombe (24 hours advance notice required). Breaksea boarding and landing station is one mile North of Lightfloat. Pilots board from 58 ft. motor pilot boat, black hull, "Bristol Pilot" in white letters amidships, operating from Barry Harbour.

VHF Channel calling 16, working 6. Ships report to Avonmouth Radio (VHF Channel 12) at English and Welsh Grounds and Walton Bay.

Details of rates and other particulars including tonnage and coastwise exemptions from pilotage available from Haven Master, R. E. Dock, Avonmouth Dock pilotage. Pilotage for locks to berth available but not compulsory.

ANCHORAGES: Barry Road affords good anchorage in moderate weather for vessels awaiting a Pilot.

APPROACHES: *Cautionary Advice:* Several points should be borne in mind.

Tides in the Bristol Channel are strong (up to 5 knots at Springs) and their effect must be allowed for accordingly.

Vessels should slow down in ample time before reaching the pilot station.

From the English and Welsh Grounds Lightfloat inwards, navigation becomes more difficult as the channel for deep draft vessels narrows. Traffic is heavier and more congested with vessels entering and leaving the docks, some of which are small vessels without Pilots.

RESTRICTIONS: Royal Portbury and Royal Edward Locks are manned from 4.5 hours before to 3.5 hours after HW, Portishead Locks from 2.5 hours before to 1.5 hours after HW.

MAX. SIZE: *Royal Portbury:* Max. length 950 ft., max. beam 130 ft., draft 40 ft.

Royal Edward: Max. length 690 ft., max. beam 95 ft., draft 34 ft.

Avonmouth Dock through Junction Cut from Royal Edward: Max. length 560 ft., max. beam 75 ft., draft 26 ft. 6 in.

Portishead Dock: Max. length 415 ft., max. beam 60 ft., draft 24 ft.

Note: The above quoted drafts are for tides that reach below Mean High Water i.e. on many tides a greater draft could be accommodated, on a few tides vessels of the quoted draft would be neaped.

HEALTH: Foreign arrivals are required to complete Maritime Declaration of Health and to report to Port Health Authority by radio, sickness, prior to arrival if possible, otherwise report on arrival at dock entrance.

Onus of reporting sickness is the personal responsibility of the Master.

All vessels are required to report the presence of animals or birds aboard vessel and any disease amongst such animals or birds.

Vessels arriving from ports within the excepted area and coastal arrivals need not present Declaration, but when there is sickness on board Port Health Authority must be informed.

Also see "Health – All Ports" before first U.K. port.

RADIO: Lands End (HF, VHF), Ilfracombe (HF, VHF), Celtic (VHF), Severn (VHF).

RADAR/VHF: Port radar coverage of King Road in low visibility conditions. VHF coverage (Avonmouth Radio) from Breaksea to dock entrances.

TUGS: Ships for Royal Portbury Docks are normally met by tugs West of Portishead Point.

Other vessels docking on flood tide normally meet tugs at old oil jetty to Northward of the entrance lock. Vessels docking on ebb tide, tugs join between Firefly and Cockburn Buoys. Ship's line always used.

BERTHING: In general, conventional and combi vessels are handled at Avonmouth, with Royal Portbury catering for unit load traffic, Ro/Ro or dedicated user traffic.

Avonmouth, Royal Edward Docks: There is 12,320 ft. of operational quay at the Royal Edward Dock, Avonmouth, including dry and liquid bulk berths with a self contained oil basin containing 8 berths, 4 of which are equipped with common user pipe-line systems. The majority of berths are equipped with shore cranes.

New developments announced include a 5 acre metal reclamation terminal for Chepstow-based Bird Group of Companies, a 14 acre LPG terminal for B.P Gas and new cement import and distribution facility for Castle Cement.

Royal Portbury Dock: The Port of Bristol's modern Royal Portbury Dock is equipped to handle Lo/Lo and Ro/Ro traffic. The 575 m. (2 berth) Gordano Quay has 2×45 tonne gantry cranes and is backed by 59 acres of paved area for unit loads and forest products. 250,0000 sq.ft. of covered storage is also available on Berth No. 2.

St. George's Quay, Berth No. 3, has a Ro/Ro cut out and 13 acres of paving, which extends into Berth No. 4. Berth No. 4 also has a Ro/Ro cut out ramp and limited paved area.

United Molasses Company, a Division of Tate & Lyle Ltd., operates an import and distribution depot with a tankage capacity of 53,000 tonnes. This development is situated behind Berth No. 4, where Redland Plasterboard will construct a £25 million plasterboard manufacturing terminal on a 30 acre site. Work on the site commenced in May 1988, with completion due in early 1990.

Two large vehicle handling terminals are adjacent to the Dock. Abbey Hill have expanded their Portbury Terminal by 10 acres to 35 acres, while Nissan UK, on the other side of the Port's motorway access road, have expanded by 5 acres to 25 acres.

Meanwhile on the Portbury Estate, new developments have been announced. Ashton Corrugated (Southern) and Christies Panel Products are to build factories on 9 acre and 6 acre plots, respectively. While retail giant, ASDA, are to build a regional distribution centre on a 20 acre site. These new developments join a large cold store owned by Frigoscandia, an animal compounding mill for BOCM-Silcock Ltd. and the Peter Lane Group's transport and distribution depot.

CRANES: Various types up to 12.5 tonnes at Avonmouth together with one 150 tonne floating crane. At Royal Portbury, 2×45 tonne gantry container cranes.

BRIDGES: Avonmouth Docks. Junction between Avonmouth Dock and Royal Edward available at all times if necessary by arrangement with Dock Master.

STEVEDORES: At least 24 hours notice required in order that necessary labour may be allocated.

MEDICAL: Absolutely necessary for Agent to have as much notice as possible of any medical attention required. All facilities available.

DENSITY: Avonmouth Docks: Average density 1012 to 1015; in the river fluctuates according to tides. Portishead Docks: The density is 1015.

FRESH WATER: Available at most berths, 24 hours a day from hoses connected to standpipe. Delivery rate 25 – 30 t.p.h.

FUEL: Most grades available – 24 hours notice required.

FIRE PRECAUTIONS: According to local laws, available on request.

GANGWAY/DECK WATCHMEN: Not absolutely necessary – Available if required.

OPENING/CLOSING HATCHES: If crew open hatches on the first day then they must continue to do so whilst vessel is discharging/loading, otherwise dockers attend to this.

CERTIFICATES:

Load Line Certificate.
Safety Equipment Certificate.
Lloyd's Construction Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

CUSTOMS ALLOWANCES: Current allowance for crew members of British and foreign ships in British waters.:

Tobacco: (incl. cigars and cigarettes) – 30 grammes (1 oz.)

Spirits: (incl. liqueurs, perfume and toilet water) – 0.185 litre (0.75 of a bottle) of which not more than half may be perfume

Wine: 1.5 litres (2 bottles)

IDENTIFICATION CARDS: Not necessary unless being repatriated.

CONSULS:

Belgian Consul
Chilean Consul
Danish Consul
French Consular Agent
Finnish Vice Consul
German F.R. Consul
Greek Consul
Italian Consular Agent
Netherlands Vice Consul
Norwegian Vice Consul
Spanish Vice Consul
Swedish Vice Consul

REPAIRS: All types of repairs are carried out. Contact Bristol Ship Repairers Ltd., Graving Dock Works, Royal Edward Dock, Avonmouth, Bristol BS11 9AZ. Tel: Avonmouth (0272) 823422/5. Telex: 498477 Drydok G.

DRY DOCK:

	Total length	*Length over blocks*	*Width of Entrance*	*Depth of water on sill*
Avonmouth Docks	875 ft.	850 ft.	100 ft.	32 ft.

REPATRIATION: Repatriation can be effected to all parts of world.

AIRPORT: Local airport approximately 12 miles away. London can be reached in 1.5 hours by train.

TIME: BST is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: New Year's Day; Easter (varies); May Day; Spring Bank Holiday (last Monday in May): Summer Bank Holiday (varies, usually last Monday in August); Christmas Day (25th December); Boxing Day (26th December). Work can be arranged on these holidays, except 25th/26th December.

POLICE/AMBULANCE/FIRE: *Royal Portbury and Avonmouth Docks:* Dock services can be contacted by dialling 222/333 on port's exchange or 822591 on British Telecom exchange.

Otherwise dial 999 on British Telecom. Exchange for national emergency services.

EMERGENCY CO-ORDINATION CENTRE: H.M. Coastguard, Mumbles, Swansea, West Glamorgan. Tel: (0792) 66534.

TELEPHONES: Can be put on board at most berths.

BANKS: National Westminster Bank Ltd., 1 Gloucester Road, Avonmouth. Tel: 823991.

Barclays Bank Ltd., Gloucester Road, Avonmouth. Tel: 822814.

Midland Bank Ltd., 7 Gloucester Road, Avonmouth. Tel: 822106, 828637.

Lloyds Bank Ltd., 265 Avonmouth Road, Avonmouth. Tel: 827191/2. (Major international banks located in Bristol's finance sector centred mainly around the "Corn Street" locality).

SHIP SUPPLY SERVICE: At Avonmouth limited services could be provided by the tug company, Cory-King, Towage, Tel: (0272) 822021.

The Pilotage Authority occasionally assists with sick crew members, limited numbers of personnel and small packages. Tel: (0272) 822354.

DEVELOPMENTS: See "Berthing".

AUTHORITY: Port of Bristol Authority, The Port Office, St. Andrews Road, Avonmouth, Bristol, Avon BS11 9DQ, United Kingdom. *Tel:* Avonmouth (0272) 823681. *Telex:* 44240. *FAX:* 820698. *Prestel:* 2029414. *Contact:* Nasim Aasim, Port Manager.

AGENT: Lovell, Hodder, Whitwell Ltd., Junction Cut, Avonmouth Docks, Avonmouth, Bristol BS11 9BH. Cables: "James Avonmouth". Tel. (0272) 823671. After office hours: (0272) 822855. Telex 44168, 44718.

BRIXHAM: 50.24 N. 03.30 W. (See Plan)

PORT LIMITS: The area below the level of high water enclosed by:

(a) An imaginary line drawn from Shoalstone Point in the Parish of Brixham, extending in a W.N.Westerly direction for a distance of 6,500 ft. or thereabouts, until it intersects the imaginary line next described:

(b) An imaginary line drawn from the centre of the Old Quarry at O.S. Ref. SX91445723, in a N.Easterly direction for a distance of 3,000 ft., or thereabouts, until it intersects the imaginary line first described, and:

(c) The land line of the coast from the centre of Old Quarry aforesaid to the said Shoalstone Point.

DOCUMENTS:

1 Crew List,
1 Passenger List,
2 General Declarations (Customs),
1 Health Document,
1 Manifest,
1 Each Bill of Lading,
1 Ship's Papers,
1 Ship's Certificates,
or
as for other small U.K. Ports.

PILOTAGE: Trinity House Pilot. Tel: Brixham (08045) 2214/4939. After hours (08045) 51649.

DEEP SEA AND COASTAL PILOTAGE: Pilots for all European and U.K. ports including the Baltic.

Ships requiring a Pilot at Brixham should cable at least 48 hours before arrival to "Hutchinson, Gravesend" advising and updating ETA Brixham.

2 hours before arrival Brixham – contact "Brixham Pilots" on VHF Channel 9. Pilots board by fast launch 1 mile N.E. Berry Head (or by arrangement). Pilot boats, length 40 ft. and 50 ft., black hull, orange wheelhouse, with "Pilot" in black on wheelhouse. Listening VHF Channel 9.

Also see "London" – Pilotage.

ANCHORAGES: In Torbay or outside port limits. Contact pilot station on VHF Channel 9 for advice.

MAX. SIZE: Unlimited at anchor. Also see "Berthing".

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Landsend Radio/Niton Radio/Portishead Radio.

VHF: Brixham Coastguard – Channel 16.

Harbour Office – "Brixham Port Radio" – Channels 16 and 14.

Pilots and/or Agents – "Brixham Pilots" – Channel 9.

TUGS: By arrangement.

BERTHING: Small coastal vessels in Inner Harbour by arrangement with Harbour Master. Vessels up to 500 ft. (draft 26 ft.), at Jetty, on Brixham Breakwater by arrangement with Brixham Bunkering and Devon Marine Ltd., (Telephone Brixham 2250), or with Harbour Master, Brixham.

MEDICAL: Contact Brixham and Torbay Shipping Agents.

DENSITY: 1025.

FRESH WATER/FUEL: Available from Brixham Bunkering and Devon Marine Jetty on Breakwater.

REPAIRS: Electronic, gyro, engine welding, plumbing by local firms.

SURVEYORS: West Marine Surveyors & Consultants Limited, Consulting Marine Surveyors, Engineers & Naval Architects, The Old Custom House, Brixham, South Devon. Tel: Brixham (Std 08045) 2604. After normal office hours Tel: (0803) 842925. Cables: Surveyor, Brixham. Telex: 42962 – Survey G.
REPATRIATION: See "Services".
AIRPORT: Exeter 35 miles away, Plymouth 34 miles away (daily flights to/from London).

Air UK flights from Exeter to Amsterdam, Brussels, Guernsey, Jersey and Southampton.
POLICE/AMBULANCE/FIRE: Brixham 2231 or 3065 or 999.
SERVICES: No tank cleaning.

Torbay and Brixham Shipping Agents Ltd. (0803) 882214. Telex: 42737. Cables: Dencade. VHF: Channel 9 and 16. Services offered: Boarding and landing deepsea and river pilots, technicians/service engineers, superintendents, repair squads, surveyors, crew changes, full repatriation facilities, medical assistance, divers/underwater inspections, chemist, charts/publications, compass adjuster, spares, stores, provisions, engine/radio/radar/gyro repairs.

Small loads and personnel by fast launch.

Supply boats/barge facilities for storing.

Vessels serviced off-limits, underway or safe deep water anchorage.
SHORE LEAVE: Allowed.
AUTHORITY: Borough of Torbay, Town Hall, Torquay, TQ1 3DR, United Kingdom. *Tel:* (0803) 296244, ext. 356. *Telex:* 42929. *FAX:* 0803-26244, ext. 337. *Contact:* Captain R. Wells, Harbour's Administrator.

BUCKIE: 57.41 N. 02.57 W. (See Plan)

PILOTAGE: Pilots keep VHF watch (Channel 16) 1 hour prior to arrival of vessel.
ANCHORAGES: 1 mile West of West Mucks Beacon.
RESTRICTIONS: Vessels with max. draft berth/sail at HW only.
MAX. SIZE: LOA 82 m., beam 12 m., draft 4.5 m.
BERTHING: Depth at entrance 3.3 m. below LAT. Depth alongside 5.2 m. below LAT.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Deck, engine, radio and radar repairs undertaken.
AIRPORT: Dyce (Aberdeen), 55 miles away.
AUTHORITY: Harbour Master – Buckie, Harbour Office, 28B Commercial Road, Buckie AB5 1UN. *Tel:* 0542 – 31700. *Telex:* 739148 (Ref-328). *FAX:* 0542–34742. *Cables:* "Harbourmaster". *Contact:* Captain W. F. Wood, Harbour Master.

Grampian Regional Council, Woodhill House, Westburn Road, Aberdeen AB9 2LU.

BUDE: 50.50 N. 04.33 W. (See Plan)

DOCUMENTS/HEALTH/CONSULS: Port not equipped to accept vessels from abroad.
PILOTAGE: Not normally available (special arrangements may be made).
ANCHORAGES: Outer Harbour dries out at half tide.

Inner Harbour (Canal) 8 ft. draft maximum.
MAX. SIZE: Inner Harbour (Entry via Lock) length 90 ft. Beam 25 ft. Draft 8 ft.
RADIO: MF Ilfracombe Radio. VHF Severn & Celtic Radio.
VHF: Bude Harbour Office listens on VHF Channel 16 when a vessel is expected.
FRESH WATER: Available via 0.5 in. hose pipe.
TELEPHONE NUMBERS: Harbour Master Bude 3111 (Office), Bude 3531 (Home), Coastguard Harland 235*, Police Bude 2131.

*Nearest Coastguard.
GENERAL: Port little used by commercial shipping.
SPECIAL REGULATIONS: Entry to the Harbour is made by leaving Chapel Rock (linked to the Main Land by a Breakwater) to starboard. Head towards the Lock in the Channel marked by 2 pairs of Leading Beacons.

The outer pair of Beacons, bearing 075° 30′ (T) consist of a front mark – white Spar with Yellow Diamond Topmark, rear mark – white flag staff, both on cliff top on North side of Harbour.

The inner pair of Beacons, bearing 131° 30′ (T) consist of a front beacon – white Pile Beacon with Yellow Triangle Topmark, rear beacon – white spar with Yellow Triangle Topmark, placed 0.5 cable West of Lock Entrance.

The approach to Bude, either from the North or South, should be made from a S.W. direct direction in line with the first pair of Leading Marks.

Immediately on passing Barrel Rock (0.5 cable North of Chapel Rock and marked by a Beacon Barrel) turn to starboard and pick up the inner pair of Leading Marks from which the Lock is clearly visible.

Entry to the Harbour at night not recommended.

Heavy ground swell and breaking seas may prohibit entry and exit.

The Harbour dries out at each Tide and entry of vessels is normally restricted to 2 hours either side of High Water.

For Locking, 18 ft. minimum of water above Chart Datum is required to Lock. A heavy swell may also prohibit the operation of the Lock.

Prior notification of arrival should be made to the Harbour Master if possible.
AUTHORITY: North Cornwall District Council, Kingshill Industrial Estate, Bude, Cornwall EX23 8QN, United Kingdom. *Tel:* Bude (0288) 3111. *Contact:* W. Cloke, Harbour Master/Beach Safety Officer.

BURNTISLAND: 56.03 N. 03.14 W. (See Plan)

DOCUMENTS: See "Leith".
PILOTAGE: Compulsory. See "Leith".
RESTRICTIONS: Dock gates normally opened from 3 hours before HW until HW.
MAX. SIZE: Width of dock gate 18.2 m. Max. width through gates 16.8 m. Max. depth 8.6 m. MHWS.
RADIO: See "Leith".
RADAR/VHF: Through Forth Navigation Service from Leith.
TUGS: Available from Leith.
BERTHING: 443 m. of quayage at East Dock. Depth 8.6 m. MHWS.
CRANES: 2×10 tonnes grabbing cranes. Mobile cranes available.
BULK CARGO FACILITIES: Bauxite vessels discharge into 2×8,000 tonne barges at anchor. The barges are unloaded by shore cranes in the East Dock.
STEVEDORES: Local company supplies labour.
REPAIRS: Fabrication yard situated in West Dock. 2×300 ft.×85 ft. bays, depth 19 ft.
AUTHORITY: Forth Ports Authority, Dock Office, Burntisland. *Tel:* Burntisland 872236. *Telex:* 72208. *FAX:* (0333) 24873. *Contact (at Methil):* Captain T. S. Sutherland, Port Superintendent. *Tel:* Leven (0333) 26725.

CALEDONIAN CANAL: 57.27 N. 04.18 W.

PORT LIMITS: Craft are considered to be within the Canal when they have entered the sea lock structures.
DOCUMENTS: Masters of craft on through passage must report to the Sea Lock Office at Corpach with the ship's measurement certificates to enable toll declaration to be made. Masters of craft on partial passage starting and returning to the East coast should report to the Clachnaharry Canal Office.
PILOTAGE: Approach pilotage compulsory at Inverness end. Contact Inverness Pilots by Link Call through Inverness 232845 or 235264 (Ships of NRT under 100 tons are exempted). Pilotage within the Canal and West approaches optional. For Pilotage into Corpach from the West contact Mr. H. McKinnon at Corpach by Link Call to Corpach 304 and for Canal Pilotage, by Link Call to Caledonian Canal Office, Inverness 233140.
RESTRICTIONS: Entrances to sea locks restricted for 2 hours either side of LW springs. There is generally no restriction at LW neaps. The Canal is operated on normal manning from 0800 hrs. until 1700 hrs. (Sundays excepted).
MAX. SIZE: 48.77 m. (160 ft.) length overall × 10.67 m. (35 ft.) beam × 2.74 m. (9 ft.) draft fresh water or, alternatively, 45.72 m. (150 ft.) × 10.67 m. (35 ft.) × 4.11 m. (13 ft. 6 in.) draft fresh water.

Corpach sea lock will admit craft to the Corpach Basin only of size 61.87 m. (203 ft.) length overall × 10.67 m. (35 ft.) beam × 4.11 m. (13 ft. 6 in.) draft fresh water.

All dimensions are overall and *NOT* moulded.
HEALTH: Vessels from foreign ports will be boarded by the Customs/Immigration/Health at the sea locks and they should fly the appropriate international flags on approach.

Also see "Health – All Ports" before first U.K. port.
RADIO: Western approaches via Oban Radio. Eastern approaches via Wick or Stonehaven Radio.
VHF: VHF at Corpach Sea Lock. Call Sign "Corpach Dock".
RADAR: None.
TUGS: A Canal tug is available if required. Service should not be required on normal passage.
BERTHING: At Corpach Old and New Wharves (limited Customs approval). At Inverness Glenmhor and Glen Albyn Wharves below Muirton and Upper Muirton Wharf at the top of Muirton. Water depth available for craft having 4.110 m. (13 ft. 6 in.). Normally ships gear or road mobile cranes used. Corpach New Wharf equipped with 2 × 7 ton Derrick Cranes owned and operated by Scottish Pulp and Paper Mills.
BRIDGES: Road and rail swing bridges are operated to permit the passage of craft. Headroom restricted to 36.576 m. (120 ft.) by overhead electric cables near Inverness.

Kessock Bridge at Inverness: Headroom restricted to 28.96 m. (95 ft.) over HW springs.
STEVEDORES: Traffic to Scottish Pulp and Paper Mills at Corpach unloaded by Pulp Mill gangs. Elsewhere arranged through Shipping Agent.
MEDICAL: Normal General Practitioners service available at main centres along the Canal. Full Hospital facilities at Inverness.
FRESH WATER: Fire hose supply available at Glen Albyn Wharf, Inverness. Small domestic supplies available at the main lock flights.
FUEL: Available by road tanker from principal oil companies by telephoning Shell, Inverness 238850 or Fort William 2404; Esso, Inverness 237222 or Fort William 2903.
REPAIRS/DRY DOCK: Limited repairing facilities at the Thornbush Slipway and Engineering Company Limited, Inverness.
AIRPORT: Highlands and Islands domestic flights from Inverness (Dalcross).

POLICE/FIRE/AMBULANCE: Emergency calls to these services on 999.
GENERAL: The Caledonian Canal is part of the Customs Port of Inverness.
AUTHORITY: British Waterways Board. Caledonian Canal Office, Clachnaharry, Inverness IV3 6RA. *Tel:* Inverness (0463) 233140. *Contact:* At Corpach: Mr. N. Rix. Tel: (03977) 249. At Inverness: Mr. L. Tait. Tel: (0463) 233140.

CAMPBELTOWN: 55.25 N. 05.36 W. (See Plan)

DOCUMENTS: 2 Crew Lists; 2 Passenger Lists; 1 Store List; 1 Personal Effect List; Ship's Register; 1 Manifest or Bill of Lading.
PILOTAGE: Although *not* in Clyde Port Authority area, where large vessels are concerned, it is advisable to have the services of a qualified Clyde River Pilot or where applicable a Certificated Naval Pilot. As neither are based in Campbeltown, it is essential that at least 24 hours notice be given to Agent, when required.
ANCHORAGE: For large vessels in 6 to 10 fathoms in the area between the Orange leading lights and the Methe Bank Buoy, for smaller vessels a wider area can be used but South side of loch best holding.
HEALTH: Normal UK Port requirements. In event of disease or fever prior notice should be given to Agent.

Also see "Health – All Ports" before first U.K. port.
RADIO: All messages through normal coastal stations or by radio telephones via Portpatrick Radio when nearer port. Cables should be addressed to Agents.
RADAR/VHF: No port radar service. Direct contact with Harbour Authority on VHF Channels 12, 13 and 14. P.O.L. Depot, Campbeltown can be called on 30 – 40 mile radius on Channels 6, 12, 18. Same channels for tugs, lying off port, when arranged previously.
TUGS: Must be ordered at least 24 hours beforehand as they come from Glasgow area further North on River Clyde. Precise requirements concerning arrival/departure times requested owing to heavy costs entailed for waiting time.
BULK CARGO FACILITIES: Berth for vessel up to 230 ft. in length with maximum permissible draft 12 ft. (Salt water). Discharge by shore crane, Maximum lifting 5 tons.
SPECIALISED CARGO HANDLING FACILITIES: One berth for Roll-on/Roll-off ferry inside harbour, max. draft of vessel 12 ft. General cargo discharged.
STEVEDORES: Agents arrange all cargo discharges, including mechanical handling. Portable cranes only available. Ship's gear used when available to minimise costs.
MEDICAL: One casualty hospital available. Serious casualties transferred to Glasgow either by air or road, according to condition. Five local doctors.
TANKERS: All intended arrivals should be notified to Officer-in-Charge, P.O.L. Depot, Campbeltown (Tel. No. 0586/2226) at earliest.

P.O.L. Jetty, minimum depth, 40 ft. One discharging berth available.
FRESH WATER: Available at all times, delivery by hose.
FUEL: Marine gas oil supplied on commercial quay. Naval requirements by arrangement with P.O.L. depot.
REPAIRS: Minimal repairs only. Notify Agent as early as possible.
SURVEYORS: Arrange through shipping Agents.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Ship's option.
CARGO GEAR: See "Stevedores". Ship's gear preferred where possible.
REPATRIATION: Air service available once daily in forenoon, except Sunday.
AIRPORT: Machrihanish – 3 miles distant.
TIME: GMT. GMT plus 1 hour in Summer.
HOLIDAYS: New Years Day (1st January) Christmas Day, Boxing Day, 3 Statutory Local Holidays, Annual Holidays 1st fortnight in August.

Work can be carried out by arrangement with Stevedores.
POLICE/AMBULANCE/FIRE: Dial 999.
EMERGENCY CO-ORDINATION CENTRE: Coastguard, New Quay, Campbeltown, Tel: 2770.
TELEPHONES: By arrangement.
SERVICES: Laundry/Dry Cleaner, Minimal Radar/Radio, VHF Repairs. No tank-cleaning equipment available or compass adjusting.
IDENTIFICATION CARDS: Not required. P.O.L. Depot request production of Seamen's Cards.
BANKS: Bank of Scotland, 9 Longrow, Campbeltown Tel: 2274.

Royal Bank of Scotland, 11 Castlehill, Campbeltown Tel: 3617.

Clydesdale Bank, 19 Longrow, Campbeltown Tel: 2130.
SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.
GENERAL: Basin of the Clyde Lat. 55° 25′ 0″ N., Long. 5° 35′ 30″ W. *Tides:* Spring rise 8.9 ft.; Neap rise 7.5 ft.; depth at sea entrance, 12 ft. low water spring tide; there is a rise of 8 ft. in spring tide in harbour.
AUTHORITY: Strathclyde Regional Council, Harbour Office, Old Quay, Campbeltown. *Tel:* Campbeltown (0586) 20365 or 52552. *Contact:* Mr. A. Stewart, Harbour Master, Campbeltown.

P.O.L. Depot, Campbeltown. Officer-in-Charge, Kilkerran Road, Campbeltown.

CARDIFF: 51.29 N. 03.10 W. (See Plan)

PORT LIMITS: A vessel is considered as "arrived" when it is in the lock.
DOCUMENTS: Documentation required for arrival:

C142	2 copies	Crew Declaration
C14	3 copies	Stores Declaration
C13	2 copies	General Declaration (completed by Agent)
C16	2 copies	Cargo Inward Declaration
C74	1 copy	Master's Authority (Agents complete)
C1320	2 copies	Cargo in un-registered spaces

These documents are to be completed and presented with copies of manifests and ship's documents at the time of report.
PILOTAGE: Channel pilotage and dock pilotage not compulsory except for vessels carrying passengers. Pilots embark from pilot cutters operating from Barry Harbour.

Pilot cutters are marked on each side "S.E. Wales Pilots" and operate radio continuous watch on VHF. Signal for pilot cutter – numeral "7" on whistle or siren. Telegraphic address: Barry Sewpil (telex). Minimum of 24 hours notice required of ETA. VHF Channels 16, 9, 14 and 11.
ANCHORAGE: Barry Roads: Good anchorages in moderate weather in depths from 5 to 6 fathoms (9.1 m. to 11 m.) about 0.5 miles S.W. of the entrance to Barry Docks. Clay bottom.
RESTRICTIONS: Entry to docks restricted to a period of 4 hours before and 3 hours after high tide, according to size and draft of vessel.

Entrance lock 850 ft. length, 90 ft. wide.
MAX. SIZE:
Queen Alexandra Dock: LOA 650 ft., beam 88 ft. 3 in., max. draft 34 ft.
Roath Dock: LOA 650 ft., beam 85 ft. 6 in., max. draft 30 ft.

Vessels near maximum dimensions may be accepted on certain tides after consultation with the Dock and Harbour Master.
HEALTH: Maritime Declaration of Health to be made to Port Authority or Customs Officer, whoever boards ship first. In event of contagious fever on board, Port Health Authority must be advised by radio before arrival. No Pratique necessary if vessel is entering port from another port in U.K.

Also see "Health – All Ports" before first U.K. port.
RADIO: Ilfracombe Radio and Portishead Radio.
VHF: A port operation VHF service maintained at dock entrance during tidal hours. Call sign "Cardiff Radio" calling on Channel 16 and operating on Channel 14 or Channel 11. There is also "Severn Radio".
TUGS: Tugs normally join vessel 0.5 mile to seaward of Outer Wrach Channel Buoy, and arrangements for attendance of tugs should be made through ship's Agent.
BERTHING: Arranged through Dock and Harbour Master, and berths within docks are flat quays. Rise and fall usually varies up to 1 ft.

Dock	*Quay Length (Total)*	*Normal Depth of Water*	*Max. Size of Vessel*			
			Length	*Beam*	*Draft*	*Approx.*
	(m.)	(m.)	(m.)	(m.)	(m.)	*d.w.t.*
Queen Alexandra	2,234	11.3	198.12	26.9	10.37	33,000
Roath Dock and	2,181	11.0	198.12	26.06	10.37	33,000
Roath Basin	1,174	11.0	158.00	21.30	8.50	18,000

Storage and Warehousing Facilities: Quayside: 5 transit sheds – 32,810 sq.m. (351,050 sq.ft.).

Back sheds: 13,870 sq.m. (149,280 sq.ft.).

Open storage: 8.7 hectares (21.5 acres) with a further 17.4 hectares (43 acres) managed by independent terminal operators.
Cranage and Mechanical Handling: Crane capacity: 1×15 tonnes; 8×7.5 tonnes; 3×5 tonnes; 7×3 tonnes.

2 additional 10 tonne grabbing cranes are provided by a terminal operator within the docks. The port provides a fleet of fork lift trucks for quayside cargo handling ranging from 4,000 lb. to 88,000 lb. capacity.
SPECIALISED CARGO HANDLING FACILITIES:

(i) Cold Storage: King's Wharf Cold Store, managed by the International Cold Storage Co. Ltd. has a capacity of approximately 12,000 tonnes and can operate with temperatures down to −23°C.

(ii) Cool Storage: Cool store with a capacity of approximately 60,000 cartons at any one time. The store is equipped with cooling machinery to maintain temperatures at 50°F – 55°F. (10°C – 13°C.).

(iii) Timber Terminals: Bulk carriers received at deep water berths, discharge of 2,000 cu.m. of timber in a single gang shift, large hardstanding storage areas plus covered accommodation for woodpulp and specialised timber products.

(iv) Combi Vessels: A modern front loading truck of 40 tonne capacity, capable of stowing containers three-high, available for handling.

(v) Bulk Cargoes: 1 grain loading appliance.

(vi) 2 Scrap Berths.
BRIDGES: Bridges throughout the port can be operated on tide times.
STEVEDORES: Arrangements for employment of stevedores undertaken by A.B.P. through ship's Agent.
Port Working Hours:

	Day Work	*Shift Work*
Monday – Friday	0700 – 1630	0600 – 1400 1400 – 2200
Saturday	0700 – 1130	0600 – 1000 1000 – 1400
Sunday	0600 – 1400	0600 – 1400 1400 – 2200

Vessels may also choose to work 0700 – 1630 (2 hours extra to finish if need be), Monday – Friday.
MEDICAL: All facilities available. Agents should be advised in advance if medical services required.
TANKERS: 2 tanker berths available, one in Queen Alexandra Dock and one in Roath Dock. Special instructions are issued to Master on arrival at port. Average discharge approximately 448 cu.m.p.h.
DENSITY: 1008-1018.
FRESH WATER: Available 24 hours daily from quayside, delivery 20 t.p.h. maximum.
FUEL: Fuel of all grades available.

FIRE PRECAUTIONS: For tankers, strict fire precautions required in accordance with latest safety procedures.

Emergency Action – Fire: In the event of an outbreak of fire (no matter how small) immediately dial 999 on the ship-to-shore telephone. When the operator answers, say "Fire", and wait until you are connected to the Fire Station Control. Then repeat: "Fire at Berth, (name of berth)". In event of the ship-to-shore telephone being inaccessible or out of order, use short blasts on ship's siren to alert Police and Port Authority. VHF can be used on tide times.

GANGWAY/DECK WATCHMEN: Performed by ship's crew and necessary for tankers.

OPENING/CLOSING HATCHES: Carried out by ship's crew.

CUSTOMS ALLOWANCES: Usual U.K. allowances.

IDENTIFICATION CARDS: Not needed.

REPAIRS: All types of repairs possible.

DRY DOCKS:

	Length	*Width at Entrance*
Bute Dry Dock	182 m. (597 ft.)	21.7 m. (71 ft.)

Bute Dry Dock owned and operated by Bristol Channel Ship Repairs Ltd.

REPATRIATION: Facilities exist to exchange crews and repatriate to any part of world.

AIRPORT: Airport 11 miles from Cardiff, serving other airports to all parts of world.

TIME: GMT. GMT plus 1 hour in Summer.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Whit Monday (Spring Holiday); May Day (1st Monday in May); August (Summer Holiday) one day; Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: Dial 999 on public telephone service and ask for service required, or short blasts on ship's siren to alert Dock and Harbour Master.

TELEPHONES: Ship/Shore telephone supplied at certain berths – service organized through ship's Agent.

SHIP SUPPLY SERVICE: A Ship Supply Service could be provided by Cory Ship Towage with their Tugs at Cardiff if required. Address: Cory Ship Towage Ltd., S.E. Wales Office, Alexandra Dock, Newport, Gwent. NP9 2NP. Tel: Newport 56835/6.

GENERAL: Cardiff is a port which has very big range of tides and important that accurate ETAs and max. drafts supplied by ship's Master in order that Agent may place orders for tugs and Pilots in sufficient time to be in attendance when required.

AUTHORITY: Associated British Ports – Cardiff and Barry, Pierhead Building, Bute Docks, Cardiff, South Glamorgan CF1 5TH, United Kingdom. *Tel:* (0222) 471311. *Telex:* 498542 ABPCB G. *FAX:* (0222) 471100. *Contact:* B. J. Harding, Port Manager.

CARRICKFERGUS: 54.43 N. 05.48 W. (See Plan)

PORT LIMITS: No. 1 Buoy Belfast Lough.

DOCUMENTS:

2 Crew Lists,
2 Passenger Lists,
1 Store List,
1 Personal effects List,
Ships Register,
1 Manifest or Bill of Lading.

PILOTAGE: Port Pilotage not compulsory but advisable. Pilots based at Carrickfergus Harbour. All Pilotage carried out by Belfast Pilots. Pilots board at No. 1 Buoy, Belfast Lough. Pilots can be contacted by VHF Channel 12.

ETA Messages: Advise Agents at least 24 hours before arrival through any British Coast Station and Pilots not less than 1 hour before arrival. (A) ETA No. 1 Buoy (B) ETA GMT or BST (C) Draft SW.

ANCHORAGE: Midway between Harbour and Greypoint.

HEALTH: No Certificates required, in event of disease contact Agents. Also see "Health – All Ports" before first U.K. port.

RADAR/VHF: No Port Radar Service. Harbour VHF Channels 14, 12 and 16 operated approximately 3 hours before HW to 1 hour after if ships are due. Contact Harbour on Channel 16.

TUGS: Tug available in harbour. Notice required 30 minutes.

BERTHING: Harbour Tidal:

Depth alongside all berths MHWST	4.88 m.
Depth alongside all berths MLWST	1.83 m.
Max. draft of vessels	4.88 m.
Max. Beam of vessels	12.20 m.
Width at entrance	19.80 m.

Quays:

Length of Commercial Quay	278 m.
No. 1 Berth (Caustic Acid)	64 m.
No. 2 Berth (Tanker Berth)	74 m.
No. 3 Berth (Most bulk cargoes)	76 m.
No. 4 Berth (Coal,Sulphur, Meal, etc.)	64 m.

Vessels discharging take bottom on soft mud.
Average Discharge 2 Grabs 150 t.p.h. at No. 3 and 4 Berth.

STEVEDORES: Provided by Messrs. John Kelly Ltd., Tel: 62612. Telex: 74210 and Kane Shipping, Tel: 51999.

TANKERS: Discharge controlled by Texaco Ltd., as plant is owned by them privately. Rate of discharge approximately 200 t.p.h. 2×8 in. diameter pipes and 1×6 in. pipe.

Usual safety precautions prevail.
Tankers not to enter Port without permission of Harbour Master.
Max. draft MHWST 4.88 m.

MEDICAL: One hospital available.

DENSITY: 1024.

FRESH WATER: Supplied alongside Quay approximately 10 t.p.h.

FUEL: Supplied by road tankers. All grades available from major Oil Companies.

GANGWAY/DECK WATCHMEN: Not compulsory.

OPENING/CLOSING HATCHES: All vessels by crew.

CERTIFICATES: Ship's Register on arrival.

CUSTOMS ALLOWANCES: 200 cigarettes each crew member. Spirit, wine, etc., at discretion of Water Guard.

CARGO GEAR: Three crawler mounted diesel grab cranes, 3,100 kg. and 3,045 kg.

IDENTIFICATION CARDS: Not required.

CONSULS: None. Most countries are represented at Port of Belfast approximately 9 miles from Harbour.

REPAIRS: Light repairs and welding only major repairs can be arranged at Belfast.

DRY DOCKS: None. Nearest at Belfast.

SURVEYORS: Most Classification Societies based at Belfast.

REPATRIATION: Good facilities for crew changes. Good railway and bus services.

AIRPORT: Belfast Airport approximately 22 miles served by regular lines.

TIME: GMT, plus 1 hour in Summertime.

HOLIDAYS: New Years Day, Easter Monday and Tuesday. 12th and 13th July, Christmas Day and Boxing Day.

POLICE/FIRE/AMBULANCE: Carrickfergus 62021.

TELEPHONES: Not possible to place on board. Good phone service convenient to ships.

SERVICES: All services readily available from Port of Belfast.

SHIP SUPPLY SERVICE: Off-shore service operated from the Port of Carrickfergus by 2 tugs, the "Ceres" and "Cobh".

Lagan Marine Services, 2 Downhill Park, Newtownabbey, Co. Antrim, BT36 6TX, Northern Ireland. Tel: Glengormley 2353, Belfast 746051.

SHORE LEAVE: After clearing inwards no restriction on shore leave.

AUTHORITY: Carrickfergus Borough Council and Harbour Master, Town Hall, Carrickfergus, Co. Antrim. *Tel:* (09603) 51604 (Council) 51292 (Harbour Master). *Contact:* Captain R. S. Heddles, Harbour Master/Manager.

CASTLETOWN, Isle of Man: 54.04 N. 04.40 W.

PORT LIMITS: Castletown Bay, North of line between Scarlet Point and Langness Lighthouse.

DOCUMENTS: Same as U.K.

PILOTAGE: If required, Pilot will board East of can buoy in bay.

ANCHORAGE: About 2 cables East of red can buoy. Exposed to S.-S.W.'ly weather.

RESTRICTIONS: Berthing at HW only. Max. draft 11.5 ft. Springs, 9.5 ft. Neaps.

MAX. SIZE: LOA 170 ft., beam 27.5 ft., draft subject to tides.

HEALTH: Same as U.K. ports.

VHF: Calling Channel 16, working Channel 12. Listening only when vessels due.

TUGS: None.

BERTHING: 4 berths, 170 ft. max. length. All dry out.

CRANES: Mobile crane, SWL 7.5 tons available.

BRIDGES: At entrance to Inner Harbour. Opened on request.

STEVEDORES: 24 hours notice should be given to Agent.

MEDICAL: Full hospital facilities available.

TANKERS: No facilities.

DENSITY: 1025.

FRESH WATER: Available ex-hydrant at all berths.

FUEL: Diesel available.

FIRE PRECAUTIONS: Usual.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: None.

SURVEYORS: I.O.M. Harbour Board, Marine Administration. Tel: (0624) 23813. Telex: 629335 Iomhar G.

HATCHES: Crew or stevedores to operate hatches.

CUSTOMS ALLOWANCES: Same as U.K.

CARGO GEAR: Ship's gear or mobile crane used.

AIRPORT: 2 miles away. Daily flights to U.K. and Eire.

TIME: GMT and BST.

HOLIDAYS: December 25th and 26th, January 1st and 2nd, Good Friday, Easter Monday, Spring Bank Holiday, July 5th and August Bank Holiday.

POLICE/AMBULANCE/FIRE: Police – Tel: 0624-822222. Ambulance/Fire – Tel: 999.

SERVICES: Compass adjusting.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Seaman's Book sufficient.

EMERGENCY CO-ORDINATION CENTRE: Ramsey Coastguard MRSC, Tel: (0624) 813255.

AUTHORITY: Department of Highways, Ports and Properties, Sea Terminal Buildings, P.O.Box 11, Douglas, Isle of Man. *Tel:* (0624) 23813. *Telex:* 629335 Iomhar G. *Contact:* Chief Harbour Master.

CLYDE PORT (Including Glasgow, Greenock, Finnart and Hunterston): 55.51 N. 04.16 W. (See Plan)

PORT LIMITS: For limits of jurisdiction see "Plans" – "Firth of Clyde and Sea Lochs".

DOCUMENTS: Following required on arrival:
3 Crew Lists on IMO Standard Form.
3 General Declarations. Customs Form C13.
3 Ships Stores Declarations. Customs Form C14.
2 Cargo Manifests. Customs Form C16.
1 Personal Effects Declaration. Customs Form C142.
1 Declaration of Health.
Bills of Lading.
Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Safety Construction Certificate.
Derat or Derat Exemption Certificate.

PILOTAGE: Compulsory pilotage.

Pilotage shall be compulsory in the portion of the Pilotage District within the area bounded on the West by that part of the line of Longitude 5° 06′ West commencing on the North shore of Loch Striven and then proceeding in a Southerly direction to the North shore of the Island of Bute and by the same line of longitude, from the South shore of the Island of Bute South to the latitude of Gull Point; thence by a line extending due East (T) to Gull Point; thence towards the S.E. by a line proceeding in a 143° (T) direction for 7 nautical miles; and thence on or towards the N.E. by a line proceeding in a 053° (T) direction to the North boundary of the Harbour of Saltcoats.

Within this area pilotage is compulsory for vessels exceeding 1,600 g.r.t. Pilots board off Little Cumbrae Island.

To the East and North of a straight line drawn from Kempock Point, Gourock, due West to the Cowal Shore, pilotage is compulsory for vessels exceeding 100 g.r.t. Pilots board West of Kempock Point.

Gourock Pilot Station, tel: Gourock 34631.

VHF Channels 14 and 16. Call "Clyde Pilots".

Vessel to advise Agent 72, 48 and 24 hours before arrival with subsequent advice of any changes to ETA, stating where Pilot required to board, ETA and draft.

Normal ladder, etc., for Pilot boarding.

Limits of Pilotage District:

(i) To the East of the Isle of Arran a line drawn due East and West across the river or Firth of Clyde from the coast of Ayrshire to Corrygills Point on the East Coast of the Isle of Arran; and

(ii) in Kilbrannan Sound a line drawn due East and West across the river or Firth of Clyde from the N.W. coast of the Isle of Arran to the coast of Kintyre being an extension of a line drawn due East and West from the Southernmost point of the island of Little Cumbrae to the N.W. of the Isle of Arran.

ANCHORAGES: Anchorages are available for vessels of all drafts in the Tail of the Bank area (off Greenock) and lower Firth of Clyde.

Anchorages are allocated by Clyde Port Estuary Radio. The anchorage positions are shown on Admiralty Charts Nos. 1907 and 1994.

RESTRICTIONS: Vessels entering the river channel are restricted to a maximum fresh water draft of 32 ft. Entry time for deeply laden vessels is dependent on the rise of tide.

Damaged vessels and vessels that are not in class must have a current Seaworthy Certificate and prior permission from the Harbour Master before entering the area of jurisdiction of the port.

MAX. SIZE: As agreed by Clyde Port Authority for berths in Glasgow and Greenock and subject to consideration of particular circumstances prevailing in each case.

HEALTH: Masters should report by radio to "Portelth Glasgow" any infectious illness which has occurred, or which has been suspected, during the voyage.

Also see "Health – All Ports" before first U.K. port.

RADIO: Traffic should be routed through any British coast station.

Clyde Pilot Vessel: Calling 2182 kHz. Working 2241 kHz. Hours: Listens each hour + 15 minutes.

VHF: Clyde Port Estuary Radio: Channels 16, 14, 12 and 11.
Gourock Pilots Radio: Channels 16 and 14.

RADAR: There is no port radar.

TUGS: As required by Master and under advice of the Pilot. Tug's lines are always used.

BERTHING: *General Cargo:* Discharged and loaded at Shieldhall Riverside Quay and King George V Dock, Glasgow.

Container Vessels: Handled at Greenock Container Terminal where 2 ships can work simultaneously. Berth is equipped with 1×40 ton and 2×35 ton transporter cranes with an outreach of 105 ft. beyond the line of the cope. The quay is 1,200 ft. long with a depth of 42 ft. at LWOST.

Ro-Ro Units: Can be handled at King George V Dock, Glasgow and at James Watt Dock and Garvel Basin, Greenock.

BULK HANDLING FACILITIES: Iron ore and coal are handled at Hunterston Terminal where discharging vessels up to 350,000 d.w.t. and loading vessels up to 70,000 d.w.tonnes can be accommodated. Depth alongside up to 29 m. Max. draft 26.0 m. 2 unloaders, rates up to 3,000 tonnes per hour for ore and 1,000 tonnes per hour for coal.

Scrap iron and minerals are handled at Rothesay Dock (Clydebank) where vessels up to 535 ft. in length with a draft of 31 ft. in fresh water can be accommodated. With prior arrangement vessel in excess of 535 ft. may be accepted.

Sugar and molasses are handled at James Watt Dock, Greenock. Vessels using the dock are restricted to a salt water draft of 27 ft. 9 in. and a beam of 70 ft. The max. length accepted for sugar vessels is 550 ft. and for molasses vessels 500 ft.

Grain is discharged at Meadowside Quay (Glasgow) to the 132,000 tonne granary which is situated behind the dockside goods sheds. There are 6 grain elevators each with a capacity of 200 t.p.h. Max. draft for vessels using Meadowside Quay is 32 ft. in fresh water.

CRANES: Cranes presently in use by Clyde Port Authority at Glasgow are: 7×5 tons, 3×6 tons, 2×10 tons, 1×25 tons, 1×30 tons, 1×35 tons, 1×160 tons.

BRIDGES: Erskine Bridge which spans the navigable river channel has a 180 ft. working clearance above MHWS.

STEVEDORES: Arranged by ship's Agent in accordance with Master's advice of ETA.

MEDICAL: Full medical and hospital facilities available.

TANKERS: BP Oil Ltd.: Privately operated crude oil terminal at Finnart.

The terminal is located on the East side of Loch Long (Lat. 56° 07′ N., Long. 04° 50′ W.) 25 miles from the pilot station off Little Cumbrae. There are 2 berths of which No. 3 accommodates about 300,000 d.w.t. tankers with a max. draft 75 ft. and No. 2 Berth, to the S.W., is used for about 200,000 d.w.t. with a max. draft 54.5 ft. and smaller tankers.

Berth Approach and Berthing: The berths are well sheltered, the water in Loch Long is deep and, with little tidal flow, berthing can be done at any state of the tide.

Berthing is done only in daylight, but ships can sail at any time. Vessels are turned about 0.5 miles seaward with tug assistance and backed up to the berth port side to, head out.

Tugs push on the off-shore side to breast the vessel alongside until secured.

Moorings: Ship's moorings are landed by launches. The usual pattern of moorings at Berth No. 3 is 5 head ropes, 5 stern ropes, 1 ship's breast rope at each end and 2 backsprings at each end to the jetty head. A 5.5 in. wire with "braidline" tail is provided by the shore as an additional breast mooring at each end. All ship's ropes are secured to quick release hooks.

At Berth No. 2 vessels secure to bollards with 4 head ropes, 4 stern ropes and 1 backspring at each end to the jetty head. A shore wire is provided at each end as a breast mooring.

Gangway: At Berth No. 3 a shore gangway is provided. At Berth No. 2 the ship must provide a safe gangway. Access to and from the ship must be by the gangway only.

Limitation on Height of Ship's Manifold: Prior notice must be given to the terminal if the height of the ship's manifold will exceed 68 ft. above waterline.

Cargo Handling: Each berth has the following Woodfield Combination hose/booms: 4 for crude oil (10 in. on Berth No. 2, 16 in. on Berth No. 3), and 2 for fuel oil imports and bunkering (8 in. on Berth No. 2, 10 in. on Berth No. 3). These connect with tankfarm by 2×12 in. fuel oil pipe-lines and 14×12 in., 24 in., 42 in. crude oil pipe-lines.

The maximum pressure allowed is 200 p.s.i.

There are facilities for loading lube oils.

Ballast and Slops: There is no facility for receiving dirty ballast or slops at the terminal. The tank cleaning berth at Greenock is no longer in operation.

Density of Water: The specific gravity averages 1.012 at the berths.

Services: No bunkers are available over the jetty. Ample prior notice is required for delivery by barge. Fuel and diesel oils are delivered by a barge with a fuel oil capacity of 440 tons and a diesel oil capacity of 118 tons. A 6 in. hose is used and the barge delivers both grades at 100 t.p.h.

Fresh water, of good soft quality, is piped to the berths at 50 t.p.h. Maximum quantity is 500 tons.

Normal domestic services, stores, laundry, etc. may be handled over the jetty with permission of the Terminal Authority.

A 1.5 ton crane is available for use at the berths.

A coin-operated telephone will be put on board, upon request.

Esso: Located at Bowling. This is a privately owned product distribution terminal, located 11 miles from Kempock Point (Gourock Pilots) and 9 miles up the River Clyde on the North Bank. It comprises 2 marginal jetties seaward of the silted up Dunglass Basin as well as quayside berths for small coasters and barges above the basin.

No. 1 Jetty was brought into service after major reconstruction in 1974. No. 2 Jetty, down river, is silting up and has no facilities. It is only used in an emergency.

The acceptable size of tankers in low-flash service is limited by a maximum LOA of 550 ft. (560 ft. with thruster fore and aft) which can be turned off Dunglass Basin as low-flash tankers are not permitted in the river above Bowling. Max. draft 31 ft.

Tankers, other than low-flash, up to 600 ft. with connections at mid length are acceptable. Such vessels have to turn off Rothesay Dock 4.5 miles up river, only in daylight, and by prior arrangement.

Moorings: Normal complement of mooring lines is 6 at each end, i.e., 2 backsprings, 2 breast ropes, 2 head/stern lines each end.

Cautionary Note: Moorings need to be carefully tended at all times but particularly while other vessels are passing along the channel.

Although all vessels are required to pass the terminal at dead slow speed, the effect of their passing tends to cause moored tankers to range in the berths. Moorings have been known to part.

Gangway: The vessel must provide a safe gangway and access to and from the vessel must be by the gangway only.

Manifold Preparation: Unless the vessel is to turn before berthing, the port side manifold should be prepared by removing blanks to present 8 in. ASA flanges. All off-shore manifolds and connections not required for use must be securely blanked. All derricks, stays, radio aerials, etc., should be clear of the manifold area.

Cargo Handling: The jetty is fitted with 8 in. ASA 150 EMCO Wheaton hard arms, 3 for black oils which connect with 16 in. and 12 in. pipe-lines, and 4 for clean grades which are connected on the jetty head with 12 in. product pipe-lines.

There are 3 connections for lube oils, which are handled by 6 in. flexible hoses.

There is no bunker connection on the jetty. Also, there is no facility for receiving ballast or slops at the terminal. Tankfarm is located within a mile or so of the jetty and mostly at sea level, but a few clean oil tanks stand about 100 ft. above sea level.

Maximum pressure allowed on black/clean oil arms is 100 p.s.i. Maximum pressure allowed on lube hoses is 50 p.s.i.

If wind speed reaches 30 – 35 m.p.h., then cargo operations will be stopped, arms drained, disconnected and secured.

Services: No bunkers are available over the jetty. Prior notice is required for delivery by barge.

Fuel and diesel oils are delivered by a barge with a fuel oil capacity of 440 tons and a diesel oil capacity of 118 tons. A 6 in. hose is used and the barge delivers both grades at 100 t.p.h.

Fresh water is piped to the berth at 20 t.p.h.

Normal domestic service (stores, laundry) up to 1 ton loads can be handled over the jetty. Heavier loads require arrangement of a barge.

Departure: Ample warning required for Pilot and tugs.

Normal practice is for vessels in ballast to unberth and proceed slightly up river and swing in the turning area off Dunglass Basin at 1 hour before HW, on the last of flood.

Cautionary Note: The turning area is reasonably restricted and great care should be exercised in keeping vessel's speed to a minimum as well as making sure vessel is in correct turning position before commencing swing.

DENSITY: Glasgow – Fresh; Greenock – Brackish; Hunterston – Salt.

FRESH WATER: Available by hose at all berths operated by the Clyde Port Authority.

FUEL: Most major oil companies are represented in Glasgow. All grades of bunker oil can be supplied by barge or road tanker and by pipeline at Bowling Terminal.

FIRE PRECAUTIONS: Masters of vessels at the Authority's berths are given, on arrival, a copy of the Port Fire Protection Regulations.

Oil tanker berths are privately owned and the operators issue their own Fire Regulations.

CONSULS:

Belgium
Brazil
Canada
Cyprus
Denmark
Domincan Republic
Ecuador
Finland
Gambia
Germany F.R.
Greece
Iceland
India
Italy
Netherlands
Norway
Panama
Peru
Philippines

REPAIRS: All types of repairs can be effected in the area.

DRY DOCKS: Largest dry dock is 1,000 ft. long with 145 ft. clear width at entrance.

In addition there are 9 other smaller dry docks in the Glasgow and Greenock area.

SURVEYORS: The following are represented in the area: Lloyd's Register of Shipping, Norske Veritas Register of Shipping, Bureau Veritas Register of Shipping, American Bureau of Shipping, The Salvage Association.

In addition, a number of independent marine and cargo surveyors are available.

GANGWAY/DECK WATCHMEN: Shore watchmen are available from private contractors but need only be engaged at the discretion of the Master.

HATCHES: Opening and closing of mechanical hatches may be carried out by ship's crew. Wooden hatches are handled by dock labour.

CUSTOMS ALLOWANCES: Standard United Kingdom allowances.

CARGO GEAR: Under normal circumstances, cargo is handled by shore equipment.

REPATRIATION: Repatriation can be arranged to all countries.

AIRPORT: Glasgow Airport (12 miles from city centre) and Prestwick Airport (30 miles from city centre) are both served by a number of major airlines.

Air UK have flights from Glasgow to Amsterdam.

TIME: GMT, but British Summer Time (1 hour ahead of GMT) in force during the Summer.

HOLIDAYS: Details of official dock holidays on which cargo work cannot be arranged can be obtained from the Marketing Department of the Port Authority, on request.

POLICE/AMBULANCE/FIRE: Can be called on the public telephone system by dialling 999 or by contacting Clyde Port Estuary Radio on VHF Channel 16.

EMERGENCY CO-ORDINATION CENTRE: H.M. Coast Guard (Marine Rescue and Co-Ordination Centre), Navy Buildings, Eldon Street, Greenock. Tel: (0475) 29988. Telex: 777006.

TELEPHONES: British Telecom can supply telephones at most berths. Agent will arrange and advise costs.

SERVICES: Facilities are available for repairs and service to radio equipment and navigation aids. A compass adjuster is based at Glasgow.

There are no facilities for cleaning oil tankers, but small quantities of oil/sludge may be removed by road vehicles.

SHORE LEAVE: Shore leave is at Master's discretion.

IDENTIFICATION CARDS: Not required to be carried.

REGULATIONS: Tankers having on board or having carried cargo with a flashpoint below 73°F are prohibited from proceeding East of Bowling.

Special regulations apply to the handling and transit of explosives.

There are special requirements in force regarding the production of a gas free certificate for OBO and ore/oil vessels calling at Hunterston Ore/Coal Terminal.

It is a requirement of the Clyde Port Authority that every vessel in excess of 1,600 g.r.t., constructed or adapted for the carriage of oil, chemicals or gas in bulk, complies with the reporting procedures as specified in Statutory Instrument 1981 No. 1077, entitled, The Merchant Shipping (Tankers) (EEC Requirements) Regulations 1981.

BANKS: All National and many European and International banks have branches in Glasgow.

SHIP SUPPLY SERVICE: *Surface Craft:* Clyde Marine Motoring Co Ltd., Princes Pier, Greenock, Renfrewshire.

Clyde Shipping Tugs Ltd., Clydesdale Bank Building, Greenock Renfrewshire.

COLCHESTER: 51.54 N. 00.55 E. (See Plan)

PORT LIMITS: Brightlingsea Anchorage.

DOCUMENTS: As normal British port.

PILOTAGE: Part of Trinity House London District. Sunk Pilot Cutter cruises near the Sunk Light Vessel. Give as much notice as possible by radio telephone or VHF Channel 16. River Pilots are ordered by local Agents and board vessels at Brightlingsea Anchorage.

ANCHORAGES: Off Brightlingsea, in 3 to 4 fathoms.

RESTRICTIONS: Vessels with deck cargoes of timber, and vessels which are large for the port not worked at night.

MAX. SIZE: Max. length at Colchester, 200 ft. Max. length at Rowhedge and Wivenhoe, 250 ft. Max. draft at Colchester, 12 ft. 06 in. Spring tides 8 ft. 06 in. Neap tides. Max. draft at Rowhedge and Wivenhoe 14 ft. 06 in. Spring tides, 10 ft. Neap tides.

HEALTH: Normal procedure. Any abnormal conditions advise Harbour Master. Pratique automatic if from U.K. port.

Also see "Health – All Ports" before first U.K. port.

RADIO: North Foreland Radio, Humber Radio or Niton Radio. 2182 kHz

VHF: "Colchester Harbour Radio", VHF Channel 14. Office hours watch plus tide time watch when ships expected. Vessels should call when approaching port anchorage, giving deepest draft, and keep listening watch on Channel 14 when manoeuvring.

RADAR: None.

TUGS: Small motor tug available through Harbour Master. Private tugs also available.

BERTHING: 1,000 ft. of private quays. 3,200 ft. of public (corporation) quays. All berths use shore equipment and handle all cargoes. Port dries at LW. (Berths at Wivenhoe 450 ft., at Rowhedge 500 ft. additional to above.)

CRANES: A number of 4 ton – 6 ton mobile cranes.

BULK CARGO FACILITIES: Bulk cargoes handled at most berths, 3 grain silos.

STEVEDORES: Arranged by Local Agents. Average rate for all cargoes 100 t.p.h.

MEDICAL: Advance notice if possible. Hospital available.

TANKERS: No facilities.

DENSITY: Density varies with tide, average 1015.

FRESH WATER: Fresh water points on quays, rate approximately 9 tonnes/p.h., cost £13.0 to £25.0, based on size of vessel.

FUEL: All fuel deliveries by road tanker.

FIRE PRECAUTIONS: None.

CONSULS: None.

REPAIRS: No facilities.

SURVEYORS: Lloyd's Agent (W. Fieldgate & Son) or ship's Agent can arrange.

GANGWAY/DECK WATCHMEN: Not normally required.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: British standard allowance.

CARGO GEAR: Shore gear, no heavy lifts.

REPATRIATION: Arranged by Agents.

AIRPORT: London 70 miles. Stansted 30 miles.

TIME: GMT. GMT plus 1 hour in Summer.

HOLIDAYS: Normal British holidays, work sometimes arranged.

POLICE/AMBULANCE/FIRE: Tel. 999.

EMERGENCY CO-ORDINATION CENTRE: U.K. Coastguard – Dial 999 or VHF Channel 16 or Tel: Walton-on-Naze 5518.

TELEPHONES: None.

SERVICES: Compass adjusting arranged by Agents.

BANKS: Barclays, Midland, Nat-West, Lloyd's and Williams & Glyn a have branches in the town.

STORING: See "Prelims".

1. By truck.
2. Not applicable.
3. Yes, subject to cargo handling.
4. Yes
5. Normal U.K. Requirements.
6. Yes.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

DELAYS: Normally tidal delays only.

AUTHORITY: Colchester Borough Council, Harbour Office, Hythe Quay Colchester, Essex, United Kingdom. *Tel:* Colchester (0206) 57585 *Contact:* Captain R. Grimer, Harbour Master.

COLERAINE: 55.03 N. 06.40 W.

PORT LIMITS: 5.5 mile tidal stretch of the River Bann to the river entrance.

River entrance: 55° 10′ N., 06° 46′ W.

DOCUMENTS: Normal U.K. requirements.

PILOTAGE: Compulsory, order through Agents or direct from Harbour Office or Pilot. 24 hours notice preferred. Pilot Station, Portstewart Bay. Pilot boat call sign "S. G. Martin", call on Channel 16, working Channel 12.

ANCHORAGES: Vessels awaiting tide can anchor in Portstewart Bay in offshore winds or in Skerry Roads, East of Portrush.

RESTRICTIONS: The port is tidal and deeper vessels are restricted to high tides. Limited night working.

MAX. SIZE: The recommended maximums are 80 m. length, 12.2 m. breadth and 4.3 m. draft.

HEALTH: Normal U.K. procedure.

TUGS: Not normally required, nearest available tug is at Londonderry Harbour.

BERTHING: Main Quay 900 ft., 2 detached wharves 140 ft. and 150 ft. and separate Oil Jetty. Max. draft vessels may ground safely on mud at LWST.

CRANES: Two Priestman Lion 35 grabbing cranes for bulk coal, etc. One NCK Pentland for bags, pallets, etc. 1×35 ton Henderson derrick crane for containers or heavier lifts.

SPECIALISED CARGO HANDLING FACILITIES: No facilities for Ro/Ro traffic.

BRIDGES: A railway bridge with 60 ft. lifting span crosses the river 0.5 miles down stream from the Harbour.

STEVEDORES: Messrs Wm. Dalzell & Sons Ltd. Tel: (0265) 54365. Telex: 74512.

MEDICAL: Full hospital/medical facilities available.

DENSITY: Varies between fresh and salt, depending on weather and tide conditions.

FRESH WATER: Fresh water is available from mains hydrants at all berths.

FUEL: All grades available, 48 hours notice advisable.

REPAIRS: Local engineers can carry out most repairs. Divers also available for underwater work.

DRY DOCKS: None.

HATCHES: Hatches normally opened or closed by the crew.

AIRPORT: Belfast International (Aldergrove) 40 miles. Belfast (harbour airport) 60 miles, Eglinton, 24 miles.

HOLIDAYS: 1st January, Easter Monday/Tuesday, May Day, 12th/13th July, Last Monday in August, 25th/26th December.

POLICE/AMBULANCE/FIRE: Tel: 999 in emergencies.

DELAYS: Vessels may be delayed by swell at the river entrance in very bad weather conditions.

AUTHORITY: Coleraine Harbour Commissioners, The Harbour Office, The Quay, Coleraine BT52 1BJ, Co. Londonderry. *Tel:* 0265-42012. *Contact:* W. R. Dalzell, Harbour Master.

COWES (including Newport, Isle of Wight): 50.46 N. 01.18 W.

OCUMENTS: As for "Portsmouth".

PILOTAGE: Vessels subject to compulsory pilotage. Cowes Pilots conduct vessels between the anchorage area and berths in Cowes Harbour and Newport, 5 miles further up the River Medina. Pilots board from launches *Thosbro 1 and 2*, which are equipped with VHF, Channels 16, 12, 9 and 6. A Pilot can always be obtained by making a link-call to Cowes 293812 or 292501 (24 hours service) or via Cowes Harbour Radio VHF Channel 16.

Note: This will all change to a new system in September 1988 – dependent on the enactment date of the new Pilotage Bill.

ANCHORAGES: Vessels waiting to proceed to Cowes or Newport should anchor within the area bounded by Old Castle Point, "Prince Consort" light-buoy and the harbour entrance light-buoy. The prohibited anchorage on either side of the leading line must be respected, and vessels must not obstruct the fairway into Cowes, nor the deep water channel used by large vessels bound for Southampton. The mooring buoy is reserved for the Trinity House lighthouse tender and naval vessels. Mooring chains run East and West for 500 ft. from each of these mooring buoys. Tidal streams in the anchorage are strong. Cowes is an international yachting centre, and the anchorage is often crowded with small craft, especially during July, August and September.

Cowes Roads anchorage, North of the deep water channel, is used by large vessels waiting to berth in Southampton Water, taking bunkers or changing crews.

MAX. SIZE: Cowes – 300 ft. long, 17 ft. draft at HWS. Vessels must expect to take the bottom in soft mud at LW. Newport – 150 ft. long, 8 ft. draft. Newport Harbour practically dries out at LW.

RESTRICTIONS: Tankers may load and discharge at all times, subject to the Petroleum Acts.

FLOATING BRIDGE: A chain ferry plies between East and West Cowes. An all-round amber light is shown from the leading end of the bridge when under way. Approaching vessels should sound 1 prolonged blast on the whistle when not less than 0.5 mile away. The bridge gives way to all river traffic. The chains of the ferry are at least 2 ft. above the river bottom in mid-channel at all times.

HEALTH: See "Portsmouth".

RADIO: See "Southampton" for Sea Pilot communications. See "Pilotage" for local communications.

Southampton Port Radio, the port operations and radar station for the port of Southampton, will often assist in cases of difficulty, although there is no obligation for them to do so and they accept no responsibility. Southampton Port Radio VHF Channels 16, 14, 12, 11, 10, 18, 20 and 22. Medium frequency through Niton Radio.

TUGS: Harbour tug (3.5 ton bollard pull) and tow-boat launches are available to assist vessels.

BERTHING: *Medina Wharf:* Vessels 17 ft., Spring draft, LOA 270 ft. Loading and unloading bulk cargoes of stone, coal, fertilisers, grain, etc. *Kingston Wharf:* As for Medina Wharf, above.

STEVEDORES: By arrangement with Agent and wharf owners. Normal working hours: 0800 – 1700 hrs. Monday to Friday. Overtime on Saturdays, etc., by arrangement. No work on public holidays.

MEDICAL: All medical facilities are available. Agent should be given advance notice of requirements. If call is solely to land sick personnel, see "Southampton" entry.

DENSITY: Cowes – 1025 salt water.

Newport – varies according to amount of recent rainfall and state of tide.

FRESH WATER: Available on all commercial wharves.

FUEL: Fuel and Diesel oil available by arrangement with Agent.

CRANES: Hammerhead crane at Elliot Turbo Machinery Ltd., 50 tons. Medina Wharf: 2 grabbing cranes of 4.5 tons for bulk cargoes.

OPENING/CLOSING HATCHES: By ship's crew.

REPAIRS: All hull and engine repairs undertaken to vessels capable of Cowes entry. Graving dock for ships up to 200 ft. in length and 14 ft. draft.

SERVICES: Compass adjuster, radar and radio mechanics available locally. Charts and general stores available locally.

SHIP SUPPLY SERVICE: *Thomas Bros.:* 2×40 ft. launches (20 knots) available throughout 24 hours for stores – 12 persons – liberty boats, surveys, etc., and marine contract work – U.K. and Northern France. Tel: (0983) 293812.

Solent Cruises: 2×45 ft. fast vessels with twin screw, D.O.T. loadline exemption, able to carry up to 89 persons (reduced number in Winter).

Solent Cruises are contractors to the local authorities for the transfer of sick persons from the Isle of Wight to the mainland.

Contact on VHF Channel 16, (Jenny Lee – 2 RAH) when afloat or Telephone Isle of Wight (0983) 64602.

A 24 hour service is offered for transport of personnel, stores and passengers.

Marine Support and Towage Limited: Tel: (0983) 295369, 296424, 297363 (24 hours). Office (0983) 296934.

Details of Vessels:

Name	*Length*	*General Description and Capabilities*
Roperunner	33 ft.	Heavily fendered steel work launch, used for running mooring ropes/wires for large vessels 6,000 tons – 250,000 tons. Large open after work space, forward wheelhouse. Fitted with radar and multi-channel VHF radio. 120 h.p. diesel, 1 ton bollard pull. Speed 8 knots.
A. Stopford	40 ft.	Keith Nelson twin screw diesel fast launch, for personnel transport and light storage duties, open after cockpit with towage facility. Licenced for 12 passengers. 2×145 h.p. diesels. Speed 16 knots – 18 knots. Fitted with radar, VHF radio and echo sounder.
MST Lock	64 ft.	Steel harbour and esturial motor tug. 300 h.p. Crossley diesel, 3 ton bollard pull. Fitted with radar, VHF radio and echo sounder.
Presstan	68 ft.	Steel coastal tug, full D.O.T. loadline. 545 h.p. diesel, 6.5 tons bollard pull. Fitted with radar, VHF radio and echo sounder.

Above vessels are available on hourly, daily or long term charter, U.K. coast or continent. Company is experienced in offshore back-up, ship supply, etc. A 24 hour office facility call out is maintained.

St. Helens Laundry Ltd.: Tel: (0983) 872250, 873731.

Able to supply laundry and dry cleaning services to any vessels at Southampton Docks, Fawley Terminal, Netley, The Solent, Portsmouth Harbour or Docks, and the St. Helens Roads and Nab Anchorages.

OIL POLLUTION: Cowes and the Solent are world-famous yachting centres. Pollution is dealt with severely.

AUTHORITY: Cowes Harbour Commissioners, Harbour Office, Town Quay, Cowes, Isle of Wight, PO31 7AS. *Tel:* (0983) 293952. *Contact:* Captain H. N. J. Wrigley, Harbour Master/Chief Executive Officer.

CROMARTY FIRTH PORT (See Plan)

(A) INVERGORDON/EVANTON: 57.41 N. 04.10 W.
(B) NIGG OIL TERMINAL: 57.41 N. 04.02 W.

(A) INVERGORDON

DOCUMENTS: *At Boarding on arrival:*

1 copy Maritime Health Declaration and Derat Exemption.

Form I.S.6 – List of members of the crew who are aliens or who were engaged outside the United Kingdom.

Form C.13 – General Declaration (in duplicate).

Form C.14 – Ship's Stores Declaration (in triplicate).

Form C.16 – Cargo Declaration (in duplicate).

Form C.142 – Crew Declaration (in duplicate).

List 142.A – Parcels list – small packages of merchandise and addressed packages not borne on the ship's report.

Account of cargo in unregistered spaces (deck cargo) if arriving from a port outside Home Trade limits.

For vessels carrying cargo on deck or in other unregistered spaces (e.g. oil fuel in double-bottom and other ballast tanks), the Master must also complete Form SUR.238 Declaration of Deck Cargo in duplicate.

Delivery of forms. When a vessel is not boarded by a Customs Officer on arrival, 1 copy of each of the forms listed must be delivered by the Master or his authorised agent to the proper place at the port of arrival. The Regulations require delivery of these forms within 3 hours of the vessel's arrival at the place of loading or unloading. The second copy of Forms C.14 and C.142 must be retained on board by the Master or other responsible officer for use by Customs Officers who may subsequently visit the vessel.

Certificate of Registry.

Certificate of British Tonnage.

Light Dues Certificate relating to the vessel.

To the Agent:

Bills of Lading.

Cargo Manifests.

PILOTAGE: It is proposed that 24 hour pilotage be introduced late in 1988. Vessels under 300 g.r.t. are exempt. Cruising station of pilot boat is the Cromarty Lighthouse, where Pilot will board. Pilot boat painted black hull, buff upper structure.

Pilot boards from tug at Fairway Buoy for large tankers and oil rigs.

Approaching vessels may give their ETA to pilot station via VHF Channel 16, when in the vicinity of 30 miles, but a 24 hour notice will be required. In the event of bad weather, vessels will be guided by Pilot launch to safety where Pilot will board. Watch kept on VHF Channels 16 and 11 (24 hours) by Cromarty Firth Port Authority. Call sign "Cromarty Firth Port Control". Local weather forecasts available.

ANCHORAGES: Large tankers anchor 1 mile South of Fairway Buoy (L.Fl. 10 secs. Racon). Main anchorage West of Cromarty Ness Light.

RESTRICTIONS: Vessels bound for Invergordon or Evanton with a draft over 43 ft. are not handled at low water.

MAX. SIZE: Max. permissible length 900 ft., max. draft 40 ft.

Nigg Oil Terminal: See "Section B".

HEALTH: International quarantine signals to be used. Advise "Portelth Dingwall" in advance if any suspected diseases on board.

Also see "Health – All Ports" before first U.K. port.

RADIO: Vessels approaching from North should pass their ETA cable via Wick Radio GKR 431, and vessels approaching from East via Stonehaven Radio GND 458 to their Agents.

VHF: Link calls through Cromarty Radio (based at Wick) Channel 16 and working Channel 28 and 84. Also see "Pilotage".

TUGS: Caledonian Towage Co. Ltd. – Tel: Invergordon 852611. Suitable tugs up to 50 tonnes bollard pull stationed at the port which work in conjunction with Pilots. Tug's lines used.

BERTHING: *Admiralty Wharf:* The wharf is the property of M.O.D. (Navy), however the berths are used regularly by commercial vessels.

Berths 1 and 2 (Outer South): Lengths 443 ft. Max. draft 36 ft. Max. LOA 800 ft. Also see "Tankers".

Berth 3: Max. draft 18 ft. Max. LOA 290 ft.

Berth 6: Max. draft 18 ft. Max. LOA 200 ft.

British Alcan Pier: Outer Berth: Length 318 ft. Dredged depth 38 ft. MLWS (1974). Max. berthing length 750 ft. approx. using dolphins. (50,000 d.w.t.)

Inner Berth: Length 200 ft. Depth 20 ft. MLWS (1974).

Invergordon Oilfield Support Base, Invergordon: Front berth 150 m., side berth 60 m. Front dredged to 8.9 m. below C.D. Side 5.5 m. minimum. Bunkers diesel – see "Fuel".

Queen's Dock: Length 150 m. Depth at Chart Datum 12.0 m. Also see "Developments".

Highland Deephaven – Evanton: Berthing face length 35 m. Minimum dredged depth 6.4 m. at Chart Datum. Berthing is mainly used by pipe-spooling vessel "Apache" for mooring stern on to berth. Berth also used for conventional coasters and supply vessels up to about 80 m. length and 6.0 m. draft.

CRANES: Mobile cranes up to a maximum 50 tonnes available from stevedoring firms, plus crane-barge of up to 200 tonnes capacity from Caledonian Towage.

STEVEDORES: F. Lyons (Stevedores and crane hirers) – Burghead STD (0343) 835360. James Jack (Stevedores and crane hirers) – Tel: Evanton STD (0349) 830388.

MEDICAL: Medical cases can be dealt with at short notice through local Agent. Hospital facilities available.

TANKERS: Vessels up to 800 ft. Max. draft 36 ft. may use Admiralty Wharf, Berths 1 and 2 combined. Also see "Section-B".

DENSITY: 1022.

FRESH WATER: Obtainable alongside quay. Rate of delivery 30 t.p.h., each hydrant. Rate of delivery at Supply Base is 80 t.p.h.
